**Thursday, June 24, 2021**

HOUSE OF REPRESENTATIVES,  
SUBCOMMITTEE ON ELECTIONS,  
COMMITTEE ON HOUSE ADMINISTRATION,  
*Washington, DC.*

The Subcommittee met, pursuant to call, at 10:05 a.m., in Room 1310, Longworth House Office Building, Hon. G. K. Butterfield [Chair of the Subcommittee] presiding.

Present: Representatives Butterfield, Aguilar, Leger Fernandez, Scanlon, Davis, and Steil.

Also Present: Representative Loudermilk.

Staff Present: Jamie Fleet, Democratic Staff Director; Brandon Jacobs, Legislative Clerk; Dan Taylor, General Counsel; Sean Wright, Senior Elections Counsel; Sarah Nasta, Elections Counsel; David Tucker, Senior Counsel and Parliamentarian; Natalie Young, Press Secretary; Peter Whippy, Communications Director; Tim Monahan, Republican Staff Director; Caleb Hays, Republican General Counsel and Deputy Staff Director; Nick Crocker, Republican Deputy Staff Director; and Mike Cunningham, Republican Policy Advisor.

Chairman BUTTERFIELD. The Subcommittee on Elections of the Committee on House Administration will now come to order. Let me say good morning to all of you and thank you so very much for joining us today.

I am told that the Committee on the Judiciary met until 5 o'clock this morning, and so Ms. Scanlon may be a little late arriving today, and when she does arrive, I am going to accelerate her statement and let her go as early as we possibly can.

As I said, the Judiciary Committee worked until 5 o'clock this morning, and I am told that they will resume their work at 11 o'clock this morning, eastern time.

And so as we begin, colleagues, this morning, I want to note, we are holding this hearing in a hybrid fashion. It is an in-person hearing, and we are doing it remotely. And we are also doing it in compliance with the regulations for remote committee proceedings, pursuant to House Resolution 8.

Generally, we ask any Committee members and witnesses who are joining us remotely to keep their microphones muted when they

are not speaking, and the purpose of this is to limit background noise.

Members will need to unmute themselves when seeking recognition or when recognized for their five minutes.

Witnesses will also need to unmute themselves when recognized for their five minutes or when answering a question.

If you are joining us remotely, thank you for doing so this morning. But please keep in mind that your camera must be on at all times, even if you need to step away for a moment. Please do not leave the meeting or turn your camera off. There are good technical reasons for that. But those are the rules.

Lastly, for those who are joining in person, we are holding this hearing in compliance with the guidance issued by the Office of the Attending Physician, and anyone joining us in the hearing room who is not vaccinated should continue to please, please, please wear your mask.

At this time, I will ask unanimous consent that the Chair be authorized to declare a recess of this Subcommittee at any point, and that all members have five legislative days in which to revise and extend their remarks and have any written statements be made part of the record.

I hear no objections. It is therefore ordered.

Today's hearing, ladies and gentlemen, is the fifth—number five—it is the fifth in our Subcommittee series examining voting in America.

Today we will discuss changes in election administration and voting laws that change methods of election, alter jurisdictional boundaries, and redraw district lines, as well as a national perspective on the state of the right to vote in our great country.

As we sit here today, it cannot go unacknowledged that tomorrow is the eighth anniversary of the Supreme Court's decision in *Shelby County v. Holder*, a case that we are all familiar with, a decision that reshaped the landscape of voting rights and protecting the right to vote in this country.

This decision opened the door to a wave of suppressive voting measures that are no longer subject to a review by the Department of Justice for its discriminatory impact.

Since that decision, the *Shelby* decision, access to the ballot has been under constant attack, sometimes overtly through direct attacks on opportunities to vote, as we discussed at previous hearings, discriminatory voter ID laws, changes to polling locations that can disenfranchise minority voters and lead to long wait lines, and lack of access to language materials.

Sometimes these attacks are less overt, like moving district lines or changing election procedures under the guise of election integrity.

The evidence and data this Subcommittee has heard so far and we have collected through these hearings, it seems to me to be undeniable. The changes to election laws and procedures we have discussed can and are enacted and administered in a discriminatory manner.

As I said when we began this series of hearings, one of our most sacred rights in this country is the absolute right to vote. However, as the evidence has shown, access to the ballot in this country is

not, and it has not been, free, nor fair for all eligible voters. I am not just talking about voters on one side of the political persuasion, but all eligible voters.

Eight years after the Supreme Court decided *Shelby*, our work continues. As our dear friend and my dear friend and former colleague, the late Congressman John Lewis, often said, the vote is precious. John would tell us in our caucus meetings, it is almost sacred. And so we can, and we must, do better.

The testimony provided today will be informative, as we seek to understand what needs to be done to safeguard our elections and guarantee equal access to the ballot box.

We must, colleagues, we must comply with the Supreme Court's directive that we create a new formula—Section 4, we call it—a new formula, narrowly tailored to meet current conditions.

We have seen in other hearings that a law which is neutral on its face, or at least appears to be neutral on its face, can actually violate Section 5, which is still the law of the land.

I remind you, the Supreme Court did not strike down Section 5. It found Section 4, the formula, to be unconstitutional.

If the law disproportionately and materially burdens minority voters when measured against preexisting State law, then it violates Section 5.

I want to repeat that, and then I am going to close, because so many of my colleagues, not on this Committee, but throughout the House and the Senate, many of our colleagues really don't fully understand and appreciate this.

If a law, a new law, disproportionately and materially burdens minority voters when it is measured against preexisting State law, then it violates Section 5.

And so with that said, Mr. Ranking Member, I look forward to hearing from today's witnesses. I will continue to work with my colleagues to protect this sacred right.

It is now my pleasure to recognize the Ranking Member, and I can now honestly say, my friend, Mr. Steil, for any opening statements that he might have.

Chairman G. K. Butterfield  
Opening Statement  
Subcommittee on Elections

Today's hearing is the fifth in our Subcommittee's series examining voting in America. Today, we will discuss changes in election administration and voting laws that change methods of election, alter jurisdictional boundaries, and redraw district lines, as well as a national perspective on the state of the right to vote in this country.

As we sit here today, it cannot go unacknowledged that tomorrow is the eighth anniversary of the Supreme Court's decision in *Shelby County v. Holder*, a decision that reshaped the landscape of voting rights and protecting the right to vote in this country. This decision opened the door to a wave of suppressive voting measures that are no longer subject to a review for discriminatory impact.

Since the *Shelby* decision, access to the ballot has been under attack. Sometimes overtly through direct attacks on opportunities to vote as we discussed at previous hearings—discriminatory voter ID laws, changes to polling locations that can disenfranchise minority voters and lead to long wait times, and lack of

access to language materials. Sometimes these attacks are less overt, like moving district lines or changing election procedures under the guise of “election integrity.”

The evidence and data this Subcommittee has heard and collected through these hearings is undeniable, the changes to election laws and procedures we have discussed can and are enacted and administered in a discriminatory manner.

As I said when we began this series of hearings, one of our most sacred rights in this country is the right to vote. However, as the evidence has shown, access to the ballot in this country is not and has not been free nor fair for all eligible voters.

Eight years after the Supreme Court decided *Shelby County v. Holder*, our work continues. As our dear friend and colleague, the late Congressman John Lewis would remind us, “the vote is precious, almost sacred.”

We can and must do better. The testimony provided today will help guide us as this Subcommittee seeks to understand what needs to be done to safeguard our elections and guarantee equal access to the ballot box.

I look forward to hearing from today’s witnesses and continuing to work with my colleagues to protect this sacred right.

Mr. STEIL. Thank you, Mr. Chairman.

Earlier this week, H.R. 1, S. 1, failed to advance in the Senate. H.R. 1 and S. 1 would have created the first-ever public financing of congressional campaigns. It would have gutted voter ID laws. It would have legalized ballot harvesting nationwide. It would have weaponized the FEC. It would have limited free speech protections for Americans. And it would have nationalized our elections.

Luckily, the bill failed to achieve 60 votes in the United States Senate.

When Democratic Senator Joe Manchin announced his opposition to H.R. 1 and S. 1, he wrote, quote, “Partisan voting legislation will destroy the already weakening binds of our democracy,” end quote.

He was chastised when he said that by the Left. One of our colleagues, one of our Democratic colleagues from the New York delegation said Manchin’s op-ed might as well have been titled, quote, “Why I Will Vote to Preserve Jim Crow,” end quote.

Unfortunately, this isn’t the first time we have heard this kind of ridiculous rhetoric, disinformation, and scare tactics about many of the election integrity laws States have in place or are passing to make it easy to vote but hard to cheat.

We heard the same rhetoric in my home State of Wisconsin when the State implemented voter ID. But in practice, this is not the case. The 2020 election, almost 76 percent of eligible voters cast a ballot, the fourth highest rate in the country.

Another Member of the New York delegation recently described States’ efforts to bolster voter confidence through smart reforms as, quote, “voter suppression epidemic,” end quote, on CNN’s “State of the Union.”

And President Joe Biden called Georgia’s law, quote, “un-American, sick, and Jim Crow on steroids,” end quote. Eventually, that earned him four Pinocchios in The Washington Post.

When you take the time to read the legislation and analyze these State laws, you will find that many States’ Democrats are crying wolf about actually having less restrictive voting laws in many Democratically controlled States, such as New York or Delaware.

However, it just doesn’t fit their narrative. It is all part of an effort to convince the American people that the laws being passed by States are so racist or suppressive that the only option is for the great, benevolent Federal Government to take over. This is a dangerous and false narrative.

I am thankful that our country has come a long way since the passage of the Voting Rights Act of 1965. It is important to recognize.

It is also important to remember the history behind the need for that legislation, which was intended to protect and promote minority voter registration and turnout, a moral and just goal.

Our colleague, Congressman Burgess Owens, testified about this at the Senate hearing on H.R. 1 and S. 1, sharing his experience with Jim Crow laws growing up in the Deep South and noting how dangerous it is to spread the false narrative that Jim Crow laws are being implemented today.

Congressman Owens stated in his testimony, quote, “It is disgusting and offensive to compare the actual voter suppression and

violence of the era that we grew up in with a State law that only asks people to show their ID," end quote.

While Senate Republicans may have stopped H.R. 1 and S. 1, this Committee hearing today is proof that Democratic efforts to nationalize our elections are far from over.

As House and Senate Democrats turn their attention to pass H.R. 4, we need to examine the power of the Voting Section of the Civil Rights Division of the Justice Department, which Democrats wish to expand.

For example, if H.R. 4, as written last Congress, were to become law, the State of Wisconsin would need to get preclearance from unelected bureaucrats in Washington to implement commonsense voter ID laws. H.R. 4 would essentially remove States' constitutional authority to run their own elections.

With the failure of H.R. 1, make no mistake, H.R. 4 is Democrats' next attempt at a Federal takeover of our election system.

Although unrelated to today's hearing, I just want to quickly mention something that happened in our hearing that was very concerning—at our last hearing—that was concerning about the use of Zuckerbucks in election administration.

Mark Zuckerberg poured more than \$350 million into this supposedly nonpartisan nonprofit to help election administrators across the country conduct elections during the pandemic.

However, the Foundation for Government Accountability found that much of these dollars went into heavily Democratic areas. For example, the research found that 92 percent of the funding in Pennsylvania went to counties that broke in favor of President Biden.

In another example in Wisconsin, they found that \$9.6 million that went into Wisconsin, \$7.5 million of that went into just five cities, the cities of Milwaukee, Madison, Green Bay, Kenosha, and Racine, heavily Democratic areas.

This amount of private money going to influence the administration of our elections is concerning, and I believe it is something that this Committee should take up and examine.

With that, Mr. Chairman, I look forward to today's discussion, and I yield back.

Ranking Member Brian Steil  
Opening Statement  
Subcommittee on Elections

Thank you, Mr. Chairman. H.R. 1 and S. 1 would have created the first ever public financing of Congressional campaigns. It would have gutted voter ID laws. It would have legalized ballot harvesting nationwide and also have weaponized the FEC. This bill would also have nationalized our elections.

The bill luckily failed to achieve 60 votes in the United States Senate. When Democratic Senator Joe Manchin announced his opposition to H.R. 1 and S. 1, he wrote, quote, “Partisan voting legislation will destroy the already weakening binds of our democracy.” He was chastised when he said that by the Left. One of our Democratic colleagues from the New York delegation said Manchin’s op-ed might as well have been titled, quote, “Why I will vote to preserve Jim Crow.”

We heard the same rhetoric in my home state of Wisconsin when the State implemented voter ID. The 2020 election saw almost 76 percent of eligible voters cast a ballot, the fourth highest rate in the country. Another Member of New York’s delegation recently described States’ efforts to bolster voter confidence through smart reforms as, quote, “voter suppression epidemic” on CNN’s State of the Union.

I am thankful our country has come a long way since the passage of the Voting Rights Act of 1965. It is important to recognize. The amount of private money going to influence the administration of our

elections is concerning, and I believe it is something that this Committee should take up and examine.

Mr. Chairman, I look forward to today's discussion, and I yield back the remainder of my time.

Chairman BUTTERFIELD. The gentleman yields back.

And I thank you, Mr. Ranking Member, for your comments, and thank you for all that you do for this Committee and for your constituents.

In your opening statement, you made reference to my friend and your friend, Senator Manchin, and thank you very much for those kind words about Senator Manchin. He is, indeed, a principled and thoughtful United States Senator.

I recall the Senator making a statement about H.R. 1, and my recollection is that he does not disagree with H.R. 1, he disagrees with certain portions of H.R. 1. But he published a statement of the things that he agreed with and would be willing to support.

And also Senator Manchin supports updating the formula. We have some differences of opinion about how it should be done, but Senator Manchin is on record in support of reauthorizing Section 4.

With that in mind, let me recognize the Ranking Member of the full Committee, Mr. Davis, Rodney Davis of Illinois.

Mr. DAVIS. Thank you, Mr. Chair. It is great to see you. I appreciate another opportunity to talk about these very important issues.

Considering the important nature of this hearing, I am actually pleased to hear from the National Republican Redistricting Trust and ask unanimous consent, Mr. Chair, that their testimony be entered into the record.

Chairman BUTTERFIELD. Without objection.

[The information follows:]

Mr. DAVIS. We know this is a majority-driven institution, and the majority gets to pick a lot more witnesses than what we do. So this gives us a chance to get some other witness testimony into the record, because we all know the Democrats are holding this hearing to develop a new preclearance formula.

The Supreme Court struck down as unconstitutional the old formula. That old formula looked at primarily minority voting registration and turnout, subjecting underperforming jurisdictions to preclearance, an extreme remedy that allowed a Federal court or the Federal Department of Justice to prevent a State law or a municipal ordinance from going into effect.

And our Ranking Member, Mr. Steil, laid this out very effectively just a few minutes ago.

Thankfully, that extreme remedy is no longer required. Minority voter turnout has hit record levels, and minority voter registration is also high.

We still have some work to do, but nothing rises to the level of requiring preclearance, a direct affront on State sovereignty and equal dignity.

When it comes to redistricting, States must maintain the authority to determine the best methods for their own citizens, which may rely on maps drawn by the legislature or a commission.

However, I can tell you as somebody who lives in the State of Illinois, I am for independent commissions. I think the process has been corrupted by politicians from both sides.

I am pleased that many Democrats appear to be coming around to voter ID, the highly popular policy that is important for sup-

porting voter confidence in our election processes and their outcomes. Even Stacey Abrams and President Carter approved of voter ID.

Finally, we must ensure that we remove any Federal policies that serve as improper impediments to Native American participation in Federal elections.

Mr. Chair, thanks for the opportunity to offer opening comments. I yield back.

Chairman BUTTERFIELD. And thank you, Mr. Davis, for your words.

At this time, I am going to introduce today's first panel. But before I do that, as a reminder to our witnesses, each of you will be recognized for five minutes. For those who are appearing virtually, there is a timer on your screen. Look right up there and you will see the timer. Please be sure that you can see the timer and are mindful of the five-minute time limit.

For those who are joining us in person, there is a lighting system and timer in front of you. Please be mindful of the lights and the five-minute limit.

Your entire written statements will be made part of the record, and the record will remain open for at least five days for additional materials to be submitted.

Welcome to each of our witnesses today.

Joining us today on our first panel are Jerry Vattamala. Jerry is of the Asian American Legal Defense and Education Fund.

Also Patty Ferguson-Bohnee—and if I am mispronouncing any of these names, please forgive me, I am from eastern North Carolina—Patty Ferguson-Bohnee of the Indian Legal Clinic at the Sandra Day O'Connor College of Law.

We also have Mr. Eric H. Holder, Jr., of the National Democratic Redistricting Committee. And as we all know, he is the former Attorney General.

And Thor Hearne of the True North Law Group.

Next, we will now recognize Jerry Vattamala. Well, let me introduce Jerry Vattamala in more detail.

He is the Director of the Democracy Program at the Asian American Legal Defense and Education Fund. He has worked in election protection on behalf of Asian American voters, litigated and testified on redistricting issues. He has litigated cases concerning violations of Section 203 and 208 of the Voting Rights Act. He is also an adjunct professor of law at New York Law School.

Next is Patty Ferguson-Bohnee. She is the Director of the Indian Legal Clinic at the Sandra Day O'Connor College of Law at Arizona State University, ASU. She is also a clinical professor of law, the faculty director of the Indian Legal Program.

She has substantial experience in Indian law—and that is something this Committee, on both sides of the aisle, we are all concerned about—election law, and policy matters, and she also concentrates on voting rights.

She also testified before this Subcommittee twice last Congress—I remember it well—on issues impacting access to the ballot for Native American voters.

She is a member of the Pointe-au-Chien Tribe, and serves as the Native vote election protection coordinator for the State of Arizona.

Mr. Eric H. Holder, Jr., is the former Attorney General of the United States. He serves as the Chairman of the National Democratic Redistricting Committee.

General Holder served in the Obama administration as Attorney General of the United States from 2009 to 2015, the third-longest serving Attorney General in U.S. history and the first African American to hold that office. Also, with relatives in Raleigh, North Carolina, I might say that.

Next, is Thor Hearne II. Thor is a founding partner of True North Law Group and has worked in Federal and State litigation and appeals in matters involving property rights, constitutional law, and election issues.

Mr. Hearne has argued cases before the U.S. Supreme Court, the circuit courts of appeals, and various State supreme courts. He served as President Bush's national election counsel in the 2004 campaign and was an adviser to the Carter-Baker Commission on Federal election reform.

That concludes my introductions. I will now recognize the witnesses each for five minutes.

Mr. Vattamala, you are recognized.

**STATEMENTS OF JERRY VATTAMALA, DIRECTOR, DEMOCRACY PROGRAM, ASIAN AMERICAN LEGAL DEFENSE AND EDUCATION FUND; PATTY FERGUSON-BOHNEE, DIRECTOR, INDIAN LEGAL CLINIC, SANDRA DAY O'CONNOR COLLEGE OF LAW; ERIC H. HOLDER, JR., CHAIRMAN, NATIONAL DEMOCRATIC REDISTRICTING COMMITTEE; AND THOR HEARNE, FOUNDING PARTNER, TRUE NORTH LAW GROUP**

**STATEMENT OF JERRY VATTAMALA**

Mr. VATTAMALA. Thank you, Mr. Chair, thank you, Ranking Member, and thank you to the Committee for allowing AALDEF, the Asian American Legal Defense and Education Fund, to testify and put forward forth the perspective of Asian American voters, a perspective that is often not included.

We conduct our Asian American exit poll and poll monitoring programs every major election. We have done this since 1988. In 2020, for the Presidential election, we were in 13 States and Washington, D.C., and had interactions with over 5,000 Asian American voters.

In our work we do focus on the language access provisions of the Voting Rights Act, Sections 203 and 208. These violations are ongoing. In 2015 we sued the State of Texas for violating Section 208. And just a few weeks ago, on June 3, we filed a Section 203 complaint against Hamtramck, Michigan, for not providing Bengali language assistance.

We also do a lot of work on redistricting. As you see in the materials that we have submitted, in the last redistricting cycle, in *Favors v. Cuomo*, a redistricting case out of New York State, we submitted several documents, a memo, as well as some attachments.

And one of those attachments is what we call Asian American communities of interest, the neighborhood maps of 15 Asian American communities of interest in New York City. The way we constructed that map, those 15 different maps, we met with commu-

nity groups and we asked them to identify their own neighborhood boundaries.

That is what we submitted, and on the last three pages of that document, we superimposed those 15 different Asian American communities of interest over the [inaudible] State Senate lines, and congressional lines, and what we found was that every single Asian American community of interest was divided into numerous different legislative [inaudible].

And what this does is, it prevents Asian American voters from electing a candidate of their choice. And it is not a coincidence why there is a population of over 1 million Asian Americans, which would be the tenth-largest city in the United States, Asian Americans had very little electoral success in New York City without fair redistricting.

Indeed, at the time of the last redistricting cycle, there was never an Asian American elected to Congress from New York State, nor did we have an Asian American elected to the State Senate.

Several Asian American communities of interest were divided into as many as six different legislative districts. Again, this denies this community, our community, the opportunity to elect a candidate of its choice.

We had to litigate in Federal court, to argue that these communities of interest should be kept whole and together. The court actually agreed with us at the congressional level, drew a congressional district that kept Asian American communities of interest together. It is centered in Flushing, Queens, where there is a large concentration of Asian American residents.

And for the very first time, just several months later, New York elected the first-ever Asian American to Congress from New York State.

We do this redistricting work all around the country. We are in Boston, we are in Pennsylvania, New Jersey, as well as Texas.

People don't realize, Section 5, we did have coverage in New York. It is not only in the South. We had three counties that were covered under Section 5, which helped us in Section 203 compliance.

It also helped us in the redistricting process. We worked with the Black community and the Latino community in forming what we call a unity map that protected all the communities of color that were protected under the Voting Rights Act.

It was very powerful to have that knowledge that Section 5 was there. And the people that were drawing the map, the legislature, they started from that position of making sure that they are complying with Section 5 and not retrogressing districts that were performing for communities of color, which is very important, and we don't have that.

It is the first redistricting cycle in several decades, 50 years, where we are not going to have this preclearance protection. And in a place like Texas, we know that is essential because, of the few Asian Americans that are elected in Texas, we know there has been consistent efforts to deconstruct and divide their community.

Hubert Vo—it is in my materials—we submitted an amicus brief in the last redistricting cycle. He is the first-ever Vietnamese American elected to the Texas State House. His victory was chal-

lenged. There were racist comments and accusations made about the voters in his district.

He is in a triracial coalition district where Blacks, Latinos, and Asian Americans all vote as a bloc to elect Mr. Vo. In the last round, his district was dismantled, and only because of Section 5 was his district protected and the new redistricting plan kept his district intact.

Chairman BUTTERFIELD. Please begin to wind down.

Mr. VATTAMALA. We do need help from the Department of Justice.

Chairman BUTTERFIELD. Please begin to close out if you will, sir.

Mr. VATTAMALA. They are very upset to see very little action, really no action from the Department of Justice. We need their help in protecting Asian American voters, and we need Section 5 back. Those key protections that we had are very effective in protecting Asian American voters. And we look forward to working with this Committee and making sure that happens.

Thank you.

[The statement of Mr. Vattamala follows:]

**ASIAN AMERICAN LEGAL DEFENSE AND EDUCATION FUND**

Statement of the  
**Asian American Legal Defense and Education Fund**  
Jerry Vattamala, Esq.  
Director, Democracy Program

Before the  
**U.S. House of Representatives Committee on House Administration,  
Subcommittee on Elections**

Hearing  
**“Voting in America: A National Perspective on the Right to Vote, Methods of  
Election, Jurisdictional Boundaries, and Redistricting”**

June 24, 2021

The Asian American Legal Defense and Education Fund (AALDEF), is a 47-year-old national civil rights organization based in New York City that promotes and protects the civil rights of Asian Americans through litigation, legal advocacy, and community education. AALDEF has monitored elections through annual multilingual exit poll surveys since 1988, and has conducted exit polls for every major election since 2008. Consequently, AALDEF has collected valuable data that documents both the use of, and the continued need for, protection under the federal Voting Rights Act (VRA). In 2018, AALDEF dispatched over 600 attorneys, law students, and community volunteers to 81 poll sites in 54 cities in 14 states to document voter problems on Election Day. The survey polled 8,058 Asian American voters. AALDEF has litigated cases around the country under the language access provisions of the VRA, and seeks to protect the voting rights of language minority, limited English proficient (LEP), and Asian American voters. AALDEF has litigated cases that implicate the ability of Asian American communities of interest to elect candidates of their choice, including lawsuits involving equal protection and constitutional challenges to discriminatory redistricting plans.<sup>1</sup>

AALDEF has previously submitted testimony to Congress,<sup>2</sup> testified at hearings, submitted amicus briefs to the Supreme Court of the United States, and released detailed reports regarding Asian American voting experiences and the continued need for the full protections of the VRA, including Section 5 preclearance. AALDEF incorporates by reference the previously submitted documents and the attached documents, referred to as “Attachments A and B”, as well as the below:

- Complaint, *Detroit Action v. City of Hamtramck*, No. 2:21-cv-11315 (E.D. Mich. June 3, 2021)
- Amicus brief submitted to the Supreme Court in *Dep’t. of Commerce v. New York*, 18-966 (April 1, 2019)
- Submission to Magistrate Judge in *Favors v. Cuomo*, No. 11-cv-5632 (E.D.N.Y. Feb. 29, 2012)
- Attachment A (Asian American Neighborhood Maps) to submission to Magistrate Judge in *Favors v. Cuomo*, No. 11-cv-5632 (E.D.N.Y. Feb. 29, 2012)
- Attachment B (Asian American Communities of Interest Survey) to submission to Magistrate Judge in *Favors v. Cuomo*, No. 11-cv-5632 (E.D.N.Y. Feb. 29, 2012)
- Letter from AALDEF to Hamtramck and Michigan election officials, dated April 20, 2020
- Letter from AALDEF, Fair Elections Center, and LatinoJustice PRLDEF to Fairfax County officials, dated June 9, 2020
- Letter from AALDEF and Greater Boston Legal Services to Malden election officials, dated June 24, 2020

The Bd. of Elections in the City of New York*, No. 1:13- cv-03732 (E.D.N.Y. July 2, 2013), ECF No. 1; Complaint, *Chinatown Voter Education All. v. Ravitz*, No. 1:06-cv-0913 (S.D.N.Y. Feb. 6, 2006, ECF No. 1.)

<sup>2</sup> See Joint Statement of the Asian American Legal Defense and Education Fund and Asian Americans Advancing Justice before the Committee on the Judiciary, United States Senate Hearing “From Selma to *Shelby County*: Working Together to Restore the Protections of the Voting Rights Act,” submitted July 17, 2013.

AALDEF submits this testimony to describe the history and current landscape of enforcement of the Voting Rights Act in the United States, and its impact on Asian American<sup>3</sup> voting rights in particular. AALDEF respectfully asks that this testimony be entered into the record. Thank you.

#### **Discrimination Against Asian Americans Creates a Barrier to Voting**

Since Asian immigrants arrived in the United States more than a century ago, they have faced ongoing discrimination and the denial of basic rights. This shameful history of discrimination against the Asian American community in the United States is well known. Until 1943, federal policy barred immigrants of Asian descent from even becoming United States citizens, and it was not until 1952 that racial criteria for naturalization were removed altogether.<sup>4</sup> Indeed, history is replete with examples of anti-immigrant sentiment directed towards Asian Americans, manifesting in legislative efforts to prevent Asian immigrants from entering the United States and becoming citizens.<sup>5</sup> In the not-so-distant past, Asian immigrants were legally identified as aliens “ineligible for citizenship,” and were prohibited from voting and owning land.<sup>6</sup>

Both immigrant and native-born Asian Americans have experienced pervasive discrimination in everyday life.<sup>7</sup> Perhaps the most egregious example of discrimination was the incarceration of 120,000 Americans of Japanese ancestry during World War II without due process.<sup>8</sup> White immigrant groups whose home countries were also at war with the United States were not similarly detained; only Japanese Americans were forced to endure this extraordinary level of unfounded fear and accusation regarding their loyalty, trustworthiness, and character.<sup>9</sup>

---

<sup>3</sup> The notion of “Asian American” encompasses a broad diversity of ethnicities, many of which have historically suffered their own unique forms of discrimination. Discrimination against Asian Americans as discussed here addresses both discrimination aimed at specific ethnic groups and discrimination directed at Asian Americans generally.

<sup>4</sup> See Chinese Exclusion Act of 1882, ch. 126, 22 Stat. 58, 58-61 (prohibiting immigration of Chinese laborers; repealed 1943); Immigration Act of 1917, ch. 29, 39 Stat. 874, 874-98, and Immigration Act of 1924, ch. 190, 43 Stat. 153 (banning immigration from almost all countries in the Asia-Pacific region; repealed 1952); Leti Volpp, *Divesting Citizenship: On Asian American History and the Loss of Citizenship Through Marriage*, 53 UCLA L. Rev. 405, 415 (2005).

<sup>5</sup> See, e.g., Philippines Independence Act of 1934, ch. 84, 48 Stat. 456, 462 (imposing annual quota of fifty Filipino immigrants; amended 1946); Immigration Act of 1924, ch. 190, 43 Stat. 153 (denying entry to virtually all Asians; repealed 1952); Scott Act of 1888, ch. 1064, 1, 25 Stat. 504, 504 (rendering 20,000 Chinese re-entry certificates null and void); Naturalization Act of 1790, ch. 3, 1 Stat. 103 (providing one of the first laws to limit naturalization to aliens who were “free white persons” and thus, in effect, excluding African-Americans, and later, Asian Americans; repealed 1795).

<sup>6</sup> See *Ozawa v. United States*, 260 U.S. 178, 198 (1922); see also, e.g., Cal. Const. art. II, § 1 (1879) (“no native of China . . . shall ever exercise the privileges of an elector in this State”); *Oyama v. California*, 332 U.S. 633, 662 (1948) (Murphy, J., concurring) (noting that California’s Alien Land Law “was designed to effectuate a purely racial discrimination, to prohibit a Japanese alien from owning or using agricultural land solely because he is a Japanese alien”).

<sup>7</sup> See, e.g., *Gong Lum v. Rice*, 275 U.S. 78 (1927) (upholding segregation of Asian schoolchildren); *People v. Brady*, 40 Cal. 198, 207 (1870) (upholding law providing that “No Indian . . . or Mongolian or Chinese, shall be permitted to give evidence in favor of, or against, any white man” against Fourteenth Amendment challenge).

<sup>8</sup> See Exec. Order 9066, 7 Fed. Reg. 1407 (Feb. 19, 1942) (authorizing Japanese incarceration); see also *Korematsu v. United States*, 323 U.S. 214 (1944) (upholding the incarceration under strict scrutiny review).

<sup>9</sup> See *Korematsu*, 323 U.S. at 233, 240-42 (Murphy, J., dissenting) (noting that similarly situated American citizens of German and Italian ancestry were not subjected to the “ugly abyss of racism” of forced detention based on racist assumptions that they were disloyal, “subversive,” and of “an enemy race,” as Japanese Americans were); Natsu Taylor Saito, *Internments, Then and Now: Constitutional Accountability in Post-9/11 America*, 72 Duke F. for L. & Soc. Change 71, 75 (2009) (noting “the presumption made by the military and sanctioned by the Supreme Court that

Racist sentiment towards Asian Americans is not merely a matter of historical injustice but a continuing reality, fueled in more recent years by reaction to the COVID-19 pandemic<sup>10</sup> and reactionary post-9/11 prejudice and a growing backlash against immigrants.<sup>11</sup> Numerous hate crimes throughout the country have been directed against Asian Americans, either because of their minority group status or because they are perceived as unwanted immigrants.<sup>12</sup> As the Asian American population grows, these incidents are likely to increase.

Asian Americans have become the fastest growing racial group in the United States. While the total population in the United States rose by 10 percent between 2000 and 2010, the Asian American population increased by 46 percent during that same time span.<sup>13</sup> The Asian American population has grown most rapidly in the South, increasing by 69 percent from 2000 to 2010.<sup>14</sup> The growth of the Asian American community has been especially notable in the State of Texas. From 2000 to 2010, the Asian American population in Texas grew by 72 percent, and Texas was the state that experienced the second largest numeric growth of its Asian American community (behind only California), increasing from a population of 644,000 in 2000 to 1.1 million in 2010.<sup>15</sup>

When groups of minorities move into or outpace general population growth in an area, reactions to the influx of outsiders can result in racial tension.<sup>16</sup> Thus, as Asian American populations continue to increase rapidly, particularly in Texas, levels of racial tension and discrimination

<sup>10</sup> Japanese Americans, unlike German or Italian Americans, could be presumed disloyal by virtue of their national origin”).

<sup>11</sup> Hate crimes against Asian Americans in 16 cities rose by 150 percent in 2020, a recent report from the Center for the Study of Hate and Extremism at California State University, San Bernardino revealed. See Li Zhou, Anne Anlin Cheng and Manju Kulkarni, *The Rise In Anti-Asian Attacks During The COVID-19 Pandemic*, NPR (March 10, 2021), available at <https://www.npr.org/2021/03/10/975722882/the-rise-of-anti-asian-attacks-during-the-covid-19-pandemic>

<sup>12</sup> See, e.g., U.S. Dep’t of Justice, *Confronting Discrimination in the Post-9/11 Era: Challenges and Opportunities Ten Years Later*, at 4 (Oct. 19, 2011) (noting that the FBI reported a 1,600 percent increase in anti-Muslim hate crime incidents in 2001), available at [https://www.justice.gov/sites/default/files/crt/legacy/2012/04/16/posi911summit\\_report\\_2012-04.pdf](https://www.justice.gov/sites/default/files/crt/legacy/2012/04/16/posi911summit_report_2012-04.pdf).

<sup>13</sup> See, e.g., id. at 7-9 (discussing numerous incidents of post-9/11 hate crimes prosecuted by the DOJ).

<sup>14</sup> U.S. Census Bureau, *The Asian Population: 2010*, at 1, 3 (2012), available at <https://www.census.gov/prod/cen2010/briefs/c2010br-11.pdf>. These figures include people who reported themselves as belonging to only one Asian group, as well as members of the Asian American community’s rapidly growing multiracial population; this population is collectively referred to as “Asian alone or in combination.” From 2000 to 2010, the “Asian alone” population increased by only a slightly lower rate of 43 percent.

<sup>15</sup> Id. at 6.

<sup>16</sup> Id. at 8.

<sup>17</sup> See, e.g., Gillian Gaynair, *Demographic shifts helped fuel anti-immigration policy in Va.*, The Capital (Feb. 26, 2009), available at <http://www.hometownannapolis.com/news/gov/2009/02/26-10/Demographic-shifts-helped-fuel-anti-immigration-policy-in-Va.html> (noting that longtime residents of Prince William County, Virginia, perceived that their quality of life was diminishing as Latinos and other minorities settled in their neighborhoods); James Angelos, *The Great Divide*, N.Y. Times, Feb. 22, 2009 (describing ethnic tensions in Bellrose, Queens, New York, where the South Asian population is growing), available at <http://www.nytimes.com/2009/02/22/nyregion/thecity/22froz.html?r=3&pagewanted=1>; Ramona E. Romero and Cristóbal Joshua Alex, *Immigrants becoming targets of attacks*, The Philadelphia Inquirer, Jan. 25, 2009 (describing the rise in anti-Latino violence where the immigration debate is heated in New York, Pennsylvania, Texas, and Virginia); Sara Lin, *An Ethnic Shift is in Store*, L.A. Times, Apr. 12, 2007, at B1 (describing protest of Chino Hill residents to Asian market opening in their community where 39% of residents were Asian), available at <http://articles.latimes.com/2007/apr/12/local/me-chinohills12>.

against this community can also be expected to increase. In fact, many hate crimes and other racist incidents have been reported in Texas in recent years.<sup>17</sup>

Even a Texas lawmaker, Betty Brown, publicly commented that Asian American voters should change their names to accommodate poll workers. At a hearing regarding voter identification, Brown stated: “Rather than everyone here having to learn Chinese—I understand it’s a rather difficult language—do you think that it would behoove *you and your citizens* to adopt a name that *we* could deal with more readily here? . . . Can’t you see that this is something that would make it a lot easier for you and the people who are poll workers if you could adopt a name just for identification purposes that’s easier for *Americans* to deal with?”<sup>18</sup> Beyond the indignity of this request and the implications that Chinese Americans are not really *Americans*, this statement also demonstrates ignorance of an obvious and significant problem faced by many Asian American voters: by sometimes using their legal names and sometimes using names that are “easier for Americans to deal with,” the names listed on these voters’ various forms of identification may not match with their names on the voter rolls, and this inconsistency may prevent them from voting.

Such discrimination creates an environment of suspicion and resentment towards Asian Americans, who are often still perceived as perpetual “outsiders,” “aliens,” or “foreigners.”<sup>19</sup>

Singh, *Everything I’m Not Made Me Everything I Am: The Racialization of Sikhs in the United States*, 14 ASIAN PAC. AM. L.J. 54, 85 (2008) (describing police violence against Sikh family in Houston, where police officers questioned family member about kirpan, ordered her to “shut up,” aimed taser at her head, forced her to the ground with a “knee . . . put to her back,” handcuffed her and her other family members, and asked if family members had “heard about the bombings in Bombay”).

<sup>18</sup> R.G. Ratcliffe, *Texas lawmaker suggests Asians adopt easier names*, HOUSTON CHRONICLE (Apr. 8, 2009), <https://www.chron.com/news/houston-texas/article/Texas-lawmaker-suggests-Asians-adopt-easier-names-1550512.php>. (emphasis added)

<sup>19</sup> See, e.g., Claire Jean Kim, *The Racial Triangulation of Asian Americans*, 27 Pol. & Soc’y 105, 108-16 (1999) (describing history of whites perceiving Asian Americans as foreign and therefore politically ostracizing them). In

based on their physical and cultural attributes. This perception, coupled with the growing sentiment that foreigners are destroying the country, could threaten Asian Americans' ability to exercise their right to vote free of harassment and discrimination.

Asian American voting rights are in even greater jeopardy since the Supreme Court gutted the Voting Rights Act in *Shelby County v. Holder*<sup>20</sup> in 2013, by effectively eviscerating the Section 5 preclearance requirement for proposed changes in certain states' election practices or procedures. In the past, the federal preclearance process worked extremely well to prevent states from enacting discriminatory voting laws and procedures, and also allowed covered jurisdictions to "bail-out" from preclearance coverage if they could show that they no longer discriminated. For Texas alone, the Department of Justice has issued dozens of objection letters regarding proposed election practices and procedures under Section 5 of the Voting Rights Act.<sup>21</sup> Unfortunately, without any current Section 5 coverage for Texas (or any other state), Asian Americans are susceptible to extensive discrimination in voting. Voters in Texas were particularly vulnerable under the former administration, because AALDEF is unaware of *any* VRA actions brought by the Department of Justice to protect voters.<sup>22</sup>

In the years since *Shelby County*, multiple federal circuit and district courts have found intentional racial discrimination in state legislation in formerly covered jurisdictions, including Texas. This is precisely why these jurisdictions could not "bail-out" of coverage pre-*Shelby*, and illustrates why Congress must enact a new coverage formula now to prevent continued and pervasive voting discrimination.

Additionally, limited English proficient (LEP) voters, including many Asian American voters, face additional barriers at the polls. Section 203 of the Voting Rights Act requires some jurisdictions to provide translated ballots and voting materials as well as oral language assistance for LEP voters.

---

2001, a comprehensive survey revealed that 71% of adult respondents held either decisively negative or partially negative attitudes toward Asian Americans. Committee of 100, *American Attitudes Toward Chinese Americans and Asians* 56 (2001), available at <http://www.committee100.org/publications/survey/C100survey.pdf>. Racial representations and stereotyping of Asian Americans, particularly in well-publicized instances where public figures or the mass media express such attitudes, reflect and reinforce an image of Asian Americans as "different," "foreign," and the "enemy," thus stigmatizing Asian Americans, heightening racial tension, and instigating discrimination. <sup>21</sup> See *Section 5 Objection Letters*, Dep't of Justice, available at [http://www.justice.gov/crt/records/vot/obj\\_letters/index.php](http://www.justice.gov/crt/records/vot/obj_letters/index.php).

<sup>22</sup> See U.S. Dep't of Justice, *Voting Section Litigation, Cases Raising Claims Under Section 2 of the Voting Rights Act*, <https://www.justice.gov/crt/voting-section-litigation> (last updated Sept. 27, 2018) ("Voting Section Litigation"). The DOJ's last listed complaint under Section 2 of the VRA was filed on January 10, 2017, before former Attorney General Jeff Sessions was sworn into office. As far as Amici are aware, the only VRA-related action taken by the current DOJ administration was the voluntary withdrawal of a key argument in a Section 2 discriminatory purpose claim in an existing case involving Texas voter identification laws. The court granted the DOJ's motion, but specifically rejected the basis of DOJ's given reasoning for withdrawing the claim. See *Veasey v. Abbott*, 248 F. Supp. 3d 833 (S.D. Tex. 2017).

### Section 203 of the VRA

Since its enactment in 1975, Section 203 of the Voting Rights Act has proven to be a clear and effective measure to ensure access to LEP voters through language assistance. Based on AALDEF’s analysis of covered jurisdictions required to provide Asian language assistance under Section 203, the jurisdiction with the most significant violations appears to be Hamtramck, Michigan.

Hamtramck, Michigan is required to provide translations of all voting information and materials (including election websites) and oral language assistance for Bangladeshi voters (in Bengali); however, no portion of Hamtramck’s election website is translated. AALDEF submitted a demand letter to the City Clerk, August Gitschlag, regarding his failure to comply on April 20, 2020,<sup>23</sup> but as of the date of this submission, Hamtramck’s election website still does not show signs of any effort at Bengali translation.<sup>24</sup> It is also important to note that the representative of Michigan’s 4th House District, which includes the entire City of Hamtramck, tragically passed away due to COVID-19. The governor set a special primary election for August 4, 2020, and the petitioning deadline for Republican and Democratic candidates was set for April 21, 2020. At the time of that deadline, none of the candidate qualifying information was translated into Bengali, despite the fact that the special election for this house district covers the entire City of Hamtramck, which is covered for Bengali language assistance under Section 203 of the Voting Rights Act. AALDEF never received a response to the August 20, 2020 letter that was sent, and ultimately ended up filing a federal Complaint on June 3, 2021 to enjoin the City Clerk from continuing to violate Section 203.<sup>25</sup>

Under Section 203, Fairfax County, Virginia is required to provide language assistance to Spanish and Vietnamese voters. While Fairfax County’s election website has an option to use Google Translate’s “machine translation” service, its own disclaimer acknowledges that the translation is “not context-sensitive and may not fully convert text into its intended meaning. Fairfax County Government cannot guarantee the accuracy of the converted text nor are we liable for any resulting issues.”<sup>26</sup> Moreover, Fairfax County’s website only provided a link to an English absentee ballot request form.<sup>27</sup> AALDEF, Fair Elections Center, and LatinoJustice PRLDEF corresponded with Fairfax County election officials regarding Section 203 compliance, and submitted a demand letter on June 9, 2020, in light of the likely increase in voters (including

---

<sup>23</sup> For more information, see the attached letter from AALDEF to Hamtramck and Michigan election officials, dated April 20, 2020.

<sup>24</sup> See <https://hamtramck.us/departments/city-clerk/elections/>. AALDEF also pointed out the lack of a translated Bengali absentee ballot request form on Michigan’s Secretary of State’s website, but we are pleased to see that the state website has since been updated with a Bengali version of the absentee ballot application. See [https://www.michigan.gov/sos/0.4670.7-127-1633\\_8716---00.html](https://www.michigan.gov/sos/0.4670.7-127-1633_8716---00.html). The state website also provides a Bengali version of the voter registration form, but Hamtramck still only provides a link to the English version of this form.

<sup>25</sup> See Complaint, *Detroit Action v. City of Hamtramck*, No. 2:21-cv-11315 (E.D. Mich. June 3, 2021), attached.

<sup>26</sup> See <https://www.fairfaxcounty.gov/elections/> (Google Translate option in top right corner of page).

<sup>27</sup> See <https://www.fairfaxcounty.gov/elections/absentee> (under “ABSENTEE VOTING BY-MAIL”).

LEP voters) who would seek to vote absentee in upcoming elections in the midst of a pandemic.<sup>28</sup>

Jurisdictions also fail to ensure equal access to minority voters (including LEP voters) by failing to provide access to interpreters, or through hostile or discriminatory treatment of these voters by poll workers. When AALDEF monitored the March 3, 2020 primary election in Malden, Massachusetts (a jurisdiction covered under Section 203 for Chinese language assistance), we discovered numerous such problems.<sup>29</sup>

#### **Redistricting**

##### **Perry v. Perez**

Before the Supreme Court effectively eviscerated the preclearance requirement of Section 5 of the Voting Rights Act in its *Shelby County* decision, the Court considered the discriminatory intent and effect of a proposed Texas redistricting plan in *Perry v. Perez*. AALDEF submitted an *amicus* brief urging the Supreme Court to affirm the Texas district court's interim redistricting plan after the Department of Justice contended that the Texas state legislature's plan diluted the voting power of Asian Americans and other people of color.

At the time of this case, Texas State House District 149 had a combined minority citizen voting-age population of around 62 percent.<sup>30</sup> Since 2004, the Asian American community in District 149 has voted as a bloc with Hispanic and African American voters to elect Hubert Vo, a Vietnamese American, as their state representative. Vo's election was particularly significant for the Asian American community because he was the first Vietnamese American state representative in Texas history.<sup>31</sup>

In 2011, the Texas Legislature sought to eliminate Vo's State House seat and redistribute the coalition of minority voters to the surrounding three districts. Plan H283, if implemented, would have redistributed the Asian American population in certain State House voting districts, including District 149 (Vo's district), to districts with larger non-minority populations.<sup>32</sup> Plan H283 would have thus hindered the Asian American community's right to vote in Texas by diluting the large Asian American populations across the state.

Following a trial in January of 2012, the three-judge district court in Washington, D.C. denied Section 5 preclearance on August 28, 2012, in a comprehensive and mostly unanimous opinion. The court found that the congressional and state redistricting plan had both a retrogressive effect

<sup>29</sup> For more information, see the attached letter from AALDEF and Greater Boston Legal Services to Malden election officials, dated June 24, 2020.

<sup>30</sup> See United States and Defendant-Intervenors Identification of Issues 6, *Texas v. United States*, C.A. No. 11-1303 (D.D.C.), Sept. 29, 2011, Dkt. No. 53.

<sup>31</sup> See Test. of Ed Martin, Trial Tr. at 350:15-23, *Perez v. Perry*, 835 F. Supp. 2d 209 (W.D. Tex. 2011) (hereinafter "Martin Test."); Test. of Rogene Calvert, Trial Tr. at 420:2-421:13, *Perez*, 835 F. Supp. 2d 209; Test. of Sarah Winkler, Trial Tr. at 425:18-426:10, *Perez*, 835 F. Supp. 2d at 209.

<sup>32</sup> See Martin Test. at 350:25-352:25. District 149 would have been relocated to a county on the other side of the State, where there are few minority voters. See Plan H283, available at <http://gis1.tlc.state.tx.us/download/House/PLANH283.pdf>.

and a racially discriminatory purpose (though this decision later had to be vacated and remanded in light of the Supreme Court's decision in *Shelby County* and its implications for all Section 5 preclearance claims). Since Section 5 of the Voting Rights Act no longer applies to the State of Texas, disruptive changes to redistricting plans, polling sites, and voting systems can now occur unfettered, wreaking havoc on Asian American voters' ability to cast an effective ballot. As mentioned above, the DOJ under the former administration had not brought a single VRA case, so it will fall on AALDEF and other such groups to continue to identify and litigate each individual discriminatory act or action to protect naturalized citizen voters, LEP voters and other targeted groups.

AALDEF's *amicus* brief has been submitted for the record, in Attachment B.

#### **Favors v. Cuomo**

Asian Americans have been historically disenfranchised in the redrawing of district boundaries and in their right to vote.<sup>33</sup> AALDEF has a long history in defending the voting rights and political representation of Asian Americans.

In the past, redistricting plans have diluted Asian American voting strength by fragmenting communities into multiple districts.<sup>34</sup> Even in places like New York City, past and current congressional district boundaries have divided Asian American communities.<sup>35</sup> In the *Favors v. Cuomo* litigation, AALDEF submitted Asian American Neighborhood Maps, for 15 Asian American Communities of Interest (COI) in New York City.<sup>36</sup> On the last three pages of this document, AALDEF superimposed the then existing State Assembly, Senate and Congressional district lines over the Asian American COIs, revealing how divided each of these COIs were among multiple legislative districts, essentially denying this community the ability to elect candidates of their choice.<sup>37</sup> Some Asian American neighborhoods, such as Richmond Hill/South Ozone Park, were divided among six (6) different state assembly districts and is currently divided among five (5) districts.

AALDEF was ultimately able to convince the Special Master to draw a fair congressional district in Queens that kept Asian American COIs whole, and together.<sup>38</sup> Several months later that district elected the first Asian American to Congress from New York State, and it was primarily because the community was finally allowed the opportunity to elect a candidate of its choice. This result was likely only possible through federal litigation.

---

<sup>33</sup> Cf. S. Rep. No. 94-295, 94th Cong., 1st Sess. 28-30 & n. 21 (1975) (noting that “[d]iscrimination against Asian Americans is a well known and sordid part of our history.”); 42 U.S.C. §§ 1973b(f), 1973l(c)(3) (extending the Voting Rights Act to cover “language minorities,” including “persons who are . . . Asian American.”).

<sup>38</sup> See AALDEF Commends Court-Drawn Congressional Redistricting Plan For Keeping Asian American Communities Together, available at <https://www.aaldef.org/press-release/aaldef-commends-court-drawn-congressional-redistricting-plan-for-keeping-asian-american-communities/>

The DOJ should be playing a major role in protecting minority voters, as it has in the past.<sup>39</sup> Racial justice and good government groups have limited resources, and because of the *Shelby County* ruling, do not have notice of many discriminatory voting changes that affect minority voters. Individual affirmative cases require a large amount of human and financial resources, which limit the reach and scope of work that organizations like AALDEF can do. For example, in the *OCA v. Texas* case that AALDEF brought against the state of Texas for violating Section 208 of the Voting Rights Act, it took more than three years to litigate from client intake to final decision, and required hundreds of hours of attorney time. Redistricting cases typically require massive amounts of attorney time and millions of dollars in expert fees for an affirmative Section 2 litigation. These extreme financial costs and diversion of attorney time limit what groups like AALDEF can do alone, to protect the rights of minority voters, and thus demands that the DOJ play a significant role in protecting minority voters. The assistance and active involvement of the DOJ in initiating affirmative litigation is essential to protect minority voters around the country. In addition, it has been our experience that it is advantageous to have the support of the DOJ as a party or amici when litigating a potential violation of the Voting Rights Act against a jurisdiction.

It is critical for the DOJ to exercise its existing authority to ensure equal access to voting by vigilantly enforcing Section 2, Section 203 and Section 208 of the Voting Rights Act, among other provisions, to ensure that language minority voters are not discriminated against, and that these provisions are fully complied with. Since the *Shelby County* decision, AALDEF has litigated Section 203 and Section 208 cases in jurisdictions formerly covered by Section 5. The active enforcement of these provisions by the DOJ is needed, particularly in these formerly covered jurisdictions.

### **Conclusion**

American citizens of Asian ancestry have long been targeted as “foreigners” and unwanted immigrants, and racism and discrimination against this community persists to this day. These negative perceptions have real consequences for the ability of Asian Americans to fully participate in the electoral and political process. The Voting Rights Act has offered crucial protections for minority group voters, including many Asian American voters. AALDEF has witnessed firsthand the immense value of federal protection of voting rights under Sections 2, 203, and 208 of the Voting Rights Act. Section 5 of the Voting Rights Act was also a particularly effective tool in protecting Asian American voters against a host of actions that threaten to curtail their voting rights. However, the Supreme Court’s *Shelby County* decision dismantling the coverage formula has left a large gap in protections for Asian American voters that requires Congressional action and renewed DOJ enforcement of remaining VRA provisions. We look to Congress to work in a bipartisan fashion to respond to the Court’s ruling and strengthen the Voting Rights Act as it did during the 2006 reauthorizations and each previous reauthorization. AALDEF respectfully offers its assistance in such a process.

Chairman BUTTERFIELD. Thank you, Mr. Vattamala.  
At this time, the chair recognizes Professor Ferguson-Bohnee.  
You are now recognized for five minutes.

#### **STATEMENT OF PATTY FERGUSON-BOHNEE**

Ms. FERGUSON-BOHNEE. Good morning, Chairman Butterfield, Ranking Member Steil, Ranking Member Davis, and members of the Committee. Thank you for inviting me to testify today.

The Indian Legal Clinic coordinates the Arizona Native Vote Election Protection Project, a nonpartisan effort to protect Native American voting rights.

On behalf of Tribal clients, I have litigated Section 2 cases involving redistricting, restrictive voting laws, early voting access, and language compliance under Section 203.

After Congress passed the Indian Citizenship Act of 1924, States with large Native American populations created legal barriers to prevent Natives from registering to vote and casting a ballot.

Four decades later, the Voting Rights Act finally opened the door for Native Americans to exercise the right to vote. This led to efforts by local and State lawmakers to reduce the effectiveness of the Native vote and to prevent Native Americans from being elected to office.

States and their political subdivisions have used the redistricting process to disenfranchise Native American communities, especially in areas with significant Native populations that can determine the outcome of elections.

Not surprisingly, non-Indians have manipulated the redistricting process in order to maintain power and control.

Before *Shelby County*, the Department of Justice issued nine Section 5 objections to redistricting plans involving Native voters in Alaska, Arizona, and South Dakota, and five of these were in Arizona.

The Department of Justice also brought numerous redistricting cases to enforce voting rights of Native Americans between the 1970s and 2000.

In the past two decades, however, most redistricting litigation filed on behalf of Indian voters has been brought by tribes or private parties.

Since 1996, 22 Federal cases challenging at-large election systems, redistricting lines, or malapportionment have been filed on behalf of Native voters, involving State legislative districts, school boards, counties, sanitation districts, and city councils.

Packing has been one of the methods used to reduce voting strength. Multiple counties in South Dakota have packed Native Americans in the fewest number of districts, thereby eliminating their ability to elect multiple candidates of choice.

In San Juan County, Utah, the county placed Navajo voters in a single overpopulated district so that they would not have the ability to elect more than one member to a three-person county commission. Plaintiffs spent \$3.4 million over 7 years to litigate this case.

And in the last 25 years, jurisdictions in Montana, North Dakota, South Dakota, and Wyoming have used at-large voting schemes to disenfranchise Native Americans.

Also, geographic and jurisdictional boundaries frustrate the ability of many Tribal communities to politically mobilize in support of one candidate for many Federal, State, and local offices because a reservation may be split among multiple districts, counties, or even States.

Over 200 reservations are located in multiple counties or States. Some jurisdictions fail to respect Tribal boundaries when creating districts. Redistricting bodies of Wisconsin, Montana, Washington, and California have diluted the power of Tribal communities by dividing Tribal voters among multiple districts.

In Washington, for example, the Lummi, Colville, and Yakima reservations were each split into multiple districts.

Arizona courts have invalidated redistricting plans when the State legislature split Tribal reservations into multiple districts.

In addition to redistricting boundaries, precinct lines can cause confusion and result in discarded ballots. In Arizona, sometimes counties fail to place a voter in the correct precinct or counties create precinct lines that divide a Tribal community.

Not only does this cause confusion, but Native voters are more likely to have their ballot discarded for voting at the wrong polling location.

But for discriminatory practices, Native Americans would have greater representation in local, State, and national decisionmaking efforts that affect their lives.

Despite barriers, Natives continue to fight to protect and exercise the right to vote. However, past redistricting and jurisdictional issues have stunted the full potential of the Native vote.

Redistricting provides an opportunity to reverse course and ensure Native American representation. As Justice Breyer said in *Shelby County*, it is an old disease, it has gotten a lot better, but it is still there.

I would like to remind the Committee that Congress has a duty to fulfill its unique trust obligation to Native Americans, including in the matters of voting. This must include a meaningful opportunity for Native people to elect candidates of choice, be heard, and not be saddled by unnecessary barriers that exploit centuries' worth of inequality.

We need robust voting rights legislation to mitigate the burden placed on Tribes to litigate Section 2 cases, and the Department of Justice can carry out this trust responsibility by bringing enforcement actions to protect Native American voters.

Thank you for the opportunity to testify. I am happy to answer any questions the Committee may have.

[The statement of Ms. Ferguson-Bohnee follows:]

TESTIMONY BEFORE THE HOUSE COMMITTEE ON ADMINISTRATION  
SUBCOMMITTEE ON ELECTIONS  
HEARING ON  
VOTING IN AMERICA: A NATIONAL PERSPECTIVE ON THE RIGHT TO VOTE,  
METHODS OF ELECTION, JURISDICTIONAL BOUNDARIES, AND REDISTRICTING

PATTY FERGUSON-BOHNEE  
DIRECTOR, INDIAN LEGAL CLINIC  
CLINICAL PROFESSOR OF LAW  
SANDRA DAY O'CONNOR COLLEGE OF LAW  
JUNE 24, 2021

### I. Introduction and History of Native American Voting Rights

Chairperson Butterfield, Ranking Member Steil, and members of the committee, thank you for inviting me to testify today. My name is Patty Ferguson-Bohnee, and I am the Director of the Indian Legal Clinic at the Sandra Day O'Connor College of Law at Arizona State University. The Indian Legal Clinic coordinates the Native Vote – Election Protection Project in Arizona, a non-partisan effort to protect Native American voting rights founded in 2008 in response to disparities in voting resulting from Arizona's voter identification law.<sup>1</sup> The Indian Legal Clinic works with its partners to provide education to Arizona's tribal communities on election laws, voting, and redistricting. We also provide education to county and state officials about the barriers to voting experienced by Native American voters.

Securing the right to vote has been a struggle for Native Americans. This is especially true for states with large Native American populations and in jurisdictions where the Native vote could be decisive. Even after the passage of the Indian Citizenship Act in 1924, states and local jurisdictions prevented Native Americans from registering to vote and voting.<sup>2</sup> Montana excluded Native Americans from voting and holding office since the establishment of its territorial government, and passed measures to exclude Native Americans from voting after statehood.<sup>3</sup> South Dakota law prevented Native Americans from holding public office until 1939.<sup>4</sup> Many states preventing Native Americans from voting claiming that Native Americans lacked state citizenship. In 1948, Native Americans in New Mexico and Arizona successfully litigated their right to vote.<sup>5</sup> Utah and North Dakota became the last states to afford on-reservation Native Americans the right to vote in 1957 and 1958, respectively.<sup>6</sup> When the right to vote was finally secured, state and local officials took steps to prevent Native Americans from participating in elections and being elected to office.<sup>7</sup> A common and effective tool for Native American disenfranchisement was the use of literacy tests because of the lower rates of English literacy in Tribal communities. In Arizona, for example,

<sup>1</sup> Many thanks to the Indian Legal Clinic Native Vote Fellow Torey Dolan who assisted in preparing this testimony.

<sup>7</sup> See generally, Patty Ferguson-Bohnee, *The History of Indian Voting Rights in Arizona: Overcoming Decades of Voter Suppression*, 47 ARIZ. ST. L.J. 1099 (2015).

Native Americans could not fully participate in voting until 1970 when the United States Supreme Court upheld the ban against using literacy tests as a voter qualification.<sup>8</sup>

Exercising the right to vote for Native American voters only came with protections afforded by the Voting Rights Act and enforcement of those rights has required decades of litigation. However, the Supreme Court invalidated the preclearance formula in 2013, removing one of the most powerful tools to ensure equal access to the ballot for Native Americans, which included two jurisdictions in South Dakota, a jurisdiction in North Carolina, and the states of Alaska, and Arizona.<sup>9</sup> Since that time, efforts to suppress the vote have increased and the tactics to suppress the Native American vote have diversified by “pour[ing] old poison into new bottles.”<sup>10</sup> For Native Americans, these voter suppression efforts can have devastating impacts.

Voting is not a simple or easy task for many Native Americans. In addition to well-documented access barriers, redistricting has been used as a tool to suppress Native American voting rights and depress Native American political power.<sup>11</sup> My testimony will focus on redistricting challenges faced by tribal citizens and barriers caused by geography and jurisdictional issues.

## II. Redistricting

Protecting the right to vote against voter suppression continues to be an uphill battle for Native Americans. Once Native Americans began voting, local and state jurisdictions used redistricting to diminish the “[Native American] community’s ability to fully participate in the electoral process and to elect their preferred candidates of choice.”<sup>12</sup> The threat of Native Americans electing candidates of their choice has resulted in states and local jurisdictions carving up reservations or packing Indian voters in redistricting plans in order to minimize the impact of the Native vote. During the past five decades, preclearance objections and litigation has been used to undo some of the redistricting efforts employed to reduce Native American voting strength.

### *Preclearance*

In covered jurisdictions, preclearance was a powerful tool to counteract efforts to reduce voting strength through redistricting schemes. The Indian voters in covered jurisdictions comprised a substantial percentage of the Voting Age Population in those counties. (Todd County 86.8%;

<sup>8</sup> The 1970 Amendments to the VRA suspended the use of literacy tests as a qualification for voting. Arizona had a literacy test for voter registration and unsuccessfully challenged the prohibition on using literacy tests. *Oregon v. Mitchell*, 400 U.S. 112 (1970).

<sup>9</sup> *Shelby County v. Holder*, 570 U.S. 529 (2013).

<sup>10</sup> *Reno v. Bossier Parish School Bd.*, 528 U.S. 320, 366 (2000) (Souter, J., concurring in part, dissenting in part).

<sup>11</sup> See generally, Patty Ferguson-Bohnee, *The History of Indian Voting Rights in Arizona: Overcoming Decades of Voter Suppression*, 47 ARIZ. ST. L.J. 1099 (2015); JAMES TUCKER ET AL., OBSTACLES AT EVERY TURN (2020); Patty Ferguson-Bohnee, *How the Native American Vote Continues to be Suppressed*, ABA Human Rights Mag. Vol. 45-1 (2020); Patty Ferguson-Bohnee and James Tucker, *Voting During a Pandemic: Vote-by-Mail Challenges for Native Voters*, AZ Attorney 24-35 (July/Aug. 2020).

<sup>12</sup> See H.R. REP. NO. 109-478, at 6 (2006) (“Discrimination today is more subtle than the visible methods used in 1965. However, the effect and results are the same.”).

Shannon County, 95.5%; Apache County, 75%; Navajo County, 45.7%; Coconino County, 27.4%; Jackson County, NC, 9.1%; Pinal County, 6.6%).<sup>13</sup> Not surprisingly, the Indian vote posed a significant threat to the non-Indian voters located in the same political jurisdictions who took action to suppress or reduce the effectiveness of the Indian vote in order to maintain power and control.

Through the preclearance process, the Department of Justice objected to nine redistricting proposals due to the harmful impact the plans had on Native American voters. Five of those objections were for the state of Arizona and its political subdivisions. Section 5 improved the political landscape for tribal participation in elections, but it neither ended animosity against Indian voters nor has it eliminated all discrimination in voting. This will be the first decade that formerly covered jurisdictions engage in redistricting. In the Renew the Voting Rights Act Report for Arizona, experts noted the continuing need for voting access and improvements for Native American and Latino voters.

More than eighty percent of Arizona's twenty-two Section 5 objections have occurred for voting changes enacted since 1982. Four post-1982 objections have been for statewide redistricting plans, including one in the 1980s, two in the 1990s and one as recently as 2002. Since 1982, the Department of Justice has interposed objections to voting changes from nearly half of Arizona's 15 counties that have had the purpose or effect of discriminating against Latino or American Indian voters.<sup>14</sup>

### ***Litigation***

The Department of Justice brought numerous redistricting cases to enforce voting rights of Native American voters between the 1970s and 2000.<sup>15</sup> Since that time, most redistricting litigation filed on behalf of Native American voters has been brought by Tribes and private parties.<sup>16</sup> Since 1996, there have been 22 federal cases brought on behalf of Indian Tribes or Native American voters challenging at-large election systems, redistricting lines, or malapportionment of Native American voters involving state legislative districts, school boards, counties, sanitation districts, and city councils. Of those 22 cases, the Department of Justice brought six of those cases.

STATISTICS OF FEDERAL CASES BROUGHT ON BEHALF OF NATIVE AMERICANS CHALLENGING  
REDISTRICTING, AT-LARGE VOTING SYSTEMS, AND MALAPPORTIONMENT SINCE 1996<sup>17</sup>

State	Total Number of Cases	Total Brought by DOJ	Total Brought by Private Parties	Challenging At-Large Elections	Redistricting	Malapportionment
Arizona	1	-	1	-	1	-
Montana	7	2	5	5	1	1
New Mexico	2	-	2	-	2	-
North Dakota	2	2	-	2	-	-
South Dakota	8	2	6	2	4	2
Utah	1	-	1	-	1	-
Wyoming	1	-	1	1	-	-
Total	22	6	16	10	9	3

*At Large Districts*

At-large districts have been used to deny Native Americans the opportunity to elect candidates of choice. In the last 25 years, Montana, North Dakota, South Dakota, and Wyoming have used such voting schemes to diminish the Native American vote. Montana has an extensive history of voting

---

<sup>17</sup> See DANIEL MCCOOL ET AL at 48-67 tbl. 10; JAMES TUCKER ET AL. at 19-23.

discrimination against Native American voters,<sup>18</sup> and has had the most challenges to at-large districts in Indian Country. Four of these challenges were to at-large county commission districts. In 1999, the ACLU and the Indian Law Resource Center filed two lawsuits challenging at-large districts for electing the board of commissioners in Rosebud County and the school district in Lake County that diluted Native American voting strength under Section 2 of the Voting Rights Act and the U.S. Constitution.<sup>19</sup> The parties agreed to multi-member districts in the Lake County school district, one of which was majority-minority Native American. In Rosebud County, the court ordered single member districts, one of which was majority Native American. In *U.S. v. Blaine County*, the Native American population was 45.2% of the county with the majority, approximately 80%, living on the Fort Belknap Reservation. The Native American population was geographically compact and numerous “so that Native Americans would likely constitute a voting majority in one of the single member districts” if adopted.<sup>20</sup> In determining that Blaine County’s at-large voting system violated section 2, the court found that there was a history of racial discrimination against Native Americans, racially polarized voting, and there had never been a Native American elected to any of the three county commissioner seats.<sup>21</sup>

In Wyoming, Eastern Shoshone and Northern Arapaho Tribal members successfully challenged the at-large voting scheme for the Fremont County Commission. According to the Census, 19.68% of Fremont County’s population identify as Indian alone and 20.94% identify as Indian in some combination with another race. Between 1980 and 2000, the Indian population grew while the white population fell. Most of the Native American population lived on the Wind River Reservation. The county argued that “Indians simply do not care to participate in county and state elections and if there is any dilution of Indian voting strength, it is the result of Indian apathy.”<sup>22</sup> The court disagreed and found that the at-large voting scheme diluted Indian voting strength and are in violation of Section 2 of the Voting Rights Act.

#### **Packing**

Packing Native Americans into one district to limit political representation has been used to limit change of power and control in local jurisdictions. Packing occurs when a voting bloc, disfavored by map-drawers, are intentionally placed in the smallest number of districts possible to limit their ability to choose multiple candidates. Examples of packing to reduce Native American voting strength can be found more recently in Utah and South Dakota.

<sup>18</sup> *U.S. v. Blaine County*, 363 F.3d 897, 912 (9th Cir. 2004); *Old Person v. Cooney*, 230 F.3d 1113, 1129 (9th Cir. 2000).

<sup>19</sup> ACLU, ACLU and Indian Rights Group Seek to Secure Voting Rights for Montana’s Native Americans (July 7, 1999), available at <https://www.aclu.org/press-releases/aclu-and-indian-rights-group-seek-secure-voting-rights-montanas-native-americans>; *Matt v. Ronan School District*, No. 99-94-M-DWM (D. Mont.); *Alden v. Bd. of Cmmrs of Rosebud County*, No. 99-148-BLG-DWM (D. Mont.).

<sup>20</sup> *U.S. v. Blaine County*, 157 F. Supp.2d 1145 (D. Mont. 2001).

<sup>21</sup> *U.S. v. Blaine County*, 363 F.3d 897 (9th Cir. 2004).

<sup>22</sup> *Large v. Fremont*, 708 F. Supp.2d 1176, 1230 (D. Wy. 2010); Jean Schroedel and Ryan Hart, *Vote Dilution and Suppression in Indian Country*, 29 Studies in American Political Development 40, 62 (April 2015).

The Department of Justice sued San Juan County, Utah in the 1980s arguing that the at-large election system violated Section 2 of the Voting Rights Act, resulting in consent decree that created single member districts. The resulting District 3 had a Native American population of 88.77%. Despite changes in population, the district lines did not change during a twenty-five year period. Even though some changes were made to the other two districts in 2011, the boundaries of the Native American majority minority district remained the same. The Native American population in that district increased to 92.81%. The Navajo Nation challenged the redistricting efforts that packed Navajo voters into a single district of three. As a result of contentious, multi-year litigation, the counties voting districts were reconfigured and resulted in Native Americans electing two candidates of choice.<sup>23</sup>

In South Dakota, discrimination in redistricting led to prolonged litigation followed by consent decrees. In *Kirkie v. Buffalo County*, Buffalo County, South Dakota gerrymandered its three districts by packing 75% of the Indian population into one district.<sup>24</sup> The county, the “poorest in the country,”<sup>25</sup> was comprised of approximately 2,100 people, of which 83% were Indian. This redistricting had the purpose of diluting the Indian vote, as whites controlled both of the other two districts and thus County government.<sup>26</sup> The case was settled by a consent decree wherein the county admitted its plan was discriminatory and was forced to redraw the district lines.<sup>27</sup> In addition, the county agreed to subject itself to Section 3(c) of the Voting Rights Act, which requires the submission of voting changes for preclearance.<sup>28</sup> In 2005, another South Dakota county was forced to redraw district lines for similar malapportionment of Indian voters.<sup>29</sup> Preclearance may have prevented this type of *de facto* discrimination, because the changes would have needed preclearance approval prior to enactment.<sup>30</sup>

<sup>30</sup> Charles Mix County was not covered by Section 5.

### *Arizona*

Arizona has a history of minimizing Native American political representation through redistricting. Tribal voters challenged redistricting plans every cycle since the 1960s, except for the last decade following the 2010 Census. In the 1960s, the court rejected attempts to use the number of registered voters to determine apportionment.<sup>31</sup> The court noted that the Indians in Apache and Navajo counties would be underrepresented if voter registration was used as the basis for redistricting, thereby reducing Indian voter strength.<sup>32</sup> During the 1970s, the legislative reapportionment plan divided the Navajo Reservation into three separate state legislative districts reducing the ability of Navajo voters to elect candidates of their choice.<sup>33</sup> The court found that the legislative plan violated the Equal Protection Clause because it was done with the intent of “destroy[ing] the possibility that the Navajos, if kept within a single legislative district, might be successful in electing one or more of their own choices to the Legislature.”<sup>34</sup> During that time, the Navajo vote was also targeted on the local level along with voters from the White Mountain Apache Tribe. In Apache County, the board of supervisors created malapportioned districts to maintain a white majority. Apache County District 3 had a population of 26,700 of whom 23,600 were Indian, while District 1 had a population of 1,700 of whom only 70 were Indian and District 2 had a population of 3,900 of whom only 300 were Indian.<sup>35</sup> In response to Native American challengers, Apache County claimed that Indians are not citizens of the United States and the Indian Citizenship Act granting them citizenship was unconstitutional.<sup>36</sup> The three-judge federal court rejected the County’s arguments, held that the County must be redistricted in accordance with one-person, one-vote standards and granted plaintiffs’ motion for summary judgment.<sup>37</sup>

In the 1980s, the legislative redistricting plan split the San Carlos Apache Tribe into multiple districts, which the court found had the “the effect of diluting the San Carlos Apache Tribal voting strength and dividing the Apache community of interest.”<sup>38</sup> The Department of Justice objected to the plan on the grounds that the plan had a discriminatory effect. In the 1990s, the Arizona Legislature reached an impasse, and a three-judge panel was convened to draw a redistricting plan.<sup>39</sup> In adopting this plan, the Court noted recognized that Native American voters “should not be engulfed in a structure that minimizes their potential for meaningful access to the political process.” The court took judicial notice of the wide-spread practices of discrimination against Native Americans and adopted the Indian Compromise Plan.<sup>40</sup>

<sup>40</sup> *Id.* at 690.

Until 2000, the redistricting process in Arizona was controlled by the Arizona Legislature and was highly politicized. In 2000, Arizona voters approved a citizen initiative that took redistricting out of the hands of the legislature and reassigned the redistricting responsibility to the Arizona Independent Redistricting Commission. This constitutional change also provided a procedural framework for the Commissioners to follow and established criteria for the redistricting process. During the last round of redistricting, the Arizona Independent Redistricting Commission, aware of the Section 5 requirements, adopted a legislative district to “strengthen the ability of Native Americans to elect their candidates of choice.”<sup>41</sup> This district includes nine tribes and has a Native American voting age population of 63.7%.<sup>42</sup> The Commission also created a congressional district with twelve tribes, who are 25% of the population. The last decade was the first time that Arizona’s maps were precleared on the first attempt. While the Commission must continue to apply the Voting Rights Act and other criteria, the retrogression standard required by Section 5 is no longer an option to protect the single Native American majority minority district.

### III. Geography

548 counties in the United States include Indian reservations and off-reservation trust land. Among those counties, there are 201 reservations/Tribal communities that are located in multiple counties and/or states. By virtue of these divisions, many Native American communities are inherently impacted by the variations in state law or in local election administration through precinct boundaries, county boundaries and other jurisdictional boundaries. These geographic barriers frustrate the ability of many Tribal communities to politically mobilize in support of one candidate for many federal, state, and local offices because a reservation may be split among multiple states, districts, or counties.

While 84% of the U.S. population lives in urban areas,<sup>43</sup> many Native Americans and Alaska Natives live in rural communities. The geography and demography of Indian Country creates certain challenges for redistricting. For example, Arizona’s urban population has only become more pronounced in the past 50 years. Arizona’s reservations total 27% of the landbase, and only 18% of the land is privately held.<sup>44</sup> The rural areas have remained sparsely populated while the metropolitan areas of Phoenix and Tucson have continued to experience rapid growth. The majority of Arizona’s Indian Country lies outside of the urban areas. Five of the ten most populated land-based Tribes in the United States are in Arizona. These include the Navajo Reservation, the largest Indian Reservation in both size and population, the Fort Apache Reservation, the Gila River Indian Reservation, the San Carlos Reservation, and the Tohono O’odham Reservation.

<sup>42</sup> *Id.* at 41, 78.

<sup>43</sup> UNIV. MICH. CTR. FOR SUSTAINABLE SYSTEMS, US Cities Fact Sheet, available at <http://css.umich.edu/factsheets/us-cities-factsheet>.

<sup>44</sup> *Arizonans for Fair Representation v. Symington*, 828 F. Supp. at 687.

As noted by the court in *Klahr v. Williams*, the Navajo Reservation is the largest reservation in the country and is located within three states, Arizona, Utah, and New Mexico. The Arizona portion of the reservation “is larger in area than any of Arizona’s fourteen counties, excepting Coconino; and the portion of the Reservation within Arizona is 60 times larger in area than Phoenix, Arizona’s largest city.”<sup>45</sup>

#### ***Dividing Reservations***

Ignoring Tribal boundaries and communities in the redistricting process dilutes the Native American vote. While dividing reservation boundaries may be required to meet equal population requirements and to enhance voter effectiveness, there are several examples of redistricting schemes that divide tribal communities to reduce voting strength. In recent years, redistricting bodies have divided Tribal communities into multiple districts in Wisconsin, Washington, Montana, and California.<sup>46</sup> In Washington, the redistricting maps split three separate reservations – the Lummi, Cowlitz, and Yakama Reservations.

#### ***Precinct-Based Voting***

Ignoring Tribal boundaries also makes precinct-based voting more difficult, which has resulted in ballots cast by Indian voters discarded at disproportionate rates. Twenty-six states use a variation of a precinct-based voting system.<sup>47</sup> Within these states there are sizable Native American populations in Michigan, South Dakota, Arizona, Oklahoma, Montana, and Nevada. In each of these states, there are multiple Tribes with land bases that cross state and/or county lines.

In Arizona, county officials determine precinct boundaries; they also decide whether to offer precinct-based voting or vote centers. This decision point is critical to determining whether a ballot will be counted. At vote centers, any voter in the county can cast a ballot and have that ballot counted. Under Arizona’s precinct-based voting system, if a voter casts a ballot out of precinct, the whole ballot is discarded. The court found that the precinct-based voting system disproportionately impacts Native American, Hispanic, and African American voters in Arizona.<sup>48</sup>

Of the twenty reservations in Arizona, eight reservations are located in two or more counties. In the 2020 election, four of the fifteen counties in Arizona only offered precinct-based voting, five offered a combination of vote centers and precinct-based polling locations, and six used exclusively vote centers. However, not every Tribe in a hybrid or vote-center based county benefited from these locations. The San Carlos Apache Tribe’s Reservation, for example, is located in three counties, with residents living in Graham and Gila counties. Both Graham and Gila counties provided vote centers off-reservation, but only offered precinct-based voting on

<sup>48</sup> *Id.* at 1004.

reservations. Yuma and Yavapai counties use an entirely vote center model, but neither county placed a vote center on Tribal lands within their counties. The four counties that exclusively used precinct-based voting, the most stringent voting system, were Apache County, Mohave County, Pima County, and Pinal County. These counties include some of the largest Tribal areas in the state—the Navajo Nation, the White Mountain Apache Tribe, the Tohono O’odham Nation, the Gila River Indian Community, the Fort Mojave Indian Tribe, the Hualapai Tribe, and the Kaibab Paiute Tribe. All of those Tribes, excluding the Fort Mojave Indian Tribe, have reservation boundaries that cross county lines. For voters living on especially remote reservations, showing up at the wrong precinct can result in you having to drive long distances to the proper precinct or not voting altogether. This, coupled with the frequency at which voters are placed in the wrong precinct because of non-standard addresses, creates large scale confusion. As such, even minor changes in precinct boundaries can result in discarded ballots.

For the Navajo Nation, it is even more complicated because radio ads run across county and state lines. Within Arizona, one county is precinct-based, one is a hybrid, and the last uses vote centers. While voting precincts do not cross county lines, these artificial lines imposed on the reservation regularly result in the denial of the right to vote. Because Tribal members do not receive mail at home, a voter may not be placed in a precinct, or placed in the wrong precinct or the wrong county—resulting in the ballot being discarded. Publicly available polling location verification tools are not equipped to process non-standard addresses, so voters living on rural reservations struggle to check their polling place placements prior to casting a ballot.

#### *Access to Polling Locations*

Many Tribal communities, when fighting to ensure that their members have an equal opportunity to vote, are at the mercy or the discretion of county level officials who choose where to locate the polls and the level of ballot access. While some elections administrators are amenable and work to increase access for Native Americans living on Tribal land, others refuse to provide equal access to voters on reservation even through costly litigation. In October 2020, the Native American Rights Fund and the American Civil Liberties Union of Montana filed a lawsuit against Pondera County election officials on behalf of the Blackfeet Nation for failing to provide a satellite voting location on the Blackfeet reservation, depriving Tribal members of the same access to voting as white voters.<sup>49</sup> Three days after the lawsuit was filed, the County agreed to place a satellite voting location on the reservation. In contrast, the Pascua Yaqui Tribe in Arizona filed a lawsuit to restore the in-person early voting location on the reservation.<sup>50</sup> While Pima County noted that the early voting location would have cost \$5,000 to operate, and the Secretary of State was willing to cover the costs, the County denied the Tribe an early voting location. Without an early voting location, on-reservation voters who lacked a vehicle were required to take a two-hour roundtrip bus ride to cast an early ballot. Instead of spending \$5,000 to offer Native voters’ equal access to in-person early voting, the Pima County Recorder’s Office spent \$180,705.39 on legal fees to defend its decision.<sup>51</sup>

<sup>49</sup> *Blackfeet Nation v. Stapleton*, No. 4:20-CV-0095 (D. Mont. 2020).

<sup>50</sup> *Pascua Yaqui Tribe v. Rodriguez*, No. CV-20-00432-TUC-JAS, 2020 WL 6203523 (D. Ariz. Oct. 22, 2020).

<sup>51</sup> Memo to Pima County Board of Supervisors from F. Ann Rodriguez (Nov. 20, 2020).

Increasing accessibility to voting locations, early voting, and election day polling locations, is crucial to exercising Native American voting rights. In a 2018 survey conducted by the Native American Voting Rights Coalition, 10% of respondents in New Mexico, 15% in Arizona, 27% in Nevada, and 29% in South Dakota identified distance from polling locations as one of the many problems associated with in-person voting.<sup>52</sup> Early voting opportunities located hours away effectively amount to no access to in-person early voting in light of the practical effects of requiring voters to travel such distances. The federal district court in Nevada acknowledged the reality that these distances impede voting when it found that a polling location 16 miles away from the Pyramid Lake Paiute Reservation constituted an unburden on voters.<sup>53</sup> This undue burden is not unique to voters living on the Pyramid Lake Paiute Reservation. The federal district court in South Dakota found that Pine Ridge Reservation residents “must travel, on average, twice as far as white residents to take advantage of the voter registration and in-person absentee voting services.”<sup>54</sup>

But there are also more extreme examples. In 2016, Native American voters in Nevada and Utah had to travel over 100 miles to their nearest polling locations.<sup>55</sup> In Mohave County, Arizona, the county established three in-person early voting locations. Most residents of the County lived near one of these locations; however, for the Kaibab-Paiute Tribe the closest of the three locations was located 285 miles away and required on-reservation voters to travel for over five hours if they wanted to vote early in person.<sup>56</sup> In Navajo County, off-reservation voters had access to more than 100 hours of in-person early voting. Members of the Hopi Tribe living on-reservation in Navajo County had access to only six hours of in person early voting. These distances are compounded by the socioeconomic difficulties Native American voters face because of decreased access to public transportation, personal transportation, or requisite funds to travel such distances simply to vote.

#### IV. Conclusion

Redistricting ensures political representation for the next decade. But for discriminatory practices and dilution of Native American voices through redistricting and suppressive voting laws, Native Americans would have greater representation in local, state, and national decision-making that affects their lives. Despite barriers, Native Americans continue to fight to protect and exercise the right to vote. Tribal communities continue to organize to educate their members on the rapidly changing state laws and promote voting. In this century, Indian voters have been able to ensure

<sup>56</sup> ARIZONA STATE UNIVERSITY INDIAN LEGAL CLINIC, NATIVE VOTE – ELECTION PROTECTION PROJECT 2016 ELECTION REPORT I, 21 (2016).

the success of candidates in several prominent elections in state-wide elections. Recent successes for Indian voters include the 2002 Senate election in South Dakota, in which there was a huge increase in reservation turnout, and Senator Tim Johnson barely won re-election with only 524 votes. Alaska Native voters are credited for Senator Lisa Murkowski's write-in success in her 2010 Alaska Senate race. In Arizona, reservation voters helped elect Governor Janet Napolitano in 2002 and President Joe Biden in 2020. However, despite the gains made, the nature of institutional disenfranchisement through redistricting and jurisdictional issues continues to stunt the full potential of the Native American vote.

It is untenable to expect Tribes and Tribal citizens to expend substantial resources to litigate voting rights violations. We know much more should be done to ensure voting rights and access for Tribal voters. We need robust voting rights legislation to mitigate the burden placed on Tribes to litigate Section 2 cases, and there should be more enforcement actions brought by the Department of Justice as part of the federal trust responsibility.

Chairman BUTTERFIELD. And thank you for your testimony.  
 At this time the chair recognizes Attorney General Holder for five minutes.

**STATEMENT OF ERIC H. HOLDER, JR.**

Mr. HOLDER. Thank you, Mr. Chairman, Ranking Member Steil, Mr. Davis, and members of the Committee. I want to thank you for the opportunity to appear before you today.

As you know, we are having this important conversation at a very important moment. Eight years ago tomorrow in the *Shelby County* decision, a very divided Supreme Court gutted Section 5 of the Voting Rights Act of 1965 and undermined a cornerstone of American democracy protection.

Now, before 2013, Section 5, relying on Section 4, had helped prevent discriminatory voting laws from taking effect by imposing preclearance protections that required a Federal review of changes to voting procedures in covered regions. Basically areas with a history of discrimination had to get approval from the Department of Justice or from a Federal court for significant changes in voting laws or procedures.

Now, that section of the Voting Rights Act, it helped to stop some of the worst attempts to discriminate against minority voters for decades. But in a 5-to-4 opinion the conservative members of the Court wrote that the Nation had changed dramatically since the Voting Rights Act went into effect and that because of gains made, particularly by Black Americans, these protections were no longer necessary.

They were wrong.

Efforts to keep groups of Americans, particularly African Americans, away from the ballot box are as old as America itself, and the same forces that have historically sought to create an unequal status quo are still working to impose it today.

In the days since that ruling 8 years ago, unnecessary and discriminatory voting restrictions went up across the country. We saw State legislatures pass a rash of strict voter ID laws that disproportionately impacted people of color. We saw voting roll purges and poll closures targeting minority and poor communities. And we saw newly emboldened State legislatures draw discriminatory maps that unfairly placed Black people and other people of color, young and poor people, into gerrymandered voting districts where their impact could be diluted and their voice ultimately lost.

Now, as Attorney General I fought back against these attempts to subvert our democracy and to disenfranchise voters of color using the remaining provisions of the Voting Rights Act in cases from Texas, North Carolina, and Ohio, to Wisconsin, Montana, and South Dakota.

As chair of the National Democratic Redistricting Committee, I have continued that work, taking on unfair maps, fighting for fair elections, and demanding justice for every American voter across the country.

But just as my work has continued, so too often have efforts to roll back the clock on voting rights. Over the past few years, politicians have used a range of strategies to diminish the voice of the

people, from gerrymandering to voter suppression to outright intimidation.

And today we are facing what I would call a sustained, coordinated, multipronged assault that seeks to diminish protections for voters, restrict access to the franchise, and redefine the way that power is gained and exercised in the United States of America.

We have seen this assault in voting restrictions, voter ID laws, and voter roll purges that have unfairly—and in some cases illegally—stripped Americans of their rights.

In just the first 6 months of 2021, State legislatures across the country have introduced more than 389 bills in 48 States that would make it harder to cast a ballot. Two dozen have already been passed into law.

Since the *Shelby County* decision, millions of Americans have unnecessarily been purged from voter rolls. Nearly 1,700 polling locations have been closed since the decision. We have seen map manipulation and gerrymandering that has allowed politicians to pick their voters so that a party with minority views and minority support can illegitimately govern with majority power.

In States that are politically competitive, like Pennsylvania, North Carolina, and Wisconsin, one party has sought to draw lines with surgical precision, packing some voters together and splitting other towns and communities apart, in order to create congressional delegations and State legislatures that are heavily skewed on a partisan basis and immune to citizen accountability.

We have seen it in the Supreme Court decision in *Rucho* that abandoned the Court's fundamental, and I think unique, responsibility to achieve justice in the face of partisan gerrymandering.

Now, these actions have not made our elections safer or more secure. They have not improved the quality or the accessibility of our politics. Instead, they have stripped Americans of fundamental rights and undermined the promise of American democracy. And they have all, every one of them, disproportionately impacted people of color.

Just a few weeks ago, more than 100 of our Nation's top democracy scholars signed a letter warning about the deterioration of American voting rights and representation due to radical laws, regulations, and restrictions imposed over the last few months.

As a result of these changes, they said voting procedures in some States, quote, "no longer meet the minimum conditions for free and fair elections," unquote.

In the United States, our beloved country, this must not stand. We need to repair the damage being done to our democracy. We need to create lasting, durable safeguards to protect our most essential freedom. We need to expand and codify into law voting rights and processes so that every eligible American casts a ballot and be confident that it will be fairly counted.

We need to end gerrymandering so that all people, including people of color, can be represented by public servants of their choice.

I am here to do all that I can to help in that regard. I am not asking for political favoritism. I am asking for no special treatment for any group or community.

I am asking for nothing more radical than that which is at the heart of the American experiment, the idea at the core of American

democracy, free and fair elections where the people—all the people—are heard, and all of the people are respected.

Thank you very much.

[The statement of Mr. Holder follows:]

**Remarks for Attorney General Eric H. Holder, Jr.  
Testimony for the House Subcommittee on Elections  
June 24, 2021**

Chairman Butterfield, Ranking Member Steil, and members of the committee, thank you for the opportunity to appear before you today.

As you know, we're having this conversation at an important moment. Eight years ago tomorrow, in their *Shelby County decision*, a divided Supreme Court gutted Section 5 of the Voting Rights Act of 1965 and undermined a cornerstone of American democracy protection.

Before 2013, Section 5 had helped prevent discriminatory voting laws from taking effect by imposing preclearance protections that required a federal review of changes to voting procedures in covered regions. Basically, areas with a history of discrimination had to get approval from the Department of Justice or from a federal court for significant changes in voting laws or procedures. That section of the Voting Rights Act had helped to stop some of the worst attempts to discriminate against minority voters for decades. But in a five-to-four opinion, the conservative members of the Court wrote that the nation had "changed dramatically" since the Voting Rights Act went into effect and that, because of gains made, particularly by Black Americans, these protections were no longer necessary.

They were wrong. Efforts to keep groups of Americans, particularly Black Americans, away from the ballot box are as old as America itself, and the same forces that have historically sought to create an unequal status quo are still working to impose it today.

In the days since that ruling eight years ago, unnecessary and discriminatory voting restrictions went up across the country. We saw state legislatures pass a rash of strict voter identification laws that disproportionately impacted people of color. We saw voting roll purges and poll closures targeting minority and poor communities. And we saw newly emboldened state legislatures draw discriminatory maps that unfairly placed Black people and other people of color, young and poor people, into gerrymandered voting districts where their impact would be diluted and their voice ultimately lost.

As Attorney General, I fought back against these attempts to subvert our democracy and disenfranchise voters of color, using the remaining provisions of the Voting Rights Act in cases from Texas, North Carolina, and Ohio, to Wisconsin, Montana and South Dakota. As Chair of the National Democratic Redistricting Committee, I have continued that work, taking on unfair maps, fighting for fair elections, and demanding justice for every American voter across the country.

But just as my work has continued, so too have the efforts of those who seek to roll back the clock on voting rights. Over the past few years, politicians have used a range of strategies to diminish the voice of the people -- from gerrymandering to voter suppression to outright intimidation. And today, we are facing a

sustained, coordinated, multi-pronged assault that seeks to diminish protections for voters, restrict access to the franchise, and redefine the way that power is gained and exercised in the United States of America.

We have seen this assault in voting restrictions, voter ID laws and voter roll purges that have unfairly, and in some cases illegally, stripped Americans of their rights. In just the first six months of 2021, state legislators across the country have introduced more than 389 bills in 48 states that would make it harder to cast a ballot. Two dozen have been passed into law. Since the Shelby County decision, millions of Americans have unnecessarily been purged from voter rolls. Nearly 1,700 polling locations have been closed.

We have seen map manipulation and gerrymandering that has allowed politicians to pick their voters so that a party with minority views and minority support can illegitimately govern with majority power. In states that are politically competitive like Pennsylvania, North Carolina, and Wisconsin, one party has sought to draw lines with surgical precision, packing some voters together and splitting other towns and communities apart to in order to create congressional delegations and legislatures that are heavily skewed on a partisan basis and immune to citizen accountability.

And we have seen it in the Supreme Court decision in *Ruchos* that abandoned the Court's fundamental and unique responsibility to achieve justice in the face of partisan gerrymandering.

These actions have not made our elections safer or more secure. They have not improved the quality or accessibility of our politics. Instead, they have stripped Americans of fundamental

rights and undermined the promise of American democracy. And they have all – every one of them – disproportionately impacted people of color.

Just a few weeks ago, more than 100 of our nation's top democracy scholars signed a letter warning about the deterioration of American voting rights and representation due to radical laws, regulations and restrictions imposed over the last few months. As a result of these changes, they said voting procedures in some states “no longer meet the minimum conditions for free and fair elections.”

In the United States of America, our beloved country, this must not stand.

We need to repair the damage being done to our democracy. We need to create lasting, durable safeguards that protect our most essential freedom. We need to expand and codify into law voting rights and processes so that every eligible American – no matter what they look like or their partisan inclination – can cast a ballot and be confident that it will be fairly counted. We need to end gerrymandering, so that all people, including people of color, can be represented by public servants of their choice and be able to hold those representatives politically accountable. We need to ensure that this country lives up to its fundamental promise and highest ideals.

Let me be clear: I am not asking for favoritism towards any political party. I am not asking for special treatment for any group or community. I am asking for nothing more radical than

that which is at the heart of the American experiment, the idea at the core of American democracy: free and fair elections where the people – all the people – are heard and respected.

Chairman BUTTERFIELD. Thank you, Mr. Holder, for your statement.

At this time, the chair will recognize Mr. Hearne for five minutes.

Mr. Hearne.

#### **STATEMENT OF THOR HEARNE**

Mr. HEARNE. Thank you, Chairman Butterfield and Ranking Member Steil and the members of this Committee. I appreciate this very important opportunity to appear before you in this hearing on how we conduct elections in our Nation.

How we conduct our elections is the bedrock of our constitutional Republic. Without every voter having the ability to cast a vote and all citizens having confidence in the conduct and outcome of our elections, we, the people, would cease to govern our Nation.

I firmly believe that while political campaigns and elections are quintessentially a partisan endeavor, the manner in which elections are conducted and the laws governing the conduct of the elections should rise above partisan interests.

Our identity as Americans should transcend our partisan affiliation as a Republican or a Democrat. As President Obama said in his speech to the Democratic National Convention in 2004, there is not a liberal America and a conservative America, there is the United States of America. There is not a Black America and a White America and a Latino America and an Asian America, there is the United States of America. I totally agree.

As Americans, we share a common interest in assuring our elections are fair, honest, and accessible to every voter. We also share a common interest in assuring that the outcome reflects the will of the voters and was not engineered by disenfranchising any segment of our population, some voters by partisan manipulation or by manipulation of the election process.

Elections must be conducted according to clearly written laws that are faithfully followed and administered by election officials with transparency and without any racial or partisan bias. Every eligible citizen, irrespective of their race, color, or heritage, must have equal opportunity to cast a ballot, and every American must be confident that every lawfully cast ballot was accurately counted.

The Voting Rights Act of 1965 was an extraordinary legislative accomplishment because it was adopted in a broad bipartisan manner. The bill was sponsored by Senators Dirksen and Mansfield, both the Republican and Democrat leaders of the Senate, and it was passed on a bipartisan basis. That is one of the most important points for the moral authority of the Civil Rights Act.

And more recently, the Carter-Baker Commission provided a highwater mark in bipartisan election reform and made a number of recommendations to increase our Nation's confidence in the outcome of our elections and also to increase voter participation in our elections.

These recommendations included a reliable, accessible, voter identification requirement, elimination of ballot harvesting, maintenance of current and accurate voter rolls, among other reforms that increase voter confidence and increase voter participation.

These recommendations were broadly supported by bipartisan members of the Carter-Baker Commission, and they are the basis for recommendations this Committee and other State and local election jurisdictions should consider. These recommendations will increase voter confidence in our elections and increase voter participation.

I return to my central point: Laws governing the conduct of our elections should be broadly bipartisan, not an effort to achieve a partisan advantage for one or the other side.

At the end of the day, we are all Americans, and we all have our first allegiance to our Nation, and it is not to a party or to a particular partisan ideology. And we need to work together to do that and have the moral authority of an election conduct that is bipartisan and rises above any particular effort to game the system for one or another faction.

I commend again the work of the Carter-Baker Commission, and I will welcome any questions when we get to that point.

Thank you.

[The statement of Mr. Hearne follows:]

UNITED STATES HOUSE ADMINISTRATION COMMITTEE  
SUBCOMMITTEE ON ELECTIONS

---

**Voting in America: A National Perspective on the Right to Vote,  
Methods of Election, Jurisdiction Boundaries, and  
Redistricting.**

---

**Prepared Statement of Mark F. (Thor) Hearne, II**

**June 24, 2021**

**INTRODUCTION**

Chairman Butterfield and Ranking member Steil and members of this Committee, I appreciate the opportunity to appear before this Committee. How our nation conducts our elections is the bedrock of our constitutional republic. Without every eligible voter having the ability to cast a vote and all citizens having confidence in the conduct and outcome of our elections, we the people would cease to govern our nation.

**MY EXPERIENCE AND PERSPECTIVE**

I have been involved in election litigation and legislation for more than two decades. I was legal counsel to President Bush in 2000 including lead counsel in *Bush-Cheney 2000 v. Evelyn Baker*, 34 S.W.3d 410 (Mo. Ct. App. 2000). I was President Bush's national election counsel in 2004. I served as legal advisor to Secretary of State James Baker and President Carter on the Commission on Federal Election Reform in 2005 (the Carter-Baker Commission). Virginia's Democrat Attorney General Mark Herring appointed me to defend Virginia's election reform legislation against a constitutional challenge. And the Commonwealth's election reforms including its voter identification requirement were

upheld in both the trial court and in the Fourth Circuit Court of Appeals. See *Lee v. Virginia State Board of Elections*, 188 F. Supp.3d 577 (E.D. Va. 2016), *affirmed* 843 F.3d 592 (4th Cir. 2016). I represented the leadership of the United States House and Senate as their counsel in the amicus brief in *Crawford v. Marion County Election Board* and I was also counsel for both Democrat and Republican election officials in another amicus brief in *Crawford*. In its decision upholding Indiana's voter identification law, the Supreme Court heavily relied on the work and recommendations of the Carter-Baker Commission. See *Crawford v. Marion County Election Board*, 553 U.S. 181, 193 (2008) (in the Help America Vote Act and the National Voter Registration Act, Congress indicated its belief "that photo identification is one effective method of establishing a voter's qualification to vote and that the integrity of elections is enhanced through improved technology[, which] conclusion is also supported by a report issued shortly after the enactment of [Indiana's voter ID law] by the Commission on Federal Election Reform chaired by former President Jimmy Carter and former Secretary of State James A. Baker III, which is a part of the record in these cases."). I was also the lead counsel represented voters including minority voters in the

federal redistricting litigation concerning St. Louis County, Missouri, in *Corbett v. Sullivan*, 202 F. Supp.2d 972 (E.D. Mo. 2002). In that *Corbett* we were successful in having the St. Louis County Council reapportioned in a manner that allowed minorities opportunity to elect members of the minority community to the County Council. I worked closely with the local NAACP to achieve a just reapportionment of St. Louis County government. Counsel for the NAACP told the court, “[Mr. Hearne carried] the burden of a substantial amount of the NAACP’s case.... [Mr. Hearne] provided great help to counsel for the NAACP during this fast-paced redistricting litigation. [And Mr. Hearne took] the leading role in this action and in incorporating the NAACP’s objectives.”

I mention this background, and note especially the bipartisan nature of my experience, because I firmly believe that, while political campaigns and elections are quintessentially a partisan endeavor, the manner in which elections are conducted and the laws governing the conduct of elections should rise above partisan interests. Our identity as Americans should transcend our partisan affiliations as a Democrat or Republican. As President Obama said in his speech to the Democratic National Convention in 2004, “there is not a liberal America and a

conservative America — there is the United States of America. There is not a black America and a white America and Latino America and Asian America — there's the United States of America.”

As Americans, we share a common interest in assuring our elections are fair, honest, and accessible to every eligible voter. We also share a common interest in assuring that the outcome reflects the will of the voters and was not engineered by disenfranchising some voters or by partisan manipulation of the election process.

Confidence in the outcome of an election is especially important when the election is close such as it was in 2000 and the *Bush v. Gore* litigation. It is untenable that a significant portion of the electorate would believe an election was rigged or tainted by fraud or incompetence. It is also unacceptable for any citizen to be denied the right to vote based upon the color of their skin or language.

Elections must be conducted according to clearly written laws that are faithfully followed and administered by election officials with transparency and without partisan bias. Every eligible citizen, irrespective of their race, color or heritage, must have equal opportunity

to cast a ballot, and every American must be confident that every lawfully cast ballot is accurately counted. It is always easy to convince the winning candidate that he or she won. But the test of a fair and honest election is when the losing candidate and his or her supporters accept the outcome as the will of the voters. The legitimacy of the rule of law depends upon the electorate's confidence in the conduct of our elections.

#### **THE FUTURE OF THE VOTING RIGHTS ACT**

In the aftermath of the Civil War our nation faced a daunting task of reconstructing a single nation that integrated the newly emancipated former slaves and African Americans into the political life of our nation. President Lincoln abolished slavery with the Emancipation Proclamation in 1863. In 1865, 1868 and 1870 the states adopted the Thirteenth, Fourteenth, and Fifteenth Amendments to our Constitution. These amendments did much to address the repugnant legacy of slavery. These amendments prohibited states from disenfranchising voters "on account of race, color, or previous condition of servitude." These amendments provided all citizens with "equal protection under the laws." And these amendments abolished slavery "within the United States, or any place subject to their jurisdiction."

These Reconstruction Amendments to our Constitution enabled the first black members to be elected to United States Congress and to serve in other government offices and produced a dramatic increase in black citizens registering to vote and casting ballots. These amendments were successful in beginning to remedy the evil of slavery and insidious racism. But, more needed to be done.

The Civil Rights Movement arose in response to the Jim Crow laws and voting “tests or devices,” such as literacy tests and poll taxes, certain southern states adopted as a scheme to deny or abridge the right of some American citizens to vote on account of their race or color.

The Voting Rights Act of 1965 was adopted to address these invidious measures and to address entrenched racial discrimination in voting. The moral authority of the Voting Rights Act was due in part to the bipartisan nature of the law introduced by Senators Dirksen and Mansfield as the two co-sponsors. Senator Dirksen was of course the Republican minority leader and Senator Mansfield was the Democratic majority leader. Sixty-four other Senators cosponsored the bill, including forty-six Democrats and twenty Republicans. The Voting Rights Act passed the Senate with a seventy-seven to nineteen vote, with Democrats

voting forty-seven to sixteen in favor and Republicans voting thirty to two in favor of the Voting Rights Act..

3. The Voting Rights Act passed the House in August 1965 with a vote of three-hundred thirty-three to eighty-five with Democrats voting two hundred twenty-one in favor and sixty-one against and Republicans voting one hundred twelve in favor with twenty-four in opposition.

My point in recalling this history is to note that the Voting Rights Act was passed with broad bipartisan support. This bipartisan consensus is what gave the Voting Rights Act its moral authority.

As originally written, the Voting Rights Act included extraordinary and exceptional measures, including Section 5 and Section 4, which the Supreme Court found to be “strong medicine” and an exceptional departure from the constitutional principles of federalism in which the states enjoy equal sovereignty. This unusual departure from constitutional principles of state sovereignty and the extraordinary provisions of the preclearance sections of the Voting Rights Act were justified by the unique and exceptional circumstances of the day and the reprehensible legacy of the Jim Crow era. See *South Carolina v.*

*Katzenbach*, 383 U.S. 301, 309 (1966), *Northwest Austin Municipal Utility Dist. No. One v. Holder*, 557 U.S. 193, 203-204 (2009), and *Shelby County v. Holder*, 570 U.S. 529, 534 (2013).

But, as Chief Justice Roberts observed, the conditions in our nation in 2013 were no longer what they were in 1966. Voter registration and voting by black citizens have increased greatly, and registration and voting by black citizens in many jurisdictions now exceeds the percentage of white registration and voting. The number of African American and other minorities holding political office had greatly increased. In light of these changed conditions the Supreme Court struck down the Section 5 preclearance provisions as unconstitutional. The Court found that the original conditions that had justified subjecting certain states and jurisdictions to the extraordinary requirement of preclearance were no longer present.

The Supreme Court only struck down the preclearance formula in Sections 5 and 4. The Voting Rights Act, including Section 2 and Section 3, continue as the law of the land protecting the right of all citizens to vote and allowing the Justice Department and individuals to sue to enforce their right to vote

We all agree that an individual's right to vote and to have their vote accurately counted is a foundational constitutional principle. The current debate does not involve this foundational principle. Rather the current discussion concerns proposals to revise the Section 5 preclearance provisions declared unconstitutional in *Shelby County v. Holder*, 570 U.S. 529 (2013). As noted, the Supreme Court held the Section 5 preclearance provisions unconstitutional because the invidious discrimination and the extraordinary circumstances (such as literacy tests and poll taxes) that justified the 1965 preclearance formula were no longer present or justified in 2013. Black and minority communities were no longer underrepresented or not voting in parity with white voters. Indeed, in the recent Georgia Senate election and presidential election, the increase in participation by black and minority voters increased at a higher rate than white voters. To take Georgia and South Carolina as an example, both states are now represented by an African American Senator – Republican Senator Tim Scott of South Carolina and Democrat Senator Raphael Warnock of Georgia.

In short, the premise for which Congress adopted this extraordinary legislation was no longer present. Importantly, the

Supreme Court did not strike down the protections of Section 2 which prohibit discrimination. Rather, *Shelby County* addressed only the preclearance provisions the Court found to be premised upon a factual predicate that no longer existed.

Following the Court's decision in *Shelby County*, some now propose a new preclearance scheme. These proposals would recast the federal Justice Department as a national election board or super-state legislature rewriting or vetoing most state and local election laws and prevent states from adopting necessary election reforms unless the federal officials in the Department of Justice first approved these laws. The proposed preclearance scheme is flawed for three primary reasons.

*First*, preclearance is an extreme remedy that was only upheld due to the extraordinary circumstances from the Jim Crow era. Those circumstances no longer define American elections. There are no literacy tests, poll taxes, or similar devices that prevent any eligible voter from casting a ballot. And, as noted, voter registration and voting by minorities has increased dramatically since the 1960s.

Those who support a reinvigorated federal preclearance procedure overlook how the preclearance process has in fact worked. Preclearance empowers partisan bureaucrats in the Voting Section of the Civil Rights Division of the Justice Department to veto or rewrite state election laws. Chief Justice Roberts observed, “the preclearance process at the Department of Justice is famously opaque and usually the States and municipalities have to go through or had to go through several layers of back and forth, … its sort of a bargaining process.” *Wesley Harris v. Arizona Independent Redistricting Comm’n*, 578 U.S. \_\_\_, 136 S.Ct. 1301 (2016), oral argument transcript, p. 7. In 2013 the Department of Justice Inspector General found the officials in the Voting Section of the Civil Rights Division hired its lawyers from essentially five left-leaning advocacy groups.<sup>1</sup> The point is this, the preclearance process, in practice, has proven to be an arbitrary, standardless (and now determined to be unconstitutional) intrusion into State’s constitutional authority to conduct elections. And, not only that, but the preclearance process has

---

<sup>1</sup> See U.S. Department of Justice, Office of the Inspector General, Oversight Review Division, A Review of the Operations of the Voting Section of the Civil Rights Division, March 2013, p. 203, available at: <http://org.justice.gov/reports/2013/s1303.pdf>.

been exploited for partisan and ideological ends that have nothing to do with the goal of protecting every citizen's right to vote irrespective of their race, color of their skin or their language. In short, preclearance devolved into a process that was arbitrary, partisan, and standardless.

Furthermore, when it comes to preclearance approval of districts drawn in the state and congressional reapportionment process, preclearance results in the racial slicing and dicing that divides our nation, not unites our nation. President Obama disparaged the racial division of our elections in his 2004 Democratic National Convention speech, saying, "The pundits like to slice-and-dice our country into Red States and Blue States; Red States for Republicans, Blue States for Democrats."

President Biden, when a candidate, infamously said to the African American Breakfast Club co-host Charlamagne, "If you have a problem figuring out if you are for me or Trump, you ain't black." This assumption that individuals can or should vote for a candidate based upon the color of their skin is the opposite of Dr. King's famous aspiration that "I have a dream that my four little children will one day live in a nation where they will not be judged by the color of their skin but by the content of their character."

*Second* a draconian preclearance provision prevents meaningful election reform. Voters having the confidence that they will be allowed to cast a ballot and that all ballots will be equally and accurately counted increases participation. To gain this public confidence in our elections and to protect the integrity of the election process, the States need to adopt meaningful and necessary election reforms.

The Carter-Baker Commission was a highwater mark in bipartisan election reform and made a number of recommendations, including voter identification, elimination of ballot harvesting, and the maintenance of current and accurate voter rolls among other reforms. These recommendations will increase voter confidence in our elections and increase voter participation. Several of the Carter-Baker recommendations merit particular attention. I note these because these election reforms would be hindered or prevented (delayed at the least) should they be subject to preclearance review by the Voting Rights Section of the Justice Department's Civil Rights Division.

*Voter Identification:* The Carter Baker Commission recommended that,

To ensure that persons presenting themselves at the polling place are the ones on the registration list, the Commission recommends that states require voters to use the REAL ID card, which was mandated in a law signed by the President in May 2005. The card includes a person's full legal name, date of birth, a signature (captured as a digital image), and photograph and the person's Social Security number. This card should be modestly adapted for voting purposes to indicate on the front or back whether the individual is a U.S. citizen. States should provide an EAC-template ID with a photo to all non-drivers free of charge.

Requiring an individual to identify themselves with photo identification before casting a ballot is a commonsense measure to protect the integrity of elections. Of course, the state must provide the photo identification without cost. The constitutionality of requiring photo identification before an individual may cast a ballot has been reviewed by and approved as constitutional by the Supreme Court. See *Crawford*, 553 U.S. at 202. See also *Lee*, 843 F.3d at 607, in which Virginia's voter identification law was upheld against constitutional challenge. In *Lee*, the unanimous Fourth Circuit panel held, "just as Congress in HAVA found it beneficial to the voting process and the public perception of the voting process to require photo IDs, and just as the Carter-Baker Commission found similarly, Virginia found it beneficial to require photo identification in all elections." *Id.* Virginia's and Indiana's voter

identification laws are a model for a constitutional voter identification law that protects the integrity of the election and does not impose an impermissible burden upon any voter. Indeed, in the *Lee v. Virginia* litigation, those challenging Virginia's law could not identify a *single person* in the entire Commonwealth who was denied the right to cast a ballot due to Virginia's voter identification law. As the Carter-Baker Commission noted, and as the voter identification laws that have been upheld provide, the required identification must be available to any person who does not possess the required identification without cost.

Voter identification laws are supported by more than eighty percent of Americans, more than seventy percent of Democrats, and more than seventy percent of African Americans.<sup>2</sup> Prominent Democrats support reasonable voter identification laws, including former president Jimmy Carter, Civil Rights leader Andrew Young from Atlanta, former Congressman Lee Hamilton, who was a member of the Carter-Baker Commission, and others, including political journalist Juan Williams.

---

<sup>2</sup> Monmouth University Poll, "Public Supports Both Early Voting and Requiring Photo ID to Vote (June 21, 2021), available at: [https://www.monmouth.edu/polling-institute/documents/monmouthpoll\\_us\\_062121.pdf](https://www.monmouth.edu/polling-institute/documents/monmouthpoll_us_062121.pdf).

The requirement that individuals identify themselves before casting a ballot increases confidence in the integrity of the election and prevents lawful voters from being disenfranchised by having their ballot canceled by an illegally cast ballot.

*Prohibitions against ballot harvesting:* The Carter-Baker Commission found that,

Absentee ballot and voter registration fraud: Fraud occurs in several ways. Absentee ballots remain the largest source of potential voter fraud. .... Absentee balloting is vulnerable to abuse in several ways: Blank ballots may be mailed to the wrong address or to large residential buildings might get intercepted. Citizens who vote at home, at nursing homes, at the workplace or in church are more susceptible to pressure, overt and subtle, or to intimidation. Vote buying schemes are far more difficult to detect when citizens vote by mail. States therefore should reduce the risks of fraud and abuse in absentee voting by prohibiting "third-party" organizations, candidates, and political party activists from handling absentee ballots. States also should make sure that absentee ballots received by election officials before Election Day are kept secure until they are opened and counted.

On the basis of this finding, the Carter-Baker Commission recommended that "State and local jurisdictions should prohibit a person from handling absentee ballots other than the voter, an acknowledged family member, the U.S. Postal Service or other legitimate shipper, or election officials. The practice in some states of allowing candidates or

party workers to pick up and deliver absentee ballots should be eliminated.” The Carter-Baker Commission continued, recommending that “All states should consider passing legislation that attempts to minimize the fraud that has resulted from ‘payment by the piece’ to anyone in exchange for their efforts in voter registration, absentee ballot or signature collection.”

*Current accurate voter registration lists:* An accurate and current voter registration roll is essential to an honest election and making sure that every eligible voter may cast a ballot and that no voter’s ballot is cancelled by an unlawfully cast ballot. The Carter-Baker Commission recommended, “All states should have procedures for maintaining accurate lists such as electronic matching of death records, drivers’ licenses, local tax rolls and felon records.” The Commission continued, “States need to effectively maintain and update their voter registration lists. … When an eligible voter moves from one state to another, the state to which the voter is moving should be required to notify the state which the voter is leaving to eliminate that voter from its registration list.”

*Transparency in the conduct of elections:* Justice Brandeis introduced the phrase “sunlight is said to be the best of disinfectant.” See

Louis Brandeis, *Other Peoples' Money*, 1933, p. 62. The Carter-Baker Commission similarly observed that sunlight in the conduct of elections was critical to assure confidence in the results of the election. "All legitimate domestic and international election observers should be granted unrestricted access to the election process." Observers or challengers should be provided a meaningful opportunity to observe the conduct of elections and the processing of ballots.

## **CONCLUSION**

Thank you for the opportunity to appear and to participate in this important discussion of how we conduct our elections. Because the right to vote is so important to every American citizen of every race, color or heritage legislation guaranteeing this fundamental right should rise above partisan interests and, just like the Voting Rights Act, be a broadly bipartisan consensus of measures that protect all American's right to vote, respects the constitutional role of the states in conducting elections and accommodates meaningful and necessary election reforms such as those recommended by the Carter Baker Commission that will increase public confidence in our elections.

Chairman BUTTERFIELD. And thank you, Mr. Hearne, for your testimony.

That concludes the statements from the witnesses. I think it may be time now for us to move to member questions. I am going to take Ms. Scanlon first.

Mary Gay, I understand that you may have been in markup very late last night, maybe till 5 o'clock this morning.

Ms. SCANLON. Yes, it was. It was a good time.

Chairman BUTTERFIELD. Well, we are going to make you first. You know, I have participated in an all-night markup before, and it is very brutal. My other committee, the Committee on Energy and Commerce, probably holds the record for the longest markup, some 25 or 26 hours. So I am empathizing with your position.

Ms. SCANLON. Thank you.

Chairman BUTTERFIELD. So at this time, you are recognized for 5 minutes.

Ms. SCANLON. Thank you, Chairman Butterfield, and thank you to our witnesses.

In Pennsylvania we have lived with the reality of political gerrymandering. I have lived in the same house for 26 years and I have been in three different congressional districts.

In 2018, after a special election, I briefly served as the Representative for Pennsylvania's Seventh, District, which has been dubbed "Goofy kicking Donald" based on its cartoonish shape.

It snaked across six counties and halfway across the length and breadth of the State to collect voters to form a district with a Republican voter majority in a region that had a Democratic voter registration majority. At one point, that district was only the width of a restaurant.

For the better part of the 2010 decade, Republicans controlled 13 of Pennsylvania's 18 congressional seats through gerrymandering, despite the fact that Democrats held a statewide voter registration edge of several hundred thousand.

In 2018, as the result of a lawsuit brought by the League of Women Voters, Pennsylvania's congressional districts were declared so gerrymandered as to be an unconstitutional denial of the right to vote.

Pennsylvania State law still provides for redistricting to occur by legislation, and there is every reason to believe the Republican-controlled legislature will abuse this power again when it redistricts the Commonwealth later this year to reflect the loss of a congressional seat.

An effort to amend the State constitution to substitute a redistricting commission for the current partisan process was gutted by those same legislators just a year or so ago.

Without congressional intervention, we will continue to see politicians crack and pack districts to their benefit.

I want to take a moment to address some of the false claims being pushed about the voter legislation, H.R. 1, and the John Lewis Voting Rights Act.

These bills are absolutely necessary, as we see a concerted effort by Republican legislatures across the country to make it harder to vote and, oh, easier to overthrow elections.

First of all, this is not a Federal takeover of the election process. Article I, section 4 of the Constitution empowers Congress to regulate Federal elections.

Second, H.R. 1 and the Voting Rights Act do not outlaw voter ID. All States require some form of voter ID in registration or the voting process.

What these laws do is outlaw voter ID laws that preference some voters over others. A classic example is the Texas statute which recognized voters with a gun license but not with a student ID.

Third, although—I can't read my own writing because it disintegrated last night. Oh, although Republican legislatures over the past several decades have led the way to implement no-excuse mail-in voting, including a law that was passed before COVID in Pennsylvania, that changed in 2020, when former President Trump began, without evidence, to malign the use of mail-in ballots.

I want to make clear: Mail-in ballots are secure. They have multiple levels of security. They have been used by our military since the Civil War. And there is no evidence of widespread fraud. To the contrary, mail-in voting was a blessing during the pandemic.

For our witnesses, thank you so much for being here today.

Mr. Holder, we last met coordinating election protection efforts in the Philadelphia region in 2008.

You discussed *Shelby* in which Justice Roberts invited Congress to update the preclearance sections to respond to modern conditions. I happen to agree with the late Justice Ruth Bader Ginsburg, who dissented in that case, saying that preclearance was, in fact, working and throwing it away was like throwing away an umbrella in a storm because you are not getting wet.

Since *Shelby*, voter suppression efforts have metastasized across the country in new forms. As one of my colleagues from Pennsylvania, Malcolm Kenyatta, recently said, we now have artisanal voter suppression.

Can you talk a little bit about what we should be doing with respect to reauthorizing the preclearance provisions?

Mr. HOLDER. I think we certainly have to respond to the findings of the *Shelby County* decision, holding hearings like this, creating a record that shows the impact of the *Shelby* decision—1,700 polling place closures, unnecessary voting purges—to establish a record for congressional action.

The Court in the *Shelby* decision actually invited congressional action, and I think the efforts that are being led by Chairman Butterfield here are consistent with what the *Shelby County* decision mandated.

I think that the Congress, through the necessary work and making appropriate findings, can craft legislation that would be responsive to the concerns expressed by five members of the Court and come up with a new system that, in fact, would pass constitutional muster.

Ms. SCANLON. Thank you.

Ms. SCANLON. Mr.\_\_\_\_\_

Chairman BUTTERFIELD. The gentlelady's time has expired. You can make this your last question, if you can.

Ms. SCANLON. Actually, I would just seek unanimous consent to enter into the record the testimony of Kristen Clarke, now Assist-

ant Attorney General of the Civil Rights Division, when she testified before the House Judiciary Committee, Subcommittee on the Constitution, Civil Rights, and Civil Liberties in 2019, outlining the dozens, if not hundreds, of voter suppression acts that had occurred since the *Shelby* decision.

And with that, I yield back. Thank you.

Chairman BUTTERFIELD. The statement of the Assistant Attorney General, Ms. Clarke, will be received, unless there is objection.

Hearing no objection, it will be received.

[The information follows:]

**STATEMENT OF KRISTEN CLARKE  
PRESIDENT AND EXECUTIVE DIRECTOR  
LAWYERS' COMMITTEE FOR CIVIL RIGHTS UNDER LAW**

**U.S. HOUSE COMMITTEE ON THE JUDICIARY  
SUBCOMMITTEE ON THE CONSTITUTION, CIVIL RIGHTS AND CIVIL LIBERTIES  
HEARING ON "CONTINUING CHALLENGES TO THE VOTING RIGHTS ACT  
SINCE SHELBY COUNTY V. HOLDER"**

**JUNE 25, 2019**

Chairman Cohen, Ranking Member Johnson, and Members of the Subcommittee on the Constitution, Civil Rights and Civil Liberties of the U.S House of Representatives Committee on the Judiciary, my name is Kristen Clarke and I serve as the President and Executive Director of the Lawyers' Committee for Civil Rights Under Law ("Lawyers' Committee"). Thank you for the opportunity to testify today on challenges to voting rights: an issue of paramount importance to minorities and our democracy.

The Voting Rights Act of 1965 transformed American Democracy. Ninety-five years after its ratification, it fulfilled the promise of the Fifteenth Amendment that the right to vote should not be denied because of race, color or previous condition of servitude. Today, our nation is at a crucial juncture in the decades-long struggle to create, maintain, preserve, and ensure true equality of voting rights for African Americans, Latinos and other minority communities. The United States Supreme Court's evisceration of a core provision of the Voting Rights Act, coupled with the Department of Justice's abdication of responsibility for enforcing the remaining provisions of the Act, place the voting rights of those populations most in need of protection at peril.

The Lawyers' Committee for Civil Rights Under Law, the organization that I lead, has been a leader in the forefront of the battle for equal rights since it was created in 1963 at the request of President Kennedy to enlist the private bar's leadership and resources in combating racial discrimination. Simply put, our mission is to secure equal justice under the rule of law. For more than 50 years, the Lawyers' Committee has been at the forefront of many of the most important cases brought under the Voting Rights Act. We spearheaded the National Commission on the Voting Rights Act, which made the largest contribution to the record supporting the 2006 reauthorization of the Act and participated in the legal defense of the two cases challenging the constitutionality of the reauthorization. In 2014, we organized the National Commission on Voting Rights which issued a report documenting ongoing voting discrimination.<sup>1</sup> To this day, the Lawyers' Committee's docket of significant voting rights litigation is among the most comprehensive and far-reaching – both geographically and in terms of the issues raised – as any in the nation.

It is unacceptable that in 2019, the right to vote is at risk. A little over 12 years ago, a unanimous Senate and a nearly unanimous House of Representatives reauthorized the temporary provisions of the Voting Rights Act including Section 5.<sup>2</sup> This vote reflected the historical bipartisan support for the Voting Rights Act. That bipartisanship consensus ended six years ago, with the Supreme Court's decision in *Shelby County v. Holder*,<sup>3</sup> which despite Chief Justice Roberts conceding that "voting discrimination still exists; no one doubts that," held that the formula determining which jurisdictions were subject to the pre-clearance requirements of Section 5 was not based on current conditions, and was therefore unconstitutional. Further, the Department of Justice, a governmental agency with not only the primary enforcement authority for enforcing the Voting Rights Act but greater capacity and resources than organizations like the Lawyers' Committee has largely been absent. Indeed, the current Administration has not filed a single case under the Voting Rights Act.

The *Shelby County* decision has led to heightened challenges to voting rights for minorities including: 1) the resurgence of discriminatory voting practices, many motivated by intentional discrimination; 2) increasing levels of recalcitrance among officials who institute and re-institute discriminatory voting changes with impunity; 3) the loss of public notice regarding changes in voting practices that could have a discriminatory effect; 4) the elimination of the public's ability to participate in the process of reviewing those practices; 5) the loss of the deterrent effect of Section 5; and 6) the

<sup>3</sup> 570 U.S. 529 (2013).

increasing costs and burdens imposed on civil rights organizations and community leaders who must fill the gap left by the suspension of Section 5 and the absence of the Department of Justice in the fight to protect the most basic of freedoms. In addition, in two appendices, I provide examples of how Section 5 worked and of post-*Shelby County* instances of voting discrimination. Additionally, at present, the Lawyers' Committee is in the process of conducting a nationwide review of voting discrimination which will be included in a report later this year.

Below is a discussion of the consequences of the *Shelby County* decision, examples of the Lawyers' Committee's efforts to challenge discriminatory voting changes and the lack of enforcement of the Voting Rights Act by the Department of Justice.

#### *A. The consequences of Shelby County*

The ramifications of the decision in *Shelby County* are numerous and grave. At the most basic level, without the protections of Section 5 of the Voting Rights Act, changes that negatively impact the rights of minority voters in jurisdictions with documented histories of discrimination are now implemented without review by the federal government. As we discuss below, and as shown in Appendix 2, this permits government-authorized voter discrimination to remain in effect while challenges to it are litigated for years. The loss of the right to vote, or restrictions imposed on ballot access, even if ultimately vindicated, can never be fully remedied.

##### *1. Loss of Notice of Proposed Discriminatory Voting Practices*

One of the less recognized and more nuanced problems resulting from the lack of Section 5 preclearance is loss of notice that a discriminatory voting change has been enacted in the first place. There are a myriad of ways that the voting rights of minority citizens can be jeopardized. Many of them occur at the local level. Many of them are subtle. They range from the consolidation of polling places so as to make it less convenient for minority voters to vote, to ID requirements, to the curtailing of early voting hours that makes it more difficult for hourly-wage workers to vote, to the disproportionate purging of minority voters from voting lists under the pretext of "list maintenance." Many of these suppressive actions occur in small towns sprinkled across the country, where constant oversight is difficult, if not impossible. By requiring changes in voting practices and procedures to be reported to the federal government by jurisdictions covered by Section 5, the Voting Rights Act provided indispensable notice of such actions before they could be implemented.

##### *2. Loss of Transparency of the Process*

With notice came substantial transparency. Under Section 5, on a weekly basis, the Department of Justice posted on its website Section 5 submissions it received, pursuant to the Attorney General's Procedures for the Administration of Section 5 of the Voting Rights Act (Part 51 of Title 28 of the Code of Federal Regulations). Indeed, during 2000-2010, the Attorney General received between 4,500 and 5,500 Section 5 submissions, and reviewed between 14,000 and 20,000 voting changes per year.<sup>4</sup> The pre-clearance process itself encouraged further transparency, often involving telephone interviews with persons representing or associated with the submitting authority, local organizations, and private citizens, particularly members of the affected racial or language minority groups.

##### *3. Loss of Participation in the Process*

The administrative preclearance process encouraged public participation and allowed voters themselves to assess proposed voting changes, consult with racial justice organizations to determine the impact of any proposed changes, and have a real say in the process. For example, in Section 5 reviews of redistricting

---

<sup>4</sup>United States Department of Justice, About Section 5 of the Voting Rights Act (2017), <https://www.justice.gov/crt/about-section-5-voting-rights-act>.

plans, organizations often presented redistricting plans with demographic and statistical detail, and individual voters submitted their views on the proposed plans to the Department of Justice. This avenue of participation, particularly for minority voters and the organizations representing their interests, is lost without the Section 5 process. Notably, without Congressional action, the upcoming redistricting cycle will be the first without the full protections of the Voting Rights Act.

#### 4. Loss of Deterrence

Section 5 had its intended effect. As Justice Ginsburg memorably analogized in her *Shelby County* dissent, it was the umbrella in a rainstorm<sup>5</sup>. Its specific deterrent effect was self-evident any time the Attorney General or the United States District Court for the District of Columbia refused to preclear a proposed change in voting practices or procedures. Although the Attorney General objected to only approximately one percent of voting changes submitted under Section 5,<sup>6</sup> these objections represented over 500 redistricting plans, and nearly 800 election method changes.<sup>7</sup> Examples of discriminatory practices stopped in their tracks under Section 5 are attached to this Testimony as Appendix I.

However, Section 5 also had a powerful general deterrent effect: jurisdictions were clearly more prudent in their approach to changes in voting policy or procedure because of the preclearance requirements. The impact of *Shelby County* on general deterrence was felt immediately, when Texas announced the implementation of its discriminatory photo ID law before the ink was dry on the *Shelby County* opinion<sup>8</sup>, and the North Carolina legislature, with similar haste, enacted an omnibus voting rights law, subsequently found to have been drafted with “surgical precision” to discriminate against minority voters.<sup>9</sup>

The Texas and North Carolina examples represent the headline-grabbing events – cases that would be in the public eye even without Section 5. But the general deterrent effect of Section 5 is equally visible in those relatively smaller, but equally pernicious acts, of suppression, such as poll closings. Changes in polling places accounted for the largest number of submissions under Section 5.<sup>10</sup> Since *Shelby*, in Georgia – a state that had been subject to 151 objections by the Attorney General under Sections 5 – jurisdictions have moved swiftly with attempted efforts to close, consolidate, or relocate polling places and voting precincts since 2013, including:

- Proposal to move 16 of 37 polling sites in Henry County, GA;<sup>11</sup>
- Proposal to close all but two polling places in Randolph County, GA;<sup>12</sup>

---

<sup>5</sup> “Throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet.” *Shelby Cty., Ala. v. Holder*, 570 U.S. 529, 590 (2013) (Ginsburg, J., dissenting).

Post-*Shelby County* attempts at suppression are not limited to poll closings. Over the past 17 years, the Lawyers' Committee has led Election Protection, the nation's largest nonpartisan voter protection coalition. Election Protection—through a suite of hotlines and poll monitoring programs across the country—has provided assistance and support to hundreds of thousands of voters to ensure that they can cast a ballot that counts. Through Election Protection we have also amassed extensive data evidencing systemic barriers faced by voters. Leading up to and during the 2018 midterm election, we received widespread reports of voting practices in states with long histories of voting discrimination like Georgia, Texas, Florida and North Dakota that suppressed the vote. Here are a few examples:

- In Georgia under the state's "exact match" law, more than 53,000 voter registration applicants, a disproportionate number of whom were African Americans, were placed into "pending" status if the information on their voter registration forms did not exactly match the information in the state's other error-laden government databases. The law also led to Georgians who are citizens being flagged as potential non-citizens due to the process of comparing the information in the applicant's voter registration form against outdated citizenship data in the state's driver's license records. The Lawyers' Committee and its partners challenged the law, and a federal court enjoined Georgia's practice of mandating proof of citizenship documents be produced only to

deputy registrars, who are frequently not stationed at polling places, and ordered that the documents be produced to poll managers, who are required to be on-site at polling stations.<sup>19</sup>

- In Georgia ahead of the 2018 midterm election, a federal court ordered emergency relief to block the practices of allowing election officials with no prior training in signature verification to reject absentee ballots if they believed the signature on the ballot did not match the voter's signature on file and to reject absentee ballots based upon immaterial omissions or mistakes on the absentee ballot envelopes without allowing the voters a reasonable opportunity to cure the issue so the ballots could be counted.<sup>20</sup>
- In November 2018, a federal court in Florida held that the state's law, which allowed county election officials to reject vote by mail ballots based upon the officials' untrained determination that the signature on the vote by mail ballot did not match the voter's signature on file with the county election office, constituted an unconstitutional burden on the right to vote.<sup>21</sup>
- In North Dakota, where Native Americans comprise a larger share of the state's population than nationwide, voters were required to provide a state ID showing a residential address. Many Native Americans who live on reservations lack street addresses on their state ID.<sup>22</sup>
- In Texas, minority voters and voters who are not native English speakers reported incidents where they were asked about their race, citizenship status, and length of stay in the country by poll workers and poll watchers.<sup>23</sup>

##### 5. Increased Burden and Cost of Litigation

Additionally, there is the cost of challenging discriminatory voting changes – costs which now must be borne primarily by civil rights organizations, whose resources are already stretched thin. Under Section 5, the two methods for a covered jurisdiction to comply with the preclearance requirement were a declaratory judgment action filed by the covered jurisdiction in the United States District Court for the District of Columbia, or administrative review requiring the Attorney General to determine within 60 days of submission whether to block a voting change because the submitting jurisdiction failed to show the change was non-discriminatory.<sup>24</sup> The latter avoided expensive and lengthy litigation by submitting proposed changes to the Civil Rights Division of the Department of Justice. The optional declaratory judgment route required a convening by a three-judge panel in the United States District Court for the District of Columbia, with the United States or the Attorney General as the defendant. Over 99 percent of

<sup>23</sup> *Id.*

<sup>24</sup> United States Department of Justice, About Section 5 of the Voting Rights Act (2017), <https://www.justice.gov/crt/about-section-5-voting-rights-act>.

changes were reviewed administratively.<sup>25</sup> It is important to note that Section 2 of the Voting Rights Act is not an adequate substitute for the prophylactic remedy provided by Section 5.

Without Section 5, enormous resources are needed to both bring, and defend Section 2 claims. While jurisdictions may extend the financial burden to taxpayers, citizens often rely on nonprofit organizations to challenge discriminatory voting practices. Section 2 cases cost millions of dollars to litigate,<sup>26</sup> not only in terms of thousands of hours of attorney time, but out-of-pocket expenses for filing fees, transcripts, expert witnesses, and travel.

Section 2 litigation often lasts years and, in some cases, plaintiffs are forced to bring multiple lawsuits over the course of many years to address the same problems because state officials refuse to comply with the federal law even after they have been sued previously for the same issues. The Section 2 Texas photo ID case was a 5-year legal battle, before it ended with a judgment of discrimination and the Texas Legislature's enacting a new law found by the Court of Appeals to cure the discriminatory effect of the old law.<sup>27</sup>

In Georgia, voters and advocates have been forced to bring multiple lawsuits challenging various iterations of the state's "exact match" voter registration process over the years that has been demonstrated to prevent Georgia's eligible people of color to complete the voter registration process in order to participate in Georgia's elections. In 2008, voters challenged an iteration of the "exact match" process that was instituted by former Secretary of State, Karen Handel, because the state failed to obtain preclearance of the process by the DOJ before implementing it.<sup>28</sup> Subsequently, once Handel's successor, Brian Kemp, finally obtained preclearance of a different iteration of the "exact match" process in 2010, voting advocates discovered that the process was disproportionately preventing eligible people of color from successfully completing the voter registration process and filed a second lawsuit challenging the process in 2016.<sup>29</sup> Even after Secretary Kemp agreed to settle the 2016 "exact match" litigation, his staff was working behind the scenes with lawmakers in the Georgia General Assembly to draft House Bill 268 in 2017, which codified the exact match process - a process which had already been shown to have a disproportionate, negative effect on the ability of people of color to complete the voter registration process.<sup>30</sup> As a result, voting advocates were forced to file the third lawsuit within 10 years to challenge the iteration of the "exact match" process enacted as a result of the passage of House Bill 268 in 2018.<sup>31</sup>

As noted above, costs are also borne by governmental entities defending against discrimination claims. North Carolina lawmakers spent more than \$10.5 million defending their discriminatory omnibus voting bill; and Texas spent more than \$3.5 million defending its discriminatory photo ID law.<sup>32</sup> It is unfortunate that taxpayers -- who include those discriminated against -- must foot the bill for their government's discriminatory conduct. But those are among the additional protections lost by the elimination of the much less-costly and time-consuming administrative process under Section 5 that often nipped discriminatory practices in the bud.

#### B. Examples of Lawyers' Committee's Efforts to Challenge Discriminatory Voting Changes

In the years since *Shelby*, we have seen many discriminatory voting practices put in place, both in jurisdictions previously covered by Section 5 and those that were not. But, I emphasize, we have not seen all such attempts. We can only fight the threats we know about, and we have been fortunate to have strong local partners on the ground who use their own strained resources to maintain a wary eye on local election changes. Georgia, a state previously covered by Section 5 of the Voting Rights Act, provides examples of the obstacles facing minority voters that Section 5 would have blocked.

In 2015, the Board of Elections and Registration, in Hancock County, Georgia, changed its process so as to initiate a series of "challenge proceedings" to voters, all but two of whom were African American, which resulted in the removal of 53 voters from the register. Later that year, the Lawyers' Committee, representing the Georgia State Conference of the NAACP and the Georgia Coalition for the People's Agenda and individual voters, challenged this conduct as violating the Voting Rights Act and the National Voter Registration Act, and obtained a preliminary injunction, which resulted in the unlawfully-removed voters placed back on the register. Ultimately plaintiffs and the Hancock County Board agreed to the terms of a Consent Decree that will remedy the violations, and requires the county's policies to be monitored for five years.<sup>33</sup> But after the purge and prior to the court order, Sparta, a predominantly black city in Hancock County, elected its first white mayor in four decades. And before the case was settled, and the wrongly-purged voters placed back on the rolls, at least one of them had died.

Also, in 2015, the Georgia state enacted a mid-decade redistricting plan that reduced the minority population in State House districts in 105 and 111, where increases in the minority voting population had enabled candidates preferred by minority voters to almost defeat the white incumbents. They provided the incumbents with a greater safety margin by re-drawing the districts that made the districts more white in composition and those incumbents narrowly prevailed in 2016. The Lawyers' Committee filed suit in 2017 alleging intentional racial discrimination and a racial gerrymander.<sup>34</sup> Fortunately, there, the plan did not work, and African American candidates were able to prevail in 2018, despite the efforts to prevent such a result. Ultimately the site was relocated to a majority black church.

Efforts to move polling sites to hostile locations was also another discriminatory practice that had been blocked by the Section 5 review process. Without Section 5, we've seen officials attempt to move sites to intimidating locations. In 2016, the Macon-Bibb County, Georgia, Board of Elections voted to temporarily relocate a voting precinct location to the Macon-Bibb Sheriff's Office. Because of valid fears that this decision would reduce turnout among African American voters, the Lawyers' Committee worked with its local partners, the Georgia State Conference of NAACP Branches, the Georgia Coalition for the People's Agenda, and New Georgia Project, to organize a successful petition drive that required the Board of Elections to reverse the relocation decision under Georgia law<sup>35</sup>

In certain instances, we were fortunate to have partners on the ground that alerted us to potentially discriminatory voting barriers. An effective Section 5 process would have placed the burden on these jurisdictions to have provided notice of these changes in their voting practices and policies before they took effect.

---

<sup>33</sup> See *Georgia State Conference of NAACP v. Hancock Cty. Bd. of Elections & Registration*, No. 5:15-CV-00414 (CAR), 2018 WL 1583160, at \*1 (M.D. Ga. Mar. 30, 2018).

<sup>34</sup> See *Georgia State Conference of the NAACP v. State of Georgia*, 269 F. Supp. 3d 1266 (N.D. Ga. 2017).

<sup>35</sup> Stanley Dunlap, *Macon-Bibb Polling Location OK'd After Sheriff's Precinct Nixed*, The Telegraph May 16, 2016, 7:27 PM), <http://www.macon.com/news/local/article77920442.html>.

Texas presents another jurisdiction which demonstrates the substantial problems caused by *Shelby County* in previously covered jurisdictions. In 2011, the Texas legislature passed a law, SB 14, which limited the number of identifying documents for purposes of voting to seven, all photo IDs.<sup>36</sup> Because Section 5 was in effect at the time of SB 14's passage, Texas sought pre-clearance, first from the Justice Department, which blocked the change. Then, Texas sought preclearance from the United States District Court for the District of Columbia. On August 30, 2012, a unanimous three-judge panel of that court denied Texas pre-clearance, ruling that because Black and Latinx voters would be disproportionately burdened in obtaining the required IDs compared to white voters, that SB 14 would have a retrogressive effect on these minority voters.<sup>37</sup> However, on June 27, 2013, this judgment was vacated by the Supreme Court in accordance with the ruling in *Shelby* two days earlier.<sup>38</sup>

Texas had not even waited for the Supreme Court to act on the case. The afternoon that *Shelby* was decided, then Texas Attorney General Greg Abbott announced that the State would immediately implement SB 14.<sup>39</sup> Without the protections of Section 5, several civil rights groups including the Lawyers' Committee for Civil Rights Under Law, filed suit in Texas federal court, challenging SB 14 under Section 2 of the Voting Rights Act. The Department of Justice filed its own suit under Section 2, which was consolidated with those of the civil rights groups.<sup>40</sup> The parties then embarked on months of discovery, leading to a two-week trial in September 2014, where dozens of witnesses, including 16 experts – half of whom were paid for by the civil rights groups – testified.

In late 2014, the District Court ruled that SB 14 violated the “results” prong of Section 2 of the Voting Rights Act, because it had a discriminatory result in that Black and Hispanic voters were two to three times less likely to possess the SB 14 IDs and that it would be two to three times more burdensome for them to get the IDs than for white voters.<sup>41</sup> The District Court’s injunction against SB 14, however, was stayed pending appeal by the Fifth Circuit, so the law – now deemed to be discriminatory remained in effect. Subsequently, a three-judge panel and later an en banc panel of the Fifth Circuit Court of Appeals, affirmed the District Court’s finding. As a result, elections that took place from June 25, 2013 until the Fifth Circuit *en banc* opinion on July 20, 2016 took place under the discriminatory voter ID law.<sup>42</sup>

Had Section 5 been enforceable, the enormous expense and effort that the civil rights groups bore would not have been necessary. More important, had Section 5 been enforceable, a law found to have been discriminatory by 14 different federal judges would never have taken effect.

<sup>39</sup> See Ryan J. Reilly, Harsh Texas Voter ID Law ‘Immediately’ Takes Effect After Voting Rights Act Ruling, Huffington Post (June 25, 2013 2:04 PM), [https://www.huffpost.com/entry/texas-voter-id-law\\_n\\_3497724](https://www.huffpost.com/entry/texas-voter-id-law_n_3497724).

<sup>40</sup> The suits were consolidated under *Marc Veasey v. Greg Abbott*, 265 F. Supp. 3d 684 (S.D. Tex. 2017).

<sup>41</sup> *Veasey v. Perry*, 71 F. Supp. 3d 627, 659-77 (S.D. Tex. 2014), *aff’d in part, vacated in part, remanded sub nom. Veasey v. Abbott*, 796 F.3d 487 (5th Cir. 2015), *on reh’g en banc*, 830 F.3d 216 (5th Cir. 2016), *and aff’d in part, vacated in part, rev’d in part sub nom. Veasey v. Abbott*, 830 F.3d 216 (5th Cir. 2016).

<sup>42</sup> *Veasey v. Abbott*, 830 F.3d 216 (5th Cir. 2016). The district court had also found that SB 14 was enacted, at least in part, with discriminatory intent, a prerequisite of a constitutional violation, but the issue was remanded for further fact-finding. On remand, the district court reaffirmed its finding of discriminatory intent. On appeal from that ruling, the Fifth Circuit reversed, not on the merits, but because by then the Texas Legislature had enacted a new law that substantially remediated the discriminatory effects of SB 14, according to that court.

#### A. Enforcement of the Voting Rights Act

Since *Shelby*, the Department of Justice has filed only *four* suits alleging violations of Section 2 of the Voting Rights Act and only one after 2013.<sup>43</sup> By way of comparison, the Lawyers' Committee has filed *thirteen* such suits during that same time period.<sup>44</sup> Of even greater concern is that since January 20, 2017, the Department has not filed a single suit under the Voting Rights Act.<sup>45</sup> Again, by way of comparison, the Lawyers' Committee has filed *five* lawsuits under Section 2 during that same period.<sup>46</sup> Two of the Section 2 cases filed by the Lawyers' Committee settled relatively quickly with the establishment of majority-minority election districts in Emanuel County, Georgia and Jones County, North Carolina. The increase in work being carried out by civil rights organizations has helped provide relief for minority voters, but is no substitute for the protections provided by Section 5.<sup>47</sup>

As shown in Appendix 2, enforcement of voting rights in the states has fallen primarily upon the shoulders of individual voters, non-profit voting rights and racial justice organizations or other non-governmental advocates. Although not all of the cases in Appendix 2 would have been avoided through the preclearance process, it is clear that states, particularly those with a well-documented history of voting discrimination, wasted no time in enacting discriminatory voting changes and implementing a whole host of barriers to the ballot box that negatively and disproportionately impacted African Americans, Latinxs, and other people of color in the wake of *Shelby*. Many of these cases stand as stark examples of the onerous and burdensome nature and uncertain outcome of private enforcement of our voting rights laws

that the Section 5 preclearance process and strong federal enforcement of voting rights could largely prevent or mitigate against.

Conclusion

The combination of the effective elimination of Section 5 of the Voting Rights Act and lack of enforcement activity of the Civil Rights Division of the Justice Department presents a perfect storm not seen since the days preceding the enactment of the momentous civil rights legislation in the 1960s. Vigilance is required to monitor and xxx the resurgence of voting rights discrimination in formerly covered jurisdictions and we urge Congress to act swiftly to restore the Voting Rights Act to help this Nation protect that most fundamental of all civil rights: the right to vote.

## APPENDIX I

### **Examples of discriminatory voting changes that Section 5 prevented from taking effect.**

Prior to the Supreme Court's decision in *Shelby County v. Holder*,<sup>48</sup> Section 5 of the Voting Rights Act prevented numerous discriminatory voting changes from taking effect. The *Shelby County* decision has hit African American voters particularly hard as nearly 90% of the proposed voting changes stopped by Section 5 between 1995 and 2013 involved a discriminatory purpose or effect on African American voters.<sup>49</sup> During that 18-year period, there were 113 denials for Section 5 preclearance, examples of which are highlighted below.<sup>50</sup>

**Redistricting Changes:** Over half of the Section 5 preclearance denials were for redistricting changes, including denials of statewide redistricting plans in Arizona, Florida, Louisiana, South Carolina and Texas.

- In 1996, the Justice Department objected to Louisiana's congressional redistricting plan, concluding that with the racially polarized voting pattern in Louisiana, the proposed plan would "provide no realistic opportunity for black voters to elect a candidate of their choice outside the New Orleans area."<sup>51</sup>
- In 1997, the Justice Department objected to South Carolina's State Senate redistricting plan based on clear findings of racially polarized voting patterns.<sup>52</sup>
- In 2002, the Justice Department objected to Arizona's 2001 legislative redistricting plan on the grounds that the state failed to provide sufficient evidence to show that voting was not racially polarized and failed to prove that the proposed decreased number of majority-minority districts would not be retrogressive.<sup>53</sup>
- In 2011, Texas created redistricting plans for the Texas House of Representatives, the Texas Senate and the United States Congress and sought to bypass the Justice Department's preclearance process by filing suit for judicial preclearance. The three-judge panel of the U.S. District Court for the District of Columbia denied preclearance for all three plans, finding signs of purposeful discrimination in the State House of Representatives plan, intentional discrimination against minority voters in the Texas Senate and congressional redistricting plans. Additionally, the court concluded that the State House of Representatives and congressional redistricting plans were retrogressive.<sup>54</sup>

### **Polling Place Closures and Changes**

- In 2003, Bexar County in Texas announced it was planning to reduce the number of early voting polling places from 20 to 11 while awaiting the Justice Department's decision on the County's preclearance request. Among the polling place closures were five that served the predominantly-

Hispanic west side of San Antonio. A civil rights organization filed a Section 5 enforcement action seeking an injunction, which was granted by a federal court to enjoin the polling place closures.<sup>55</sup>

**Voter Registration Laws:**

- In response to the NVRA, in 1995 Mississippi implemented a dual registration system where voters who registered under NVRA-mandated options would only be eligible to vote in federal elections. In order to vote in state elections, eligible voters were required to re-register using state forms. Following concerns raised by the Justice Department, Mississippi refused to submit the dual registration system for Section 5 preclearance. Private plaintiffs commenced a Section 5 enforcement action that made its way to the Supreme Court, which held that Mississippi was required to obtain preclearance. The Justice Department objected to the dual registration system and Mississippi abandoned it.<sup>56</sup>

**Voter Purges:**

- In 2007, Georgia implemented a computerized citizenship matching procedure that cross-checked the statewide voter registration list with citizenship information in the state's driver's license database to identify and remove noncitizens from the voter rolls. Local election officials in the state were provided with a computerized printout of potential noncitizens with instructions that they use it to review voter eligibility. This led to local election officials mailing letters to thousands of voters informing them that they would be removed from the voter registration lists unless they appeared in-person and presented proof of citizenship. In some instances, voters were given as little as a few days to do so. A private citizen, who obtained their license in April 2006, became a United States citizen in November 2007 and registered to vote in September 2008 then subsequently received letters from Cherokee County election officials, brought a Section 5 enforcement action because Georgia had not submitted the new procedure for preclearance. A federal court in Georgia enjoined the State from using the procedure until preclearance was obtained and ordered the State to take steps to remedy its prior unauthorized use of the procedure. In May 2009, the Justice Department interposed a Section 5 objection to Georgia's procedure noting that it subjects minority voters to additional and erroneous burdens on the right to vote.<sup>57</sup>

**APPENDIX 2****Alabama****Challenge to At-Large Elections for Judicial Candidates that Dilute the Voting Strength of Black Voters**

*Alabama State Conference of NAACP v. Alabama*, 264 F. Supp. 3d 1280 (M.D. Ala. 2017): On September 7, 2016, Plaintiffs filed a vote dilution lawsuit under Section 2 of the Voting Rights Act (VRA) in the Middle District of Alabama challenging the state's at-large method of electing justices and judges of the Alabama Supreme Court, the Court of Criminal Appeals, and the Court of Civil Appeals. Defendants filed a motion to dismiss; the District Court denied the motion. The case was tried in November 2018 and the parties are awaiting a decision.

**Lawsuit Challenging Alabama's Discriminatory Photo ID Law**

*Greater Birmingham Ministries v. Merrill*, Case No. 2:15-cv-02193-LSC (N.D. Ala. 2015): On December 2, 2015, advocates filed a lawsuit in the United States District Court for the Northern District of Alabama challenging Alabama's photo ID law under Section 2 of the VRA and the United States Constitution. Plaintiffs contend the photo ID law violates 1) Section 2 of the Voting Rights Act because it abridges or denies the right to vote on account of race, color, or language minority status, 2) violates the prohibition on tests or devices for voting under the VRA, and 3) violates the Fourteenth and Fifteenth Amendments because it was purposefully enacted to deny or abridge the right to vote on account of race or color. On January 10, 2018, the Court granted summary judgment in favor of the Alabama Secretary of State and dismissed the lawsuit.<sup>58</sup> The Plaintiffs' appeal is pending.

**Voters Challenge Alabama's Congressional Map that Dilutes the Voting Strength of Black Voters**

*Chestnut v. Merrill*, No. 2:18-CV-00907 (N.D. Ala. Mar. 27, 2019): In June of 2018, eight Alabama voters filed a federal lawsuit alleging that Alabama's 2011 congressional map violates Section 2 of the VRA. Plaintiffs allege the map packs African-American voters into Alabama's Seventh Congressional District and significantly cracks African-American voters between three other congressional districts, with the effect of diluting African-American voting strength. The suit alleges that the African-American population in the three "cracked" congressional districts is sufficient to form a second majority-minority district. On March 27, 2019, the court partially granted the Defendant's motion for judgment on the pleadings, concluding that Plaintiffs' demand for affirmative relief is barred by the doctrine of laches, but denied the motion as to Plaintiffs' demand for declaratory relief (i.e., a declaration determining the maps violate Section 2). The case is currently scheduled for trial later this year.

---

<sup>58</sup> *Greater Birmingham Ministries v. Merrill*, 284 F.Supp.3d 1253 (N.D. Ala. 2018).

#### **Voters Challenge Alabama's Felony Disenfranchisement Law**

***Thompson v. Merrill, Civil Action No. 2:16-cv-783-WKW-CSC (M.D.Ala. 2016)***: In 2016, Alabama voters filed suit challenging Alabama's felony disenfranchisement law which they allege is intentionally racially discriminatory and leads to arbitrary and unconstitutional disenfranchisement of citizens in violation of the United States Constitution and Section 2 of the VRA. Plaintiffs also argue that broad felon disenfranchisement is not sanctioned by the Fourteenth Amendment's "rebellion or other crime" language and that the Constitution supports, at most, very limited disenfranchisement of voting-related offenses. The case is pending.

#### **Alaska**

##### **Lawsuit Successfully Challenged Alaska's Failure to Provide Language Assistance to Yup'ik and Gwich'in Speaking, Limited English Proficient Voters**

***Toyukak v. Treadwell, No. 3:13-cv-00137-SLG (D. Alaska June 24, 2014)***: Voters and tribal councils filed suit challenging the failure of state and local officials to provide language assistance to Yup'ik and Gwich'in speaking, limited English proficient voters under Section 203 of the VRA and the United States Constitution. After prevailing on their Section 203 claim at trial, the Court ordered comprehensive remedies for the 2014 election cycle and, in 2015, the parties entered into a settlement that included additional language assistance reforms in the state.

#### **Arizona**

##### **Maricopa County, Arizona Sued Post-Shelby Due to Election Administration Problems caused by Polling Place Consolidations**

***Huerena v. Reagan, Superior Court of Arizona, Maricopa County, CV2016-07890***: This lawsuit challenged the reduction of polling places in Maricopa County after severe cut-backs disenfranchised voters in the 2016 presidential preference primary because of extremely long lines, hours-long wait-times and a host of election administration problems. Maricopa County is Arizona's most populous county and was a covered jurisdiction under Section 5 of the VRA with approximately 60 percent of the state's minority voters residing in the county. As a result of the *Shelby* decision, Maricopa County was no longer required to preclear polling place changes. As a result, in February 2016 the county slashed the total number of polls from 211 in 2012 to only 60 in 2016. With this reduction, there was approximately one polling place for every 21,000 voters in Maricopa County as compared to one polling place for every 1,500 voters in the rest of the state. The parties settled the case with an agreement that required Maricopa County to create a comprehensive wait-time reduction plan and a mechanism to address wait times at the polls that exceed 30 minutes.

**Arizona Secretary of State Sued to Enjoin the State's Two-Tier Voter Registration Process**

*League of United Latin Am. Citizens Arizona v. Reagan*, No. CV17-4102 PHX DGC, 2018 WL 5983009 (D. Ariz. Nov. 14, 2018): Arizona created a two-tier voter registration process in the wake of the Supreme Court's decision in *ITCA v. Arizona*, which held that Arizona's documentary proof of citizenship requirement was preempted by the National Voter Registration Act (NVRA) as applied to federal elections. Confusion ensued when the state limited voters using the federal form to voting in federal elections, even if the state had information in its possession confirming the applicant was a United States citizen. Plaintiffs argued that the state's two-tier registration process constituted an unconstitutional burden on the right to vote. The parties settled the matter with an agreement that allows the state to continue to require proof of citizenship to register to vote in state elections, but requires the state to treat federal and state registration forms the same and to check motor vehicle databases for citizenship documentation before limiting users of the federal registration form to voting in federal elections.

**State Court Challenge to the Redistricting of the Maricopa County Community College District Which Added Two At-Large Seats to the Board**

*Gallardo v. State*, 236 Ariz. 84 (Ariz. 2014): Elected officials and voters filed suit in December 2013 in Arizona state court challenging the method used for electing the Governing Board of the Maricopa County Community College District. In 2010, the Arizona Legislature enacted H.B. 2261 requiring that two at-large seats be added to the Governing Board, increasing the size of the Board from five to seven. The pre-existing five members of the Board were elected from single-member districts. As a result, H.B. 2261 established a new method of election consisting of five members elected from single-member districts and two elected at large. The lawsuit alleged that H.B. 2261 violated the Arizona State Constitution because the statute effectively only applies to the Maricopa County District, and does not apply to any of the other community college districts in the state. The suit alleged that H.B. 2261 violates the state Constitution's prohibition against local or special laws and the Constitution's privileges and immunities clause.

When H.B. 2261 was enacted, Arizona was required by Section 5 of the Voting Rights Act to obtain preclearance for its voting changes. The State submitted this legislation to the U.S. Department of Justice for review, and the DOJ responded by sending a written request for additional information noting concerns as to whether the addition of two at-large seats would discriminate against the District's minority residents. Instead of providing the requested information, the State set the legislation aside and did not seek to implement it. However, as a result of the Supreme Court's decision in June 2013 in *Shelby County v. Holder*, Arizona was no longer covered by Section 5 and thus was not required to obtain preclearance to implement H.B. 2261. As a result, after *Shelby County* was decided, local election officials began preparations to fill the two new at-large seats in the November 2014 election.

Shortly after suit was filed, the constitutionality of H.B. 2261 was presented to the Arizona superior court for decision and, on March 27, 2014, the court ruled in favor of the defendants. Plaintiffs appealed and on April 23, 2014, one day after oral argument, the Arizona Court of Appeals held that H.B. 2261 is a special law that violates the Arizona Constitution. Defendants then appealed and, on August 26, 2014, the Arizona Supreme Court issued a minute order vacating the ruling by the Arizona Court of Appeals. In the November 2014 election, the two new at-large seats were filled. A Latino candidate ran but finished third, and thus was defeated.

**Voters, Political Party and Candidate Filed Suits Challenging Arizona's Criminalization of the  
Collection of Absentee Ballots by Persons other than the Voter and  
Restrictions on Out of Precinct Voting**

***Democratic National Committee v. Reagan* CV-16-01065 (D.Az. 2016):** The Plaintiffs allege that Arizona's criminalization of the collection of valid absentee ballots by persons other than the voter and the state's restrictions on out of precinct voting violate Section 2 of the VRA and Constitution. Plaintiffs did not prevail at trial or before a panel of the Ninth Circuit Court of Appeals. However, in January 2019, the Ninth Circuit granted a rehearing *en banc* and the case remains pending at this time.

**California**

**Successful Section 2 Vote Dilution Lawsuit on Behalf of Latino Voters Challenging the Districting Plan for the Five Member Kern County Board of Supervisors**

***Luna v. County of Kern*, 291 F.Supp. 3d 1088 (E.D. Cal. 2018):** This was an action brought pursuant to Section 2 of the Voting Rights Act on behalf of Latino voters in Kern County, California, in which Plaintiffs alleged that the districting plan under which the five members of the Kern County Board of Supervisors were elected deprived Latino voters an equal opportunity to elect candidates of their choice. After the District Court found in favor of the Plaintiffs at trial, the parties agreed to a settlement which provided for a new districting plan with ability to elect majority-Latino districts and an award of \$3 million dollars in attorneys' fees and costs to plaintiffs' counsel.

**Connecticut**

**NAACP Challenged "Prison Gerrymandering" of Connecticut Legislative Districts**

***NAACP v. Merrill*, No: 3:18-cv-01094 (D. Conn. 2018):** In June 2018, the NAACP, the NAACP Connecticut State Conference and five Connecticut NAACP members, filed suit contending that Connecticut's 2011 state legislative maps violate the "one person, one vote" principle of the Fourteenth Amendment because of unlawful prison gerrymandering, i.e., counting incarcerated individuals as residents of the district in which they are imprisoned rather than at their home addresses for the purpose of drawing state legislative districts. Plaintiffs argue that this practice dilutes the voting power of the predominantly African American and Latino prisoners' home communities. Defendants' motion to dismiss was denied in February 2019 and the state has appealed that decision.

**Florida****Voters and Voting Rights Advocates Challenge Florida's Arbitrary Standards for Restoring the Voting Rights of Returning Citizens**

***Hand v. Scott, 315 F. Supp. 3d 1244 (N.D. Fla. 2018):*** Advocates filed a class action lawsuit that sought to automatically restore the voting rights of returning citizens and eliminate Florida's arbitrary petition process for re-enfranchisement. The case cited the lack of any rules governing the Executive Clemency Board, which grants or denies former felons' petitions for re-enfranchisement, as arbitrary treatment in violation of the First and Fourteenth Amendments. The case was filed in March 2017, and the Plaintiffs obtained a preliminary injunction in March 2018 that required the Executive Clemency Board to establish a new re-enfranchisement process by April 26, 2018. Defendants appealed to the Eleventh Circuit Court of Appeals, and on April 25, 2018, the court granted then Governor Scott's request to stay the order requiring him to establish a new re-enfranchisement process.

**Voters and Voting Rights Advocates Successfully Challenge Florida's Congressional District Maps in State Court**

***League of Women Voters of Fla. v. Detzner, 179 So. 3d 258 (Fla. 2015):*** State-court litigation was filed by good-government groups over concerns that Florida's congressional maps were unconstitutional under state law. The Circuit Court agreed and found that congressional districts five and ten were unconstitutional and had to be redrawn. The legislature enacted new maps, and the Court did not object to the new maps. Plaintiffs appealed the decision after the Florida Legislature enacted the new maps and requested certification to the Florida Supreme Court. The district court of appeals granted certification to the Florida Supreme Court, and it accepted jurisdiction. The NAACP intervened to defend African American opportunity districts that were threatened. Other civil rights advocates filed an *amicus* brief to inform the Court about concerns over the reduction of District Nine's Latino population. Both the NAACP and *amici* have focused on protections offered by the Fair Districts Amendment under Florida's Constitution. The Florida Supreme Court ruled that the maps are unconstitutional and ordered the legislature to redraw several congressional districts.

**Voters Filed Suit against the Florida Secretary of State and 32 Counties Due to Their Failure to Provide Adequate Language Assistance to Puerto Rican Voters under the Voting Rights Act**

***Madera v. Detzner, No. 1:18-CV-152-MW/GRJ (N.D. Fla. 2018):*** After Hurricane Maria devastated Puerto Rico, an estimated 160,000 people fled to Florida, joining over half a million people who left Puerto Rico in the past decade because of the island's economic crisis. As a result, Florida's Puerto Rican population now totals over one million. Section 4(e) of the VRA requires the provision of bilingual voting materials and assistance for Puerto Rican-educated, limited English proficiency voters. After advocates were unable to informally obtain compliance by sending letters about these requirements to election officials, they filed a lawsuit against the Florida Secretary of State and 32 Florida counties to compel compliance with Section 4(e). On September 7, 2018, the district court ordered the Secretary of State to issue instructions to the 32 counties, requiring them to provide Spanish-language sample ballots at polling places, on county websites, and by mail to guide voters in marking their ballots, and to publicize the availability of these sample ballots and instructions on how to use them. On May 10, 2019, the District Court issued an order requiring Florida's Secretary of State and the Supervisors of Elections in the 32

Florida counties take further action to comply with Section 4(e) of the VRA. Specifically, the order requires the Secretary of State to ensure that those 32 counties provide 1) official ballots in both Spanish and English, 2) Spanish language election assistance, and, 3) Spanish translations of other voting materials for elections beginning with the 2020 presidential primary election. The case remains pending.

**Voting Rights Advocates Successfully Organized Campaign to Pass Amendment Automatically Restoring Rights to Returning Citizens, but the Florida Legislature Made Efforts to Undermine its Implementation**

Advocates invested significant resources to support a ballot initiative (Amendment 4) that restored voting rights to individuals with felony records upon completion of their sentences. Despite the fact that Amendment 4 was designed to be self-implementing, the Florida enacted laws in 2019 that will require returning citizens to satisfy fines and fees before becoming eligible to register to vote. In addition, in the wake of this successful ballot initiative, Florida also enacted legislation making it more difficult for proponents of ballot initiatives to be successful in the future.

**Georgia**

**Voters and Voting Rights Advocates Challenge Georgia's "Exact Match" Law Which Disproportionately Disenfranchises African American, Latino and Asian American Voters**

*Georgia Coal. for People's Agenda, Inc. v. Kemp*, 347 F. Supp. 3d 1251 (N.D. Ga. 2018): On October 11, 2018, a coalition of civil rights organizations filed suit in the U.S. District Court for the Northern District of Georgia, against then Georgia Secretary of State, Brian Kemp, alleging that Georgia's "exact match" voter registration process, which requires information on voter registration forms to exactly match information about the applicant on Social Security Administration (SSA) or the state's Department of Driver's Services (DDS) databases, violates Section 2 of the VRA, the NVRA, and imposes an unconstitutional burden on the right to vote in violation of the First and Fourteenth Amendments. Under the "exact match" process, more than 53,000 applicants were in "pending" status in 2018 because the information on their voter registration applications did not exactly match the DDS or SSA database information or because the process inaccurately flagged United States citizens as potential non-citizens. On November 2, 2018, the Court partially granted Plaintiffs' motion for preliminary relief, ordering that Georgians inaccurately flagged as non-citizens could vote a regular ballot if they provided proof of citizenship to a poll manager, rather than a deputy registrar, when voting at the polls for the first time. The Georgia legislature subsequently amended the "exact match" law in 2019 to permit applicants who fail the "exact match" process for reasons of identity to become active voters, but the Legislature chose not to enact any remedial legislation to reform the "exact match" process that continues to inaccurately flags United States citizens as non-citizens. The litigation is still pending.

**Voters and Advocates Successfully Challenged Georgia's Rejection of Absentee Ballots Based upon Alleged Signature Matching and Immaterial Errors or Omissions**

*Martin v. Kemp*, No. 18-14503-GG (N.D. Ga. 2018): On October 23, 2018, civil rights organizations joined lawsuits challenging the state's practices of 1) rejecting of absentee ballots based upon election officials' untrained conclusion that the voter's signature on the absentee ballot envelope did not match the voter's signature on file with the registrar's office, and 2) rejecting absentee ballots for immaterial errors or omissions on the ballot envelope. Georgia had an extraordinarily high rate of absentee ballot rejections

generally, but the rejection rate in Gwinnett County was almost 3 times that of the state and absentee ballots cast by voters of color were rejected by Gwinnett County at a rate between 2 and 4 times the rejection rate of absentee ballots cast by white voters. Plaintiffs were granted preliminary relief before the November 2018 mid-term election. Subsequently, Georgia enacted remedial legislation and the lawsuits were voluntarily dismissed in 2019.

#### **Successful Legal Challenge to Georgia's Runoff Election Scheme in Federal Elections**

***Georgia State Conference NAACP v. Georgia, No. 1:17-CV-1397-TCB (N.D. Ga. May 4, 2017):*** This case challenged Georgia's runoff election voter registration scheme as a violation of the National Voter Registration Act ("NVRA"). Under Georgia law, eligible Georgians were required to register to vote on the fifth Monday before a general or primary election in order to be eligible to vote in a runoff election if no candidate received a majority of the vote. The runoff election would generally be held about two months after the general or primary election. As a result, Georgians would be required to register to vote approximately three months before a runoff election in order to participate in that election. Under Section 8 of the NVRA (52 U.S.C. § 20507(a)(1)), states are prohibited from setting voter registration deadlines in excess of thirty days before a federal election. Thus, Georgia's runoff election voter registration scheme violated this provision of the NVRA and the District Court granted a preliminary injunction enjoining the state from using the longer deadline ahead of the Georgia Sixth Congressional Runoff Election in June 2017. Subsequently, the parties settled the matter with the Secretary of State agreeing not to enforce a voter registration deadline that violated Section 8 of the NVRA.

#### **Voters and Voting Rights Advocates Challenged Georgia's Mid-Decade Redistricting of Two Legislative Districts Targeting African-American Communities**

***Georgia State Conference of NAACP v. Georgia, No. 1:17-CV-1427 (N.D. Ga. 2017) and Thompson v. Kemp, 1:17-cv-03856- TCB (N.D. Ga. 2017):*** Voters and advocates filed two lawsuits in the United States District Court for the Northern District of Georgia, challenging the State legislature's post-*Shelby* 2015 redistricting of two legislative districts as racial and partisan gerrymanders. The Plaintiffs alleged the legislature targeted African American population in drawing the districting plans to increase the electoral advantage of white Republicans as the districts were becoming more competitive for Black Democrats. The *Thompson* Plaintiffs' suit also alleged a claim under Section 2 of the Voting Rights Act. After African American candidates were elected to seats in both of the challenged districts in November 2018, the parties agreed to voluntary dismissals of the actions.

#### **Voters and Voting Rights Advocates Successfully Challenged Hancock County's Illegal Purge of 53 Voters, Mostly Black, from the Voter Rolls**

***Georgia State Conference of NAACP v. Hancock Cty. Bd. of Elections & Registration, No. 5:15-CV-00414 (CAR) (M.D. Ga. 2015):*** Plaintiffs filed this action on November 3, 2015 in the U.S. District Court for the Middle District of Georgia, challenging the removal of 53 voters, who were almost all African Americans, from the voter rolls of a small, predominately Black county prior to a hotly contested election in Sparta in which white candidates successfully ran for seats on the City Council for the first time in decades. The case was brought under Section 2 of the VRA and Section 8 of the NVRA. The district court directed Defendants to restore qualified purged voters to the registration rolls or show cause why they would not do so. As a result, 17 voters were restored to the rolls; two others would have been restored, but had died in the interim; and eight voters were placed into inactive status, but remained

eligible to vote by producing proof of their residency when requesting a ballot. The parties subsequently mediated the case, which resulted in a settlement in which the Defendants agreed to comply with the NVRA before removing anyone from the voter rolls and to be subject to monitoring by a court appointed examiner. On March 30, 2018, the Court granted the parties' Joint Motion for Entry of Consent Decree and awarded Plaintiffs' fees and expenses. Compliance with the Consent Decree is being actively monitored by the Court appointed examiner.

**Vote Dilution Lawsuit Challenged the Districting Plans for the Gwinnett County Board of County Commissioners and School Board**

*Ga. State Conference of the NAACP v. Gwinnett Cty. Bd. of Registrations & Elections, No: 1:16-cv-02852 (N.D. Ga. 2016)*: Plaintiffs filed a vote dilution suit under Section 2 of the VRA challenging the districting plans for the County Board of Commissioners and Board of Education. At the time the lawsuit was filed, no African American, Latino or Asian American candidates had ever won election to these boards, despite the fact that Gwinnett County is considered to be one of the most racially diverse counties in the Southeastern United States. After two long-term incumbents chose not to run for re-election to the School Board in the 2018 mid-term election, and with the minority population of the county continuing to grow, African American and Asian American candidates were finally elected to the County Commission and an African American candidate was elected to the School Board for the first time in the county's history. Following these electoral successes, the parties agreed to a voluntary dismissal of the litigation.

**Voters and Voting Rights Advocates Successfully Challenged Sumter County's Reduction of Board  
of Education and Creation of At-Large  
Seats Diluting Strength of Black Voters**

*Wright v. Sumter Cty. Bd. of Elections & Registration*, 301 F. Supp. 3d 1297 (M.D. Ga. 2018): Sumter County adopted a districting plan for the Board of Education that switched from 9 single-member districts to a total of seven districts, five of which are single-member and two are at-large. This case presents the precise factual scenario that advocates worried about after *Shelby County*: that local jurisdictions would move from district-based elections where minority voters have an opportunity to elect their preferred candidates, to an arrangement where some or all seats are chosen by the jurisdiction as a whole, which is majority white. Black residents comprise about 48 percent of the voting age population in Sumter County, but are packed into two of the five single-member districts. As a result, they can elect representatives of their choice for only two of the seven seats. In March 2018, the District Court ruled that the current at-large method of voting for the county's public education school board members disproportionately favored the white majority candidates over the black minority preferred candidates. The court ordered Sumter County to re-draw the district lines to give African Americans the ability to elect candidates of their choice to the Board of Education.

**Voters and Voting Rights Advocates Challenged Crisp County's At-Large Voting System that  
Diluted the Voting Strength of Black Voters**

*Whitest v. Crisp Cty. Bd. of Education*, No. 1:17-cv-00109 (M.D. Ga. filed June 14, 2017): In July 2017, advocates brought a Section 2 challenge in the Middle District of Georgia to the at-large method of electing members to the Board of Education in Crisp County, Georgia. No Black candidate has ever won a contested seat on the board, and a data analysis on election history has shown voting to be statistically racially polarized. The case is still pending.

**Voters and Voting Rights Advocates Successfully Challenged a Georgia Law Restricting Rights of  
Limited English Proficient Voters to  
Obtain Assistance at the Polls**

*Kwon v. Crittenden*, 1:18-cv-05405-TCB (N.D.Ga. 2018): In 2018, advocates successfully challenged Section 21-2-409 of the Georgia Code under Section 208 of the Voting Rights Act. The Georgia law restricted the rights of limited English proficient (LEP) voters to obtain the assistance of interpreters or assisters of their choice. The statute limited an LEP voter, in non-federal elections, to the assistance of only either (1) a voter in the same precinct, or (2) one of certain statutorily-prescribed family members. The statute also provided that no person was allowed to assist more than 10 voters and that no candidate or family member of a candidate in any particular election could offer assistance to a voter in that election who is not a family member. After obtaining a preliminary injunction enjoining enforcement of the law, the Georgia General Assembly amended the law in 2019 to conform to the federal law.

**Voters and Voting Rights Advocates File Suit Challenging  
Systemic Voter Suppression in Georgia**

***Ebenezer Baptist Church of Atlanta, Georgia, Inc. v. Raffensperger, 1:18-cv-05391-SCJ:*** Fair Fight Georgia, Inc., Care in Action and several Black Churches filed suit challenging systemic voter suppression in Georgia under Section 2 of the Voting Rights Act and the Constitution. In May 2019 the District Court granted in part and denied in part Defendants' motion to dismiss. The case remains pending.

**Voters Challenge the Failure of the Georgia General Assembly to Draw a Congressional District in  
Central and Southeast Georgia to Provide African Americans an Equal Opportunity to Elect  
Candidates of their Choice**

***Dwight v. Kemp, 1:18-cv-02869-JPB (N.D. Ga. 2018):*** This is a vote dilution lawsuit that was filed on June 13, 2018 by six African American Georgia voters under Section 2 of the VRA. The lawsuit challenges the Georgia General Assembly's failure to draw a congressional district in central and southeast Georgia, where the 12th Congressional District (CD 12) is currently located, that would provide African Americans in that region an equal opportunity elect their preferred candidates. On May 1, 2019, the Plaintiffs filed a motion for summary judgment and that motion is currently pending in the District Court.

**Voting Rights Advocates Fight Precinct Closures and Efforts to Reduce Voting Hours in the Wake  
of *Shelby County***

Pre-litigation advocacy has been ongoing in a number of Georgia jurisdictions which have proposed the closure and relocation of polling places and have made efforts to reduce or curtail early voting and poll hours, which in many instances adversely impact voters of color. These include:

1) Macon-Bibb County, where in January 2015, the majority white Macon-Bibb Board of Elections and Registration proposed a plan to close or consolidate 14 of the county's 40 voting precincts as an alleged cost-savings device. Many of the proposed closures were in majority-Black precincts. In the wake of strong opposition to the plan by voters and voting rights advocates, the Board scaled back the plan by consolidating 7 of the 40 voting precincts and including a majority-White precinct as among the consolidated precincts.

2) Hancock County, where in May 2014, the Hancock County Board of Elections and Registration announced that it was planning to close all precincts except a single precinct located in downtown Sparta. The plan presented a travel burden for voters living in the majority African American precincts in a mostly poor and rural County, particularly since the County does not have a robust public transportation system. The Board abandoned the plan following public outcry and threats of potential litigation by advocates.

3) In September 2018, advocates, working with local groups, were able to reverse a decision by the Randolph County Board of Elections to close 7 out of 9 polling places, several of which were in predominantly African American precincts. However, it appears that the Board of Elections may be planning to again consider polling place closures and consolidations in 2019, notwithstanding overwhelming objection by the county's voters, local and national advocates.

4) In 2018, the City of Fairburn, Georgia proposed closing 2 of its 3 polling locations, despite the fact this proposal would have increased the number of minority voters in the single remaining polling location to almost 8,000 and after the city had previously increased the number of polling locations from 1 to 3 because of complaints by voters about long lines and delays at the polls. Advocates submitted written objections and in the face of strong opposition by voters, the proposal did not pass.

5) During 2017-2018, Fulton County, Georgia proposed numerous precinct consolidations and polling location changes. Advocates and voters objected to many of these changes. The County has often claimed that it needs to close or consolidate poll locations to save money because of alleged low turn-out since 2008 and 2012 - which were high watermarks for voter turnout in many of Georgia's minority communities because Barak Obama was on the ticket. In some cases, the alleged low turnout in the majority-minority precincts was on par with or above turnout at other polling locations that were not being proposed for closure or consolidation. Rapid response advocacy efforts were successful in convincing the Fulton County Board of Elections to back down from some, but not all, of the closures, consolidations and relocations.

6) During 2017-2018, the Morgan County elections board proposed closing 2 of the 7 voting precincts/polling places after having previously reduced the number from 11 to 7 in 2012. The county Board of Elections initially took the position that it was not required to allow public comment on the proposal or conduct this change via an open meeting. Ultimately, the proposal failed to pass after objections were interposed by advocates and voters.

7) In 2017, the Fayette County Board of Elections proposed reducing its 36 voting precincts to 19. The proposal would have negatively impacted many minority voters and would have increased the number of voters in the remaining precincts by 45%. After advocates submitted written objections and voters turned out at the Election Board meeting to voice their objections, the Board tabled the proposal. This is the same county which was the subject of a successful vote dilution lawsuit brought under Section 2 of the Voting Rights Act by the NAACP Legal Defense Fund involving the County Commission and School Board.

8) In 2013, advocates persuaded election officials in Baker County, Georgia to keep open all five of its polling places (rather than close four of them) in that impoverished, rural community.

9) In 2018, voting rights advocates fought against efforts to reduce Sunday voting in Fulton County and the hours to vote in Atlanta.

#### **Kansas**

##### **Kansas' Documentary Proof-of-Citizenship Requirement for Voter Registration Struck Down as Violative of the Constitution and the National Voter Registration Act**

*Fish v. Kobach, 309 F.Supp. 3d 1048 (D.Kan. 2018)*: After Kansas' then Secretary of State, Kris Kobach, refused to fully process thousands of voter registration applications without documentary proof-of-citizenship, voter registration applicants impacted by the policy sued Kobach, contending that the state's documentary proof of citizenship requirement violated Section 5 of the NVRA and violated the Fourteenth Amendment of the United States Constitution. In June 2018 the District Court struck down

Kansas' proof-of-citizenship law, finding that it violated the NVRA and the Equal Protection Clause of the Fourteenth Amendment.<sup>59</sup>

**Voters Were Forced to File Suit Challenging the Relocation of Dodge City, Kansas' Sole Polling Place out of the City to Disadvantage Minority Voters**

*Rangel-Lopez v. Cox*, 344 F. Supp. 3d 1285, 1287 (D. Kan. 2018): Voters filed suit alleging claims under Section 2 of the VRA and the Constitution challenging the decision to move the sole polling place in Dodge City, Kansas, one of the few majority-minority cities in the state, from a centrally located facility to a location outside of the city. While the court declined to grant plaintiffs' motion for emergency relief to reopen the polling place within the city for the 2018 general election, the county clerk later agreed to open two new voting sites within the city for future elections and the plaintiffs voluntarily dismissed the lawsuit.

**Louisiana**

**Voters and Voting Rights Advocates Successfully Challenged Louisiana's At-Large Method of Electing Judges That Diluted Voting Rights of Black Voters**

*Terrebonne Par. Branch NAACP v. Jindal*, 274 F. Supp. 3d 395 (M.D. La. 2017), *appeal dismissed sub nom. Fusilier v. Edwards*, No. 17-30756, 2017 WL 8236034 (5th Cir. Nov. 14, 2017), and *reconsideration denied*, No. CV 14-69-SDD-EWD, 2018 WL 5786215 (M.D. La. Nov. 5, 2018): Voters and advocates filed suit under Section 2 of the VRA and the U.S. Constitution challenging Louisiana's at-large method of electing judges. Plaintiffs contended the system maintained a racially segregated state court ("32nd JDC") which had jurisdiction over Terrebonne Parish. A Black candidate had never won election to this court in a contested election. Meanwhile, a judge on the court was suspended for wearing blackface, an orange prison jumpsuit, handcuffs, and an afro wig to a Halloween party as part of his offensive parody of a Black prison inmate. In August 2017, following a trial on the merits, the court ruled that the at-large electoral scheme deprived Black voters an equal opportunity to elect candidates of their choice in violation of Section 2 of the VRA and that the scheme had been maintained for that purpose in violation of the Fourteenth and Fifteenth Amendments to the United States Constitution. The Defendant's appeal to the Fifth Circuit was dismissed. On June 3, 2019, the assigned Magistrate Judge issued a report making recommendations for remedial relief. The case remains pending.

---

<sup>59</sup> Kansas voters also filed a state court challenge to a two-tier voter registration system adopted by Kobach which purported to limit persons using the federal voter registration form to voting in federal elections, but not in state or local elections. See *Belenky v. Kobach*, Case No. 2013CV1331 (District Court of Shawnee County, KS 2013).

**Voting Rights Advocates Commence Litigation to Challenge the Constitutionality of Louisiana's Disenfranchisement of Probationers and Parolees**

***VOTE v. Louisiana, No: 2017-CA-1141 (1st Cir. La. App. Ct. Apr. 13, 2018):*** Voting advocates filed suit in state court challenging the constitutionality of a Louisiana law that disenfranchises more than 71,000 probationers and parolees who are not incarcerated, but are nevertheless prohibited from voting. Plaintiffs contend that the law violates Louisiana's Constitutional Right to Vote provision, which denies the franchise to those under an "order of imprisonment for a felony conviction." In March 2017, the trial court granted summary judgment to the State and this decision was upheld by the Court of Appeals. On October 30, 2018, the Louisiana Supreme Court, over a powerful dissent by Louisiana Supreme Court Chief Justice Bernette Johnson, denied review.

**African American Voters in Baton Rouge Challenged the Method of Electing Judges to the Baton Rouge City Court under Section 2 of the Voting Rights Act**

***Hall v. State of Louisiana, 3:12-cv-00657-BAJ-RLB (M.D.La. 2012):*** This action was brought by African-American voters in Baton Rouge, Louisiana, to challenge the method of election for judges to the Baton Rouge City Court. Plaintiffs claimed that the election system violates Section 2 of the VRA because it dilutes African-American voting strength in the city. Since 1993, the City Court's five judges had been elected from two separate districts, called Election Sections. Section 1 was majority black in population and elects two judges, while Section 2 is majority white and elects three judges. Baton Rouge has experienced a change in the racial composition of its population since 1993, with African Americans now constituting a majority. Nonetheless, white voters continued to control the election of 60 percent of the judges in the context of racially polarized voting in judgeship elections and other local electoral factors. Efforts in the state legislature to modify the election system to reflect African Americans' current voting strength have failed.

Trial began in August 2014 and, after a recess of several months, concluded on November 19, 2014. Plaintiffs presented extensive evidence regarding the difficulties African-American voters face in winning judicial elections in the majority-white election section, including the ongoing pattern of polarized voting, Louisiana's long history of discrimination in voting and other spheres, and the substantial socioeconomic disparities between the city's African-American and white residents. Plaintiffs also presented evidence that an additional majority-Black district could be drawn to allow African Americans a fair opportunity to elect an additional candidate of their choice. On June 9, 2015, the District Court ruled in favor of Defendants. Before Plaintiffs had an opportunity to appeal, however, the Louisiana legislature passed a new judicial districting plan which met most of Plaintiffs' concerns, and Plaintiffs moved for an order that the Section 2 claims had been rendered moot and that the judgment in favor of defendants be vacated. The trial court agreed that the Section 2 claims were moot, but declined to vacate its judgment. On March 13, 2018, the Fifth Circuit Court of Appeals affirmed the District Court's decision not to vacate the judgment even though Plaintiffs' claims were rendered moot by the remedial legislation.

**African American Louisiana Voters Challenge the State's Congressional Districting Plan under Section 2 of the Voting Rights Act**

***Johnson v. Ardoin, Civil Action No. 18-625-SDD-EWD (M.D.La. 2018)***: This is a vote dilution action brought under Section 2 of the VRA by African American voters who allege that the Louisiana Legislature intentionally “packed” African-American voters into the Second Congressional District and diluted, or “cracked,” African-American voters among the other districts in the 2011 Congressional Plan when they could have created an additional majority-minority Congressional District. On May 31, 2019, the District Court denied Defendant’s motion to dismiss. The case remains pending.

**Massachusetts**

**Voters and Voting Rights Advocates Successfully Challenged the Lowell, Massachusetts At-Large Voting System that Dilutes the Strength of Latino and Asian American Voters**

***Huot v. City of Lowell, No: 1:17-cv-10895 (D. Mass. 2017)***: Plaintiffs filed suit on May 18, 2017 alleging the City of Lowell’s at-large municipal election system illegally diluted the vote of Latino and Asian American communities in violation of the VRA and Constitution. Although communities of color make up about half of Lowell’s population, its city council and school board have virtually never had minority representatives. The case was ultimately settled in 2019, with Defendants agreeing to change the election system to either a purely district-based system or a hybrid system with districts and at-large ranked choice voting. The city is currently planning a public process to receive community input and planning a comprehensive public education and outreach campaign.

**Michigan**

**Department of Justice Challenges the At-Large Method of Electing Members to the Eastpoint, Michigan City Council**

***United States v. City of Eastpointe, 4:17-cv-10079 (E.D.Mich. 2017)***: In one of the very few voting rights enforcement actions taken by the Department of Justice in recent years, the DOJ filed suit against the City of Eastpoint, Michigan, challenging its at-large method of electing members of the city council. DOJ contended that the at-large method of election diluted the voting strength of African American voters in the city. On March 27, 2019, the District Court denied the Defendant’s motion for summary judgment. On June 4 2019, the parties reached a settlement in which the city will be one of the first cities in Michigan to implement ranked choice voting in city council elections.

**Mississippi**

**State Senate Candidate and Voters Commenced Litigation Challenging the Boundary Lines of Majority-Black Mississippi Senate District 22**

***Thomas v. Bryant, 919 F.3d 298 (5th Cir. 2019)***: On July 9, 2018, Black Mississippi voters filed a Section 2 of the VRA vote dilution lawsuit challenging the districting plan for Mississippi State Senate District 22. Plaintiffs contend that the plan dilutes the voting strength of Black voters and, combined with racially polarized voting, prevents them from electing candidates of their choice to the Senate District 22 seat. Plaintiffs prevailed at trial and Defendant has filed an appeal to the Fifth Circuit. Oral argument before the Fifth Circuit was held on June 11, 2019. The case remains pending.

**Voters and Voting Rights Advocates Challenge Mississippi's Requirement that Absentee Ballots and Applications Must Be Notarized**

*O'Neil v. Hosemann*, No: 3:18-cv-00815 (S.D. Miss. Nov. 27, 2018): On November 21, 2018, Plaintiffs filed a complaint challenging, on federal constitutional right to vote grounds, Mississippi's unique combination of requiring notarization of both the absentee ballot application and the ballot itself, together with a deadline of receipt of the ballot the day before election day. Plaintiffs also sought emergency relief to compel the counting of ballots post-marked by election day (November 27) in the senatorial run-off, where voters had only 9 days – including Thanksgiving weekend – to apply for, obtain, and cast their absentee ballots. The court denied relief on November 27, 2019 on grounds that it was too close to the election to order relief. The case is still pending.

**Mississippi's Felony Disenfranchisement Law is Challenged in Two Federal Lawsuits**

*Harness v. Hosemann*, Civil Action No. 3:17-cv-791-DPJ-FKB (S.D.Miss. 2017) and *Hopkins, et al. v. Hosemann*, Civil Action No. 3:18-cv-188-CWR-LRA (S.D.Miss. 2018): Plaintiffs who are disenfranchised by the Mississippi Constitution's felony disenfranchisement provisions filed suit to strike down the provisions. In *Hopkins*, the Plaintiffs are also challenging the process by which voting rights are restored for formerly convicted individuals. Plaintiffs contend that the disenfranchisement scheme was born from racism embedded in the 1890 Mississippi Constitution, which was created in the wake of Reconstruction, and continues to disproportionately deny the franchise to Black Mississippians. On June 28, 2018, the District Court consolidated the two cases. On February 13, 2019, the District Court granted the *Hopkins* Plaintiffs' motion to certify the case as a class action. The cases remain pending.

**Voters Challenge Mississippi's Majority Vote Scheme for the Election of the State's Governor and other State-wide Offices**

*McLemore v. Hosemann*, 3:19-cv-00383-DPJ-FKB (S.D.Miss. May 30, 2019): Four Mississippi Black voters filed suit challenging the state's majority vote requirement for electing the Governor and for other statewide offices. Plaintiffs contend the scheme has its basis in the racism that was at the heart of the post-Reconstruction adoption of the 1890 Mississippi Constitution and that it was intended to prevent African Americans from holding statewide elected offices. Since the enactment of the majority vote requirement in 1890, no African Americans have been elected to statewide offices, despite the fact that Mississippi has the highest percentage of African Americans of any state in the country. Plaintiffs have alleged claims under Section 2 of the Voting Rights Act and the Constitution. The case is currently pending in the United States District Court for the Southern District of Mississippi.

**Missouri**

**Successful Section 2 Challenge to the At-Large Method of Electing Board Members to the Ferguson-Florissant, Missouri School Board**

*Missouri State Conference of the National Association for the Advancement of Colored People v. Ferguson-Florissant School District, 894 F.3d 924 (8th Cir. 2018).* This is a vote dilution lawsuit filed under Section 2 of the Voting Rights Act to challenge the at-large method of election for members to the School Board for the Ferguson-Florissant School District. African Americans are 47 percent of the district's population, but had only been able to elect two candidates of their choice to the board because of the at-large scheme. Plaintiffs prevailed at trial; the Eighth Circuit denied the Defendant's appeal and the Supreme Court denied the Defendant's petition for *certiorari*.

**New York**

**Lawsuit Filed to Restore Voting Rights to New Yorkers Who Were Removed from Poll Books in Violation of Federal Law**

*Common Cause/New York v. Brehm, Case No. 1:17-cv-06770 (S.D.N.Y 2017):* Advocates filed suit to restore the voting rights of millions of New Yorkers ahead of the 2018 election. Plaintiffs alleged that certain eligible but "inactive" voters are improperly removed from poll books throughout New York State in violation of the National Voter Registration Act (NVRA). Plaintiffs contend that the removal of inactive voters from the poll books disproportionately impacts voters of color. The litigation is continuing.

**Vote Dilution Lawsuit Filed under Section 2 of the Voting Rights Act to Challenge the At-Large Method of Electing Members of the East Ramapo Central School District**

*National Association for the Advancement Of Colored People, Spring Valley Branch v. East Ramapo Central School District, Case No. 7:17-cv-08943 (S.D.N.Y. 2017):* This is a Section 2 vote dilution lawsuit filed in November 2017 by the Spring Valley Branch of the NAACP and seven Black and Latino voters. Plaintiffs challenge the at-large method of electing members to the Board of Education of the East Ramapo Central School District and contend that it dilutes the voting strength of Black and Latino voters in the District. As a by-product of the dilutive election scheme, Plaintiffs contend that White Board Members are not responsive to the needs of minority students and their parents in the district and have undertaken funding cuts and other actions which deprive minority students of an adequate education. The case is still pending.

**North Carolina**

**Challenge to Voter Suppression Legislation on the Heels of *Shelby* that  
Targeted Black Voters with almost Surgical Precision**

***North Carolina State Conference of NAACP v. McCrory*, 831 F.3d 204 (4th Cir. 2016):** In the immediate aftermath of the *Shelby* decision, North Carolina enacted omnibus voter suppression legislation which included a strict voter ID requirement that excluded the use of out-of-state and college IDs; eliminated same-day voter registration and pre-registration for 16 and 17 year olds; increased opportunities for voters' eligibility to be challenged at the polls; reduced early voting by an entire week; and required the rejection of out-of-precinct ballots. After Plaintiffs' challenge was rejected by the District Court following a trial on the merits, Plaintiffs appealed. The Fourth Circuit then struck down the law's voter ID requirement; cutbacks to early voting; elimination of same-day registration and pre-registration; and the provisions relating to out-of-precinct ballots. In its decision, the Fourth Circuit noted:

“After years of preclearance and expansion of voting access, by 2013 African American registration and turnout rates had finally reached near-parity with white registration and turnout rates. African Americans were poised to act as a major electoral force. But, on the day after the Supreme Court issued *Shelby County v. Holder*, — U.S. —, 133 S.Ct. 2612, 186 L.Ed.2d 651 (2013), eliminating preclearance obligations, a leader of the party that newly dominated the legislature (and the party that rarely enjoyed African American support) announced an intention to enact what he characterized as an “omnibus” election law. Before enacting that law, the legislature requested data on the use, by race, of a number of voting practices. Upon receipt of the race data, the General Assembly enacted legislation that restricted voting and registration in five different ways, all of which disproportionately affected African Americans.

“In response to claims that intentional racial discrimination animated its action, the State offered only meager justifications. Although the new provisions target African Americans with almost surgical precision, they constitute inapt remedies for the problems assertedly justifying them and, in fact, impose cures for problems that did not exist. Thus, the asserted justifications cannot and do not conceal the State’s true motivation. “In essence,” as in *League of United Latin American Citizens v. Perry* (LULAC), 548 U.S. 399, 440, 126 S.Ct. 2594, 165 L.Ed.2d 609 (2006), “the State took away [minority voters’] opportunity because [they] were about to exercise it.” As in LULAC, “[t]his bears the mark of intentional discrimination.” Id.

“Faced with this record, we can only conclude that the North Carolina General Assembly enacted the challenged provisions of the law with discriminatory intent. Accordingly, we reverse the judgment of the district court to the contrary and remand with instructions to enjoin the challenged provisions of the law.”

*Id.*, at 214–15 (emphasis added).

Despite the Fourth Circuit’s strongly worded decision and conclusion that the law was enacted with discriminatory intent, North Carolina asked the Supreme Court to stay the Fourth Circuit’s decision, claiming that the state did not have sufficient time to make changes before the November 2016 general election. The Supreme Court granted the State’s request for a stay. As a result, the law remained in effect

for the November 2016 general election until the Supreme Court eventually denied North Carolina's petition for *certiorari* on the merits in May 2017.

**Voters and Voting Rights Advocates Forced to Commence Litigation to Restore Illegally Purged North Carolina Minority Voters to the Registration Rolls ahead of the November 2016 General Election**

*North Carolina State Conference of the NAACP v. North Carolina State Board of Elections*, Case No. 1:16CV1274, 2016 WL 6581284 (M.D.N.C., 2016)(order granting preliminary relief); and *North Carolina State Conference of NAACP v. Bipartisan Board of Elections and Ethics Enforcement*, Case No. 1:16CV12742018, WL 3748172 (M.D.N.C. 2018)(order granting Plaintiffs' motion for summary judgment and permanent relief): Plaintiffs alleged that in the months and weeks immediately preceding the November 2016 general election, boards of elections in three North Carolina counties - Beaufort, Moore, and Cumberland - improperly canceled thousands of voter registrations of predominantly African American voters for changes of residency on the basis of single mailings returned as undeliverable. Specifically, Plaintiffs alleged that a handful of private individuals brought coordinated and targeted *en masse* challenges to voter registrations on change-of-residency grounds pursuant to North Carolina's voter challenge statute, N.C. Gen. Stat. § 163-85, *et seq.* and that this process violated Section 2 of the VRA, Section 8 of the NVRA and the Equal Protection Clause of the Fourteenth Amendment. The Court granted a preliminary injunction in favor of the Plaintiffs to restore impacted voters to the registration rolls ahead of the November 2016 general election and subsequently granted Plaintiffs' motion for summary judgment to permanently enjoin the practice.

**Voters and Advocates File a Successful Post-*Shelby* Racial Gerrymander Challenge to Redistricting Plans in Two North Carolina Congressional Districts**

*Cooper v. Harris*, 137 S.Ct. 1455 (2017): Filed in October 2013, this case challenged the redistricting of two North Carolina congressional districts as racial gerrymanders in violation of the Equal Protection Clause of the Fourteenth Amendment. After a bench trial, a three-judge panel of the United States District Court for the Middle District of North Carolina ruled in favor of the voters. In 2017, the Supreme Court held that deference to the District Court's findings, under a clearly erroneous standard of review, was warranted; finding that race was the predominant factor in drawing one district as majority-minority district was not clearly erroneous; the State lacked a strong basis in evidence for believing that it needed a majority-minority district in order to avoid liability under § 2 of the Voting Rights Act (VRA) for vote dilution; and finding that racial gerrymandering rather than political gerrymandering was predominant factor in drawing the other district as majority-minority district was not clearly erroneous.

**Section 2 Litigation Filed to Remedy Dilution of Voting Strength of Black Voters in Jones County, North Carolina Due to At-Large Method of Electing County Commissioners**

*Hall v. Jones Cty. Bd. of Commissioners*, No. 4:17-cv-00018 (E.D.N.C. Aug. 23, 2017): Plaintiffs challenged the at-large scheme of electing members to the Jones County, NC Board of Commissioners under Section 2 of the Voting Rights Act. Due to the at-large method of electing members to the Jones County Board of Commissioners, which diluted the voting strength of African American voters, no African American candidates had been elected to the Jones County Board of Commissioners since 1998. The parties eventually settled the matter with an agreement that the Board of Commissioners would implement a seven single-member district electoral plan, including two single-member districts in which African-American voters constitute a majority of the voting-age population.

**Voting Rights Advocates Forced to Commence Litigation Challenging a North Carolina Law Restructuring the Greensboro City Council which also Prohibited Voters from Changing the Restructuring Via Referendum**

*City of Greensboro v. Guilford County Board of Elections*, 251 F.Supp.3d 935 (M.D.N.C. 2017). In 2015, after the *Shelby* decision, North Carolina enacted a bill which restructured the Greensboro City Council and eliminated the ability of voters to change the restructuring via a referendum. Plaintiffs alleged the legislature's plan diluted the voting strength of African American voters and violated other traditional redistricting principles, including one person, one vote and not pairing incumbents against each other, and that the prohibition against restoring the previous plan via a referendum was unconstitutional. The Plaintiffs eventually prevailed on their claims that the prohibition against a referendum and the violation of one person, one vote violated the Constitution. Because the court found in favor of the Plaintiffs on these claims, the court did not reach the issue of whether the plan was a racial gerrymander.

**Voters and Voting Rights Advocates Bring Litigation Successfully Challenging North Carolina's Racially Gerrymandered State Legislative and Congressional Redistricting Plans**

*Dickson v Rucho*, No. 11 CVS 16896 (N.C.Super. July 08, 2013): This is a state court action challenging North Carolina's racially gerrymandered state legislative and congressional redistricting plans. The state courts upheld the plans. Plaintiffs sought review by the United States Supreme Court. In April 2015, the Supreme Court granted *certiorari* and remanded the case to the state Supreme Court in light of the Court's ruling in *Alabama Legislative Black Caucus v. Alabama*. On remand, in a 4-3 decision, the state Supreme Court affirmed its earlier opinion. On May 30, 2017, the United States Supreme Court again granted *certiorari* and reversed and remanded the case for further consideration in light of *Cooper v. Harris* and *North Carolina v. Covington*. On February 7, 2018, the day after the United States Supreme Court's ruling in *Covington* precluded the special master's new House districts in Wake and Mecklenburg counties from going into effect, Plaintiffs filed an emergency motion in this state court proceeding, seeking relief from the state constitutional violations in the Wake and Mecklenburg County state house districts. On February 12, 2018, the state court three-judge panel denied that motion but entered judgment in Plaintiffs' favor.

**Federal Court Determined that 28 North Carolina Legislative Districts were Unconstitutional Racial Gerrymanders in Violation of the Constitution**

*Covington v. North Carolina*, 316 F.R.D. 117 (M.D.N.C. 2016), *aff'd*, 137 S. Ct. 2211 (2017): Federal court litigation filed in 2015 challenged the racial gerrymandering of the state's legislative districts in 2011. On August 11, 2016, a three-judge panel unanimously found that 28 of the State's districts were racially gerrymandered and ordered all of those districts to be redrawn after the 2016 election. In another unanimous ruling on November 29, 2016, the three-judge panel ordered the General Assembly to redraw the racially gerrymandered house and senate districts, which was upheld by the Supreme Court. On October 26, 2017, the Court issued an order appointing a special master to assist in evaluating the districts and in developing an appropriate remedial plan. The special master submitted his proposed remedial plan on December 1, 2017, and the Court issued a unanimous Order incorporating his recommendations on January 19, 2018.

**North Dakota****Spirit Lake Tribe and Native American Voters Challenge  
North Dakota's Strict Voter ID Law**

***Brakebill v. Jaeger, Civil Action No. 18-1725 (D.N.D. 2018)***: Plaintiffs secured a preliminary injunction prohibiting enforcement of a strict voter ID law which negatively impacted Native American voters. However, after the District Court granted preliminary relief, the state appealed to the Eighth Circuit for an emergency stay of the court's order and the Supreme Court, in a split decision, declined to overturn the stay while the litigation of the case on the merits continues.

**Ohio****Sixth Circuit Reverses Trial Court Decision Finding that Modifications to the State's Early Voting Rules Violated the Fourteenth Amendment by Burdening the Right to Vote of African Americans**

***Ohio Democratic Party v. Husted, Case No. 16-3561 (6th Cir. 2015)***: In May of 2015, state and county political parties and three individual voters filed suit challenging modifications to state's early voting rules, contending that the changes violated the Equal Protection Clause of the Fourteenth Amendment. After the District Court found in favor of the Plaintiffs, enjoined enforcement of the statute and found it placed impermissible disparate burden on African-American voters, the Sixth Circuit reversed, concluding that the state's justifications for the changes outweighed the burden on African American voters and that the changes did not have a disparate impact.

**Tennessee****Advocates Filed Suit to Challenge a Tennessee Law Imposing Severe Restrictions on Voter Registration Activity with Criminal and Civil Penalties that was Enacted in the Wake of Successful Registration Drives in 2018 Targeting Minority and Underserved Communities**

***Tennessee State Conference of the N.A.A.C.P. v. Hargett, Case No. 3:19-cv-00365 (M.D.Tenn. 2019)*** and ***League of Women Voters of Tennessee v. Hargett, 3:19-cv-00385 (M.D.Tenn. 2019)***: Voting advocates filed two lawsuits in 2019 challenging the enactment of a Tennessee law which imposes severe restrictions on voter registration activity by community groups and third parties and includes criminal and civil penalties for failures to comply with the law. The law was enacted in the wake of successful large-scale voter registration initiatives in the state in 2018 which targeted minority and underserved communities. Defendants filed motions to dismiss in both cases which are currently pending.

**Texas**

**Voters, Voting Rights Advocates, and Congressional Representative Forced to Commence  
Litigation to Invalidate Racially Discriminatory Strict Texas Voter ID Law**

*Veasey v. Abbott*, 888 F.3d 792 (5th Cir. 2018): This is a Federal court action challenging the Texas voter ID law under Section 2 of the VRA and the U.S. Constitution. In October 2014, the district judge ruled in Plaintiffs' favor on all claims and blocked the law, holding that it violates Section 2 of the VRA, constitutes an unconstitutional burden on the right to vote, amounts to a poll tax, and was motivated in part by a racially discriminatory purpose. In August 2015, the Fifth Circuit Court of Appeals upheld the district court's ruling that the State's restrictive photo ID requirement violated Section 2 of the Voting Rights Act. The appeals court upheld the finding of discriminatory effect under Section 2, but remanded on the issue of discriminatory intent, asking the lower court to re-examine the evidence. In July 2016, the *en banc* court affirmed the district court's finding of discriminatory effect under Section 2, and remanded the case to the district court for further fact-finding on the discriminatory intent claim. On April 10, 2017, the Court issued a decision re-affirming its prior determination that SB 14 was passed, at least in part, with a discriminatory intent. On June 1, 2017, Texas passed SB5, which it claimed remedied the effects of SB 14. While SB 5 shares provisions in common with the court-ordered interim remedy, there are aspects of concern, including a harsh felony penalty (up to two years of imprisonment) for voters who inappropriately use the affidavit process for voting in-person without an acceptable photo ID. On August 23, 2017, the court granted declaratory relief, holding that SB 14 violates Section 2 of the VRA and the 14th and 15th Amendments to the U.S. Constitution. The court enjoined SB 14 and SB 5, finding that the new law "perpetuates SB 14's discriminatory features." On April 27, 2018, the Fifth Circuit issued its opinion "reversing and rendering" the district court's order for permanent injunction and further relief, finding that the district court had abused its discretion, and further finding that SB 5 constituted an effective remedy "for the only deficiencies in SB 14," and that there was no equitable basis for subjecting Texas to ongoing federal election scrutiny under Section 3(c) of the Voting Rights Act.

**Voters and Voting Rights Advocates File Suit to Remedy Dilution of Voting Strength of Latino  
Voters in Texas Due to At-Large Method of Electing Statewide Judges**

*Lopez v. Abbott*, 339 F. Supp. 3d 589 (S.D. Tex. 2018): In 2016, Plaintiffs challenged Texas' method of using at-large elections to elect judges to the two courts of last resort in the state, the Supreme Court of Texas and the Texas Court of Criminal Appeals. The lawsuit alleged that the statewide method of electing judges to these courts is discriminatory and denies Latinos an equal opportunity to elect candidates of their choice. In Texas, whites vote as a bloc resulting in the defeat of candidates supported by the Latino community. If the election process was changed from statewide to single districts, two districts could be created with a majority of CVAP of Latino voters, increasing the likelihood that Latino voters could overcome the bloc voting of White voters and have the chance to elect candidates of their choice to these courts. However, the court ultimately ruled for the Defendants, holding Plaintiffs could not show under the totality of the circumstances that the lack of electoral success by Latino-preferred candidates for high judicial office is on account of race rather than other factors, including partisanship.

**Voting Rights Advocates Successfully Challenged Texas' Illegal Flagging of Naturalized Citizens for Removal from Voter Rolls**

*Texas League of United Latino American Citizens v. Whitley*, No. 5:19-cv-00074 (W.D. Tex. February 27, 2019): In late January 2019, David Whitley, Texas' Secretary of State, sent Texas counties a list containing 95,000 registered voters and directing the counties to investigate their voting eligibility. The list was based on DMV data the state knew was flawed and would necessarily sweep in thousands of citizens who completed the naturalization process after lawfully applying for a Texas drivers' license. Naturalized citizens are entitled to full voting rights under Constitution. Voting rights advocates filed lawsuits challenging the purging of voters based upon this flawed process. The case was eventually settled after the U.S. District Court in Texas granted a motion for preliminary injunction, enjoining the removal of voters from the rolls based upon this flawed process.

**Voter and Voting Rights Advocates Successfully Challenge Law Restricting Language Assistance for Voters with Limited English Proficiency**

*OCA-Greater Houston v. Texas*, 867 F.3d 604 (5th Cir. 2017): Litigation was commenced on August 6, 2015, under Section 208 of the VRA challenging a provision of the Texas Election Code that requires interpreters to be registered to vote in the same county as the voter who needs assistance. This state requirement unduly restricts the range of individuals who are permitted to provide language assistance. The Court found, "In short, the State Defendants get the VRA wrong...the Texas Code Interpretation Provisions, restrict voter choice in a manner inconsistent with the Federal Voting Rights Act." The county defendants agreed to settle in light of the decision. In the settlement, the county agreed to revise the poll worker manual and to change the training procedure for interpreter requirements to be consistent with Section 208 of the VRA. The County will also maintain data of Section 208 violations that are reported to them. On August 16, 2017, the Fifth Circuit Court of Appeals affirmed the district court ruling that the Texas law, which requires interpreters to be registered voters, violates the VRA. The Fifth Circuit decision also affirmed the district court's finding that the plaintiff organization, OCA-Greater Houston, had satisfied its standing requirement.

**Voters, State and Federal Legislators, and Voting Rights Advocates Successfully Challenged Texas' Redistricting Plan That Diluted Strength of Latino Voters**

*Abbott v. Perez*, 138 S. Ct. 2305, 201 L. Ed. 2d 714 (2018): During the initial challenge to Texas' redistricting plan, Texas was denied Section 5 preclearance. Following the decision in *Shelby*, Plaintiffs again challenged Texas' maps that did not provide for a new Latino-majority congressional seat. The Court concluded that the congressional districting plans diluted Latino voting strength and were intentionally discriminatory against Latinos and African Americans. The case was tried a third time, focusing on Texas State House Districts, and the Plaintiffs prevailed again. Defendant appealed the District Court's rulings to the United States Supreme Court. On June 25, 2018, the Supreme Court reversed the District Court's rulings in Plaintiffs' favor with the exception of House District 90 in Fort Worth.

**Voters and Voting Rights Advocates Commence Litigation to Challenge a Waller County, Texas Early Voting Scheme That Did Not Provide a Polling Place for HBCU Prairie View A&M University Voters**

*Allen v. Waller Cty., Tex., No: 4:18-cv-03985 (S.D. Tex. filed Oct. 22, 2018)*: On October 22, 2018, advocates filed a federal lawsuit against election officials in Waller County, Texas, who refused to provide any early voting location on the campus of Prairie View A&M University (PVAMU), an historically Black university, during early voting for the 2018 general election. Plaintiffs contend the County has provided fewer early voting opportunities to PVAMU students who are one of the highest users of this opportunity as compared to other voters in Waller County. Waller County has moved to dismiss Plaintiffs' First Amended Complaint and that motion is currently pending.

**District Court in Texas Determines that Redistricting Plan for the City of Pasadena, Texas City Council that was Adopted in the Wake of the *Shelby* Decision Diluted the Voting Strength of Latino Voters and was Enacted with Discriminatory Intent**

*Patino v. City of Pasadena, Texas*, 230 F.Supp.3d 667 (S.D.Tex. 2017): Latino voters filed suit against the City of Pasadena, Texas alleging that city's change from an eight single-member district plan for electing city council members to a plan with six single-member districts and two at-large districts, in 2014 – after the *Shelby* decision, diluted Latino voting strength in violation of Section 2 of the VRA and Fourteenth and Fifteenth Amendments to the Constitution. Following a bench trial, the Court ruled in favor of the Plaintiffs on both their Section 2 and discriminatory intent claims and ordered the restoration of the eight single member district plan for the 2017 city council election. The District Court noted that this was one of the first lawsuits brought to remedy a discriminatory redistricting plan enacted in the wake of the *Shelby* decision. Defendant's request for a stay of the District Court's remedial order was denied by the District Court and Fifth Circuit.

**Utah**

**Lawsuit Filed Against San Juan County, Utah for the Failure to Provide Effective Language Assistance and In-Person Early Voting Sites for Navajo Nation Voters**

*Nation Human Rights Comm'n v. San Juan County*, 216CV00154JNPBCW, 2017 WL 3976564, at \*1 (D. Utah Sept. 7, 2017). San Juan County, Utah is home to a substantial Native American population. The County moved to all-mail balloting in 2014. Coupled with a lack of sufficient in-person early voting sites serving the Navajo Nation's voters, Plaintiffs argued that the county failed to provide effective language assistance to its Native American population. Following a period of intense and sometimes contentious litigation, the parties reached a settlement in which the county agreed to 1) provide in-person language assistance on the Navajo reservation for the 28 days prior to each election through the 2020 general election; 2) maintain three polling sites on the Navajo reservation for election day voting, including language assistance; and 3) to take additional action to ensure quality interpretation of election information and materials in the Navajo language.

Washington, D.C.

**Voting Advocates File Suit Challenging the Decision by the Election Assistance Commission's Executive Director, Brian Newby, to Include Proof of Citizenship Requirement on Federal Registration Form Instructions**

*League of Women Voters of United States v. Newby*, 838 F.3d 1 (D.C. Cir. 2016): In January 2016, EAC Executive Director Brian Newby, acting without input from the EAC Commissioners, issued notice to Alabama, Georgia, and Kansas that the federal registration form instructions would be amended to allow these states to require citizenship documents from applicants who use the federal registration form. Plaintiffs filed suit to enjoin Newby's action and the United States Court of Appeals for the District of Columbia Circuit preliminarily enjoined the EAC from changing the federal voter registration form after the District Court for the District of Columbia denied Plaintiffs' motion for a preliminary injunction. The parties have fully briefed cross-motions for summary judgment and the action remains pending.

Chairman BUTTERFIELD. At this time, the chair is pleased to recognize the Ranking Member of the Subcommittee, Mr. Steil.

Mr. STEIL. Thank you, Mr. Chairman.

And thank you to our panelists for being here this morning.

Mr. Hearne, in your testimony you stated that you served as an adviser on the Commission on Federal Election Reform, commonly known as the Carter-Baker Commission.

The commission made a total of 87 election reform recommendations to increase voter confidence in the election process following the 2000 Presidential election, and most notable was the commission's endorsement of a photo identification requirement to vote.

How many members served on the Carter-Baker Commission, Mr. Hearne?

Mr. Hearne?

The pros/cons of an electronic hybrid. I will answer the question. It is 21 commissioners—

Mr. HEARNE. [Inaudible.]

Mr. STEIL. Are you there, Mr. Hearne?

Mr. HEARNE. Yes, I am. Let me—I am here, yeah. Sorry, Member Steil.

Mr. STEIL. That is fine. There were 21 commissioners on the Carter-Baker Commission. It was bipartisan, Republicans and Democrats, correct?

Mr. HEARNE. That is correct. It included luminaries from this body like Lee Hamilton, Bob Michel, obviously President Carter and Secretary Baker.

Mr. STEIL. And how many members voted in support of the voter ID recommendation?

Mr. HEARNE. They all voted in support of it except for two members—Tom Daschle and Spencer Overton—who filed a supplemental statement in which they said they didn't support the use of the Federal Real ID as an identification.

Mr. STEIL. So in summary, Democrats and Republicans on that commission in 2000, looking to increase voter confidence in the election, voted in favor of photo ID.

Let me shift gears here slightly. I think one thing we can all agree on is that voting rights are important and that every single eligible person who wants to vote should have the opportunity to cast a ballot, and that every vote should be counted according to State law. And thankfully our country has come a long way since the 1960s.

And so I would like to dive into the preclearance, which is really an extreme legal remedy.

Mr. Holder, as you are aware, in 2013 the United States Supreme Court declared the preclearance coverage formula unconstitutional in *Shelby County* because the criteria used were outdated and, therefore, violated principles of equal State sovereignty and Federalism.

And so the preclearance formula in the Voting Rights Act was based on 1965 election information, which had low turnout rates, in particular among minority voters.

If a new preclearance formula was introduced, what would be your specific criteria to identify a covered jurisdiction?

Mr. HOLDER. Well, I think that what we would have to do is do what the Congress did back in 1965, which is to conduct hearings, as you are doing now, come up with ways in which you look at States that have—

Mr. STEIL. But you are uniquely knowledgeable, you sit on a board, you study this. What would be the specific criteria that you would recommend Congress look at to determine who would be covered?

Mr. HOLDER. Well, I would look at voter participation. I would look at the way in which lines were drawn when it comes to gerrymandering. And gerrymandering has an impact on this whole question of keeping people away from the polls.

If we look at the poll closures, 1,700 since Shelby County, 750 in Texas, 320 in Arizona—

Mr. STEIL. So I am going to reclaim my time. I am going to reclaim my time just because we are so tight on time here.

So I appreciate that.

Let me share my concern, is that I don't know how jurisdictions are going to know exactly whether or not they are in or out of this preclearance. And my concern is that every jurisdiction is going to find themselves under the role of the Federal Government, continuing to push towards a Federal Government takeover of our elections. That is my concern.

And Chief Justice Roberts noted that the Department of Justice is, quote, "famously opaque, and usually the States and municipalities have to go through or had to go through several layers of back and forth. It is sort of a bargaining process," end quote.

So, to me, my concern is that the Department of Justice is not going to be impartial. And in 2013, the Department of Justice Inspector General reviewed the DOJ hiring process and determined that eight of the nine new hires to the Voting Rights Section had one or more liberal affiliations, and two of them had an affiliation with the Democratic Party itself. Five of the hires had affiliation with five specific civil rights groups. Two of the groups are providing testimony today.

The IG also noted that none—none—of the ten candidates had conservative or Republican affiliations that were hired. And only 1 of 235 candidates with unknown affiliations was hired.

With the observations of the DOJ hiring practice focused on specific partisan ideological affiliations, I am concerned that States won't get a fair shake.

And Mr. Holder, I know that in your testimony you noted that you are not asking for favoritism towards any political party. But the group that you represent, the National Democratic Redistricting Committee, in their IRS filing stated that the purpose of the organization is to build a comprehensive plan to favorably position Democrats for the redistricting process through 2022.

Is that correct?

Mr. HOLDER. Yeah. To favorably place Democrats in a position to fight for fairness—

Mr. STEIL. So—

Mr. HOLDER [continuing]. To fight for fairness, and make sure that the process is indeed fair. We have to ensure that Democrats have the capacity to [inaudible]—

Mr. STEIL. Reclaiming my time, and noting that we are in the home stretch.

Mr. HOLDER [continuing].—With their Republican—

Mr. STEIL. Understood. Just I think it is important to note the purpose of the organization that you represent—and Mr. Chairman, I will wrap up by seeking unanimous consent to submit to the record Mr. Holder's organization's IRS filing with that purpose so stated.

Chairman BUTTERFIELD. Without objection, so ordered.

**Part II-A Complete if the organization is exempt under section 501(c)(3) and filed Form 5768 (election under section 501(h)).**

**A** Check  if the filing organization belongs to an affiliated group (and list in Part IV each affiliated group member's name, address, EIN, expenses, and share of excess lobbying expenditures)

**B** Check  if the filing organization checked box A and "implied control" provisions apply

<b>Limits on Lobbying Expenditures</b> (The term "expenditures" means amounts paid or incurred.)	(a) Filing organization's totals	(b) Affiliated group totals
<b>1a</b> Total lobbying expenditures to influence public opinion (grass roots lobbying)		
<b>b</b> Total lobbying expenditures to influence a legislative body (direct lobbying)		
<b>c</b> Total lobbying expenditures (add lines 1a and 1b)		
<b>d</b> Other exempt purpose expenditures		
<b>e</b> Total exempt purpose expenditures (add lines 1c and 1d)		
<b>f</b> Lobbying nontaxable amount. Enter the amount from the following table in both columns		
<b>If the amount on line 1e, column (a) or (b) is:</b> <b>The lobbying nontaxable amount is:</b>		
Not over \$500,000	20% of the amount on line 1e	
Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000	
Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000	
Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000	
Over \$17,000,000	\$1,000,000	
<b>g</b> Grassroots nontaxable amount (enter 25% of line 1f)		
<b>h</b> Subtract line 1g from line 1a. If zero or less, enter -0-		
<b>i</b> Subtract line 1f from line 1c. If zero or less, enter -0-		
<b>j</b> If there is an amount other than zero on either line 1h or line 1i, did the organization file Form 4720 reporting section 4911 tax for this year?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

**4-Year Averaging Period Under section 501(h)**  
**(Some organizations that made a section 501(h) election do not have to complete all of the five columns below. See the separate instructions for lines 2a through 2f.)**

<b>Lobbying Expenditures During 4-Year Averaging Period</b>					
Calendar year (or fiscal year beginning in)	(a) 2013	(b) 2014	(c) 2015	(d) 2016	(e) Total
<b>2a</b> Lobbying nontaxable amount					
<b>b</b> Lobbying ceiling amount (150% of line 2a, column(e))					
<b>c</b> Total lobbying expenditures					
<b>d</b> Grassroots nontaxable amount					
<b>e</b> Grassroots ceiling amount (150% of line 2d, column (e))					
<b>f</b> Grassroots lobbying expenditures					

**Part II-B Complete if the organization is exempt under section 501(c)(3) and has NOT filed Form 5768 (election under section 501(h)).**

For each "Yes" response on lines 1a through 1i below, provide in Part IV a detailed description of the lobbying activity

	(a)		(b)	
	Yes	No	Amount	
1 During the year, did the filing organization attempt to influence foreign, national, state or local legislation, including any attempt to influence public opinion on a legislative matter or referendum, through the use of				
a Volunteers?				
b Paid staff or management (include compensation in expenses reported on lines 1c through 1i)?				
c Media advertisements?				
d Mailings to members, legislators, or the public?				
e Publications, or published or broadcast statements?				
f Grants to other organizations for lobbying purposes?				
g Direct contact with legislators, their staffs, government officials, or a legislative body?				
h Rallies, demonstrations, seminars, conventions, speeches, lectures, or any similar means?				
i Other activities?				
j Total Add lines 1c through 1i				
2a Did the activities in line 1 cause the organization to be not described in section 501(c)(3)?				
b If "Yes," enter the amount of any tax incurred under section 4912				
c If "Yes," enter the amount of any tax incurred by organization managers under section 4912				
d If the filing organization incurred a section 4912 tax, did it file Form 4720 for this year?				

**Part III-A Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6).**

	Yes	No
1 Were substantially all (90% or more) dues received nondeductible by members?	1	
2 Did the organization make only in-house lobbying expenditures of \$2,000 or less?	2	
3 Did the organization agree to carry over lobbying and political expenditures from the prior year?	3	

**Part III-B Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6) and if either (a) BOTH Part III-A, lines 1 and 2, are answered "No" OR (b) Part III-A, line 3, is answered "Yes."**

1 Dues, assessments and similar amounts from members	1	
2 Section 162(e) nondeductible lobbying and political expenditures (do not include amounts of political expenses for which the section 527(f) tax was paid).	2a	
a Current year	2b	
b Carryover from last year	2c	
c Total	3	
3 Aggregate amount reported in section 6033(e)(1)(A) notices of nondeductible section 162(e) dues		
4 If notices were sent and the amount on line 2c exceeds the amount on line 3, what portion of the excess does the organization agree to carryover to the reasonable estimate of nondeductible lobbying and political expenditure next year?	4	
5 Taxable amount of lobbying and political expenditures (see instructions)	5	

**Part IV Supplemental Information**

Provide the descriptions required for Part I-A, line 1, Part I-B, line 4, Part I-C, line 5, Part II-A (affiliated group list), Part II-A, lines 1 and 2 (see instructions), and Part II-B, line 1. Also, complete this part for any additional information.

<b>7</b> Did the organization receive or hold a conservation easement, including easements to preserve open space, the environment, historic land areas, or historic structures? If "Yes," complete Schedule D, Part II . . . . .	<b>7</b>	No
<b>8</b> Did the organization maintain collections of works of art, historical treasures, or other similar assets? If "Yes," complete Schedule D, Part III . . . . .	<b>8</b>	No
<b>9</b> Did the organization report an amount in Part X, line 21 for escrow or custodial account liability, serve as a custodian for amounts not listed in Part X, or provide credit counseling, debt management, credit repair, or debt negotiation services? If "Yes," complete Schedule D, Part IV . . . . .	<b>9</b>	No
<b>10</b> Did the organization, directly or through a related organization, hold assets in temporarily restricted endowments, permanent endowments, or quasi-endowments? If "Yes," complete Schedule D, Part V . . . . .	<b>10</b>	No
<b>11</b> If the organization's answer to any of the following questions is "Yes," then complete Schedule D, Parts VI, VII, VIII, IX, or X as applicable <b>a</b> Did the organization report an amount for land, buildings, and equipment in Part X, line 10? If "Yes," complete Schedule D, Part VI . . . . .	<b>11a</b>	No
<b>b</b> Did the organization report an amount for investments—other securities in Part X, line 12 that is 5% or more of its total assets reported in Part X, line 16? If "Yes," complete Schedule D, Part VII . . . . .	<b>11b</b>	No
<b>c</b> Did the organization report an amount for investments—program related in Part X, line 13 that is 5% or more of its total assets reported in Part X, line 16? If "Yes," complete Schedule D, Part VIII . . . . .	<b>11c</b>	No
<b>d</b> Did the organization report an amount for other assets in Part X, line 15 that is 5% or more of its total assets reported in Part X, line 16? If "Yes," complete Schedule D, Part IX . . . . .	<b>11d</b>	No
<b>e</b> Did the organization report an amount for other liabilities in Part X, line 25? If "Yes," complete Schedule D, Part X . . . . .	<b>11e</b>	No
<b>f</b> Did the organization's separate or consolidated financial statements for the tax year include a footnote that addresses the organization's liability for uncertain tax positions under FIN 48 (ASC 740)? If "Yes," complete Schedule D, Part X . . . . .	<b>11f</b>	No
<b>12a</b> Did the organization obtain separate, independent audited financial statements for the tax year? If "Yes," complete Schedule D, Parts XI and XII . . . . .	<b>12a</b>	No
<b>b</b> Was the organization included in consolidated, independent audited financial statements for the tax year? If "Yes," and if the organization answered "No" to line 12a, then completing Schedule D, Parts XI and XII is optional . . . . .	<b>12b</b>	No
<b>13</b> Is the organization a school described in section 170(b)(1)(A)(ii)? If "Yes," complete Schedule E . . . . .	<b>13</b>	No
<b>14a</b> Did the organization maintain an office, employees, or agents outside of the United States? . . . . .	<b>14a</b>	No
<b>b</b> Did the organization have aggregate revenues or expenses of more than \$10,000 from grantmaking, fundraising, business, investment, and program service activities outside the United States, or aggregate foreign investments valued at \$100,000 or more? If "Yes," complete Schedule F, Parts I and IV . . . . .	<b>14b</b>	No
<b>15</b> Did the organization report on Part IX, column (A), line 3, more than \$5,000 of grants or other assistance to or for any foreign organization? If "Yes," complete Schedule F, Parts II and IV . . . . .	<b>15</b>	No
<b>16</b> Did the organization report on Part IX, column (A), line 3, more than \$5,000 of aggregate grants or other assistance to or for foreign individuals? If "Yes," complete Schedule F, Parts III and IV . . . . .	<b>16</b>	No
<b>17</b> Did the organization report a total of more than \$15,000 of expenses for professional fundraising services on Part IX, column (A), lines 6 and 11? If "Yes," complete Schedule G, Part I (see instructions) . . . . .	<b>17</b>	No
<b>18</b> Did the organization report more than \$15,000 total of fundraising event gross income and contributions on Part VIII, lines 1c and 8a? If "Yes," complete Schedule G, Part II . . . . .	<b>18</b>	No
<b>19</b> Did the organization report more than \$15,000 of gross income from gaming activities on Part VIII, line 9a? If "Yes," complete Schedule G, Part III . . . . .	<b>19</b>	No

**Part IV Checklist of Required Schedules (continued)**

	Yes	No
20a Did the organization operate one or more hospital facilities? If "Yes," complete Schedule H . . . . .	20a	No
b If "Yes" to line 20a, did the organization attach a copy of its audited financial statements to this return?	20b	
21 Did the organization report more than \$5,000 of grants or other assistance to any domestic organization or domestic government on Part IX, column (A), line 1? If "Yes," complete Schedule I, Parts I and II . . . . .	21	Yes
22 Did the organization report more than \$5,000 of grants or other assistance to or for domestic individuals on Part IX, column (A), line 2? If "Yes," complete Schedule I, Parts I and III . . . . .	22	No
23 Did the organization answer "Yes" to Part VII, Section A, line 3, 4, or 5 about compensation of the organization's current and former officers, directors, trustees, key employees, and highest compensated employees? If "Yes," complete Schedule J . . . . .	23	No
24a Did the organization have a tax-exempt bond issue with an outstanding principal amount of more than \$100,000 as of the last day of the year, that was issued after December 31, 2002? If "Yes," answer lines 24b through 24d and complete Schedule K If "No," go to line 25a . . . . .	24a	No
b Did the organization invest any proceeds of tax-exempt bonds beyond a temporary period exception? . . . . .	24b	
c Did the organization maintain an escrow account other than a refunding escrow at any time during the year to defease any tax-exempt bonds? . . . . .	24c	
d Did the organization act as an "on behalf of" issuer for bonds outstanding at any time during the year? . . . . .	24d	
25a <b>Section 501(c)(3), 501(c)(4), and 501(c)(29) organizations.</b> Did the organization engage in an excess benefit transaction with a disqualified person during the year? If "Yes," complete Schedule L, Part I . . . . .	25a	
b Is the organization aware that it engaged in an excess benefit transaction with a disqualified person in a prior year, and that the transaction has not been reported on any of the organization's prior Forms 990 or 990-EZ? If "Yes," complete Schedule L, Part I . . . . .	25b	
26 Did the organization report any amount on Part X, line 5, 6, or 22 for receivables from or payables to any current or former officers, directors, trustees, key employees, highest compensated employees, or disqualified persons? If "Yes," complete Schedule L, Part II . . . . .	26	No
27 Did the organization provide a grant or other assistance to an officer, director, trustee, key employee, substantial contributor or employee thereof, a grant selection committee member, or to a 35% controlled entity or family member of any of these persons? If "Yes," complete Schedule L, Part III . . . . .	27	No
28 Was the organization a party to a business transaction with one of the following parties (see Schedule L, Part IV instructions for applicable filing thresholds, conditions, and exceptions)?		
a A current or former officer, director, trustee, or key employee? If "Yes," complete Schedule L, Part IV . . . . .	28a	No
b A family member of a current or former officer, director, trustee, or key employee? If "Yes," complete Schedule L, Part IV . . . . .	28b	No
c An entity of which a current or former officer, director, trustee, or key employee (or a family member thereof) was an officer, director, trustee, or direct or indirect owner? If "Yes," complete Schedule L, Part IV . . . . .	28c	No
29 Did the organization receive more than \$25,000 in non-cash contributions? If "Yes," complete Schedule M . . . . .	29	No
30 Did the organization receive contributions of art, historical treasures, or other similar assets, or qualified conservation contributions? If "Yes," complete Schedule M . . . . .	30	No
31 Did the organization liquidate, terminate, or dissolve and cease operations? If "Yes," complete Schedule N, Part I . . . . .	31	No
32 Did the organization sell, exchange, dispose of, or transfer more than 25% of its net assets? If "Yes," complete Schedule N, Part II . . . . .	32	No
33 Did the organization own 100% of an entity disregarded as separate from the organization under Regulations sections 301.7701-2 and 301.7701-3? If "Yes," complete Schedule R, Part I . . . . .	33	No
34 Was the organization related to any tax-exempt or taxable entity? If "Yes," complete Schedule R, Part II, III, or IV, and Part V, line 1 . . . . .	34	No
35a Did the organization have a controlled entity within the meaning of section 512(b)(13)? b If "Yes" to line 35a, did the organization receive any payment from or engage in any transaction with a controlled entity within the meaning of section 512(b)(13)? If "Yes," complete Schedule R, Part V, line 2 . . . . .	35a	No
36 <b>Section 501(c)(3) organizations.</b> Did the organization make any transfers to an exempt non-charitable related organization? If "Yes," complete Schedule R, Part V, line 2 . . . . .	35b	
37 Did the organization conduct more than 5% of its activities through an entity that is not a related organization and that is treated as a partnership for federal income tax purposes? If "Yes," complete Schedule R, Part VI . . . . .	36	
38 Did the organization complete Schedule O and provide explanations in Schedule O for Part VI, lines 11b and 19? <b>Note:</b> All Form 990 filers are required to complete Schedule O . . . . .	37	No
	38	Yes

<b>Part V Statements Regarding Other IRS Filings and Tax Compliance</b>		<i>Check if Schedule O contains a response or note to any line in this Part V . . . . .</i> <input type="checkbox"/>
		<b>Yes</b> <b>No</b>
<b>1a</b>	Enter the number reported in Box 3 of Form 1096 Enter -0- if not applicable . . .	<b>1a</b> <input type="text"/> 1

**Part VI Governance, Management, and Disclosure** For each "Yes" response to lines 2 through 7b below, and for a "No" response to lines 8a, 8b, or 10b below, describe the circumstances, processes, or changes in Schedule O. See instructions  
 Check if Schedule O contains a response or note to any line in this Part VI . . . . .

**Section A. Governing Body and Management**

	Yes	No
1a Enter the number of voting members of the governing body at the end of the tax year	1a	6
If there are material differences in voting rights among members of the governing body, or if the governing body delegated broad authority to an executive committee or similar committee, explain in Schedule O		
1b Enter the number of voting members included in line 1a, above, who are independent	1b	6
2 Did any officer, director, trustee, or key employee have a family relationship or a business relationship with any other officer, director, trustee, or key employee? . . . . .	2	No
3 Did the organization delegate control over management duties customarily performed by or under the direct supervision of officers, directors or trustees, or key employees to a management company or other person? . . . . .	3	Yes
4 Did the organization make any significant changes to its governing documents since the prior Form 990 was filed? . . . . .	4	No
5 Did the organization become aware during the year of a significant diversion of the organization's assets? . . . . .	5	No
6 Did the organization have members or stockholders? . . . . .	6	No
7a Did the organization have members, stockholders, or other persons who had the power to elect or appoint one or more members of the governing body? . . . . .	7a	No
b Are any governance decisions of the organization reserved to (or subject to approval by) members, stockholders, or persons other than the governing body? . . . . .	7b	No
8 Did the organization contemporaneously document the meetings held or written actions undertaken during the year by the following		
a The governing body? . . . . .	8a	Yes
b Each committee with authority to act on behalf of the governing body? . . . . .	8b	No
9 Is there any officer, director, trustee, or key employee listed in Part VII, Section A, who cannot be reached at the organization's mailing address? If "Yes," provide the names and addresses in Schedule O? . . . . .	9	No

**Section B. Policies** (This Section B requests information about policies not required by the Internal Revenue Code.)

	Yes	No
10a Did the organization have local chapters, branches, or affiliates? . . . . .	10a	No
b If "Yes," did the organization have written policies and procedures governing the activities of such chapters, affiliates, and branches to ensure their operations are consistent with the organization's exempt purposes?		
11a Has the organization provided a complete copy of this Form 990 to all members of its governing body before filing the form? . . . . .	11a	No
b Describe in Schedule O the process, if any, used by the organization to review this Form 990		
12a Did the organization have a written conflict of interest policy? If "No," go to line 13 . . . . .	12a	Yes
b Were officers, directors, or trustees, and key employees required to disclose annually interests that could give rise to conflicts? . . . . .	12b	Yes
c Did the organization regularly and consistently monitor and enforce compliance with the policy? If "Yes," describe in Schedule O how this was done	12c	Yes
13 Did the organization have a written whistleblower policy? . . . . .	13	No
14 Did the organization have a written document retention and destruction policy? . . . . .	14	No
15 Did the process for determining compensation of the following persons include a review and approval by independent persons, comparability data, and contemporaneous substantiation of the deliberation and decision?		
a The organization's CEO, Executive Director, or top management official . . . . .	15a	No
b Other officers or key employees of the organization . . . . .	15b	No
If "Yes" to line 15a or 15b, describe the process in Schedule O (see instructions)		
16a Did the organization invest in, contribute assets to, or participate in a joint venture or similar arrangement with a taxable entity during the year? . . . . .	16a	No
b If "Yes," did the organization follow a written policy or procedure requiring the organization to evaluate its participation in joint venture arrangements under applicable federal tax law, and take steps to safeguard the organization's exempt status with respect to such arrangements? . . . . .	16b	No

**Section C. Disclosure**

- 17 List the States with which a copy of this Form 990 is required to be filed►
- 18 Section 6104 requires an organization to make its Form 1023 (or 1024 if applicable), 990, and 990-T (501(c)(3)s only) available for public inspection. Indicate how you made these available. Check all that apply
- Own website  Another's website  Upon request  Other (explain in Schedule O)
- 19 Describe in Schedule O whether (and if so, how) the organization made its governing documents, conflict of interest policy, and financial statements available to the public during the tax year
- 20 State the name, address, and telephone number of the person who possesses the organization's books and records

**Part II-A Complete if the organization is exempt under section 501(c)(3) and filed Form 5768 (election under section 501(h)).**

**A** Check  if the filing organization belongs to an affiliated group (and list in Part IV each affiliated group member's name, address, EIN, expenses, and share of excess lobbying expenditures)

**B** Check  if the filing organization checked box A and "implied control" provisions apply

Limits on Lobbying Expenditures (The term "expenditures" means amounts paid or incurred.)	(a) Filing organization's totals	(b) Affiliated group totals
<b>1a</b> Total lobbying expenditures to influence public opinion (grass roots lobbying)		
<b>b</b> Total lobbying expenditures to influence a legislative body (direct lobbying)		
<b>c</b> Total lobbying expenditures (add lines 1a and 1b)		
<b>d</b> Other exempt purpose expenditures		
<b>e</b> Total exempt purpose expenditures (add lines 1c and 1d)		
<b>f</b> Lobbying nontaxable amount Enter the amount from the following table in both columns		
<b>If the amount on line 1e, column (a) or (b) is:</b> <b>The lobbying nontaxable amount is:</b>		
Not over \$500,000	20% of the amount on line 1e	
Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000	
Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000	
Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000	
Over \$17,000,000	\$1,000,000	
<b>g</b> Grassroots nontaxable amount (enter 25% of line 1f)		
<b>h</b> Subtract line 1g from line 1a If zero or less, enter -0-		
<b>i</b> Subtract line 1f from line 1c If zero or less, enter -0-		
<b>j</b> If there is an amount other than zero on either line 1h or line 1i, did the organization file Form 4720 reporting section 4911 tax for this year?	<input type="checkbox"/> Yes	<input type="checkbox"/> No

**4-Year Averaging Period Under section 501(h)**  
**(Some organizations that made a section 501(h) election do not have to complete all of the five columns below. See the separate instructions for lines 2a through 2f.)**

Lobbying Expenditures During 4-Year Averaging Period					
Calendar year (or fiscal year beginning in)	(a) 2014	(b) 2015	(c) 2016	(d) 2017	(e) Total
<b>2a</b> Lobbying nontaxable amount					
<b>b</b> Lobbying ceiling amount (150% of line 2a, column(e))					
<b>c</b> Total lobbying expenditures					
<b>d</b> Grassroots nontaxable amount					
<b>e</b> Grassroots ceiling amount (150% of line 2d, column (e))					
<b>f</b> Grassroots lobbying expenditures					

## Schedule C (Form 990 or 990-EZ) 2017

Page 3

**Part II-B Complete if the organization is exempt under section 501(c)(3) and has NOT filed Form 5768 (election under section 501(h)).**

For each "Yes" response on lines 1a through 1i below, provide in Part IV a detailed description of the lobbying activity

	(a)		(b)	
	Yes	No	Amount	
1 During the year, did the filing organization attempt to influence foreign, national, state or local legislation, including any attempt to influence public opinion on a legislative matter or referendum, through the use of				
a Volunteers?				
b Paid staff or management (include compensation in expenses reported on lines 1c through 1i)?				
c Media advertisements?				
d Mailings to members, legislators, or the public?				
e Publications, or published or broadcast statements?				
f Grants to other organizations for lobbying purposes?				
g Direct contact with legislators, their staffs, government officials, or a legislative body?				
h Rallies, demonstrations, seminars, conventions, speeches, lectures, or any similar means?				
i Other activities?				
j Total Add lines 1c through 1i				
2a Did the activities in line 1 cause the organization to be not described in section 501(c)(3)?				
b If "Yes," enter the amount of any tax incurred under section 4912				
c If "Yes," enter the amount of any tax incurred by organization managers under section 4912				
d If the filing organization incurred a section 4912 tax, did it file Form 4720 for this year?				

**Part III-A Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6).**

	Yes	No
1 Were substantially all (90% or more) dues received nondeductible by members?	1	
2 Did the organization make only in-house lobbying expenditures of \$2,000 or less?	2	
3 Did the organization agree to carry over lobbying and political expenditures from the prior year?	3	

**Part III-B Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6) and if either (a) BOTH Part III-A, lines 1 and 2, are answered "No" OR (b) Part III-A, line 3, is answered "Yes."**

1 Dues, assessments and similar amounts from members	1	
2 Section 162(e) nondeductible lobbying and political expenditures (do not include amounts of political expenses for which the section 527(f) tax was paid).	2a	
a Current year	2b	
b Carryover from last year	2c	
c Total	3	
3 Aggregate amount reported in section 6033(e)(1)(A) notices of nondeductible section 162(e) dues		
4 If notices were sent and the amount on line 2c exceeds the amount on line 3, what portion of the excess does the organization agree to carryover to the reasonable estimate of nondeductible lobbying and political expenditure next year?	4	
5 Taxable amount of lobbying and political expenditures (see instructions)	5	

**Part IV Supplemental Information**

Provide the descriptions required for Part I-A, line 1, Part I-B, line 4, Part I-C, line 5, Part II-A (affiliated group list), Part II-A, lines 1 and 2 (see instructions), and Part II-B, line 1. Also, complete this part for any additional information.

<b>h</b>	h If the organization received a contribution of cars, boats, airplanes, or other vehicles, did the organization file a Form 1098-C? . . . . .	<b>8</b>		
<b>8</b>	<b>Sponsoring organizations maintaining donor advised funds.</b> Did a donor advised fund maintained by the sponsoring organization have excess business holdings at any time during the year? . . . . .	<b>9a</b>		
<b>9b</b>		<b>9b</b>		
<b>10</b>	<b>Section 501(c)(7) organizations. Enter</b>	<b>10a</b>		
<b>a</b>	a Initiation fees and capital contributions included on Part VIII, line 12 . . . . .	<b>10b</b>		
<b>11</b>	<b>Section 501(c)(12) organizations. Enter</b>	<b>11a</b>		
<b>a</b>	a Gross income from members or shareholders . . . . .	<b>11b</b>		
<b>12</b>	<b>Section 4947(a)(1) non-exempt charitable trusts.</b> Is the organization filing Form 990 in lieu of Form 1041? b If "Yes," enter the amount of tax-exempt interest received or accrued during the year . . . . .	<b>12a</b>		
<b>13</b>	<b>Section 501(c)(29) qualified nonprofit health insurance issuers.</b>	<b>13a</b>		
<b>a</b>	a Is the organization licensed to issue qualified health plans in more than one state? <i>Note.</i> See the instructions for additional information the organization must report on Schedule O	<b>13b</b>		
<b>b</b>	b Enter the amount of reserves the organization is required to maintain by the states in which the organization is licensed to issue qualified health plans . . . . .	<b>13c</b>		
<b>14</b>	<b>14a</b> Did the organization receive any payments for indoor tanning services during the tax year? . . . . .	<b>14a</b>	No	
<b>b</b>	b If "Yes," has it filed a Form 720 to report these payments? If "No," provide an explanation in Schedule O . . . . .	<b>14b</b>		
<b>15</b>	Is the organization subject to the section 4960 tax on payment(s) of more than \$1,000,000 in remuneration or excess parachute payment(s) during the year? If "Yes," see instructions and file Form 4720, Schedule N . . . . .	<b>15</b>	No	
<b>16</b>	Is the organization an educational institution subject to the section 4968 excise tax on net investment income? If "Yes," complete Form 4720, Schedule O . . . . .	<b>16</b>	No	

**Part VI Governance, Management, and Disclosure** For each "Yes" response to lines 2 through 7b below, and for a "No" response to lines 8a, 8b, or 10b below, describe the circumstances, processes, or changes in Schedule O. See instructions  
Check if Schedule O contains a response or note to any line in this Part VI

**Section A. Governing Body and Management**

	Yes	No
1a Enter the number of voting members of the governing body at the end of the tax year	1a	5
If there are material differences in voting rights among members of the governing body, or if the governing body delegated broad authority to an executive committee or similar committee, explain in Schedule O		
1b Enter the number of voting members included in line 1a, above, who are independent	1b	5
2 Did any officer, director, trustee, or key employee have a family relationship or a business relationship with any other officer, director, trustee, or key employee?	2	No
3 Did the organization delegate control over management duties customarily performed by or under the direct supervision of officers, directors or trustees, or key employees to a management company or other person?	3	Yes
4 Did the organization make any significant changes to its governing documents since the prior Form 990 was filed?	4	No
5 Did the organization become aware during the year of a significant diversion of the organization's assets?	5	No
6 Did the organization have members or stockholders?	6	No
7a Did the organization have members, stockholders, or other persons who had the power to elect or appoint one or more members of the governing body?	7a	No
b Are any governance decisions of the organization reserved to (or subject to approval by) members, stockholders, or persons other than the governing body?	7b	No
8 Did the organization contemporaneously document the meetings held or written actions undertaken during the year by the following	8a	Yes
a The governing body	8b	No
b Each committee with authority to act on behalf of the governing body	9	No
9 Is there any officer, director, trustee, or key employee listed in Part VII, Section A, who cannot be reached at the organization's mailing address? If "Yes," provide the names and addresses in Schedule O		

**Section B. Policies** (This Section B requests information about policies not required by the Internal Revenue Code.)

	Yes	No
10a Did the organization have local chapters, branches, or affiliates?	10a	No
b If "Yes," did the organization have written policies and procedures governing the activities of such chapters, affiliates, and branches to ensure their operations are consistent with the organization's exempt purposes?	10b	
11a Has the organization provided a complete copy of this Form 990 to all members of its governing body before filing the form?	11a	No
b Describe in Schedule O the process, if any, used by the organization to review this Form 990	12a	Yes
12a Did the organization have a written conflict of interest policy? If "No," go to line 13	12b	Yes
b Were officers, directors, or trustees, and key employees required to disclose annually interests that could give rise to conflicts?	13	No
c Did the organization regularly and consistently monitor and enforce compliance with the policy? If "Yes," describe in Schedule O how this was done	14	No
13 Did the organization have a written whistleblower policy?	15a	No
14 Did the organization have a written document retention and destruction policy?	15b	No
15 Did the process for determining compensation of the following persons include a review and approval by independent persons, comparability data, and contemporaneous substantiation of the deliberation and decision?	16a	No
a The organization's CEO, Executive Director, or top management official	16b	
b Other officers or key employees of the organization		
If "Yes" to line 15a or 15b, describe the process in Schedule O (see instructions)		
16a Did the organization invest in, contribute assets to, or participate in a joint venture or similar arrangement with a taxable entity during the year?		
b If "Yes," did the organization follow a written policy or procedure requiring the organization to evaluate its participation in joint venture arrangements under applicable federal tax law, and take steps to safeguard the organization's exempt status with respect to such arrangements?		

**Section C. Disclosure**

- 17 List the States with which a copy of this Form 990 is required to be filed
- 18 Section 6104 requires an organization to make its Form 1023 (or 1024-A if applicable), 990, and 990-T (501(c)(3)s only) available for public inspection. Indicate how you made these available. Check all that apply
- Own website  Another's website  Upon request  Other (explain in Schedule O)
- 19 Describe in Schedule O whether (and if so, how) the organization made its governing documents, conflict of interest policy, and financial statements available to the public during the tax year
- 20 State the name, address, and telephone number of the person who possesses the organization's books and records  
►PERKINS COIE LLP 700 13TH STREET NW SUITE 600 WASHINGTON, DC 20005 (202) 654-1770

**Part VII Section A. Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees (continued)**

**2** Total number of individuals (including but not limited to those listed above) who received more than \$100,000 of reportable compensation from the organization ► 1

Cat No 500845 Schedule C (Form 990 or 990-EZ) 2018

**Part II-A Complete if the organization is exempt under section 501(c)(3) and filed Form 5768 (election under section 501(h)).**

**A** Check ►  if the filing organization belongs to an affiliated group (and list in Part IV each affiliated group member's name, address, EIN, expenses, and share of excess lobbying expenditures)

**B** Check ►  if the filing organization checked box A and "implied control" provisions apply

Limits on Lobbying Expenditures (The term "expenditures" means amounts paid or incurred.)	(a) Filing organization's totals	(b) Affiliated group totals
<b>1a</b> Total lobbying expenditures to influence public opinion (grass roots lobbying)		
<b>b</b> Total lobbying expenditures to influence a legislative body (direct lobbying)		
<b>c</b> Total lobbying expenditures (add lines 1a and 1b)		
<b>d</b> Other exempt purpose expenditures		
<b>e</b> Total exempt purpose expenditures (add lines 1c and 1d)		
<b>f</b> Lobbying nontaxable amount Enter the amount from the following table in both columns		
<b>If the amount on line 1e, column (a) or (b) is:</b> <b>The lobbying nontaxable amount is:</b>		
Not over \$500,000	20% of the amount on line 1e	
Over \$500,000 but not over \$1,000,000	\$100,000 plus 15% of the excess over \$500,000	
Over \$1,000,000 but not over \$1,500,000	\$175,000 plus 10% of the excess over \$1,000,000	
Over \$1,500,000 but not over \$17,000,000	\$225,000 plus 5% of the excess over \$1,500,000	
Over \$17,000,000	\$1,000,000	
<b>g</b> Grassroots nontaxable amount (enter 25% of line 1f)		
<b>h</b> Subtract line 1g from line 1a If zero or less, enter -0-		
<b>i</b> Subtract line 1f from line 1c If zero or less, enter -0-		
<b>j</b> If there is an amount other than zero on either line 1h or line 1i, did the organization file Form 4720 reporting section 4911 tax for this year?	<input type="checkbox"/> Yes	<input type="checkbox"/> No

**4-Year Averaging Period Under section 501(h)**  
**(Some organizations that made a section 501(h) election do not have to complete all of the five columns below. See the separate instructions for lines 2a through 2f.)**

Lobbying Expenditures During 4-Year Averaging Period					
Calendar year (or fiscal year beginning in)	(a) 2015	(b) 2016	(c) 2017	(d) 2018	(e) Total
<b>2a</b> Lobbying nontaxable amount					
<b>b</b> Lobbying ceiling amount (150% of line 2a, column(e))					
<b>c</b> Total lobbying expenditures					
<b>d</b> Grassroots nontaxable amount					
<b>e</b> Grassroots ceiling amount (150% of line 2d, column (e))					
<b>f</b> Grassroots lobbying expenditures					

**Part II-B Complete if the organization is exempt under section 501(c)(3) and has NOT filed Form 5768 (election under section 501(h)).**

For each "Yes" response on lines 1a through 1i below, provide in Part IV a detailed description of the lobbying activity

	(a)		(b)	
	Yes	No	Amount	
1 During the year, did the filing organization attempt to influence foreign, national, state or local legislation, including any attempt to influence public opinion on a legislative matter or referendum, through the use of				
a Volunteers?				
b Paid staff or management (include compensation in expenses reported on lines 1c through 1i)?				
c Media advertisements?				
d Mailings to members, legislators, or the public?				
e Publications, or published or broadcast statements?				
f Grants to other organizations for lobbying purposes?				
g Direct contact with legislators, their staffs, government officials, or a legislative body?				
h Rallies, demonstrations, seminars, conventions, speeches, lectures, or any similar means?				
i Other activities?				
j Total Add lines 1c through 1i				
2a Did the activities in line 1 cause the organization to be not described in section 501(c)(3)?				
b If "Yes," enter the amount of any tax incurred under section 4912				
c If "Yes," enter the amount of any tax incurred by organization managers under section 4912				
d If the filing organization incurred a section 4912 tax, did it file Form 4720 for this year?				

**Part III-A Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6).**

	Yes	No
1 Were substantially all (90% or more) dues received nondeductible by members?	1	
2 Did the organization make only in-house lobbying expenditures of \$2,000 or less?	2	
3 Did the organization agree to carry over lobbying and political expenditures from the prior year?	3	

**Part III-B Complete if the organization is exempt under section 501(c)(4), section 501(c)(5), or section 501(c)(6) and if either (a) BOTH Part III-A, lines 1 and 2, are answered "No" OR (b) Part III-A, line 3, is answered "Yes."**

1 Dues, assessments and similar amounts from members	1	
2 Section 162(e) nondeductible lobbying and political expenditures (do not include amounts of political expenses for which the section 527(f) tax was paid).	2a	
a Current year	2b	
b Carryover from last year	2c	
c Total	3	
3 Aggregate amount reported in section 6033(e)(1)(A) notices of nondeductible section 162(e) dues	4	
4 If notices were sent and the amount on line 2c exceeds the amount on line 3, what portion of the excess does the organization agree to carryover to the reasonable estimate of nondeductible lobbying and political expenditure next year?	5	
5 Taxable amount of lobbying and political expenditures (see instructions)		

**Part IV Supplemental Information**

Provide the descriptions required for Part I-A, line 1, Part I-B, line 4, Part I-C, line 5, Part II-A (affiliated group list), Part II-A, lines 1 and 2 (see instructions), and Part II-B, line 1. Also, complete this part for any additional information.

FORM 990, PART XI, LINE 9	PRIOR PERIOD ADJUSTMENT 224,878

Mr. HOLDER. Let me just say that that is a mischaracterization of the intent of that filing. And beyond that, the notion that the Justice Department—

Mr. STEIL. Mr. Holder, you are saying that you unfairly characterized yourself in your own IRS filing? That you misfiled an IRS—

Mr. HOLDER. You are unfairly characterizing that which we wrote. And beyond that—

Mr. STEIL. I am reading—I am not mischaracterizing anything. It says, “describe the purpose of the organization.” I quoted it in full.

Chairman BUTTERFIELD. The Committee will come to order. As I used to say when I was a trial judge years ago, the witness may complete his answer. All right.

Mr. HOLDER. One can look at words and mischaracterize them. With all due respect, Congressman, you are looking at those words and mischaracterizing them. I am trying to give you their true intention.

And beyond that, more importantly though, this notion that the Justice Department has somehow acted in a partisan way, Republican as well as Democratic attorneys general really enforced the Voting Rights Act during the course of its history.

Every President who signed the reauthorization of the Voting Rights Act was, in fact, a Republican.

Chairman BUTTERFIELD. The gentleman’s time has expired.

Mr. HOLDER. The reauthorization of the act was supported almost unanimously by Republicans and Democrats in the House as well as in the Senate.

Chairman BUTTERFIELD. Thank you, Mr. Holder.

At this time, the chair recognizes Mr. Aguilar for five minutes.

Mr. AGUILAR. Thank you, Mr. Chairman. I appreciate it. And I will do something unique here. I will ask a question and then let the witnesses answer.

Attorney General Holder, for the first time since the 1970s our Nation is entering a congressional redistricting cycle without preclearance, as Ms. Scanlon mentioned.

What does this mean for communities of color who have been disproportionately affected by the drawing of jurisdictional boundaries and already lack representation at the local, State, and Federal level?

Mr. HOLDER. Well, I am very concerned about what this will mean. We have seen what State legislatures have done since the *Shelby County* decision with regard to closing polling places, with regard to—you look at the way in which Republicans gerrymandered in the 2011 process.

One of the places, we are talking about Wisconsin. If you look at in 2018, Democrats got about 54 percent of the votes for the Wisconsin State Legislature, got about 36 percent of the seats.

I am concerned that without the protections of the Voting Rights Act, that which we have seen in the past decade can continue into the following decade and have a negative impact on the ability of the American people to elect representatives who truly represent their policy desires.

Mr. AGUILAR. After the *Shelby* ruling, Mr. Attorney General, what is the litigation strategy to fight voter discrimination and disenfranchisement within communities of color?

Mr. HOLDER. Well, we bring cases where we can identify racial gerrymanders, and we can bring those into Federal court. We have also, after the *Rucho* decision, brought partisan gerrymandering cases in the State courts using the State constitutions, done so successfully in North Carolina, as has been mentioned, in Pennsylvania as well.

And so the Supreme Court rulings have made it difficult for us to bring litigation but not necessarily impossible.

Mr. AGUILAR. And the Chair talks about this often. Can you talk a little bit about the cost of the litigation and the time that it takes?

Mr. HOLDER. Yeah. The preclearance—the beauty of preclearance was that you stopped negative action before it began. Without the ability to preclear in those States that were covered, you have to deal with things that have already occurred, negative impacts that have already occurred, and try to unwind them.

And it means that you have probably gone through at least one election cycle where a finding of impropriety has occurred, at least one election cycle where something—where a process was done inappropriately and probably had a negative impact on the voters in the State or the jurisdiction in which the litigation has been brought.

Mr. AGUILAR. Thank you, sir.

Ms. Ferguson-Bohnee, in your written testimony you mentioned States and local jurisdictions carving up reservations or packing Indian voters in redistricting plans in order to minimize the impact of the Native vote and that this method was called cracking and packing.

Can you talk a little bit about how cracking and packing has affected Native Americans, particularly at the local level?

Ms. FERGUSON-BOHNEE. Yes. Thank you, Representative Aguilar.

We see that there are quite a bit of cracking and packing in local jurisdictions. I think I set forth in my testimony some examples of that. And that has really minimized the Native American voice and the ability to participate.

There are also jurisdictions that have added seats on county commissions or judgeships in order to dilute the Native American vote and participation in elections.

And when preclearance was in effect in Arizona, for example, there were objections to two rounds—two submissions from counties that sought to expand the judgeship positions, and in that they found that that would reduce Native American participation.

So that has been done really to minimize the Native American voice.

And then we see—I just want to give the example of the San Juan Southern Paiute case, because you asked about cost. That litigation took 7 years and cost the plaintiffs, which was the Tribe, \$3.4 million.

But these jurisdictions are also spending money to defend their plan. So if they were protected by preclearance—Utah wasn't covered by preclearance before—but if they were protected by

preclearance, then a lot of this money would be saved for our local jurisdictions and for the Tribes. And most of the Tribes do not have the resources to be expending on voting rights litigation.

Mr. AGUILAR. You said 3 and a half years and—I am sorry, 7 years and \$3.5 million?

Ms. FERGUSON-BOHNEE. Yes, yes. And that was really to prevent Native Americans from gaining another seat on the County Commission. They were packed, 90 percent of Native Americans were packed into one district. And the other two districts maintained a lower number of people, so they were malapportioned.

And so the Navajo Nation had to file litigation to apportion those districts correctly and to give them an opportunity to elect two candidates of choice, which they did.

Mr. AGUILAR. Thank you so much. I appreciate that.

Mr. Chair, I yield back.

Chairman BUTTERFIELD. The gentleman yields back.

The Chair now recognizes the Ranking Member of the full committee, Mr. Davis.

Mr. DAVIS. Thank you, Mr. Chair.

As somebody who comes from a State that is completely controlled by one party, the Democrats, who have supermajorities in the House and the Senate. We have a Democratic Governor who pledged not to sign a legislative drawn map. He broke that pledge when he recently signed a State legislative map drawn with incomplete census data.

I listened to Attorney General Holder's opening comments and I think, wow, we are going to have a group come in and address the partisan gerrymandering in Illinois.

Mr. Holder, I enjoyed your opening comments. We got a chance to meet at the State of the Union one year. I am glad to see you here again.

Can you tell me how recently it has been since you have been to Illinois to discuss partisan gerrymandering?

Mr. HOLDER. I have focused on partisan gerrymandering around the country and have stood against Democrats who have engaged in that process, whether it was in the case, the redistricting case, the *Rucho* case, standing against what happened in Maryland. I have stood against Democrats in New Jersey and in New York who have tried to use power that they have there to engage in partisan gerrymandering.

And I am against partisan and racial gerrymandering done by any party in any place.

Mr. DAVIS. Well, I would welcome you to come to my home State of Illinois. I didn't get an answer when the last time you were there to talk about this issue.

I do have a quick question regarding this. Does the National Democratic Redistricting Committee support the Mexican-American Legal Defense Fund's lawsuit against the State of Illinois for the redistricting plan that was adopted by the Illinois General Assembly just a few weeks ago and signed into law by Governor J.B. Pritzker?

Mr. HOLDER. I will be honest with you. I have not had a chance to review that lawsuit, but I would be more than glad to do that

and submit some supplementary comments with regard to the views of the organization and my personal views on the lawsuit.

Mr. DAVIS. I really appreciate that.

Also, Illinois' current map was drawn in 2011. There is a lot of discussion here about partisan gerrymandering in 2011. There is a district represented by my good friend and colleague Mr. Chuy Garcia that is commonly known as the earmuff district.

Would that be an example of Democrats packing minorities into one district?

Mr. HOLDER. Again, I am not familiar with the particular map.

But gerrymandering is not something that is only done by Republicans. It has been done by Democrats. We have had gerrymandering almost since the inception of our Nation, which doesn't mean we have to accept it.

Princeton did a study that said that gerrymandering done by Republicans in 2011 was the worst of the past 50 years, but there are Democratic as well as Republican excesses that I stand against. Let me make that very, very clear.

Mr. DAVIS. Well, I appreciate that. And I noticed during the decade there were remaps drawn only in Republican States.

I would again welcome your organization to come to my home State of Illinois any year, because they just—the Democrats just gerrymandered the State legislative map, and we expect them to do exactly the same thing with the congressional map.

So I welcome you and your team to the fight, and I certainly hope that we can communicate in the future on this.

General Holder, both the Carter-Baker Commission and the Bauer-Ginsberg Commission established by President Obama identified inaccurate voter rolls as a national problem. And, unfortunately, I believe it is still true today.

You served, as we know, as AG from 2009 to 2015. And during your tenure at DOJ, how many NVRA Section 8 enforcement actions or investigations did the Department bring against States for failure to conduct list maintenance?

Mr. HOLDER. I don't have those numbers in front of me, but we certainly took our obligations seriously in that regard.

Mr. DAVIS. According to the DOJ website, there were no enforcement actions for failure to conduct list maintenance, only one action against Florida for so-called purging voters.

How did you guys know at DOJ during your tenure if a State was in compliance with provisions of the NVRA or not?

Mr. HOLDER. Well, we have a variety of techniques. We certainly listen to public comments that we get from a variety of sources. We have investigative components within the Justice Department that are able to monitor the situations that are happening around the country. We have a Civil Rights Division, a Voting Rights Section that has investigative power.

So the Justice Department has a number of ways in which it can monitor situations around the Nation.

Mr. DAVIS. I appreciate that, sir. And I know many of your donors to the National Democratic Redistricting Committee may not agree with you wanting to come to States like Illinois, but I certainly appreciate your willingness to talk about these things.

Do you support donor disclosure?

Mr. HOLDER. I do. I do think that there needs to be transparency with regard to who is making donations to political organizations, and that would be good for our democracy.

Mr. DAVIS. Sir, will you disclose the donors to the National Democratic Redistricting Committee for the record today?

Mr. HOLDER. Well, what we do is follow the law as it exists. I am not going to unilaterally disarm. When Republicans will do the same thing, I will do that and we will certainly follow the law.

But I stand for the disclosure obligations that are contained in the bills that are being considered before Congress.

Mr. DAVIS. Well, I would appreciate any disclosure. Happy to talk with you in the future, sir. Thank you for your responses.

And thank you to all the witnesses for being here today.

Chairman BUTTERFIELD. And we thank you, Mr. Ranking Member.

At this time, the chair recognizes Ms. Teresa Fernandez for five minutes.

Ms. LEGER FERNANDEZ. Thank you so much.

Chairman BUTTERFIELD. Leger Fernandez.

Ms. LEGER FERNANDEZ. It is a long name. Thank you so much, Mr. Chair.

We are here because American democracy really does depend on our power to ensure fair and free elections for all our communities, not just some of our communities, because every citizen, regardless of ZIP Code, has a right to vote without interference and obstruction.

Before I came to Congress, I actually represented Native American Tribes in redistricting cases and overturned Republican redistricting maps that sought to divide Native American communities.

We advocated, I advocated the committee include language in H.R. 1 to ensure that independent redistricting commissions respect Tribal communities when drawing boundaries.

Ms. Ferguson-Bohnee, based on your experience with regards to Native American voting rights, do you believe that Tribes and Native American communities should be protected as communities of interest in the Voting Rights Act?

Ms. FERGUSON-BOHNEE. Thank you very much for the question.

I do definitely agree that Native Americans, within their reservation, they should be determined a community of interest.

We have seen in some circumstances where redistricting bodies or those who are making the redistricting decisions have split Tribal boundaries and Tribal reservations into multiple districts, diluting the effectiveness of that vote.

We also have Tribes who share communities of interest with other Tribal people. They are communities of interest and have advocated for that, but, nonetheless, they have also been split and they have been packed or cracked into different districts.

And in that circumstance, there are examples of cracking. I have that in my testimony. I can attach some more specifics for the record if you would like.

But I think that is a huge issue, is respecting Tribal boundaries and respecting Tribal communities of interest, and some redistricting bodies do not do that.

Ms. LEGER FERNANDEZ. Thank you very much.

And, for example, in New Mexico we did include the Pueblos and the Apaches in single districts, legislative districts, precisely because of the fact that they do have affinity on many issues and that is what they chose.

With regards to the independent redistricting commissions, where they exist, have you seen whether there has been sufficient Native American representation on those commissions, therefore reflecting the communities that will be affected by the redistricting lines drawn by the commissions?

Ms. FERGUSON-BOHNEE. Well, this round I think there are a few Native Americans who are serving on redistricting commissions. I think there is Native interest in Montana, another State I can't remember off the top of my head. But Arizona for the first time has a Native American on the commission.

And I think that is really important, because I think, as I explained in my materials, Native Americans have very rural areas across the country. They are some of the most rural areas, and they have unique needs that may not be understood by many of the people who live in urban areas.

So to understand Tribes and to understand the unique needs of Tribal people I think is very important. And we have seen that commissions, at least this round, have included some Native Americans on their redistricting commissions.

Ms. LEGER FERNANDEZ. Thank you.

With regards to the San Juan litigation, how many elections took place during those 7 years that the case was being litigated?

Ms. FERGUSON-BOHNEE. Yeah. I am sorry. I don't know off the top of my head. But I assume—yeah, I don't know off the top of my head how many elections took place during that time period.

Ms. LEGER FERNANDEZ. But essentially, those elections took place with maps that were later found to be unlawful, and, therefore, Native Americans did not have the kind of representation for 7 years while laws were being passed.

Mr. Vattamala, thank you so much for joining us today.

Could you describe more fully how preclearance as opposed to Section 2 litigation impacts Asian Americans' access to the ballot?

Mr. VATTAMALA. Yeah. So, as I mentioned, even in places like New York, we were able to successfully use Section 5 in a variety of ways, in combination with Section 203.

We used Section 5 to object, submit our objections to the DOJ when the New York City Board of Elections refused to translate Chinese ballots with the candidates' names. They refused to translate the candidate ballot, the candidates' names on the ballot.

We were able to use Section 5 to require them to do that translation, fully translate the ballot, and have 55,000 limited-English-proficient Chinese Americans able to vote.

I also gave the example of Hubert Vo in Texas in that Texas House district. We would not have been able—we would not have the resources to litigate under Section 2 for that seat, but under Section 5 the burden was on the State, and they were not able to carry that burden. And it was a great example of how Section 5 worked well for communities with limited resources.

Chairman BUTTERFIELD. The gentlewoman's time has expired.

At this time, the Chair will recognize himself for five minutes. And I will go back to Mr. Vattamala.

U.S. census data reflects that Asian Americans are the fastest growing racial group in the United States.

Historically, we have seen that areas with significant growth in racial groups are also where there is greatest risk of discriminatory intent or discriminatory result in redistricting practices.

How have these rapidly growing Asian American communities, many of which are in the South, been impacted by redistricting post-*Shelby*?

Mr. VATTAMALA. So there is a backlash. We have seen it in some public comments by elected officials, which are included in the testimony.

Asian American communities of interest, when we map them out and see where the boundaries are and do this exercise of superimposing those neighborhood boundaries over legislative lines, you see that in almost every instance—it is not a coincidence—in almost every instance, Asian-American communities of interest are divided into numerous different districts, subverting this growth and thwarting the effects of this growth and the numbers, to deny them the ability to elect a candidate of their choice.

That is why the percentage of Asian American elected officials is not keeping track with that population growth. And we only see Asian American electoral representation when we have fair redistricting. Only then are they able to elect a candidate of choice and they usually do.

Chairman BUTTERFIELD. Thank you. Thank you for that.

Next, I will address this to General Holder.

Attorney General Holder, you were at DOJ at the time that *Shelby County* was handed down, and so you operated in two environments. You were involved in the pre-*Shelby* environment as well as the post-*Shelby* environment. And I know that must have been awkward for you as Attorney General.

Section 5, as I recall, in the Court's decision was found to be constitutional. That is what America needs to know. The Supreme Court of the United States found Section 5 to be constitutional.

What was found to be unconstitutional was Section 4, which is the formula that gives life to Section 5.

And so I know it must have been awkward for you at DOJ, operating under the Court's decision.

And also, I might recognize that the Court, Chief Justice Roberts also acknowledged that voter discrimination continues to exist in the United States. And so that also is embedded in the Court's opinion.

And I recall I was a young voting rights attorney in North Carolina many years ago, back in the 1980s, and I practiced Section 5 law.

President Reagan was President. William Bradford Reynolds, as I recall, was the chief of the Civil Rights Section of the Department of Justice. And during the Reagan years, there were multiple Section 5 objections to election systems and to changes in election laws.

And let me defend some of the jurisdictions in the South that I am familiar with. Many of these voting changes were not done spe-

cifically with the intent to discriminate against African American voters, but they had a discriminatory effect.

And so that is what the Department of Justice under President Reagan had to do. And the standard back then, it continues to be the standard now. And I will read it again, because I want America to know this: "A State voting law has a discriminatory, regressive effect if the law disproportionately and materially burdens minority voters when it is measured against preexisting State law."

And so my question to you, General Holder, is, how did the *Shelby* decision affect executing your duties at the Department of Justice when it was handed down?

Mr. HOLDER. Well, the biggest change was by, in essence, taking away the preclearance ability. But you are right, because of the Section 4 problems, it stopped us from preventing negative things from occurring as opposed to waiting for those negative things to occur and then trying to make things better.

It is almost as if you see somebody getting ready to set fire to a house. You can stop them and prevent the house from being damaged as opposed to waiting for the fire to engulf the house and then trying to repair the house once the fire is put out.

And so there are still parts of the Voting Rights Act that remain that are effective. Section 2, for instance. But that doesn't give the Justice Department all of the tools that it needs.

And I really want to push back on the notion that somehow or other this was something only the Democratic Attorneys General were focused or made a priority.

As you talk about the Reagan Justice Department, the Bush Justice Department, I might not agree with all that they did, but they made a priority the enforcement of the Voting Rights Act.

Maybe I would say they didn't go far enough, but certainly they did things consistent with the intent of the act to protect the sanctity of our electoral system using the tools that they had.

Chairman BUTTERFIELD. Yes. Thank you. Thank you for that clarification.

And what my colleagues need to know—not those on this committee, because they already know it, but the colleagues throughout the House—is that Section 5 is an administrative procedure. It is streamlined. It can be completed in 60 days. There is no cost associated with it.

The covered jurisdiction need only to submit in writing the proposed change to the Department of Justice for an evaluation as to whether or not it is retrogressive. If DOJ says it is not retrogressive, it goes into effect. If DOJ says that it is retrogressive, it does not go into effect and the jurisdiction then goes back and rewrites the law. And oftentimes, rewriting of the law is done with consultation with DOJ.

And I will conclude by mentioning Rocky Mount, North Carolina, in my district. When I was a voting rights attorney, the city wanted to annex 12 or 13 acres of land within the municipal boundaries.

The city didn't realize the effect that it would have on minority voting strength in the community. It was about economic development. They wanted to get a shopping center into the city and they wanted to annex.

And once DOJ expressed an objection to the annexation, that is when the city asked DOJ, well, what can we do to make it right? And DOJ said, well, if you create single-member districts, that will kind of level the playing field. And the city said, you have got it, we are going to create single-member districts.

They did it. And now it is 30 years later and things are well in that jurisdiction.

That is the power of Section 5. It prevents. It prevents a problem.

Thank you for your tolerance.

At this time, I will recognize Mr. Loudermilk.

Welcome back, Barry. You are recognized for five minutes.

Mr. LOUDERMILK. Well, thank you, Mr. Chairman. I appreciate you allowing me to participate in this even though I am not an official member of this Subcommittee.

And I apologize. I had to step out. As things go here, we had some conflicting meetings, especially now as we are opening up and people are coming to meet with us in person. So I appreciate your indulgence.

Look, voter ID laws have been a huge topic since the 2020 election. In Georgia, they have been a big topic for many years. I was in the State legislature when we first adopted a clear and concise voter ID law, and it has been debated but did find bipartisan support there.

And in spite of what some of the witnesses here and some others may believe, that voter ID laws are very popular and really an important safeguard for election integrity and the confidence of voters in the election process.

Most everyone has probably heard of the latest polls that have been coming out. Just this week, Monmouth University released polling data showing 80 percent of Americans support voter ID, and that did not surprise me in the least.

Friends I have on both sides of the aisle think it is very important that you be able to prove who you are for something—or who you say you are—for something as important as choosing who the leaders of your school board, your city, your county, your State, your Nation are. It has great implications and it is an intricate part of being a secure election system.

Even someone I served with in the State legislature, it kind of did surprise me of her statement, but Stacey Abrams has just recently said no one has ever objected to having to prove who you are to vote.

Now, if my memory serves me correctly, that isn't the stance she took when we served in the legislature together regarding this matter, but I think we are starting to see a shift as people are seeing that this is very popular among people, because they want their vote to be protected.

Attorney General Holder, in your testimony you reference voter ID laws as one method that has been used to, I think, if I have got it right, strip Americans of their rights.

In the light of polling information I just referenced, including among Democrats and comments like those from Ms. Abrams, I am just wondering, have you changed your viewpoint on voter ID and do you or do you not support it and why?

Mr. HOLDER. What I oppose is the overly prescriptive way in which States, generally Republican States, have indicated that which is acceptable to prove that you are who you claim to be when you want to vote.

If you expand the number of things that somebody can use to prove they are who they claim to be, I could support voter ID. But we have that problem in Texas, as was mentioned before, where carrying a gun and you have a photo ID, that is acceptable, but a State-issued photo ID for a student is not. I have got problems with that.

So if you come up with ways in which you make it widely available and you expand the number of ways in which people can prove that they are who they claim to be, yeah, I could see supporting voter ID measures.

Mr. LOUDERMILK. Well, that is good and refreshing to hear.

In Georgia, if you don't receive a driver's license, you can get a free State-issued ID. And so anyone can receive the ID and it can be used as identification for voting.

Mr. Vattamala, do you support voter ID laws? And, if so or not, why?

Mr. VATTAMALA. Yeah. So we support reasonable voter ID laws. It is really the same answer as Mr. Holder. It depends on what that list of acceptable documentation is.

Mr. LOUDERMILK. Ms. Ferguson-Bohnee, do you support voter ID laws? And what about Tribal ID as a form of acceptable voter ID?

Ms. FERGUSON-BOHNEE. Thank you for that question.

We have advocated for the use of Tribal IDs when IDs are required. In some instances, they have not been accepted or States have not accepted that as a form of ID, and that should be accepted as a form of ID.

I would like to note that the Navajo Nation, the largest Tribe in the United States, does not issue a photo ID to their Tribal members. And so that was concerning when Arizona passed their voter ID law, because it didn't take into account what types of ID that Native Americans may have.

In addition, because in rural areas and on reservations a lot of areas, especially Arizona, other areas, people don't have traditional street addresses. And when they go to vote on election day their addresses don't match, because the counties change the addresses on the voter registration materials. And so that creates problems and sometimes results in votes not being counted.

Mr. LOUDERMILK. Thank you.

Continuing on the topic of voter ID, Mr. Hearne, you state in your testimony that Democratic Virginia Attorney General Mark Herring appointed you to defend Virginia's election reform legislation against a constitutional challenge. That challenge included a voter ID requirement, correct?

Mr. HEARNE. It did, Congressman. And that was upheld by the Fourth Circuit.

I would cite Virginia's voter ID law as a model of one that is constitutional, consistent with the Supreme Court's decision in Crawford. And I would also note, in terms of your statement, civil rights leader Andrew Young, former mayor of Atlanta, supports photo ID.

And what we found in the Carter-Baker Commission was that there was testimony that actually giving particularly minority members a photo ID for free increased their participation, because it gave them greater confidence that when they went into a polling place, they handed the ID over, they knew they would be given a ballot that would be cast and counted. So it increased participation.

Chairman BUTTERFIELD. The gentleman's time has expired. All time has expired for this panel.

We want to say thank you to all of our panelists. Thank you very much for your testimony. And thank you for your cooperation as we have tried to work through the technology. I think we have done reasonably well this morning. But thank you to the witnesses.

We in just a moment will be moving to the second panel. But, as they say in television, we will stop for a commercial break, and we will return in 2 or 3 minutes.

The committee stands in recess until further call.

[Recess.]

Chairman BUTTERFIELD. The committee will come back to order. We are now ready to proceed with the second panel.

And thank you, panelists, for your patience this morning.

Joining us today on our second panel are Thomas Saenz of the Mexican-American Legal Defense and Educational Fund. Also, Janai Nelson of the NAACP Legal Defense and Educational Fund. Michael Waldman of the Brennan Center for Justice. Wade Henderson of the Leadership Conference for Civil and Human Rights. And Sara Frankenstein of the law firm of Gunderson, Palmer, Nelson & Ashmore in the State of South Dakota.

Also, Thomas Saenz is President and General Counsel of the Mexican-American Legal Defense and Educational Fund—we refer to it as MALDEF—where he leads the civil rights organization's offices in pursuing litigation, policy advocacy, and community education to promote the civil rights of Latinos living in the United States. He rejoined MALDEF in August of 2009 after 4 years as counsel to the Mayor in Los Angeles, California.

Janai Nelson. Janai is the Associate Director-Counsel at the NAACP Legal Defense and Educational Fund. We call it LDF. Ms. Nelson is a member of LDF's litigation and policy teams and has served as interim Director of LDF's Thurgood Marshall Institute and in various other leadership capacities at LDF. She was one of the lead counsels in *Veasey v. Abbott*, a successful Federal challenge to Texas voter ID law.

Mr. Waldman, who sits in front of me at this moment, is the President of the Brennan Center for Justice, which he has led since 2005. Mr. Waldman is a constitutional lawyer. He is a writer and an expert on the Presidency and American democracy. Mr. Waldman was director of speechwriting for President Bill Clinton from 1995 to 1999, serving as assistant to the President.

Wade Henderson, who I will acknowledge publicly is a friend, is the interim President and CEO of the Leadership Conference on Civil and Human Rights and the Leadership Conference Education Fund, an organization he previously led for more than 20 years.

The Leadership Conference is the Nation's premier civil and human rights coalition, charged to promote and protect the civil and human rights of all persons in the United States.

He recently retired as the University of the District of Columbia David A. Clarke School of Law first Joseph Rauh Chair of Public Interest Law.

That is a pretty long sentence, Mr. Henderson, but that is your experience.

Next, Sara Frankenstein is a partner at Gunderson, Palmer, Nelson & Ashmore, in Rapid City, South Dakota. She practices in the areas of civil litigation, civil rights, employment law and election law, among other things. She is also the vice chair of the South Dakota State Advisory Committee to the U.S. Commission on Civil Rights.

Again, thank you to the witnesses for your testimony today. We will now begin with Mr. Saenz.

You are recognized for five minutes.

**STATEMENTS OF THOMAS SAENZ, PRESIDENT AND GENERAL COUNSEL, MEXICAN-AMERICAN LEGAL DEFENSE AND EDUCATIONAL FUND; JANAI NELSON, ASSOCIATE DIRECTOR-COUNSEL, NAACP LEGAL DEFENSE FUND; MICHAEL WALDMAN, PRESIDENT, BRENNAN CENTER FOR JUSTICE, NYU SCHOOL OF LAW; WADE HENDERSON, INTERIM PRESIDENT AND CEO, LEADERSHIP CONFERENCE ON CIVIL AND HUMAN RIGHTS; AND SARA FRANKENSTEIN, PARTNER, GUNDERSON, PALMER, NELSON & ASHMORE**

**STATEMENT OF THOMAS SAENZ**

Mr. SAENZ. Thank you. Good morning, Mr. Chair, honorable members.

As President of MALDEF, I lead an organization that has for 53 years now worked to promote the civil rights of all Latinos living in the United States.

Central to that mission has been our efforts over the years legislatively and in court to protect the voting rights of Latino citizens, the right of every Latino citizen to cast an effective vote.

In the Latino community since at least 1981, every year following a Decennial Census has been a year of great political opportunity as each succeeding Census has demonstrated the substantial growth and dispersion of the Latino community, including a growth in the Latino voting population. Absent some overwhelming and disparate undercount in the 2020 census, we expect a similar outcome from the 2020 Census.

Although we do not yet have the subpopulation data for the Decennial Census, the Census Bureau's own American Community Survey estimates show that Latinos accounted for just over half of the entire Nation's population growth between 2010 and 2019.

ACS data also estimates that Latinos made up over 44 percent of the entire Nation's growth in citizen, voting-age population, a suitable proxy for eligible voters, between 2009 and 2019.

However, one consequence of this continued growth in the Latino community is that there is little question that the growth nationally of the Latino community and its potential voting impact is seen by some as a threat to their political power. This has had two major effects.

First, it has resulted in Latinos becoming central to numerous false assertions questioning the integrity of our elections. These false assertions with regard to the Latino community generally take the form of completely unsupported assertions that Latino immigrants who are not yet citizens are voting in substantial numbers.

Political forces use these false assertions to back up onerous voting requirements that restrict the right to vote of Latinos and other populations.

This includes new and more onerous voter identification requirements, new requirements to provide documented proof of citizenship in order to register, limitations on voter assistance in Spanish and other languages, attempts to proliferate in Spanish false information about the voting process, discriminatory targeting of in-person and absentee voters for challenge based on Latino surnames, and even in attempts to intimidate less experienced voters through the stationing of uniformed guards at polling places.

But the second impact of this concern about the growth of Latino political power by some has taken the form of manipulation of our governance structures, including the perpetuation or reintroduction of at-large voting or the failure to acknowledge and incorporate the growth of the Latino community in the decennial redistricting process.

To give just two examples. Following the *Shelby County* decision, the city of Pasadena, Texas, decided to shift from eight districted seats on its city council to six districted seats and two at-large seats. The sole purpose of this creation of two at-large seats was to restrict and prevent the growing Latino voting population from electing a majority to the city council.

With respect to redistricting, I will give another example. Following the last Census in 2011, MALDEF identified eight counties in the State of California, my home State, that should have drawn an additional Latino majority district on their five-member County Board of Supervisors, but failed to do so.

Because of the arduous cost and effort involved in challenging this kind of discriminatory redistricting, through the course of a decade we were only able to challenge—successfully, I add—one jurisdiction, Kern County.

The fact is that the challenges, in the face of those who believe that the growth of Latino populations is a threat to their political power, are many.

While a rigging of the system to embed the power of incumbent long-term officeholders in the face of a newly ascendent population like the Latino population may be symptomatic of human nature, it cannot be characteristic of a thriving democracy.

We cannot address this system only through litigation that is costly and inefficient. This is not a time to shrink from efforts to encourage broader participation of all eligible citizens in voting.

Congressional action to preserve voting rights is essential as we commence redistricting and as we face the continued false invocation of phantom threats used to justify the targeting of all voters of color.

At MALDEF, we call upon the Congress to take action to address this ongoing problem and ensure that the voting rights of all Americans can be preserved and expanded.

Thank you.

[The statement of Mr. Saenz follows:]

**Testimony of Thomas A. Saenz  
President and General Counsel, MALDEF**

**Before the Subcommittee on Elections  
of the Committee on House Administration**

**Hearing on  
Voting in America: A National Perspective on the Right to Vote, Methods of Election,  
Jurisdictional Boundaries, and Redistricting.**

**June 24, 2021**

Good morning. My name is Thomas A. Saenz, and I am president and general counsel of MALDEF (Mexican American Legal Defense and Educational Fund), which has, for 53 years now, worked to promote the civil rights of all Latinos living in the United States. MALDEF is headquartered in Los Angeles, with regional offices in Chicago; San Antonio, where we were founded; and Washington, D.C. I appear before you remotely today from the city of Los Angeles.

MALDEF focuses its work in four subject-matter areas: education, employment, immigrant rights, and voting rights. Since its founding, MALDEF has worked diligently on securing equal voting rights for Latinos, and promoting increased civic engagement and participation within the Latino community, as among its top priorities. MALDEF played a significant role in securing the full protection of the federal Voting Rights Act (VRA) for the Latino community through the 1975 congressional reauthorization of the 1965 VRA. MALDEF has over the years litigated numerous cases under section 2, section 5, and section 203 of the VRA, challenging at-large systems, discriminatory redistricting, ballot access barriers, undue voter registration restrictions, and failure to provide bilingual ballot materials. We have litigated

significant cases challenging statewide redistricting in Arizona, California, Illinois, and Texas, and we have engaged in pre-litigation advocacy efforts, as well as litigation related to ballot access and local violations, in those states, as well as in Colorado, Georgia, Nevada, and New Mexico. As the growth of the Latino population expands, our work in voting rights increases as well.

There is little question that the growth nationally of the Latino community and its potential voting impact is seen by some as a threat to their political power. The Latino community has comprised the nation's largest racial/ethnic minority community since 2003, according to the Census Bureau – almost 20 years. The 2020 Census should – absent some overwhelming, disparate undercount – confirm the continued significant growth of the Latino population. Although we will not have decennial Census data by subpopulation until August, the Census Bureau's American Community Survey (ACS) estimates show that Latinos accounted for just over half of the entire nation's population growth between 2010 and 2019. And, with respect to potential voting power, ACS data estimates that Latinos made up over 44 percent of the entire nation's growth in citizen, voting-age population (CVAP), a suitable proxy for eligible voters, between 2009 and 2019.

This substantial and ongoing increase in Latino voter population has unfortunately resulted in Latinos becoming central to numerous false assertions of "voter fraud." This has frequently taken the specific form of suggestions, without any proof ever having been surfaced, that Latino immigrants who are not yet citizens are voting in substantial numbers. It is almost as though some political forces cannot and will not accept growth in the Latino electorate as the result of anything other than significant non-citizen voting. Historically, the false notion of non-citizen voting has resulted in the enactment of new and more onerous voter identification

requirements, new requirements to provide documentary proof of citizenship in order to register to vote, limitations on voter assistance in Spanish and other languages, attempts to proliferate in Spanish false information about voting in certain communities, discriminatory targeting of in-person and absentee voters for challenge based on Latino surname, and even in attempts to intimidate less experienced voters through the stationing of uniformed guards at polling places.

For example, MALDEF is currently challenging an Arkansas law that arbitrarily limits the number of voters that an individual may assist in casting a ballot, in plain contravention of the federal VRA. Recently, MALDEF and others also had to challenge an attempt to purge thousands of naturalized voters in Texas, who were targeted through Motor Vehicles data that the state knew were outdated and would not reflect recent naturalizations. In the past, we have challenged numerous other restrictions on access to the ballot that plainly targeted the growing Latino voting community.

In addition to ballot access restrictions, attempts to limit the growth of Latino voting power have also taken the form of perverted structures of governance – the perpetuation or re-introduction of at-large voting or the failure to acknowledge and incorporate the growth of the Latino community in the decennial redistricting process.

As a rapidly growing population, Latinos are regularly and increasingly seen as a threat to those, of whatever political party, currently holding substantial political power. As a result of this perceived threat to incumbents, the Latino community regularly faces violations of the VRA in redistricting. Those in power, whether at federal, state or local level, think about the perceived threat from the growing Latino voter pool in racial terms, even if that perspective is not explicitly acknowledged, and the violations of the VRA take conspicuously racialized forms even if

justified in other terms – of seniority protection for incumbent legislators, of competitiveness, or of continuity of representation, for example.

Last decade, the state of Texas gained four congressional seats as a result of its comparatively rapid population growth over the course of the aughts. Nearly two-thirds of that Texas population growth came in the Latino community. Still, in adopting a new congressional district map, the Texas legislature drew none of the four new districts within the Latino community, instead engaging in splitting the increased concentrations of Latino population among multiple districts in order to prevent Latino voters from electing candidates of choice. It took nearly a full decade of litigation under the VRA, waged by MALDEF and others, to ensure that an interim map, more respectful of the growing Latino community, would remain in place to protect Latino voters.

In one of the very first lawsuits to challenge a change made after the protections of VRA pre-clearance were removed by the Supreme Court in 2013 in *Shelby County v. Holder*, MALDEF challenged the conversion of the Pasadena, Texas city council from a configuration of eight districted seats to six districted seats and two at-large seats. This change was plainly undertaken to prevent the growing Latino voting population from electing a majority of the city council; participation differentials virtually ensured that the white population would elect its choices for the at-large seats in elections characterized by a racially-polarized vote. The case went to trial, following which the district court judge held that not only would the change have the effect of unlawfully diluting the Latino vote, but it was made intentionally to accomplish that aim. This resulted in the first contested "bail in" order, requiring Pasadena to pre-clear future electoral changes. However, again, that favorable outcome followed lengthy and costly trial preparation and trial.

Unfortunately, Texas is not a particular outlier when it comes to incumbents misusing the redistricting process to prevent the Latino community from exercising the political power that its population growth would warrant. Also ten years ago, MALDEF identified eight counties in the state of California that should have drawn an additional Latino-majority district on their five-member county board of supervisors, but failed to do so. This was almost entirely because creating a new Latino-majority district would threaten the continuity in office of one or more incumbent members of the board of supervisors. Even with unlimited resources, challenging eight jurisdictions through litigation under section 2 of the VRA -- with its arduous “totality of the circumstances” test, would be daunting -- if not impossible. After attempting unsuccessfully to secure state legislation to streamline the possible challenges, MALDEF was left with the ability to sue only one of the eight counties. While we successfully challenged Kern County in the first section 2 litigation to go to trial in California in well over a decade, seven other counties were able to leave their VRA-violative district maps in place throughout the decade.

With even more growth in the Latino population – and dozens of local jurisdictions in California converted from at-large elections to districted elections through the California Voting Rights Act (CVRA) going through their first redistricting ever – MALDEF expects the redistricting process to be even more challenging this year than a decade ago. There is simply no way that non-profit voting rights litigators, even supplemented by the work of a reinvigorated Department of Justice Civil Rights Division, could possibly prevent the implementation of all of the undue ballot-access restrictions and redistricting violations that are likely to arise in the next two years.

As the Latino community emerges from several years of being targeted in an unprecedented politicization of the decennial Census – with at least three different attempts by

the Trump administration to eliminate millions of Latinos from the useable Census count – we need the Congress to act to expand the protection of voting rights nationwide. The attempt at statistical genocide undertaken through the Census will embolden even more challenges to the rights of Latinos to participate in the electoral process, because Trump and others through that attempt have clearly signaled to their most extreme supporters that Latinos are a political threat.

These voting rights challenges, if unaddressed by legislation or litigation, are not just a danger to the participation of the Latino voting community, but a challenge to our democracy. This is not a time to shrink from our efforts to encourage even broader participation of all eligible citizens in voting. Congressional action to preserve voting rights is essential as we commence redistricting and as we face the continued false evocation of phantom threats used to justify the targeting of all voters of color. Congressional action – or inaction – today will have a critical impact on the enduring condition of our democracy five years from now.

Chairman BUTTERFIELD. And we thank you for your testimony. At this time, the Chair will recognize Ms. Nelson for five minutes.

Ms. Nelson.

#### **STATEMENT OF JANAI NELSON**

Ms. Nelson. Good morning. Thank you very much for allowing me to testify, Chair Butterfield, Ranking Members Steil and Davis, and members of the committee.

My name is Janai Nelson, and I am the Associate Director-Counsel at the NAACP Legal Defense and Educational Fund.

Since our founding in 1940 by Thurgood Marshall, LDF has led the fight to secure, protect, and advance the rights of Black voters.

Despite the guarantees of the 14th and 15th Amendments and the Voting Rights Act, however, racial discrimination and targeted suppression of Black voters persists. And in the infamous 2013 Supreme Court decision *Shelby County v. Holder*, we saw the beginnings of voter suppression metastasize in our country.

By disabling Section 5 of the Voting Rights Acts, *Shelby* unleashed systematic attacks on the voting rights of racial and language minorities.

Yet, one of the solutions to this assault on our democracy lies in the very decision that instigated it. And writing for the 5–4 majority of the Court, Chief Justice Roberts expressly invited Congress to update Section 5’s preclearance formula to reflect modern conditions.

For 8 years, though, Congress has failed to act, leaving voters of color under attack and leaving our democracy at risk.

In LDF’s report, “Democracy Diminished: State and Local Threats to Voting Post-*Shelby*,” we have maintained an ongoing catalog of the discriminatory voting changes in jurisdictions formerly protected by Section 5, changes that preclearance likely would have prevented.

Without Section 5, we must now rely on case-by-case litigation under the Constitution and under another provision of the Voting Rights Act, Section 2, which has now become the primary statutory check on racial discrimination in voting.

In fact, according to the U.S. Commission on Civil Rights, in the first 5 years following *Shelby*, an unprecedented 61 lawsuits were filed under Section 2 of the Voting Rights Act. Twenty-three of these cases were successful. By contrast, in the 5 years before *Shelby*, only five Section 2 cases were won.

This means that after *Shelby*, after Section 5 was disabled, the rate of successful Section 2 litigation quadrupled. And these cases arose predominantly in jurisdictions formerly covered by Section 5.

I will give you a few examples.

In 2013, LDF sued the State of Texas to stop implementation of its discriminatory voter ID law, a law previously blocked by Section 5 which Texas revived within hours of the *Shelby* decision.

That litigation produced multiple court findings that Texas’ voter ID law violated Section 2, including a finding of intentional racial discrimination against Black and LatinX Texans. But by 2018, when the case concluded, thousands of voters have been disenfranchised in hundreds of State, local, and Federal elections.

In 2016, the largely White city of Gardendale, Alabama, attempted to secede from the more racially diverse Jefferson County School Board, which would have transferred Black voters from a districted election system where they have some representation to an at-large system where they have no representation. The 11th Circuit blocked secession in 2018 after LDF successfully proved Gardendale was motivated by racial discrimination.

In 2018, LDF also filed a suit on behalf of students at Prairie View A&M University, a historically Black university in Waller County, Texas. The county had refused to provide equal early voting access on the university's campus, even though students lack transportation and rely on early voting to access the franchise. That litigation is ongoing.

In 2019, LDF and our allies sued to stop Florida from requiring people with past felony convictions to pay all fines and fees before registering to vote, a legislative overreach that contradicted the will of Florida voters in passing Amendment 4. However, the 11th Circuit reversed the district court's favorable ruling and blocked thousands of returning citizens from voting.

In 2020 alone, we have filed five Section 2 cases. And this year, in 2021, we have filed two more challenging voter suppression bills in Georgia and in Florida.

But, as my colleagues have said, this case-by-case litigation is no match for this national democracy crisis. This year alone, at least 14 States have rolled back early and mail voting, added new hurdles for voter registration, imposed burdensome and unnecessary voter identification requirements, stripped power from State and local elections to enhance voting access, and taken other steps to make voting more difficult.

Litigation is a blunt instrument. It is costly and slow. Victories typically come only after a law has been in place for several elections, irreparably harming countless voters. Preclearance is necessary because it blocks these discriminatory voting laws and changes.

In fact, the recent wave of voter suppression bills would likely never have been introduced under preclearance. The deterrent effect was Section 5's genius. It stopped discrimination before the harm occurred.

We urgently need that prophylactic legislation now. It is unacceptable that in 2021, 56 years after the VRA's passage, the right to vote remains so very underprotected.

The celebrated turnout in registration rates among Black voters occurred despite a litany of unequal obstacles and because of Herculean efforts by civil rights groups, organizers, and activists, and Black voters' sheer determination and resilience. This model is not sustainable nor is it acceptable.

We urge Congress—

Chairman BUTTERFIELD. Ms. Nelson, your time is expired. I hate to break the news to you, but your time—you may complete the sentence.

Ms. Nelson. Thank you. We urge Congress to safeguard the integrity of our democracy and fulfill the generations-long project of perfecting our Union.

Thank you very much for your time.

[The statement of Ms. Nelson follows:]

Committee on House Administration  
Subcommittee on Elections**

**“Voting in America: A National Perspective on the Right to Vote, Methods  
of Election, Jurisdictional Boundaries, and Redistricting”**

**June 24, 2021**

Good morning, Chair Lofgren, Ranking Member Davis, and members of the Committee. My name is Janai Nelson, and I am Associate Director Counsel at the NAACP Legal Defense and Educational Fund, Inc. ("LDF"). Thank you for the opportunity to testify this morning on some of LDF's efforts to protect and expand the voting rights of Black people through litigation and other forms of advocacy and to share some of what we have observed with regard to the proliferation of barriers to voting since the U.S. Supreme Court's decision in *Shelby County, Alabama v. Holder* in 2013.<sup>1</sup>

Since its founding in 1940 by Thurgood Marshall, LDF has been a leader in the fight to secure, protect, and advance the voting rights of Black voters and other communities of color. LDF was launched at a time when the nation's aspirations for equality and due process of law were stifled by widespread state-sponsored racial inequality in every area of life. Through litigation, public policy, and public education, LDF's mission has remained focused on seeking structural changes to expand democracy, eliminate disparities, and achieve racial justice in a society that fulfills the promise of equality for all Americans. In advancing that mission, protecting the right to vote for African Americans has been positioned at the epicenter of our work. Beginning with *Smith v. Allwright*,<sup>2</sup> LDF's successful U.S. Supreme Court case challenging the use of whites-only primary elections in 1944, LDF has been fighting to overcome a myriad of obstacles to ensure the full, equal, and active participation of Black voters.

The importance of the right to vote to the integrity of our democracy cannot be overstated. Indeed, Thurgood Marshall—who litigated LDF's watershed victory in *Brown v. Board of Education*,<sup>3</sup> which set in motion the end of legal segregation in this country and transformed the direction of American democracy in the 20th century—referred to *Smith v. Allwright*, the case that outlawed all-white primaries, as his most consequential case. He held this view, he explained, because he believed that the vote, and the opportunity to access political power, was critical to fulfilling the guarantee of full citizenship promised to Black people in the 14th Amendment to the U.S. Constitution. LDF has prioritized its work protecting the right of Black citizens to vote for over 80 years—representing Martin Luther King Jr. and the marchers in Selma, Alabama in 1965, litigating seminal cases interpreting the scope of the Voting Rights Act, and working in communities across the South to strengthen and protect

---

<sup>1</sup> *Shelby Cnty., Ala. v. Holder*, 570 U.S. 529 (2013).

<sup>2</sup> 321 U.S. 629 (1994).

<sup>3</sup> 347 U.S. 483 (1954).

the ability of Black citizens to participate in the political process free from discrimination.

Despite the guarantees of the 14th and 15th Amendments, the Voting Rights Act (“VRA”), and other federal voting rights statutes, racial discrimination and targeted suppression of the Black vote persists, and the need for litigation by LDF and other civil rights organizations has not abated. Indeed, in the years since the infamous 2013 Supreme Court decision in *Shelby County, Alabama, v. Holder*,<sup>4</sup> methods of voter suppression have metastasized across the country. LDF helped to litigate the *Shelby* case, including presenting argument in the Supreme Court in defense of the constitutionality of Section 5 of the Voting Rights Act and importance of pre-clearance to the protection of voting rights. The Supreme Court’s decision in *Shelby*, disabling this key provision, has had a devastating effect on the voting rights of racial, ethnic, and language minorities in this country. In that decision, Chief Justice John Roberts invited Congress to update the Voting Rights Act to respond to modern conditions. In the eight years since *Shelby* was decided, however, Congress has failed to do so, leaving voters of color—and our democracy—unprotected.

#### **Significance of the Voting Rights Act and the *Shelby* Decision**

The end of the Civil War has been described as this nation’s “Second Founding.”<sup>5</sup> It was then that the United States undertook efforts to amend our Constitution to provide Congress with substantial, affirmative power to finally enforce the principle espoused by the Founders, that *all* are created equal, and that access to the franchise is the cornerstone of citizenship and democracy. Importantly, the 14th and 15th Amendments to the Constitution also provided new, specific authority for Congress to defend equal rights, stating that Congress *shall* have power to enforce the Amendments through appropriate legislation.<sup>6</sup>

The Civil Rights Amendments give Congress the explicit power to enforce the guarantee of equal protection and protection against voting discrimination based on race. Yet for nearly 100 years after the ratification of those Amendments, as Black

---

<sup>4</sup> 570 U.S. 529 (2013).

<sup>5</sup> See generally Eric Foner, *The Second Founding: How the Civil War and Reconstruction Remade the Constitution* (2019).

<sup>6</sup> U.S. Const. amend. XIII, § 2 (“Congress shall have power to enforce this article by appropriate legislation.”); U.S. Const. amend. XIV, § 5 (“The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.”); U.S. Const. amend. XV, § 2 (“The Congress shall have the power to enforce this article by appropriate legislation.”).

people were systematically disenfranchised by poll taxes,<sup>7</sup> literacy tests,<sup>8</sup> property requirements,<sup>9</sup> threats,<sup>10</sup> and lynching.<sup>11</sup> Congress abdicated its obligation to use its enforcement powers. Post-Reconstruction, state and private actors subjected Black Americans to racial violence and flagrant discrimination in all areas of life, including education, employment, healthcare, housing, and transportation, which increased the suppressive force of many voting policies, whose very success was premised on the existence of racial discrimination in other aspects of social, economic, and political life.<sup>12</sup>

Congress finally took up its charge by passing the Voting Rights Act of 1965 (“VRA”), compelled by the Civil Rights Movement generally, and the violent events of Bloody Sunday in Selma, Alabama, specifically. The VRA fulfilled the promise of the 15th Amendment that the right to vote should not be denied because of race, color or previous condition of servitude, as well as the 14th Amendment’s guarantee of equal protection under the law. Its purpose was ambitious: to finally “banish the blight of racial discrimination in voting.”<sup>13</sup> The VRA enshrined our most fundamental values by guaranteeing to all citizens the right to vote, which the Supreme Court has called “preservative of all rights.”<sup>14</sup> In many ways, the VRA made the promise of the Civil Rights Amendments a reality and legitimized our democracy for the first time in our history.<sup>15</sup> Among the most transformative of the civil rights statutes passed in the

1960s,<sup>16</sup> the Voting Rights Act has been justly described as “the crown jewel” of the Civil Rights Movement.

Moreover, the VRA’s preclearance provisions brought profound changes to the country. The VRA was successful at dismantling the continuation of Jim Crow subjugation in the electoral arena specifically because of the preclearance process’s prophylactic design. Previously, when the Department of Justice obtained favorable decisions striking down suppressive voting practices, states merely enacted new discriminatory schemes to restrict Black people from voting. In establishing the preclearance framework of the VRA, Congress, therefore, “had reason to suppose that these States might try similar maneuvers in the future in order to evade the remedies for voting discrimination contained in the [Voting Rights Act] itself.”<sup>17</sup> Section 5 of the VRA was expressly designed to address not only then-existing discriminatory voting schemes but also to address the “ingenious methods”<sup>18</sup> that might be devised and used in the future to suppress the full voting strength of African Americans. Section 5 preclearance was an efficient, effective, and *necessary* mechanism for detecting and redressing the many forms of voting discrimination *before* elections took place.

Unfortunately, the Supreme Court’s decision in *Shelby* brought an abrupt halt to the successes of the VRA’s preclearance provisions. As the late Justice Ruth Bader Ginsberg noted in her dissent to the *Shelby* decision: “Throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet.”<sup>19</sup> The *Shelby* decision allowed state and local governments to unleash discriminatory voter suppression schemes virtually unchecked.<sup>20</sup> At its pre-*Shelby* strength, Section 5 would have prevented many of the voter suppression schemes that we have encountered since 2013.

Today, our nation is at a critical juncture in the decades-long struggle to create, maintain, preserve, and ensure true equality of voting rights for all citizens. For the

<sup>16</sup> See *Nw. Austin, Mun. Util. Dist. No. One v. Holder*, 557 U.S. 193, 198, 201 (2009) (the “historic accomplishments of the [VRA] are undeniable”).

<sup>17</sup> *South Carolina v. Katzenbach*, 383 U.S. 301, 314, 335 (1966). As Chief Justice Earl Warren explained: “Congress concluded that the unsuccessful remedies which it had prescribed in the past would have to be replaced by sterner and more elaborate measures.” *Id.* at 30.

<sup>18</sup> U.S. Congress, House, Committee on the Judiciary Voting Rights, 89th Cong., 1st sess., 1965, Mar. 18-19, 23-25, 20 Apr. 1, 1965.

<sup>19</sup> *Shelby County*, 570 U.S. at 590 (Ginsburg, J., dissenting).

<sup>20</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States: 2018 Statutory Report* (2018), [https://www.usccr.gov/pubs/2018/Minority\\_Voting\\_Access\\_2018.pdf](https://www.usccr.gov/pubs/2018/Minority_Voting_Access_2018.pdf).

first time in more than half a century, we enter a redistricting cycle without the protection of preclearance under Section 5 of the Voting Rights Act. At the same time, with voter suppression intensifying at the local and state levels, the right to vote for Black people and other people of color is facing its greatest threat in decades.

Of course, Black voters and other voters of color still have Section 2 of the Voting Rights Act, the provision that authorizes private actors and the U.S. Department of Justice to challenge discriminatory voting practices in the federal courts. Section 2 applies nationwide and places the burden on voters harmed by voting discrimination to bring litigation to challenge a law that has discriminatory results and/or a discriminatory purpose.<sup>21</sup> Section 2's "permanent, nationwide ban"<sup>22</sup> on racially discriminatory dilution or denial of the right to vote is now the principal tool under the VRA to block and remedy these new discriminatory measures.

As a result of litigation brought under Section 2, the 14th and 15th Amendments to the U.S. Constitution, and other provisions, some federal courts are serving as democracy's checkpoint, reviewing extensive evidence and ruling that some of the most egregious forms of discriminatory voting changes are unconstitutional and/or violate the VRA. Racial minorities are currently facing an array of schemes designed to restrict and suppress their participation at *every phase of the democratic process*—from their eligibility to vote, to their ability to register to vote, access a polling place or apply for an absentee ballot, and cast a ballot that is counted.

However, as discussed below, litigation is slow and costly—and court victories may come only after a voting law or practice has been in place for several election cycles. All the while, critical elections for the presidency, congress, state legislative seats, and scores of seats at the local levels have come and gone. Individual voting-rights lawsuits filed under Section 2 or other provisions, simply put, cannot substitute for the prophylactic power of Section 5 preclearance.

The extensive record of discriminatory voting practices enacted since *Shelby* demands that Congress fulfill its constitutional obligation to protect voters from an onslaught of new and "ingenious methods" of voter discrimination.

#### **Generational Obligation to Protect the Right to Vote**

It is unacceptable that in 2021—56 years after the passage of the Voting Rights Act—the right to vote remains under threat.

---

<sup>21</sup> 52 U.S.C. § 10301(a).

<sup>22</sup> *Shelby County*, 570 U.S. at 537.

However, Congress purposefully designed Section 5 to address our current crisis. Congress's predecessors on both sides of the aisle and with the signature of presidents from both major political parties supported for nearly 50 years Section 5, a provision meant to address racial discrimination in voting and block any practices and procedures which may result in discrimination before they are implemented, elections are held, and harms to voters occur. This was an explicit intention of Congress in 1965, which expressly sought to prevent not only then-existing discriminatory voting schemes, but to also prevent the "ingenious methods" that might be devised to suppress votes in the future.<sup>23</sup>

The passage of the VRA was spurred by the grassroots activism of thousands across the country, and especially in the South, who faced down billy clubs, police dogs, and vitriol from white mobs in order to secure the unencumbered right to vote. It was the result of the tremendous sacrifice of those beaten on the Edmund Pettus Bridge, including the late Congressman John Lewis, the martyrdom of Medgar Evers, Jimmie Lee Jackson, Viola Gregg Liuzzo, Andrew Goodman, James Chaney and Michael Schwerner and so many unnamed others<sup>24</sup> that proved crucial in ensuring that the federal government take seriously its duty to affirmatively enforce the right to the franchise. In short, the right to vote that we enjoy today was forged by courageous people who demanded change and demanded the protection and expansion of the franchise. The activists and protestors and organizers of today are carrying the torches of change, lit during the struggle for freedom from slavery and sustained during the Civil Rights Movement throughout the 1960s, to ensure that the next generation can exercise the right to vote as a tool for transformation.

It is the heroism of the average American to speak out, protest and demand change when faced with injustice, that we see again today in the calls for federal legislation to protect the right to vote. It is the obligation of this generation of lawmakers to respond to their call and ensure that the hard-won gains of the past are not lost. People and institutions across the country have decried the onslaught of voting restrictions, from influential Black executives in corporate America, corporations like Coca Cola and Delta Airlines,<sup>25</sup> sports associations like Major

---

<sup>23</sup> U.S. Congress, House, Committee on the Judiciary *Voting Rights*, 89th Cong., 1st sess., 1965, Mar. 18-19, 23-25, 20- Apr. 1 1965.

<sup>24</sup> Marty Roney, *Remembering the Martyrs of Bloody Sunday*, USA Today (Mar. 7, 2015), <https://www.usatoday.com/story/news/nation/2015/03/03/bloody-sunday-martyrs/24344043/>; Deborah Barfield Berry, "*Bloody Sunday*" pilgrimage to move through Miss., USA Today (Feb. 10, 2014), <https://www.usatoday.com/story/news/nation/2014/02/10/civil-rights-pilgrimage/5376225/>.

<sup>25</sup> Andrew Ross Sorkin & David Gelles, *Black Executives Call on Corporations to Fight Restrictive Voting Laws*, New York Times (March 31, 2021).

League Baseball,<sup>26</sup> film industry icons,<sup>27</sup> religious leaders,<sup>28</sup> and more. In 2020, we saw thousands of people risk contracting the deadly COVID-19 virus in order to exercise their full rights as American citizens by voting.<sup>29</sup> The ability to participate in civic life—to have a voice in choosing the elected officials whose decisions impact our lives, families, and communities—is at the core of citizenship.

Congress has the explicit constitutional duty to protect the right of every eligible person to vote, and to ensure that each vote counts. Congress' power remains undiminished and, in fact, includes the power to impose prophylactic measures to combat discriminatory election laws and practices before they take effect.

The people call on Congress once again to use the power enshrined in the Constitution, and entrusted to this body, to ensure the franchise for all citizens and to build a 21<sup>st</sup> century democracy that is representative of, and responsive to, our growing and diverse nation. Congress must seize this moment to take courageous action. Indeed, it is the obligation of this Congress to continue to uphold the principles of democracy—and to continue the great tradition of perfecting our union by protecting the right to vote.

#### **Discriminatory Election Changes post-Shelby**

Since the Supreme Court's *Shelby* decision, states and localities have unleashed countless schemes that seek to deny or abridge the rights of voters of color. Indeed, every year since 2013, communities of color throughout our country have sought to vote and participate equally and meaningfully in the political process without the core protections of the Voting Rights Act. And every year since the *Shelby* decision, restrictive and suppressive voting changes are implemented

<sup>29</sup> Jocelyn Stewart, *People Died So I Could Vote*, Time Magazine (Sep. 23, 2014) <https://time.com/3423102/people-died-so-i-could-vote/>.

that would have been blocked by Section 5. Numerous reports<sup>30</sup> have catalogued these suppressive practices—including strict voter identification laws, unfair purging, cuts to early voting, and eliminating polling places—utilized in many states and jurisdictions throughout the country.

Since 2008, LDF has monitored elections through our Prepared to Vote initiative (“PTV”). Our PTV initiative places LDF staff and volunteers on the ground for primary and general elections every year to conduct non-partisan election protection, poll monitoring, and to support Black political participation in targeted jurisdictions—primarily in the South.

LDF is also a founding member of the non-partisan civil rights Election Protection Hotline (1-866-OUR-VOTE), administered by the Lawyers’ Committee for Civil Rights Under Law. The Election Protection hotline coalition works year-round to ensure that all citizens have an equal opportunity to vote and have that vote count. Election Protection provides Americans from coast to coast with comprehensive information and assistance at all stages of voting—from registration to absentee and early voting, to casting a vote at the polls, and overcoming obstacles to their participation.

Accordingly, our PTV initiative equips voters with non-partisan educational information about how to comply with confusing, onerous, or newly changed election laws, including burdensome registration requirements, stringent voter ID laws, and strict absentee qualifications. On election day, PTV volunteers visit polling sites

---

<sup>30</sup> In 2014, the Lawyer’s Committee organized the National Commission on Voting Rights which issued a report documenting ongoing voting discrimination. National Commission on Voting Rights, *Protecting Minority Voters: Our Work Is Not Done* (2014), <http://votingrightstoday.org/ncvr/resources/discriminationreport>; In 2016, the Leadership Conference on Civil and Human Rights released a report before the first presidential election conducted without the full safeguards of the VRA detailing polling place reductions on a massive scale in many of the jurisdictions that were once protected by Section 5 of the VRA. The Leadership Conference Education Fund, *The Great Closure Report*, Civilrights.org, (Nov. 2016) <http://civilrightsdocs.info/pdf/reports/2016/poll-closure-report-web.pdf>; In 2018 the Leadership Conference published a report finding 1,688 polling place closures between 2012 and 2018, almost double the 868 closures found in their 2016 report. The Leadership Conference Education Fund, *Democracy Diverted: Polling Place Closures and the Right to Vote*, (Sep. 2019) [democracydiverted.org](http://democracydiverted.org); Leading up to the 2018 midterm elections the United States Commission on Civil Rights presented a report to the 116<sup>th</sup> Congress with urgent recommendations regarding the protection of voting rights across the nation. U.S. Commission on Civil Rights, *U.S. Commission on Civil Rights Urges Congress to Prioritize Civil Rights Oversight and Legislation*, Dec. 7, 2018, <https://www.usccr.gov/press/2018/12-07-Priorities-for-116th-Congress.pdf>; The Election Protection Coalition amassed extensive data evidencing systemic barriers faced by voters in Georgia, Texas, Florida and North Dakota. Laura Grace & Morgan Conley, *Election Protection 2018 Midterm Elections Preliminary Report*, (2018) <https://866ourvote.org/wp-content/uploads/2019/01/Election-Protection-Preliminary-Report-on-the-2018-MidtermElections.pdf>.

to ensure voters are informed of their state's voting requirements, answer questions about how to comply with election laws, and, when necessary, engage in rapid response actions to ensure every eligible voter is able to cast a ballot. PTV plays a critical role in tracking, monitoring, and reporting practices that make it harder for Black people and other people of color to exercise the fundamental right to vote.

Through its report, titled "Democracy Diminished: State and Local Threats to Voting post-*Shelby County, Alabama v. Holder*," LDF tracks, monitors, and publishes a record of discriminatory voting changes in jurisdictions formerly protected by Section 5.<sup>31</sup> *Democracy Diminished* details the many tactics that state and local policymakers have implemented with alarming speed since the *Shelby* decision, including barriers to voter registration, cuts to early voting, purges of the voter rolls, strict photo identification requirements, and last-minute polling place closures and consolidations.

#### **2020 Election and Post-Election Assessment**

2020 was an unprecedented year in many respects. With the COVID-19 pandemic, the country faced not only a public health crisis, but also a threat to the very foundation of our democracy: free and fair elections. The staggering rate of transmission, infection, and death related to COVID-19 placed many voters in the unthinkable position of choosing to risk their health or lose their right as citizens to participate and vote. It cannot be overemphasized that voters were forced to make a life-risking choice in elections across the country because their government would not protect them.<sup>32</sup> The actions and lessons learned over the past year force us to reconsider the arc of voter suppression. We now know that we must be vigilant about fighting voter suppression from the stages of registration and participation in primaries to the counting and canvassing of ballots. Indeed, in the 2020 Election, efforts at voter suppression continued beyond Election Day: stoked and encouraged by the former President, misguided individuals across the country participated in a

---

<sup>31</sup> NAACP Legal Defense Fund, *Democracy Diminished*, LDF's Thurgood Marshall Institute, <https://www.naacpldf.org/wp-content/uploads/Democracy-Diminished-State-and-Local-Threats-to-Voting-Post-Shelby-County-Alabama-v.-Holder.pdf>

<sup>32</sup> *The Color of Coronavirus: COVID-19 Deaths by Race and Ethnicity in the U.S.*, APM Research Lab (last updated March 5, 2021), <https://www.apmresearchlab.org/covid/deaths-by-race>; *COVID-19 hospitalization and deaths by race/ethnicity*, Centers for Disease Control and Prevention (last updated March 12, 2021), <https://www.cdc.gov/coronavirus/2019-ncov/covid-data/investigations-discovery/hospitalization-death-by-raceethnicity.html>.

campaign to disrupt the counting and certification of the presidential election and ultimately to overturn its results.<sup>33</sup>

Accounts from LDF's Voting Rights Defender and PTV teams detailed in the LDF Thurgood Marshall Institute's report *Democracy Defended*,<sup>34</sup> reveal the depth and breadth of the issues voters faced on Election day. In sum, the 2020 election did not, as numerous news reports suggested, "go smoothly."<sup>35</sup> Voters overcame a litany of barriers and obstacles with determination and resilience. The Herculean efforts of civil rights groups, grassroots activists and civic groups proved critical to ensuring access to the polls for millions of voters. This model is not sustainable.

#### **LDF Voting Rights Litigation Post-Shelby and the Need for Prophylactic Legislation**

Without the protection of Section 5 of the Voting Rights Act, voters have had to rely on other provisions of the VRA and other laws to help protect the right to vote. Since the *Shelby* decision federal courts have struck down voting changes that violate the Constitution,<sup>36</sup> the 24th Amendment to the U.S. Constitution,<sup>37</sup> Sections 2 and 203 of the Voting Rights Act, and the Americans with Disability Act. Indeed, there have been at least nine federal court decisions finding that states or localities enacted racially discriminatory voting laws or practices intentionally, for the purpose of

<sup>37</sup> NAACP v. Billups, 554 F.3d 1340 (2009)

discriminating against Black voters, Latino voters, or other voters of color.<sup>38</sup> This fact should alarm us. In Texas, for example, a trial court held that the state enacted its strict voter ID law with the purpose of discriminating against Black and Latino voters.<sup>39</sup> In Wisconsin, a federal court struck down various voting restrictions under the Voting Rights Act, and found one, a limitation on hours for in-person absentee voting, based on intentional discrimination in violation of the Fifteenth Amendment.<sup>40</sup> And in North Carolina, the Fourth Circuit Court of Appeals found that the North Carolina legislature worked with “surgical provision” to ensure that its omnibus voting law would disproportionately disenfranchise African American voters.<sup>41</sup> These findings by federal courts are a shocking condemnation of our voting systems, and demonstrate what the unfettered post-*Shelby* world has wrought.

LDF has litigated challenges to many of these restrictive voter ID laws, absentee voting restrictions, and discriminatory early voting restrictions. LDF challenged President Trump’s Election Integrity Commission,<sup>42</sup> and currently remains in litigation against former President Trump and the Republican National Committee for their efforts to discredit the legitimacy of ballots cast by voters in cities with large Black populations.<sup>43</sup> LDF also sued the United States Postal Service (“USPS”) in 2020 to ensure the timely delivery of mail-in ballots cast in the November Presidential election and January special election in Georgia.<sup>44</sup>

While LDF also continues to vigorously pursue litigation to protect voting rights under Section 2 of the VRA, the U.S. Constitution, and other laws, we know

<sup>38</sup> See, e.g., *People First of Ala. v. Merrill*, 2020 WL 5814455 (N.D. 2020); *Jones v. Jefferson County Board of Education*, 2019 WL 7500528 (N.D. Ala. 2019); *Stout v. that this is not enough to fully protect the right to vote.<sup>45</sup> Below is a brief overview of selected litigation that LDF has brought post-*Shelby*, which is representative of the broad and persistent attack on voting rights that defines our national moment.

### Alabama

#### *Challenging Alabama's Discriminatory Photo ID Law*

In 2011, before the 2013 *Shelby* decision, the Alabama state legislature passed House Bill (HB) 19, a law which required voters to present a form of government-issued photo identification to vote.<sup>46</sup> The law also included a provision that would allow a potential voter without the required ID to vote if that person could be "positively identified" by two poll workers, a provision that harkened back to pre-1965 vouch-to-vote systems. Notably, although HB 19 passed the state legislature—alongside judicially recognized discriminatory redistricting plans<sup>47</sup>—and was sent to the Governor's desk in 2011, it was not implemented until after the *Shelby* decision in 2013—after the state no longer had to submit this and other voting changes to the federal government for review under Section 5.

As reports show, variations of photo ID laws across the country have a disproportionate and burdensome effect on African American and Latino voters.<sup>48</sup> HB 19 is no different. Record evidence shows that 118,000 already registered voters lack the photo ID required by this law.<sup>49</sup> Black and Latino voters are two times more likely than white voters to lack the required ID and Black voters are over four times more likely than other voters to have their provisional ballots rejected because of a lack of acceptable ID.

On top of imposing this unnecessary and discriminatory extra requirement to vote, in 2015 Alabama closed 31 driver's license issuing offices predominately in majority Black counties for the entirety of 2016—a presidential election year.<sup>50</sup>

<sup>49</sup> Appellant's Br., *Greater Birmingham Ministries v. Merrill*, No. 18-10151, 2018 WL 1135793, at \*3, 20-27 (11th Cir. Feb. 21, 2018).

<sup>50</sup> Mike Cason, *State to Close 5 Parks, Cut Back Services at Driver License Offices*, Alabama.com (Sept. 2015) [https://www.al.com/news/2015/09/state\\_announces\\_to\\_close\\_becau.html#incart\\_river\\_home](https://www.al.com/news/2015/09/state_announces_to_close_becau.html#incart_river_home).

Driver's licenses are the primary form of photo ID that most voters can and do use to vote. Alabama only reopened these offices in December 2016, after the election, because the U.S. Department of Transportation concluded that the closings were racially discriminatory in violation of the Civil Rights Act of 1964.<sup>51</sup>

LDF filed a federal lawsuit in December of 2015, arguing that HB 19 violated the Fourteenth and Fifteenth Amendments to the U.S. Constitution, and Section 2 of the VRA.<sup>52</sup> Representing Greater Birmingham Ministries, the Alabama NAACP and individual voters, we contended that voters of color without photo ID are more likely to lack transportation, and more likely to live below the poverty line than white voters without a required ID. This makes it extremely difficult—if not impossible—for many people to get to a location that issues photo IDs, even before accounting for other obstacles like taking time off work and being able to afford fees associated with obtaining an ID. We also challenged the “positively identify” provision of HB 19, which places voters at the mercy of poll workers to vote. Indeed, there are reported instances of people who have voted at the same location for decades but could not be “positively identified” by election officials who had just moved to the area. Unfortunately, a federal judge granted summary judgment to the Alabama Secretary of State in January 2018, denying relief to the plaintiffs represented by LDF, and the Eleventh Circuit affirmed this outcome in April 2021.<sup>53</sup>

#### *Alabama Absentee Voting During COVID-19*

On May 1, 2020, in response to the COVID-19 pandemic, LDF filed a lawsuit against Alabama Governor Kay Ivey, Secretary of State John Merrill, and others challenging Alabama's unduly burdensome absentee voting provisions.<sup>54</sup> Specifically, the suit challenged the requirement that an absentee ballot application be accompanied by a copy of a photo ID (the “Photo ID Requirement”); the requirement that an absentee ballot affidavit be notarized or signed by two witnesses (the “Witness

<sup>54</sup> *LDF, SPLC, and ADAP File Federal Lawsuit Challenging Alabama's Lack of Safe and Accessible Voting During COVID-19 Pandemic*, NAACP Legal Defense and Educ. Fund, Inc. (May 1, 2020), <https://www.naacpldf.org/press-release/ldf-sclc-and-adap-file-federal-lawsuit-challenging-alabamas-lack-of-safe-and-accessible-voting-during-covid-19-pandemic/>.

Requirement"); and the Secretary of State's policy prohibiting curbside voting (the "Curbside Voting Prohibition," collectively, the "Challenged Provisions").

In light of the COVID-19 pandemic, LDF alleged the aforementioned provisions would force thousands of Alabamians who were unable to meet the absentee voting requirements to make a choice between voting in person during the July primary runoff, August municipal elections, and November 2020 elections—and thereby risking their health—or forgoing their fundamental right to vote. In June 2020, the district court granted LDF's request for a preliminary injunction in part, enabling Alabamians to utilize no-excuse absentee voting for the state's July 14 primary runoff. The State of Alabama then extended the no-excuse policy for the November election. On September 8, 2020, a remote trial began with respect to the witness requirement, ID requirement, and *de facto* ban on curbside voting. On September 30, 2020, the District Court entered a 197-page favorable opinion and granted a permanent injunction against all three provisions challenged by LDF and co-counsel.<sup>55</sup> The injunction was in place for two weeks, during which time Alabama absentee voters were able to apply for absentee ballots without Photo ID or submit absentee ballots without two witness signatures or a notary stamp under the injunction. On October 13, 2020, the Eleventh Circuit stayed the injunction of the Photo ID and Witness Requirements but left in place the injunction of Secretary Merrill's *de facto* Curbside Voting Ban.<sup>56</sup> On October 21, 2020, the Supreme Court of the United States, by a 5-3 vote, stayed the permanent injunction of the Curbside Voting Ban, over a dissent by Justice Sotomayor, joined by Justices Breyer and Kagan.<sup>57</sup>

#### ***Attempted Secession in Gardendale, Alabama***

In 2016, the largely white City of Gardendale, Alabama attempted to secede from the more diverse Jefferson County School Board. The Gardendale secession would have effectively transferred Black voters in Gardendale from the County School Board's election system—in which Black voters have some ability to elect candidates of their choice and some representation—to the jurisdiction of the Gardendale city council's at-large election system in which Black voters have no

<sup>57</sup> *Merrill v. People First of Ala.*, <https://www.law.cornell.edu/supremecourt/text/20A67>

ability to elect candidates of their choice and no representation at all.<sup>58</sup> In 2018, the Eleventh Circuit blocked the secession after LDF successfully proved that Gardendale was motivated by racial discrimination.<sup>59</sup> Before *Shelby*, the Department of Justice had used Section 5 to block similar discriminatory school district secessions in Alabama and elsewhere.<sup>60</sup>

#### *Discriminatory Local Electoral Systems in Alabama*

Against the backdrop of statewide and local barriers to registration and voting, Black Alabamians also face electoral structures which minimize their power to elect their preferred candidates to local government.<sup>61</sup> Often times, these structures exist in the form of dilutive electoral methods and redistricting plans that disburse voters of color among many districts or pack them into too few districts.

Since *Shelby County*, LDF has warned officials in at least four local jurisdictions that the at-large aspects of their electoral systems may violate Section 2 of the VRA and potentially also the U.S. Constitution. This includes cases currently in litigation or other active advocacy in which we challenge at-large voting systems that have kept African Americans from electing their representatives of choice to various offices in Pleasant Grove, Madison County, Morgan County.<sup>62</sup> At-large elections can allow 51 percent of voters to control 100 percent of the seats on an elected body, which, in the presence of racially polarized voting and other structures, can dilute a racial minority group's voice in the electoral system. It is no surprise then that for decades congressional, state, and many local officials have been elected by districts.

### **Florida**

#### ***Challenging Legislative Attack on Voting Rights Restoration***

On November 6, 2018, the people of Florida voted to approve a state constitutional amendment, Amendment 4, to restore voting rights to more than 1.4 million people with felony convictions upon the completion of their sentences. The passage of Amendment 4 reflected the understanding that restoring returning citizens' voting rights strengthens public safety, reduces recidivism, and builds a healthy democracy for all.<sup>63</sup> Amendment 4 generated overwhelming bipartisan support, with a supermajority of Florida voters—more than 64 percent<sup>64</sup>—approving the measure, which resulted in the largest expansion of the electorate since Congress passed the Voting Rights Act in 1965. However, that same year, the Florida Legislature enacted SB 7066, a law that, among other requirements, mandated that people with past felony convictions pay all legal financial obligations (“LFOs”) imposed by a court pursuant to a felony conviction before they are eligible to vote, including those LFOs converted to civil obligations, even if they cannot afford to pay.

On June 28, 2019, LDF and other civil rights and good governance groups filed a lawsuit in the U.S. District Court for the Northern District of Florida challenging SB 7066.<sup>65</sup> We alleged that, by conditioning the right to vote on payment of LFOs, SB 7066 violates fundamental fairness and unconstitutionally burdens the right to vote under the Fourteenth Amendment, discriminates on the basis of wealth in violation of the Equal Protection Clause, violates the prohibition against poll taxes enshrined in the Twenty-Fourth Amendment, and imposes punitive sanctions in violation of the Ex Post Facto Clause. We further alleged that SB 7066 is unconstitutionally vague in violation of the Due Process Clause because Florida fails to provide returning citizens with sufficient information to determine whether LFOs continue to disqualify them from voting. Finally, we alleged that SB 7066 chills the voter registration activities of local organizations in violation of the First Amendment and that SB 7066 intentionally discriminates on the basis of race. On October 18, 2019, the district court granted a partial preliminary injunction, ordering that the individual Plaintiffs in the case must be permitted to vote because they have shown they cannot afford to

<sup>65</sup> *Gruver, et al. v. Barton, et al.*, No. 1:19-cv-121 (N.D. Fla. 2019).

pay their legal financial obligations.<sup>66</sup> In May 2020, the district court found SB7066 and its wealth-based hurdles to voting unconstitutional. The decision restored voting rights to thousands of citizens. The State appealed the decision to the Eleventh Circuit Court of Appeals *en banc* which reversed the district court, effectively denying the voting rights of thousands of people with past felony convictions.

***Ongoing Challenge to Florida's Omnibus Voting Bill (S.B. 90)***

On May 6, 2021, LDF filed a lawsuit on behalf of the Florida State Conference of the NAACP, Disability Rights Florida, and Common Cause against the Florida Secretary of State, challenging multiple provisions in SB 90, a bill signed into law by Governor DeSantis that same day, including: (i) new identification requirements for voters requesting vote-by-mail ("VBM") ballots; (ii) restrictions and new requirements for standing VBM applications; (iii) limitations on where, when, and how drop boxes can be used; (iv) limitations on third-party VBM ballot return; and (v) a vague and overbroad prohibition on conduct near polling places, including likely criminalizing offering free food, water, and other relief to Florida voters waiting in long lines. This litigation is in progress.

**Georgia**

***At-Large Voting in Fayette County, Georgia***

In 2015 in Fayette County, Georgia, the County Commission tried to revert to an at-large voting system in a special election to replace a Black Commissioner who had died unexpectedly. LDF won a Section 2 ruling that stopped this change and required the election to use single-member districts, which allowed Black voters to again elect their preferred candidate.<sup>67</sup>

***Ongoing Challenge to Georgia's Omnibus Voting Bill (S.B. 202)***

Since the *Shelby* decision, the State of Georgia has enacted voting restrictions across five major categories studied by the U.S. Commission on Civil Rights: voter identification requirements, documentary proof of citizenship requirements, voter purges, cuts to early voting, and polling place closures or relocations. These barriers have made voting materially more difficult for historically disenfranchised communities, including voters of color, voters with disabilities, older voters, student voters, and voters experiencing poverty.

---

<sup>66</sup> P.R. Lockhart, *A controversial Florida law stops some former felons from voting. A judge just blocked part of it.*, Vox.com (Oct. 19, 2019), <https://www.vox.com/policy-and-politics/2019/7/2/20677955/amendment-4-florida-felon-voting-rights-injunction-lawsuits-fines-fees>.

<sup>67</sup> Ga. State Conf. of the NAACP v. Fayette Cty. Bd. of Comm'rs, 118 F.Supp.3d 1338 (ND Ga. 2015)

Despite these barriers, Georgia voters and Black voters, specifically, turned out in record numbers for the 2020 November General Election and 2021 January Runoff Election. This record participation occurred notwithstanding the global COVID-19 pandemic pandemic—a pandemic that has disproportionately harmed Black people. The integrity of the General Election and Runoff Election was repeatedly recognized, including with statements praising Georgia’s election system by its Governor, Secretary of State, and other top election officials.

Two days after the Runoff Election, and a day after the insurrection led by white supremacists, on January 7, 2021, the Georgia House Speaker David Ralston announced the creation of a Special Committee on Election Integrity (“EIC”). LDF, jointly with the Southern Poverty Law Center (“SPLC”), provided oral and written testimony throughout the session to oppose omnibus bills restricting access to the right to vote, arguing that these bills would disproportionately harm low-income and racial minority voters. Despite these concerns, the Georgia General Assembly refused to conduct any racial-impact study of these bills.

On March 17, 2021, with little notice to EIC members, let alone members of the public, an EIC member introduced a substitute bill to Senate Bill 202 (“S.B. 202”), which expanded from three pages to over ninety pages, only hours before a full hearing. With limited opportunity for meaningful engagement and review, the EIC rushed S.B. 202 through additional hearings. A little over a week later, on March 25, 2021, the House and Senate passed S.B. 202, followed by the Governor signing it into law during a closed-door session and days before the end of legislative session.

On March 30, 2021, LDF, along with the American Civil Liberties Union, ACLU of Georgia, SPLC, Wilmer Hale, and Davis Wright Tremaine, filed a lawsuit in the Northern District of Georgia challenging S.B. 202 on behalf of the Sixth District of the African Methodist Episcopal Church, the Georgia Muslim Voter Project, Women Watch Afrika, Latino Community Fund Georgia, and the Delta Sigma Theta Sorority, Inc. Plaintiffs raise the following federal constitutional and statutory voting claims: (1) intentional racial discrimination and discriminatory results under Section 2 of the VRA, (2) intentional racial discrimination under the Fourteenth and Fifteenth Amendments, (3) an unconstitutional burden on the right to vote under the First and Fourteenth Amendments; and (4) an unconstitutional burden on the right to freedom of speech and expression concerning the ban on line relief under the First Amendment. Plaintiffs are challenging S.B. 2020 for discrimination on the basis of disability under Title II of the American Disabilities Act, discrimination on the basis of disability under Section 504 of the Rehabilitation Act of 1973, and a violation of

the Civil Rights Act of 1964's prohibition on immaterial requirements to voting. This case is now proceeding to the next stages of litigation.

#### **Louisiana**

##### ***Discriminatory Judicial Districting in Terrebonne Parish, Louisiana***

In 2017, LDF proved that the Louisiana Legislature intentionally maintained at-large elections for the state courts in Terrebonne Parish to prevent the election of a Black judge. Under Section 2 of the VRA and the U.S. Constitution, LDF challenged Louisiana's use of at-large voting to maintain a racially segregated state court (32nd JDC), which has jurisdiction over Terrebonne Parish.<sup>68</sup> A Black candidate has never been elected as a judge on this court in a contested election. After the initial trial, the court ruled that the at-large electoral scheme for the 32nd JDC "deprives Black voters of the equal opportunity to elect candidates of their choice in violation of Section 2 of the Voting Rights Act of 1965, and it has been maintained for that purpose, in violation of Section 2 and [the Fourteenth and Fifteenth Amendments to the] United States Constitution."<sup>69</sup>

In early December 2018, the Court entered an order, determining that it would use a special master to help determine the appropriate remedy in this case. In April 2019, the special master issued his findings and recommendations to the Court about the remedial districting plan, and in July 2019, the Court adopted a plan recommended by the special master. Subsequently, the Court issued final judgment and an injunctive order. The next day, the Attorney General filed a notice of appeal. Oral argument before the Fifth Circuit Court of Appeals was held in January 2020. In June 2020, a three-judge panel of the Fifth Circuit reversed the district court's post-trial favorable decision—which found that plaintiffs clearly established vote dilution through experts who found some of the most stark racially-polarized voting anywhere in the country—and denied LDF's petition for rehearing *en banc*.

#### **Texas**

##### ***Discriminatory Voter ID Law***

For years, LDF prosecuted a statewide lawsuit against the State of Texas involving the state's photo ID law, SB 14—the same law previously blocked by Section

---

<sup>68</sup> *Terrebonne Par. Branch NAACP v. Jindal*, 274 F. Supp.3d 395, 462 (MD La. 2017).

<sup>69</sup> *Fifth Circuit Rejects Louisiana's Attempt to Prematurely Appeal Voting Rights Decision*, NAACP Legal Defense and Educ. Fund, Inc. (Nov. 14, 2017), <https://www.naacpldf.org/press-release/fifth-circuit-rejects-louisianas-attempt-to-prematurely-appeal-voting-rights-decision/>

5 in 2012.<sup>70</sup> SB 14 was widely described as the most restrictive voter ID law in the country as it permitted concealed hand-gun license owners to vote with that ID, a form disproportionately held by white Texans but prohibited the use of student ID, and employee or trial state or federal government-issued IDs in voting. After the State of Texas implemented SB 14 within hours of the *Shelby* decision,<sup>71</sup> LDF and other civil rights advocates challenged the law on behalf of individual voters and organizations, including Black college students, harmed by the strict photo ID law.<sup>72</sup>

In 2014, a federal district court struck down that photo ID law, holding that “SB 14 creates an unconstitutional burden on the right to vote, has an impermissible discriminatory effect against Hispanics and African Americans [i.e., they comprise a disproportionate share of the more than 600,000 registered voters and one million eligible voters who lack the requisite photo ID], and was imposed with an unconstitutional discriminatory purpose,” and that it “constitutes an unconstitutional poll tax.”<sup>73</sup> Following that decision, the Fifth Circuit U.S. Court of Appeals affirmed in 2016 that Texas’s ID law, SB 14, had a discriminatory impact on Black and Hispanic Texans. violated Section 2.<sup>74</sup> On remand, the trial court found that Texas had enacted the law for the purpose of discriminating against voters of color.<sup>75</sup>

Although LDF was ultimately successful in that litigation, in the years after the trial and while the case made its way twice to the 5th Circuit Court of Appeals and back to the trial court, Texas elected numerous candidates to state and federal office including: a U.S. senator, members of the Texas delegation to the U.S. House of Representatives, Governor, Lieutenant Governor, Attorney General, Controller, various statewide Commissioners, Justices of the Texas Supreme Court, state boards of education, state senators, members of the state House, state court trial judges, and over district attorneys.

#### ***Discriminatory Early Voting Schedules in Waller County, Texas***

In 2018, prior to Election Day, LDF received reports that students at Prairie View A&M University (“PVAMU”), a historically Black university located in Waller

<sup>70</sup> *Texas v. Holder*, 888 F.Supp.2d 113, 144-45 (D.D.C. 2012), vacated and remanded, \_\_\_ U.S. \_\_\_, 133 S. Ct. 2886 (2013).

<sup>71</sup> Ed Pilkington, *Texas rushes ahead with voter ID law after supreme court decision*, The Guardian (June 25, 2013), <https://www.theguardian.com/world/2013/jun/25/texas-voter-id-supreme-courtdecision>.

<sup>72</sup> *Veasey v. Perry*, 71 F. Supp. 3d 627, 693 (S.D. Tex. 2014).

<sup>73</sup> *Id.*

<sup>74</sup> *Veasey v. Abbott*, 830 F.3d 216 (5th Cir. 2016) (en banc).

<sup>75</sup> *Veasey v. Abbott*, 249 F. Supp. 3d 868 (S.D. Tex. 2017).

County, Texas, did not have adequate early voting sites or hours, and that county officials refused student requests to provide them. On October 22, 2018, LDF filed a federal lawsuit against officials in Waller County. County officials have long discriminated against Black voters at PVAMU and in the majority-Black City of Prairie View, dating back to at least the early 1970s.<sup>76</sup> During the 2018 election, the County provided fewer early voting opportunities to PVAMU students, as compared to other voters in Waller, despite students' reliance on this means of voting. During the first week of early voting, no polling sites were available anywhere in the City of Prairie View or on campus; in the second week, while Prairie View, where PVAMU is located, provided five early voting days, two of those were off campus at a site inaccessible to many PVAMU students who lack transportation. By contrast, in the majority-white city of Waller, voters had two locations to vote during the first week and, overall, 11 days of early voting. During the second week of early voting, two voting sites were open in Prairie View, but for considerably fewer hours than voting sites in Waller and other areas with larger white populations. On Wednesday, October 24—the eve of the 2018 election—LDF filed a motion for a temporary restraining order ("TRO") seeking an emergency change to Waller County's early voting schedule that would include early voting on-campus during the first week of early voting.

Later that same day, county commissioners in Waller County modestly expanded early voting in Prairie View by providing 5 hours of voting at the Prairie View City Hall on Sunday, October 28, and by extending the hours of early voting on the PVAMU campus to 7:00am to 7:00pm on Monday, October 29, through Wednesday, October 31.<sup>77</sup> Consequently, LDF withdrew its TRO request for emergency relief. However, LDF continued to litigate its claims under Section 2 of the Voting Rights Act and the 14th, 15th, and 26th Amendments to the U.S. Constitution on behalf of PVAMU students, who were still denied equal and adequate voting opportunities in the election under the modified plan. In the fall of 2020, LDF and our clients in Prairie View participated in a twelve-day trial for this lawsuit; post-trial briefing was completed in March of this year, and the parties are now awaiting the court's decision.

#### **Additional Representative Voting Rights Litigation**

---

<sup>76</sup> *The Walk of Political Engagement*, Prairie View A&M University (Mar. 31, 2017), <https://www.pvamu.edu/1876/2017/03/31/the-walk-of-political-engagement-at-pvamu/>.

<sup>77</sup> *Waller County Modestly Expands Early Voting in Prairie View, LDF's Suit Still Pending* NAACP Legal Defense and Educ. Fund, Inc. (Oct. 25, 2018), <https://www.naacpldf.org/press-release/waller-county-modestly-expands-early-voting-prairie-view-ldfs-suit-still-pending-2/>.

In addition to those cases where LDF is specifically involved, over the last few years, we also are aware of numerous states and localities across the country that have implemented laws and practices which impeded and/or discouraged individuals from exercising their right to vote. For example:

In North Dakota, we saw the state implement a law requiring voters to provide IDs with a residential street address, threatening to disenfranchise thousands of Native American people who live on rural reservations where residential addresses are uncommon.<sup>78</sup> Studies commissioned by Native American rights groups who sued to challenge the law revealed that roughly 35 percent of that population did not have an acceptable ID with a residential address.

In Dodge City, Kansas, voting was limited to one polling location, which was outside of town and inaccessible via public transportation. The nearest bus stop was more than a mile away and at times, freight trains in the area block traffic, slowing access to the polls. Dodge City's population is 60 percent Hispanic, and the voter turnout among Latinx voters is lower than the national average.<sup>79</sup>

And, in Wisconsin, the state implemented a law requiring voters to present a current driver's license, passport, or state or military ID to cast a ballot. There were substantial legal challenges to the state's voter ID law; however, aspects of it were allowed to stand for the 2016 election. Post-election surveys and other evidence clearly demonstrate that the law discouraged and/or prevented many people from exercising their right to vote.<sup>80</sup>

\*\*\*

With this sampling of challenges to voting at every stage of the voting process since *Shelby*, we should understand that there are numerous methods of voter suppression and that they are effective and successful in their goal: to confuse, discourage, make burdensome, or deny the right to vote. The intimidation and disenfranchisement of Black voters has always been central to the American story and the nation's attachment to white supremacy. Indeed, the loathsome methods of voter suppression that we see today, are not dissimilar from the methods of the past

---

in their intent or results. Much of what we see is a modernization of old tactics, a modernization of the poll tax and grandfather clauses. But we also see the same strategies used during the Jim Crow era—such as confusing and ever-changing registration requirements and discriminatory at-large election schemes. What is different from recent decades is that we are operating today without the protection of Section 5 of the VRA—at great costs to our democracy.

#### **Limits of Litigation**

As the summary of cases above demonstrates, voting rights litigation can be slow and expensive. The parties often spend millions litigating these cases.<sup>81</sup> The cases take up significant judicial resources.<sup>82</sup> And the average length of Section 2 cases is two to five years.<sup>83</sup> But, in the years during a case's pendency, thousands—and, in some cases, millions—of voters are effectively disfranchised. For these reasons, the need for prophylactic legislation is both urgent and acute. Litigation is a blunt instrument. The beauty and innovative genius of Section 5 preclearance review was that it allowed federal authorities to stop voting discrimination *before* it inevitably harmed voters in a variety of federal, state, or local elections.

#### **Need for Full Restoration and Enforcement of the Voting Rights Act**

When Congress reauthorized the VRA in 2006, it legislated against the backdrop of an unbroken line of Supreme Court authority holding that the VRA's preclearance process was a constitutional means for the Congress to ensure the equal right to vote.<sup>84</sup> Despite the devastating effect of the Court's *Shelby* decision, the Court did not overrule the constitutionality of a measured and properly tailored preclearance provision—nor did it render other such remedies inherently unconstitutional. The Court in *Shelby* held that the VRA's preclearance coverage formula was unconstitutional because it had not been updated since the 1970s, and therefore was not based on "current conditions."<sup>85</sup> But the Court's opinion left

---

<sup>85</sup> *Shelby County, Ala. v. Holder*, 570 U.S. 529, 554 (2013).

opportunity for Congress to establish a new preclearance framework responsive to current conditions. Indeed, the Supreme Court found preclearance a “stringent” and “potent” measure, fully available to Congress to deploy as an “extraordinary” tool to confront racial discrimination in elections and voting systems.<sup>86</sup> And, as noted above, Chief Justice Roberts expressly invited Congress to establish such a framework.<sup>87</sup>

In the previous century, the Constitution was amended only twelve times—each time with careful, deliberate consideration. That a Constitutional Amendment was devoted solely to the prohibition of racial discrimination in voting—and that the Amendment expressly delegated enforcement powers to Congress—underscores the extraordinary harm of the denial to vote based on race.<sup>88</sup> Further, the Supreme Court has long recognized that the Fifteenth Amendment’s prohibition on “sophisticated as well as simple-minded modes of discrimination”<sup>89</sup> endows Congress with extraordinary power to “use any rational means to effectuate the constitutional prohibition of racial discrimination in voting.”<sup>90</sup> A legislative remedy such as an updated preclearance mechanism would, therefore, be justified as an exercise of this extraordinary power.

Even one election in which the right to vote is restricted, threatened, diluted, denied, impeded, or violated, is one election too many. Violations of our electoral rights are not ordinary harms and must therefore be met with extraordinary remedies. An election conducted under conditions later found to be racially discriminatory has consequences that existing methods of defense cannot combat. The inability of the courts to retroactively correct these wrongs further disenfranchises and threatens to disengage voters who may understandably believe that their vote does not matter if discriminatory voting practices are left unchecked. Racially discriminatory practices in the electoral system have consequences that preclearance can prevent and correct. Preclearance was designed as a unique and powerful intervention to stop discrimination *before* elections take place.

It is not only imperative that Congress restore the VRA, but also that Congress *strengthen* the VRA to better address the ingenious methods that are, and will be, used to suppress the full voting strength of African Americans and people of color.

#### **The Need for Known Practices Coverage Protections**

---

<sup>86</sup> *Id.* at 545-46.

<sup>87</sup> *Id.* at 557.

<sup>88</sup> U.S. Const. amend. XV.

<sup>89</sup> *Gomillion v. Lightfoot*, 364 U.S. 339, 342, (1960) (quoting *Lane v. Wilson*, 307 U.S. 268, 275 (1939)).

<sup>90</sup> *South Carolina v. Katzenbach*, 383 U.S. 301, 324 (1966).

In addition to a preclearance requirement for states with a history of voting rights violations, a Known Practices Coverage (“KPC”) preclearance framework is necessary to address specific forms of voting discrimination that continue to threaten rights of voters of color. KPC would require preclearance for any voting policies or practices that pose a significant potential for violations of voting rights as demonstrated by broad historical experience. For example, the creation of at-large seats, annexations of suburban populations, and redistricting completed by incumbents all raise concerns when they occur in a jurisdiction that has experienced recent, significant growth of a specific minority population. Importantly, a KPC framework would require federal preclearance of voting practices that are known to correlate with racial or language-based discrimination only in jurisdictions that have a significant racial or language minority citizen voting age population. KPC combines a demographic threshold with the prevalence of specific, known practices of voting rights discrimination.

We urge Congress to take up the Court’s invitation to legislate to enforce the promise of an equal right to vote for all, and to employ the full force of its constitutional authority to protect the American voters from the extraordinary harm of denying or diminishing their right to vote.

#### **Proliferation of Suppressive Voting Measures in the States**

Today, we see a repeat of history. Justice Ginsburg, in her *Shelby* dissent, compared efforts to combat voter suppression in the states as similar to “battling the Hydra.”<sup>91</sup> According to Greek mythology, for every head cut off the Hydra, a mythical and monstrous creature, two more would grow in its place.<sup>92</sup> Preclearance was designed to address the Hydra problem—to eliminate adaptive, and unrelenting discriminatory voting practices.

Indeed, the Hydra problem is what we see unfolding in the states. Across the country, a resurgence of Jim Crow-style voter discrimination is targeting voters of color by restricting access to the ballot for Black, Latino, Asian American and Pacific Islander, and Native American communities. According to the Brennan Center, as of March 24<sup>th</sup>, state legislators have introduced over 360 bills with restrictive provisions in 47 states.<sup>93</sup> The states of Georgia, Florida, Iowa, Arkansas, and Utah have already

---

<sup>91</sup> *Shelby County*, 570 U.S. at 560 (Ginsburg, J., dissenting)

<sup>92</sup> *Hydra: Greek Mythology*, Britannica.com (last accessed May 24, 2021), <https://www.britannica.com/topic/Hydra-Greek-mythology>

<sup>93</sup> *State Voting Bills Tracker 2021*, Brennan Center for Justice (last updated May 28, 2021), <https://www.brennancenter.org/our-work/research-reports/state-voting-bills-tracker-2021>.

passed strict voter suppression legislation and several others stand poised to do the same in the coming weeks.<sup>94</sup>

A significant number of the most suppressive voting laws in the states are made possible by the Supreme Court's *Shelby* decision. That decision not only freed covered jurisdictions from their duty to report any changes in voting laws or rules to the federal government but signaled to jurisdictions throughout the country that the federal government would not screen for improper limits, restrictions, and barriers to voting participation.

Voting access left to the whims of state lawmakers has proven that the scourge of voter suppression reaches far beyond the states and jurisdictions previously covered by the VRA. The proliferation of state anti-voting laws across the country demonstrates the urgent need for Congress to bring the VRA's preclearance formula into the modern era, to reinstate federal oversight over discriminatory voting practices, and to strengthen and protect voting rights wherever suppression occurs. States have proven time and time again, that they are incapable of monitoring themselves and federal legislation is needed to protect voters.

### **Conclusion**

Congress has the constitutional authority to enact legislation that prevents the denial or abridgement of the right to vote on account of race today just as it did in 1965. The VRA's preclearance process provided a quick, efficient, and non-litigious way of addressing America's pervasive and persistent problem of voting discrimination, and most importantly to address it *before* the harm of disenfranchisement occurred. This Congress should not retreat from establishing a new preclearance framework that reflects the current conditions of the nation.

The VRA was drafted to rid the country of discrimination in voting—not to reduce discrimination to a level tolerable by some and now considered the norm across the country. The loss of the right to vote, or restrictions imposed on ballot access, even if ultimately vindicated, can never be fully remedied. The preclearance framework of the VRA was established expressly to address such harms. It is past time for Congress to fulfill its constitutional duty to the American people by once again taking up the charge of eradicating racial discrimination in voting and by renewing its commitment to protecting and strengthening the fundamental right to vote.

<sup>94</sup> *Voting Laws Roundup: March 2021*, Brennan Center for Justice (Apr. 1, 2021), <https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-march-2021>.

Chairman BUTTERFIELD. And thank you, Ms. Nelson. And would you please give my best regards to the LDF staff. I have a long-standing friendship and relationship with LDF.

You know, I get a lot of credit in North Carolina for voting rights litigation back in the 1980s, but much of that credit is overrated. It was the Legal Defense Fund that led the way and financed the lawsuits and did all of the heavy lifting in those cases.

So please give my regards to LDF. And I wrote down a few names that I recall during those days: Jack Greenberg, Napoleon Jones, Lani Guinier, Julius Chambers, Leslie Winner, Elaine Jones, Ted Shaw, and the list goes on and on.

And all of those people would not have been possible without Charles Hamilton Houston and Thurgood Marshall.

I just had to get that into the record, because it is accurate. It is a fact.

Thank you, thank you, thank you.

At this time, the Chair will recognize our next witness, and I guess that is going to be Mr. Waldman.

You are recognized for five minutes.

#### **STATEMENT OF MICHAEL WALDMAN**

Mr. WALDMAN. Thank you, Chairperson Butterfield, Ranking Member Steil, members of the subcommittee. Thank you for the opportunity to be here with you at this hearing.

This is a critical moment for our democracy and a critical aspect of the fight for our democracy. As you all know, the Voting Rights Act was perhaps the most effective civil rights law our Nation has ever had, vital to the drive for a vibrant multiracial democracy in our country. As you know, 8 years ago, the U.S. Supreme Court gutted the most effective part of that law.

Members of Congress of both parties have the power and the duty to right that wrong, to modernize the Voting Rights Act and strengthen it to defend our democracy so all Americans can vote.

I want to make three points, building on the testimony that others have said:

First of all, as we have just heard, for the past 8 years the absence of preclearance, the absence of a strong Voting Rights Act, opened the way for racially discriminatory voting rules and practices across the country.

For example, voter purges. Removing voters from the rolls can be appropriate or it can remove eligible voters. We found in Brennan Center research that voter purge rates soared in the States that previously had been covered by Section 5 of the Voting Rights Act preclearance, 40 percent higher than the rest of the country. All told, 17 million people nationwide removed from the rolls in just 2 years.

We have seen polling place closures and all kinds of other activities around the country that have been described and documented.

And now in the wake of the 2020 election, the absence of a strong Voting Rights Act has opened the way for the attack on voting that is taking place right now in the States.

We keep track of this. As of May 14 of this year, lawmakers in States had introduced more than 389 bills in 48 States that one way or another would curb the vote or restrict voting.

And I should note that these are not backbenchers throwing a bill in the hopper to get a good few hours on Twitter. These are bills that are passing and becoming law. Seventeen States have enacted new laws that in one way or another restrict access to voting, and these laws often, uncannily, target voters of color.

And, again, were the Voting Rights Act in full effect, were preclearance in full effect, these laws would be scrutinized. Many would be blocked. Many would be blunted.

The second point I want to make is that these racially discriminatory laws are based on a lie. American elections are secure and accountable. Voter fraud in the United States is vanishingly rare. You are, as has been noted many times, more likely to be struck by lightning than to commit in-person voter impersonation in this country.

And contrary to the big lie about the 2020 election, it was extraordinarily well run, as confirmed by the Department of Homeland Security, as confirmed by 60 courts, as confirmed by the Justice Department under President Trump.

And I will note that this week the Republican legislature in Michigan put out a report confirming there was no substantial voter fraud there and the election was well run there.

Yet, this is a lie that justifies a conspiracy theory that provides the pretext for discriminatory voting laws being pushed and passed all over the country.

And I should note again the racial subtext, unfortunately, is rarely far from the surface.

When former President Trump targeted and called out and sought the removal of the effective votes from voters in Detroit, in Philadelphia, in Milwaukee, in Atlanta, it wasn't very subtle what the implications of that were.

All the more reason why a conspiracy theory should not be allowed to deny people the right to vote and why Congress and Members of both parties can once again protect that right to vote with a strong Voting Rights Act.

I will note finally, as a third point, that it is important that this legislation be understood to work in tandem with the For the People Act, with H.R. 1, which has already passed the House of Representatives. Both are vital. Both are needed.

The John Lewis Voting Rights Advancement Act, in effect, is forward-looking. It deals with preclearance for future legislative proposals. H.R. 1 would set national standards for elections, including laws that have been passed right now. Both are constitutional. Both are well crafted. Both are needed. We urge the support of Congress for both of them.

Finally, as you know, John Lewis' name is on this bill. He gave so much of his blood and of his own soul and courage to bring the Voting Rights Act into effect. Members of both parties over many decades were together in this effort. We urge you to once again carry forward his legacy, carry forward his name, by strengthening, modernizing this vital piece of American law.

Thank you.

[The statement of Mr. Waldman follows:]

**BRENNAN  
CENTER  
FOR JUSTICE**

TESTIMONY OF

**MICHAEL WALDMAN**

**PRESIDENT  
BRENNAN CENTER FOR JUSTICE AT NYU SCHOOL OF LAW**

**HEARING ON  
VOTING IN AMERICA: A NATIONAL PERSPECTIVE ON  
THE RIGHT TO VOTE, METHODS OF ELECTION,  
JURISDICTIONAL BOUNDARIES, AND REDISTRICTING**

**THE COMMITTEE ON HOUSE ADMINISTRATION  
SUBCOMMITTEE ON ELECTIONS  
U.S. HOUSE OF REPRESENTATIVES**

**June 24, 2021**

Chair Butterfield, Ranking Member Steil, and members of the Subcommittee:

Thank you for the opportunity to testify in support of strengthening the Voting Rights Act (“VRA”).<sup>1</sup> The Act was perhaps the most effective civil rights law in our nation’s history. It should be modernized and restored to full strength. To that end, the Brennan Center strongly supports the John Lewis Voting Rights Advancement Act (“VRAA”).

The House considers this measure at a time of crisis for our democracy. Legislatures across the country are moving to enact curbs on voting, proposed laws that uncannily target people of color. The VRAA would restore the strength of the Voting Rights Act. It would modernize its coverage formula and do so in a way reflecting the Supreme Court’s strictures. Once again, any future legislatures that seek to enact racially discriminatory voting rules would find their actions subject to the strictest of legal scrutiny. The VRAA works in tandem with H.R.1, the For the People Act, which would set national standards and preempt existing discriminatory state laws. The VRAA is vital to restoring the promise of equality in representation in our democracy.

#### **I. VOTER SUPPRESSION SINCE SHELBY COUNTY**

The Voting Rights Act was widely considered the most effective civil rights legislation in our nation’s history.<sup>2</sup> It ended Jim Crow era voting practices and blocked new discriminatory voting measures. For nearly five decades, the law’s central feature was the Section 5 preclearance provision, which required states with a history of discriminatory voting practices to obtain advance approval from the federal government for changes to voting rules. Between 1998 and 2013, Section 5 blocked 86 discriminatory changes, including 13 in the 18 months before *Shelby County*.<sup>3</sup> It prompted jurisdictions to withdraw hundreds of potential discriminatory changes, and it dissuaded them from offering even more such changes in the first place.<sup>4</sup> As recently as 2006, Congress reauthorized the VRA with overwhelming bipartisan support.<sup>5</sup> President George W. Bush proudly signed it into law.<sup>6</sup>

---

<sup>1</sup> The Brennan Center for Justice at NYU School of Law is a nonpartisan law and policy institute that works to strengthen the systems of democracy and justice so they work for all Americans. Michael Waldman, president of the Center since 2005, is the author of *The Fight to Vote* (Simon & Schuster: 2016). Brennan Center experts and staff contributed to the preparation of this written testimony. Special thanks to Alan Beard, Andrew Garber, Maya Efrati, and Sam Linn. This testimony does not purport to convey the views, if any, of NYU School of Law.

<sup>4</sup> Tomas Lopez, *Shelby County: One Year Later*, Brennan Center for Justice (June 24, 2014), <https://www.brennancenter.org/our-work/research-reports/shelby-county-one-year-later>.

<sup>5</sup> The vote was unanimous in the Senate and 390–33 in the House. See U.S. Senate, “H.R.9 Vote Summary,” July 20, 2006, [https://www.senate.gov/legislative/LIS/roll\\_call\\_lists/roll\\_call\\_vote\\_cfm.cfm?congress=109&session=2&vote=00212](https://www.senate.gov/legislative/LIS/roll_call_lists/roll_call_vote_cfm.cfm?congress=109&session=2&vote=00212); U.S. House of Representatives, “Final Vote Results for Roll Call 374,” July 13, 2006, <http://clerk.house.gov/evs/2006/roll374.xml>.

<sup>6</sup> White House, Press Release, *Fact Sheet: Voting Rights Act Reauthorization and Amendments Act of 2006* (July 27, 2006), <https://georgewbush-whitehouse.archives.gov/news/releases/2006/07/20060727-1.html>.

In 2013, in *Shelby County v. Holder*, the U.S. Supreme Court gutted this crucial piece of the Voting Rights Act.<sup>7</sup> Chief Justice Roberts argued that times had changed, and that the coverage formula in Section 4 was thus out-of-date. In doing so, the Court removed a key tool, passed by Congress under its authority, to protect voters. In dissent, Justice Ginsburg famously responded, “throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet.” What we have seen since is a relentless storm, bearing down on communities of color and the most vulnerable.

#### **EIGHT YEARS OF IMPACT**

*Shelby County* loosed a flood of discriminatory voting rules, contributing to a now nearly decade-long trend in the states of restrictive laws, which the Brennan Center has documented extensively.<sup>8</sup> (I attach Appendix B as prior testimony the Brennan Center submitted to Congress on this topic. A compendium of our documentation can be found in Appendix A).

#### **Voter Purges**

Improper purges disenfranchise legitimate voters and cause confusion at the polls. States can take steps to clean up voter rolls, but abusive purges can remove duly registered citizens, often without their knowledge. Alarmingly, purges have surged in states once subject to federal oversight under the VRA.<sup>9</sup> States once covered by Section 5 saw purges at a 40 percent higher rate than the rest of the country.<sup>10</sup> This disparity continued over several election cycles, suggesting something much more troubling than mere cleanup of voter lists. All told, more than 17 million voters were removed from the rolls nationwide between 2016 and 2018 alone.<sup>11</sup> (I attach a copy of this analysis in Appendix C.)

#### **Polling Place Closures**

Polling place closures in jurisdictions previously covered by Section 5 of the VRA — often jurisdictions with high minority populations — have become another major barrier to access. A study by the Leadership Conference on Civil and Human Rights uncovered nearly 1,700 polling place closures in jurisdictions formerly covered by Section 5, despite a

significant rise in voter turnout during the same period.<sup>12</sup> Polling place closures often disproportionately harm voters of color. During the 2020 presidential primary election in Wisconsin, for example, Milwaukee closed all but five of its 182 polling places. A peer-reviewed academic journal article by the Brennan Center's Kevin Morris and Peter Miller found that this closure depressed turnout by more than 8 percentage points overall — and by about 10 percentage points among Black voters.<sup>13</sup>

### **Strict Voter ID Laws**

Since *Shelby County*, several states have enacted new strict voter ID laws that target voters of color.<sup>14</sup> In 2013, at least six states—Alabama, Mississippi, North Carolina, North Dakota, Virginia, and Texas—implemented or began to enforce strict photo ID laws, most of which had previously been blocked by the Department of Justice due to their discriminatory impact. Federal courts in at least four states have found that strict voter ID laws were racially discriminatory, including the Texas and North Carolina laws. The Fourth Circuit Court of Appeals famously said that North Carolina's law disenfranchised Black voters “with almost surgical precision.”<sup>15</sup>

### **Curbs on Voter Registration**

Since *Shelby County*, some states have imposed new restrictions on the voter registration process that take aim at organizing efforts to boost participation by voters of color and low-income voters. For example, in 2017, Georgia enacted an “exact match” law mandating that voters’ names on registration records must perfectly match their names on approved forms of identification.<sup>16</sup> A Brennan Center analysis of the policy found that, in the months leading up to the 2018 election, roughly 70 percent of Georgia voters whose registrations were blocked by the policy were people of color.<sup>17</sup> Similarly, in 2018, Tennessee responded to a major get-out-the-vote effort by enacting a law inflicting civil penalties on groups that employed paid canvassers if they submitted incomplete or inaccurate voter registration forms.<sup>18</sup>

### Cutbacks to Early Voting

Multiple states have also reduced early voting days or sites used disproportionately by voters of color. In Ohio and Florida, for example, legislatures eliminated early voting on the Sundays leading up to Election Day after African American and Latino voters conducted successful “souls to the polls” voter turnout drives on those days.<sup>19</sup> Federal courts have struck down early voting cutbacks in North Carolina, Florida, and Wisconsin because they were intentionally discriminatory.<sup>20</sup> Similar efforts continue today.

### TODAY’S VOTER SUPPRESSION WAVE

Today, controversy rages across the country as state legislators move to enact restrictive voting laws, the most significant such effort since the Jim Crow era. Make no mistake: if the Voting Rights Act were at full strength, it would have blocked or blunted much of this push for voter suppression laws. As restored by the VRAA, a strong law would apply to future abusive voting law changes. In states with a significant history of discrimination in voting, new changes in vote by mail, early voting, and voter registration, among others, could not take effect without being precleared by the Justice Department or a federal court in Washington, D.C. This extra layer of scrutiny would make a huge difference to protect citizens’ right to vote.

As of May 14, 2021, lawmakers had introduced more than 389 bills in 48 states to curb the vote.<sup>21</sup> This is more than four times the number of restrictive bills introduced just two years before.<sup>22</sup> Crucially, these are not backbenchers tossing a bill in the hopper in the hope of getting a good day on Twitter. Already, at least 17 states have enacted new laws with provisions that restrict access to voting.

As in previous eras, these laws and proposals purport to be racially neutral. In fact, often they precisely target voters of color.

- Georgia’s recent law made it harder to vote by mail. For years, Georgia voters cast ballots in this way without controversy. (Indeed, Republican legislators took the lead in enacting no-excuse absentee balloting sixteen years ago.) More recently, however, Black voters began to use vote by mail in greater numbers. (Democrats overall in 2020 used

vote by mail at a markedly higher rate than before. Republicans were more likely to choose to vote on Election Day.<sup>23</sup>) Now the legislature has enacted a measure to curb voting by mail. Its original proposal, which was changed only days before a final vote, would actually have effectively ended vote by mail for those under 65.<sup>24</sup>

- Georgia's newly enacted law also prohibits voters from casting a ballot at the wrong precinct unless it is after 5:00PM, thus barring out-of-precinct voting for most of Election Day.<sup>25</sup> A Brennan Center analysis of the legislation found that Black voters live in neighborhoods with much higher rates of in-county moves and thus are more likely to be hit especially hard by this new rule.<sup>26</sup>
- Other current proposals would make it less likely that voters of color can have their ballots counted — including signature matching requirements, vote-by-mail ID mandates, and postage costs.<sup>27</sup> Several studies have found that absentee ballots cast by voters of color have in recent years been rejected at much higher rates than those cast by their white counterparts.<sup>28</sup> A study published in the *Election Law Journal* found that in Florida, in both the 2018 and 2016 federal elections, absentee ballots returned by African American and Latino voters were twice as likely to be rejected as those cast by white voters.<sup>29</sup> Studies regarding Florida's 2020 presidential primary,<sup>30</sup> Georgia's 2020 primaries,<sup>31</sup> and North Carolina's 2020 primaries have resulted in similar findings.<sup>32</sup>
- In Texas, the legislature was minutes away from enacting new voting rules when Democratic lawmakers walked out and denied a quorum. Governor Greg Abbott has promised to call a special session of the legislature to complete its task.<sup>33</sup> As the

*Washington Post* aptly summarized, the “measure would have made it harder to vote by mail, empowered partisan poll watchers and imposed stiff penalties on election administrators.”<sup>34</sup> It would also prohibit drive-up voting and other steps used heavily by Black and Latino voters in 2020.<sup>35</sup>

- In Arizona, the Governor recently signed a law that makes it harder for voters to vote by mail. Any voter who did not cast an early voting ballot in two consecutive election cycles will be removed from the permanent early voting list.<sup>36</sup> The Arizona House has also advanced a bill that would require county recorders to refer voters who return a mail ballot with a mismatched signature to prosecutors. This would turn common, harmless mistakes into potential crimes.<sup>37</sup> These policies would be subject to preclearance under Section 5 but for the Court’s ruling in *Shelby County*.

## II. **BEHIND THE BIG LIE**

Why are these laws being pushed? Proponents claim they are needed to thwart “voter fraud” and preserve “election integrity.” These arguments are animated by the Big Lie — the notion that the 2020 election was stolen, riddled with fraud. Such assertions animated the push for discriminatory voting laws well before Donald Trump’s most outlandish claims.

The animus behind these fraud claims becomes clearer when we realize these assertions are, simply, *false*. They are a conspiracy theory, often one with barely disguised racial subtext. Such theories cannot be allowed to guide policy, let alone justify laws that would make it harder for our fellow Americans to vote.

Voter fraud in the United States is vanishingly rare. You are more likely to be struck by lightning than to commit in-person voter impersonation, for example.<sup>38</sup> A comprehensive analysis from the *Washington Post* found only 31 credible instances of voter fraud between 2000 and 2014 — out of one billion ballots cast.<sup>39</sup>

These conspiracy theories have been debunked repeatedly. In 2016, Donald Trump insisted, “I won the popular vote if you deduct the millions of people who voted illegally,” and

<sup>39</sup> Justin Levitt, “A comprehensive investigation of voter impersonation finds 31 credible incidents out of one billion ballots cast,” *Washington Post*, August 6, 2014, <https://www.washingtonpost.com/news/wonk/wp/2014/08/06/a-comprehensive-investigation-of-voter-impersonation-finds-31-credible-incidents-out-of-one-billion-ballots-cast/>.

claimed there were three to five million illegal voters.<sup>40</sup> He established a commission to prove his claim. It collapsed without finding any evidence.<sup>41</sup> In 2020, the election was confirmed to be smoothly run and extraordinarily secure.<sup>42</sup> Indeed, the Department of Homeland Security deemed the election the “most secure in American history.”<sup>43</sup> In the frenzy of lawsuits brought to overturn the results, 60 courts considered claims, and rejected them. Trump’s attorneys, under oath, were forced to confess repeatedly they could press no charges of fraud. Federal Judge Stephanos Bibas, appointed by President Trump, ruled definitively on behalf of a three-judge appeals court panel: “Charges of unfairness are serious. But calling an election unfair does not make it so. Charges require specific allegations and then proof. We have neither here.”<sup>44</sup> Attorney General William Barr confirmed that there was no widespread election fraud.<sup>45</sup> Privately to the president, he used a more colorful barnyard epithet.<sup>46</sup>

Ultimately, such fraud fears provide a pretext for discriminatory laws. This did not start with Donald Trump. Rather, over years, the myth has built momentum as the basis for a drive to curb the vote. Few remember it now, for example, but Attorney General Alberto Gonzales was forced to resign in a scandal in 2007 when he fired U.S. Attorneys after they refused to prosecute nonexistent voter fraud.<sup>47</sup> The roar about voter fraud had one significant consequence: it made it seem to be a real problem. If not, why was everyone talking about it? The courts have allowed fear of admittedly rare misconduct, largely imagined, to justify laws that affect actual voters.<sup>48</sup> Election integrity is important, of course. But efforts to protect it should target actual problems (such as cyber security risks). Instead, the clamor about illegal voting is used to justify measures that target not misconduct, but voters and their rights. Going back over a century, claims about fraud especially target lower income, lower status voters. In the 19<sup>th</sup> century such assertions

targeted Black voters in the South, and Catholic and immigrant voters in the North. Today — spoken or implied — such claims target voters of color and immigrants.

Increasingly, the racial subtext of the Big Lie pokes to the surface. Those who push discriminatory measures have begun to openly acknowledge that the goal of the measures is to subtract voters — particularly voters of color — from the electorate. In one instance a few months ago, an Arizona legislator made headlines when he said that he did not think everyone should vote.<sup>49</sup> At a hearing on a proposed voting bill, Rep. John Kavanaugh explained, “Quantity is important but we have to look at quality as well.”<sup>50</sup> Meanwhile, Texas bill SB7 originally included language that it was meant to protect the “purity of the ballot box,” a phrase from the state’s constitution used to justify all-white primaries in the Jim Crow era.<sup>51</sup> It was removed only after it was called out during a contentious May 9 debate on the bill.<sup>52</sup>

### **III. CONGRESS SHOULD SWIFTLY PASS THE VRAA**

The VRAA is designed to respond to discriminatory practices in a way that is responsive to the Supreme Court’s concerns. Notably, through its “geographic coverage” provisions, it modernizes the formula used to determine which jurisdictions will be subject to preclearance, drawing on a recent history of discrimination in voting. This updated formula targets discrimination as it exists in 2021.

In addition, the VRAA introduces limits on measures that have historically been used to discriminate against voters of color.<sup>53</sup> This “known practices” provision uses the wealth of evidence accrued since passage of the original VRA to identify categories of changes that will always be subject to preclearance when made in jurisdictions that meet minority population thresholds. A report by the Mexican American Legal Defense and Educational Fund, Asian Americans Advancing Justice, and NALEO Educational Fund found that nearly two-thirds of preclearance denials between 1990 and 2013 related to changes in methods of election, redistricting, annexations, polling place relocations, and interference with language assistance.<sup>54</sup> Each of these types of laws, and several others, would be covered under the VRAA.

The VRAA also provides for notice to be given to the public when certain election changes are made in close proximity to federal elections, restores the federal observer program, and makes it easier for those challenging discriminatory voting laws in court to obtain relief.

<sup>52</sup> Hannah Knowles, “A Texas Bill Drew Ire for Saying It Would Preserve ‘Purity of the Ballot Box.’ Here’s the Phrase’s History,” *Washington Post*, May 9, 2021, <https://www.washingtonpost.com/history/2021/05/09/texas-purity-ballot-box-black/>.

<sup>53</sup> Voting Rights Advancement Act, H.R. 4, 116<sup>th</sup> Cong. §4(d) (2019).

<sup>54</sup> Erin Hustings, et al., *Practice-Based Preclearance: Protecting Against Tactics Persistently Used to Silence Minority Communities’ Voters*, 14 (2019), <https://www.maldef.org/wp-content/uploads/2019/11/Practice-Based-Preclearance-Report-Nov-2019-FINAL.pdf>.

These provisions are more than justified and well-tailored to the record of discrimination before Congress. In requiring preclearance in the places with the greatest record of discrimination and for the measures most likely to be discriminatory, the VRAA “link[s] coverage to the devices used to effectuate discrimination and to the resulting disenfranchisement,” as the Supreme Court in *Shelby County* said the Voting Rights Act must.<sup>55</sup> The bill is well equipped to attack the kinds of discriminatory practices we have seen implemented over the last few years.

Congress has the constitutional authority to enact this measure. The vast trove of evidence gathered by this committee and others in Congress provides ample constitutional justification for this legislation. The text, structure, and history of the relevant constitutional provisions confirm Congress’ preeminent role in protecting the right to vote. The Fifteenth Amendment’s Section 2 makes clear “Congress shall have power to enforce this article by appropriate legislation.” Similarly, the Fourteenth Amendment states, “The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.” The drafters of these amendments chose their words carefully. They chose not to rely on the courts alone to enforce equal protection or voting rights.

The VRAA would work in tandem with another piece of legislation: the For the People Act (H.R. 1). H.R. 1 sets national standards for fair, secure, and accessible elections; the VRAA is targeted at the pernicious problem of states with a history of racial discrimination in voting. H.R. 1 would override existing discriminatory state laws; the VRAA would establish preclearance for future such laws. Both are vitally needed to strengthen our democracy.

\*\*\*

John Lewis with countless others brought the Voting Rights Act into being through physical and moral courage. He worked ardently on this legislation, and it carries his name and honors his legacy. He was intimately involved, too, in writing H.R. 1. When it counted—in the streets or in the halls of Congress — John Lewis acted to move our nation toward its best self, toward its democratic ideals. This generation of lawmakers can do the same by restoring the Voting Rights Act in his name and protecting the right to vote for all Americans.

---

<sup>55</sup> *Shelby County*, 570 U.S. at 546.

Chairman BUTTERFIELD. And thank you.

It should be noted that the John Lewis Voting Rights Advancement Act has not been introduced, because we have not completed these hearings. But as soon as we can finish all 16 of our hearings among the three committees, it is our sincere hope that it will be filed very quickly. And we are hoping that it will be given the label H.R. 4. And, hopefully, we can decide it and send it over to the Senate for its approval.

Mr. Henderson, you are recognized for five minutes.

#### **STATEMENT OF WADE HENDERSON**

Mr. HENDERSON. Thank you, Chairman Butterfield, Ranking Member Steil, and members of the subcommittee. Good morning, and thank you for this opportunity.

And thank you, Chairman Butterfield, for your leadership in calling these critically important hearings on how we ensure that all of us, no matter our color, ZIP Code, or income, have an equal say in our democracy.

In his final message to the Nation, the late Congressman John Lewis left his marching orders. He called on us to remember that, quote, "Democracy is not a state. It is an act." He said that every generation must do its part to build the Beloved Community.

I am deeply heartened that Americans are heeding his call. Across diverse backgrounds, amid a pandemic, people turned out to vote in unprecedented numbers. It was an awe-inspiring moment for the world's oldest and greatest democracy and a declaration of the possibility to realize our highest ideals. Indeed, voting is the language of democracy.

Some lawmakers, however, have turned their backs on the Congressman's noble call. They are trying to take us backwards by creating barriers for Black, Brown, indigenous and new Americans who want to exercise their right to vote.

Our Nation is faced with reconciling the contradiction of who we say we are and who we actually are. Congress must swiftly set to make real the promise of democracy for all.

We didn't get here overnight. Eight years ago tomorrow, the Supreme Court decided *Shelby County v. Holder* and decimated the heart of the Voting Rights Act. Section 5 allowed the Justice Department to block proposed discriminatory voting restrictions in places with pervasive histories of discrimination and ensured voting changes were public and transparent.

Despite the best efforts of the leadership conference and our members to protect the franchise, nearly a decade of antivoter tactics has exacerbated a harmful toll.

Without the VRA's strongest tool to fight discrimination, lawmakers continue to wage a coordinated attack on Black and Brown voters. The deluge of antivoter laws is unrelenting. Voters of color face intimidation, burdensome ID requirements, voter purges, and disenfranchisement laws, built on top of mass incarceration.

States cut back early voting, eliminated same-day voter registration, and shuttered polling places. In 2020, politicians exploited the pandemic by imposing additional barriers to the ballot.

But democracy prevailed, because the people prevailed. Voters refused to give up their power. This revealed not only the American

people's resiliency, but also our collective will to ensure our democracy works for everyone.

Yet, the assault on our freedom to vote has only grown more dire. After a historic turnout, politicians peddled lies, tried to discount the votes of communities of color, and attempted to override the will of the people. Their efforts ultimately fueled a deadly attack on this very institution by armed right-wing militants.

Now they have doubled down on attempts to reshape the electorate for their own gain. Since January, State lawmakers have introduced, as my colleague Mr. Waldman said, 389 antivoter bills and enacted 22 laws.

These restrictions disproportionately burden voters of color. They resemble the very strategies that led Congress to adopt the Voting Rights Act in the first place.

In her dissenting opinion in *Shelby County*, the late Justice Ruth Bader Ginsburg wrote that throwing out preclearance when it successfully stops discrimination is, quote, "like throwing away your umbrella in a rainstorm because you are not getting wet."

Today we are drenched. This is our moment to act, right now. We have no other choice if we want to fulfill the promise of our democracy that every voice and every vote count. Congress must pass the John Lewis Voting Rights Advancement Act and restore the VRA to its full strength.

Shortly before President Johnson signed the VRA into law, 25-year-old John Lewis led more than 600 people across the Edmund Pettus Bridge. State troopers unleashed brutal violence and our hero was beaten and bloodied.

But he never gave up the fight. For decades, he implored his colleagues in these hallowed halls to realize equal opportunity for all.

Before his death, he wrote, and I quote, "Time is of the essence to preserve the integrity and promises of our democracy."

Members of Congress must now answer his call with all the force you can muster.

Thank you for allowing me to testify this morning.

**STATEMENT OF WADE HENDERSON, INTERIM PRESIDENT AND CEO  
THE LEADERSHIP CONFERENCE ON CIVIL AND HUMAN RIGHTS**

**U.S. HOUSE OF REPRESENTATIVES  
COMMITTEE ON HOUSE ADMINISTRATION  
SUBCOMMITTEE ON ELECTIONS**

**HEARING ON “VOTING IN AMERICA: A NATIONAL PERSPECTIVE ON THE RIGHT TO  
VOTE, METHODS OF ELECTION, JURISDICTIONAL BOUNDARIES, AND  
REDISTRICTING”**

**JUNE 24, 2021**

Chairman Butterfield, Ranking Member Steil, and members of the subcommittee: Thank you for holding this important hearing today on how we ensure all of us — no matter our color, zip code, or income — have an equal say in our democracy. My name is Wade Henderson, and I am the interim president and CEO of The Leadership Conference on Civil and Human Rights, a coalition of more than 220 national organizations working to build an America as good as its ideals.

The Leadership Conference was founded in 1950 and has coordinated national advocacy efforts on behalf of every major civil rights law since 1957, including the Voting Rights Act of 1965 and subsequent reauthorizations. Much of our work today focuses on making sure that every voter has a voice in key decisions like pandemic relief, access to affordable health care, and policing accountability. At The Leadership Conference, we aim to ensure that every voter can cast a vote and have it counted.

This is a critically important discussion as we watch a coordinated, calculated, and ongoing attack on Black and Brown voters and the very foundation of our democracy: the freedom and right to vote. But we have our marching orders. In one of his final messages to the nation, the late Congressman John Lewis called on each of us to remember that “Democracy is not a state. It is an act.”<sup>1</sup> He said that each generation must do its part to help build the Beloved Community.

Americans are heeding his call. Across diverse backgrounds — and in the face of a once-in-a-century global pandemic — people turned out last year to vote in unprecedented numbers.<sup>2</sup> It was an awe-inspiring moment for the world’s oldest and greatest democracy. It was a declaration of the possibility of our nation to live up to its highest ideals. And it was a recognition that the right to vote is fundamental to

the preservation of all other rights. Voting is essential to our democracy. Indeed, it is the language of our democracy.

But in response to that historic election, some politicians are trying their hardest to take us backwards by creating barriers for Black, Brown, Indigenous, and new Americans who want to continue to exercise this fundamental right. We are at an inflection point. Our nation has approached the time of dealing with the contradiction of what we say we are as a democratic republic, and what we actually are. In this perilous moment, Congress must carry out its duty and swiftly act to make real the promise of our democracy for all.

#### **The legacy of the Voting Rights Act — and the urgent need to update it today**

In 1965, Congress passed the Voting Rights Act to outlaw racial discrimination in voting. Previously, many states barred Black voters from participating in the political system through literacy tests, poll taxes, voter intimidation, and violence. In the mid-1950s, only 25 percent of African Americans were registered to vote, and the registration rate was even lower in some states. In Mississippi, for example, fewer than 5 percent of African Americans were registered to vote.<sup>3</sup> Those rates soared after Congress enacted the VRA. By 1970, almost as many African Americans registered to vote in Alabama, Mississippi, Georgia, Louisiana, North Carolina, and South Carolina as had registered in the century before 1965.<sup>4</sup> The VRA became the nation's most effective defense against racially discriminatory voting policies.

It was not long ago — just in 2006 — that this body reauthorized the VRA for the fourth time with sweeping bipartisan support. The House of Representatives voted to reauthorize the landmark legislation by a 390-33 vote and the Senate passed it unanimously, 98-0.<sup>5</sup> Given the importance of the VRA, Congress undertook that reauthorization with great care and deliberation — holding 21 hearings, hearing from more than 90 witnesses, and compiling a massive record of more than 15,000 pages of evidence of continuing racial discrimination in voting.

In the U.S. Supreme Court's 2013 decision *Shelby County v. Holder*,<sup>6</sup> five justices eviscerated the most powerful provision of the VRA: the Section 5 preclearance system.<sup>7</sup> This section enabled the federal

<sup>3</sup> U.S. COMM'N ON CIVIL RIGHTS, AN ASSESSMENT OF MINORITY VOTING RIGHTS ACCESS IN THE UNITED STATES 171 (2018), [https://www.usccr.gov/pubs/2018/Minority\\_Voting\\_Access\\_2018.pdf](https://www.usccr.gov/pubs/2018/Minority_Voting_Access_2018.pdf)

<sup>4</sup> *Shelby County v. Holder*, 570 U.S. 529, 562 (2013) (Ginsburg, J., dissenting).

<sup>5</sup> <https://www.congress.gov/bill/109th-congress/house-bill/9>

<sup>6</sup> *Shelby County v. Holder*, 570 U.S. 529 (2013).

<sup>7</sup> Under Section 5 of the VRA, jurisdictions with a demonstrated record of racial discrimination in voting were required to submit all proposed voting changes to the U.S. Department of Justice or the U.S. District Court in Washington, D.C., for "preclearance" in advance of implementation. The jurisdictions were required to prove that the proposed voting change would not deny or adversely affect the right to vote on the basis of race, color, or an eligible voter's membership in a language minority group. Preclearance was a crucial element of the VRA because it ensured that no new voting law or practice, such as closing or moving a polling place, would be implemented in a place with a history of racial discrimination in voting unless that law was first determined not to discriminate against voters of color. However, in Shelby County, the U.S. Supreme Court invalidated the formula that determined which

June 24, 2021  
Page 3 of 6

government to block proposed voting restrictions in certain states and counties with histories of racial discrimination. It also ensured that changes to voting rules were public, transparent, and evaluated to protect voters against discrimination based on race and language. In *Shelby County*, Chief Justice John Roberts, on behalf of the majority, declared that “Our country has changed.” The Court held that the formula that decided which jurisdictions were subject to preclearance was outdated. The Court instructed that Congress must assess current conditions in order to lawfully require states and political jurisdictions to preclear voting changes. Now that this assessment is being conducted, there can be no question of the persistent racial discrimination at the ballot box. Congress must act.

#### **The devastating toll of *Shelby County v. Holder***

Despite the best efforts of The Leadership Conference and its many member organizations to protect voting rights and promote civic participation, the impact of eight years of overt and covert anti-voter tactics are taking their toll. Mere hours after the *Shelby County* decision was announced, some states began ramming through legislation that almost certainly would have been prevented by the federal government. Texas, Mississippi, and Alabama immediately implemented strict voter ID laws that disproportionately harm voters of color.<sup>8</sup> And North Carolina lawmakers introduced a voter suppression bill that a federal court later struck down and described as “the most restrictive voting law North Carolina has seen since the era of Jim Crow” with provisions that target African Americans “with almost surgical precision.”<sup>9</sup>

Without the VRA’s tools to fight the most blatant forms of discrimination, people of color continue to face barriers to exercising their most important civil right, including voter intimidation, felon disenfranchisement laws built on top of a system of mass incarceration, burdensome and costly voter ID requirements, and purges from the voter rolls. States have also cut back early voting opportunities, eliminated same-day voter registration, and shuttered polling places.

In 2019, The Leadership Conference Education Fund released an analysis of 757 counties once covered under Section 5.<sup>10</sup> Our team found that an astonishing 1,688 polling places were closed between 2012 and 2018. There may be valid reasons for closing certain polling places. But these high rates of closures took place amid a larger constellation of efforts to prevent people of color, older voters, and voters with disabilities from voting. Absent the former preclearance mandate, states are under no obligation to evaluate the discriminatory impacts and potential harms of polling place closures. The report found that closures often mean long lines at polling places, transportation hurdles, and mass confusion about where eligible voters may cast their ballots. For many people, these burdens make it harder, and sometimes impossible, to vote.

---

states and jurisdictions are covered by Section 5 of the VRA and thus are required to undergo preclearance. Without that determination, the preclearance provision essentially became inoperable.

June 24, 2021  
Page 4 of 6

The deluge of anti-voter laws and policies has been unrelenting. The 2020 election season was marred by politicians making it harder to vote — and some even leveraged the COVID-19 pandemic to limit voter access, forcing voters to risk their health or lose their vote. In the lead up to Election Day, as more than 100 million people went to safely cast early votes, several states limited the number of drop boxes available for voters to return their absentee ballots.<sup>11</sup> Some closed polling places in predominantly Black neighborhoods and required onerous witness and notary requirements for vote by mail. Others made late changes in voting rules, and then neglected to inform voters about them.<sup>12</sup>

In one egregious example, Milwaukee had only five polling sites open compared to the usual 180 — dramatically increasing people's risk of infection. And this in a city that is home to 60 percent of the state's Black voters and 30 percent of its Hispanic voters.<sup>13</sup> It must be noted that in the days leading up to the primary election, COVID-19 was spreading in Wisconsin, and it was particularly rampant in Black neighborhoods in Milwaukee. Statistics from the first week of April show that African Americans made up almost half of Milwaukee County's COVID-19 cases, and 81 percent of the county's COVID-19 deaths. Because the Republican majority in the state legislature refused to give people a few extra days to return their mail-in ballots, Black and Brown voters had to wait in hours-long lines at the polls or stay home and give up their vote. An analysis of April 2020 primary turnout from our All Voting is Local campaign and Demos found that in Milwaukee, wards with higher Black and Hispanic populations had significantly lower voter turnout compared to wards with a high percentage of white residents.<sup>14</sup>

Despite lawmakers' shameful and life-threatening efforts to silence voters, voters across America showed up to the polls in unprecedented numbers. Make no mistake: Democracy prevailed because the people prevailed. Voters refused to give up their power, and front-line election workers risked their health to make sure the wheels of democracy continued to turn amid the pandemic. The election cycle revealed not only the resiliency of the American people, but also the will to move forward with the systemic change needed to ensure that our democracy works for everyone.

However, the assault on our freedom to vote has only grown more dire since the 2020 election. After voters turned out to the polls in historic numbers, certain politicians peddled electoral lies, tried to discount the votes of communities of color, and attempted to override the will of the people. Their efforts ultimately fueled a deadly attack on the U.S. Capitol by armed right-wing militants. Now, having lost both the election and the attempt to undermine it, Republicans in states are telling lies about voters and our election systems as a pretext for erecting a wide array of barriers to voting and reshaping the electorate to their advantage.

Most Americans believe that voters get to choose our leaders; our leaders do not get to choose their voters. And yet, since January of this year, at least 14 states have enacted 22 laws that roll back early and

<sup>11</sup> <https://www.pewtrusts.org/en/research-and-analysis/blogs/stateline/2020/10/16/rise-in-use-of-ballot-drop-boxes-sparks-partisan-battles>

<sup>12</sup> <https://www.npr.org/2020/10/17/924527679/why-do-nonwhite-georgia-voters-have-to-wait-in-line-for-hours-too-few-polling-pl>

<sup>13</sup> <https://civilrights.org/blog/covid-19-silenced-voters-of-color-in-wisconsin/>

<sup>14</sup> Ibid.

June 24, 2021  
Page 5 of 6

mail voting, add new hurdles for voter registration, impose burdensome and unnecessary voter identification requirements, strip power from state and local election officials to enhance voting access, and otherwise make voting more difficult. Overall, state lawmakers have introduced at least 389 anti-voter bills this year. In Georgia, state legislators passed a bill that takes away local control over elections from counties and transfers it to themselves — a clear indication of the partisan motives behind these laws. The bill even makes it a crime to offer food or water to voters waiting in line. In Arizona, where the overwhelming majority of voters cast their ballots by mail, legislators moved to purge voters from the early voting lists which will limit vote-by-mail. And Florida legislators passed a bill to reduce voting access by limiting the use of drop boxes and making it a serious crime for anyone but a member of a voter's immediate family to take their mail-in ballot to the mailbox.<sup>15</sup>

These restrictions are consistently found to significantly and disproportionately burden voters of color. That disproportionate burden is well documented at every stage of voting — from registering to vote to getting to the polls to casting a ballot. The growing tide of efforts to limit people of color from equally participating in the political process reflects the very strategies of vote denial that led Congress to adopt the VRA in the first place.

The Leadership Conference knows the road ahead presents demanding challenges. It is why in 2018, together with a group of leading civil rights organizations, we launched a campaign called All Voting is Local to help ensure that the right and ability to vote are protected at all levels.<sup>16</sup> The campaign works in eight states — Arizona, Florida, Georgia, Michigan, Nevada, Ohio, Pennsylvania, and Wisconsin — to eliminate needless and discriminatory barriers to voting before they happen. What we're seeing in states is an attempted power grab, pure and simple. It is coordinated through cookie-cutter legislative measures that ignore the will of the voters and the very real problems in our elections like lack of funding, resources, and voter access.

In the late Justice Ruth Bader Ginsburg's dissenting opinion in *Shelby County*, she wrote that throwing out the preclearance system when it successfully stops discrimination "is like throwing away your umbrella in a rainstorm because you are not getting wet."<sup>17</sup> Today, we are drenched.

#### **The time is now to pass the John Lewis Voting Rights Advancement Act**

When President Lyndon Johnson signed the Voting Rights Act of 1965, he declared the law a triumph and said, "Today we strike away the last major shackle of ... fierce and ancient bonds."<sup>18</sup> But 56 years later, the shackles of white supremacy still restrict the full exercise of our rights and freedom to vote.

For democracy to work for all of us, it must include us all. While an overwhelming majority of people in America support policies like access to affordable health care, increasing the minimum wage, and action on climate change, a small handful of politicians have the power to deny progress at every turn. When

<sup>15</sup> <https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-may-2021>

<sup>16</sup> <https://allvotingislocal.org/>

<sup>17</sup> *Shelby County v. Holder*, 570 U.S. 529 (2013) (Ginsburg, J., dissenting).

<sup>18</sup> <https://www.presidency.ucsb.edu/documents/remarks-the-capitol-rotunda-the-signing-the-voting-rights-act>

June 24, 2021  
Page 6 of 6

considering the past year alone, it is painfully clear that the history of police violence with impunity against Black people, and the pandemic's disproportionate devastation on Black, Brown, Native American, and low-income communities, are an indictment of our failure to rid American institutions of longstanding racism and systemic inequality. When people can't access the ballot and when they are not represented in the ranks of power, our democracy is in peril.

This coordinated, anti-democratic campaign targets the heart of the nation's promise: that every voice and every eligible vote count. With an election less than two years away, there is no time to waste in guaranteeing all Americans the freedom to vote. That's why Congress must meet the urgency of the moment and pass the John Lewis Voting Rights Advancement Act. The VRAA will restore the essential portion of the Voting Rights Act that blocks discriminatory voting policies before they go into effect, putting a transparent process in place for protecting the right to vote. It will also bring down the barriers erected to silence Black, Indigenous, young, and new Americans and ensure everyone has a voice in the decisions that impact our lives.

On March 7, 1965, just a few months before President Johnson would sign the Voting Rights Act into law, then 25-year-old John Lewis led more than 600 people across the Edmund Pettus Bridge to demand equal voting rights. State troopers unleashed brutal violence against the marchers. Lewis himself was beaten and bloodied.<sup>19</sup> But he never gave up the fight. For decades, the congressman implored his colleagues in Congress to realize the promise of equal opportunity for all in our democratic process. Before his death, he wrote: "Time is of the essence to preserve the integrity and promises of our democracy."<sup>20</sup> Members of this body must now heed his call with all the force they can muster.

Thank you for inviting me to testify today. I am pleased to answer any questions you may have, and I look forward to working with you to ensure all of us, no matter race or place, have an equal say in our democracy.

Chairman BUTTERFIELD. And thank you, Mr. Henderson.  
 At this time, the Chair will recognize Ms. Frankenstein. Some may pronounce it Frankenstein, but I say Frankenstein.

You are now recognized for five minutes.

#### **STATEMENT OF SARA FRANKENSTEIN**

Ms. FRANKENSTEIN. Thank you, Chairman Butterfield, Ranking Member Steil, Ranking Member Davis, and members of the committee.

My name is Sara Frankenstein, and I am a private practice attorney in Rapid City, South Dakota. I practice voting rights and election law and advise election administrators in the Midwest in all aspects of elections and voting rights. I was lead counsel in numerous Federal Voting Rights Act cases and other election disputes, including redistricting and felony voting issues.

These matters often involve issues unique to American Indian voting, as well as Tribal and county governmental concerns. I am presenting information on two areas of Voting Rights Act litigation relevant to American Indian populations within States and counties.

The first is the issue of preclearance wherein South Dakota previously had two counties which were deemed covered jurisdictions in 1975. South Dakota's two counties previously covered were not added initially, but after additional tests were promulgated in 1972 which found that counties should be added to the preclearance list if they maintained a test or device, which included holding elections in English, and the county had less than 50 percent of voting-age citizens registered to vote did, in fact, vote in the November 1972 election.

In 1975, two counties in my State of South Dakota were added as covered jurisdictions. In 1977, our then South Dakota attorney general determined that the preclearance requirements were an unworkable solution to a nonexistent problem and advised that the State should not seek preclearance for those laws while he pursued litigation to exempt South Dakota from the VRA preclearance requirements.

What that did was create a backlog of 3,048 South Dakota laws that needed to be submitted for preclearance once the State and actually the two counties that were covered were sued for that very purpose.

One might think that this scenario would present the very method to uncover discriminatory or retrogressive statutes, administrative rules, and other laws that were passed by a legislature over 25 years when its legislators had no threat—or no feasible threat—hanging over their heads, because they understood that they did not need to seek preclearance for these laws.

One might expect that a number of these 3,000-plus laws would be found objectionable or otherwise denied preclearance.

How many of South Dakota's 3,048 laws and administrative rules were denied preclearance? None.

Such facts are a strong indicator that preclearance is not needed in South Dakota.

Our individual counties, should they be subject once again to preclearance requirements? In my experience, including rep-

resenting these counties themselves, they are often reservation counties.

As I say, reservations make up a majority or maybe all of these counties. They are run by majority American Indian leaders. And, in my experience, the American Indian leaders do not pass local ordinances that deny or abridge their own people's ability to vote.

County election officials work with their respective Tribes to find polling places, which are usually determined by the Tribe. To give you an example of the burden that is placed upon these reservation counties when they are under preclearance is typically found in the issue of moving polling places.

An example that I had in representing a county was a Tribe who had previously indicated a polling place could be located in a certain Tribal building indicated a few days before the election that, in fact, the county could not use that polling place, but offered up another Tribal building that it found more suitable.

I, on behalf of that reservation county, sought expedited preclearance from the Department of Justice. I did not get a response before the election. The county was placed in the situation of not knowing whether it should go forward with the new location, trying to hold an election in a place the Tribe said it could not.

Finally, after the election, we received preclearance being granted by the Department of Justice.

It demonstrates the situation, however, when a bureaucracy could move slowly, but yet we need to have certainty in how to run our elections back here in South Dakota.

Second, redistricting hasn't been a recent issue. We have had no redistricting cases here in the last decade. But what we have seen are Voting Rights Act vote denial claims, particularly in light of the issue of satellite offices.

Our county courthouses are not located on Indian trust land generally, so to engage in in-person absentee voting in a brick-and-mortar building, one needs to leave the reservation and travel to the county seat.

Because that requires distance, transportation, et cetera, we have had success working with counties to implement HAVA funds, Help America Vote Act funds, in order to fund those types of offices.

Now, efforts to require preclearance in these counties don't ameliorate or address those underlying funding problems in reservation counties.

**Written Statement of Sara Frankenstein**

June 24, 2021

**Hearing on “Voting in America: A National Perspective on the Right to Vote, Methods of Election, Jurisdictional Boundaries, and Redistricting.”**

The Committee on House Administration Subcommittee on Elections  
U.S. House of Representatives

Chairman Butterfield, Ranking Member Steil, and members of the Subcommittee:

My name is Sara Frankenstein and I am a private practice attorney and partner in the law firm of Gunderson, Palmer, Nelson & Ashmore, in Rapid City, South Dakota. I practice voting rights and election law. I advise and defend cities, counties, and school boards when they are sued, and frequently advise election administrators in the Midwest in all aspects of elections and voting rights. I was lead counsel in numerous federal Voting Rights Act cases and other election disputes, including redistricting and felon voting issues. These matters often involve issues unique to American Indian voting as well as tribal and county governmental concerns. I have included information on two areas of Voting Rights Act litigation relevant to American Indian populations within states and counties.

**I. VRA Preclearance for Reservation Counties.**

Previously, under Section 5 of the Voting Rights Act (VRA), “covered” jurisdictions were required to obtain preclearance from the Attorney General or a three-judge panel of the District of Columbia before all new county ordinances, city ordinances, and state laws that changed voting procedure could take effect. 42 U.S.C. §1973c. “Section 5 initially covered southern states and areas in the north where literacy tests and other discriminatory devices had been used to disenfranchise qualified African-American voters.” *South Carolina v. Katzenbach*, 383 U.S. 301, 334-33, 86 S.Ct. 803, 15 L.Ed. 2d 76 (1966).

In South Dakota and elsewhere, however, counties were added as covered jurisdictions based on a different test, one which did not rely upon a finding of discriminatory conduct against minorities. This additional test, found in 52 U.S.C.A. § 10303(b), extended coverage over those political subdivisions which 1) maintained a “test or device” (including holding elections in

Offices in Rapid City and Pierre, South Dakota

Attorneys licensed to practice in South Dakota, North Dakota, Nebraska, Wyoming, and Montana

English), and 2) had less than 50% of voting-age citizens registered on November 1, 1972, or less than 50% of such persons voted in the November 1972 Presidential election. In 1975, two counties in my state of South Dakota -- Shannon County (since renamed Oglala Lakota County) and Todd County -- were added as covered jurisdictions. 41 Fed. Reg. 784 (Jan. 5, 1976); *See* C.F.R. pt. 51 app (list of covered jurisdictions).

As found by the court in *Quick Bear Quiver v. Nelson*, Civ. 02-5069, Doc. 118, Opinion and Order:

On August 23, 1977, then South Dakota Attorney General William Janklow voiced his opposition to the VRA, calling it an "absurdity" that created an "unworkable solution to a nonexistent problem." 77-73 Opinion of the Attorney General 176 (1977). Janklow advised the secretary of state that he intended to pursue litigation to exempt South Dakota from the VRA and meanwhile to ignore its preclearance mandates. *Id.* at 184. This practice continued virtually unabated even after Janklow's term as Attorney General ended, and as a result, a significant preclearance backlog existed when [*Quick Bear Quiver v. Nelson*] was filed in 2002.

The *Quick Bear Quiver* case was settled by consent decree. Pursuant thereto, and in a negotiated and orderly fashion, 3,048 South Dakota laws were submitted for preclearance. Significantly, of those 3,048 statutes, ordinances, and constitutional changes, not one was denied preclearance. The South Dakota Secretary of State during the *Quick Bear Quiver* case, Chris Nelson, wrote as follows:

"These submissions contained 3,048 changes to election statutes, administrative rules, and the state constitution. Every one of these changes were precleared by the Department of Justice.<sup>8</sup> None were denied preclearance. Not a single change was found to retrogress the voting rights of Native Americans. This fact destroyed the ACLU's claims in the Quiver suit that South Dakota election statutes discriminated against Native American voters."

*Realistic Expectations – South Dakota's Experience with the Temporary Provisions of the Voting Rights Act*, by Chris Nelson, South Dakota Secretary of State, March 2007. Such facts are a strong indicator that preclearance is not needed in South Dakota counties.

South Dakota's two counties previously under preclearance, one of which I have represented on multiple occasions, are majority American Indian and contain the Pine Ridge and Rosebud Reservations. In my experience, those counties, often run by majority-American Indian leaders, do not pass local ordinances that deny or abridge their own people's ability to vote. Requiring those counties, or others similar, to seek and obtain preclearance before their majority-minority leadership can change, for instance, where their polling places should be on the reservation, is unneeded.

I have represented reservation counties in helping them seek preclearance for local election changes needed, such as moving a polling place. Preclearance requires very low-revenue counties to pay lawyers to seek preclearance for them, which is a financial burden. County governments often work with tribal leaders to secure Election Day polling places on the reservation. Counties will utilize the tribal buildings their respective tribes offer to them, working together locally to find buildings and rooms not otherwise needed for tribal matters on Election Day, which offer the accessibility and other resources needed to serve as a polling place. If a week before Election Day, a tribal government indicates to the county election official that the county may no longer use one tribal building but offers another one the tribe believes is better suited, preclearance requirements should not thwart or second-guess that decision by the tribe. In my experience, even expedited preclearance requests for these situations result in an election occurring out of necessity at the new polling facility, with the Department of Justice granting preclearance after the election has been held. Such federal bureaucracy is not needed and causes uncertainty in elections.

## **II. VRA “vote denial” satellite office claims.**

In and around reservations, American Indian plaintiffs have brought VRA “vote denial” claims stemming from the location of county courthouses. In states such as South Dakota, Montana, and elsewhere, county courthouses are located in the county seat. Such county buildings are not on reservation land, which is land held in trust by the U.S. government. While there are often segments of land held in trust outside the primary boundaries of what is considered reservation land, the largest portions of reservation land often encompass a large portion of a county, the entirety of a county, or span more than one county. If, for instance, a county’s southern half is reservation land, the county seat is located in the northern half of the county. This creates a situation where, on average, white voters live closer to the county seat than the average American Indian in that county.

Many states offer in-person absentee voting prior to Election Day at the office of the election administrator. The election administrator’s office is usually in the county courthouse or another county administration building in the county seat. Because voters living on the reservation may have to drive off reservation and farther than voters that live on non-reservation land, some advocates look to open satellite election administration offices on the reservation.

While the idea may seem attractive at first, the logistical requirements to open a satellite election administration office on the reservation create roadblocks. First, the county must find a building on the reservation both available and suitable for the purpose. It is difficult to find a building that meets ADA requirements, has hardwire internet capabilities, can safely store ballots and election machines, and is available during the voting time period. Second, the county must be able to afford not only the building, but the staff and equipment to operate the facility.

Counties are primarily funded through property taxes paid by the property owners within the county. Land held in trust, such as reservation land, does not generate property taxes. Therefore,

the more reservation land in a county, the less revenue base the county has to operate. Many services county government provides are mandated by state statute.

VRA lawsuits demanding satellite offices on reservations place the county at risk of either offering its residents statutorily-required services, such as a county sheriff or basic road maintenance, or fund a second election administration office on reservation land. Such lawsuits put counties in untenable positions. Counties with reservation land, out of financial necessity, already offer fewer services due to the funding shortfall. Such counties simply cannot afford to offer additional election services such as satellite offices.

My clients and I have found a solution when counties can utilize Help America Vote Act (HAVA) funds to pay for the hiring and training of election workers and fund building rent and equipment to create satellite election administration offices on the reservation. See Memorandum Opinion and Order Granting Motion to Dismiss (Doc. 92), *Poor Bear v. County of Jackson*; 5:14-cv-05059; Settlement Agreement (Doc. 143), *Janis v. Nelson*; 5:09-cv-05019. Without HAVA funding, however, counties with reservation land cannot realistically offer such services. In my experience, county officials, regardless of race, fully understand these financial issues, and do not deny requests for satellite offices due to any reason other than the financial and logistical ones described above. My county clients have consisted of majority or entirely American Indian county leaders who have the very same attitude and approach to these lawsuits as counties with primarily white county leaders. Satellite office requests on reservation land are often initially denied, by both minority and white county leaders, not in an effort to deny minority voting, but rather due to serious financial concerns and other logistical problems. Efforts to require preclearance in these counties do not ameliorate or address the underlying funding problem in reservation counties.

I have worked numerous other election matters, particularly federal litigation regarding reservations, and am happy to answer questions regarding any such issues.

Chairman BUTTERFIELD. Thank you. Thank you for your testimony.

Ms. FRANKENSTEIN. Thank you.

Chairman BUTTERFIELD. That completes the testimonies of the witnesses. We will now move to member questions.

It looks like my friend from California, Mr. Aguilar, will go first.

Mr. Aguilar, you are recognized for five minutes.

Mr. AGUILAR. Thank you, Mr. Chairman. I appreciate it.

Mr. Saenz, in your testimony, you stated that congressional action or inaction today will have a critical impact on the enduring condition of our democracy 5 years from now.

Can you explain how the failure of enacting a comprehensive voting rights bill will affect generations to come?

Mr. SAENZ. Sure. I think it is grounded in the fact that litigation, which is still possible, primarily under Section 2 of the Voting Rights Act, is notoriously costly and inefficient. It means that as the challenges to voting rights proliferate, our ability, even with a reinvigorated Department of Justice Civil Rights Division, our ability to successfully challenge all of those deprivations of voting rights is limited.

That is when legislation is most necessary. The most important piece of that is to reintroduce preclearance as an operative tool to prevent the implementation of changes that restrict the rights of minorities to vote.

Mr. AGUILAR. Could you also expand on how the Latino population is already feeling the impact from some of these attempts to seize control from individuals and eliminating the right to vote by using reduced methods?

Mr. Waldman talked a little bit about that and the number of State measures that have proceeded.

Can you talk about their impact to the Latino population?

Mr. SAENZ. Absolutely. Thank you, Congressman Aguilar.

Because the Latino population is growing as quickly as it is, we have substantial numbers of new voters. And it is particularly new voters who are affected by these attempts to restrict the right to vote, whether that takes the form of requiring new voter registrants to provide proof of citizenship not required of their predecessors, or new restrictive voter ID provisions where voter ID is not readily and costlessly available to those new voters.

So the impact on the Latino community as it expands and grows and produces more and more voters who become eligible to vote is substantial of all of these efforts to deter participation.

Mr. AGUILAR. Thank you, Mr. Saenz.

Mr. Waldman, could you elaborate a little bit more and talk about some of the harm that you see in the near and distant future to marginalized communities and their ability to exercise their right to vote if some of these measures, the statewide measures continue, and we don't pass anything here?

Mr. WALDMAN. Well, we have had measures that have passed and measures that are being considered.

In Florida, for example, where 64 percent of the voters, in an overwhelming bipartisan vote, voted to end that State's notorious voter disenfranchisement regime, felony disenfranchisement regime for people with past criminal convictions, the legislature followed

up by passing a requirement that changed that and made it so that you could only get your right to vote recognized if you had paid your fees and fines.

This overwhelmingly has a disproportionate impact on voters of color because of the way the criminal justice system works.

In many of the measures that we have seen advanced or moving or passed in States across the country in the past few months, they have targeted activities that voters of color are using—and sometimes recently.

As was mentioned earlier, vote-by-mail, for example, was never particularly controversial. But when communities of color began to use that method during the pandemic very successfully, suddenly it became the target of efforts to cut back on vote-by-mail.

Some have been rebuffed, some are moving forward, but there are ways in which you can trace the voting patterns and map it against these measures.

And as you know, in the last election, despite the pandemic and despite voter suppression and despite the lies, it was the highest voter turnout since 1900. We think we ought to be celebrating that and not trying to undo some of the changes that made that possible.

Mr. AGUILAR. Thank you, Mr. Waldman.

Back to you, Mr. Saenz.

Section 203 of the Voting Rights Act talks about access to limited-English-proficient voters through language assistance. Many jurisdictions locally, we know, fall short of that through access of interpreters and other resources that are necessary.

Can you talk a little bit about how States are failing to meet the needs of limited-English-proficient voters?

Mr. SAENZ. Sure. Well, failing to provide those resources required by Section 203 is the first barrier.

It is often compounded when States or localities place limits, whether by law or in practice, on providing voter assistance to those who may need assistance in a language other than English.

We, for example, at MALDEF are currently challenging a law in Arkansas that, in contravention of the Voting Rights Act, limits the number of voters who someone can assist when they need that assistance to cast an effective ballot.

So we have failure to comply with 203, compounded by restrictions that contradict current law on assisting voters who need that assistance because they have challenges with language.

And I should end, Congressman, by pointing out that all of this has a disparate impact, a discriminatory impact, on our newly naturalized voters who are folks that show by process a greater inclination to participate in voting but are restricted and prevented from doing that by these laws.

Mr. AGUILAR. Thank you so much.

My time is up, Mr. Chairman. Yield back.

Chairman BUTTERFIELD. Thank you, thank you.

At this time, the chair recognizes the Ranking Member of the full Committee for five minutes.

Mr. DAVIS. Thank you, Mr. Chair. Always good to follow my friend Mr. Aguilar. Twice in 1 day. I couldn't ask for more fun, sir.

Mr. Saenz, I would like to start with you.

Why did MALDEF sue to prevent the new Illinois legislative map from going into effect?

Mr. SAENZ. We sued because the legislature, as you know, used ACS figures instead of Decennial Census figures.

I do want to make clear that neither our clients, nor MALDEF, seeks to change the legislature's ability to draw the lines. As you know, there is a State constitutional provision that could shift that responsibility from a legislature to a commission.

But it appears clear to me that it was not the intent of that provision to shift that responsibility based on the happenstance of the delay in the release of Decennial Census data.

So all we seek in that lawsuit is to have the lines redrawn, using Decennial Census data once that data is made available by the Bureau later this summer.

Mr. DAVIS. Well, aside from the clear constitutional issues, sir, why is it important that States like Illinois use Census data instead of population estimates when drawing maps, as you just briefly talked about your lawsuit doing?

Mr. SAENZ. Sure. Thank you, Congressman.

The reason is that the Census is an actual enumeration, as you know, from household questionnaires, of our entire population, whereas the ACS is estimate data based on a sample of households across the country.

Because it is a limited sample, the Census Bureau does not provide numbers except over a 3- to 5-year average. So if you redistrict using ACS data, you will actually be looking at population estimates that go back to 2015, rather than data from the Decennial Census that is from 2020. So among other problems, it is outdated data if it is used to redraw our lines.

Mr. DAVIS. Sir, as you know, the Chicago area has grown in Latino voting-age population exponentially over the last decade. Do you and your organization support drawing another Hispanic majority district in the Chicago area?

Mr. SAENZ. We support it if the Census data indicates that an effective district that would allow Latino voters to elect a candidate of choice can be drawn. That is something we can't assess completely until we have that Decennial Census data.

But certainly it has long been our goal, particularly in a context as you have indicated in Illinois, the Latino community is growing while the whole State's population is shrinking. In fact, as you know, the apportionment here shows that the State's population did shrink over the last decade, that we know from ACS estimates that the Latino population in Illinois grew by over a hundred thousand or more people.

So if it is possible to draw a second effective—another effective Latino majority district, we certainly would be in favor of that.

Mr. DAVIS. Great. I look forward to working with you because I think we know that the only thing that would stop another Hispanic district from being drawn would be pure partisan politics.

Ms. FRANKENSTEIN, can you speak to the Committee about particular Federal impediments you have identified that may reduce the number of Native Americans who cast ballots in Federal elections?

Ms. FRANKENSTEIN. One issue is the popular area of vote-denial claims for lack of satellite offices on reservations.

I can tell you that working with my clients who are elected county officials regardless of their race, whether they are majority White, whether they are majority American Indian, or all American Indian county commissioners, they all face the same concern, and that is lack of funding for such offices and lack of space, buildings to actually locate those.

Where we have found success, however, is where we are able to utilize HAVA funds in order to hire, train, and staff those offices, and pay a lease agreement in order to fund those. I do not believe that preclearance requirements would help in this regard in any way, but it is necessary that we allow—or we provide funding, through HAVA or otherwise, to those cash-strapped counties.

Our reservation counties are funded through property taxes, and land held in trust does not contribute to the property tax base. So the very counties which have more American Indian population have less money to work with. Those are the counties that are sued, requesting satellite offices, and they don't have the funds to create those offices.

So I would encourage more of a focus on funding to allow those capabilities in those counties and less focus on preclearance requirements for those cash-strapped counties.

Mr. DAVIS. Great. Are there any rural mail delivery issues that are part of this?

Ms. FRANKENSTEIN. There can be. Reservation areas, oftentimes they lack a post office or one nearby. It is common for a family—for large families to live together and share a mailbox.

There are concerns among Native American voters as to how to get their ballot to the mailbox or to the post office, and they tend not to trust the postal system. Therefore, they more heavily rely upon election day voting and in-person absentee voting.

Mr. DAVIS. Great.

I see my time is expired. Thank you to the witnesses.

And thank you, Mr. Chair. I yield back.

Chairman BUTTERFIELD. And thank you, Mr. Davis.

At this time, the Chair recognizes the gentlelady from New Mexico, Ms. Leger Fernandez.

Ms. LEGER FERNANDEZ. Thank you, Mr. Chairman.

The witness testimony today and in our earlier hearings laid out multiple examples of how after the *Shelby County* decision communities were forced to bring Section 2 cases as States formerly under preclearance immediately passed laws—or recently as well—to restrict Asian Americans, Latinos, Native Americans, Black Americans access to the polls and their ability to elect candidates of their choice.

They won. Right? They won those lawsuits, many of those lawsuits, proving that gerrymandering and changes in laws and procedures were unlawful, in contrast to, as Mr. Waldman noted, the big lie that there has been fraud in elections, which I would note the courts have rejected. The courts have found that voting discrimination is real and still happening.

Mr. Saenz, it is great to see you again.

Mr. Saenz was the vice president of litigation at MALDEF when I was on the board, so I appreciate having the opportunity to ask him questions again.

Your written testimony noted that it took a decade of litigation to address Texas legislators' splitting of Latinos after primarily Latino population growth gave Texas four new districts. We heard earlier today of a 7-year battle by the Navajo Nation in Utah.

What are the policy consequences for the community when election after election occurs under a system that has deprived Latino voters of the right to vote or elect a representative of their choice?

Mr. SAENZ. Thank you, Congresswoman. Great to see you there.

As you know from your experience with Section 2 litigation, the consequence is elections that go forward under flawed discriminatory systems undermine confidence in our democracy. Because a court later proclaims that elections occurred in the districts that should not have been drawn the way they were, it means that folks were deprived of representation that reflects their views over a significant period of time.

I should note that that Texas litigation did last 8 years. Fortunately there, there were interim maps put in place. But those interim maps did not reflect all of the changes ultimately required by a case that went to the United States Supreme Court twice over the course of those 8 years.

So even in that system with an interim map in place that addressed some of the problems, all of the problems ultimately identified by the three-judge court were not addressed by those interim maps.

And the biggest problem, as you also know from your experience, is that Section 2 litigation is costly. It means that organizations like MALDEF—and there were many others involved in that Texas litigation—that our efforts are diverted from our ability to challenge other deprivations of rights in other parts of the country.

Ms. LEGER FERNANDEZ. Yes. And in Section 2 cases, we also must prove—and do prove—that the failure to have representation often leads to policies, legislative policies, that don't assist those particular communities. So the harm is compounded and compounded.

Mr. Henderson, some of my colleagues have cited the record voter 2020 turnout as evidence that voter suppression is not an issue. What is your response to this?

Mr. HENDERSON. Well, thank you for the question, Congresswoman.

We have seen in a number of jurisdictions that, notwithstanding the extraordinary turnout by voters of color—and I will cite one example, Milwaukee, Wisconsin.

In the primary of 2020, Milwaukee had previously 180 polling places that were reduced to 5. That meant that voters, even with an expanded population, were compressed into casting a vote in a narrower group of eligible precincts.

That meant that in many instances lines of 4 and 5 hours in length were required in order for an individual to cast their vote.

Now, this was at a time when the county in which Milwaukee sat was a hotbed of COVID pandemic development. And, in fact,

I believe in my testimony I cite the fact that the county had, I believe, the highest death rate of African American voters, et al.

And so what we see in county after county is, notwithstanding the increase in voters, there has often been an effort to winnow down the number of places that voters could cast ballots. And that meant, of course, they were faced with the prospect of long lines under difficult circumstances in trying to cast their ballot. And we have only now begun to really assess that for its true impact.

Ms. LEGER FERNANDEZ. Thank you, Mr. Henderson.

In New Mexico, we saw some of those lines, and in H.R. 1, we have provided that there is a 30-minute time limit by which all voters—all voters—should be able to cast their ballots.

Mr. Chairman, my time has expired, and I yield back.

Chairman BUTTERFIELD. Thank you.

The gentleman from Wisconsin. I don't know—you are not from Milwaukee, but you are from the State of Wisconsin.

Mr. STEIL. I have the great honor of representing part of Milwaukee County.

Chairman BUTTERFIELD. You do?

Mr. STEIL. But I am from Wisconsin, from Janesville.

Mr. BUTTERFIELD. All right. You are recognized for rebuttal.

Mr. STEIL. Thank you. I am actually going to be adding onto the comments. I don't know that this will be a full rebuttal.

Before I dive in, I would like to just insert to the record, if I can, two articles. One, a Journal Sentinel article titled, "Eric Holder Addresses Wisconsin Redistricting Panel, Prompting Criticism." And another article titled, "Washington Post Denounced for Report on Stacey Abrams, Dems' 'Evolution' on Voter ID."

Chairman BUTTERFIELD. Both articles, without objection, will be received.

[The information follows:]

# Eric Holder addresses Wisconsin redistricting panel, prompting criticism from GOP

**Patrick Marley**, Milwaukee Journal Sentinel

Published 7:56 p.m. CT Oct. 1, 2020 | Updated 8:27 p.m. CT Oct. 1, 2020

MADISON – Gov. Tony Evers' redistricting commission heard from former U.S. Attorney General Eric Holder at its first meeting Thursday, as Republicans and Democrats squabbled over whether the panel's work will be tainted by partisanship.

The Democratic governor has called for drawing election maps in a nonpartisan way, but the panel he has assembled tilts toward his party.

Three of the nine commissioners have donated to Democratic candidates (compared with one who has donated to Republican candidates). One of the judges who helped select the commissioners recently endorsed Democratic presidential nominee Joe Biden.

And the marquee testimony Thursday came from Holder, who served as President Barack Obama's attorney general and now leads the Democratic National Redistricting Committee.

**ARCHIVES:** New election data highlights the ongoing impact of 2011 GOP redistricting in Wisconsin

Republican state lawmakers said that showed the panel is biased, but commissioners said in their virtual hearing all they want to do is draw fair maps.

"Our goal is not to get bogged down in politics and our goal is not to infight, not to address this important task with the party line's approach," said the commission's chairman,

Eric Holder addresses Wisconsin redistricting panel; GOP critical

9/27/21, 12:37 PM

Christopher Ford, who has not made political donations.

"We hope to create a map free of partisan bias and advantage."

Anthony Phillips, who has given about \$7,400 to Republicans, said he got involved because he sees gerrymandering as a cause of government dysfunction.

"I feel, like most of us, that our democracy is a bit of a mess," he said. "And I'd like to ensure a better democracy for our children."

But GOP legislative leaders see it differently.

"The commission is hardly nonpartisan with (Gov. Scott) Walker recall signers, contributors to political candidates, members of a liberal organization and (a role for) a judge who just endorsed Joe Biden for president," said a statement from Assembly Speaker Robin Vos of Rochester.

His swipe at a liberal organization was a reference to two commissioners belonging to the League of Women Voters of Wisconsin, which has pushed for nonpartisan redistricting and sided with Democrats on much of its lobbying agenda.

In a brief appearance, Holder noted Republican lawmakers took just seconds last year to shut down a special legislative session on requiring background checks for all gun purchases even though the idea is supported by 80% of Wisconsinites.

"That is the kind of political cowardice that you see when people lock in legislative power through gerrymandering," Holder said.

"Gerrymandering's corrosive effects on our politics have contributed to gridlock and polarization, and that then leads to cynicism too many Americans feel about our government. Gerrymandering is truly an attack on our democracy. We now have politicians who are unaccountable to the people."

Andrew Hitt, chairman of the state Republican Party, said having Holder testify made it plain that the commission is stacked for Democrats.

"The idea that Governor Evers' commission is somehow 'nonpartisan' is a joke," he said in a statement.

Also testifying Thursday was Ruth Greenwood, an attorney with the Campaign Legal Center of Washington, D.C. She represented Democrats in a challenge to Wisconsin's maps but also went to court to fight a Maryland map that hurt Republicans.

She has also worked to prevent gerrymandering by Democrats in Illinois, Virginia and Colorado.

"My passion for fair maps has nothing to do with whatever party might be in the majority in a state at any given time," she said by email. "I will keep working with people of all parties to ensure that the voices of voters, not politicians, are heard through (the) redistricting process and in the resulting plans."

States must draw new election maps every 10 years after each census to account for changes in populations. The shape of the districts can play a decisive role in which party controls state legislatures and Congress.

Republicans in Wisconsin controlled all of state government in 2011 and were able to draw maps that benefited them. This time, they may have to negotiate with Evers because of his veto powers.

The commission Evers has formed has no formal powers. He wants the Legislature to take up the maps that it draws, but Vos and other Republicans have said they won't do that.

"The Wisconsin Constitution clearly places the responsibility of redistricting with the Legislature, not with a partisan commission," Vos said in his statement. "We will be following the constitution. The bill will go through the regular legislative process, which will allow for legislative and public input."

If Republicans and Democrats can't agree on maps, courts will have to decide where the district lines go. In that case, it's possible the commission's maps would be presented to the courts for them to consider.

The commission was selected by a panel of three retired judges, including former state Supreme Court Justice Janine Geske, who endorsed Biden last month.

## Washington Post panned for report on Stacey Abrams, Democrats' 'evolution' on voter ID: 'An absolute disgrace'

'Republicans flip-flop. Democrats evolve,' one critic reacted

By Joseph A. Wulfsohn | Fox News

### Media top headlines June 21

Reporters and activists rushing to judge Florida Pride parade crash before investigation, The Washington Post getting knocked for painting Biden as 'deeply Catholic,' and CNN getting shredded for misleading headline on GA voter roll purge round out today's top media headlines

The Washington Post was slammed on Monday for a report on the apparent "evolution" prominent Democrats have made when it comes to voter ID laws.

<https://www.foxnews.com/media/washington-post-stacey-abrams-democrats-evolution-voter-id>

Washington Post panned for report on Stacey Abrams, Democrats' 'evolution' on voter ID: 'An absolute disgrace' | Fox News

9/27/21, 12:40 PM

Last week, Sen. Joe Manchin, D-W.Va. attempted to spearhead his own voting rights legislation in hopes of getting some bipartisan support, which is looking grim despite it being a more moderate shift from the liberal For the People Act.

However, former Georgia gubernatorial candidate Stacey Abrams raised eyebrows by suggesting she's open to Manchin's bill, which requires voter ID.

"No one has ever objected to having to prove who you are to vote," Abrams said on CNN last week. "It's been part of our nation's history since the inception of voting."

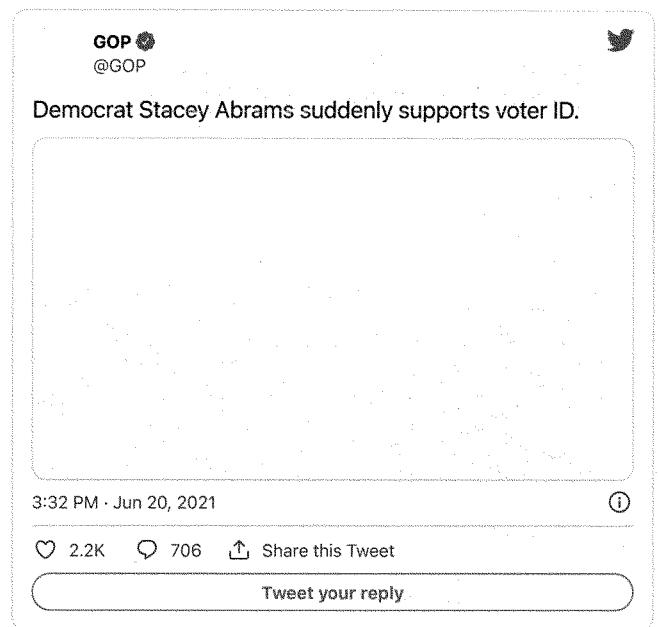

**USA TODAY EDITS STACEY ABRAMS OP-ED PUBLISHED BEFORE MLB PULLED GAME IN ATLANTA, WATERS DOWN BOYCOTT SUPPORT**

But as the RNC pointed out over the weekend, the Georgia Democrat had a sharply different stance just two months ago, linking voter ID requirements to "Jim Crow."

"Voters without a driver's license or state ID must surrender their personal information and risk identify theft just to receive an absentee ballot," Abrams said while plugging her "Stop Jim Crow 2" website in opposition to Georgia's election reform legislation. "And then there are the 200,000 Georgia voters who don't have either ID and the punitive free ID that's not free when you factor in the cost of transportation and the cost of an underlining document."

Washington Post panned for report on Stacey Abrams, Democrats' 'evolution' on voter ID: 'An absolute disgrace' | Fox News 9/27/21, 12:40 PM

The Washington Post appeared to whitewash her stance and Democrats broadly, running the headline, "Stacey Abrams and the Democrats' evolution on voter ID."

"It still isn't clear exactly what will happen with Sen. Joe Manchin III's middle-ground proposal on voting rights... But regardless of what happens with the bill, Manchin's proposal has moved the needle in one significant way: signaling a softening by key Democrats on voter ID," Post senior reporter Aaron Blake wrote. "Among the carrots for Republicans in Manchin's proposal is a voter ID provision. Republicans pushed voter ID hard at the state level in recent years. But rather than merely describe Manchin's voter ID proposal as a concession, some key Democrats have suggested they don't really object to it — or the broader concept — at all."

Blake outlined the current stances of Abrams and Sen. Raphael Warnock, D-Ga., both of who claimed they never opposed voter ID laws and acknowledged that critics on the right have

<https://www.foxnews.com/media/washington-post-stacey-abrams-democrats-evolution-voter-id>

9/27/21, 12:40 PM

accused Democrats of "hypocrisy and revisionism."

**WASHINGTON POST COLUMNIST KNOCKS JON STEWART FOR PUSHING WUHAN LAB-LEAK THEORY: CELEBRITIES AREN'T 'EXPERTS'**

"There is some real nuance in these past comments — and nuance in voter ID proposals, which Republicans have in the recent past sought to gloss over," Blake defended the Democrats. "Both Abrams and Warnock emphasized last week that they didn't oppose voter ID out of hand, but rather that they just opposed specific types of more-restrictive voter ID such as the ones Republicans proposed in recent years. Manchin's proposal is significantly less stringent than most every Republican effort, allowing voters to produce things such as utility bills rather than photo identification."

Blake later called the tonal shift a "significant rhetorical concession from some key Democrats" and that while they don't want to make it "look like they have abandoned their past principles," they "increasingly seem eager to fight more winnable battles" amid polls showing overwhelming support for voter ID requirements.

<https://www.foxnews.com/media/washington-post-stacey-abrams-democrats-evolution-voter-id>

Mr. STEIL. Mr. Henderson, I appreciate you bringing up the case of Milwaukee. I think it is actually really important. I don't think everybody fully appreciates how the spring election in Milwaukee played out, how it played out very differently than other cities across the State of Wisconsin during the spring 2020 election.

Milwaukee, correctly, as you noted, did reduce the number of polling locations, and it is correctly identified by my colleague here, from 180 to 5. And I think that is a pretty important point to recognize.

Do you know who appoints the elections administrator in the city of Milwaukee?

Mr. HENDERSON. I do not.

Mr. STEIL. It is a good—it is a worthwhile point, because I think it would enhance your written testimony. It is the Democratic mayor of Milwaukee, Tom Barrett.

It is also worth noting and it is kind of interesting, at that election, he was actually running in a primary for the election for mayor against an African American woman. And so I think it is worth noting.

And I think it is actually interesting, the last time Republicans held the mayorship of Milwaukee, the city, is 1908. And the last time anyone held the—besides a Democrat—was actually 1960, and it was a Socialist.

So it went from Republican to Socialist to Democrat, and it has been held by Democrats since 1960.

And so while I share some of your concerns about what played out, I think it is very worthwhile for this Committee to recognize that it was under a period of time of Democratic control, and it was a Democratic appointee that made the decision to reduce the number of polling locations from 180 to 5.

And meanwhile, 70 miles away to the west, another very liberal city, Madison, Wisconsin, actually only reduced their polling locations from 92 to 66.

So in an area that was disproportionately African American in the city of Milwaukee, a Democratic-appointed elections official made that decision.

I think your testimony is spot on, but I think it could be enhanced by noting some of that background, and I hope you have the opportunity to look into it.

Mr. HENDERSON. Mr. Steil, may I respond? Because I think you are making a point that my organization emphasizes regularly.

We are a nonpartisan organization. We operate under the view that voting really is the language of democracy. It is not a partisan issue. It is a national issue.

And regardless of who is in control, the evidence that you cited and that I cited is evidence of the fact that the voting laws need to be enhanced and protected for all.

Obviously, there are—

Mr. STEIL. Let me reclaim my time. I wanted to give you the moment to reply, and I appreciate it. I think we do share that, is that we are enforcing the laws on the books. I think that is a very important point, that we are not changing the rules of the road as we go.

But if I went back to your testimony, you noted that the Republican majority in the State refused to give people a few extra days to turn in their mail-in ballot, which I think actually would change the rules of the road as we go, because voting was ongoing at a period of time where you would look to then change the rules.

Is that fair?

Mr. HENDERSON. But I would argue that the pandemic clearly was an intervening factor that warranted a review of the voting procedures to determine whether amendments were necessary.

Certainly no one would argue that as the country was battling the height of the pandemic and that people were dying at amazing rates, that we should not have taken a closer look at how we exercised in-person voting.

Mr. STEIL. I think we definitely should have taken a look. I think changing the rules of the road while voting is ongoing is a very dangerous path to go down.

But let's pause that. Let me shift gears to Ms. Frankenstein, if I can.

Chief Justice Roberts in the *Shelby* case quoted as saying that a lot has changed since 1975, and while racial discrimination, any racial discrimination in voting is too much, Congress must ensure that the legislation it passes speaks to current conditions.

And so recognizing that the voting access for minorities in 1964 and 1965 was very different than it is today in 2021, and that thankfully we have made a lot of progress in righting historical wrongs, is a preclearance formula necessary, in your opinion, Ms. Frankenstein?

Ms. FRANKENSTEIN. In my opinion, it is not. I have cited to you the statistics of South Dakota and those laws that sought preclearance in our previously covered counties. As you heard me testify earlier, none were not granted preclearance.

I think it is also an antiquated concept to look instead at whether ballots are offered in an indigenous language, if you will also look to whether or not the Tribe in the respective county holds its Tribal elections using an indigenous language.

Mr. STEIL. Only because we are short on time. I would love you to be able to keep going. I am short on time. I am recognizing the time.

And, Mr. Chairman, I yield back.

Chairman BUTTERFIELD. All right. I was distracted. Mr. Steil, did you yield back?

Mr. STEIL. I did yield back.

Chairman BUTTERFIELD. Thank you, and thank you very much for your statements.

The Chair will now recognize himself for five minutes, and I will start with Ms. Nelson.

Ms. Nelson, I know LDF has been collecting information and data for as long as I can remember and probably before I was born. It has been a data collection agency as well as a litigating agency.

Have you been collecting information since the *Shelby County* decision? And I know we don't have the time for you to recite it verse after verse, but can you give us a summary of what the record shows based on the information you have collected since 2013?

Ms. NELSON. Absolutely. The Legal Defense Fund has a report that we admitted into the record. It is called "Democracy Diminished: State and Local Threats to Voting Post-Shelby County, Alabama v. Holder."

And in that report we maintain an ongoing catalog of the discriminatory voting changes in jurisdictions that were formerly protected by Section 5. And we submit that these are voting changes that would likely have been prevented had Section 5 still been in place.

What we have seen over time is that there has been a proliferation of laws across the country that otherwise would have never come to see the light of day, would have never infringed on voters' rights had Section 5 been in place.

We know this because immediately after the *Shelby County* decision, in places like Texas and Alabama and other covered jurisdictions, those election officials resurrected laws that had been prohibited from going into effect by Section 5.

Chairman BUTTERFIELD. Have you published these voting changes in your website? Have you released those?

Ms. NELSON. We do.

Chairman BUTTERFIELD. I know the Brennan Center does that.

Ms. NELSON. They are on our website, and they are routinely updated.

Chairman BUTTERFIELD. All right. So any citizen can go to your website or to the Brennan Center website and look at those changes. Is that right?

Ms. NELSON. That is correct.

Chairman BUTTERFIELD. All right. Let me just change gears, and the time goes so fast when you have the microphone.

During the Juneteenth debate a few weeks ago, Congressman Jim Clyburn of South Carolina said one of our greatest shortcomings here in Congress is that we fail to communicate.

And I think, when I go into my district and I talk about Section 5 and Section 2 and the importance of the Voting Rights Act, oftentimes those who are doubtful would ask the question, Why is it necessary to have a large number of African Americans or Hispanic Americans in an electoral district? Why is that important?

And sometimes that gets me back on my heels when I get the question asked because the response to that is so basic and is so clear. It is called racially polarized voting.

The fact of the matter is, in many places throughout the country—and it is not in every community—but in many places throughout the country a lot of voters vote along racial lines regardless of the qualifications of the candidate or the preferences of the community, which means that if African Americans are a minority within a community, then the majority, if they vote along racial lines, that inherently discriminates against a minority group. And when you explain that and communicate that to individuals, they begin to see what this is all about.

The other thing that people confuse is Section 2, vis—vis Section 5. Section 2 is very expensive. I recall back in the 1980s, Mr. Waldman and Mr. Henderson, it cost hundreds of thousands of dollars, and I suspect it is in the millions now, to litigate a Section

2 claim, not to mention the fact that it could take months or years to do so.

I had a Section 2 claim in 1982 that it was not until 1985 when it was finally decided by the court. And so it is very expensive, and it is very time-consuming.

And the standard of proof in a Section 2 claim is not only intentional discrimination, but in 1982 Congress changed the law to a lower standard, which is discriminatory result. And so that is the standard that you are guided by in Section 2.

Section 5 is so much different. That is a retrogression standard. You simply take the proposed change, you compare it to existing laws, and see if there is any retrogression in the effect that it has on minority voters.

Have I said anything, Mr. Waldman, that you disagree with?

Mr. WALDMAN. No. I think you have stated it very well.

And, again, when Section 5 was in effect, it was a predictable regime that counties and States all across the country handled without much muss or fuss. It was a step forward for the country, and it was something that everybody was able to deal with. And what is needed now is, in effect, to modernize the coverage formula so that it can work again.

Chairman BUTTERFIELD. My first Section 5 claim was in 1982. I still have the records from it. I am writing my book now, and so I had to refer to it the other day. And in 1982, I complained about staggered terms, my county commission going from an at-large system to staggered terms.

And DOJ took it up, evaluated it for 60 days, they asked for more information. The county provided more information. And DOJ approved it.

And then, after another change that took place, we finally litigated under Section 2 and we won the case. The county was divided into seven districts. And now, instead of an all-White board of commissioners, we have three African Americans, four White Americans, and everything is reasonably well. I am not going to say it is perfect, but it is reasonably well.

And so the Voting Rights Act is a very serious piece of legislation that is deserving of our attention. It protects democracy.

And, Mr. Henderson, you made a statement a minute ago that it is what for our democracy? It is the language, did you say, of our democracy? May I adopt that as one of my talking points? I like that. It is the language of our democracy.

And so thank both of you, thank all of you for your testimony.

Do we have any other members who have returned to the meeting?

Yes?

Mr. AGUILAR. Just a point of clarification, Mr. Chairman. I know I speak on behalf of the Committee members. We just want to know if we are going to get an advanced copy of your book and if you can write a—I know Mr. Steil and Mr. Davis would really appreciate it.

Chairman BUTTERFIELD. Well, I have been writing it—

Mr. AGUILAR. They have a lot to learn.

Mr. STEIL. It is quite the story. I would read it.

Chairman BUTTERFIELD. I have been writing this thing, I want you to know, for many years now, and finally my editor told me a few months ago that I really needed to separate it into two books, one book on community history.

Mr. Henderson's second cousin, who is also a local historian in my hometown, she and I are the local historians. And so I have been advised to separate what they call community history from memoirs. And so now, instead of one book, it is now going to be two books.

But anyway, just for public recognition, Mr. Henderson's second cousin is named Lisa Y. Henderson, who is from Wilson, North Carolina, but lives in Atlanta, Georgia. She is a real scholar.

So thank all of you. Thank all of you.

Is there any other business to come before the Subcommittee before we adjourn?

All right. I have some housekeeping matters that we need to attend to.

I ask unanimous consent that we enter the following articles in the record.

From Mother Jones, it is entitled, "The Dog That Voted and Other Election Fraud Yarns: The GOP's 10-year campaign to gin up voter fraud hysteria—and bring back Jim Crow at the ballot box," end of quote.

The next is from the Free Press of Ohio. It is entitled, "Ohio, the DOJ scandal, and 'Thor'—the god of voter suppression."

Okay. The third is from—you have to appreciate our staffs on both sides of the aisle. They work hard.

The third and final one is from the Daily Kos, quote, "198-Thor: GOP 'Voter Fraud' Lawyer Thor Hearne"—I am going to stop right there.

Without objection, these three will be included in the record.

[The information follows:]

## The Dog That Voted and Other Election Fraud Yarns

*The GOP's 10-year campaign to gin up voter fraud hysteria—and bring back Jim Crow at the ballot box.*

KEVIN DRUM

Illustrations by Barry Blitt

**On March 21, 2005,** a sandy-haired 43-year-old attorney named Mark “Thor” Hearne took a seat under the Greek Revival dome of the Ohio Statehouse to

testify before the House Administration Committee. The committee was holding a field hearing on the subject of voter fraud, a hot topic in Congress—and in Ohio, where George W. Bush had eked out a narrow, hotly contested victory over John Kerry the year before.

Hearne introduced himself as counsel for the American Center for Voting Rights. The Buckeye State, he said, had suffered from “massive” registration fraud during the presidential election. Liberal groups like ACORN and the AFL-CIO were implicated in illegal voter registration schemes. An NAACP operative had paid for fake registrations in crack. Then, after enrolling thousands of phony voters, these same groups had flooded the courts with lawsuits designed to create bedlam on Election Day and prevent fraudulent votes from being discovered. To back up his story, Hearne submitted a 31-page report, signed by more than a dozen Ohio attorneys.

It was a startlingly lurid picture—and the latest chapter in a long-simmering feud between Republicans, who claim that fraud is rampant in US elections, and Democrats, who say such charges are merely an excuse to suppress the vote. Still, there was something different about this episode. It wasn’t just a one-off bit of bluster during a bitter recount battle. That would have been politics as usual. Instead, it marked a dramatic widening of the war. This was, after all, a congressional hearing, and Hearne represented an organization dedicated to pushing Republican claims of voter fraud not just during post-election court fights, but everywhere and all the time.

So two questions lingered after Hearne had finished his dramatic testimony. Who exactly was Thor Hearne? And what was the American Center for Voting Rights, a group no one had heard of before that day? Therein hangs a tale, one that starts on a nail-biter of an election night in a nearly forgotten battleground—St. Louis, Missouri.

**On election day 2000, as** officials in Florida wrestled with butterfly ballots and hanging chads, Thor Hearne—then the Missouri counsel for the Bush-Cheney campaign—faced a crisis. It had been a frantic day marked by long lines, improper purging of names from voter lists, and hundreds of voters turned away from the polls. As the problems in the overwhelmingly Democratic city mounted, the Gore campaign went to court to ask that the polls stay open three more hours. A judge granted the request, but Hearne appealed, and in short order, the decision was overturned.

Republicans were apoplectic over the Democrats' maneuver. At stake were not only Missouri's Electoral College votes, but also the fate of GOP Sen. John Ashcroft, who was locked in a tough reelection battle against a popular longtime rival, Democratic Gov. Mel Carnahan. Carnahan had died in a plane crash a few weeks before the election, but his widow, Jean, was set to serve in his stead. In the end, even as Bush carried the state, Ashcroft lost to a dead man.

Missouri's senior senator, Kit Bond, fumed that Democrats had conducted "a criminal enterprise" designed to fraudulently register voters during the campaign and then create chaos on Election Day to cover it up. Republican losses, Bond told reporters, were due in part to dogs and dead people voting. Ritzy Meckler, a springer spaniel whom some jokester had registered to vote by mail, became a cause célèbre. A few months later, Missouri's Republican secretary of state, Matt Blunt, released a report concluding that St. Louis Democrats had mounted "an organized and successful effort to generate improper votes in large numbers."

It turned out there was nothing to these charges—no evidence ever surfaced of intentional fraud, only of confusion and bad management. But it didn't matter. Hearne, Ashcroft, and Bond were now obsessed with voter fraud, and with Bush in the White House they had the power to do something about it.

Ashcroft went first. Having been appointed Bush's attorney general, he quickly rolled out a new program to train US Attorneys and others to recognize and prosecute voter fraud. He also announced that he would designate special officers throughout the country to receive Election Day complaints about voter fraud and voter intimidation. "Election crimes are a high law enforcement priority of the Department," his office announced. (Just how high a priority would become apparent a few years later.)

Then it was Bond's turn. Shortly after Florida's shoddy procedures became a national sensation in 2000, Congress began work on legislation to clean up the voting system. For the most part this was a bipartisan effort; both Democrats and Republicans had been appalled by the hanging-chad spectacle. The Help America Vote Act (HAVA) passed by huge majorities in October 2002 and was signed a few days later by President Bush.

But along the way, Bond made sure that the act was also a vehicle for his voter fraud crusade. Bond regaled reporters and senators with his tales of brazen abuses, often invoking Ritzy Meckler (who, it should be noted, never cast a ballot). The only way to fix these problems, he said, was to make sure each voter had to show ID at the polling place.

In the end, HAVA's identification requirement was a modest one. It applied only to first-time voters in federal elections who, like Ritzy, had registered by mail, and it directed states to accept a wide variety of ID types. But even so, it was a historic first. Suddenly, voter fraud—real or otherwise—was in the national spotlight.

Republicans kept up the drumbeat of complaints for two years. As the 2004 election approached, the pace picked up. John Ashcroft launched new fraud investigations in swing states. Karl Rove, who earlier in his career had turned a razor-thin loss in an Alabama judicial race into a razor-thin victory by insisting that his client had been robbed—and eventually getting the Supreme Court to agree—went on Sean Hannity's show to warn that "there has been a lot of voter registration fraud" in battleground states. Conservative journalist John Fund published *Stealing Elections*, a book claiming that shady vote-buying schemes by Democrats had left America's elections resembling those of "an emerging Third World country." Right-wing blogs trumpeted the case of Mac Stuart, a former ACORN employee who claimed he had been fired for refusing to go along with illegal voter registration activities in Florida.

And Thor Hearne? Well, his good work in Missouri had not gone unnoticed. He was now serving as national counsel for the Bush-Cheney reelection campaign.

But if Republicans spent the 2004 election season feverishly warning that Democrats were scheming to steal the White House, it was nothing compared to the furor among Democrats *after* the election. The early exit polls on Election Day had suggested that John Kerry was leading in virtually every key state, including the crucial battleground of Ohio. Yet by the time all the actual votes were counted, Kerry's anticipated victory turned into a narrow loss—by a mere 120,000-vote margin in Ohio—and Bush secured a second term.

Outrage boiled over immediately, and not just around muttered conspiracy theories that Republicans might have rigged Ohio's Diebold voting machines. Balloting problems were so widespread in 2004 that when the Democratic staff of the House Judiciary Committee wrote a report titled "What Went Wrong in Ohio," the executive summary alone was three pages long. The bill of particulars was damning: Misallocation of voting machines led to long lines in Democratic precincts; Republicans knocked minority voters off the rolls with "caging" tactics (sending letters to voters' listed addresses and purging those whose mail was returned); some 93,000 ballots were declared spoiled and left uncounted. The report blamed one man above all for these problems: Ohio's Republican secretary of state, Kenneth Blackwell, who was also a state co-chair for the Bush-Cheney campaign. In one notorious move, Blackwell ordered county election boards to reject voter registration forms printed on paper of "less than 80 lb. text weight." (This order, at least, was later rescinded.)

It was against this backdrop that Thor Hearne took the stand before the House Administration Committee in March 2005 to talk about the Ohio election—and shift the focus back to where Republicans felt it belonged, on deception by *Democrats*. And it was against that same backdrop that GOP legislatures across the nation began rolling out a brand new weapon in the voter fraud wars: the photo ID mandate.

In the past, states had accepted a variety of documents, such as utility bills and bank statements, to verify that a voter was who he said he was. But in '05, Republicans in Indiana pushed through a law to change all that. It called, for the first time, for photo ID only, no exceptions.

Democrats opposed the bill, arguing that it was just a cynical effort to make it harder for people with no picture ID—often the young, the poor, and the nonwhite—to vote. The bill passed nonetheless, on a party-line vote. Then it was challenged in court, and three years later, in *Crawford v. Marion County Election Board*, the US Supreme Court handed down a key decision upholding the photo ID requirement. Sure, wrote Justice John Paul Stevens for the majority, the law might have been motivated in part by Republican “partisan interest.” But so long as its goals were supported by “valid neutral justifications,” it was constitutional.

With that, the floodgates opened. According to the National Conference of State Legislatures, 16 states have now passed photo ID laws, and bills are pending in 11 more.

**In retrospect, the campaign** against voter fraud was long, patient, and strategic. Sen. Kit Bond got the ball rolling in 2002 when he made sure ID requirements were part of HAVA. In 2005, a commission on voting rights headed by former president Jimmy Carter and former Secretary of State James Baker III gave a bipartisan blessing to photo ID rules. Thor Hearne spent the following two years barnstorming the country with dramatic tales of voter fraud. Meanwhile, the Justice Department and the Bush White House browbeat US Attorneys around the country to crack down on voter fraud, even firing a handful (including David Iglesias, then the US Attorney for New Mexico) who apparently weren’t zealous enough. And then, finally, the 2010 election brought new GOP majorities to 11 states—and with them a brand new wave of restrictive voting laws.

At this point, you may be wondering if there’s really anything wrong with all this. What’s the problem with cracking down on voter fraud? And why *shouldn’t* voters be required to show photo ID? If you need ID to cash a check or buy a six-pack, why not to vote?

The answer—surprising to many—is straightforward: Not everyone has, or can easily get, a photo ID. If you don’t drive, you don’t have a driver’s license. If you’re poor, you probably don’t have a credit card. And if you’re unbanked and don’t need ID to buy liquor, you probably don’t have much need for photo ID at all.

Once that sinks in, the electoral significance becomes obvious. In 2007, shortly before the *Crawford* decision was handed down, the Washington Institute for the Study of Ethnicity and Race released a study of Indiana voters showing that among whites, the middle-aged, and the middle class, about 90 percent possessed photo ID. Among blacks, the young, and the poor—all of whom vote for Democrats at high rates—the rate was about 80 percent. Overall, 91 percent of registered Republicans had some form of photo ID, compared to only 83 percent of registered Democrats.

Likewise, an NAACP report in 2011 concluded that the recent flood of new voter ID laws had a “disproportionate impact on minority, low-income, disabled, elderly, and young voters,” prompting an NAACP official to dub these laws “James Crow, Esquire.” Attorney General Eric Holder last year blocked South Carolina’s new photo ID law, noting that more than 80,000 minority voters in the state don’t have driver’s licenses.

Still, Republicans argue, anyone can obtain a photo ID with a modest amount of effort if they really want to vote. And isn’t this small amount of inconvenience worth it in order to crack down on fraud?

Sure—but first there needs to be some actual fraud to crack down on. And that turns out to be remarkably elusive.

That’s not to say that there’s none at all. In a country of 300 million you’ll find a bit of almost anything. But multiple studies taking different approaches have all come to the same conclusion: The rate of voter fraud in American elections is close to zero.

In her 2010 book, *The Myth of Voter Fraud*, Lorraine Minnite tracked down every single case brought by the Justice Department between 1996 and 2005 and found that the number of defendants had increased by roughly 1,000 percent under Ashcroft. But that only represents an increase from about six defendants per year to 60, and only a fraction of those were ever convicted of anything. A *New York Times* investigation in 2007 concluded that only 86 people had been convicted of voter fraud during the previous five years. Many of those appear to have simply made mistakes on registration forms or misunderstood eligibility rules, and more than 30 of the rest were penny-ante vote-buying schemes in local races for judge or sheriff. The investigation found virtually no evidence of any organized efforts to skew elections at the federal level.

Another set of studies has examined the claims of activist groups like Thor Hearne's American Center for Voting Rights, which released a report in 2005 citing more than 100 cases involving nearly 300,000 allegedly fraudulent votes during the 2004 election cycle. The charges involved sensational-sounding allegations of double-voting, fraudulent addresses, and voting by felons and noncitizens. But in virtually every case they dissolved upon investigation. Some of them were just flatly false, and others were the result of clerical errors. Minnite painstakingly investigated each of the center's charges individually and found only 185 votes that were even *potentially* fraudulent.

The Brennan Center for Justice at New York University has focused on voter fraud issues for years. In a 2007 report they concluded that "by any measure, voter fraud is extraordinarily rare." In the Missouri election of 2000 that got Sen. Bond so worked up, the Center found a grand total of four cases of people voting twice, out of more than 2 million ballots cast. In the end, the verified fraud rate was 0.0003 percent.

One key detail: The best-publicized fraud cases involve either absentee ballots or voter *registration* fraud (for example, paid signature gatherers filling in "Mary Poppins" on the forms, a form of cheating that's routinely caught by registrars already). But photo ID laws can't stop that: They only affect people actually trying to impersonate someone else at the polling place. And there's virtually no record, either now or in the past, of this happening on a large scale.

What's more, a moment's thought suggests that this is vanishingly unlikely to be a severe problem, since there are few individuals willing to risk a felony charge merely to cast one extra vote and few organizations willing or able to organize large-scale in-person fraud and keep it a secret. When Indiana's photo ID law, designed to prevent precisely this kind of fraud, went to the Supreme Court, the state couldn't document a single case of it happening. As the majority opinion in *Crawford* admits, "The record contains no evidence of any such fraud actually occurring in Indiana *at any time in its history*."

This mountain of evidence suggests to most liberals that there's another agenda at work: suppressing votes from Democratic-leaning populations. And Minnite's research confirms a partisan tilt. Today's voter ID laws are championed "almost exclusively by Republicans," she told me, and, with only one exception, have been enacted only when Republicans have unified control in a state capitol.

**There's more to voter suppression** than just photo ID laws, of course (see our [related charts](#)), and the [Brennan Center](#) has identified a host of other tactics that have sprung up over the past few years. Some states have ended Election Day registration. Others have restricted early voting, which is more heavily used by minority voters. Laws requiring proof of citizenship have been proposed in a dozen states—a legislative push closely associated with the right-wing campaign against illegal immigration. Laws making it harder for students to vote have mushroomed. And last year Florida placed such stringent rules on voter registration drives that the League of Women Voters simply stopped conducting them.

None of this is a coincidence. In the same way that ACVR and Thor Hearne helped win the public-opinion war following the 2004 election, the conservative American Legislative Exchange Council [picked up](#) the ball after the 2008 election with model voter fraud measures that were prepackaged and ready to be enacted. With Republican majorities in place across the country, state lawmakers were eager to pass laws restricting voting rights. ALEC made it easy.

Yet as important as all these tactics are, photo ID laws remain the spearhead of the push to restrict voting rights. So it's fair to wonder how much impact these laws have in real life.

The answer: It's not entirely clear. The Brennan Center generated a lot of headlines for a recent report suggesting that upwards of 5 million voters could be affected just by laws passed in 2011. But a 2009 study published in *Politics* on the actual impact of voting law changes concluded that "voter-ID laws appear to have little to no main effects on turnout."

Minnite, along with coauthor Robert Erikson, concluded much the same in a 2009 paper. They specifically investigated turnout among vulnerable groups in states with varying types of voter ID laws, and although they did find an impact, it was quite small and nowhere near statistically significant. "The moral is simple," they concluded. "We should be wary of claims—from all sides of the controversy—regarding turnout effects from voter ID laws."

As more states enact strict photo ID laws and the number of affected voters increases, it's possible that empirical studies will more reliably show an effect. But it will likely remain fairly small, according to Rick Hasen, an election law

expert at the University of California-Irvine. “Whether it’s really affecting a whole bunch of votes,” he told me, “I’m skeptical.”

The reason for this is pretty simple: Only about a tenth of the voting-age population lacks some form of photo ID, and that tenth includes a lot of demographic groups that already have low turnout in state and federal elections. That means a large number of them probably didn’t intend to vote in the first place, so the new laws have no real effect on them. Of the rest, many will go ahead and get the requisite form of ID even though it’s an extra effort. It’s only the remainder—say, one-tenth of the original tenth—who want to vote but end up being stopped because they can’t procure photo ID.

Still, in a close race, a modest effect can make a difference, and the cliff-hangers of 2000 and 2004 demonstrate that even presidential contests can hinge on tiny changes in turnout. If photo ID laws give them an advantage, however small, Republicans have an incentive to continue pushing for them.

Hasen offers another possible motivation: The voter wars, he suggests, have become a fundraising issue for both parties. Charges that the other side is stealing elections are incendiary, and promises to pass—or block—voter ID laws can be turned into demagogic appeals for money.

Those things may all be true. But even so, there’s one more layer to the voter fraud crusade.

If you’re the jaded sort, you might write off the whole thing as just another dreary example of cynical politicking. But what you can’t write off is the strong evidence that, as Hasen puts it, there are “underlying racial currents” in these laws.

Statistics tell part of this story: According to a survey by the Brennan Center, 8 percent of voting-age whites lack a photo ID, compared to 25 percent of blacks. Getting an ID card from the state usually requires you to produce a birth certificate, and Barbara Zia of the South Carolina League of Women Voters recently explained what this means in her state: “Many South Carolinians, especially citizens of color, were born at home and lack birth certificates, and so to obtain those birth certificates is a very costly endeavor and also an administrative nightmare.”

In St. Louis, where our story opened, Kit Bond's outrage about dogs and dead people has a long pedigree. It is, a local official told the *American Prospect*'s Art Levine, "code for black people." This kind of racial dog whistling, which relentlessly paints ethnic minorities as corrupt and dishonest, is corrosive not just to our political discourse, but to democracy itself.

The scandal of the photo ID laws, then, isn't so much that they give one party an advantage, or even that they affect minorities disproportionately. The scandal is that they knowingly *target* minorities. So even if the real-life effects of these laws are small, they're impairing civil rights that African Americans and others have spent decades fighting, and sometimes dying, for. This in turn means that something most of us thought was finally taboo—active suppression of minority votes—isn't really taboo after all. As Eric Holder put it in a speech earlier this year, there are those who fear that "some of the achievements that defined the civil rights movement now hang in the balance."

Electoral politics has always been a dirty game, but in recent decades most of us felt that there was, at least, a consensus that systematic, national-level efforts to discourage minority voting were at last beyond the pale. But maybe we were just kidding ourselves.

## Ohio, the DOJ scandal and "Thor" - the god of voter suppression

by Bob Fitrakis

JUNE 18, 2007

The current scandal involving the firing of U.S. attorneys cannot be separated from the Bush administration's scheme to suppress black, poor and working class voters. In order to divert attention from its voter suppression tactics that won Bush the White House in 2000 and 2004, the Bush administration created the myth of "voter fraud." Using fake "voting rights" organizations, obscure groups to finance civil suits and pressure on the U.S. Department of Justice to bring criminal charges against voter registration organizations, Karl Rove and his political operatives like Mark F. "Thor" Hearne have succeeded in undermining the United States' democracy.

"Hearne was one of the most important Bush operatives that almost nobody in America has ever heard of. He applied his vote-suppressing trade from coast to coast, behind the scenes, in a well-funded systematic effort to undermine democracy and keep voters – Democratic voters – from exercising their legal franchise," Brad Friedman, Editor of Bradblog, told the Free Press. Bradblog was the first to reveal Hearne's masquerade as a voting rights advocate.

Hearne's name recently surfaced in the scandal surrounding the White House's firing of U.S. attorneys causing the mainstream media to begin scrutinizing his past political activity. The National Journal has pointed out that Hearne is a "common denominator" in the firing of Arkansas U.S. Attorney Bud Cummins and western Missouri U.S. Attorney Todd Graves. At the time of the firings, Cummins was investigating Republican Governor Matt Blunt's administration, and Graves had refused to indict when partisan charges were brought against the Association of Communities Organizing for Reform Now (ACORN) for a voter registration drive just prior to the 2006 election.

**sd to scandal**

Columbus William Todd has direct ties to two controversial election organizations that are linked to the White House scandal surrounding the firing of U.S. attorneys. Under, Coplan & Aronoff LLP, is challenging Columbus' first African American Mayor Michael Coleman in this fall's election. Between 1993 and 2006, Todd served as an attorney whose website stated that, "Mr. Todd served as litigation counsel in these election matters for groups such as the Free Enterprise Coalition, the American Center for the American Party."

and the American Center for Voting Rights (ACVR) emerged as key players in the Bush administration's voter suppression plan in the 2004 presidential election. The ACVR was widely regarded as a fake voting rights organization created to repress voters while perpetuating the myth of "voter fraud" among Democratic voting blocks.

xists also showed Todd as general counsel for the Ohio Chamber of Commerce and its affiliated Citizens for a Strong Ohio (CSO). In 2005, the Ohio Election Commission was a Political Action Committee (PAC) and making illegal corporate expenditures to influence Ohio Supreme Court races.

the U.S. Chamber of Commerce. In a legal complaint against the U.S. Chamber of Commerce, election rights attorney Cliff Arnsbeck exposed the fact that the Chamber lobbied Republican Supreme Court candidates between 2000-2004, to take over the highest court in Ohio. The role of the U.S. Chamber of Commerce, Karl Rove and the like is detailed in more detail.

rt on the ACVR, pointed out that Todd's connection to the ACVR would likely be enough to sink his candidacy. "Even the mainstream media is paying attention now," he says. Columbus Dispatch reports on Todd's connections to voter suppression groups and his ties to the U.S. attorney scandal.

Hearne "believed that the U.S. attorney . . . Todd Graves was not taking seriously allegations that ACORN workers were registering people who did not qualify to vote," noted the National Journal. Also, Republican attorney William Mateja, "repeatedly contacted" Cummings during the Blunt investigation ". . . at the behest of Hearne, whose law firm [Lathrop & Gage] had retained Mateja on Blunt's behalf," wrote the Journal.

After Graves' dismissal, he was replaced by Bradley Schlozman, who issued an indictment against ACORN workers less than a week before the 2006 election. Cummings was also replaced by Karl Rove operative Timothy Griffin.

The National Journal also reported that two other fired U.S. attorneys, David Inglesias and John McKay, said they believed they were fired because "Republican activists in their states complained that they weren't doing enough to pursue voting-fraud cases."

*Who is scrubbing the Thor Hearne websites?*

As the heat is turned up on Hearne, his past appears to be vanishing from the internet.

As Bradblog noted on June 12, "Mark F. 'Thor' Hearne must really want to hide something about his discredited past as the frontman for the GOP front group calling themselves the American Center for Voting Rights (ACVR)."

Hearne testified before Congressman Bob Ney's Committee on House Administration hearing in Columbus on March 21, 2005 as general counsel for the newly formed "voting rights" group, the ACVR. Incorporated a week before the hearing, the ACVR was ordained by Rep. Ney as a legitimate voting rights group, despite the fact that Hearne served as election counsel to the Bush-Cheney re-election campaign and had no references on his resume to any non-partisan voting rights groups. Congressman Ney is now known as federal prisoner #28882-016 for corruption as a result of his taking gifts from Jack Abramoff, among other charges.

In February 2005, at the urging of Karl Rove and the Bush White House, Hearne founded the ACVR, according to the National Journal. Co-founder Jim Dyke is a former Republican

National Committee (RNC) communications director. The ACVR was a "non-partisan" 501(c)(3) legal and educational center committed to defending the rights of voters and working to increase public confidence in the fairness and outcome of elections, stated their website. The long-standing voting rights group, the League of Women Voters, charged that the ACVR was a Republican front organization.

Hearne's testimony at the Ney hearing was placed on the Moritz College of Law Election Institute website along with Professors Ned Foley and Dan Tokaji. Hearne was given equal billing with Norman Robbins, the head of a non-partisan voting rights group from Cleveland.

Not only does Hearne's Wikipedia page no longer refer to the controversial ACVR, but Hearne's testimony before the Ney hearing is no longer linked to the Moritz College of Law Election Law Institute website. Also, the ACVR website recently disappeared and the National Journal reported, "The group now appears to be defunct."

*Hearne and the myth of voter registration fraud*

As the Free Press reported in 2005, Hearne, with the help of Republican attorney Alex Vogel, concocted a story that the main problem with the 2004 elections in Ohio was that the NAACP was paying people with crack cocaine to register voters. Based on scant evidence and an incident of a volunteer being linked to crack use, Hearne pushed a version of voter fraud in Ohio that directly attacked not only the NAACP, but ACORN, the AFL-CIO and ACT-Ohio. By attacking this combination of groups, Rove and Hearne were targeting the leading forces for registering blacks, poor, union workers and young people in Ohio – those most likely to vote Democratic.

Aided by Vogel, then-attorney for Republican Senate Majority leader Bill Frist, and a front group connected to the U.S. Chamber of Commerce, the Free Enterprise Coalition, local Republican operative Mark Rubrick filed an Ohio corrupt practices lawsuit (RICO) against all the voter registration organizations listed above in Wood County.

The civil RICO case, backed by financing from the Free Enterprise Coalition, alleged that the voter registration groups provided ". . . payments made in connections with the violations (in the form of, among other things, 'bounties,' payments or other rewards for collecting and/or processing the registrations including but not limited to illegal drugs, paid to individuals actually engaged in the violations), . . ." At the bottom of the document filed by attorneys Jeffrey Creemer and Douglas Haynam of Shumaker, Loop & Kendrick of Toledo, the following words appear: "jsclFree Enterprise Coalition\Amended Complaint.doc" calling into question who was behind the lawsuit.

The suit was later quietly withdrawn after election rights attorney Cliff Arnebeck discovered that the Free Enterprise Coalition had indemnified Rubrick and had promised to pay any and all expenses related to his RICO suit. "I told Rubrick in no uncertain terms that his accusations that the NAACP was a criminal organization were false and that the indemnification from the Free Enterprise Coalition wasn't worth the paper it was written on," Arnebeck said.

In writing about the Free Enterprise Coalition (FEC) on May 28, 2007, the website SourceWatch contains the following quote: "No website, no employees, a disconnected

phone and a lapsed corporate registration. Without the 990s, you'd be hard pressed to know the GOP funneled \$2.8 million through the Free Enterprise Coalition to fund election-related legal expenses between 2004 and 2005."

**The vanishing of the FEC is directly tied the growing Department of Justice (DOJ) scandal.**

**Mark F. "Thor" Hearne & election fraud timeline**

- 1976 - Hearne began his association with the Republican Party by serving as a page at both the national and Missouri GOP convention
- 1980 and 1984 - Hearne was an alternate at the Missouri GOP Party convention
- 1986 and 1987 - Hearne worked for the Reagan administration's Department of Education Office for Civil Rights as a law clerk and attorney
- 1988 - Hearne ran for U.S. Congress as a Republican from the Missouri 3rd congressional district
- 2000 - Counsel to the Bush-Cheney campaign and served as the Vice President and Director of Election Operations for the Republican National Lawyer's Association. Hearne called "Brooks Brothers" riot that stopped the Florida recount in one county after the 2000 presidential election. Hearne served as a Republican election observer in Broward presidential recount
- 2002 - Hearne was the Republican lawyer who led the Missouri legislative redistricting fight
- 2004 - Counsel to Bush-Cheney re-election campaign
- 3/21/05 - Hearne shows up masquerading as a "non-partisan voting rights activist" and testifies under the auspices of the newly created American Center for Voting Rights in the Ohio 2004 presidential election, accusing voter registration groups of fraud
- 4/27/05 - Free Press exposes Hearne's role in Ohio in an article "How Blackwell and Petro Saved Bush's Brain"
- 8/05 - Hearne testifies before the U.S. Senate Judiciary Committee, Subcommittee on the Constitution, Civil Rights and Property Rights
- 8/18/05 - Pittsburgh Tribune-Review reveals partisan nature of ACVR, that it is a sham voting rights group and a Republican partisan operation
- 10/6/05 - Bradblog reports that ACVR co-founder Jim Dyke was working for the Bush White House to push the President's Supreme Court nominee
- 12/30/05 - Freepress.org publishes article "Fake voting rights activists and groups linked to White House"
- 2006 - U.S. prosecutors fired
- 12/5/06 - Hearne is given a seat as an expert on the federal Election Assistance Commission
- 3/16/07 - The New York Times reports that bogus voter fraud claims are linked to the purging of U.S. prosecutors
- 4/5/07 - New Mexico's U.S. Attorney David Inglesias is pressured by Republican operatives to bring vote fraud charges against voter registration groups in that state
- 4/11/07 - The New York Times reports that the original bipartisan EAC draft which was never released concluded that fears of voter fraud were overblown
- 5/2/07 - Hearne admits that he hired powerful GOP connected attorney William Mateja to intervene in the DOJ investigation of Missouri Governor Matt Blunt
- 2007 - All traces of Hearne's connection to the ACVR and Free Enterprise Coalition vanish from the internet

A press release from ACORN spelled out the reasons why Rove and Hearne attacked their organization, which is committed to registering poor people. In the 2004 election cycle, ACORN registered some 1.15 million low-income and minority citizens in 26 states. They also contacted 2.3 million citizens in their Get Out The Vote efforts.

Two similar suits had been filed in Florida as a result of ACORN's activity in that crucial swing state during the 2004 election and dismissed around the same time.

*Hearne spins Congress and the DOJ*

From the outset, Hearne, who specialized in exaggerated and bizarre claims of voter fraud

– what Arnebeck denounced as old racist stereotypes about blacks and drugs – lobbied the DOJ for a full-scale investigation of these imaginary drug-crazed volunteer voting registrars. In an initial letter to the DOJ, Hearne wrote that there was, "substantial evidence to suggest criminal wrongdoing by organizations such as Americans Coming Together ('ACT'), ACORN, and the NAACP – Project Vote."

Hearne told the DOJ that, "We understand that local Ohio law enforcement authorities are pursuing criminal prosecution against some of the individuals involved in this activity 'which activities include paying crack cocaine for fraudulent voter registration forms.'" At the Ney hearing, Hearne assured U.S. Rep. Stephanie Tubbs Jones that he was basing his claims on "facts not anecdotes, affidavits, first hand accounts."

When testifying before Ney's committee in March 2005, Hearne blamed the voter suppression on "the Kerry campaign" referring to alleged events in Republican-dominated Marion County, Ohio. Arnebeck and other voting rights activists have dismissed Hearne's claim that the Kerry campaign directed voters to the wrong polling places and telling them to vote on Wednesday, November 3 instead of Election Day, November 2, 2004. The facts in numerous legal filings, like the King-Lincoln-Bronzeville v. Blackwell and Moss v. Bush, suggest just the opposite.

Ironically, the 2004 Bush-Cheney re-election campaign was accused in hundreds of sworn affidavits of engaging in racist voter suppression tactics in Ohio's urban centers. Cleveland, Columbus and Cincinnati's majority black wards were littered with posters and fliers telling Democratic voters to vote on Wednesday, November 3. Both the Columbus Dispatch and the then-black-owned radio station WVKO documented calls directing voters in the inner city to the wrong polling places, where they waited up to three to seven hours, only to then be told they were at the wrong site.

Hearne claimed "the ACVR is a nonpartisan watchdog legal defense and educational center committed to defending the rights of voters and working to increase public confidence in the fairness of the outcome of elections." He told the congressional committee that: "Ohio citizens deserve the confidence that they – the voters – not trial lawyers, activists judges and special interest groups soliciting fraudulent votes with crack cocaine determine the results of Ohio elections."

What Hearne failed to tell the Congressional Committee, as he earnestly portrayed himself as a non-partisan voting rights activist, was his well-documented role as Bush-Cheney election counsel, the role of the Free Enterprise Coalition in financing the case against voting registration groups, and his role as a Republican operative with high-level ties to Karl Rove.

Hearne, with no real academic credentials, also had himself named as an academic advisor to the Carter-Baker Commission on election reform.

*Caught in this masquerade*

The National Journal called Hearne, ". . . a Republican Party operative who had served as national elections counsel for the 2004 Bush-Cheney presidential campaign and played a behind-the-scenes role in both cases [the firing of Cummins and Graves]."

One wonders how Hearne was able to masquerade for so long and testify before the Ney Committee without being immediately outed. His ties to the Republican Party reach back to the 70s and are well-documented in his posted online biographies. (See timeline, pg. 17)

"Hearne's role provides a window into how a Republican activist was pushing Bush administration officials – and perhaps in some cases working in concert with them – to use the Justice Department for partisan purposes," wrote the National Journal.

Part of the Rove/Hearne strategy was to "cage" and intimidate Democratic voters while at the same time to register as many Republicans as possible. It is well documented that the Republican National Committee (RNC) threw around millions of dollars to hire Sproul & Associates to do voter registration. Election and law enforcement officials in several states investigated complaints that the company's temporary workers were registering only Bush supporters and trashing thousands of registrations collected from suspected Democrats.

The New York Times reported on April 12, 2007 that the Bush administration's five-year crackdown on voter fraud, according to Justice Department statistics, had only led to charges against 120 people, the majority of them Democrats, with only 86 convictions. The DOJ found that many cases simply involved mistakes and a misunderstanding of voting eligibility rules, suggesting that the Rove/Hearne obsession with voter fraud may have been covering deliberately designed voter suppression tactics directed from the White House, facilitated by Hearne, with a compromised and intimidated Department of Justice.

Why was it so important to Hearne for voter registration groups to be accused of fraud in the 2004 election? The calculated targeting of voter registration groups – subjecting them to civil RICO suits and criminal prosecution – is part of a larger strategy to shrink the electorate. Nothing chills volunteers and grassroots organizations like the threat of legal problems or jail time. And nothing distracts the mainstream media away from the new Jim Crow tactics used by the Bush administration to suppress voters than the myth of black voter registrars using crack and accusations of racketeering. A corrupt and partisan Department of Justice is essential to furthering the Bush administration's injustice against poor and minority voters.

"Oh, what a tangled web we weave..."

And, boy, was there some deceiving being practiced in Show Me State.

Mark Fernlund "Thor" Hearne is in the thick of it (*previous diary with links for background here*). Hearne is a member and principal of the [Lathrop and Gage](#) law firm and served as National Election Counsel for Bush/Cheney in '04 and Missouri Counsel in '00. In 2005 he founded the [American Center for Voting Rights](#), a GOP front group that was designed to perpetuate the "voter fraud" myth and subsequently suppress the Democratic vote. It was dissolved in May.

However, in recent days, Hearne has deleted all references to ACVR on his [personal page](#) of his law firm's website, and his ACVR ties were deleted from his wiki page by someone with a Lathrop and Gage ip address.

From the [Election Law](#) website:

#### Battle over Thor Hearne's Wikipedia Entry Continues

Two days ago, in this post, I noted that someone had deleted information on Thor Hearne's Wikipedia page noting Hearne's affiliation with and controversy over the American Center for Voting Rights. I updated to post to note that someone from Hearne's law firm, Lathrop and Gage, made a change to that page. Since my post appeared, Wikipedia readers restored information about on ACVR on Hearne's Wikipedia page. **But now, that information was deleted again by someone from ip address 65.204.234.241, which also belongs to Lathrop and Gage.** Indeed, this search shows that someone at that law firm also has been editing the page on the American Center for Voting rights too.

But why is Hearne so anxious to disassociate himself from ACVR?

Howard Beale, over at [FiredUp! Missouri](#) has an idea why:

More so than ever before, the interconnected nature of the national and Missouri-based efforts to advance specious "vote fraud" claims and bend the operation of

government entities to specific partisan political advantage is becoming clear. And the centrality of Mark F. "Thor" Hearne II to all of those efforts has never been more obvious than it is after the aggregation of a number of key facts.

State corporate and federal tax filings indicate that Thor Hearne --the undisputed mastermind and ringleader of the now-defunct and "disappeared" American Center for Voting Rights (ACVR)-- was responsible for the creation of a Missouri-based front group that issued public "reports" about topics like voter registration fraud which echoed messages being pushed at the national level by prominent GOP officials and ACVR itself. The Missouri organization, the Center for Ethics and the Free Market, was partially funded with one of the only (if not the only) monetary grant awarded by the ACVR and had its bookkeeping and non-profit filings done by Garrett Lott, a key figure in the Matt Blunt fee office management company scheme.

*[I touched on the above-mentioned fee office scandal here - I told you, this is one TANGLED web of deceit!]*

According to [The Brad Blog](#), someone from ACVR also lied on the 05 990 tax form:

"During the year, has the organization attempted to influence national, state, or local legislation, including any attempt to influence public opinion on a legislative matter or referendum? If "Yes," enter the total expenses paid or incurred in connection with the lobbying activities."

Someone checked the "No" box, which of course is ridiculously fraudulent. That form indicates that the ACVR awarded exactly one grant in 05: \$28,000 to the Center for Ethics and the Free Market, "non-profit" entity with the registered agent listed as...Thor Hearne! From FiredUp! Missouri:

It's worth noting that on the same IRS 990 form, ACVR reports having paid \$122,870 to Thor Hearne's law firm, Lathrop & Gage for "Program/Legal Services." That payment was the largest expenditure for professional services made by ACVR in the 2005 year.

We don't have time to detail the mountains of evidence that, of course, the "non-partisan" tax-exempt 501(c)3 organization --- co-founded by Rove's friend and Bush/Cheney national general counsel Hearne and RNC Communication Directory Jim Dyke --- was meant for little else than to do exactly that. Through

public on-the-record official testimony, propaganda, back-channel influence, helping to write Voter ID legislation in a number of states, etc.

While we're no tax attorney, we're fairly certain that knowingly lying on a tax form for a public organization falls under the category of "illegal". Perhaps someone at Thor's lawfirm Lathrop & Gage, like, um, Thor for instance, would be better able to answer that question for sure.

Unlike Osama bin Laden, Thor can run, but he can't hide. But he can keep trying. Every time he does, we'll just up the ante. Wanna keep playing, Thor? We don't have your \$1 million dollar funding or friends in high places. All we have is the truth on our side, and an army of folks who find your un-American, democracy-undermining efforts to be appalling at the deepest level. That'll keep us going for now...

Are you still with me? I'm not sure I am. Hearne, at Rove's urging, created the Center for Ethics and the Free Market to generate "research" that supported the "voter fraud" claims, and funded it with ACVR dough.

Murray Waas:

Separately, less than a week before Election Day, the interim U.S. attorney in Kansas City, Mo., brought voting-fraud charges against four employees of the activist group ACORN, which registers low-income people who typically vote for Democratic candidates. Justice Department guidelines discourage prosecutors from bringing criminal charges so close to an election.

Although the actions of the two U.S. attorneys were unconnected, they shared a common denominator: Mark (Thor) Hearne, a Republican Party operative who had served as national election counsel for the 2004 Bush-Cheney presidential campaign and played a behind-the-scenes role in both cases. Hearne's role provides a window into how a Republican activist was pushing Bush administration officials -- and perhaps in some cases working in concert with them -- to use the Justice Department for partisan purposes.

snip

Republicans feared that an investigation of the Blunt administration by the U.S. attorney in Arkansas, Bud Cummins, could tar Blunt and hurt Talent and other GOP candidates on the ballot. Blunt himself was not up for re-election. The investigation was spurred by allegations that the Blunt administration had

improperly awarded state contracts to political contributors to run privately operated bureaus where Missouri residents obtain driver's licenses and register their vehicles. Because of potential conflicts of interest, the U.S. attorneys in Missouri weren't handling the investigation. Cummins said in an interview that a former senior Justice Department official from the Bush administration, William Mateja, repeatedly contacted him during the investigation and asked whether Blunt was implicated in the corruption probe. Cummins said he was unaware at the time that Mateja was making his calls at the behest of Hearne, whose law firm had retained Mateja on Blunt's behalf.

According to ms panstrepon over at [TPM Cafe](#), one of the directors of ACVR is Pat Rogers is "the same Pat Rogers who met with Monica Goodling to complain about David Iglesias."

And now, Brad Schlozman has testified (and "clarified" his testimony) about his role in bringing the "voter fraud" indictments:

Grilled by a number of senators over his decision as U.S. attorney for Kansas City to bring four voter fraud indictments just days before last year's election, Schlozman repeatedly testified that he'd brought the indictments "at the direction" (he used the phrase ten times) of the director of the Election Crimes Branch in the Public Integrity Section. That raised more than a few eyebrows on the panel since that director, Craig Donsanto, is the man who wrote the DoJ manual discouraging such investigations close to an election.

Schlozman's story had the effect of distancing himself from the controversial decision and pinning it on a Department veteran.

Now Schlozman is changing his story:

*As required by Section 9-85.210 of the U.S. Attorney's Manual, at my direction, the Assistant United States Attorney assigned to the case consulted with the Election Crimes Branch prior to the filing of the indictments. I want to be clear that, while I relied on the consultation with, and suggestions of, the Election Crimes Branch in bringing the indictments when I did, I take full responsibility for the decision to move forward with the prosecutions related to ACORN while I was the interim U.S. Attorney.*

In other words, somehow, some way, Schlozman was able to get a green light for the indictments.

A nice summation from the FiredUp!Missouri article:

But more broadly, the discovery of Hearne's ties to the Center for Ethics and the Free Market serves as a reminder that is unproductive to think of either the "voter fraud" scheme, the fee office scheme, or plain-old GOP politics as separate and distinct from each other. At their core, they're all part of the same thing. The more digging that people do, the more they find the same players --longtime GOP stalwarts like Thor Hearne and Garrett Lott-- using trickery and institutions to ingrain permanent GOP advantages.

Chairman BUTTERFIELD. Okay. Before we conclude, I am going to ask also unanimous consent to enter into the record the report prepared by this Subcommittee in the last Congress, under then Chair Marcia Fudge, detailing our findings of discrimination in voting practices. That is the document that I hold in my hand.

Hearing no objection, it is so ordered.

[The information follows:]

## EXECUTIVE SUMMARY

### INTRODUCTION

---

*“Voting is the right that is ‘preservative of all rights,’ because it empowers people to elect candidates of their choice, who will then govern and legislate to advance other rights.”*

— Kristen Clarke, Lawyers’ Committee for Civil Rights Under Law

---

In 1965, following years of suppression, discrimination, protest, and a fight for equality that led to the Civil Rights Act of 1964, President Lyndon B. Johnson signed into law the Voting Rights Act of 1965 (“Voting Rights Act”).<sup>1</sup> The Voting Rights Act was created to address long entrenched racial discrimination in voting, “an insidious and pervasive evil which had been perpetuated in certain parts of our country through unremitting and ingenious defiance

of the Constitution.”<sup>2</sup> The Voting Rights Act protected the American people from racial discrimination in voting for nearly 50 years. In 2013, the Supreme Court of the United States (“the Court”) struck down portions of the 2006 Voting Rights Act reauthorization in *Shelby County v. Holder* (“*Shelby County*”), leaving American voters vulnerable to tactics of suppression and discrimination.<sup>3</sup> In the aftermath of the Court’s decision, the duty of Congress remains unchanged – the Legislative Branch is entrusted with protecting the right to vote for every eligible American. This is as essential today as it was in 1965.

In North Dakota, Native Americans, this land’s first inhabitants, have been forced to obtain identification cards they would never have otherwise needed, or face being stripped of their right to vote. In advance of the 2018 election, tribes went to great lengths to ensure tribal members could vote, often producing ID cards for free, working overtime, to ensure members who did not otherwise have a home address had what they needed to vote. The resulting turnout for tribal members in the 2018 election was higher due to these efforts. However, crisis is not—nor should it be—a “get out the vote” strategy.

Less than two months after the Court struck down the preclearance provisions of the Voting Rights Act, North Carolina state legislators wasted no time passing an omnibus “monster law.” State Senator Tom Apodaca (then-Chairman of the North Carolina Senate Rules Committee) said the State did not want the “legal headaches” of preclearance if it was not necessary to determine which portions of the proposal would be subject to federal scrutiny, “so, now we can go with the full bill,” he added. He predicted an omnibus voting bill would surface in the

---

1 Voting Rights Act of 1965, Pub. L. No. 89-110, 79 Stat. 437.

2 *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612, 2618 (2013), citing *South Carolina v. Katzenbach*, 383 U.S. 301, 309.

3 *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612 (2013).

Senate the next week that could go beyond voter ID to include issues such as reducing early voting, eliminating Sunday voting, and barring same-day voter registration.<sup>4</sup>

These are just two examples of the many egregious stories the Subcommittee on Elections heard as it convened hearings across the country examining the state of voting rights and election administration in America.

### THE SUBCOMMITTEE ON ELECTIONS

At the outset of the 116<sup>th</sup> Congress, Speaker of the House Nancy Pelosi and Committee on House Administration Chairperson Zoe Lofgren reconstituted the Committee on House Administration's Subcommittee on Elections, which House Republicans eliminated six years earlier. The Subcommittee is now chaired by Congresswoman Marcia L. Fudge of Ohio. The Subcommittee planned to take Congress to the American people, engage with voters, stakeholders, officials and election administrators, and collect testimony and evidence on the state of voting rights and election administration to ensure every eligible American has equal and fair access to the ballot and the confidence their ballot is counted as cast.

The Subcommittee reviewed the landscape of voting in America post-*Shelby County* to determine whether Americans can freely cast their ballot. The Subcommittee examined arbitrary barriers that have been erected to impede access and block ballots from being counted. The wide-ranging and voluminous testimony received by the Subcommittee form the basis of this report.

Writing for the majority in the 5-4 *Shelby County* decision, Chief Justice John Roberts acknowledged that “voting discrimination still exists; no one doubts that.”<sup>5</sup> However, the Court held that Section 4(b) of the Voting Rights Act was unconstitutional and the coverage formula could “no longer be used as a basis for subjecting jurisdictions to preclearance.”<sup>6</sup> Chief Justice Roberts held that “nearly 50 years later things have changed dramatically. … The tests and devices that blocked ballot access have been forbidden nationwide for over 40 years.”<sup>7</sup> … The [15<sup>th</sup>] Amendment is not designed to punish for the past; its purpose is to ensure a better future. To serve that purpose, Congress—if it is to divide the States—must identify those jurisdictions to be singled out on a basis that makes sense in light of current conditions.”<sup>8</sup>

To collect the contemporaneous evidence called for by the Chief Justice, the Subcommittee on Elections worked over the first 10 months of the 116<sup>th</sup> Congress, traveling across the country to meet voters where they live and vote. Hearings were held in Atlanta, Georgia; Standing Rock Sioux Reservation, North Dakota; Halifax County, North Carolina; Cleveland, Ohio; Fort Lauderdale, Florida; Birmingham, Alabama; Phoenix, Arizona; and Washington,

<sup>5</sup> *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612, 2619 (2013).

<sup>6</sup> *Id.* at p. 2631.

<sup>7</sup> *Id.* at p. 2625.

<sup>8</sup> *Id.* at p. 2629.

District of Columbia. An inaugural listening session was also held in Brownsville, Texas. The Subcommittee called more than 60 witnesses, gathered several thousand pages of testimony, documents, and transcripts, and hours of oral testimony were delivered before Members of the Subcommittee.

The Subcommittee heard testimony describing polling place closures; frequent polling place movements; cutbacks and restrictions on early voting; voter ID requirements that disenfranchise targeted populations; purges of otherwise eligible voters from the registration rolls; the enormous expense of enforcing the Voting Rights Act through Section 2 litigation; the disenfranchisement of millions of formerly incarcerated Americans; and a lack of access to multilingual ballots and assistance, among the many voter suppressive laws implemented by states post-*Shelby County*. The Subcommittee heard a common refrain across the country that poverty and a lack of access to adequate transportation are significant barriers to voting that, when coupled with state-sponsored voter suppression, can lead to a complete deprivation of the franchise.

The Subcommittee's work took place in six states formerly covered, partially or completely, by the Section 4(b) formula and Section 5 preclearance provisions of the Voting Rights Act, and two states that were never covered. The Subcommittee visited states where there had been reports of barriers to voting in the years since *Shelby County* to get a sense of how Congress can help every American exercise his or her right to vote. For example, North Dakota and Ohio were never required to preclear their voting changes with the Department of Justice. As the Subcommittee found, this does not render the state's voters immune to voter suppression and election administration issues.

In North Dakota, Members heard testimony on issues unique to the Native American communities. The North Dakota legislature passed a voter ID law that disproportionately impacted Native Americans, effectively creating a poll tax and forcing voters to get IDs they would not otherwise need. The North Dakota field hearing also included witnesses and testimony regarding issues in South Dakota, which was a partially covered state under the Voting Rights Act.<sup>9</sup>

Ohio was recently a progressive voting state, after correcting issues from the 2004 election that left voters "effectively disenfranchised" in the words of one court.<sup>10</sup> The state implemented 35 days of in-person early voting and effectively created a week of early, same-date voter registration, dubbed "Golden Week." In 2014, Ohio changed course, reducing early voting hours and days, eliminating Golden Week, and reducing early voting locations, all while constantly altering the rules and procedures around voting and implementing an aggressive voter purge system.

The hearings conducted by the Subcommittee on Elections, detailed in this report, show the right to vote is not yet shared equally among all Americans. As a nation, we have made significant progress, but it is apparent more remains to be achieved before America truly

becomes the democracy she strives to be. The right to vote is fundamental to American democracy, yet our country has struggled to provide full, free, and fair access to the ballot box to all her citizens. As we see with each passing election, the struggle is far from over, and matters have too often worsened since *Shelby County*. Since then, voters have gone to the polls without the full protection of the Voting Rights Act for three federal elections, with a fourth rapidly approaching.

## FINDINGS

During the field hearings, the Subcommittee heard testimony from lawyers, advocates, elected officials, tribal officials, and voters about the array of tactics used to suppress the votes of targeted communities. Some are more overt than others, but all have the same effect of erecting barriers that impede the free exercise of the right to vote.

*Figure 1: Marchers cross the Edmund Pettus Bridge on the march from Selma to Montgomery, Alabama on what became known as "Bloody Sunday" in 1965.*

**Chapter One** of this report outlines the state of voting rights and access to the ballot before the Court significantly undermined the Voting Rights Act in *Shelby County*. On March 7, 1965, Americans were forced to confront the vicious and persistent reality of racially-motivated voter discrimination. On Bloody Sunday, marchers on the Edmund Pettus Bridge in Selma, Alabama were attacked with clubs, whips, and tear gas by state troopers and local lawmen on their 54-mile journey to Montgomery to call attention to the Black struggle for full and equal voting rights. Shortly after Selma, President Lyndon B. Johnson called on Congress to act.

On August 6, 1965, the Voting Rights Act was signed into law, 95 years after the 15<sup>th</sup> Amendment first granted Black men the right to vote and 45 years after the 19<sup>th</sup> Amendment granted women the right to vote. Section 2 of the Voting Rights Act applied a nationwide ban on the denial or abridgment of the right to vote based on race or color, and was later amended to include language minorities.<sup>11</sup> Section 4(b) became known as the “coverage formula,” setting forth the criteria for determining which states and localities were covered under the

<sup>11</sup> L. Paige Whitaker, *Statement for Hearing on "History and Enforcement of the Voting Rights Act of 1965."* CRS Testimony TE10033, Testimony for Committee on Judiciary, Subcomm. on the Constitution, Civil Rights and Civil Justice (Mar. 12, 2019), *citing codified as amended at 52 U.S.C. §§ 10301, 10303(f) and Voting Rights Act Amendments of 1975, Pub. L. No. 94-73.*

preclearance provisions of Section 5.<sup>12</sup> Sections 4(e) and 4(f)(4), along with portions of Section 2, ensure access for limited-English proficiency voters.<sup>13</sup> Section 5, the “preclearance” provision, required states with a history of discrimination in voting to submit all voting changes for approval by the federal government or judiciary to determine whether they would be discriminatory prior to implementation.<sup>14</sup>

Under Sections 4(b) and 5, Alabama, Alaska, Arizona, Georgia, Louisiana, Mississippi, South Carolina, Texas, and Virginia were all covered in their entirety. California, Florida, New York, North Carolina, South Dakota, and Michigan each had counties and townships covered under the Voting Rights Act, but were not wholly covered.

Initially scheduled to expire in 1970, Congress voted to amend and expand the Voting Rights Act five times: in 1970, 1975, 1982, 1992, and 2006. The Fannie Lou Hamer, Rosa Parks, and Coretta Scott King Voting Rights Act Reauthorization and Amendments Act of 2006 passed the House overwhelmingly, the Senate unanimously, and was signed into law by President George W. Bush, extending the Voting Rights Act until 2032.<sup>15</sup>

During the time preclearance was in effect, the Department of Justice reviewed thousands of voting changes, objecting to hundreds that would have a discriminatory effect and limited access to the vote had they been implemented.<sup>16</sup> According to the U.S. Commission on Civil Rights (“USCCR”) 2018 Minority Voting Report, from 2006-2013, the Department of Justice issued 30 objections to voting changes. Furthermore, the Department of Justice sent 144 letters informing jurisdictions that the information provided in their submission was insufficient and the Attorney General required more information.<sup>17</sup> Testimony heard by the USCCR and the Subcommittee on Elections illustrated how the process forced jurisdictions to rethink their changes and amend proposals that would have been discriminatory.<sup>18</sup>

In 2013, Section 4(b) of the Voting Rights Act was successfully challenged in *Shelby County*. The Court’s decision struck down Section 4(b) as unconstitutional, effectively rendering Section 5’s preclearance requirements obsolete and undermining critical enforcement provisions of the Voting Rights Act. Congress has since failed to enact legislation restoring the necessary protections to ensure every American can access the ballot without discrimination and undue barriers. The struggle for free and fair access to the right to vote continues. The poll taxes and literacy tests of pre-1966 may be gone, but without the full protection of Sections 4(b) and 5 of the Voting Rights Act, the nation has seen the development of a new generation of poll taxes and discriminatory tactics.

**Chapter Two** of this report explores how undermining the Voting Rights Act has made casting a ballot more difficult. The various sections of this chapter cover overt tactics of voter suppression, the more subtle tactics that lead to suppression, and a new generation of voter suppression. This chapter explores the most common voter suppression tactics discussed during the Subcommittee's field hearings, many of which have become more pervasive post-*Shelby County*, as there is no longer any check on these practices.

While the evidence collected by the Subcommittee shows many legacy voter suppression tactics are still pervasive, a new wave of surreptitious tactics has also emerged. To suppress the vote, states have aggressively purged otherwise eligible voters from the voter registration rolls, made cuts to early voting and same-day registration, moved, closed, or consolidated polling places without adequate notice to voters, required exact name or signature match, engaged in discriminatory gerrymandering, and restricted language access and assistance, among other devices. Some of these tactics could be viewed as issues of election administration, and while that may be accurate, when combined with other insidious measures or when allowed to persist without consideration for their discriminatory impact, these changes undeniably result in voter suppression.

Except for North Dakota, which does not have voter registration, Members of the Subcommittee heard evidence of states purging otherwise eligible voters from the voter rolls. Time and again, purging voters from the registration rolls is billed as "list maintenance" and a necessary measure to combat "voter fraud." However, there is no credible evidence of voter fraud in American elections. Nevertheless, a 2018 study by the Brennan Center for Justice ("Brennan Center") found that between 2014 and 2016, states purged more than 16 million voters from the rolls.<sup>19</sup> An updated analysis found that at least 17 million voters were purged nationwide between 2016 and 2018.<sup>20</sup>

Persistent cutbacks and restrictions to early voting opportunities result in longer lines and wait times on Election Day. These cutbacks also disenfranchise those who cannot make it to the polls. Voters who work hourly jobs cannot take multiple hours

Figure 2: Lines of voters waiting outside the Cuyahoga County Board of Elections, Cleveland, Ohio, to cast their ballot on Election Day in 2016; provided by Inajo Davis Chappell at the Ohio Field Hearing.

<sup>20</sup> Kevin Morris, *Voter Purge Rates Remain High, Analysis Finds*, Brennan Center for Justice (Aug. 1, 2019), <https://www.brennancenter.org/blog/voter-purge-rates-remain-high-analysis-finds>.

off on a workday to stand in line to vote. Additionally, signature match and exact name match requirements can disenfranchise voters, sometimes without their knowledge. In Florida, reports during the 2018 election demonstrated that voters' ballots were rejected for failing to match signatures without any notification sent to voters, providing no opportunity for the voter to correct the signature or contest the rejection.<sup>21</sup> In Georgia, thousands of voter registrations were put on hold because the name on the registration form did not exactly match specific government records.<sup>22</sup>

Laws requiring voters to show specific forms of ID have, unfortunately, become a common voter suppression tactic. In nearly every state, the Subcommittee heard testimony regarding issues with state-imposed voter ID laws. In Texas, North Dakota, and Alabama, witnesses testified that voter IDs are financially burdensome, disproportionately impact minority voters, and effectively impose a poll tax.<sup>23</sup> In North Carolina, the state's attempt to implement a voter ID law was struck down. Subsequently, voter ID was placed on the ballot as a measure and passed as a state constitutional amendment.<sup>24</sup> The state legislature passed implementing legislation and subsequently overrode the Governor's veto. The law is currently being challenged in court but remains in effect for the 2020 election.<sup>25</sup>

Another obstacle is lack of access to multi-lingual ballots, even when required under the Voting Rights Act, as well as assistance at the polls for those who are not proficient in English. In August 2018, a group of voting rights advocacy organizations sued the Florida Secretary of State and the Supervisors of Elections in 32 Florida counties for violating the Voting Rights Act's requirement to provide bilingual voting materials and assistance for Spanish-speaking U.S. citizens.<sup>26</sup>

Finally, the Subcommittee heard testimony at every field hearing describing how reactive litigation under Section 2 of the Voting Rights Act is prohibitively expensive, lengthy, and ineffective at combating voter disenfranchisement. In Texas, Georgia, and North Carolina specifically, the Subcommittee heard testimony describing how the loss of preclearance created an environment in which litigators and stakeholders are forced to expend significant resources to play what was described as a "whack-a-mole" defense against persistent, discriminatory voting changes.<sup>27</sup> Moreover, it is now nearly impossible to know all the voting changes made by states and monitor their potential discriminatory effect without the benefit of Section 5 preclearance. In North Carolina, USCCR Vice-Chair Patricia Timmons-Goodson

testified there is no longer a database of the changes made in the most at-risk jurisdictions, making it much more difficult to track, combat, and evaluate the impact of changes made to voting laws.<sup>28</sup>

**Chapter Three** focuses on issues that particularly affect Native American voters.

North Dakota is unique for being the only state with no voter registration – a citizen may simply arrive at the polls on Election Day and cast a ballot.

In 2013, North Dakota required voter IDs to contain the voter's residential address, and expressly excluded Post Office Box numbers as an acceptable form of address. This law, and specifically the residential address requirement, has a disproportionately negative impact on Native American voters.<sup>29</sup>

While the State of North Dakota claims tribal IDs qualify under its law, most tribal IDs do not include a residential address. This is due, in part, to the fact that the United States Postal Service does not provide residential delivery in these rural Native American communities, forcing most tribal members to rely on a Post Office Box instead. If a tribal ID has an

address, it is typically the Post Office Box, which does not satisfy North Dakota's restrictive voter ID law. Further, Native Americans as a group are disproportionately homeless and – due to overcrowding in homes, the prevalence of transience, and inconsistent addresses – identifying a consistent, accurate address for an ID remains a challenge.<sup>30</sup>

The voter ID law effectively created a poll tax on Native American voters. A tribal ID generally comes at a fee to cover the costs of printing and provide income for the Tribe. Alyria LaCounte, General Counsel for the Turtle Mountain Band of Chippewa Indians, testified that the unemployment rate on the Turtle Mountain Reservation hovers near 70 percent: “\$15 for an ID is milk and bread for a week for a poor family.”<sup>31</sup> Many North Dakota Tribes waived these fees so their members could vote in the 2018 midterm election. This equated to an

unfunded mandate on the Tribes despite their status as sovereign entities with a trust and treaty relationship with the federal government, not the state.<sup>32</sup>

In Arizona, tribal leaders and advocates attested to the difficulties tribal members face when voting on reservations. Rural reservation voters often do not have traditional mailing addresses, creating difficulties in registering to vote, receiving and returning mail-in ballots, and accessing consolidated polling locations when unsure of where to vote. Additionally, access to properly translated voting materials for Native-language speaking voters, as well as proper assistance at the polls, poses a challenge for Native voters. Since *Shelby County*, the state of Arizona has closed hundreds of polling locations, moving toward vote-by-mail and voting centers, which has significantly impacted Native American voters given their heavy reliance on Post Office Boxes, long distances to mail services, and the demonstrated cultural significance of in-person voting on Election Day.<sup>33</sup>

**Chapter Four** examines how the administration of elections can be improved to ensure that all eligible voters are able to cast their ballots.

General election administration issues existed prior to the *Shelby County* decision, but they are also barriers to voting, especially when compounded with the suppressive, discriminatory tactics deployed in states across the country. A lack of compliance with the National Voter Registration Act (“NVRA”) inhibits voters’ ability to register to vote. Inconsistent poll worker training and lack of adequate resources can lead to erratic enforcement of voting laws, disenfranchise voters, and lead to the overuse of provisional ballots. Proper poll worker training can make the difference between a voter being denied access to a ballot, casting a provisional ballot, or being turned away completely. Provisional ballots do serve a purpose, giving voters an alternative if prevented from casting a traditional ballot, but they can also disenfranchise voters when misused.

Several states have attempted to force voters to provide proof of citizenship before they are allowed to register to vote. Alabama is one of four states that have attempted to require documentary proof of citizenship when registering to vote, as have Arizona, Kansas, and Georgia. Generally, a sworn statement is considered sufficient to prove citizenship. In Arizona, the state’s insistence on requiring documentary proof of citizenship has led to a two-tiered registration system after the Court said states could not require proof of citizenship on the federal voter registration form. An ongoing federal lawsuit has partially blocked the implementation of the unilateral policy decision made by then-Election Assistance Commission (“EAC”) Executive Director Brian Newby allowing Alabama, Georgia, and Kansas to require applicants using the federal voter registration form to provide documentary proof of citizenship.<sup>34</sup>

<sup>34</sup> Max Feldman and Peter Dunphy, *The State of Voting Rights Litigation (March 2019)*, Brennan Center for Justice (Mar. 25, 2019), <https://www.brennancenter.org/analysis/state-voting-rights-litigation-march-2019>; see also *League of Women Voters v. Newby* (D.D.C. No. 1:16-cv-00236; D.C. Cir. No. 16-5196).

Millions of Americans are disenfranchised after states strip them of their right to vote following a felony conviction. The Subcommittee heard testimony at multiple hearings about barriers to re-enfranchisement for formerly incarcerated individuals.<sup>35</sup> In various states and D.C., witnesses testified that requiring repayment of fines and fees before re-enfranchisement was a significant burden on low-income and minority Americans. The full impact of efforts to roll back Florida's restoration of voting rights is not yet known, but a report in the Sun Sentinel found that Florida's new law could cost formerly incarcerated persons with a felony conviction more than \$1 billion in past fines and fees in just three South Florida counties to regain their right to vote.<sup>36</sup> Mandating otherwise eligible Americans pay all fines and fees before regaining their right to vote, a right they never constitutionally lost, is effectively a modern-day poll tax.

The 2016 and 2018 elections opened a new frontier of voter suppression – the dissemination of misinformation and disinformation by both foreign and domestic actors specifically targeting minority voters to sow division and depress turnout. A bipartisan report by the Senate Intelligence Committee found the Russian Internet Research Agency's social media influence campaign during the 2016 election made an extraordinary effort to target Black Americans, using a variety of tactics to suppress Democratic turnout on an array of social media platforms.<sup>37</sup> The use of fake accounts and bots to spread false information continues and remains a concern for upcoming elections.

The increasing frequency and intensity of natural disasters require effective climate disaster responses to ensure voters displaced by these events are not disenfranchised because of missed voter registration deadlines or polling locations moved due to damage. Finally, conflicts of interest arising from candidates serving as both arbiter and candidate has occurred in multiple elections and raises questions of voter confidence in the process.

## CONCLUSION

The federal government has a responsibility to protect the right to vote of every eligible American. Congress must take full stock of the evidence before it, acknowledge widespread voter fraud does not exist, recognize the barriers preventing our constituents from voting, and act to remove them. This report details the Subcommittee's findings to enable Congress to move forward in ensuring the unimpeded right to vote for all Americans.

The right to vote is at the core of what it means to participate in our democracy, and it must be protected.

# CHAPTER ONE

## *Voting Rights in America Before Shelby County v. Holder (2013)*

### AMERICA'S FOUNDING

At her founding, America claimed a commitment to equality. Yet in practice, not all men, nor women, were treated equally. In declaring independence from the British Crown in 1776, the founders wrote:

“We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed...”<sup>38</sup>

For more than two centuries, America has struggled to achieve racial equality. During the writing of the Constitution in 1787, the practice of slavery was widespread in many parts of America and would persist for nearly 80 years. During the first apportionment for the House of Representatives, while indentured servants were counted as whole persons, enslaved people were each counted as three-fifths of a person, and “Indians not taxed” were not counted.<sup>39</sup>

In 1857, the Court held in *Dred Scott v. Sandford* that, even if enslaved people were freed, the formerly enslaved and their descendants were each legally three-fifths of a person and not to be recognized as citizens.<sup>40</sup> On January 1, 1863, as the Civil War raged on, President Abraham Lincoln issued the Emancipation Proclamation, declaring “that all persons held as slaves” in the rebelling states, “are, and henceforward shall be free.”<sup>41</sup> However, the Proclamation only

39 U.S. Constitution, Art. I, Sec. 2, National Archives, *transcription available at* <https://www.archives.gov/founding-docs/constitution-transcript>.

“Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons.”

40 *Dred Scott v. Sandford*, 60 U.S. (19 How) 393 (1857).

“In the opinion of the court, the legislation and histories of the times, and the language used in the Declaration of Independence, show, that neither the class of persons who had been imported as slaves, nor their descendants, whether they had become free or not, were then acknowledged as a part of the people, nor intended to be included in the general words used in that memorable instrument.”

41 President Abraham Lincoln (Jan. 1, 1863), Transcript of the Proclamation, National Archives, *transcript available at* <https://www.archives.gov/exhibits/featured-documents/emancipation-proclamation/transcript.html>.

“That on the first day of January, in the year of our Lord one thousand eight hundred and sixty-three, all persons held as slaves within any State or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the Executive Government of the United States, including the military and naval authority thereof, will recognize and maintain the freedom of such persons, and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom.”

freed those enslaved persons held in states that had seceded from the Union, leaving enslaved those living in border states.<sup>42</sup>

Slavery was abolished nationwide in 1865, with the passage and ratification of the 13<sup>th</sup> Amendment,<sup>43</sup> though other vestiges of slavery persisted. In 1868, the 14<sup>th</sup> Amendment established that all persons born or naturalized in the United States are citizens and forbade states from denying any person due process or equal protection under the law.<sup>44</sup> The 15<sup>th</sup> Amendment, ratified in 1870, guaranteed all United States citizens the right to vote regardless of “race, color, or previous condition of servitude,”<sup>45</sup> and gave Congress the power to enforce the amendment through appropriate legislation.<sup>46</sup> However, the 15<sup>th</sup> Amendment did not guarantee the right to vote based on gender. Collectively, the 13<sup>th</sup>, 14<sup>th</sup>, and 15<sup>th</sup> Amendments are known as the “Reconstruction Amendments.”

As Black voter registration and participation soared in the post-Civil War Reconstruction Era, efforts to dampen the effects of the Reconstruction Amendments began, resulting in a backlash that would limit access to voting for Black Americans for decades.

Other minority groups also faced restrictions to their citizenship and voting rights. In 1884, the Court held in *Elk v. Wilkins* that the 14<sup>th</sup> Amendment did not provide citizenship to Native Americans.<sup>47</sup> Not until 1924, with the passage of the Indian Citizenship Act, did Native Americans gain full citizenship and voting rights without impairing the right to remain a member of their tribe.<sup>48</sup> As late as 1948, Arizona and New Mexico had state laws expressly barring many Native Americans from voting.<sup>49</sup> In 1962, Utah became the last state to remove formal barriers and guarantee voting rights for Native American peoples.<sup>50</sup> As detailed in this report, Native Americans still face discrimination and barriers to freely exercising their right to vote.

The United States government has also systematically denied citizenship to Asian Americans. Not until 1898, with the Court’s decision in *United States v. Wong Kim Ark*, was it made clear

<sup>42</sup> National Archives, Online Exhibits, *The Emancipation Proclamation*, <https://www.archives.gov/exhibits/featured-documents/emancipation-proclamation>.

<sup>43</sup> U.S. Const. amend. XIII, sec. 1.

“Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.”

<sup>44</sup> U.S. Const. amend. XIV, sec. 1.

“All persons born or naturalized in the United States and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.”

<sup>45</sup> U.S. Const. amend. XV, sec. 1.

<sup>50</sup> *Id.*

that children of non-White immigrants were entitled to birthright citizenship.<sup>51</sup> In the 1920s, the Court held in two cases that Asian immigrants were not “free White people” and therefore ineligible for naturalized citizenship.<sup>52</sup> Not until the repeal of the Chinese Exclusion Act in 1943 and the passage of the McCarran-Walter Act in 1952 were all Asian Americans granted the right to become citizens and therefore eligible to vote.<sup>53</sup>

Women also faced restrictions to their citizenship and voting rights. Women did not gain the right to vote until 1920, with the ratification of the 19<sup>th</sup> Amendment.<sup>54</sup> However, ratification did not fully extend that right to all women. Native American women did not have citizenship, nor did many Asian women, and Black women still faced post-Reconstruction, Jim Crow Era discrimination at the polls.

To this day, more than 4.4 million residents of the U.S. Territories and the District of Columbia still do not have full voting rights and representation equal to that of their counterparts living in the 50 states.<sup>55</sup> Residents of the U.S. Virgin Islands (“USVI”), the Commonwealth of Puerto Rico, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands (“CNMI”) (collectively “the Territories”), along with the District of Columbia (“D.C.”), can each select one Delegate (or in the case of Puerto Rico, the Resident Commissioner) to send to the House of Representatives. However, that Delegate or Resident Commissioner does not have the same voting privileges in the House of Representatives as other Members of Congress, and their constituents do not have any representation in the Senate. Together, the Territories and D.C. have a combined population nearly equal to that of Delaware, South Dakota, North Dakota, Alaska, Vermont, and Wyoming.<sup>56</sup> Those states have a combined six Members of Congress and 12 Senators, while in contrast the Territories and D.C. have no voting representation in Congress. In 1961, the 23<sup>rd</sup> Amendment gave D.C. residents the right to vote for President and Vice President.<sup>57</sup> Residents of the Territories can still only vote for President and Vice President in the primary election, not in the general election.

<sup>53</sup> Early America’s founding, naturalization was limited to only “free White persons.” Two key Court cases from the 1920s – *Ozawa v. U.S.* and *U.S. v. Thind* – held that Asian immigrants were not free White people and therefore, ineligible for naturalized citizenship. Federal policy barred immigrants of Asian descent from becoming U.S. citizens through legislation such as the Chinese Exclusion Act of 1882 (prohibiting immigration of Chinese laborers) and the Immigration Act of 1924 (banning immigration from almost all countries in the Asia Pacific region). It was not until 1943 with the repeal of the Chinese Exclusion Act, that persons of Chinese origin were granted the ability to naturalize. Most other Asians were granted the ability to naturalize by 1952 through the McCarran-Walter Act (Immigration and Nationality Act of 1952) and subsequent amendments in 1965.”

## POST-CIVIL WAR RECONSTRUCTION AND THE RISE OF THE JIM CROW ERA

Following the Civil War, America entered what became known as the “Reconstruction Era.” From 1865 to 1877, the country attempted to address the inequities of slavery and its legacy while reuniting with the 11 states that had seceded from the Union.<sup>58</sup> Passage of the Reconstruction Amendments paved the way for the first Black Members of Congress to take their seats in 1870.

Hiram Rhodes Revels was elected to fill a vacant Senate seat from Mississippi by the state Senate and Joseph H. Rainey was elected to fill a vacant seat in the House of Representatives in the South Carolina delegation.<sup>59</sup> Black officials were elected at all levels of government and began to be appointed to federal positions, including as ambassadors, Census officials, customs appointments, U.S. Marshals and Treasury agents, and more.<sup>60</sup> In many former Confederate states, Black officeholders were elected in large numbers during the Reconstruction period, including: Alabama (167), Georgia (108), Louisiana (210), Mississippi (226), North Carolina (180), and South Carolina (316).<sup>61</sup>

The Reconstruction Amendments led to Black voter registration rates that surpassed White registration rates in Louisiana, South Carolina, and Mississippi.<sup>62</sup> In Alabama and Georgia, Black citizens were nearly 40 percent of all registered voters.<sup>63</sup> In the 1868 presidential election, more than 700,000 Black citizens voted for the first time.<sup>64</sup> As more Black Americans gained access to the franchise, a more representative government began to take shape.

This exercise of power and voting freedom did not go unchallenged. In 1866, President Andrew Johnson wrote, “This is a country for White men, and by God, as long as I am President, it shall be a government for White men.”<sup>65</sup> The Ku Klux Klan (“KKK”), a White supremacist terrorist organization, was founded in Tennessee in 1866 and soon embarked on a “reign of terror” across the South, including lynchings, bombings, and assassinations of

political leaders.<sup>66</sup> The KKK was not the only White supremacist organization formed at the time, and horrific violence against Black Americans spread at a shocking rate.<sup>67</sup>

White supremacist organizations are far from a relic of the past. The Southern Poverty Law Center (“SPLC”) tracks more than 1,600 extremist groups operating across the country. According to their “Hate Map,” there were 1,020 hate groups operating in the United States in 2018.<sup>68</sup> This list includes many of the hate groups, individuals, and symbols present at the deadly Charlottesville, Virginia White supremacist rally in August 2017.<sup>69</sup>

Reconstruction came to an end in 1877. Following the disputed presidential election of 1876 and the Compromise of 1877, the government removed the remaining federal troops from the South.<sup>70</sup> Once federal oversight was removed, southern legislatures began passing laws that institutionalized racial segregation and racial discrimination that suppressed the voting rights of minorities, solidifying White dominance in the political structure, and giving rise to what would become known as the Jim Crow Era.

States, predominantly southern,<sup>71</sup> organized state constitutional conventions with the express intent of enacting policies that would prevent Black Americans from voting. Operating without federal involvement, Mississippi led the way with a new state constitution enacted in 1890.<sup>72</sup> Although the 15<sup>th</sup> Amendment did not allow for direct disenfranchisement, Mississippi enacted a discriminatory poll tax that disproportionately burdened Black Americans, as well as a literacy test requiring those seeking to register to vote to read a portion of the state constitution and explain it, subject to the discretion of the county clerk, who was nearly, if not always, White.<sup>73</sup> The barriers were not limited to poll taxes and literacy tests. South Carolina followed with a constitutional convention in 1895 that adopted a two-year residence requirement, a poll tax, a literacy test, or ownership of property worth \$300, and

<sup>68</sup> In one Louisiana parish, a mob destroyed the Republican newspaper and drove the editor out of town before turning on the local Black population and killing 200. A local sheriff in Camilla, Georgia, led an armed group of 400 Whites to attack a Black election parade and then track down and kill many who had fled to the countryside. In Louisiana alone in the presidential election year of 1868, an estimated 1,081 persons, most of them Black, were killed by state Democrats. The number of Blacks killed in southern cities was likewise shocking: 46 in Memphis and 34 in New Orleans in 1866, 25-30 in Meridian, Mississippi, and 34 in Vicksburg in 1875, and 105 in Colfax, Louisiana on Easter Sunday, 1873.”

the disqualification of convicts.<sup>74</sup> In the former Confederacy, Alabama, Arkansas, Florida, Georgia, Louisiana, North Carolina, Tennessee, Texas, and Virginia enacted similar barriers.<sup>75</sup>

The state-adopted literacy tests disproportionately disenfranchised Black Americans. For example, at the time these tests were being implemented, over 70 percent of Black citizens were illiterate, compared to less than 20 percent of White citizens.<sup>76</sup> However, states exempted prior (White) registrants and veterans of the Civil War and other wars from literacy test requirements. Black voters also faced significant violence and overt intimidation when attempting to register and vote.<sup>77</sup>

The effects were significant. For example, in Alabama, only 3,000 of the 181,471 voting-age Black males were registered in 1900. In Louisiana, there were 130,344 Black citizens registered to vote in 1896 – that number dropped to 5,320 by 1900.<sup>78</sup>

Black Americans were not the only targets of Jim Crow Era voter suppression during this period. Native Americans and Asian Americans were also denied equal voting rights. Additionally, in New York, newly arriving citizens from Puerto Rico had their voting rights hindered by complex English-literacy tests.<sup>79</sup>

Some progress was made through litigation.<sup>80</sup> In 1944, the Court invalidated the Texas “White primary” in *Smith v. Allwright*.<sup>81</sup> White primaries were primary elections in the South where only White voters could vote. Because of the power of the primary process, White primaries essentially prevented Black voters from having any significant effect on elections despite their ability to vote in the general election.<sup>82</sup>

<sup>84</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 19, *citing* 321 U.S. 649, 664 (1944); *see also* O. Douglas Weeks, *The White Primary: 1944-1948*, 42 AM. POL. SCI. REV. 500-10, n.3 (1948) (noting that white primaries were primary elections in the South where only White voters were allowed to vote).

Some states, including Texas, actively defied federal court orders. The Court had repeatedly held that Texas' all-White primary violated the 14<sup>th</sup> Amendment. The Court first ruled the primary violated the Constitution in 1927 and then again in 1932. The Court was confronted by Texas' actions again in 1953 after the state tried to circumvent the 15<sup>th</sup> Amendment with another variant of the all-White primary.<sup>83</sup>

The courts proved insufficient in combating discrimination and enforcing the right to vote.

### THE CIVIL RIGHTS ERA AND THE VOTING RIGHTS ACT OF 1965

The voting barriers erected in the late-19<sup>th</sup> and early 20<sup>th</sup> centuries demonstrated that protections were needed to ensure full access to the right to vote for all Americans. As discriminatory laws were struck down through litigation, new discriminatory laws were implemented to take their place. Federal action proved to be the only remedy.

The Civil Rights Movement began in the 1950s. The Civil Rights Act of 1957 sought to protect voting rights, giving the Attorney General authority to sue local election officials in jurisdictions with a pattern of discriminating against voters and secure preventative relief.<sup>84</sup> This removed the burden from private individuals to sue at their own expense and outlawed intimidation, threats, or coercion that interfered with the right to vote.<sup>85</sup>

This law proved insufficient. Reports from the U.S. Commission on Civil Rights, established under the 1957 Civil Rights Act, documented the persistent discrimination faced by Black voters.<sup>86</sup> The Commission held a hearing in Jackson, Mississippi, where it found Black voter registration was declining and outlined the barriers, such as poll taxes and registration tests, experienced by Black voters.<sup>87</sup>

---

Since the Democratic Party dominated Southern elections, positions were often determined during the party's primary elections since there was little chance of a Democrat losing in a general election. Therefore, White primaries essentially prevented Black voters from having any significant effect on elections in the South despite their ability to vote in general elections.)

<sup>87</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 21, *citing* U.S. Commission on Civil Rights, Mississippi (1965).

Subsequent Civil Rights Acts in 1960 and 1964, while milestones at the time, also proved inadequate in protecting against discrimination in voting.<sup>88</sup> At the time, Attorney General Nicholas Katzenbach said the Civil Rights Acts of 1957, 1960, and 1964, when it came to ensuring the right to vote, “had only minimal effect. They [were] too slow.”<sup>89</sup>

The Voting Rights Act of 1965 was the culmination of a long, non-violent movement for equal voting rights led by civil rights organizations such as the Southern Christian Leadership Conference (SCLC), launched by Dr. Martin Luther King, Jr. and other civil rights activists, and the Student Nonviolent Coordinating Committee (SNCC). This peaceful movement was often met with violence. Civil rights workers involved in voter registration campaigns were beaten and jailed, and churches, homes, and other buildings were bombed.<sup>90</sup> In 1964, three activists working on SNCC’s voter registration campaigns were murdered in Neshoba County, Mississippi.

On March 7, 1965, in Selma, Alabama, when civil rights advocates peacefully marched across Edmund Pettis Bridge to condemn such violence and bring attention to the struggle for equal voting rights, state troopers and local law enforcement viciously attacked them with clubs, whips, and tear gas. That day would become known as “Bloody Sunday.” Two days later, Dr. King led a second peaceful march from Selma to Montgomery,<sup>91</sup> at which he critically noted in a speech that, “the Civil Rights Act of 1964 gave Negroes some part of their rightful dignity, but without the vote, it was dignity without strength.”<sup>92</sup>

On March 15, 1965, shortly after Bloody Sunday, President Lyndon B. Johnson spoke before a Joint Session of Congress, in a nationally televised address calling on Congress to act. He said:

“There is no cause for pride in what has happened in Selma. There is no cause for self-satisfaction in the long denial of equal rights of millions of Americans. But there is cause for hope and for faith in our democracy in what is happening tonight. … Our mission is at once the oldest and the most basic of this country—to right wrong, to do justice, to serve man. … Our fathers believed that if this noble view of the rights of

<sup>88</sup> See *South Carolina v. Katzenbach*, 383 U.S. 301, 313 (1966).

<sup>89</sup> “In recent years, Congress has repeatedly tried to cope with the problem by facilitating case-by-case litigation against voting discrimination. The Civil Rights Act of 1957<sup>[16]</sup> authorized the Attorney General to seek injunctions against public and private interference with the right to vote on racial grounds. Perfecting amendments in the Civil Rights Act of 1960<sup>[17]</sup> permitted the joinder of States as parties defendant, gave the Attorney General access to local voting records, and authorized courts to register voters in areas of systematic discrimination. Title I of the Civil Rights Act of 1964<sup>[18]</sup> expedited the hearing of voting cases before three-judge courts and outlawed some of the tactics used to disqualify Negroes from voting in federal elections.

Despite the earnest efforts of the Justice Department and of many federal judges, these new laws have done little to cure the problem of voting discrimination. According to estimates by the Attorney General during hearings on the Act, registration of voting-age Negroes in Alabama rose only from 14.2% to 19.4% between 1958 and 1964; in Louisiana it barely inched ahead from 31.7% to 31.8% between 1956 and 1965; and in Mississippi it increased only from 4.4% to 6.4% between 1954 and 1964. In each instance, registration of voting-age Whites ran roughly 50 percentage points or more ahead of Negro registration.”

<sup>90</sup> Kevin J. Coleman, *The Voting Rights Act of 1965: Background and Overview*, CRS Report R43626 (updated July 20, 2015) at p. 11, citing David J. Garrow, *Protest at Selma: Martin Luther King, Jr., and the Voting Rights Act of 1965* (New Haven and London: Yale University Press, 1978).

<sup>91</sup> *Id.* at p. 11.

<sup>92</sup> Martin Luther King, Jr., *Address at the Conclusion of the Selma to Montgomery March*, March 25, 1965, The Martin Luther King, Jr. Research and Education Institute, <https://kinginstitute.stanford.edu/king-papers/documents/address-conclusion-selma-montgomery-march>.

man was to flourish it must be rooted in democracy. The most basic right of all was the right to choose your own leaders. The history of this country in large measure is the history of expansion of that right to all of our people. Many of the issues of civil rights are very complex and most difficult. But about this there can and should be no argument: every American citizen must have an equal right to vote. . . . Experience has clearly shown that the existing process of law cannot overcome systematic and ingenious discrimination. No law that we now have on the books . . . can ensure the right to vote when local officials are determined to deny it. In such a case, our duty must be clear to all of us. The Constitution says that no person shall be kept from voting because of his race or his color.”<sup>93</sup>

In passing the Voting Rights Act, Congress observed, “there is little basis for supposing that without action, the States and subdivisions affected will themselves remedy the present situation in view of the history of the adoption and administration of the several tests and devices reached by this bill.”<sup>94</sup> Congress was presented with a record revealing more than 95 years of pervasive racial discrimination in certain areas of the country.<sup>95</sup> Before enacting the Voting Rights Act, the House and Senate Judiciary Committees each held nine days of hearings and received testimony from a total of 67 witnesses.<sup>96</sup>

Congress found the Department of Justice’s attempt to protect the right to vote through case-by-case enforcement to be inadequate, as states determined to discriminate still found ways to defy court orders and enact new laws. The Voting Rights Act called for a new approach – direct federal intervention and prescription to ensure constitutional rights were protected. Key provisions of the bill required certain states to submit to the federal government for oversight and approval — or “preclearance” — of any and all voting changes prior to implementation. In subsequently upholding the constitutionality of the Voting Rights Act, the Court recognized Congress’s broad authority to correct the history of discrimination in voting, reiterating that while states have broad powers to determine conditions under which the right to vote is exercised, states are not insulated from federal involvement when “State power is used as an instrument for circumventing a Federally protected right.”<sup>97</sup>

Nearly five months after President Johnson’s address, on August 6, 1965, he signed the Voting Rights Act of 1965 into law, 95 years after the 15<sup>th</sup> Amendment first granted Black men the right to vote and 45 years after the 19<sup>th</sup> Amendment granted women the franchise. The bill passed the House on August 3 (328-74) and the Senate on August 4 (79-18). In the words of President Johnson, the Voting Rights Act was designed to “help rid the Nation of racial discrimination in every aspect of the electoral process and thereby insure the right of all to vote.”<sup>98</sup>

<sup>98</sup> Communication From the President of the United States Transmitting a Draft of Proposed Legislation Entitled, “A Bill to Enforce the 15<sup>th</sup> Amendment to the Constitution of the United States,” H.R. Doc. 89-120 at p. 1 (1965)

The Voting Rights Act of 1965 was a necessary response to the years of discrimination and voter suppression experienced by Black Americans and other minority voters in the decades following Reconstruction. The Voting Rights Act and its subsequent reauthorizations took several key steps to protect voting rights. First, it prohibited discrimination in voting on the basis of race, creating a standard under which the Attorney General and private citizens could sue states and localities. Second, it created a formula for determining which states would become subject to federal government review of their voting law changes. Third, it required these states to get approval from the federal government or a court before making any changes to voting laws. Fourth, the Voting Rights Act authorized federal election observers and examiners to monitor what was happening in states. Finally, subsequent versions of the Voting Rights Act expanded these protections to include language minorities, prohibiting discrimination in voting on the basis of a person's ability to read and understand the English language.

The original Voting Rights Act placed a nationwide prohibition on states, or any political subdivision, from implementing voting qualifications or prerequisites, standards, practices, or procedures to “deny or abridge the right of any citizen to vote on the basis of race or color.”<sup>99</sup> Section 2 allows both the Attorney General and private citizens to sue to enforce the law’s protections. The Section 2 standard was expanded during subsequent reauthorizations and does not expire. While Section 2 is still in place and can be used to combat any discriminatory voting standard, practice, or procedure,<sup>100</sup> it is costly, time-consuming, and inadequate without the full complement of an enforceable Section 5.

Section 3 authorized the appointment of federal election examiners to observe voter registration and elections and register voters. Section 3 also contained what became known as the “bail in” provision — if a court finds violations of the 15<sup>th</sup> Amendment justifying relief, the court could retain jurisdiction over changes in voting laws.<sup>101</sup>

Section 4 created what has become known as the “coverage formula.” This set forth the criteria by which jurisdictions with a history of voter discrimination were identified and covered under the preclearance requirements of Section 5.<sup>102</sup> States and localities were covered under the Voting Rights Act if they used any “test or device” as a condition of voter registration on

<sup>99</sup> Voting Rights Act of 1965, Pub. Law No. 89-110, Sec. 2.

“No voting qualifications or prerequisite to voting, or standard, practice, or procedure shall be imposed or applied by any State or political subdivision to deny or abridge the right of any citizen of the United States to vote on account of race or color.”

<sup>100</sup> U.S. Department of Justice, *Section 2 of the Voting Rights Act* (updated Sept. 14, 2018), <https://www.justice.gov/crt/section-2-voting-rights-act>.

<sup>101</sup> Voting Rights Act of 1965, Pub. Law No. 89-110, at Sec. 3(c) – Section 3(c) is still in effect and was expanded to include Fourteenth Amendment violations in a later reauthorization.

<sup>102</sup> *Id.* at Sec. 4(b).

“(b) The provisions of subsection (a) shall apply in any State or in any political subdivision of a state which (1) the Attorney General determines maintained on November 1, 1964, any test or device, and with respect to whom (2) the Director of the Census determines that less than 50 per centum of the persons of voting age residing therein were registered on November 1, 1964, or that less than 50 per centum of such persons voted in the presidential election of November 1964. A determination or certification of the Attorney General or of the Director of the Census under this section or under section 6 or section 13 shall not be reviewable in any court and shall be effective upon publication in the Federal Register.”

November 1, 1964, and either less than 50 percent of voting age persons living there were registered to vote or less than 50 percent voted in the presidential elections that year.<sup>103</sup>

This provision was justified by the evidence Congress collected, outlining the rampant discrimination and violation of the 14<sup>th</sup> and 15<sup>th</sup> Amendments.<sup>104</sup> At the time of enactment, the jurisdictions covered were Alabama, Georgia, Louisiana, Mississippi, South Carolina, Virginia, 39 counties in North Carolina, and specific counties in Arizona and Hawaii.<sup>105</sup> As Congress amended the Voting Rights Act and added new criteria, the coverage formula encompassed additional states and localities. Furthermore, Section 4 contained a “bail out” provision under which states and localities could seek termination of Voting Rights Act coverage from a three-judge panel in the D.C. District Court.<sup>106</sup>

Section 4 of the Voting Rights Act also prohibited states from discriminating against non-English speakers educated in American schools. States could no longer condition the right to vote on a person’s ability to read, write, understand, or interpret something in the English language if they were educated in American-flag schools.<sup>107</sup> Section 4(e)(2) specifically protected the right to vote for people who successfully completed the sixth grade and were educated in schools in any state or territory, the District of Columbia and the Commonwealth of Puerto Rico in a language other than English.<sup>108</sup> Between 1950 and 1963, an average of 50,000 people migrated from Puerto Rico to New York City per year.<sup>109</sup>

Section 5 is the enforcement mechanism for Section 4. Known as “preclearance,” Section 5 requires any state or locality encapsulated by Section 4’s coverage formula to clear any voting changes with the federal government or the U.S. District Court for the District of

<sup>107</sup> Voting Rights Act of 1965, Pub. L. No. 89-110 at Sec. 4(e)(1).

“(e) (1) Congress hereby declares that to secure the rights under the fourteenth amendment of persons educated in American-flag schools in which the predominant classroom language was other than English, it is necessary to prohibit the States from conditioning the right to vote of such persons on ability to read, write, understand, or interpret any matter in the English language.”

<sup>108</sup> *Id.* at Sec. 4(e)(2).

“(2) No person who demonstrates that he has successfully completed the sixth primary grade in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English, shall be denied the right to vote in any Federal, State, or local election because of his inability to read, write, understand, or interpret any matter in the English language, except that in States in which State law provides that a different level of education is presumptive of literacy, he shall demonstrate that he has successfully completed an equivalent level of education in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English.”

<sup>109</sup> Kevin J. Coleman, *The Voting Rights Act of 1965: Background and Overview*, CRS Report R43626 (updated July 20, 2015) at p. 18.

Columbia *before* implementation. This effectively froze in place existing voting procedures and created a structure through which all voting changes would need to be analyzed for potential discriminatory effect before they were allowed to proceed.<sup>110</sup> In contrast to Section 2, preclearance is prospective, preventing discrimination before it happens. Preclearance negated the state's ability to circumvent court rulings by allowing the Attorney General or the D.C. Court to block discriminatory laws before voters were disenfranchised, and created an administrative procedure to evaluate proposed voting changes for potential discriminatory effect. It also prevented the state practice of enacting another discriminatory law once the original was struck down by the courts.

Sections 6, 7, and 8 of the Voting Rights Act addressed the appointment of federal election examiners for voter registration and the deployment of federal election observers. Section 6 allowed the Attorney General to request election examiners be deployed to jurisdictions.<sup>111</sup> Section 7 outlines how these examiners shall register voters.<sup>112</sup> Section 8 allows for federal monitors to observe inside polling places and ensure Voting Rights Act compliance on Election Day.<sup>113</sup>

The Voting Rights Act also suspended the use of literacy tests.<sup>114</sup> Further, the law included a congressional finding that poll taxes are a barrier to voting for people of limited means and impose "unreasonable financial hardship upon such a person as a precondition to their exercise of the franchise," bear no reasonable relationship to a legitimate state interest, are used for discriminatory purposes,<sup>115</sup> and are prohibited.<sup>116</sup> While the Voting Rights Act did not explicitly outlaw poll taxes, it did direct the Attorney General to challenge the issue in court. The Court held poll taxes unconstitutional under the 14<sup>th</sup> Amendment in 1966.<sup>117</sup>

<sup>117</sup> *Harper v. Virginia State Board of Elections*, 383 U.S. 663 (1966).

*Held:* A State's conditioning of the right to vote on the payment of a fee or tax violates the Equal Protection Clause of the Fourteenth Amendment.

The effects of the Voting Rights Act were immediate and significant. Nearly 1 million Black voters were registered within four years of the Act's passage.<sup>118</sup> More than 50 percent of the Black voting age population in each of the southern states were registered.<sup>119</sup> Additionally, the number of Black officials elected in the South more than doubled following the 1966 elections.<sup>120</sup>

## REAUTHORIZATIONS OF AND AMENDMENTS TO THE VOTING RIGHTS ACT

Originally set to expire five years after enactment, the Voting Rights Act was amended and extended by Congress on a bipartisan basis several times. Congress continued to support the underlying policy of the Voting Rights Act while voting to amend, expand, and extend the law five times: in 1970, 1975, 1982, 1992, and 2006.

The Voting Rights Act Amendments of 1970 passed on a bipartisan basis<sup>121</sup> in both the House (272-132) and Senate (64-12) and was signed into law by President Richard Nixon on June 22, 1970.<sup>122</sup> In extending the provisions, Congress reviewed the progress of the previous five years and extended the Voting Rights Act for another five years, and extended the prohibition on literacy and similar tests as a prerequisite to voting or voter registration for 10 years.<sup>123</sup> Congress determined that there had been a lack of enforcement by the Department of Justice over the previous years.<sup>124</sup> The preclearance formula updated the turnout disparities formula, thus updating Section 5's preclearance requirements.<sup>125</sup> The new formula resulted in the inclusion of parts of Alaska, Arizona, California, Idaho, New York, and Oregon under Section 5 preclearance.<sup>126</sup>

<sup>125</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 32-33; *see also* Voting Rights Act Amendments of 1970, Pub. L. No. 91-285, available at: <https://www.govinfo.gov/content/pkg/STATUTE-84/pdf/STATUTE-84-Pg314-2.pdf>.

<sup>126</sup> See 4. Section 4(b) of the Voting Rights Act of 1965 (79 Stat. 438; 42 U.S.C. 1973b) is amended by adding at the end of the first paragraph thereof the following new sentence: "On and after August 6, 1970, in addition to any State or political subdivision of a State determined to be subject to subsection (a) pursuant to the previous sentence, the provisions of subsection (a) shall apply in any State or any political subdivision of a State which (i) the Attorney General determines maintained on November 1, 1968, any test or device, and with respect to which (ii) the Director of the Census determines that less than 50 per centum of the persons of voting age residing therein were registered on November 1, 1968, or that less than 50 per centum of such persons voted in the presidential election of November 1968."

<sup>126</sup> Kevin J. Coleman, *The Voting Rights Act of 1965: Background and Overview*, CRS Report R43626 (updated July 20, 2015) at p. 19.

The 1970 updates also abolished durational residency requirements in the presidential elections and directed the states to provide voter registration for eligible voters who apply at least 30 days before an election, as well as allow voters who move within 30 days of an election to vote in their previous precinct or by absentee ballot.<sup>127</sup> Section 301 of the Amendments lowered the voting age to 18 for voting in federal elections.<sup>128</sup> In 1971, the 26<sup>th</sup> Amendment lowered the voting age from 21 to 18 for all elections.<sup>129</sup>

The Voting Rights Act Extension of 1975 again passed on a bipartisan basis<sup>130</sup> in both the House (341-70) and the Senate (77-12), and was signed into law by President Gerald Ford. The legislation extended the Voting Rights Act for another seven years and expanded the definition of permanently prohibited “tests and devices” to address language minorities.<sup>131</sup> This expanded Sections 5 and 8 to cover jurisdictions where five percent of the voting-age citizens were from a single language minority, election materials were printed only in English, and less than 50 percent of the voting age citizens were registered to vote or voted in the 1972 presidential election.<sup>132</sup> Congress found that “while minority political progress [that] had been made under the Voting Rights Act is undeniable … the nature of that progress has been limited.”<sup>133</sup>

The bill also included a requirement for bilingual elections if the illiteracy rate in English was greater than the national illiteracy rate, and a formula for determining when those materials must be provided. Section 203 of the amendments required voting materials be available in the language of the “applicable minority” within the jurisdiction, including Latinos, Asian and Pacific Islanders, Native Alaskans, and Native Americans.<sup>134</sup> The 1975 extension also made permanent the ban on literacy tests nationally, directed the Attorney General to enforce the 26<sup>th</sup> Amendment, and established a federal penalty for voting more than once in a federal election.<sup>135</sup>

The Voting Rights Act Amendments of 1982 again passed with largely bipartisan votes<sup>136</sup> in both chambers (389-24 in the House; 85-8 in the Senate) and was signed into law by President

<sup>127</sup> Voting Rights Act Amendments of 1970, Pub. L. No. 91-285, Sec. 202 Residence Requirements for Voting.

<sup>128</sup> Voting Rights Act Amendments of 1970, Pub. L. No. 91-285, Sec. 301(a); *Oregon v. Mitchell*, 400 U.S. 112 (1970) held that Congress had the power to lower the voting age to 18-year-old citizens in national elections, such as congressional, senatorial, vice-presidential, and presidential elections, but cannot set the voting age in state and local elections.

<sup>129</sup> U.S. Const. amend. XXVI, Sec. 1.

“The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age.”

<sup>134</sup> Voting Rights Act Extension of 1975, Pub. L. No. 94-73, Sec. 203, <https://www.govinfo.gov/content/pkg/STATUTE-89/pdf/STATUTE-89-Pg400.pdf#page=3>.

<sup>135</sup> Kevin J. Coleman, *The Voting Rights Act of 1965: Background and Overview*, CRS Report R43626 (updated July 20, 2015) at p. 19-20.

<sup>136</sup> *Id.* at p. 20-21, see H.R. 3112 – passed the House on October 15, 1981 (389-24); passed the Senate with amendments on June 18, 1982 (85-8) following a filibuster; the House approved the Senate amendments by unanimous consent on October 5, 1982; signed into law June 29, 1982.

Ronald Reagan. The law extended preclearance for another 25 years, leaving in place the same coverage formula.<sup>137</sup> Congress found that, “despite the gains in increased minority registration and voting and in the number of minority elected officials … continued manipulation of registration procedures and the electoral process, which effectively exclude minority participation from all stages of the political process” was occurring.<sup>138</sup> Congress reemphasized its intent that, “protection of the franchise extend beyond mere prohibition of official actions designed to keep voters away from the polls … [and] include prohibition of State actions which so manipulate the elections process as to render the vote meaningless.”<sup>139</sup>

The requirement for bilingual elections was also extended for 10 years.<sup>140</sup> Jurisdictions could now also petition to be “bailed out” separately from states.<sup>141</sup> A significant change was also made to Section 2 – plaintiffs could now challenge laws and election practices without needing to prove discriminatory intent, adjusting the burden of proof requirement to necessitate a “results” or “effects” test, lowering the evidentiary burden on the plaintiffs.<sup>142</sup>

This change addressed the Court’s ruling in *City of Mobile v. Bolden*, which held that Section 2 required proof of a discriminatory intent to challenge a law.<sup>143</sup> This adjustment also reflected the changing landscape of discrimination in voting laws. Poll taxes and literacy tests were no longer as prevalent as they were pre-Voting Rights Act, but a new generation of discriminatory practices had begun to emerge. This “second generation” of suppression tactics included discriminatory redistricting, annexations, and at-large elections meant to dilute the minority vote.<sup>144</sup> Eliminating the intent requirement made it possible to challenge and prosecute these types of practices that were discriminatory in their application and effect, regardless of their intent.

The Voting Rights Language Assistance Act of 1992, again bipartisan (237-125 in the House; 75-20 in the Senate),<sup>145</sup> was signed into law by President George H. W. Bush. The law extended the bilingual voting assistance requirement until 2007 (another 15 years) and expanded the scope of bilingual voting assistance coverage to include jurisdictions with 10,000 members of a language minority whose members have limited English proficiency (“LEP”).<sup>146</sup> This change ensured the protections covered jurisdictions where LEP voters did not make up five percent of the eligible voters, reaching Latino and Asian American voters in

larger cities.<sup>147</sup> The law also included more expansive coverage formulas for language access for Native American voters living on reservations.<sup>148</sup>

The last reauthorization of the Voting Rights Act took place in 2006. President George W. Bush signed H.R. 9, the Fannie Lou Hamer, Rosa Parks, and Coretta Scott King Voting Rights Act Reauthorization and Amendments Act of 2006 into law following a largely bipartisan vote in the House (390-33) and unanimous passage in the Senate on July 13, 2006.<sup>149</sup> Upon signing the reauthorization, President Bush said, “In four decades since the Voting Rights Act was first passed, we’ve made progress toward equality, yet the work for a more perfect union is never ending. We’ll continue to build on the legal equality won by the civil rights movement to help ensure that every person enjoys the opportunity that this great land of liberty offers.”<sup>150</sup>

The 2006 reauthorization extended the bulk of the Voting Rights Act for another 25 years, though it did eliminate the ability of federal election examiners to register voters under Section 5.<sup>151</sup> Prior to introducing H.R. 9, the House Committee on Judiciary held 10 oversight hearings before the Subcommittee on the Constitution examining the effectiveness of the temporary provision of the Voting Rights Act over the last 25 years.<sup>152</sup> The Subcommittee heard testimony from 39 witnesses and assembled over 12,000 pages of testimony, documentary evidence and appendices.<sup>153</sup> Additionally, the Subcommittee held two legislative hearings and heard from seven additional witnesses.<sup>154</sup> When combined with the work of the Senate, the two Judiciary Committees held 21 hearings, heard from numerous witnesses, received reports and documents illustrating continued discrimination, and, in all, compiled a legislative record totaling more than 15,000 pages.<sup>155</sup>

In the absence of a full Voting Rights Act, during the first year of the 116<sup>th</sup> Congress, the Subcommittee on Elections of the Committee on House Administration held eight hearings and one listening session in eight states and the House of Representatives, heard testimony from more than 60 witnesses, and collected more than 3,000 pages of testimony and documents.

## THE CONSTITUTIONALITY AND ENFORCEMENT OF THE VOTING RIGHTS ACT AND ITS PROVISIONS

The Court upheld the constitutionality of the Voting Rights Act in 1966, in *South Carolina v. Katzenbach*.<sup>156</sup> Seeking to block its enforcement, the State of South Carolina alleged that provisions of the Voting Rights Act violated the Constitution and infringed on states' rights.

Congress exercised its power to create the law through Section 2 of the 15<sup>th</sup> Amendment, which gave power to the Congress to create laws necessary to uphold the constitutional prohibition against racial discrimination in voting.<sup>157</sup> The Court held that,

“After enduring nearly a century of widespread resistance to the Fifteenth Amendment, Congress has marshalled an array of potent weapons against the evil, with authority in the Attorney General to employ them effectively. . . . We here hold that the portions of the Voting Rights Act properly before us are a valid means for carrying out the commands of the Fifteenth Amendment. Hopefully, millions of non-White Americans will now be able to participate for the first time on an equal basis in the government under which they live. We may finally look forward to the day when truly ‘[t]he right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.’”<sup>158</sup>

Also, in 1966, the Court held in *Katzenbach v. Morgan* that Section 4(e) of the Voting Rights Act was a proper exercise of Congress's powers under Section 5 of the 14<sup>th</sup> Amendment, rendering New York's English literacy requirements unenforceable to the extent they conflicted with the Voting Rights Act.<sup>159</sup>

Prior to 2013, any voting change in a jurisdiction covered under Section 4 was subject to review. Many of these changes include current issues discussed in this report, including: redistricting, closing or moving polling locations, new procedures for purging voters from the rolls, English-language literacy tests, voter ID laws, cutting early voting or same-day registration, and any other changes to voting procedures. The goal of the Voting Rights Act and its enforcement mechanisms was to block the implementation of racially discriminatory voting practices and prevent these practices from disenfranchising voters.

From 1982 to 2006, there were more than 700 objections to voting changes under the Voting Rights Act's Section 5 preclearance provisions because the Department of Justice or the U.S. District Court for the District of Columbia considered them to be racially discriminatory.<sup>160</sup> More than 800 proposed changes were also withdrawn or amended after the Department of Justice requested additional information.<sup>161</sup> During the 2006 reauthorization, “Congress found there were more Department of Justice objections [blocking proposed voting changes under

<sup>156</sup> *South Carolina v. Katzenbach*, 383 U.S. 301 (1966).

<sup>157</sup> *Id.*

<sup>158</sup> *Id.* at p. 328.

<sup>159</sup> *Katzenbach v. Morgan*, 384 U.S. 641 (1966).

<sup>160</sup> H.R. Rep. No. 109-478, at 21 (2006); H.R. Rep. No. 109-478, at 40-41 (2006).

<sup>161</sup> H.R. Rep. No. 109-478, at 645 (2006).

Section 5 due to determinations that they would be discriminatory] between 1982 and 2004 (626) than there were between 1965 and the 1982 reauthorization (490).”<sup>162</sup>

During the 2006 Voting Rights Act reauthorization, the Department of Justice reported receiving between 4,000 and 6,000 submissions annually from jurisdictions covered by the Voting Rights Act.<sup>163</sup> The Judiciary Committee found that, “The changes sought by covered jurisdictions were calculated decisions to keep minority voters from fully participating in the political process. This increased activity shows that attempts to discriminate persist and evolve, such that Section 5 is still needed to protect minority voters in the future.”<sup>164</sup> During the 2006 reauthorization of the Voting Rights Act, Congress received testimony from the National Commission on the Voting Rights Act that the number of elected officials serving in the original six states covered by the temporary provisions of the Voting Rights Act (Louisiana, Mississippi, South Carolina, Virginia, Georgia, and Alabama) increased by approximately 1,000 percent since 1965.<sup>165</sup>

Section 2, in concert with Sections 4 and 5, also proved a powerful tool to protect the right to vote and enforce the Voting Rights Act. At its enactment, Section 5 left in place long-standing, racially discriminatory practices that were not already struck down because they were not enacted *after* 1965. Preclearance was prospective and did not preclear existing voting laws.<sup>166</sup> For example, when Black voters wanted to challenge Mississippi’s historic dual voter registration system that had been enacted a century before, they had to do so under Section 2.<sup>167</sup> After the success of this case, when Mississippi tried to resurrect the dual system, it was successfully challenged under Section 5.<sup>168</sup> Section 2 is also critical to protecting the voting rights of Americans living in states not covered under Section 5 preclearance. Section 2 is still in effect nationwide, the implications of which will be discussed in greater detail later in this report.

Over the lifetime of the Voting Rights Act, states and localities have been “bailed in” under the coverage formula, as well as successfully petitioned to “bail out.” As of 2013, Alabama, Alaska, Arizona, Georgia, Louisiana, Mississippi, South Carolina, Texas, and Virginia were covered in their entirety.<sup>169</sup> California, Florida, New York, North Carolina, South Dakota, and Michigan each contained covered counties or townships, but the state as a whole was

not.<sup>170</sup> From 1967 until 2013, sixteen jurisdictions in North Carolina, New Mexico, Maine, Oklahoma, Wyoming, Massachusetts, Connecticut, Colorado, Hawaii, Idaho, Virginia, Texas, Georgia, California, Alabama, and New Hampshire successfully availed themselves of the Section 4 bailout mechanism and were no longer individually subject to Section 5.<sup>171</sup>

This section is not designed to be an exhaustive examination of the various provisions of the Voting Rights Act or the relevant case law.

### SHELBY COUNTY AND THE UNDERMINING OF THE VOTING RIGHTS ACT

Following the 2006 reauthorization, the Voting Rights Act was again challenged in *Northwest Austin Utility District Number One v. Holder*.<sup>172</sup> Though the Court specifically did not rule on the constitutionality of Section 5 of the Voting Rights Act, the majority raised significant concerns.<sup>173</sup> These concerns served as a predicate to the Court's actions in 2013.<sup>174</sup>

On June 25, 2013, the Court struck down Section 4(b) of the Voting Rights Act, finding the coverage formula unconstitutional in the 5-4 decision in *Shelby County*.<sup>175</sup> The Court specifically did not rule on the constitutionality of Section 5 preclearance, only the formula determining which jurisdictions were subject to coverage. The decision effectively returned the United States to a reactive state of voting rights protection, eliminating the proactive protections that had worked for decades to ensure equal access to the ballot.

The *Shelby County* decision changed the landscape of voting rights and efforts to prevent discriminatory voting laws. Striking down Section 4(b) effectively rendered Section 5 inoperable. The Department of Justice no longer has the authority to review proposed voting changes before they go into effect, leaving it to voters and litigators to identify when discrimination has occurred and to undertake the lengthy and costly process of challenging

---

<sup>170</sup> *Id.*

<sup>171</sup> U.S. Department of Justice, *Section 4 of the Voting Rights Act* (updated Dec. 21, 2017), <https://www.justice.gov/crt/section-4-voting-rights-act#bailout>.

<sup>172</sup> *Northwest Austin Utility District Number One v. Holder*, 557 U.S. 193, 129 S.Ct. 2504 (2009).

<sup>173</sup> *Id.* at p. 2506.

<sup>174</sup> The historic accomplishments of the Voting Rights Act are undeniable, but the Act now raises serious constitutional concerns. The preclearance requirement represents an intrusion into areas of state and local responsibility that is otherwise unfamiliar to our federal system. Some of the conditions that the Court relied upon in upholding this statutory scheme in *South Carolina v. Katzenbach*, 383 U.S. 301, 86 S.Ct. 803, 15 L.Ed.2d 769, and *City of Rome v. United States*, 446 U.S. 156, 100 S.Ct. 1548, 64 L.Ed.2d 119, have unquestionably improved. Those improvements are no doubt due in significant part to the Voting Rights Act itself, and stand as a monument to its success, but the Act imposes current burdens and must be justified by current needs. The Act also differentiates between the States in ways that may no longer be justified."

<sup>175</sup> *Id.* at p. 2511.

"Some of the conditions that we relied upon in upholding this statutory scheme in *Katzenbach* and *City of Rome* have unquestionably improved. Things have changed in the South. Voter turnout and registration rates now approach parity. Blatantly discriminatory evasions of federal decrees are rare. And minority candidates hold office at unprecedented levels. ... These improvements are no doubt due in significant part to the Voting Rights Act itself, and stand as a monument to its success. Past success alone, however, is not adequate justification to retain the preclearance requirements."

<sup>175</sup> *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612 (2013); Chief Justice Roberts writing for the majority, Justice Ginsberg writing for the dissent.

these laws in court. States and localities are no longer required to collect and evaluate racial impact data when making changes to voting laws.

Chief Justice Roberts, writing for the majority, acknowledged that “voting discrimination still exists, no one doubts that.”<sup>176</sup> While acknowledging that the progress made was “largely because of the Voting Rights Act,” the question, Roberts said, was “whether the Act’s extraordinary measures, including its disparate treatment of the States, continue to satisfy constitutional requirements.”<sup>177</sup> “The [15th] Amendment is not designed to punish for the past; its purpose is to ensure a better future.”<sup>178</sup>

In declaring Section 4(b) unconstitutional, the Roberts Court held that the coverage formula in the 2006 reauthorization “could no longer be used as a basis for subjecting jurisdictions to preclearance,”<sup>179</sup> finding that 40 years had passed since the enactment of the original Voting Rights Act and the 2006 law ignored these developments in the coverage formula “keeping the focus on decades-old data relevant to decades-old problems, rather than on current data reflecting current needs.”<sup>180</sup> *Shelby County* did not rule on Section 5 itself, nor did it affect the permanent, nationwide ban on racial discrimination in Section 2. Additionally, Chief Justice Roberts said, “Congress may draft another formula based on current conditions,” leaving open the possibility that the Court could find an updated formula to be constitutional.<sup>181</sup>

Section 5 prohibited retrogression — going backwards by restricting access to the polls for minority voters.<sup>182</sup> The Court’s decision in *Shelby County* has left voters across America vulnerable to the discrimination and disenfranchisement the Voting Rights Act sought to eradicate.<sup>183</sup> The American people have now gone to the polls in three federal elections without the full protections of the Voting Rights Act. The next chapters of this report illustrate how, without the full protection of the Voting Rights Act and support of the Department of Justice,<sup>184</sup> states have retrogressed, limiting access to the polls and suppressing the vote of Americans of color.

<sup>180</sup> *Id.* at p. 2628-29.

<sup>181</sup> *Id.* at p. 2631.

<sup>182</sup> Our decision in no way affects the permanent, nationwide ban on racial discrimination in voting found in § 2. We issue no holding on § 5 itself, only on the coverage formula. Congress may draft another formula based on current conditions. Such a formula is an initial prerequisite to a determination that exceptional conditions still exist justifying such an “extraordinary departure from the traditional course of relations between the States and the Federal Government.” *Presley*, 502 U.S., at 500-501, 112 S.Ct. 820. Our country has changed, and while any racial discrimination in voting is too much, Congress must ensure that the legislation it passes to remedy that problem speaks to current conditions.”

<sup>183</sup> *Beer v. United States*, 425 U.S. 130, 141 (1976).

<sup>184</sup> “By prohibiting the enforcement of a voting-procedure change until it has been demonstrated to the United States Department of Justice or to a three-judge federal court that the change does not have a discriminatory effect, Congress desired to prevent States from ‘undo[ing] or defeat[ing] the rights recently won’ by Negroes. ... Section 5 was intended ‘to ensure that [the gains thus far achieved in minority political participation] shall not be destroyed through new [discriminatory] procedures and techniques. ...’

In other words, the purpose of § 5 has always been to ensure that no voting-procedure changes would be made that would lead to a retrogression in the position of racial minorities with respect to their effective exercise of the electoral franchise.”

## CHAPTER TWO

### *The State of Voting Rights and Election Administration post-Shelby County*

#### THE CURRENT LANDSCAPE

---

*“As a people, the most important right that we have is the right to vote. ... Other rights, even the most basic, are illusory if the right to vote is undermined.”*

— Irving Joyner, NCCU School of Law

---

The Court’s decision in *Shelby County* fundamentally undermined the manner in which voting rights are protected and enforced across America, including pursuant to the 14<sup>th</sup> and 15<sup>th</sup> Amendments. Before *Shelby County*, all voting changes in covered jurisdictions had to be cleared through the Department of Justice or the Federal Court in the District of Columbia.<sup>185</sup>

Now, without the Section 4(b) coverage formula, no jurisdiction falls under Section 5 preclearance, rendering this critical portion of the Voting Rights Act effectively unenforceable. Previously covered states are now free to enact discriminatory and suppressive laws that may have otherwise been denied under a preclearance review. This leaves the voting rights of millions of Americans vulnerable to suppression and disenfranchisement.

*Shelby County* opened the door for a new generation of voter suppression. Its effects were sudden.

Hours after *Shelby County*, Texas revived a previously blocked voter ID law. Within days, Alabama announced it would move to enforce a photo ID law it had previously refused to submit to the Department of Justice for preclearance. Within months, New York broke from past practices and declined to hold special elections to fill 12 legislative vacancies, denying 800,000 voters of color representation.<sup>186</sup>

In North Carolina, State Senator Tom Apodaca announced the state’s General Assembly leadership no longer had to worry about the “legal headache” of preclearance, and the state

---

<sup>185</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 45-46, citing 52 U.S.C. § 10304(a), see also 28 C.F.R. § 51.10; *Allen v. State Bd. of Elections*, 393 U.S. 544, 548-89 (1969).

“First, under Section 5, any voting law, practice, or procedure was subject to preclearance review prior to *Shelby County*...”

<sup>186</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019); written testimony of Deuel Ross at p. 4.

moved ahead with a law to remake the state's elections system.<sup>187</sup> Less than two months after *Shelby County*, the North Carolina General Assembly passed, and the Governor signed into law, what became known as the “monster law,”<sup>188</sup> a sweeping voter suppression bill requiring strict forms of voter ID, cuts to early voting, and eliminating key election administration practices, including:

- One of two “Souls to the Polls” Sundays (these are early voting events, traditionally held the Sunday before Election Day and heavily utilized by Black faith communities to get voters to the polls);
- Same-day voter registration;
- Out-of-precinct voting which allowed voters to cast provisional ballots if they appeared at the wrong precinct but in the correct county; and
- Preregistration of 16- and 17-year old voters.<sup>189</sup>

Litigation against the law, captioned *NC NAACP v. McCrory*, demonstrated there was no legitimate reason for North Carolina’s law. It was enacted specifically to target minority voters.<sup>190</sup> The court characterized H.B. 589 as “the most restrictive voting law North Carolina has seen since the era of Jim Crow”<sup>191</sup>

Before *Shelby County*, the Department of Justice issued over 50 objection letters under Section 5 from 1980 to 2013 regarding proposed voting changes in North Carolina, including several after 2000.<sup>192</sup> During the same period, plaintiffs brought 55 successful Section 2 cases in North Carolina.<sup>193</sup> Post-*Shelby County*, the monster law attempted to usher in a suite of suppressive laws that could have almost certainly not passed preclearance scrutiny, crafted in such a

<sup>189</sup> *North Carolina State Conference of the NAACP v. McCrory*, 831 F.3d 204, 216-218 (4th Cir. 2016), *cert. denied*, 137 S. Ct. 1399 (2017).

<sup>190</sup> *Voting Rights and Election Administration in North Carolina: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Caitlin Swain at p. 5-6, *citing NC NAACP v. McCrory*, 831 F.3d 204 (4<sup>th</sup> Cir. 2016).

<sup>191</sup> “Finding in favor of plaintiffs, the court concluded that “[t]he new provisions target African Americans with almost surgical precision” and “impose cures for problems that did not exist.” Upon receipt of [racially disaggregated data on voting patterns and usage],” the Fourth Circuit found that “the General Assembly enacted legislation that restricted voting and registration in five different ways, all of which disproportionately affected African Americans.”

<sup>192</sup> “[W]ith race data in hand,” the General Assembly had crafted a photo ID requirements that excluded the specific types of photo IDs that it knew Black voters disproportionately lacked, and enacted other provisions after learning that Black voters used early voting at a much higher rate than Whites. Black voters specifically used the first week of early voting more heavily than Whites, Black voters voted out-of-precinct at higher rates than whites and thus benefited more from the partial counting of those ballots, and Black youth used preregistration at higher rates than Whites. … This case ‘comes as close to [including] a smoking gun as we are likely to see in modern times,’ the court explained, ‘[when] the State’s very justification for a challenged statute hinges explicitly on race—specifically its concern that African Americans, who had overwhelmingly voted for Democrats, had too much access to the franchise.’”

<sup>193</sup> *Voting Rights and Election Administration in North Carolina: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Caitlin Swain at p. 2, *citing NC NAACP v. McCrory*, 831 F.3d 204, 227 (4<sup>th</sup> Cir. 2016).

<sup>192</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 70-71.

<sup>193</sup> *Id.*

*"Prior to Shelby, covered jurisdictions had to provide notice to the federal government – which meant notice to the public – before they could implement changes in their voting practices or procedures. Such notice is of paramount importance, because the ways that the voting rights of minority citizens are jeopardized are often subtle. They range from the consolidation of polling places so as to make it less convenient for minority voters to vote, to the curtailing of early voting hours that makes it more difficult for low-income people of color to vote, to the disproportionate purging of minority voters from voting lists under the pretext of "list maintenance."*

— Kristen Clarke, Lawyers' Committee for Civil Rights Under Law

discriminatory manner a three-judge panel found they “target[ed] African Americans with almost surgical precision” and “impose[d] cures for problems that did not exist.”<sup>194</sup>

By 2016, 14 states had enacted new voting restrictions for the first time, including previously covered states such as Alabama, Arizona, Mississippi, South Carolina, Texas, and Virginia.<sup>195</sup> In 2017, two additional states, Arkansas and North Dakota, enacted voter ID laws.<sup>196</sup> In 2018, Arkansas, Indiana, Montana, New Hampshire, North Carolina, and Wisconsin enacted new restrictions on voting, ranging from restrictions on who can collect absentee ballots, to cuts to early voting, restrictions on college students, and enshrining voter ID requirements in a state constitution.<sup>197</sup>

In 2018, more than 60 percent of Florida's voters passed a ballot initiative automatically restoring the voting rights of more than 1 million formerly incarcerated individuals with past felony convictions. Amendment 4 would apply once an individual had completed his or her sentence, including parole and probation, except for murder or felony sex offenses. In 2019, the Florida legislature passed, and the Governor signed a new law effectively overruling the will of more than 60 percent of the state's voters, requiring all formerly incarcerated individuals to pay fines and fees before they can be re-enfranchised.<sup>198</sup>

<sup>194</sup> *North Carolina State Conference of the NAACP v. McCrory*, 831 F.3d 204, 216-218 (4th Cir. 2016), cert. denied, 137 S. Ct. 1399.

<sup>195</sup> *New Voting Restrictions in America*, Brennan Center for Justice (last updated July 3, 2019), <https://www.brennancenter.org/new-voting-restrictions-america>.

In 2016, the 14 states with new voting restrictions in place for the presidential election were: Alabama, Arizona, Indiana, Kansas, Mississippi, Nebraska, New Hampshire, Ohio, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin.

<sup>196</sup> *Id.*

<sup>197</sup> *Id.*

<sup>198</sup> Amendment 4 passed overwhelmingly, yet the Florida State Legislature passed S.B. 7066 and Governor DeSantis signed it into law in 2019. The law is currently being challenged in court, *see also Voting Laws Roundup 2019*, Brennan Center for Justice (July 10, 2019).

Also in 2019, Arizona enacted laws extending voter ID requirements to early voting and emergency early and absentee voting.<sup>199</sup>

Without the full protection of the Voting Rights Act, voters and litigators are left to rely primarily on lawsuits to protect the franchise. Section 2 of the Voting Rights Act provides a private right of action to sue in cases of voting rights violations. However, as discussed in this report, Section 2 litigation has been time consuming and costly, and is only available to block existing or newly instituted discriminatory policies or procedures. Since *Shelby County*, the Lawyers' Committee for Civil Rights Under Law ("Lawyers' Committee") alone has been involved in 41 cases related to discriminatory practices in voting or adverse effects on the voting rights of minority voters.<sup>200</sup> Twenty-four of these actions have been filed since January 20, 2017.<sup>201</sup> By contrast, the Department of Justice has filed no cases in that time.<sup>202</sup>

In the same timeframe, the American Civil Liberties Union ("ACLU") has opened more than 60 new voting rights matters, including cases filed, amicus briefs, and investigations.<sup>203</sup> The organization currently has more than 30 active matters.<sup>204</sup> Between the 2012 and 2016 presidential elections, the ACLU and its affiliates won 15 voting rights victories protecting more than 5.6 million voters in 12 states, collectively home to 161 members of the House and 185 Electoral College votes.<sup>205</sup> Between the *Shelby County* decision and the September 2018 issuance of the U.S. Commission on Civil Rights' report entitled "An Assessment of Minority Voting Rights Access in the United States" at least 23 states had enacted newly restrictive statewide voter laws.<sup>206</sup>

Reliance on Section 2 also shifts the burden to the citizen, rather than the state or local government seeking to enact a change to its voting laws, to prove disenfranchisement. Suppressive laws can potentially disenfranchise voters for years before they are identified,

<sup>199</sup> <https://www.brennancenter.org/analysis/voting-laws-roundup-2019>.

<sup>204</sup> *Id.*

<sup>205</sup> *Id.* at p. 2-3.

<sup>206</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript, Catherine Lhamon at p. 36.

"Drawing from Commission research and investigations and memoranda from 13 of the Commission's State advisory committees who analyzed voting discrimination in Alabama, Alaska, Arizona, California, Illinois, Indiana, Kansas, Louisiana, Maine, New Hampshire, Ohio, Rhode Island, and Texas, this report documents current conditions evidencing ongoing discrimination in voting. On every measure the Commission evaluated, the information the Commission received underscores that discrimination in voting persists."

challenged, and litigated to a conclusion. In addition, the Department of Justice has also interpreted *Shelby County* to mean it can now only send election observers if ordered by a court.<sup>207</sup> removing a critical tool for gathering evidence of voting discrimination and firsthand knowledge.

The 2014 midterm was the first election since the passage of the Voting Rights Act in 1965 that Americans went to register and cast their votes without the full might of the federal government protecting their right to do so.

In 2018, more than 50 percent of eligible Americans cast a ballot in the midterm elections.<sup>208</sup> The U.S. Census Bureau reported voter turnout was up among all voting age and major racial and ethnic groups.<sup>209</sup> 2018 saw the highest midterm turnout in four decades.<sup>210</sup> The increased turnout resulted in reports of long lines stretching for multiple hours; voting machines that did not work or were not plugged in; and polling locations that did not open on time or were moved. There is no way to know how many voters were disenfranchised because they had to leave the line or were turned away inside the polling place. It is also unknown how many voters were forced to cast a provisional ballot because of haphazard enforcement of voting regulations, or a lack of proper poll worker training, or their name was improperly removed from the voter rolls.

The Committee on House Administration Subcommittee on Elections held hearings in communities across the country, collecting contemporaneous data that clearly illustrates the ongoing attempts to suppress the votes of minority communities. The hearings provided clear evidence that discrimination and suppression are alive and well – the overt poll taxes and literacy tests as experienced during the Jim Crow Era may be resigned to the past, but discrimination in voting is not. Across the country, the Subcommittee on Elections heard testimony and gathered evidence of ongoing voter suppression. Six years after the Court's decision in *Shelby County*, Americans, including policymakers, have a more in-depth understanding of the measures taken by states to restrict and subvert the right to vote. Lawsuits over discriminatory voting changes lay bare the persistent opposition that some states and localities have toward equal access to the ballot. Furthermore, the evidence is clear that Sections 4(b) and 5 of the Voting Rights Act remain just as critical to protecting the right to vote and enforcing the 14<sup>th</sup> and 15<sup>th</sup> Amendments as they were in 1965.

Voters now face pervasive subtle and overt suppression tactics, many (if not all) of which would have been vetted through a transparent and thorough process under Section 5. Under current law, these changes can be enacted under the cover of darkness, with little to no public notice and no evaluation of the potential impact on voters. This chapter explores these tactics, highlighting testimony received at Subcommittee hearings, as well as how voter suppression

<sup>210</sup> *Id.*

techniques have evolved. This chapter also examines the role of Section 2 litigation (one of the key remaining tools in the Voting Rights Act arsenal). It examines the critical role it still plays in helping protect the right to vote, but also examines the limitations in relying on Section 2 to address the disenfranchisement that a full Voting Rights Act would have prevented.

In Brownsville, Texas, Mimi Marziani of the Texas Civil Rights Project testified that, “long lines and late openings are, unfortunately, such a common feature of Texas elections that they are deemed ‘typical’ by election officials.”<sup>211</sup> Ms. Marziani further testified that, in Harris County, home to the city of Houston, numerous polling places opened more than an hour late on Election Day.<sup>212</sup> The county had to be sued to keep the polls open longer to compensate.

*[A]t the Pittman Park voting station, we received calls lines that were reportedly 300 people deep with a wait time of 3.5 hours. Long lines and broken or inoperable voting machines also led to people getting turned away or given provisional ballots. Ultimately, I was involved in advocacy and litigation to extend the hours of several polling locations in Fulton County, Georgia, that particularly impacted Atlanta University Center students at Morehouse, Spelman, and Clark Atlanta University at the Booker T. Washington High School polling place locations.”*

— Gilda Daniels, Advancement Project

In Georgia, Gilda Daniels of the Advancement Project testified that at the Pittman Park voting sites they received calls that lines were “reportedly 300 people deep with a wait time of 3.5 hours.”<sup>213</sup> Ultimately, Ms. Daniels testified she was involved in advocacy and litigation to extend hours of several polling locations in Fulton County, Georgia.<sup>214</sup> The League of Women Voters of Georgia submitted testimony that voters in Gwinnett County and Atlanta precincts waited at least four hours to cast their vote.<sup>215</sup> Voters in Georgia experienced issues with the voting rolls, receiving and returning absentee ballots, and being forced to cast provisional ballots.

Witnesses testified that elections officials refused to provide provisional ballots, citing a paper shortage.<sup>216</sup>

<sup>214</sup> *Id.*

<sup>215</sup> *Voting Rights and Election Administration in Georgia: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*; written testimony submitted for the record by Tracy Adkison, League of Women Voters of Georgia.

<sup>216</sup> *Voting Rights and Election Administration in Georgia: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*; written testimony of Stacey Abrams at p. 2.

“In counties, polling locations ran out of provisional and back-up paper ballots. Frustrated voters received inaccurate information regarding their rights; and thousands of voters were forced to vote using provisional ballots due to long lines. An untold number simply gave up, unable to bear the financial cost of waiting in line because Georgia does not guarantee paid time off to vote.”

---

*“Voters, many of whom were first time voters, experienced numerous issues with being located on the voting rolls, receiving and returning absentee ballots, and were given a disturbing number of provisional ballots rather than being allowed to vote unhindered. In some areas, elections officials refused to provide provisional ballots, citing a shortage of paper.”*

— Stacey Abrams, Fair Fight

---

States and localities should be prepared for elections, no matter how high the turnout, and federal and state laws and regulations should support a robust democracy – not make it difficult for eligible voters to exercise the franchise.

After the Court struck down Section 4(b) and rendered Section 5 effectively inoperable, many states and counties, which were once required to clear any proposed voting changes through the Department of Justice or federal court before they could go into effect, have moved to restrict access to the ballot. Some states made overt moves to restrict access to the franchise implementing barriers such as:

discriminatory gerrymandering that

dilutes minority voting power, cutbacks or elimination of early voting, forcing more people to miss work in order to cast their vote, creating longer lines at polling locations on Election Day, and impeding voters that rely on others for transportation, frequently changing rules and regulations that confuse poll workers and voters, and denying access to language assistance.

---

*“... when you deny things like early voting ... you are undermining people who every day of their lives have to fight just to exist and may not be able to be off on Election Day.”*

— Rev. Dr. William Barber II

---

Other changes may seem innocuous on their face, such as consolidating or moving polling locations, coloring voter purges as “list maintenance,” or requiring specific forms of voter identification to be presented when voting. However, without Section 5 preclearance, none of these changes were evaluated for their potential discriminatory effect before implementation. As the testimony and evidence collected during the

Subcommittee’s hearings demonstrate,

these voting changes jeopardize millions of Americans’ right to vote and have a disparate impact on the ability of minority voters to cast a ballot.

Much of the testimony and evidence the Subcommittee received demonstrates that states use a combination of these tactics. In Ohio, for example, the state has cut back early voting, eliminated what was once referred to as “Golden Week” (when voters could register and vote

on the same day), consolidated early voting sites, and purged thousands of voters from the registration rolls, among other things.<sup>217</sup>

In Florida, a lack of language access and language assistance remains a critical barrier to voting.<sup>218</sup> In Alabama, the home of *Shelby County* and the infamous Bloody Sunday, the state is still attempting to suppress the vote of minority communities through implementation of strict voter ID requirements, attempts to require proof of citizenship for voter registration, and polling place closures.<sup>219</sup>

When compounded with poverty, a lack of adequate transportation, and/or other socioeconomic constraints, these tactics result in the disenfranchisement of thousands of otherwise eligible voters. This refrain was heard time and again, across all field hearings.

Some argued over the course of the field hearings that “voter turnout is up,” so there must not be a problem. As this report demonstrates, that sentiment is inaccurate. Overcoming barriers to exercise the right to vote does not excuse the barriers’ existence. The will and stamina that voters take to overcome suppressive laws is not an excuse to keep the unjust barriers in place. Congress and the American people made that clear nearly 55 years ago with the passage of the Voting Rights Act and its five subsequent reauthorizations.

---

*“We ought to be celebrating increased turnout wherever it exists. And we also ought to be recognizing that, across the board, in this country, we have very, very low turnout for voters. And that is, in itself, a concern.”*

— Catherine Lhamon, U.S. Commission on Civil Rights

---

Others posit that purging voter rolls, requiring voter ID, and banning people from putting a neighbor’s ballot in the mail is necessary to prevent voter fraud. Voter fraud has long been a red herring in the attempt to suppress the right to vote. The Subcommittee received testimony and evidence of how purge processes often inaccurately sweep up people who are, in fact, eligible to vote and disproportionately affect minority voters and naturalized citizens. There have been very few, if any, cases of in-person voter fraud, which is the only

type of fraud voter ID would purportedly prevent.

The Subcommittee received no testimony in Arizona, a state that has seen a large shift toward mail-in ballots, warranting its suppressive ban on “ballot harvesting” that recently became law. In North Carolina’s Ninth Congressional District, the recent issues with ballot collection were the result of election fraud, not voter fraud. Despite repeated unsubstantiated claims, there were no accounts of voter fraud in California’s vote-by-mail and ballot collection system in the 2018 election.

<sup>217</sup> *Voting Rights and Election Administration in Ohio: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019).*

<sup>218</sup> *Voting Rights and Election Administration in Florida: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019).*

<sup>219</sup> *Voting Rights and Election Administration in Alabama: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019).*

In Ohio, Inajo Davis Chappell, a member of the Cuyahoga County Board of Elections for the last 12 years, testified in her personal capacity that she believes the “constant clamoring about rampant voter fraud is [also] discouraging voter participation.”<sup>220</sup> Ms. Chappell went on to say, “my experience in administering elections in Cuyahoga County over the last twelve years permits me to say with confidence that claims of voter fraud in the elections process are wholly without merit. Indeed, the voter fraud narrative is a patently false narrative.”<sup>221</sup>

As U.S. Commission on Civil Rights Chair Catherine Lhamon testified, “[N]ot only was there no evidence given to the Commission about widespread voter fraud, the data and the research that is bipartisan reflect that voter fraud is vanishingly rare in this country. … [A]nd so, it is duplicative and also harmful to initiate strict voter ID, among other kinds of requirements, in the name of combating voter fraud.”<sup>222</sup> The very real issue at hand is the lack of access to the ballot and the increase in discriminatory, suppressive voting laws faced by voters. As a guardian of democracy, this is where Congress’s focus must lie.

## VOTER SUPPRESSION EFFORTS ACROSS AMERICA

The post-*Shelby County* voting rights landscape has seen the rise of a new generation of voter suppression tactics. Some may appear sensible on their face, but in their intent and practical impact, they discriminate, frustrate, and ultimately suppress the votes of targeted communities. Some of these laws amount to a modern-day poll tax, such as requiring voter ID that is difficult and prohibitively expensive to obtain or requiring formerly incarcerated individuals to pay all fines and fees before their right to vote is restored.

The denial of, or lack of availability of, multi-language access or assistance at the polls disenfranchises voters whose right to those services is still protected under the Voting Rights Act. Discriminatory and over-aggressive methods of purging voter rolls disenfranchise

---

<sup>220</sup> *Voting Rights and Election Administration in Ohio*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019); written testimony of Inajo Davis Chappell at p. 3.

<sup>222</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript, Catherine Lhamon answering Congressman Pete Aguilar at p. 51-52.

**Mr. Aguilar:** But this is becoming hyper-political. And some of my colleagues across the aisle are conflating voter fraud with legitimate exercising of our electoral process. And they have blamed losses, congressional losses, on this, basically telling folks that thousands of ballots just kind of show up, the inference being that individuals are just grabbing other people’s ballots. I mean, you know, it is just becoming hyper-political.

So, can you talk a little bit about ballot harvesting? And is there evidence? Was there any testimony given to you and your Commission supporting claims of widespread voter fraud that a lot of my colleagues have used, obviously, to pass increased voter suppression laws?

**Ms. Lhamon:** Not only was there no evidence given to the Commission about widespread voter fraud, the data and the research that is bipartisan reflect that voter fraud is vanishingly rare in this country.

So, the concerns about that type of vote misuse both have existing criminal penalties in the Voting Rights Act for voting twice and State and Federal penalties for the kinds of voter fraud that already exist. And so it is duplicative and also harmful to initiate strict voter ID, among other kinds of requirements, in the name of combating voter fraud.

But, also, the existence of voter fraud, as I mentioned, essentially does not exist. And the testimony, both that we at the Commission received and also that our State advisory committees received across the many States that investigated this question, just don’t find the existence of voter fraud at all.”

otherwise eligible voters, often without their knowledge until they arrive at the polls and are turned away or forced to cast a provisional ballot that may not be counted.

Some states require an exact signature match for a ballot to be accepted, a challenge for elderly and disabled voters. This is often enforced by a lay-person with no training in handwriting analysis. Thousands of Georgia voters had their registrations put on hold because the name on the registration form did not “exact match” the name on file with certain government records. Hundreds of polling locations have closed since *Shelby County* was decided, early voting hours have been cut, and same-day registration has been eliminated in some instances. Discriminatory gerrymandering has once again diluted the vote and voice of minority populations.

This chapter will explore the most common voter suppression tactics discussed during the Subcommittee’s field hearings, which have become more pervasive post-*Shelby County*, as there is no longer any check on these practices (other than costly litigation and ballot measures):

- Purging voter registration rolls
- Cutbacks to early voting
- Polling place closures and movements
- Voter Identification (voter ID) requirements
- Use of exact match and signature match
- Lack of language access and assistance
- Discriminatory gerrymandering

### **Purging Voter Registration Rolls**

Voter purges refer to the process by which election officials attempt to remove the names of allegedly ineligible voters from the voter registration lists.<sup>223</sup> Voter purges have taken various forms in recent years, and when done improperly, disenfranchise otherwise eligible voters and increase the risk that minority voters will be disproportionately impacted. Often this happens too soon before an election for a voter to correct the error.

Florida has attempted to purge voters based on alleged ineligibility; Georgia came under increased scrutiny for placing voter registrations on hold and purging voters based on minor errors under the “exact match” procedures; North Carolina purges voters based on challenges by private parties; Florida and Pennsylvania purge voters based on felony convictions; and Georgia, and Ohio purge voters based on inactivity, to name a few.<sup>224</sup> While states must

---

<sup>223</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Michael Waldman at p. 3.

<sup>224</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 145-157.

maintain accurate voter rolls, practices of purging voters from rolls have raised serious concerns in recent years. Some states enacted unnecessary restrictions on voter registration and requirements to remain on the rolls, while others have purged otherwise eligible voters based on exaggerated assertions of non-citizens registering to vote and on the use of faulty databases.

The Brennan Center for Justice found that between 2014 and 2016, states removed almost 16 million voters from the registration rolls.<sup>225</sup> This purge rate resulted in almost 4 million more names being purged from the rolls between 2014 and 2016 than between 2006 and 2008.<sup>226</sup> The purge rate outpaced growth in voter registration (18 percent) or population (6 percent).<sup>227</sup> The Brennan Center calculated that 2 million fewer voters would have been purged between 2012 and 2016 if jurisdictions previously covered by Section 5 of the Voting Rights Act had purged their voter rolls at the same rate as other non-covered jurisdictions.<sup>228</sup>

Follow-on research by the Brennan Center found that at least 17 million voters were purged nationwide between 2016 and 2018.<sup>229</sup> According to testimony from Michael Waldman, President of the Brennan Center, the median purge rate was 40 percent higher in jurisdictions previously covered by Section 5 of the Voting Rights Act than elsewhere.<sup>230</sup> Had the purge rate in previously covered jurisdictions been consistent with the rest of the country, as many as 1.1 million fewer people would have been purged from the rolls.<sup>231</sup>

Federal law governing purges allows a voter's name to be removed from the voter rolls on the following grounds: (1) disenfranchising criminal conviction; (2) mental incapacity; (3) death; and (4) change in residence.<sup>232</sup> Additionally, individuals who were never eligible may be removed. Voters may be removed at their own request (even if they remain eligible).<sup>233</sup>

<sup>232</sup> National Voter Registration Act of 1993, H.R. 2, 103<sup>rd</sup> Cong. (1993), 52 U.S.C. §20507.

<sup>233</sup> "The law discusses five categories of removal from voter rolls: (1) request of the registrant; (2) disenfranchising criminal conviction; (3) mental incapacity; (4) death; and (5) change in residence. The NVRA sets forth a series of specific requirements that apply to purges of registrants believed to have changed residence. The law also contains a series of additional proscriptions on state practices. For example, it provides that list maintenance must be uniform, nondiscriminatory, and in accordance with the Voting Rights Act. It also prohibits systematic voter purges (those programs that remove groups of voters at once) within 90 days of a federal election. The Act also has provisions that apply on Election Day if a voter has changed address. Voters who have moved within a jurisdiction are permitted to vote at either their new or old polling place (states get to choose), while purged voters — mistakenly believed to have moved — who show up on Election Day have the right to correct the error and cast a ballot that will count."

<sup>234</sup> *Id.*, see also Ohio State Advisory Committee to the U.S. Comm'n on Civil Rights, *Voting Rights in Ohio* (May 2018) at p. 9, <https://www.usccr.gov/pubs/2018/06-27-OJI-Voting-Rights.pdf>.

Notably, the statute does not allow states to purge voters solely based on inactivity. The Department of Justice supported plaintiffs who successfully challenged state purge practices until the change in presidential administrations following the 2016 election. The new administration reversed course on a brief filed by the Obama administration in support of plaintiffs challenging Ohio's purge practice, and instead filed a brief in support of Ohio.<sup>234</sup>

In 2018, the Ohio Advisory Committee to the U.S. Commission on Civil Rights Advisory Memorandum stated that Ohio is currently one of the most aggressive states in purging voter registrations.<sup>235</sup> The Court's decision in *Husted v. A. Philip Randolph Institute*, which upheld Ohio's practice,<sup>236</sup> paved the way for states to conduct more aggressive voter purges. Under Ohio law, voters were being removed from the voter rolls based on failure to vote. Voters who miss a single federal election are flagged to receive a postage prepaid notice to confirm the voter still lives at the same address. If the voter fails to respond to that notice and does not vote within the next four years (two federal elections), the state removes them from the voter rolls, citing change of residence, with no further notice. If a person attempts to vote after her registration has been canceled, she is given a provisional ballot. The provisional ballot is not counted for the current election cycle, but the envelope containing the provisional ballot, if filled out correctly, can double as a voter registration form, re-registering the voter for the next election cycle.<sup>237</sup> As of publication of the Ohio State Advisory Memorandum, Ohio had purged more than 2 million people since 2011 for failure to vote in two consecutive elections.<sup>238</sup>

On June 11, 2018, the Court ruled that Ohio's purge law was permissible.<sup>239</sup> The Court's decision was based on its interpretation of the National Voter Registration Act and did not address any possible claims regarding a Section 2 discrimination claim.<sup>240</sup> The *Husted* decision effectively punishes voters for failing to vote, contrary to how the law was written and the system is intended to function. In practice, if a voter skips voting in the midterms and one presidential election, they are placed into the process for purging.

A 2016 Reuters analysis of Ohio's voter purge found that "in predominantly African American neighborhoods around Cincinnati, 10 percent of registered voters had been removed due to inactivity since 2012, compared to just four percent in the suburban Indian Hill. The study

further found that more than 144,000 people were removed from the rolls in Ohio's three largest counties, which includes the cities of Cleveland, Cincinnati, and Columbus – hitting hardest neighborhoods that are low-income and have a high proportion of Black voters.”<sup>241</sup> Ohio's Secretary of State Frank LaRose recently revealed errors in the state's purge list as groups found tens of thousands of people were wrongfully on the list.<sup>242</sup>

The purported rationale behind these purges often exaggerates the alleged problem of non-citizens voting, while the practical result is the removal of otherwise eligible citizens from the voting rolls. Sometimes, this concern is perpetuated by public officials who may have ulterior political motives. The words of election officials have a significant impact on the public's trust in the voting process. In Texas, the Secretary of State made wildly inaccurate claims about non-citizens registering to vote.

On January 25, 2019, Texas Secretary of State David Whitley issued an advisory to county voter registrars about non-citizens and voter registration.<sup>243</sup> In an accompanying press release, Secretary Whitley claimed that “approximately 95,000 individuals identified by [the Texas Department of Public Safety (DPS)] as non-U.S. citizens have a matching voter registration record in Texas” and “58,000 of whom have voted in one or more Texas elections.”<sup>244</sup>

This claim was demonstrably false. Within a week, the facts bore out that many of these voters were in fact naturalized citizens who had already confirmed their citizenship.<sup>245</sup> As Kristen Clarke of the Lawyers' Committee testified, “the list was based on DMV data that the state knew was flawed and would necessarily sweep in thousands of citizens who completed the naturalization process after lawfully applying for a Texas drivers' license.”<sup>246</sup> According to testimony from Dale Ho of the ACLU, in Harris County, Texas alone, about 60 percent of the 30,000 voters flagged had already confirmed their citizenship.<sup>247</sup> Advocates sued, challenging the purge process; the case settled immediately and Texas abandoned the process.<sup>248</sup> The court

found that Texas “created a mess” which “exemplified the power of the government to strike fear and intimidate the least powerful among us.”<sup>249</sup>

Purges have also been implemented in Georgia, where then-Secretary of State Brian Kemp’s office purged approximately 1.5 million registered voters between 2012 and 2016. Between 2016 and 2018, Georgia purged more than 10 percent of its voters.<sup>250</sup> Secretary of State Kemp then ran for Governor of Georgia in 2018, winning by 54,723 votes, a 1.4 percentage point margin.<sup>251</sup> In October 2019, Georgia officials announced they would be removing approximately 300,000 names from the voter rolls, almost four percent of those registered to vote.<sup>252</sup>

Between 2000 and 2012, the state of Florida was repeatedly charged with allegations it engaged in systematic purges impacting voters of color.<sup>253</sup> In 2012, Florida attempted to remove voters who were allegedly non-citizens from its voter rolls by comparing rolls to driver’s license data, an unreliable method as Florida’s driver’s license databases do not reflect citizenship.<sup>254</sup> Utilizing this method, the state identified over 180,000 “questionable” voters before eventually cutting it down to 2,600.<sup>255</sup> In addition, the purge had suspicious timing as it took place within 90 days of the 2012 election.<sup>256</sup> According to the U.S. Commission on Civil Rights:

“The vast majority of voters on Florida’s 2012 purge list were people of color.<sup>257</sup> The data in a federal complaint alleging Section 2 violations (based on Florida voter registration data) showed that 87 percent were voters of color: 61 percent were Hispanic (whereas 14 percent of all registered voters in Florida were Hispanic); 16 percent were Black (whereas 14

<sup>249</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript Dale Ho at p. 17.

<sup>250</sup> There is a similar story in Texas. In January, Texas Attorney General Ken Paxton tweeted, in capital letters, “voter fraud alert,” claiming that almost 100,000 registrants in Texas were noncitizens. But that was false. Within a week, it came out that many of these voters were naturalized citizens who had already confirmed their citizenship. In Harris County alone, this translated to about 60 percent of 30,000 voters flagged there. And as to the remaining 12,000, an audit of 150 names chosen at random yielded no noncitizens.

<sup>251</sup> Civil rights organizations, including MALDEF, the ACLU, and the Texas Civil Rights Project, sued to stop Texas from purging these voters. The court found that Texas, quote, created a mess, which, quote, exemplified the power of the government to strike fear and intimidate the least powerful among us. The case was settled with Texas taxpayers on the hook for \$450,000 in costs and attorneys’ fees. Texas Secretary of State David Whitley departed from office in disgrace.”

<sup>252</sup> *Voting Rights and Election Administration in Georgia*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Gilda Daniels at p. 5.

<sup>253</sup> “Between 2016 – 2018, Georgia purged more than 10 percent of its voters, nearly 670,000 registrations were cancelled in 2017 alone.”

<sup>260</sup> *Voting Rights and Election Administration in Florida*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Judith Browne Dianis at p. 3.

percent of all registered voters were Black); 16 percent were White (whereas 70 percent of registered voters were White); and 5 percent were Asian American (whereas only 2 percent of registered voters were Asian).<sup>258</sup>

In ensuing litigation, Florida was blocked from continuing this practice. In 2014, then-Governor, now Senator, Rick Scott again attempted to purge alleged non-citizens from the voter rolls using the Department of Homeland Security's Systematic Alien Verification for Entitlements ("SAVE") database. Use of the SAVE database is also highly problematic as it is not updated to include all naturalized citizens.<sup>259</sup> This faulty method of purging voter rolls has a disproportionate impact on people of color.

Judith Browne Dianis, Executive Director of the Advancement Project, testified in Florida that the Advancement Project's research found 87 percent of Florida's purge list comprised people of color, and more than 50 percent of the list was Latino.<sup>260</sup> Florida has again moved aggressively to purge voters: an estimated seven percent of voters have been purged in the last two years.<sup>261</sup>

In Alabama, since taking office in 2015, Secretary of State John Merrill has purged 780,000 voters from the state's rolls.<sup>262</sup> In 2017, more than 340,000 additional voters were listed as inactive, a precursor to being removed from the rolls if the voter does not vote in the next four years.<sup>263</sup> Nancy Abudu, Deputy Legal Director, Voting Rights at the Southern Poverty Law Center testified that, although Alabama law allows voters placed on the inactive list to update their voter registration and cast a regular ballot even on the day of the election, Southern Poverty Law Center employees on the ground as part of the Alabama Voting Rights Project, "spoke to dozens of voters who were forced to cast provisional ballots because of their 'inactive' status."<sup>264</sup>

New York has also had issues with improperly removing otherwise eligible voters from the rolls. In November 2016, the Lawyers' Committee and Common Cause filed suit alleging the New York City Board of Elections (NYCBOE) had purged voters from the rolls in violation of the National Voter Registration Act.<sup>265</sup> Earlier in 2016, NYCBOE had confirmed that more than 126,000 Brooklyn voters were removed from the rolls between the summer of 2015 and the April 2016 presidential primary election.<sup>266</sup> After the State of New York and the Department of Justice entered the case, the NYCBOE agreed to place persons who were removed from the rolls or were on inactive status back on the rolls if they met certain

<sup>266</sup> *Id.*

requirements. Subsequently, a Consent Decree was negotiated whereby the NYCBOE agreed to comply with the NVRA before purging anyone from the rolls and subject itself to four years of monitoring and auditing.<sup>267</sup>

In 2016, Arkansas purged thousands of voters due to supposed felony convictions, but the lists used to conduct the purge were highly inaccurate and included many voters who had never committed a felony or whose voting rights had been restored.<sup>268</sup>

Improper purges are exacerbated by the use of inaccurate databases. The SAVE database is at times used to verify immigration status when an individual interacts with a state, however SAVE does not include a comprehensive and definitive listing of U.S. citizens and states have been cautioned against using it to check voter eligibility.<sup>269</sup> Additionally, driver's license databases have proven inaccurate for verifying voter registration lists.<sup>270</sup>

States have also attempted to address voters rolls through coordinated information sharing. Two systems developed to facilitate this are the Interstate Voter Registration Crosscheck Program ("Crosscheck") and the Electronic Registration Information Center ("ERIC"). Crosscheck was created by the State of Kansas and has been found to have high error rates.<sup>271</sup> The system includes data from registered voters in participating states and compares their first names, last names, and date of birth to generate lists of voters who may be registered to vote in more than one state.<sup>272</sup> The system has proved highly problematic. A 2017 study found that, if applied nationwide, Crosscheck would "impede 300 legal votes for every double vote prevented."<sup>273</sup> Several states have left the program in recent years or stopped using it.<sup>274</sup> Since Kris Kobach lost his election for governor of Kansas in 2018, the future of the Crosscheck system has become uncertain and data has not been loaded into Crosscheck since 2017 due to security concerns.<sup>275</sup>

---

<sup>267</sup> *Id.*, citing *Common Cause/New York v. Board of Elections in City of New York*, No. 1:16-cv-06122 (E.D.N.Y. 2017).

"On November 3, 2016, the Lawyers' Committee and another civil rights organization filed suit alleging that the New York City Board of Elections (NYCBOE) had purged voters from the rolls in violation of the NVRA. Earlier in the year, the NYCBOE had confirmed that more than 126,000 Brooklyn voters were removed from the rolls between the summer of 2015 and the April 2016 primary election. After entry of the State of New York and the U.S. Department of Justice in the case, the NYCBOE agreed to place persons who were on inactive status or removed from the rolls back on the rolls if they lived at the address listed in their voter registration file and/or if they had voted in at least one election in New York City since November 1, 2012 and still lived in the city. Subsequently, the parties negotiated a Consent Decree, under which the NYCBOE agreed to comply with the NVRA before removing anyone from the rolls, and to subject itself to a four-year auditing and monitoring regimen."

The ERIC system uses far more data points than Crosscheck to attempt to identify when voters move, including voter registration data, DMV licensing information, Social Security Administration data, and National Change of Address information.<sup>276</sup> As of July 2019, 28 states and the District of Columbia participate in ERIC.<sup>277</sup>

This problem could be ameliorated by implementing same-day registration. Dale Ho testified that states that have Election Day registration “tend to have turnout that is about 5 to 10 percentage points higher than the states that don’t.”<sup>278</sup> Allowing voters to same-day register could ensure that voters who are erroneously purged from the rolls are not forced to cast a provisional ballot that may never be counted or do not vote at all.

### Cutbacks to Early Voting

In the 2016 election cycle, 23,024,146 Americans used in-person early voting.<sup>279</sup> Since 2010, several states have reduced the hours and/or days of early, in-person voting available to voters.<sup>280</sup> The USCCR Minority Voting Report found cuts to early voting can cause long lines with a disparate impact on voters of color.<sup>281</sup> Long lines at the polls during the 2012 elections led to the creation of the Presidential Commission on Election Administration (PCEA). The PCEA found that “over five million voters in 2012 experienced wait times exceeding one hour and an additional five million waited between a half hour and an hour.”<sup>282</sup> According to the National Conference of State Legislatures, 39 states (including three that mail ballots to all voters) and the District of Columbia allow any qualified voter to cast an in-person vote during a designated early voting period prior to Election Day with no excuse or justification needed.<sup>283</sup> Eleven states have no early voting and an excuse is required to request an absentee ballot.<sup>284</sup> Since 2010, at least seven states have reduced in-person early voting, limiting the days and hours sites are open, and closed locations, all of which disproportionately impacts voters of color.<sup>285</sup>

One of the most severe examples of cuts to early voting was examined at the Subcommittee’s field hearing in Ohio. For nearly a decade, Ohio expanded voters’ access to the ballot before reversing course and drastically constricting access, limiting early voting and creating frequent

The seven states are: Florida, Nebraska, North Carolina, Ohio, Tennessee, Wisconsin, and West Virginia; see Tim Lau, *Early Voting Numbers Soar as Midterms Approach*, Brennan Center for Justice (Oct. 29, 2018), <https://www.brennancenter.org/blog/early-voting-numbers-soar-midterm-elections-approach>.

confusion for voters. During the 2004 general election, Ohio voters faced exceptionally long lines which left them (in the words of one court) “effectively disenfranchised.”<sup>286</sup> Ohio established early, in-person voting largely in response to the well-documented problems of the 2004 general election. The Sixth Circuit summarized the problems in *League of Women Voters of Ohio v. Brunner* as:

“Voters were forced to wait from two to twelve hours to vote because of inadequate allocation of voting machines. Voting machines were not allocated proportionately to the voting population, causing more severe wait times in some counties than in others. At least one polling place [sic], voting was not completed until 4:00 a.m. on the day following Election Day. Long wait times caused some voters to leave their polling places without voting in order to attend school, work, or to family responsibilities or because a physical disability prevented them from standing in line. Poll workers received inadequate training, causing them to provide incorrect instructions and leading to the discounting of votes. In some counties, poll workers misdirected voters to the wrong polling place, forcing them to attempt to vote multiple times and delaying them by up to six hours.”<sup>287</sup>

In response, Ohio adopted a measure allowing 35 days of in-person early voting. Ohio law allows voter registration up to 30 days before the Election Day, essentially creating five days in which voters could register and vote at the same time, a practice which became known as Golden Week. In 2014, the state eliminated Golden Week, claiming it would help combat voter fraud,<sup>288</sup> despite no evidence of widespread fraud. In May 2016, the U.S. District Court of the

---

*“Because of the limit to this one location, voting lines are long, especially during the presidential election cycle. During periods of heavy voting, long lines can be wrapped around the building and down the street for several blocks.”*

— Inajo Davis Chappell, Cuyahoga County Board of Elections Member

---

Southern District of Ohio found that the elimination of Golden Week violated the Constitution and Section 2 of the Voting Rights Act by placing a disproportionate burden on minority voters.<sup>289</sup> In August 2016, a three-judge panel of the U.S. Court of Appeals for the Sixth Circuit reversed the ruling. Just hours before Golden Week was slated to begin, the Court declined to intervene, eliminating critical access for voters.<sup>290</sup>

In 2014, then-Secretary of State, now Lieutenant Governor, Jon Husted also issued a directive eliminating Sunday

voting, except the Sunday before the election, and evening voting after 5 p.m.<sup>291</sup> In addition to eliminating Golden Week, Ohio allows each county only one early, in-person voting site, regardless of population size. Cuyahoga County, with a population of more than 1.2 million people,<sup>292</sup> is allotted the same, single early voting site as the smallest counties in the state, such as Vinton County with a population of just over 13,100 people.<sup>293</sup>

In 2014, the Brennan Center gathered stories from Ohio organizers and religious leaders illustrating how last-minute changes caused confusion and limited voters' access to the polls. That year many pastors and elected officials said confusion about early voting made it more difficult to coordinate their efforts.<sup>294</sup> In 2015, state officials and voting rights advocates settled a separate ongoing lawsuit over early voting hours, which restored one day of Sunday voting and added early voting hours on weekday evenings. The settlement remained in place through 2018.<sup>295</sup>

At the Ohio field hearing, Inajo Davis Chappell testified that the Secretary of State, Ohio Legislature, and Ohio Association of Election Officials decided in 2014 that uniformity in the rules governing elections in all 88 counties would be the key organizing principle for the 88 county boards of election in Ohio.<sup>296</sup> Uniform rules have been adopted and implemented in a manner that limits, rather than expands, ballot access.<sup>297</sup> Secretary Husted claimed he was creating uniformity, so all Ohioans had the same opportunity

<sup>297</sup> *Id.* at p. 2.

to vote; however, uniformity has the effect of disadvantaging citizens who live in more populous counties.

In one of the largest counties in Ohio, Cuyahoga County, early voting (both in-person and vote-by-mail) represents 35–40 percent of the votes cast in elections in Cuyahoga County since 2010.<sup>298</sup> Ms. Chappell testified that, “in effect, early in-person voting is restricted to one location for all counties, regardless of size.”<sup>299</sup> She testified that in limiting early voting to one location, the location in Cuyahoga County is the central elections office building which is downtown, and at which they “have significant space constraints, parking is limited and the site is congested and difficult to manage during periods of heavy voting.”<sup>300</sup>

In Florida, voters – particularly voters of color – used early voting in high numbers.<sup>301</sup> However, in 2011 Florida enacted H.B. 1355, which cut early voting and eliminated the final Sunday of early voting.<sup>302</sup> Ms. Dianis testified that the cuts to early voting “led to long lines and massive wait times on Election Day that year – wait times that were two to three times longer in Black and Latino precincts than in White precincts.”<sup>303</sup>

In July 2018, a federal court struck down Florida’s ban on early voting at public colleges. Hannah Fried, National Campaign Director of All Voting is Local, testified that a post-election analysis published by the Andrew Goodman Foundation found that “nearly 60,000 voters cast early in-person ballots at campus sites that advocates, including [All Voting is Local], helped secure” in the aftermath of the court’s decision.<sup>304</sup> However, Florida’s only public Historically Black University was the only major public campus without an early voting site.<sup>305</sup> The study, written by Professor Daniel A. Smith of the University of Florida, examined on-campus early voting in Florida during the 2018 general election and found high rates of campus early voting among groups historically disenfranchised, including:

- almost 30 percent of campus early vote ballots were cast by Hispanic voters, compared to just under 13 percent of early ballots cast at non-campus locations, and

<sup>305</sup> In July 2018, when a federal court struck down Florida’s ban on early voting at public colleges, AVL worked with partners to secure early voting sites on college campuses throughout the state, with a focus on students of color. In particular, AVL helped place an early voting site at the predominantly Hispanic Florida International University. A post-election analysis published by the Andrew Goodman Foundation found that nearly 60,000 voters cast early in-person ballots at campus sites that advocates, including AVL, helped to secure. However, Florida A&M University (FAMU) – the state’s sole public Historically Black University – was the only major public campus without an early voting location.

<sup>305</sup> *Id.*

- more than 22 percent of campus early vote ballots were cast by Black voters, compared to 18 percent of early ballots cast at non-campus locations.<sup>306</sup>

In Texas, just before the 2018 election, the NAACP Legal Defense and Educational Fund, Inc. (“LDF”) filed a motion for a temporary restraining order on behalf of Black students at the historically Black university (“HBCU”) Prairie View A&M University in Waller County, Texas.<sup>307</sup> The students sought to stop cuts to early voting hours—cuts that would have left Prairie View without any early voting opportunities on weekends, evenings, or during the first week of early voting. In response to the ongoing litigation, County officials agreed to add several hours of early voting in Prairie View for the 2018 election.<sup>308</sup>

In Georgia, state elected officials have repeatedly tried to eliminate early voting on Sundays, days that many Black churches utilize for Souls to the Polls initiatives. Sean Young, Legal Director of the ACLU of Georgia testified that in 2014, a state representative criticized his county elections officials for allowing Sunday voting at a convenient location because “this location is dominated by African American shoppers and it is near several large African American mega churches,” and that he would “prefer more educated voters.”<sup>309</sup> Legislators in the state continue to introduce legislation preventing early voting on Sundays and advocates have had to work repeatedly to defeat them without the backstop of Section 5 evaluations.

In North Carolina, leading up to the 2016 presidential election, at least 17 counties made significant cuts to early voting days and hours,<sup>310</sup> and early voter turnout among Black voters

<sup>306</sup> *Id.* at p. 6–7, *see also* Dr. Daniel A. Smith & ElectionSmith, Inc., *On-Campus Early In-Person Voting in Florida in the 2018 General Election* (Aug. 9, 2019), <https://andrewgoodman.org/wp-content/uploads/2019/08/On-Campus-Early-In-Person-Voting-in-Florida-in-the-2018-General-Election-FINAL-8-9.pdf>.

<sup>307</sup> The Andrew Goodman study, written by Professor Daniel A. Smith of the University of Florida, found high rates of campus early voting among historically disenfranchised groups, including:

- almost 30 percent of campus early vote ballots were cast by Hispanic voters, compared to just under 13 percent of early ballots cast at non-campus locations
- more than 22 percent of campus early vote ballots were cast by Black voters, compared to 18 percent of early ballots cast at non-campus locations.”

<sup>308</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Deuel Ross at p. 6.

<sup>309</sup> LDF also has several pending cases in formerly covered states opposing voting changes under Section 2 or the U.S. Constitution. For instance, on the eve of the 2018 election, LDF filed a motion for a temporary restraining order on behalf of Black students at the historically Black Prairie View A&M University in Waller County, Texas. County officials have long discriminated against Black students in Prairie View. In 2018, the students sought to stop cuts to early voting hours, which would have left Prairie View without any early voting opportunities on weekends, evenings, or during the first week of early voting. In response to LDF’s ongoing case, however, county officials agreed in 2018 to add several hours of early voting in Prairie View.”

(2019)*, written testimony of Tomas Lopez at p. 4.

<sup>313</sup> In 2016, in an attempt to blunt the impact of the Fourth Circuit’s decision to restore the first week of early voting, many of the Republican-led county BOEs adopted early voting plans with fewer hours and sites during the first restored week. There were dramatic reductions in early voting hours in Guilford (-660), Mecklenburg (-282), Brunswick (-165), Craven (-141), Johnston (-124), Robeson (-121), and Jackson (-113) counties. Of those, Guilford, Craven, and Robeson counties were previously covered

declined almost nine percent statewide compared to 2012.<sup>311</sup> Additionally, the North Carolina legislature passed a 2018 law requiring counties to stage early voting for the same hours across all sites.<sup>312</sup>

As in Ohio, while uniformity presents theoretical benefits, Tomas Lopez, Executive Director of Democracy North Carolina testified that it has, in practice, reduced the availability of early voting.<sup>313</sup> Counties, especially low-resourced areas, had previously made early voting available at different times across a variety of locations during the early voting window, but “the 2018 law makes it impossible by requiring counties that are early voting sites to be open for the same amount of hours if they are open during the week.”<sup>314</sup> As such, “the most popular way to cast a ballot in North Carolina,” via early voting, is rendered less available.<sup>315</sup> Post-*Shelby County*, neither the state, nor any of the previously covered counties in North Carolina were required to conduct any analysis of how these changes would impact minority voters and whether or not they would have a discriminatory impact.

Congressman G. K. Butterfield (D-NC-01), a member of the Subcommittee on Elections, noted that in Halifax County, a previously covered county, there is presently only one early voting site to serve the entire county — a county with a poverty rate of 28 percent and in which one in eight households lack transportation.<sup>316</sup> In 2012, 2014, and 2016, there were three early voting sites, but after the 2018 uniformity law, the county is left with one.<sup>317</sup> In the 2018 midterm election, turnout was up across the state of North Carolina except in three counties, one of which was Halifax County.<sup>318</sup> The 2018 law had wide-ranging consequences. Forty-three counties reduced the number of early voting sites in 2018 compared to 2014 and 51 counties reduced the number of weekend days offered.<sup>319</sup> On October 28, 2019, state and

<sup>311</sup>Id., citing Zachary Roth, *Black Turnout Down in North Carolina After Cuts to Early Voting*, NBC News (Nov. 7, 2016), <https://www.nbcnews.com/storyline/2016-election-day/black-turnout-down-north-carolina-after-cuts-early-voting-n679051>.

<sup>318</sup>*Voting Rights and Election Administration in North Carolina: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, hearing transcript, Tomas Lopez at p. 15.

<sup>319</sup>Id.

<sup>319</sup>*Voting Rights and Election Administration in North Carolina: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Tomas Lopez at p. 4-5.

<sup>320</sup>This has produced several consequences in practice:

- 43 counties reduced the number of early voting sites in 2018 compared to 2014.
- 51 counties reduced the number of weekend days offered.
- 67 counties – over two-thirds of North Carolina’s 100 counties – reduced the number of weekend hours.
- Of the eight counties where a majority of voters are Black, four reduced sites, seven reduced weekend days, and all eight reduced the number of weekend hours during early voting. None saw increases in sites or weekend options.

national Democrats filed a lawsuit challenging the restrictions on early voting put in place in 2018.<sup>320</sup> These restrictions also eliminated early voting the Saturday before Election Day, a day on which Democrats and Black Americans tend to vote and on which more than 6.9 percent (135,000) of early voters cast their ballot.<sup>321</sup>

Alabama continues to have no early, in-person voting. Alabama's Secretary of State, John Merrill, is opposed to any additions, telling a local media outlet in 2018, "[T]here is no future for early voting as long as I'm Secretary of State."<sup>322</sup>

Kristen Clarke, President and Executive Director of the Lawyers' Committee for Civil Rights Under Law ("Lawyers' Committee") highlighted an instance in Utah that required litigation after San Juan County, Utah made a decision in 2014 to move to all-mail balloting, but allowed in-person early voting at a single location, noting that location was "easily accessible to the White population, but three times less accessible to the sizable Navajo population, who had to drive on average three hours to get to the polling place."<sup>323</sup> The case was settled with the establishment of three polling locations on Navajo Nation land.<sup>324</sup>

Early, in-person voting is a method of accessing the ballot disproportionately used by voters of color. When states target early voting for cutbacks and changes, it can have a disproportionate impact on minority communities that would have otherwise been protected by a Section 5 review.

### Polling Place Closures and Movements

A 2019 study published by The Leadership Conference Education Fund examined 757 (nearly 90 percent) of the approximately 860 counties (or county-level equivalent) once covered by Section 5 and found 1,688 polling place closures between 2012 and 2018.<sup>325</sup> The study found 69 percent of the polling place closures occurred after the 2014 midterm election despite increased voter turnout.<sup>326</sup>

Prior to *Shelby County*, states and localities were required to notify voters well in advance of polling location closures, to prove that those changes would not have a disparate impact on minority voters, and to provide data to the Department of Justice about the impact.<sup>327</sup> Now,

---

• A ProPublica and WRAL analysis of Early Voting sites elimination found that about 1 in 5 rural voters saw the distance to an Early Voting site increase by more than a mile — and in some counties, like Halifax, the average distance between voters and Early Voting sites increased by as much as 6 miles.<sup>328</sup>

notification is no longer required, and the Department of Justice is not required to evaluate the impact of changes.

There may be legitimate reasons for closing, consolidating, or moving polling locations, but without the disparate impact data, community consultation, and evaluation to support these changes, there is no way to ensure these closures do not discriminate against minority voters. If Section 5 of the Voting Rights Act was still enforceable, covered jurisdictions would need to collect and analyze this data and submit it to the Department of Justice for approval *before* closing, consolidating, or moving polling locations.

Polling place closures can lead to long lines and extreme wait times and can require voters to drive for miles to reach a polling place. Closing, moving and consolidating polling locations impacts all voters. The Subcommittee heard testimony detailing how decreased access to polling places increases the burden on the voter, leading to long lines and sometimes overly burdensome travel.

Georgia closed nearly 214 polling places from 2012 to 2016.<sup>328</sup> Georgia's population is 31 percent Black and nine percent Latino.<sup>329</sup> The Leadership Conference report identified Georgia as a state of concern because "its counties have closed higher percentages of voting locations than any other state in our study."<sup>330</sup>

---

*"Last August, in Randolph County, the Board of Elections tried to close 7 out of 9 polling places in a county whose population is 60% Black, affecting thousands of voters on the eve of the state's high-profile 2018 general election. ... Located in the southwest corner of the state, Randolph County is part of what is known as the Black Belt. [Our] client read the small notice that the county board placed in the legal section of a local weekly paper and reached out for [our] help. With less than two weeks to protect the voter rights of the Randolph County citizens, the ACLU of Georgia immediately implemented a three-pronged strategy that incorporated legal, media, and on-the-ground community organizing."*

— Sean J. Young, ACLU of Georgia

---

<sup>328</sup> The Leadership Conference Education Fund, *Democracy Diverted: Polling Place Closures and the Right to Vote* (Sept. 2019) at p. 12, <http://civilrightsdocs.info/pdf/reports/Democracy-Diverted.pdf>.

<sup>329</sup> *Id.* at p. 14.

<sup>330</sup> *Id.* at p. 18.

Gilda Daniels, Director of Litigation at the Advancement Project, testified that many of those voting precincts were in communities of color and disadvantaged areas.<sup>331</sup> In August 2018, the Board of Elections in Randolph County, Georgia, attempted to close seven of nine polling places in a county whose population is 60 percent Black. The ACLU of Georgia became involved after their client “read the small notice that the county board placed in the legal section of a local weekly paper and reached out” for help.<sup>332</sup> The county ultimately reversed its decision to close over 75 percent of the county’s polling places. In the course of their work, the ACLU of Georgia learned “that the board had hired a consultant handpicked by the Secretary of State who had been recommending polling place closures in counties that were almost all disproportionately Black.”<sup>333</sup>

Additionally, in Georgia, the Board of Elections in County violated state law requiring proper public notice in its attempt to close polling places in neighborhoods that were over 80 percent Black, affecting over 14,000 voters.<sup>334</sup> In Irwin County, the Board of Elections attempted to close the only polling place in the county’s sole Black neighborhood, potentially impacting thousands of voters. This was contrary to the recommendations of the non-partisan Association of County Commissioners of Georgia and all while keeping open a polling place at the Jefferson Davis Memorial Park, a 99 percent White neighborhood.<sup>335</sup>

Despite these issues in the lead-up to the 2018 midterms, Georgia has continued efforts to close and move polling places. In testimony provided in Washington, D.C., Hannah Fried, Director of All Voting is Local, drew attention to the fact that on September 3, 2019, the City Council of Jonesboro, Georgia voted to move the city’s only polling location to its police department, “without providing the public notice required by Georgia law and without taking into consideration the possible deterrent effect to voters of color.”<sup>336</sup>

<sup>333</sup> *Id.*

<sup>334</sup> *Id.* at p. 2-3.

“In Fulton County, the Board of Elections violated state law that required proper public notice in its attempt to close polling places in neighborhoods that were over 80% African-American, affecting over 14,000 voters. See Exhibit 3 (proposed polling place changes and number of voters of each race affected). Just to put this into perspective, that was the same year that Atlanta had a high-profile mayoral election that was decided by less than 1,000 votes.”

Even after the ACLU of Georgia testified about the discriminatory impact, the board voted to close the polls. The ACLU of Georgia then filed a successful lawsuit over the board’s violation of the state’s public notice law—which we had to put together within days, to nullify the decision. After the ACLU of Georgia nullified the decision through the courts, a coalition of community organizers had to quickly recruit dozens of neighborhood canvassers who worked tirelessly over several days to organize overwhelming opposition. It was only after this furious amount of activity compressed in less than a one-month timeframe that the local board of elections unanimously reversed its prior decision.”

<sup>335</sup> *Id.* at p. 3.

“In Irwin County, the Board of Elections tried to close the only polling place that existed in the only Black neighborhood of the county, affecting thousands of voters, contrary to the recommendations of the non-partisan Association of County Commissioners of Georgia... The board alleged that it wanted to close this polling place to save costs, all while keeping open a polling place located at the Jefferson Davis Memorial Park in a neighborhood that was 99% White. After the ACLU of Georgia threatened litigation, the board rejected this discriminatory proposal. The ACLU of Georgia only learned about these proposed closures in this rural Georgia county because one of its members just happened to live in the area and alert us to it.”

<sup>336</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Hannah Fried at p. 4, *see also* Mark Niesse, *Groups Oppose Moving Voting Precinct to Jonesboro Police Station*, Atlanta

Texas has closed at least 750 polling locations since *Shelby County*,<sup>337</sup> 590 of these closures took place after the 2014 midterm election.<sup>338</sup> Six of the 10 largest polling place closures nationwide were in Texas;<sup>339</sup> 14 Texas counties closed at least 50 percent of polling places post-*Shelby County*.<sup>340</sup> The State of Texas is 39 percent Latino and 12 percent Black.<sup>341</sup>

Arizona, a state where 30 percent of the population is Latino, four percent is Native American, and four percent is Black, has the most widespread reduction in polling places, closing 320 locations since 2012.<sup>342</sup> Post-*Shelby County*, Arizona no longer must analyze and report on the potential disparate impact of these actions on Black, Latino, Native American, and Asian American voters. Four of the top 10 counties with the largest number of poll closures are in Arizona.<sup>343</sup>

The Leadership Conference found:

“Almost every county (13 of 15 counties) [in Arizona] closed polling places since preclearance was removed—some on a staggering scale. Maricopa County, which is 31 percent Latino, closed 171 voting locations since 2012—the most of any county studied and more than the two next largest closers combined. Many Arizona counties shuttered significant numbers of polling places, including Mohave, which is 16 percent Latino (−34); Cochise, which is 35 percent Latino (−32); and Pima, which is 37 percent Latino (−31).”<sup>344</sup>

One reason Arizona may have closed so many polling places is because Arizona, along with Texas, has moved to a “vote center” model of voting.<sup>345</sup> Under this model, voters are not assigned a specific polling place, but instead can cast a ballot at a polling place of his or her choosing.<sup>346</sup> Arizona and Texas are the only previously covered states that have made clear moves to implement this program. While this could enhance access to voting, this model often leads to massive reductions in polling places.

For example, in 2014, Graham County, Arizona which is 33 percent Latino and 13 percent Native American, closed half of its polling places when it converted to vote centers.<sup>347</sup>

<sup>347</sup> *Id.*, citing Jon Johnson, County Chooses Vote Centers Over Polling Precincts, E. Ariz. Courier (Jun. 9, 2014), [https://www.eacourier.com/news/county-chooses-vote-centers-over-polling-precincts/article\\_32a76a5a-ee88-11e3-a42b-001a4bcf887a.html](https://www.eacourier.com/news/county-chooses-vote-centers-over-polling-precincts/article_32a76a5a-ee88-11e3-a42b-001a4bcf887a.html).

Additionally, Cochise County, Arizona which is 35 percent Latino, closed nearly two-thirds of its polling places once the county converted to vote centers – from 49 in 2012 to 17 in 2018.<sup>348</sup> Gila County, which is 16 percent Native American and 19 percent Latino also closed almost half its polling places (33 in 2012 to 17 in 2018).<sup>349</sup>

In the March 2016 presidential primary, Maricopa County, Arizona received national attention when reports surfaced that frustrated voters waited as long as five hours to cast a ballot.<sup>350</sup> At the time, there were 60 polling locations – roughly one polling location for every 21,000 voters.<sup>351</sup> In part, this was due to Maricopa County officials' approval of a plan to cut polling locations by 85 percent compared to 2008 and 70 percent compared to 2012.<sup>352</sup>

Tribal leaders and Professor Patty Ferguson-Bohnee, Director of the Indian Legal Clinic at the Sandra Day O'Connor School of Law, testified in Arizona that the move toward mail-in voting, closure of polling locations, and consolidation to voting centers disenfranchise Native voters. Native American voters face barriers such as lack of access to transportation, lack of residential addresses, lack of access to mail, and distance.<sup>353</sup> Only 18 percent of Arizona's reservation voters outside of Maricopa and Pima Counties have physical addresses and are able to receive mail at home.<sup>354</sup>

Professor Ferguson-Bohnee testified that Arizona counties that do not have vote centers require that voters be in the proper precinct in order for their ballot to be counted. However, poll workers sometimes give voters provisional ballots without disclosing that their ballot will not be counted if they are in the incorrect precinct.<sup>355</sup> Both President Jonathan Nez of the Navajo Nation and Governor Stephen Roe Lewis of the Gila Indian River Community testified that the lack of traditional addresses and regular mailing services make Arizona's move toward mail-in ballots difficult for Native voters. Both President Nez and Governor Lewis testified that their members prefer in-person voting, and that it is a time of gathering within the community.<sup>356</sup>

In North Dakota, Roger White Owl, Chief Executive Officer of the Mandan Hidatsa and Arikara Nation ("MHA Nation") testified that MHA Nation does not have enough polling places:

---

In 2012, Graham had 18 polling sites; today, it has half that — six vote centers and three precincts.

<sup>355</sup> *Id.* at p. 7.

<sup>356</sup> *Voting Rights and Election Administration in Arizona: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of President Jonathan Nez and Governor of Stephen Roe Lewis.

“Two important polling places on our Four Bear segment and Mandaree segments were recently closed. Four Bears is one of the major economic hubs in our capital. With only a couple polling places, many Tribal members had to drive 80 to 100 miles round trip to cast their vote. This is unacceptable.”<sup>357</sup>

In Alaska, at one point a polling place was “moved away from a village, and thereafter, Native Alaskan voters could only access their polling place by plane.”<sup>358</sup> Additionally, Catherine Lhamon, Chair of the U.S. Commission on Civil Rights, testified that the Commission’s Louisiana Advisory Committee received testimony which “demonstrated that the racial makeup of an area is a predictor of the number of polling locations in that area and that there are fewer polling locations per voter in a geographical area if it has more Black residents.”<sup>359</sup>

In Ohio, during the November 2018 elections, All Voting is Local and other organizations partnered to coordinate non-partisan election protection. During their determination of where to deploy poll observers in Cuyahoga County (Cleveland), All Voting is Local observed that several polling places had been consolidated and precincts moved.<sup>360</sup> Ms. Fried testified that, after the 2018 election, All Voting is Local determined that between 2016 and 2018, “there was a reduction of 41 polling locations countywide, with 15.7 percent of all precincts experiencing a change in location.”<sup>361</sup> All Voting is Local found “majority Black communities were particularly harmed,” and that data from the Election Protection hotline and nonpartisan observers showed that Cuyahoga County had “more than twice the number of reports of voters at the wrong polling location compared to two other large Ohio counties, Franklin and Hamilton.”<sup>362</sup> Ohio has never been a covered state under the Voting Rights Act.

Furthermore, the Subcommittee received testimony that polling locations across the country have been moved to places where many voters may feel intimidated to cast a ballot, including police stations. Elena Nunez, Director of State Operations and Ballot Measure Strategies at Common Cause testified that, in 2016, election officials in Macon, Georgia tried to move a voting precinct to a police station in a largely Black community.<sup>363</sup> Additionally, in September

And that’s just half the trip.”).

<sup>359</sup> *Id.*

<sup>360</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Hannah Fried at p. 5.

<sup>361</sup> In November 2018 in Ohio, All Voting is Local partnered with the Lawyers’ Committee for Civil Rights Under Law and state partners such as the NAACP Cleveland Branch to coordinate nonpartisan Election Protection. In determining where to deploy poll observers in Cuyahoga County (Cleveland), AVL noticed that several polling locations had been consolidated and precincts had been moved. After the election, AVL determined that between 2016 and 2018, there was a reduction of 41 polling locations countywide, with 15.7 percent of all precincts experiencing a change in location.”

<sup>362</sup> *Id.*

<sup>363</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Elena Nunez at p. 2.

2019, in Jonesboro, Georgia, the nearly all-White city council announced it would move a polling place to a police station in a locality that is 60 percent Black.<sup>364</sup> Ahead of the 2018 election, the President took to his Twitter account to threaten the use of law enforcement to observe polling locations, potentially intimidating and deterring voters.<sup>365</sup>

Ms. Fried testified that election officials too often close polling places with “little notice to, or meaningful input from, the communities they serve.”<sup>366</sup> Ms. Fried also testified there are processes put in place throughout the country, such as “thoughtful studies of the impact on voters from all backgrounds, approval of proposed changes from diverse cross-sections of the community, and outreach to impacted voters through mailed and emailed correspondence, text messages, and public service announcements on local radio,” that could ensure polling place reductions do not discriminate against voters of color.<sup>367</sup> Without these safeguards in place, and without Section 5, “widespread polling place closures create barriers to the ballot box that are incredibly difficult, if not impossible, to overcome.”<sup>368</sup>

The rampant closure of polling places is exactly the type of suppressive voting changes the Voting Rights Act was designed to prevent. If the full force of the law was in effect, states and localities would be required to perform the requisite evaluation of racial impact data, correct for disparate impacts, and justify to the Department of Justice how such a widespread closure of polling locations is not discriminatory. A robust democracy requires all eligible voters have access to the ballot box; traveling long distances and waiting in protracted lines is not true access.

### Voter Identification

Voter ID requirements have become a ubiquitous, next-generation poll tax in the 21<sup>st</sup> century. Requiring voters to show state-specified ID in order to vote is an increasingly common suppression tactic in both previously covered and non-covered jurisdictions. Proponents of voter ID requirements argue that such identification is necessary to prevent voter fraud. However, widespread voter fraud has repeatedly proven to be a myth.<sup>369</sup> These ID

<sup>367</sup> *Id.*

<sup>368</sup> *Id.*

<sup>369</sup> See Justin Levitt, *The Truth About Voter Fraud*, Brennan Center for Justice (2007), <https://www.brennancenter.org/our-work/research-reports/truth-about-voter-fraud>; see also Project: *The Myth of Voter Fraud*, Brennan Center for Justice, <https://www.brennancenter.org/issues/ensure-every-american-can-vote/vote-suppression/myth-voter-fraud>.

laws place an unnecessary and often discriminatory burden on voters and lack a legitimate governmental purpose.<sup>370</sup>

In the post-*Shelby County* landscape, no state or locality is required to evaluate a new voter ID law for discriminatory impact on voters. The Subcommittee repeatedly heard testimony from witnesses describing how voter ID laws are financially burdensome, effectively create a new poll tax, and disproportionately impact minority and low-income voters. In nearly every scenario, obtaining a new ID to vote is not free. Even in cases where the state claims the new IDs are “free,” the documents required to obtain an ID, such as a birth certificate, marriage license, or other documents often cannot be obtained without paying a fee for copies.<sup>371</sup> Not only do the documents cost money, or the IDs themselves come at a cost, but the transportation and time associated with traveling to and from the DMV or other government agencies often comes at a cost insurmountable for many low-income voters. Imposing a cost on accessing the ballot is a poll tax.

In North Carolina, the day after the *Shelby County* decision, the North Carolina General Assembly amended a pending bill to make the state’s voter ID laws stricter.<sup>372</sup> This was a provision of the monster law, which was ultimately found to be racially discriminatory. Since the federal courts invalidated North Carolina’s monster law, the state has moved to resurrect the law via piecemeal approach, including a voter ID requirement. The North Carolina General Assembly introduced, and voters passed, a ballot measure amending the North Carolina Constitution to require photo ID from voters casting in-person ballots, with exceptions.<sup>373</sup> Tomas Lopez testified that, while voters approved broadly worded constitutional language, the North Carolina General Assembly enacted implementing legislation closely mirroring the invalidated voter ID statute during a lame-duck session after an election in which the majority party had lost its ability to override gubernatorial vetoes.<sup>374</sup> The North Carolina legislature later overrode the Governor’s veto to enact the voter ID law.<sup>375</sup>

North Carolina Senate Minority Leader Dan Blue further testified the new voter ID law “puts a tremendous burden on the State and Local Boards of Election without the funding to back

<sup>370</sup> *Voting Rights and Election Administration: Hearings Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, *see Texas Listening Session; Georgia Field Hearing; North Dakota Field Hearing; North Carolina Field Hearing; Alabama Field Hearing; Arizona Field Hearing*.

L. Sch. Inst. for Race & Justice (June 2014), <https://today.law.harvard.edu/wp-content/uploads/2014/06/FullReportVoterIDJune2014.pdf>.

<sup>372</sup> Despite any potential benefits, many opponents of voter ID laws equate these laws to the poll taxes of the Jim Crow era. They argue that even if the ID itself is offered free of charge, there are other costs citizens must pay in order to receive these IDs. For instance, expenses for documentation (e.g., birth certificate), travel, and wait times are significant—especially for low-income voters (who are often voters of color)—and they typically range anywhere from \$75 to \$175. According to Professor Richard Sobel, even after being adjusted for inflation, these figures represent far greater costs than the \$1.50 poll tax outlawed by the 24th Amendment in 1964.”

<sup>375</sup> Emily Birnbaum, *North Carolina Enacts Voter ID Law, Overriding Dem Governor’s Veto*, The Hill (Dec. 19, 2018), <https://thehill.com/homenews/state-watch/422183-north-carolina-enacts-voter-id-law-overriding-dem-governors-veto>.

up these obligations” and said the law will cost \$17 million to implement.<sup>376</sup> The newlaw has language allowing the use of student IDs for voting. However, at the time of the hearing,<sup>377</sup> of the over 100 eligible institutions, only 37 community colleges, colleges, and universities had submitted the necessary documentation to the State Board of Elections to have their IDs approved for voting in 2020 – of those, 11 were denied, including the University of North Carolina flagship school at Chapel Hill and one HBCU.<sup>378</sup> At the time of this writing, many North Carolina college and university student IDs are still not approved as qualified IDs for voting.

In 2011, before the Court invalidated the Voting Rights Act’s preclearance formula, then-Texas Governor Rick Perry signed into law S.B. 14, one of the strictest photo identification laws in the country. Because Texas was subject to preclearance requirements, the law did not go into immediate effect. In 2012, a federal court rejected Texas’ law and denied preclearance on the grounds that S.B. 14 discriminated against Black and Latino voters.<sup>379</sup> Less than one year later, after the Court decided *Shelby County*, then-Attorney General Greg Abbott, now Governor Abbott, declared within hours that the state would implement its restrictive voter ID law.<sup>380</sup> This despite the previous federal court ruling that held that the same Texas law could not receive preclearance due to its retrogressive effects on people of color.<sup>381</sup>

According to the Brennan Center for Justice, approximately 1.2 million eligible voters in Texas lacked the specific form of ID that S.B. 14 required.<sup>382</sup> This included 555,000 eligible Latino voters and 180,000 eligible Black voters.<sup>383</sup> Latino voters were 242 percent more likely than White voters to lack the required ID, and Black voters were 19 percent more likely than White voters to lack the required ID.<sup>384</sup> Moreover, more than one in five low-income voters lacked the required Texas photo ID.<sup>385</sup> Litigants immediately sued, arguing that Texas’ law racially discriminated against eligible voters and was passed with a discriminatory purpose. In a 2016 ruling rejecting the law, the Fifth Circuit Court of Appeals rejected lawmakers’ argument that the bill would stop voter fraud, finding only two convictions for in-person voter fraud out of 20 million ballots cast in the decade before the law was passed in 2011.<sup>386</sup>

In 2017, Texas passed a new law photo ID law—S.B. 5—which is slightly less strict than S.B. 14. This new identification law, now in place, still requires photo ID. However, if a voter lacks one of the acceptable photo IDs, they may provide an alternative non-photo document (options include bank statements and utility bills, among other documents) and execute an

accompanying “reasonable impediment declaration” explaining why they do not have the requisite photo ID. The Fifth Circuit Court of Appeals upheld S.B. 5 in 2018.<sup>387</sup>

According to the Texas Advisory Committee to the U.S. Commission on Civil Rights, “there are intimidating criminal sanctions associated with incorrectly executing the affidavit necessary to claim the ‘reasonable impediment’ exception to the ID law and stakeholders are concerned that this will deter voters who in fact fall under the ID law’s exception.”<sup>388</sup>

In North Dakota, the Subcommittee heard an egregious example of how voter ID laws target and disenfranchise protected communities. North Dakota enacted a voter ID law that had a significantly disproportionate impact on the state’s Native American communities.

North Dakota has had voter ID laws in place since 2004.<sup>389</sup> At the North Dakota field hearing, Jacqueline De León, Staff Attorney at the Native American Rights Fund (NARF) testified that, prior to changes to the law in 2013 the state’s voter ID law was “likely the most friendly in the nation.”<sup>390</sup> North Dakota’s voter ID law, while always containing residential address requirements, had built-in fail-safes that allowed voters to cast their ballot if a poll worker could vouch for their identity or the voter signed an affidavit, under penalty of perjury, that they were qualified to vote.<sup>391</sup> The affidavit fail-safe was in place for nearly a century in North Dakota,<sup>392</sup> and provided critical protections for Native American voters who lack residential addresses.

North Dakota debated a new voter ID law in 2011 that would have eliminated these fail-safes. Throughout consideration, concerns about disenfranchisement were raised on both sides of the debate. State Senator Sorvaag noted that “[w]e don’t want people voting if they are not suppose [sic] to vote but we don’t want to disenfranchise people either by making the process too [sic] cumbersome.”<sup>393</sup> In response to concerns raised by state senators, the legislature was notified that “some Native Americans would have a difficult or impossible time obtaining an ID that required a street address.”<sup>394</sup> The state legislature ultimately decided not to enact the proposed changes.<sup>395</sup>

Despite all the concerns raised in 2011, the North Dakota state legislature moved ahead with new restrictive voter ID requirements in 2013.<sup>396</sup> H.B. 1332 “significantly altered the voter

<sup>395</sup> *Voting Rights and Election Administration in the Dakotas*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Jacqueline De León at p. 2-3.

<sup>396</sup> *Id.* – “The North Dakota legislature passed the most restrictive voter ID and address requirements in the nation.”

ID requirements and eliminated the ‘fail-safe’ voucher and affidavit provisions” that had long protected voters.<sup>397</sup> Ms. De León further testified the legislature never analyzed whether the Native American voters who lacked addresses in 2011 still lacked addresses. Many Native voters still lack the required addresses to this day. The state legislature utilized a “hoghouse” amendment, a parliamentary procedure replacing the entire text of an unrelated bill with the new text, in order to pass the bill without debate and circumvent input from the public and impacted agencies.<sup>398</sup>

During the 2014 election, North Dakota voters were only allowed to vote with a North Dakota Driver’s License or non-driver’s identification card, a tribal government ID, or an alternative form of ID prescribed by the Secretary of State.<sup>399</sup> Ms. De León testified that, “as expected, the impact on the Native American vote in 2014 was severe.”<sup>400</sup> The voter ID law was amended again the following legislative session, further restricting the forms of qualifying ID.<sup>401</sup> NARF sued North Dakota on the grounds that the law disenfranchised Native American voters and the U.S. District Court in North Dakota agreed, granting an injunction and requiring the state to provide an affidavit failsafe.<sup>402</sup>

North Dakota again amended the voter ID law in 2017. Rather than providing the affidavit failsafe mandated by the District Court, the legislature implemented a provisional ballot.<sup>403</sup> This allowed voters without a valid ID to vote, but the ballot would be thrown out unless the voter could return with a qualifying ID within six days of the election.<sup>404</sup> Prior to passage, State senators raised concerns that the new law did little to mitigate the discriminatory impact of the law. The legislature chose to move forward, knowing the disparate impact it would have on the Native American community.<sup>405</sup> Post Office (P.O.) Boxes are utilized significantly by the Native American community — requiring IDs have a residential address disproportionately impacts Native American voters.

Despite efforts to overturn this suppressive requirement, the law remains in effect today. Voters are still required to present a qualifying ID that lists a residential address in order to vote. As the Subcommittee learned at the North Dakota field hearing, obtaining a new ID with a residential address is overly burdensome for many Native American residents.

<sup>403</sup> Following NARF’s investigation, in 2016, NARF filed suit on behalf of seven Turtle Mountain plaintiffs that were disenfranchised by the laws. NARF showed that the law disenfranchised Native American voters and violated both the U.S. and North Dakota Constitutions as well as the Voting Rights Act. The U.S. District Court in North Dakota agreed, granting an injunction in favor of the Native American plaintiffs. The Court found that the law violated the U.S. Constitution and required that North Dakota provide a fail-safe mechanism for the 2016 general election. In his decision, Judge Hovland stated, “it is clear that a safety net is needed for those voters who simply cannot obtain a qualifying ID with reasonable effort.” The injunction required that the state provide an affidavit fail safe, allowing voters without proper ID to sign an affidavit swearing to their qualifications, similar to the law in place for nearly a century.”

Native Americans in North Dakota face a housing crisis across the reservations. Tribal leaders testified that their reservations face significant poverty, unemployment, and homelessness. Many tribal members do not have stable, permanent housing and move from home to home frequently. Many also live in multi-generational homes or in homes that have not been adequately addressed by the state. Addresses listed on IDs made for the 2018 election may become outdated by 2020, and tribes cannot keep issuing new IDs for free.

Chairwoman Myra Pearson of the Spirit Lake Tribe testified that 47.8 percent of residents live below the poverty line, compared to the national average of 13.8 percent. Many members do not have an ID since they do not need one to live day-to-day and IDs cost money.<sup>406</sup> A tribal ID for a Spirit Lake member ordinarily costs \$11, but the tribe waived the cost leading up to the election. The tribe issued 655 ID cards between October 22, 2018 and November 8, 2018, costing the tribe \$7,315.<sup>407</sup>

---

*"Understand that the fee of \$15 is not exorbitantly high, but \$15 is milk and bread for a week for a poor family."*

—Alysia LaCounte, Turtle Mountain Band of Chippewa Indians

---

Alysia LaCounte, General Counsel to the Turtle Mountain Band of Chippewa Indians testified that the Tribe currently has an unemployment rate around 69.75 percent.<sup>408</sup> Generally, the Turtle Mountain Band of Chippewa Indians charges \$15 for a tribal ID. As Ms. LaCounte testified, while the fee for an ID may not seem high, for many the fee poses a choice between voting and feeding a family.<sup>409</sup>

Issuing 2,400 new IDs at no charge was burdensome for the Tribe. The undertaking took a significant amount of financial resources and time. Ms. LaCounte testified that, while the Tribe

<sup>406</sup> *Voting Rights and Election Administration in North Carolina: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Chairwoman Myra Pearson at p. 1.

<sup>407</sup> Many of our members struggle with housing instability, unemployment, and poverty. In 2015, a survey of 285 people living on the Spirit Lake Reservation indicated that 38 percent of people have an individual income of under \$5,000, and 73 percent have an income of under \$20,000 a year. 47.8 percent of the residents live below the poverty line, as compared to the national average of 13.8 percent. 41 percent reported that they had been homeless at some point in their lives. The Candeska Cikana Community College estimated in September 2014 that there are around 300 homeless people residing on or around the reservation, but also noted that estimate might be conservative due to many members not signing up for housing assistance.

Given these realities, and the fact that many parts of the reservation have not been thoroughly addressed, many members do not have ID since they do not need one to live their lives and they cost money. If the members have IDs at all, they hold tribal IDs that list their address as a P.O. Box if they have one. There are many streets on the reservation that are not labeled, and there are many houses which lack numbers. And even if the county 911 coordinator has assigned a residential address to someone's home, many are never notified of this address. Mail services do not extend to certain parts of the reservation. For example, in Fort Totten all residents receive their mail through a P.O. Box. There is no U.S. Postal Service delivery to residents in this area so they must rely on a P.O. Box to conduct their affairs."

<sup>408</sup> *Voting Rights and Election Administration in the Dakotas: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, hearing transcript Chairwoman Myra Pearson at p. 12-13.

Normally, the Tribe issues 30 ID cards per month.

<sup>409</sup> *Voting Rights and Election Administration in the Dakotas: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Alysia LaCounte at p. 1.

<sup>409</sup> *Id.* at p. 2.

does not comment on the intent of the law, “its practical implication acted to disenfranchise the people of the Turtle Mountain Band of Chippewa Indians.”<sup>410</sup>

Similar facts were echoed by Charles Walker, Judicial Committee Chairman of the Standing Rock Sioux Tribe. Mr. Walker testified that many people on Standing Rock do not have an ID. It is not necessary for everyday life, most people know each other, and many do not have a vehicle.<sup>411</sup> The family poverty rate in Sioux County, North Dakota is 35.9 percent and the nearest Driver’s License Site is approximately 40 miles away.<sup>412</sup>

---

*“... are you going to eat or are you going to vote? When you have to choose between having supper for your children or grandchildren or multigenerational living units, you are going to choose to take care of your family first.”*

—Charles Walker, Standing Rock Sioux Tribe

---

Additionally, the Tribe normally charges a \$5 fee to print a new ID, a fee they waived so members could obtain an ID to vote. In the lead up to the 2018 election, the Standing Rock Sioux Tribe issued “807 new tribal IDs between October 15, 2018 and November 6, 2018.”<sup>413</sup> The Tribe could have charged a fee for 486 of those IDs, meaning the Tribe lost “nearly \$2,500 in income.”<sup>414</sup>

Furthermore, the United States Postal Service does not always operate in the

rural areas of Reservations. For many people, even if the 911-system or the state government has assigned them an address, it may never have been communicated to them.<sup>415</sup> Many voters move from home to home because they do not have housing of their own. Even though they remain within the reservation, they do not have a consistent address.<sup>416</sup> Mr. Walker further testified the “failsafe mechanisms” in the latest iteration of the voter ID law do not address the problems Native American voters face. If a voter does not have a legitimate residential address, they likely do not have a utility bill or other document required to satisfy the failsafe.<sup>417</sup>

Roger White Owl, Chief Executive Officer of MHA Nation testified the Tribe estimates 75-80 percent of the tribal members who received a new ID leading up to the November 6, 2018

<sup>410</sup> *Id.* at p. 3.

<sup>414</sup> *Id.* – By comparison, the tribal enrollment office averages only 47 IDs a month.

<sup>415</sup> *Voting Rights and Election Administration in the Dakotas: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Charles Walker at p. 3.

<sup>416</sup> *Id.*

<sup>417</sup> We also have a significant portion of the population that is moving from home to home because they do not have housing of their own, which means that even though they remain within in the reservation, they do not have a consistent address. This makes the residential address requirement especially burdensome.”

<sup>417</sup> *Id.*

election did not have another form of ID that would have complied with North Dakota's law; many still do not have an ID that would allow them to vote.<sup>418</sup>

This disparate, discriminatory impact is the type of voting barrier the Voting Rights Act was enacted to prevent. The North Dakota voter ID law is a poll tax on many Native Americans, a practice Congress outlawed decades ago.

Alabama also enacted a voter ID law. The law was enacted in 2011, but implementation was delayed pending the decision in *Shelby County*, meaning Alabama was not required to seek preclearance nor prove the law would not have a discriminatory impact. Alabama's law requires voters to present one of eleven forms of identification to vote either in-person or absentee, or be positively identified by two election officials.<sup>419</sup> If a voter does not have an approved voter ID and cannot be positively identified, the voter may cast a provisional ballot.<sup>420</sup> The voter has until 5:00 p.m. on the Friday following Election Day to present "a proper form of photo identification to the Board of Registrars."<sup>421</sup> Republicans in Alabama and proponents of the law said strict ID was needed to guard against voter fraud, while some Democrats and opponents argued the law was aimed at making it harder for the poor, elderly and minorities to vote.<sup>422</sup> The day after the *Shelby County* decision, Alabama announced it would implement the photo ID law for the 2014 election.<sup>423</sup>

On its face, the Alabama voter ID law could appear not to have a discriminatory intent or purpose. However, the Subcommittee heard testimony at the Alabama field hearing of the discriminatory intent underlying its passage. Nancy Abudu of the Southern Poverty Law Center testified the "bill's proponents in the state legislature had long been explicitly clear about the racist intent behind the legislation."<sup>424</sup> A State Senator who worked for years to pass voter ID told local media his photo ID law would "undermine Alabama's 'Black power structure,' and that the absence of a voter ID law 'benefits Black elected officials.'"<sup>425</sup>

<sup>418</sup> *Voting Rights and Election Administration in the Dakotas*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Roger White Owl at p. 3.

<sup>419</sup> Between the time of the Eight Circuit decision and the November 6, 2018 election our Tribal Enrollment Office issued 456 new IDs to tribal members. Normally we issue about 150 to 200 IDs a month. This burdened our system, limited our ability to provide other important services to tribal members, and the MHA Nation absorbed the cost of issuing these IDs. We estimate the about 75 to 80 percent of the tribal members who received a new ID during this time did not have another form of ID that would have complied with North Dakota's law. Even with all of this additional work, about one-third of our members still do not have a tribal ID."

<sup>424</sup> *Voting Rights and Election Administration in Alabama*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Nancy Abudu at p. 2-3.

<sup>425</sup> *Id.* at p. 3, citing John Sharp, *After Midterms, Will Alabama Reform the Way You Vote?*, al.com (Nov. 18, 2018), <https://www.al.com/election/2018/11/after-midterms-will-alabama-reform-the-way-you-vote.html>, in a supplemental submission for the record. Ms. Abudu highlighted addition racist statements made by the former State Senator long seen as a leader on voter ID and photo ID:

"The Alabama NAACP and Greater Birmingham Ministries challenged Alabama's 2011 photo ID law as a violation of the Voting Rights Act, the Fourteenth Amendment, and the Fifteenth Amendment given its disproportionate and discriminatory impact on Black voters. In the plaintiffs' opposition to the state's motion for summary judgment, they presented evidence showing that as

Jenny Carroll, Professor of Law and Chair of the Alabama State Advisory Committee to the U.S. Commission on Civil Rights testified that her Committee “heard testimony that suggests that the reality is that Alabama’s voter identification law creates impediments for the poor and rural voter who may have limited access to locations that can issue identification, may lack the underlying documentation necessary to receive such identification, or have neither the time nor transportation to gain such identification.”<sup>426</sup>

Ms. Abudu testified the voter ID laws do have a disparate impact on communities of color, “Black and Latinx voters are about twice as likely as White voters to lack an acceptable form of identification.”<sup>427</sup> The NAACP LDF estimated 118,000 registered voters in Alabama lacked the necessary ID, or almost five percent of registered voters.<sup>428</sup> A study by Dr. Zoltan Hajnal at the University of California, San Diego found that turnout in Alabama’s most racially diverse counties declined by almost five percentage points after implementation of the voter ID law when comparing the 2012 and 2016 presidential elections.<sup>429</sup>

Even though the state claims “free state-issued photo IDs” are available, there are costs associated with obtaining the documents required to obtain an ID such as birth certificates and the transportation necessary to get to and from agencies to retrieve documents, and time off from work to do so.

In October 2015, Governor Robert Bentley drastically increased the burden of voter ID requirements by moving to close 31 driver’s license issuing offices, predominantly located in Alabama’s rural “Black Belt” in response to a budget dispute.<sup>430,431</sup> A 2012 Brennan Center

---

the debate over voter identification continued throughout the late 90s and 2000s, Sen. Dixon repeatedly made racist statements about voter identification and Black voter turnout. For example, in 2001, five years after the original “black power structure” comment, Sen. Dixon said publicly that voting without photo identification “benefits black elected leaders and that’s why they’re opposed to it.”<sup>426</sup> In 2010, fourteen years after the quote included in SPLC’s testimony, the FBI recorded Sen. Dixon and other state legislators planning to defeat a gambling referendum because they believed its presence on the ballot would increase Black voter turnout. Sen. Dixon reportedly said, “if we have a referendum in the state every black in this state will be bused to the polls.” He then added, “every black, every illiterate” would be “bused on HUD financed buses.” Finally, he predicted that coach buses “will meet at the gambling casino to get free certificates for blacks.”

<sup>429</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Deuel Ross at p. 6.

“And, in 2015, LDF brought a lawsuit challenging Alabama’s discriminatory photo voter ID law. Among other evidence, LDF showed that a state senator who had for over a decade led the effort to enact a strict photo ID law had promised that it would undermine Alabama’s “black power structure” and that other legislative sponsors had been recorded planning ways to discourage Black people from voting. A study by Dr. Zoltan Hajnal at the University of California, San Diego, comparing the 2012 and 2016 presidential elections, found that, after Alabama implemented its ID law, turnout in its most racially diverse counties declined by almost 5 percentage points, which is even more than the drop in similarly diverse counties in other states. This case is currently pending on appeal before the Eleventh Circuit.”

<sup>430</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 173-74.

<sup>431</sup> Adam Gittlin and Christopher Famighetti, *Closing Driver’s License Office in Alabama*, Brennan Center for Justice (Oct. 7, 2015), <https://www.brennancenter.org/blog/closing-drivers-license-offices-alabama>.

In an analysis of the planned closures, the Brennan Center found:

- 26.3 percent of the total Alabama population is African American.

report found that more than a quarter of voting-age citizens in Alabama lived more than 10 miles from an ID-issuing office and did not have vehicle access.<sup>432</sup> Public pressure resulted in a partial reversal. Rather than permanently closing the offices, the State decided to keep the offices open one day a month, still severely restricting access to photo ID.<sup>433</sup>

The U.S. Department of Transportation launched an investigation which eventually resulted in the Department of Transportation and the State of Alabama entering into a settlement agreement. The investigation alleged Alabama's closure of the 31 DMV offices disproportionately occurred in the "Black Belt" and disproportionately impacted Black and Latino voters in violation of the Civil Rights Act.<sup>434</sup> The Department of Transportation's investigation found that:

"African-Americans in the Black Belt region are disproportionately underserved by ... [the state's] driver's licensing services, causing 'a disparate and adverse impact on the basis of race, in violation of Title VI.'"<sup>435</sup>

The agreement reopened and fully restored the hours of driver's license offices in nine predominantly Black counties in the Black Belt. The agreement also requires Alabama to seek pre-approval from the Department of Transportation before initiating any office closures or other reductions in service.

Arizona recently expanded the scope of its photo ID requirement. If a voter casts a ballot by mail, the voter's signature on the envelope serves as the required ID.<sup>436</sup> For years, early in-person voting was conducted in the same manner. However, in the spring of 2019, the Arizona state legislature passed S.B. 1072, a new law requiring a photo ID for in-person, early voting, in addition to a voter's signature.<sup>437</sup> Now, voters who cast an early, in-person ballot must produce both a photo ID and a matching signature. Without Section 5, the state was not required to evaluate if this new law was racially neutral.<sup>438</sup>

- 
- Currently, in 11 Alabama counties, African Americans comprise more than 50 percent of the population. Driver's license offices will close in eight of these counties, which will leave only three majority-African American counties with a driver's license office.
  - Under Alabama's plan, license-issuing offices will close in all six counties in which African Americans comprise over 70 percent of the population.
  - Conversely, 40 license-issuing offices will remain open in the 55 Alabama counties in which Whites comprise more than 50 percent of the population.
  - In 2012, the Brennan Center reported that 32 percent of Alabama's voting-age population lived more than 10 miles away from the nearest license issuing office that was open more than two days per week.

<sup>438</sup> *Id.*

Additionally, LDF filed an amicus brief in a case before the Arkansas Supreme Court in 2014 in a successful challenge to the state's voter ID law.<sup>439</sup> According to testimony from Deuel Ross, Senior Counsel at NAACP LDF, "LDF offered unique evidence that 1,000 ballots were rejected because of this law."<sup>440</sup> Ms. Fried testified that, in Wisconsin, "the All Voting is Local campaign assisted hundreds of Wisconsin voters through the arduous process of getting an ID, which can include providing officials with a birth certificate or passport, filling out multiple forms, and repeat trips to the DMV" in the lead-up to the 2018 election.<sup>441</sup> Wisconsin enacted a strict voter ID law in 2011, and a recent study by the University of Wisconsin-Madison found 6 percent of registered voters in Dane and Milwaukee counties who did not vote in the 2016 general election were prevented from doing so because they did not have the requisite ID.<sup>442</sup> Additionally, the study found 11.2 percent of registered voters who did not vote in the 2016 election were deterred by the ID law; the study's author noted 11.2 percent represents the lower bound of those voters affected.<sup>443</sup> The study also found that the law does not impact all voters equally, impacting low-income and Black voters more severely.<sup>444</sup>

Brenda Wright, Senior Advisor for Legal Strategies at Demos said, "a lot of harm has been done in the name of combating voter fraud."<sup>445</sup> One example cited is the disenfranchisement of a group of nuns following the implementation of Indiana's voter ID law. The nuns did not have driver's licenses, they did not have passports, and they had to be turned away from the polls, even though the poll worker was a nun who lived with them at the convent and they had always voted at that polling place.<sup>446</sup> Chasing the specter of non-existent voter fraud should not prevent otherwise eligible voters from casting their ballot.

### **Exact Match and Signature Match**

#### *Exact Match*

In the lead up to the 2018 midterm elections, Georgia put on hold 53,000 voter registrations due to lacking an "exact match" in name, Social Security number, or other discrepancies.<sup>447</sup> While the population of Georgia is 32 percent Black, Black voters were more than 70 percent

<sup>443</sup> *Id.*

<sup>444</sup> *Id.* at pp. 11-12.

<sup>445</sup> More troubling still, the impact of Wisconsin's strict photo ID law is not felt equally by all Wisconsin voters. This same study further found that the law deterred:

- 21.1 percent of low-income registrants (household income under \$25,000) compared to 7.2 percent for those over \$25,000 and 2.7 percent of high-income registrants (over \$100,000 household income)
- 27.5 percent of African-American registrants compared to 8.3 percent of White registrants."

<sup>446</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, hearing transcript, Brenda Wright responding to questions from Congressman Pete Aguilar at p. 54.

<sup>447</sup> *Id.*

<sup>448</sup> *Voting Rights and Election Administration in Georgia: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Gilda Daniels at p. 4-5.

of the names on the hold list. Eighty percent of applicants on the list were Black, Asian, or Latino voters.<sup>448</sup>

Civil rights organizations have sued the State of Georgia three times to stop this exact match practice.<sup>449</sup> The state's exact match practice required information on voter registration forms to exactly match information about the applicant on Social Security Administration or the state's Department of Driver's Services (DDS) databases.<sup>450</sup> In 2019, the Georgia legislature amended the exact match law to permit applicants who fail the exact match process for reasons of identity to become active voters, but made no changes to reform the process that continues to inaccurately flag U.S. citizens as non-citizens.<sup>451</sup>

#### *Signature Match*

Some states have moved to an "exact match" for voters' signatures, both on in-person and absentee ballots.<sup>452</sup> Some state laws require the voter's signature on file to match the signature on one's ballot, a practice Elena Nunez testified has been used increasingly to arbitrarily disenfranchise voters.<sup>453</sup> Georgia law provides that election officials are required "to reject absentee ballots (and absentee ballot applications) if the absentee ballot signature does not match the signature elections officials have on file."<sup>454</sup> Signature laws such as Georgia's "primarily affect the disabled, the elderly, and people of color."<sup>455</sup>

In Florida, ballots can be marked "invalid" because of a missing signature or signature mismatch.<sup>456</sup> Eighty-three thousand votes in the 2018 election were rejected for signature mismatch.<sup>457</sup> In Florida, Andrew Gillum, former Mayor of Tallahassee and 2018 Gubernatorial candidate testified that, in a recent case regarding whether Florida's law allowing county election officials to reject vote-by-mail and provisional ballots for mismatched signatures passes constitutional muster, Judge Mark Walker of the Northern District of Florida found it did not.<sup>458</sup> Additionally, the ACLU of Florida and the University of Florida produced a report analyzing the 2014 and 2016 elections, which found younger and ethnic minority voters were

---

<sup>448</sup> "In an effort to capture voters of color, Georgia held 53,000 voter registrations, due to lacking an "exact match" in name, Social Security number and other minor discrepancies, e.g., an extra space, a missing hyphen or other typographical errors in the spelling or spacing of their names."

much more likely to have their vote-by-mail ballots rejected and less likely to have their vote-by-mail ballots cured when flagged for a signature mismatch.<sup>459</sup> Nancy Batista, Florida State Director of Mi Familia Vota, testified her own mail-in ballot was voided due to a signature mismatch in the primary election, even though she had not changed her signature since high school.<sup>460</sup>

In striking down Florida's signature matching law, Judge Walker found Florida's practice of curing signature mismatch had "no standards, an illusory process to cure and no process to challenge the rejection" and was therefore unconstitutional.<sup>461</sup> Judge Walker further noted that it was problematic that the boards are staffed by laypersons who are not required to undergo formal handwriting-analysis education or training.

In 2017, California was sued by the ACLU for invalidating tens of thousands of voters' vote-by-mail ballots without warning.<sup>462</sup> At issue was a state law allowing election officials with no expertise in handwriting to reject vote-by-mail ballots without providing notice if they feel the signature on the envelope did not match the one on file.<sup>463</sup> The complaint filed by the ACLU alleged as many as 45,000 ballots were rejected in the 2016 general election due to perceived signature mismatch.<sup>464</sup> In 2018, a judge in San Francisco ruled the state must notify voters before rejecting their mail-in ballots for signature concerns.<sup>465</sup>

#### **Language Access and Assistance**

Over time, the protections of the Voting Rights Act were expanded to prohibit discrimination against language minority, or limited-English proficiency (LEP), voters. These sections were not overturned by *Shelby County*, and they remain key components of the Voting Rights Act. As this report shows, more must be done to ensure states and localities are following through on the legal protections afforded language minority voters. As this section will illustrate, we are falling short on those protections still enshrined into law.

Sections 4(e) and 4(f)(4), along with Sections 203 and 208, are considered the "language minority" provisions of the Voting Rights Act.<sup>466</sup> Section 4(e) provides rights to U.S. citizens educated "in American flag schools" in a language other than English.<sup>467</sup> This provides specific protections to citizens educated in Puerto Rico in Spanish, prohibiting the conditioning of their right to vote on the ability to read, write, understand, or interpret English. This

<sup>466</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 28-29.

<sup>467</sup> 52 U.S.C. § 10303(e).

protection exists within all 50 states, whether the voter lives in a jurisdiction covered under the population threshold of Section 203 or not.<sup>468</sup>

Section 203 of the Voting Rights Act requires that language access for limited-English proficient (LEP) voters be equal to that of English-speaking voters. Section 203 was created during the 1975 reauthorization of the Voting Rights Act after congressional findings of discrimination and intimidation of voters with limited-English proficiency. The Voting Rights Act's language access requirements were not affected by the *Shelby County* ruling. According to data from the 2018 American Community Survey, nearly 22 million adult U.S. citizens speak Spanish; approximately 6,320,000 of whom are not fluent in English.<sup>469</sup> Another 5,089,000 adult citizens speak another language and are not fluent in English.<sup>470</sup> Arturo Vargas of NALEO testified that, "Americans who depend upon language assistance are becoming more diverse and more geographically dispersed, and these factors heighten the importance of effective language assistance."<sup>471</sup>

Section 203 requires the Director of the Census Bureau to publish his or her determinations as to which political subdivisions are subject to the minority language assistance provisions. The Census Bureau makes this determination every five years, the last being in December 2016.<sup>472</sup> Under the 2006 reauthorization of the Voting Rights Act, the language minority assistance provisions were extended until August 5, 2032. In its 2016 evaluation, the Census Bureau found 263 jurisdictions met the threshold of coverage under Section 203.<sup>473</sup> Between 2011 and 2016, 15 additional counties and cities were added to the list of localities required to provide language assistance materials, as well as four new states.<sup>474,475</sup> Political subdivisions within Alaska, Arizona, California, Colorado, Connecticut, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Maryland, Massachusetts, Michigan, Mississippi, Nebraska, Nevada, New Jersey, New Mexico, New York, Oklahoma, Pennsylvania, Rhode Island, Texas, Utah, Virginia, Washington, and Wisconsin currently fall under Section 203 coverage.<sup>476</sup>

<sup>473</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 187.

"The Census found "68,800,641 eligible voting-age citizens in the covered jurisdictions, or 31.3% of the total U.S. citizen voting-age population." Moreover, 16,621,136 Latino, 4,760,782 Asian, and 357,409 American Indian and Alaska Native voting-age citizens live in the covered jurisdictions."

<sup>474</sup> Section 203 applies in jurisdictions in which (1) more than 5 percent of citizens of voting age are members of a single language minority group and are LEP; or in which over 10,000 citizens of voting age meet the same criteria; or in Indian Reservations in which a whole or part of the population meets the 5 percent threshold; and (2) the literacy rate of the citizens in the language minority as a group is higher than the national illiteracy rate. See 52 U.S.C. § 10503(b)(2)(A)(i) and (ii).

<sup>475</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Arturo Vargas at p. 5.

<sup>476</sup> Federal Registrar, Voting Rights Act Amendments of 2006, Determinations Under Section 203 (pub. Dec. 5, 2016), <https://www.federalregister.gov/documents/2016/12/05/2016-28969/voting-rights-act-amendments-of-2006-determinations-under-section-203>.

The importance of the Voting Rights Act's language access provisions and continued lack of compliance with language access requirements was highlighted during the Subcommittee's field hearing in Broward County, Florida. Florida has a rapidly growing Puerto Rican population.<sup>477</sup> As of 2016, in addition to statewide coverage for Florida, 10 counties are required to provide Spanish-language assistance under Section 203 of the Voting Rights Act.<sup>478</sup> The first time Florida was covered under Section 203 for Spanish was 2011.<sup>479</sup> Despite this, no significant changes for Spanish speakers were made to the materials produced by the Florida Division of Elections.<sup>480</sup> Anjenys Gonzalez-Eilert, Program Director of Common Cause Florida, testified that the first time the Division of Elections made a statewide Voter Registration and Voting Guide in Spanish available was just three weeks before the August 2014 primary.<sup>481</sup> Language minority voters must rely on programs like Google translate to access the Division of Elections website.<sup>482</sup>

---

*"It is remarkable that it takes a coalition of voting rights organizations and individuals to sue in federal court to seek minimal compliance with the plain language of a venerable 53-year-old law."*

— Judge Mark Walker, Northern District of Florida

---

Juan Cartagena, President and General Counsel of LatinoJustice, testified that, though Florida is a covered state, "it usually takes litigation to force Florida election officials to abide by the will of Congress."<sup>483</sup> Florida was sued in 2000 by the Department of Justice for failure to provide the proper language materials and in 2009 by LatinoJustice for failure to provide required assistance to voters from Puerto Rico.<sup>484</sup> Again, in *Rivera Madera v. Detzner* (now *Lee*), LatinoJustice and

others sued 32 Florida counties in August 2018 for failing to comply with Section 4(e) of the Voting Rights Act. In his order, Judge Mark Walker made a telling observation about the state of voting rights protection in Florida: "It is remarkable that it takes a coalition of voting rights

---

<sup>477</sup> *Voting Rights and Election Administration in Florida*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Juan Cartagena at p. 2.

<sup>478</sup> Based on 2017 Census data Florida now has the highest number of Puerto Rican residents than any other state in the country at 1,128,225 and it grew by over 30% since 2010. Among all Latino populations in Florida Cubans are still the plurality at 28.5% with Puerto Ricans second at 21% ....

<sup>479</sup> *Id.* at p. 3.

Broward, DeSoto, Hardee, Hendry, Hillsborough, Lee, Miami-Dade, Orange, Osceola, Palm Beach Pinellas, Polk and Seminole counties are covered under the Voting Rights Act.

<sup>480</sup> *Voting Rights and Election Administration in Florida*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Anjenys Gonzalez-Eilert at p. 3.

<sup>481</sup> *Id.*

<sup>482</sup> *Id.*

<sup>483</sup> *Voting Rights and Election Administration in Florida*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Juan Cartagena at p. 3.

<sup>484</sup> *Id.*, discussing a 2002 Department of Justice suit against Osceola County resulting in a settlement to stop the discriminatory failure to provide voting access to Spanish-speaking voters under Section 2; also discussing a 2009 LatinoJustice suit against Volusia County to provide Spanish-language assistance to Puerto Rican voters under Section 4(e), which was settled.

organizations and individuals to sue in federal court to seek minimal compliance with the plain language of a venerable 53-year-old law.”<sup>485</sup>

As Mr. Cartagena further explained, the population on the island of Puerto Rico is roughly 65 percent Spanish-language dominant.<sup>486</sup> In Puerto Rico, all government proceedings happen in Spanish, and voter turnout for elections is upwards of 80 percent.<sup>487</sup> This makes the language access protections afforded to Puerto Ricans educated on the island of Puerto Rico under Section 4(e) critical to their ability to fully participate in elections in the 50 states.

In Georgia, only Gwinnett County has been designated under Section 203,<sup>488</sup> but all localities are also required under Section 4(e) to provide Spanish language materials to U.S. citizens from Puerto Rico. During his testimony in Georgia, Sean Young noted, for example, that Hall County was obligated to provide these materials – but the board refused.<sup>489</sup>

Section 203 of the Voting Rights Act requires Arizona to provide election materials and assistance in Spanish, Navajo, and Apache.<sup>490</sup> As of 2016, at least 10 of Arizona’s 15 counties must comply with Section 203 by providing translated election materials in Spanish or Native American languages.<sup>491</sup> Providing only written materials in multiple languages may not serve all voters. Some Native languages are not traditionally written, and a written ballot sent to an interpreter may not be the proper way to ensure adequate language access. Some voters may need a physical polling place so voters can obtain oral language assistance,<sup>492</sup> which can be difficult depending on the distance to the polls and access to transportation. Plaintiffs in San Juan County, Utah, alleged the county failed to meet the standard set forth in Section 203 for Navajo speakers. A settlement reached by the Lawyers’ Committee and partner organizations requires the county to provide in-person language assistance on the Navajo reservation for 28 days prior to each election through the 2020 general election and take additional action to ensure quality interpretation of election information and materials.<sup>493</sup>

According to the U.S. Census, Asian Americans are the nation’s fastest growing racial group; there are now 22.6 million Asian Americans living in the U.S.<sup>494</sup> Asian Americans are not monolithic, instead consisting of a multitude of cultures and languages. According to John C. Yang, President and Executive Director of Asian Americans Advancing Justice | AAJC,

“[T]he country’s fastest growing Asian American ethnic groups were South Asian, with the Bangladeshi and Pakistani American populations doubling in size between 2000 and 2010. Chinese Americans continue to be the largest Asian American ethnic group, numbering nearly 3.8 million nationwide in 2010, followed in size by Filipino, Indian, Vietnamese, and Korean Americans.”<sup>495</sup>

Mr. Yang testified that a major obstacle facing Asian American voters is the language barrier. Nationally, about three out of every four Asian Americans speak a language other than English at home and one-third of the population is limited-English proficient (LEP).<sup>496</sup> Access to properly translated materials and assistance at the polls is essential to allowing Asian Americans full access to the vote, “when properly implemented, Section 203 increases civic engagement among Asian American citizens.”<sup>497</sup>

Additionally, Section 208 is critical to ensuring every citizen has access to the assistors of their choice when voting. Section 208 provides voters the right to assistance in the voting booth from a person of the voter’s choice because of blindness, disability, or inability to read or write, and has been used as an important complement to Section 203.<sup>498</sup> Section 208 protections have been interpreted to include a right to in-person assistance for LEP voters.<sup>499</sup> While Section 203 does not apply nationwide, Section 208 does. As Mr. Yang testified, “all citizens who have difficulty with English, no matter where they live or what their native language is, have the right through Section 208 to an assistors of their choice to help them in the voting booth.”<sup>500</sup>

Language accessibility remains a fundamental component to ensure access to the ballot. The language access provisions of the Voting Rights Act are critical to ensuring free and fair access to the ballot box. While these provisions were not struck down in *Shelby County*, the Subcommittee’s hearings clearly show a need for better implementation. This will continue to be important as new American populations move about the country, bringing new localities under compliance requirements.

### **Discriminatory Gerrymandering**

At nearly every hearing, the Subcommittee heard about the use of gerrymandering as a suppression tool and the effect gerrymandering can have on diluting the voting power and voice of minority voters. This is especially true of states where partisan legislatures are responsible for drawing maps. Discriminatory gerrymandering and vote dilution affect elections from school boards to congressional districts.

After *Shelby County*, redistricting plans are no longer precleared, meaning states with and without a history of racial discrimination can implement new districts for state and federal

<sup>495</sup> *Id.*

<sup>496</sup> *Id.* at p. 5.

<sup>497</sup> *Id.* at p. 8.

<sup>498</sup> *Id.* at p. 10.

<sup>499</sup> See, e.g., *U.S. v. Berks County, P.A.*, 250 F. Supp. 2d 525, 538 (E.D. Pa. 2003).

<sup>500</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of John C. Yang at p. 2.

offices following the 2020 census that could be in effect for several election cycles, while simultaneously being challenged in court as discriminatory. If the Supreme Court had not gutted Section 4(b), covered states would have been required to send their new district lines for preclearance approval *before* implementation and before any discriminatory impact occurred.

North Carolina has been particularly egregious in its use of redistricting to dilute and suppress voters' power. In 2016, after the District Court ruled against the state's maps, North Carolina Republican legislators drew new maps, this time admitting the purpose of the maps was partisan.<sup>501</sup> In 2017, the Court upheld the lower court's rejection of two North Carolina congressional maps on the grounds that North Carolina's Republican-controlled legislature relied too heavily on race in drawing the maps.<sup>502</sup>

According to Tomas Lopez of Democracy North Carolina, North Carolina's maps have been the subject of continuous litigation since the 2011 redistricting.<sup>503</sup> Mr. Lopez went on to say that this continuous litigation "suggests the current remedies against gerrymandering are ineffective; if the courts take nearly a decade to address the problem, and legislatures are able to avoid penalties for their bad behavior, then the incentive to distort the maps will only be reinforced."<sup>504</sup>

In 2019, the Court decided another case involving North Carolina's gerrymandered maps. In a case combined with a partisan gerrymandering case originating in Maryland, the Court ruled that federal judges have no power to stop politicians from drawing electoral districts based on partisan power.<sup>505</sup> The Majority abdicated the role of the Court in deciding when partisan gerrymandering has crossed constitutional bounds, with Chief Justice Roberts writing, "but the fact that such gerrymandering is incompatible with democratic principles does not mean that the solution lies with the federal judiciary."<sup>506</sup> In writing for the dissent, Justice Kagan strongly disagreed, writing that "the gerrymanders here – and others like them – violated the constitutional rights of many hundreds of thousands of American citizens."<sup>507</sup>

The Court's decision jeopardizes the rights of millions of minority voters. By ceding the field to state courts, the Court fails to set a national protection standard, leaving the rights of voters open to 50 different interpretations of what a gerrymandered district looks like.

<sup>505</sup> Robert Barnes, *Supreme Court says federal courts don't have a role in deciding partisan gerrymandering claims*, The Washington Post (June 27, 2019), [https://www.washingtonpost.com/politics/courts\\_law/supreme-court-says-federal-courts-don-t-have-a-role-in-deciding-partisan-gerrymandering-claims/2019/06/27/2fe82340-93ab-11e9-b58a-a6a9afaa0c3e\\_story.html](https://www.washingtonpost.com/politics/courts_law/supreme-court-says-federal-courts-don-t-have-a-role-in-deciding-partisan-gerrymandering-claims/2019/06/27/2fe82340-93ab-11e9-b58a-a6a9afaa0c3e_story.html), see also *Rucho v. Common Cause*, 588 U.S. \_\_\_\_ (2019).

Chief Justice Roberts writing for the majority: "We conclude that partisan gerrymandering claims present political questions beyond the reach of the federal courts ... Federal judges have no license to reallocate political power between the two major political parties, with no plausible grant of authority in the Constitution, and no legal standards to limit and direct their decisions."

<sup>506</sup> *Id.*

<sup>507</sup> *Id.*

Without the full protection of the Voting Rights Act requiring states and localities with a history of discriminatory practices to preclear their new maps, states could arguably create discriminatory maps, but color them in the rhetoric of party affiliation, not race.

Despite the Court's decision to render federal courts powerless to act, on October 28, 2019, a North Carolina state court again threw out the state's congressional district maps, saying the record of partisan intent was so extensive that opponents of the maps were poised to show "beyond a reasonable doubt" that the maps were unconstitutionally gerrymandered to favor the Republican Party over the Democratic Party, and North Carolina voters would be irreparably harmed if the 2020 elections were held using these maps.<sup>508</sup>

One of the map's primary drafters, Republican State Representative David Lewis was quoted in 2016 as saying he wanted maps drawn that would give a partisan advantage to 10 Republicans and three Democrats because "I do not believe it's possible to draw a map with 11 Republicans and 2 Democrats."<sup>509</sup> The same three-judge panel struck down most of the State Legislature's maps in September as an impermissible partisan gerrymander.<sup>510</sup> Republicans decided to redraw the maps, which were approved by the same court on October 28.<sup>511</sup>

In a separate yet related case, hard drives belonging to Thomas Hofeller, a consultant who helped draw North Carolina's maps, were recently discovered. The recovered data outlined the significant role racial discrimination played in drawing legislative maps. Hofeller played a critical part in the administration's attempt to add a citizenship question to the 2020 census,<sup>512</sup> which is the constitutionally mandated instrument that counts all persons living in the United States and whose data congressional representation is based upon when states draw their legislative districts.

Hofeller's hard drives included files proving he wrote a 2015 study which concluded that "adding a citizenship question to the census would allow Republicans to draft even more extreme gerrymandered maps to stymie Democrats."<sup>513</sup> Hofeller also wrote a significant portion of the Department of Justice's letter claiming the citizenship question was needed to enforce the Voting Rights Act of 1965, a justification later used by the Administration.<sup>514</sup>

Critics of the proposed policy argued that it would likely depress responses from minority groups and non-citizens, leading to a potential undercount and skewing the results. Maps are traditionally drawn based on a state's total population, not just the population of voting-age citizens. Following his analysis of Texas state legislative districts, Mr. Hofeller concluded such maps "would be advantageous to Republicans and non-Hispanic Whites," diluting the power of the state's Hispanic residents.<sup>515</sup>

<sup>513</sup> *Id.*

<sup>514</sup> *Id.*

<sup>515</sup> *Id.*

In a 5-4 decision, the Court blocked the addition of a citizenship question to the 2020 census, upholding the lower court's decision to remand the case back to the agency, writing, "[A] together, the evidence tells a story that does not match the Secretary's explanation for his decision."<sup>516</sup> Secretary of Commerce Wilbur Ross had stated his reason was to better enforce the Voting Rights Act, but the Court found, "[U]nlike a typical case in which an agency may have both stated and unstated reasons for a decision, here the Voting Rights Act enforcement rationale—the sole stated reason—seems to have been contrived."<sup>517</sup>

In North Dakota, tribal leaders raised concerns that, though there is only one at-large representative at the federal level, their reservations are divided in such a way during state-level redistricting that no Native American can win a seat representing the tribal lands.<sup>518</sup> State Representative Ruth Buffalo is the only Native American serving in the North Dakota State House. Representative Buffalo represents District 27—Fargo, North Dakota—which is 370 miles from her traditional homelands of the Fort Berthold Reservation.<sup>519</sup> The District that represents Fort Berthold encompasses a White population that overwhelms the Native American population.<sup>520</sup>

In Alabama, Georgia, Ohio, and Texas, the Subcommittee heard additional testimony regarding the impact of discriminatory gerrymandering. An attempted move to at-large districts in a City Council race in Alabama was denied by the Department of Justice on the grounds it was racially discriminatory and gave rise to the lawsuit that became *Shelby County*.<sup>521</sup> In the Texas case *Veasey v. Abbott*, the court found that "[I]n every redistricting cycle since 1970, Texas has been found to have violated the Voting Rights Act with racially gerrymandered districts."<sup>522</sup> Since Texas came under Section 5 preclearance in 1965, it has been barred by law from discriminating against minority voters, yet Federal judges have ruled at least once every decade since then that Texas violated federal protections for voters in redistricting.<sup>523</sup>

As described in this report, the ACLU of Georgia engaged in a lawsuit to overturn a discriminatory gerrymandering plan in Sumter County, Georgia, that would take five years to resolve.<sup>524</sup> Deuel Ross of NAACP LDF testified that, in 2015, in Fayette County, Georgia, "the County Commission tried to revert to an at-large voting system in a special election to replace a Black Commissioner who had died unexpectedly."<sup>525</sup> LDF filed a lawsuit under Section 2 of the Voting Rights Act to stop this move and require the election to use single-member

districts, allowing Black voters to again elect the candidate of their preference.<sup>526</sup> In Emanuel County, the Lawyers' Committee represented plaintiffs who alleged the boundaries for seven school board districts "impermissibly diluted the voting strength of African American voters by 'packing' them into one district."<sup>527</sup> A negotiated settlement resulted in the creation of two majority-minority single-member districts.<sup>528</sup>

In Arizona, Professor Ferguson-Bohnee testified that, without Section 5 review, tribes are concerned the Redistricting Commission may not consider retrogression when drawing the maps since the state is no longer required to seek preclearance.<sup>529</sup> Tribes participated in the previous round of redistricting and defended the single majority-minority Native American legislative district. Tribal communities remain concerned they may lose the limited opportunity to elect candidates of their choice in state government.<sup>530</sup> The testimony collected during the Subcommittee's field hearings clearly demonstrates that discriminatory gerrymandering is rampant. Without the pre-*Shelby County* protections in place, the maps drawn after the 2020 census are likely to exacerbate this problem and it will take years for courts to remedy the issue. In the meantime, citizens will continue to be denied meaningful representation.

## Section 2 Litigation

While important components of the Voting Rights Act were overturned by the *Shelby County* decision, many critical elements remain, including the ability to pursue litigation under Section 2. Section 2 allows both the Attorney General and private citizens to challenge a practice or procedure on discriminatory grounds. This standard was expanded during subsequent reauthorizations, allowing plaintiffs to challenge laws and election practices without needing to prove discriminatory intent and adjusting the burden of proof requirement to a "results or effects" test, reducing the burden on the plaintiffs.<sup>531</sup> Section 2 applies nationwide and does not expire.

At each field hearing, the Subcommittee heard that while critical, litigation under Section 2 of the Voting Rights Act is not, and cannot, be an adequate remedy on its own. Section 2 was designed as a tool for the Attorney General and private citizens to enforce 14<sup>th</sup> and 15<sup>th</sup> Amendment protections nationwide. After the *Shelby County* decision, Section 2 is one of the few mechanisms left for enforcing the right to vote and preventing voting changes that have a disparate impact on, and reduce the ability of, minority citizens to vote.

The U.S. Commission on Civil Rights, in their 2018 statutory Minority Voting Access report, found the number of Section 2 cases increased fourfold following the *Shelby County*

<sup>528</sup> *Id.*

<sup>529</sup> *Voting Rights and Election Administration in Arizona: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Patty Ferguson-Bohnee at p. 8.

<sup>530</sup> *Id.*

<sup>531</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 35.

decision.<sup>532</sup> The Department of Justice has litigated far fewer enforcement suits than private groups. At the time of the report's publishing, the Department of Justice had filed four of the 61 Section 2 cases since the *Shelby County* decision, including one case about the required language access measures, and no cases on the right to voting assistance.<sup>533</sup> There is disagreement over whether the Department of Justice is failing to adequately enforce the Voting Rights Act or voting discrimination has decreased.<sup>534</sup> As this report clearly demonstrates, discrimination in voting has not decreased.

Additionally, USCCR Vice-Chair Patricia Timmons-Goodson testified that, from the USCCR's perspective, the loss of Section 5 preclearance has made tracking voting changes more difficult; "at one point, there was a single source or a limited number of places that we could go to get that information, but when it is left to individual citizens and organizations to do the filing, it makes it far more difficult to track them."<sup>535</sup> Illustrative of the scope of changes voters and advocates now have to track and potentially reactively litigate against, the Department of Justice reported that in just the three years before *Shelby County*, between 2010-2013, it considered 44,790 voting changes under Section 5.<sup>536</sup>

Section 2 lawsuits can be very lengthy, often taking years to fully litigate. This can result in discriminatory laws that may have otherwise been prevented from implementation under Section 5 remaining in place for multiple election cycles, denying voters access to the ballot while lawsuits move through the court process. According to Dale Ho, Director of the ACLU's Voting Rights Project, "in 10 recent Section 2 cases that resulted in favorable outcomes for [our] clients, more than 350 federal, state, and local government officials were elected under regimes that were later found by a court to be racially discriminatory or were later abandoned by the jurisdiction."<sup>537</sup>

Section 2 also reverses the burden of proof, requiring the federal government or citizens to prove the voting change is discriminatory and harms minority voters, rather than the burden being on the state or locality to prove they are not violating peoples' constitutional right to vote. Kristen Clarke of the Lawyers' Committee testified that, "although Section 2 of the Voting Rights Act remains a viable weapon in the fight against racial discrimination in voting, it is nowhere near as potent a weapon as was Section 5."<sup>538</sup> These challenges are only exacerbated by the shifting priorities of the Department of Justice. Ms. Clarke testified that,

as of the date of the Subcommittee's Washington, D.C. hearing, the current administration has not filed a single Section 2 lawsuit.<sup>539</sup>

Overreliance on Section 2 forces private citizens to recognize when they are discriminated against and muster the resources to challenge the state or local government. In every state the Subcommittee visited, witnesses provided testimony outlining just how burdensome relying on Section 2 to protect voting rights can be.

---

*"The ACLU of Georgia's litigation in Sumter County perfectly illustrates the damage that the Shelby decision has caused. In 2011, 67 percent of the Sumter County Board of Education was African American. Then, the General Assembly proposed a plan that would reduce that percentage to 28 percent. The DOJ did not preclear the plan, but then the Shelby County decision was handed down, and that discriminatory plan was put into effect immediately. So, the ACLU filed a voting rights lawsuit under Section 2. And last summer, after 5 years of litigation, the Federal District Court issued a ruling finding that the plan was discriminatory and violated the Voting Rights Act. That is 5 years of time consuming litigation, hundreds if not thousands of attorney hours, and thousands of dollars in expert fees. That is 5 years of discriminatory elections taking place over and over again in Sumter County. And that is 5 years in which African American school children and their parents did not have their interests adequately represented in the board. And we are 2 years away from another round of redistricting, in which all of this can happen again. If the preclearance requirement were in place, none of this would have happened and that plan wouldn't have seen the light of day."*

— Sean J. Young, ACLU of Georgia

---

<sup>539</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript, Kristen Clarke at p. 29-30.

In Atlanta, Georgia, Sean Young, Legal Director, ACLU of Georgia, gave testimony about the ACLU of Georgia's litigation in Sumter County.<sup>540</sup> The Department of Justice did not preclear a redistricting plan that would have diluted the Black population of the Sumter County Board of Education from 67 percent in 2011 to 28 percent. Following the *Shelby County* decision, the discriminatory plan was put into effect immediately. The Section 2 suit filed by the ACLU went on for five years, requiring "hundreds if not thousands of attorney hours," and costing "thousands of dollars in expert fees."<sup>541</sup> All the while, years of voting took place under these discriminatory practices. Gilda Daniels, Litigation Director at the Advancement Project reiterated the time and expense of Section 2, saying "Section 2 cases last an average of three years, and cost more than \$1 million."<sup>542</sup>

In North Carolina, Caitlin Swain, Co-Director of Forward Justice, estimated the recent Section 2 litigation in North Carolina cost more than \$10 million on the plaintiff's side alone.<sup>543</sup> Ms. Swain continued, saying the cost more than doubled when including nonprofit groups, as well as the State's costs associated with outside counsel representing the Governor and the General Assembly.<sup>544</sup> When the state is sued, the state's costs are then often borne disproportionately by the taxpayers,<sup>545</sup> placing burdens on the voter at both ends of the lawsuit. Deuel Ross, of the NAACP LDF, testified that it has been found that voting rights cases take up the sixth most judicial resources in terms of cases.<sup>546</sup>

In North Dakota, Jacqueline De León, Staff Attorney at NARF, testified that Section 2 litigation is very expensive and "it is prohibitively expensive for a small organization like NARF to reach every single instance of discrimination that is happening across the country."<sup>547</sup> In NARF's 2016 challenge to the North Dakota voter ID law, the total sought for Plaintiffs' attorneys' fees and litigation expenses was \$1,132,459.41. This included attorneys' fees and litigation expenses, including expert reports. The case necessitated thousands of attorney hours over almost two years to build a legal record and respond to the State's defense of the law.<sup>548</sup>

In Ohio, Naila Awan, Senior Counsel at Demos, testified that Plaintiff-side expenses in bringing Section 2 litigation often reach the six- and seven-figure range.<sup>549</sup> In Alabama,

<sup>540</sup> *Voting Rights and Election Administration in Georgia*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript, Sean J. Young at p. 26.

<sup>547</sup> *Voting Rights and Election Administration in the Dakotas*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript, Jacqueline De León at p. 64.

<sup>548</sup> *Voting Rights and Election Administration in the Dakotas*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Jacqueline De León at p. 4.

"The effort and resources necessary to mount this legal challenge were significant. The total sought for Plaintiffs' attorneys' fees and litigation expenses was \$1,132,459.41. This sum represents \$832,977 in attorneys' fees and \$299,482.41 in litigation expenses, including expert reports. Thousands of attorney hours over almost two years were expended in order to build a legal record and respond to numerous motions filed by the State in defense of the law."

<sup>549</sup> *Voting Rights and Election Administration in Ohio*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), supplemental written statement for the record, Naila Awan.

Attorney James Blacksher testified it would cost “at least hundreds of thousands of dollars” to bring a successful case challenging polling place changes.<sup>550</sup> Mr. Blacksher further testified that it “cost us millions of dollars in the last go-around of redistricting the House and Senate of Alabama” to challenge discriminatorily gerrymandered maps.<sup>551</sup> Mr. Blacksher elaborated that, “in fact, today, it is impossible for private counsel like [him] to bring one of these [Section 2] lawsuits without substantial assistance, financial and legal, from big law firms.”<sup>552</sup>

In Arizona, Professor Ferguson-Bohnee testified she has been involved in several Section 2 cases in the State of Arizona, one after the 2000 redistricting on behalf of the Navajo Nation and another on the voter ID litigation brought on behalf of the Navajo Nation and other Native American citizens in the State.<sup>553</sup> Currently, there is ongoing Section 2 litigation in Arizona Federal District Court dealing with the lack of access to early voting, voter registration, and noncompliance with Section 203 of the Voting Rights Act.<sup>554</sup> In the two decades Professor Ferguson-Bohnee has been working on voting litigation in the State of Arizona, the Department of Justice has not initiated any Section 2 cases on behalf of Arizona Tribes.<sup>555</sup> Additionally, Professor Ferguson-Bohnee testified that “Tribes have limited resources to bring voting litigation,”<sup>556</sup> and that Section 2 cases can cost up to \$1 million.<sup>557</sup>

As the Subcommittee’s hearings illustrate, Section 2 is a critical tool for protecting the right to vote and preventing discrimination, but, alone, it is not enough.

## CONCLUSION

Without federal protections, new and old barriers to voting have emerged. Improperly purging voter registration rolls can disproportionately impact minority voters and recently naturalized citizens, and lead to the disenfranchisement of otherwise eligible voters. Cutbacks to early voting have a disparate impact on minority communities, working people, students, and the poor, leading to long wait times voters often cannot endure. In the post-*Shelby County* era, previously covered jurisdictions have closed over one thousand polling places. Jurisdictions not previously covered have also closed, moved, or consolidated polling places, leading to voter confusion and disenfranchisement. After the *Shelby County* decision, states and localities are no longer required to evaluate these decisions for their potential discriminatory impact.

Voter ID requirements disproportionately impact minority voters who are less likely than White voters to have the required ID. Voter ID also creates a modern-day poll tax, requiring voters to purchase an ID to vote or, even in cases in which states purport to provide free IDs, the requisite underlying documents are often not free for voters. There are also costs associated with time off from work and transportation required to reach the agency dispensing the IDs. The use of exact match and signature match requirements can disenfranchise voters. The language access provisions of the Voting Rights Act remain intact, but far more needs to be done to ensure limited-English proficiency voters have access to the properly translated materials and assistance they need to fully participate in the election process. Finally, discriminatory gerrymandering persists, diluting the vote and voice of minority communities. As the 2020 Census approaches, followed swiftly by a cycle of redistricting, a lack of preclearance puts at risk the state, local, and federal representation of communities for the next decade.

While Section 2 is a vital tool to protecting the right to vote, it is not a panacea. Litigation under Section 2 requires a significant investment of time and resources, neither of which most voters have. Without a proactive Section 5, and without a Department of Justice actively protecting the right to vote, advocates and litigators are left to fill in the gap. Section 2 is also a reactive solution, only to be deployed after a discriminatory practice or procedure is instituted. A case can take years to litigate, leaving voters vulnerable while the court process unfolds. To truly protect the right to vote, Congress must act proactively to protect a right as fundamental as participation in the democratic process.

## CHAPTER THREE

### *Obstacles Faced by Native American Voters*

#### BACKGROUND

Native Americans have historically faced significant barriers to full participation in our democracy. This land's original inhabitants were disenfranchised at the time of our nation's founding, and since then their votes and voices have been systematically suppressed. When the Constitution was written and ratified, it provided for representation of "the whole number of free Persons," fully including indentured servants who were mostly White, but counting enslaved persons as only three-fifths of a person and excluding "Indians not taxed."<sup>558</sup> Native Americans were not considered citizens in the 1800s, were specifically excluded from the 14<sup>th</sup> Amendment, and were not granted full voting rights until the 1920s. Even after these advances, it took decades for every state to fully comply with federal guarantees.

For many years, Native Americans were denied the same rights as other Americans. The Court distinguished tribal nations from sovereign foreign nations or official parts of the United States, instead considering them domestic dependent nations.<sup>559</sup> In 1856, Attorney General Caleb Cushing outlined the federal government's rationale as to why domestic subjects could not be made citizens absent a treaty or specific congressional act, explaining that general naturalization statutes did not apply to Native Americans because "Indians are not foreigners" and have no other allegiance, but are "within our allegiance, without being citizens of the United States."<sup>560</sup> This meant Native Americans did not have access to the same naturalization process as immigrants, nor did they have the same rights as other natural-born citizens. It was effectively impossible for Native Americans to realize the same rights as other American citizens, including the right to vote.

When emancipated enslaved people were granted citizenship rights under the 14<sup>th</sup> Amendment in 1868, the U.S. government interpreted the Amendment to exclude Native Americans on reservations.<sup>561</sup> The Reconstruction amendments and implementing legislation excluded Native Americans, rationalizing that tribal members were in fact citizens of Indian nations, not the United States,<sup>562</sup> and were ineligible to vote.<sup>563</sup> Then-Michigan Senator Jacob Howard said,

---

<sup>558</sup> U.S. Const., Art. I, § 2, cl. 3.

"Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons."

<sup>563</sup> *Id.*

"I am not yet prepared to pass a sweeping act of naturalization by which all the Indian savages, wild or tame, belonging to a tribal relation, are to become my fellow-citizens and go to the polls and vote with me[.]"<sup>564</sup> The 14<sup>th</sup> Amendment itself expressly states that Native Americans did not count for the purposes of representative apportionment.<sup>565</sup>

The Civil Rights Act of 1866 also specifically excluded Native Americans. Under this law, tribal citizens were "subjects of" the United States, but not "subject to" the jurisdiction of the United States and therefore not citizens.<sup>566</sup> In 1884, the Court held that Native Americans could not become citizens through naturalization or birth.<sup>567</sup> When women gained the right to vote under the 19<sup>th</sup> Amendment, it enfranchised predominantly White women because many Native American women still lacked citizenship.<sup>568</sup>

It was not until 1924, under the Indian Citizenship Act, that Native Americans won full citizenship and voting rights without impairing their right to remain a tribal member.<sup>569</sup> Prior to passage of the Indian Citizenship Act, obtaining citizenship required tribal members to sever tribal ties, renounce tribal citizenship, and assimilate to the dominant culture.<sup>570</sup> Native Americans had been denied citizenship and the right to vote "based on the underlying trust relationship between the federal government and the tribes and their status as tribal citizens."<sup>571</sup> With the passage of the Indian Citizenship Act, a Native American who is a citizen of the United States is also a citizen of his or her state of residence.<sup>572</sup> However, some states continued to deny Native Americans the right to vote in state and federal elections through the same suppressive tactics used to disenfranchise other minority voters, including poll taxes, literacy tests, and intimidation.<sup>573</sup>

In 1928, Peter Porter and Rudolph Johnson of the Gila River Indian Community, were denied the right to register to vote in Pinal County.<sup>574</sup> The County recorder deemed Porter and Johnson unqualified to vote for two reasons: (1) they resided on the reservation and thus not within the State of Arizona; and (2) as Native Americans they remained under guardianship of the federal government and under Arizona law, individuals under guardianship were not entitled to vote in Arizona elections for state and federal officers.<sup>575</sup>

<sup>573</sup> *Id.*

<sup>574</sup> *Voting Rights and Election Administration in Arizona: Hearing Before the Subcomm. on Elections*, 116<sup>th</sup> Cong. (2019), written testimony of Governor Stephen Roe Lewis at p. 1-2.

<sup>575</sup> *Id.*, see also Patty Ferguson-Bohnee, *The History of Indian Voting Rights in Arizona: Overcoming Decades of Voter Suppression*, Ariz. St. L. J. 47:1099 at p. 1108.

Congress' passage of the Nationality Act of 1940 reaffirmed the citizenship of Native Americans.<sup>576</sup> As late as 1948, Arizona and New Mexico enforced state laws expressly barring many Native Americans from voting.<sup>577</sup> Professor Patty Ferguson-Bohnee testified that, historically, despite the Indian Citizenship Act in 1924 and the Arizona Supreme Court affirming the right of Native Americans to vote in *Harrison v. Laveen*,<sup>578</sup> the right to vote for Native Americans was still not secure.<sup>579</sup> Native American voters continued to be disenfranchised by literacy tests for decades.<sup>580</sup> Many Native voters did not vote because they were illiterate and could not speak English; English literacy tests were the biggest obstacle preventing Native Americans from voting.<sup>581</sup> Illiteracy rates for Native Americans in 1948 were estimated at 80 to 90 percent.<sup>582</sup> In 1970, the right was finally affirmed when the Court upheld the ban on literacy tests.<sup>583</sup>

A recent study conducted by the Native American Voting Rights Coalition<sup>584</sup> found that low levels of trust in government, lack of information on how and where to register, long distances to register and to vote, low levels of internet access, hostility towards Native Americans, and intimidation are obstacles to Native American voter participation in Arizona.<sup>585</sup> Research by the National Congress of American Indians indicates the voter turnout rate among American Indian and Alaska Native registered voters is five to 14 percentage points lower than the rate of many other racial and ethnic groups.<sup>586</sup>

The Subcommittee on Elections held field hearings in North Dakota and Arizona, gathering testimony and evidence from tribal leaders, litigators, and advocates about the barriers Native American communities continue to face when attempting to cast a ballot. These two hearings were not an exhaustive evaluation of the barriers faced by Native American voters but provided critical insight and testimony on the barriers faced by voters living on reservations

<sup>576</sup> Patty Ferguson-Bohnee, *The History of Indian Voting Rights in Arizona: Overcoming Decades of Voter Suppression*, Ariz. St. L. J. 47:1099 at p. 1103-4, see footnote 69:

Congress revised and codified the nationality laws of the United States. and the need for consultation with tribes when crafting voting laws. The Native American Rights Fund and their collaborative partners conducted a series of independent hearings and plan to publish their finding in a forthcoming report.

This chapter focuses on barriers to voting as expressed and experienced by the Native American community. Their barriers include: nontraditional addresses that lead to issues with voter ID laws, vote-by-mail, and voter registration requirements; lack of access to early voting, polling locations, and resources for on-reservation voting; vote dilution due to gerrymandering; and lack of language access materials and assistance in Native languages. Some barriers are similar to those experienced by non-Native voters and discussed elsewhere in this report, while others are unique to the experience of Native Americans.

### VOTING RIGHTS ACT PROTECTIONS FOR NATIVE AMERICANS

The Voting Rights Act of 1965 prohibited discrimination in voting on the basis of race.<sup>587</sup> As discussed earlier, Sections 4(b) and 5 of the Voting Rights Act required covered states to seek preclearance for changes to “any voting qualification or prerequisite to voting, or standard, practice, or procedure with respect to voting.”<sup>588</sup> Native American voters were included as a protected class when the federal government was reviewing proposed voting changes for potential discrimination.<sup>589</sup>

Subsequently, the 1975 amendments to the Voting Rights Act created Section 203 which required voting materials be provided in the language of the “applicable minority language group,” including Native Americans and Native Alaskans.<sup>590</sup> Section 203 includes a formula for determining which jurisdictions are required to provide bilingual materials and assistance.<sup>591</sup>

The 1992 amendments to the Voting Rights Act expanded the coverage formulas for language access to include not only jurisdictions where five percent of eligible voters have limited-English proficiency (LEP), but also those that have at least 10,000 LEP citizens who are members of a single language minority group. The amendments also expanded language access coverage formulas for Native Americans living on Indian Reservations.<sup>592</sup> Additionally, Section 208 allows a disabled or LEP individual to bring an assistant of their choosing to help them vote.

---

<sup>587</sup> Voting Rights Act of 1965, Pub. Law No. 89-110, Sec. 2.

“No voting qualifications or prerequisite to voting, or standard, practice, or procedure shall be imposed or applied by any State or political subdivision to deny or abridge the right of any citizen of the United States to vote on account of race or color.”

<sup>588</sup> 52 U.S.C. § 10304(a).

<sup>589</sup> *Id.*

<sup>590</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 34.

<sup>591</sup> *Id.*

<sup>592</sup> *Id.* at p. 36-37, citing James Thomas Tucker, Enfranchising Language Minority Citizens: The Bilingual Election Provisions of the Voting Rights Act, N.Y.U. J. Leg. & Pub. POL'Y 215 (2016), <http://www.nyulegis.org/wp-content/uploads/2012/11/TUCKER-ENFRANCHISING-LANGUAGE-MINORITY-CITIZENS-TEH-BILINGUAL-ELECTION-PROVISIONS-OF-THE-VOTING-RIGHTS-ACT.pdf>.

Arizona was brought under Voting Rights Act preclearance following the 1975 reauthorization, which expanded coverage to more fully include language minority populations, including Latino, Asian American, and Native American populations.<sup>593</sup> North Dakota was never covered under Sections 4(b) and 5, however, neighboring South Dakota was a partially-covered state, with two counties covered.<sup>594</sup>

Native Americans have been particularly hurt by the *Shelby County* decision, and it is clear that Section 2 litigation alone is not an adequate protection of the right to vote for tribal members. In North Dakota, Jacqueline De León testified that the lawsuit challenging North Dakota's discriminatory voter ID law in 2016 cost over \$1.1 million in plaintiff's attorneys' fees and litigation expenses and took thousands of attorney hours to develop.<sup>595</sup> Professor Ferguson-Bohnee testified that she has been involved in several Section 2 cases in the State of Arizona, including one after the 2000 redistricting cycle on behalf of the Navajo Nation and another regarding voter ID brought on behalf of the Navajo Nation and other Native American citizens in Arizona. She is also involved in ongoing litigation in Federal District Court regarding the lack of access to early voting, voter registration, and noncompliance with Section 203 of the Voting Rights Act.<sup>596</sup> However, Professor Ferguson-Bohnee went on to note that in the two decades she has been working on voting litigation in the State of Arizona, the Department of Justice has not initiated any cases on behalf of tribes.<sup>597</sup> Tribes have limited resources and Section 2 is not a viable replacement for Section 5 oversight given that a Section 2 case can cost up to \$1 million.<sup>598</sup>

## ONGOING BARRIERS FACED BY NATIVE AMERICANS

---

*"Native Americans do not have equal access to voter registration. Many voters must travel long distances off reservation to register to vote, in some cases 95 miles one way."*

— Patty Ferguson-Bohnee, Sandra Day O'Connor School of Law

---

### Nontraditional Addresses, Voter ID, and Vote-by-Mail

Many Native Americans living on tribal reservations lack traditional street addresses. This is a problem the Subcommittee heard in both North Dakota and Arizona. When states require voter IDs to have a street address rather than allowing Post Office Boxes, it disenfranchises voters who live in multi-family homes,

<sup>593</sup> U.S. Department of Justice, *History of Federal Voting Rights Laws: The Voting Rights Act of 1965* (updated July 28, 2017), <https://www.justice.gov/crt/history-federal-voting-rights-laws>.

<sup>596</sup> *Voting Rights and Election Administration in Arizona*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019); hearing transcript, Patty Ferguson-Bohnee at p. 54.

<sup>597</sup> *Id.* at p. 56.

<sup>598</sup> *Id.* at p. 55-56.

have unstable housing situations, or live in rural areas that have not been provided traditional street addresses.

For example, Professor Ferguson-Bohnee testified that, in Arizona only, “18 percent of reservation voters outside of Maricopa and Pima Counties have physical addresses and receive mail at home.”<sup>599</sup>

#### *North Dakota*

To vote in North Dakota, voters must present a residential address on one of the following IDs: a North Dakota Driver’s License or nondriver’s identification card, a tribal government ID, or an alternative form of identification prescribed by the Secretary of State, which included a student identification certificate or a long-term care identification certificate.<sup>600</sup> North Dakota’s voter ID law has been amended multiple times over the last several years. As the evidence below illustrates, these changes have a disparate impact on North Dakota’s Native American voters.

In 2011, concerns over disenfranchising voters led the state Senate, on a bipartisan basis, to vote 38-8 to reject changes to the state’s voter ID law that would have eliminated long-standing fail-safe provisions that provided critical protections, especially for Native American voters who lacked a qualifying residential street address.<sup>601</sup> However, following the 2012 election, in which Senator Heidi Heitkamp won the North Dakota Senate race, the state changed course, enacting strict changes to its voter ID requirement in 2013 and eliminating the fail-safe mechanisms that had protected voters.<sup>602</sup> Senator Heitkamp narrowly won her 2012 Senate race by less than 3,000 votes, or just fewer than one percentage point, which media outlets at the time and witnesses at the Subcommittee hearing attributed to the voters of the Native American community.<sup>603</sup>

The fail-safe mechanisms that were eliminated by the 2013 law had allowed a voter to cast their ballot if a poll worker could vouch for their identity or the voter signed an affidavit, under penalty of perjury, that they were qualified to vote.<sup>604</sup> This fail-safe system worked well, particularly for the tribal communities. Tribal leaders testified that their members serve as poll workers and can vouch for almost every person within their small communities.<sup>605</sup> Prior to passing the new law, the North Dakota state legislature failed to analyze whether the Native American voters who lacked addresses during the 2011 legislative debate still lacked

<sup>604</sup> *Id.* at p. 2.

<sup>605</sup> *Voting Rights and Election Administration in the Dakotas*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Charles Walker at p. 2.

addresses in 2013.<sup>606</sup> In fact, the state still had data from previous legislative debates indicating that many Native Americans lacked proper street addresses.

The legislature nevertheless passed a law restricting the acceptable forms of ID and eliminating the poll worker voucher and affidavit fail-safes, aware that such a requirement would disenfranchise Native American voters. Indeed, many Native American voters continue to lack addresses to this day.<sup>607</sup> Jacqueline De León testified that the legislature used a hoghouse amendment, a parliamentary procedure in which an unrelated bill was replaced with the voter ID bill, for the purposes of enabling the legislature to pass the bill without public hearings.<sup>608</sup> North Dakota State Representative Corey Mock objected to the passage of the bill without debate because it would “completely change the way North Dakota handles voters” and circumvent input from the public and agencies impacted by the bill.<sup>609</sup>

In the 2015 legislative session, North Dakota again amended its voter ID laws, further restricting the forms of acceptable ID.<sup>610</sup> In 2016, NARF filed suit on behalf of Turtle Mountain plaintiffs that were disenfranchised by the laws.<sup>611</sup> The U.S. District Court in North Dakota found for the voters, finding the law violated both the U.S. and North Dakota constitutions as well as the Voting Rights Act and required North Dakota to provide a fail-safe mechanism for the 2016 election.<sup>612</sup>

---

*“Bottom line, members of Standing Rock Sioux Tribe feel that the North Dakota ID law was meant to target them and dissuade them from exercising their constitutional right to vote. It was hurtful to our members to be excluded this way, and our community remains outraged.”*

— Charles Walker, Standing Rock Sioux Tribe

---

In April 2017, the North Dakota enacted H.B. 1369, preserving the previously enacted strict voter ID requirements, requiring a street address, and failing to preserve the affidavit option as required by the court.<sup>613</sup> The legislature instead allowed for a provisional ballot.<sup>614</sup> While a provisional ballot would allow voters without a proper ID to cast a ballot, the ballot would ultimately be thrown out if the voter could not return with a qualifying ID within six days of the election.<sup>615</sup> This failed to address disenfranchisement concerns for

<sup>606</sup> *Voting Rights and Election Administration in the Dakotas: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Jacqueline De León at p. 3; see also *Brakebill First Amend. Compl.* ¶ 64.

<sup>607</sup> The Legislature required residential addresses despite being warned in the previous Legislative session by Deputy Secretary of State Jim Sillirum that Native Americans in particular would be disproportionately impacted by such a change.”

<sup>608</sup> *Id.* at p. 3.

<sup>609</sup> *Id.* at p. 3; see also *Brakebill First Amend. Compl.* ¶ 54-59.

<sup>610</sup> *Id.* at p. 3.

<sup>612</sup> *Id.*

<sup>613</sup> *Id.* at p. 4-5.

<sup>614</sup> *Id.*

<sup>615</sup> *Id.*

voters who are otherwise qualified to vote but could not obtain a qualifying ID or who had no residential address to put on an ID.<sup>616</sup> NARF again filed suit on behalf of voters. Ultimately, on September 27, 2018, the Court denied an emergency appeal and allowed a decision by the Eighth Circuit Court of Appeals to stand, allowing the state to implement the strict voter ID for the 2018 election.<sup>617</sup>

The law in place for the 2018 election required a residential address and did not allow for the use of a Post Office Box. The impact on Native American voters and response from the community was significant. Tribal leaders, litigators, and advocates testified about the barriers requiring a residential street address places on their tribal members. The resources marshalled to ensure voters received an ID, compounded with the burden it placed on the tribes to comply, amounted to an unfunded mandate and a poll tax.

Chairwoman Myra Pearson of the Spirit Lake Tribe said, “many of our members struggle with housing instability, unemployment, and poverty.”<sup>618</sup> The Candeska Cikana Community College estimated in September 2014 that there are approximately 300 homeless people residing on or around the Spirit Lake reservation, but that estimate may be an undercount, as not all homeless tribal members sign up for housing assistance.<sup>619</sup> A 2015 survey of 285 people living on the Spirit Lake Reservation indicated that 38 percent of people have an income under \$5,000, and 73 percent have an income less than \$20,000 per year.<sup>620</sup>

Many parts of the Spirit Lake reservation have not been provided acceptable forms of street addresses and many members do not have ID, nor do they need one to live their lives.<sup>621</sup> If members do have IDs, they are predominantly tribal IDs that list a Post Office Box. The United States Postal Service does not deliver to certain parts of the reservation, and if the county 911 coordinator has assigned a residential address to someone’s home, they may never be notified of that address.<sup>622</sup>

---

*“The Tribe does not have the resources  
to indefinitely provide adequate IDs to  
tribal members in order to vote in all  
future elections.”*

— Chairwoman Myra Pearson, Spirit  
Lake Tribe

---

Chairwoman Pearson testified to the effort undertaken by the Tribe to ensure every possible voter obtained state sanctioned ID. Between October 22, 2018 and November 8, 2018, the Tribal Enrollment Office was open overtime. Robin Smith, Director of the Enrollment Department for the Spirit Lake Tribe, worked 21.25 hours of overtime, costing the Tribe additional money in overtime

<sup>616</sup> *Id.* at p. 5.

<sup>617</sup> *Id.* at p. 6.

<sup>618</sup> *Voting Rights and Election Administration in the Dakotas: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Chairwoman Myra Pearson at p. 1.

<sup>619</sup> *Id.* at p. 1.

<sup>620</sup> *Id.*

<sup>621</sup> *Id.*

<sup>622</sup> *Id.*

pay for the Director of the Enrollment Department.<sup>623</sup> The Tribe also waived the traditional \$11 fee for the ID.<sup>624</sup>

The Spirit Lake Tribe purchased a new printer and supplies, incurring costs upwards of \$3,500.<sup>625</sup> The Tribe issued 665 ID cards between October 22 and November 8.<sup>626</sup> Typically, the Tribe issues approximately 30 IDs per month. The fee waiver cost the Spirit Lake Tribe \$7,315 in income.<sup>627</sup>

Issuing IDs also proved difficult. When tribal staff encountered an individual without a street address, staff would attempt to determine an address or contact a 911 coordinator.<sup>628</sup> If an applicant was homeless or relied on a Post Office Box, staff would attempt to determine where

*“... we are not a wealthy tribe, we have scrapped and scrimped to survive these past 200 years. With this understanding the government waived fees for Tribal Identifications to meet the requirements to allow our members to vote.”*

— Alycia LaCounte, Turtle Mountain Band of Chippewa Indians

the individual stayed most recently and most often.<sup>629</sup> One tribal member made three separate visits to finally obtain an acceptable address.<sup>630</sup> Given that Spirit Lake tribal IDs expire every five years and many residents move frequently, there are concerns the voter ID law will disenfranchise tribal residents and continue doing so in a discriminatory manner.

The Turtle Mountain Band of Chippewa Indians faced similar struggles. Unemployment on the Turtle Mountain reservation hovers at 69.75

<sup>623</sup> *Id.* at p. 2.

<sup>624</sup> In order to ensure that its members had valid IDs the Tribe chose to extend its hours at the Tribal Enrollment Office. Between October 22, 2018 and November 8, 2018, the enrollment office was open from 8:00AM until as late as 7:00PM, depending on need. Robin Smith, the Director of the Enrollment Department for the Spirit Lake Tribe, had to work through her lunch break on a regular basis in order to ensure that needs were met. Ms. Smith worked a total of 21.25 hours of overtime between this timeframe at a rate of \$37.50/hr., which cost the Tribe an additional \$796.88.”

<sup>629</sup> *Id.* at p. 2.

<sup>630</sup> “There were several difficulties in issuing the IDs. For instance, if a person was homeless or relied on a P.O. Box number because they did not have a consistent address, the enrollment staff would have to find out where the individual stayed most recently and most often. Usually, the individual would give a relative or a friend’s house. Enrollment staff would then have to look up the relative or friend and verify with that person that the individual had stayed there. In other instances, members would arrive and not know their physical address. In those circumstances, enrollment staff had to assist the member in determining their physical address. This process involves checking internal records about the physical addresses of other members that live at the same residence. If that did not determine an address, staff would then call the Benson County 911 coordinator to determine the address or have an address assigned.”

<sup>631</sup> *Id.* at p. 3.

percent, along with a high poverty rate.<sup>631</sup> To ensure members could vote in the 2018 election, the Tribal government enacted a law enabling voters to receive tribal IDs for free.<sup>632</sup> Generally, Turtle Mountain Tribal IDs cost \$15.<sup>633</sup> As discussed in Chapter 2, \$15 may not seem like a significant expense, but to a tribal member it can mean a week's worth of milk and bread.<sup>634</sup> The Tribe issued 2,400 new ID cards,<sup>635</sup> at an estimated cost of at least \$36,000.

---

*"The first day of free tribal IDs our ID machine melted down the actual physical IDs because it became too hot. As a result, we sought assistance through any means necessary, social media, news outlets, and moccasin telegraph."*

— Alysia LaCounte, Turtle Mountain Band of Chippewa Indians

---

Alysia LaCounte testified that the use of addresses and street names began only recently on the Turtle Mountain Reservation – “uniform addressing, and numbering of residences only occurred within the last ten years.”<sup>636</sup> Most private residences still lack a house number. The Tribe experienced numerous technical difficulties issuing 2,400 IDs. Still, the Tribe undertook significant efforts to ensure everyone who wanted one could obtain an ID and vote. The Tribal college opened a help line, the Tribe purchased new machines to produce the IDs and placed them

throughout the community, staff worked 14 hours a day for two weeks before the election, and they held get-out-the-vote rallies.<sup>637</sup> Organizing a response to this discriminatory law required a great amount of time and resources.

The people of Mandan Hidatsa and Arikara Nation (“MHA Nation”) faced similar obstacles. The MHA Nation has more than 5,600 members of voting age that live on or near the Reservation.<sup>638</sup> Until 2016, the Tribe allowed members to list a Post Office Box as their address on their tribal ID cards, as MHA Nation also has parts of the reservation with homes without assigned street addresses.<sup>639</sup> Following the decisions of the Eighth Circuit Court of Appeals and the Court, the Tribe began allowing tribal members to exchange their IDs with Post Office Boxes for new IDs with residential street addresses free of charge.<sup>640</sup> Shortly thereafter, the Tribe began issuing new, free tribal IDs to members for any reason.<sup>641</sup>

*“Once again, the MHA Nation was forced to bear the burden of federal laws, policies and decisions giving improper authority to the State over elections on our Fort Berthold Indian Reservation.”*

— Roger White Owl, MHA Nation

---

*“In many cases we could not identify an address for someone even when looking at a map of their house. Or, they may have given me a family member’s house address where they are currently staying. This is not voter fraud. This is the result of unworkable state laws being applied to our Reservation.”*

— Roger White Owl, MHA Nation

---

Roger White Owl, Chief Executive Officer of MHA Nation, testified their efforts were slowed by a lack of staff resources to do the unexpected work and significant distances separating communities.<sup>642</sup> Between September 24, 2018 and November 6, 2018, MHA Nation issued 456 new IDs. In contrast, they typically issue about 150 to 200 IDs a month.<sup>643</sup> Mr. White Owl testified, “some tribal members had to drive for hours just to get a new ID.”<sup>644</sup> MHA Nation estimated about 75 to 80 percent of the tribal members who received a new ID leading up to the election did not have an ID that complied with North Dakota’s law.<sup>645</sup> Furthermore, the addresses on the new IDs may not be accurate in future years, as “about one in four tribal members who came in for a new ID did not know their residential address.”<sup>646</sup>

Despite these efforts, Mr. White Owl said roughly one-third of MHA Nation members still do not have a tribal ID. The Tribe was also unable to count the number of members who never received a new ID, were discouraged from voting, or were unable to vote due to the new voter ID law.<sup>647</sup> In addition to the ID barriers voters were required

---

<sup>642</sup> *Id.*

<sup>643</sup> *Id.*

“Between the time of the Eighth Circuit decision and the November 6, 2018 election our Tribal Enrollment Office issued 456 new IDs to tribal members. Normally we issue about 150 to 200 IDs a month. This burdened our system, limited our ability to provide other important services to tribal members, and the MHA Nation absorbed the cost of issuing these IDs. We estimate the about 75 to 80 percent of the tribal members who received a new ID during this time did not have another form of ID that would have complied with North Dakota’s law. Even with all of this additional work, about one-third of our members still do not have a tribal ID.”

<sup>644</sup> *Id.*

<sup>645</sup> *Id.*

<sup>646</sup> *Id.*

“In addition, many of the current residential addresses that we used to make these IDs may not be accurate in future years. About one in four tribal members who came in for a new ID did not know their residential address. In many cases we could not identify an address for someone even when looking at a map of their house. Or, they may have given me a family member’s house address where they are currently staying. This is not voter fraud. This is the result of unworkable state laws being applied to our Reservation.”

<sup>647</sup> *Id.* at p. 3.

to surmount, MHA Nation had to provide buses to bring voters to the polls after two polling locations were closed, requiring some members to travel 30 to 45 miles to vote.<sup>648</sup>

The people of the Standing Rock Sioux Tribe faced a similar challenge. Charles Walker testified that many people on Standing Rock do not have an ID because “it is simply not necessary for everyday life.”<sup>649</sup> The family poverty rate in Sioux County, North Dakota, is 35.9 percent.<sup>650</sup> The nearest driver’s license site is approximately 40 miles away.<sup>651</sup> Generally, unless a member is elderly, the Tribe charges for an ID to fund the cost of staff time and printing.

The United States Postal Service does not always operate in the rural areas of the Standing Rock Reservation. Like other reservations, many members use and share Post Office Boxes, many of the homes are not marked with house numbers, and many streets lack signage. Even if the state government has an address listed for a residence, it may never have been communicated to the homeowners.<sup>652</sup> Charles Walker testified the state also uses multiple addressing systems, so an address may be different across different government agencies.<sup>653</sup> Additionally, Alyisia LaCounte testified that the 911 system fails to enumerate unit numbers, making proper addressing difficult.<sup>654</sup> Chairwoman Pearson testified that she has lived at the same home for more than 20 years, and a company could not verify her address for a delivery.<sup>655</sup> A significant portion of the population also moves from home to home because they do not have housing of their own, meaning they do not have a consistent address even if they remain within the reservation.<sup>656</sup>

During the 2018 election cycle, the Standing Rock Sioux Tribe waved a \$5 fee usually charged to members under age 60 for a new ID. The Tribe issued 807 new tribal IDs between October 15, 2018, and November 6, 2018.<sup>657</sup> During this time, the Tribe would have charged a fee for 486 of those IDs. As a result, the Tribe lost nearly \$2,500 in income and spent almost \$500 to print them.<sup>658</sup> Previously, the Fort Yates office printed an average of only 47 IDs per month.<sup>659</sup>

—Charles Walker, Standing Rock Sioux Tribe

---

been an issue with it before with more lenient voter ID laws.<sup>660</sup> Implementation of a strict voter ID requirement runs counterintuitive to North Dakota’s lack of a voter registration requirement,<sup>661</sup> and witnesses at the hearing reiterated that they do not want a voter registration requirement.<sup>662</sup>

There is also evidence the new fail-safe mechanism does not address the problems faced by Native American voters. While the law allows voters to supplement a non-qualifying ID with a utility bill, bank statement, check, or government issued document, this fails to address the issues faced by voters who could not reasonably obtain an ID or who had no residential address to place on the ID.<sup>663</sup> If the issue is a lack of residential address, the voter likely does not have a utility bill or other document addressed to that address.<sup>664</sup> Each tribal leader who testified at the North Dakota field hearing highlighted the high levels of housing insecurity, homelessness, and poverty experienced by residents on their reservations. These factors contribute to the likelihood that residents will not have utility bills with an address on them.

Additionally, if a voter casts a set-aside ballot on Election Day because they could not obtain an address in time for the election, there is little evidence suggesting they would be able to do so in the six days following the election as the law now requires.<sup>665</sup>

The state failed to offer any resources to help tribes provide IDs that complied with the new law. Mr. Walker testified that the state has not offered any money or assistance in complying with the law, no effort to update the addressing system, make it 911-compliant, or mark unmarked homes.<sup>666</sup> Additionally, there was a lack of communication between tribes and the state as to what addresses the state would accept.

---

<sup>660</sup> *Id.* at p. 4.

<sup>661</sup> North Dakota is the only state without a voter registration requirement.

<sup>663</sup> *Voting Rights and Election Administration in the Dakotas:* Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Jacqueline De León at p. 5.

<sup>664</sup> *Id.* at p. 4.

<sup>665</sup> Further, the “failsafe mechanisms” in the latest iteration of the voter ID law do not actually address the problems that Indian voters face. If the problem is simply a lack of legitimate residential address, they likely do not have a utility bill or some other document addressed to that address. The same is true for the set-aside ballots; if a voter couldn’t obtain an address in time for the election, there is little evidence to suggest that they would be able to do so in the six days following the election.”

<sup>666</sup> *Id.* at p. 4.

<sup>666</sup> *Id.* at p. 5.

The North Dakota legislature claimed changes to the voter ID law were necessary to prevent voter fraud. None of the witnesses testifying at the North Dakota field hearing cited any risk of voter fraud. In fact, the Subcommittee heard the opposite – “There is little to no risk of voter fraud on the Standing Rock Reservation, and there has never

---

#### *Arizona*

The State of Arizona is home to 22 federally recognized Native American Tribes and 21 reservations.<sup>667</sup> Roughly 27 percent of the land in the state is tribal land, and more than five percent of the state’s population is Native American.<sup>668</sup> The poverty rate for Native Americans in Arizona is 35.7 percent.<sup>669</sup> Comparatively, Non-Hispanic Whites in Arizona experience a poverty rate of 10.9 percent.<sup>670</sup> Native Americans in Arizona are more likely to work multiple jobs, lack reliable transportation, and lack adequate childcare resources.<sup>671</sup> These factors,

when compounded with barriers erected by the state, can impact a Native voter’s ability to access the ballot.

Native Americans in Arizona also face significant homelessness or near homelessness due to extreme poverty and a lack of affordable housing.<sup>672</sup> Many residents also lack traditional street addresses. In Arizona, only 18 percent of reservation voters outside of Maricopa and Pima Counties have physical addresses and receive mail at home.<sup>673</sup> Many Native American voters in Arizona, similar to North Dakota, rely on Post Office Boxes to receive their mail. Some tribal members must travel up to 140 miles round trip to receive mail.<sup>674</sup>

Professor Ferguson-Bohnee testified the lack of formal addresses in Indian Country makes it “especially hard for voters to comply with address requirements to register to vote or to produce identification in order to vote on Election Day.”<sup>675</sup> President Jonathan Nez, of the Navajo Nation, testified a majority of Navajo citizens residing on the reservation do not have traditional street addresses, with the reservation having at least 50,000 unmarked properties.<sup>676</sup>

*“Some of the highest rates of near homelessness and overcrowding in Indian Country is found in Arizona. This lack of permanent housing impacts the ability of these tribal members to have a permanent physical address, yet this should not impede their ability to exercise their right to vote.”*

— Patty Ferguson-Bohnee, Sandra Day O’Connor School of Law

---

“a discrepancy in the state or county location between an individual’s [Post Office] Box and their physical residence leads to difficulties for individual Navajos in registering to vote.”<sup>680</sup> Multiple family members also share Post Office Boxes, which can lead to lost or delayed ballots and other voter notifications. Additionally, the number of Post Office Boxes per location is limited.

If a voter is unable to secure a Post Office Box or is removed from their family box, they may have to travel 30 to 40 miles to the next closest post office, at times in addition to the 30 miles they already traveled to reach their local post office.<sup>681</sup> President Nez testified that some Navajo citizens must drive more than 100 miles to register to vote.<sup>682</sup> Governor Stephen Roe Lewis, of the Gila River Indian Community, testified that non-traditional addresses and inaccurate poll address lists present barriers to voting for their members as well. Governor Lewis testified, “Reservation voters in Maricopa County were assigned standard addresses prior to the 2012 General Election, which changed their voting precincts. Unfortunately, these changes were neither communicated in advance nor delivered clearly to voters.”<sup>683</sup> This resulted in frustrated voters being turned away from the polling location without casting a ballot. In very few instances, voters cast a provisional ballot.<sup>684</sup>

The move toward mail-in ballots, online registration, and voting centers in Arizona has a significant impact on Native American voters. As has been discussed extensively, Native

Arizona’s voter registration forms allow a space for an individual to draw a map location of their home, but these maps often do not allow for enough detail to properly locate their residence, resulting in registrars assigning voters to incorrect precincts.<sup>677</sup> Incorrect precincts can result in longer travel times, the county rejecting ballots, or the county failing to process their registration form.<sup>678</sup>

For residents of the Navajo Nation, which spans three states, a voter’s Post Office Box could be in a different state or county than their residence.<sup>679</sup> President Nez stated that

<sup>677</sup> *Id.* at p. 1.

<sup>684</sup> *Id.*

voters living on reservations have limited access to adequate addressing, Post Office Boxes, and postal services that limit utilization of vote-by-mail. Additionally, less than half of homes on tribal lands in Arizona have reliable broadband internet access, limiting access to online voter registration for Native Americans living on reservations.<sup>685</sup> Individuals with non-traditional addresses cannot use the online voter registration system.<sup>686</sup>

Voter ID is also a problem for Native American voters in Arizona. Even valid tribal IDs can be (and are) rejected on Election Day due to insufficient poll worker training or issues arising from nonstandard addresses.<sup>687</sup> During the 2006 election, 428 Navajos voted using provisional ballots that went uncounted because they could not verify their identification.<sup>688</sup> The Navajo Nation sued, alleging a violation of Section 2 and the case was settled to expand the acceptable forms of ID.<sup>689</sup> Governor Lewis explained that, in 2012, voter ID laws were strictly enforced on the Pinal County portion of the Reservation and “many Community voters were turned away from the polls when their address did not match the voter rolls at the polls.” In very few instances, voters were offered and allowed to cast a provisional ballot, but the majority who were turned away were denied a ballot altogether.<sup>690</sup> It was later discovered that Community members’ addresses did not match the rolls because the County had reassigned the physical addresses of all Community voters to match the service center where they vote, and no voter’s address matched the rolls.<sup>691</sup>

In 2019, the State enacted a law requiring voters show ID if they vote early in-person, resulting in an additional burden on voters who chose in-person early voting as opposed to voting by mail. Previously, voters could vote early in-person without showing an ID. Voters who vote early by mail still do not have an ID requirement.<sup>692</sup> Professor Ferguson-Bohnee testified this violates equal protection and disproportionately impacts Native American voters, specifically Native language speakers who only receive language assistance in person.<sup>693</sup> Professor Ferguson-Bohnee also testified that poll workers sometimes provide voters provisional ballots without telling voters it will not count if they are in the wrong precinct.<sup>694</sup>

In addition to proper addressing issues, Election Day is a culturally significant event for tribal members. President Nez testified that “when there is a day of elections, it is a day to bring everybody together, to catch up with family member(s), to catch up on politics, and it

<sup>694</sup> *Voting Rights and Election Administration in Arizona: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Patty Ferguson-Bohnee at p. 7.

is really a social event.”<sup>695</sup> The Navajo Nation held Navajo elections alongside County, State, and Federal elections. State Senate Bill 1154, which would change the elections to the first Tuesday in August, significantly impacts voter turnout and tribal elections, because tribes will be forced to move their elections to maintain voter turnout or Tribal members will have to travel to vote two times a year.<sup>696</sup>

Election Day is similarly important to the Gila River Indian Community—it centers around family and community.<sup>697</sup> The Tribe sponsors traditional meals at polling sites while community members “proudly come out and vote as their right as U.S. citizens but also members of sovereign nations[.]”<sup>698</sup> Governor Lewis testified that a significantly smaller percentage of Gila River Indian Community members vote by mail than among the general population.

Recently, Arizona enacted H.B. 2023, which prohibits the gathering of ballots and places heavy penalties on individuals who turn in ballots other than their own unless they meet certain stringent exceptions – like being a family member or caretaker. Proponents of this ban argue it is intended to combat voter fraud, however neither President Nez nor Governor Lewis had ever heard of issues relating to voter fraud on their respective reservations.<sup>699</sup> When questioned about how significant a problem “ballot harvesting” is in Arizona at the Arizona Field Hearing, State Senator Michelle Ugenti-Rita stated that “maybe a dozen” people came to speak with her about the alleged problem of “ballot harvesting” before she created the current law.<sup>700</sup> The

<sup>698</sup> *Id.*

<sup>699</sup> *Id.* at p. 28-29.

<sup>700</sup> *Voting Rights and Election Administration in Arizona*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), hearing transcript, State Senator Michelle Ugenti-Rita at p. 75-76.

“Chairwoman Fudge: ... Secondly, and I think, to the senator, I understand clearly what you have been saying to me. I am just curious; how many people came to you about the harvesting that it was so important an issue that you needed to take it to make a law?”

**Ms. Ugenti-Rita:** Yes. Thank you, ma’am. Generally speaking, probably maybe a dozen.

**Chairwoman Fudge:** And what is the size of the State of Arizona?

**Ms. Ugenti-Rita:** It is — the population?

**Chairwoman Fudge:** Yes.

**Ms. Ugenti-Rita:** 6.5 million, but there is no correlation between the two, if that is what you are trying to —

**Chairwoman Fudge:** Well, no. That is your decision. My thinking is that if 12 people come, and you are going to make a law that affects 6-1/2 million people, I think that that is a problem, but that is just — I am not asking to debate it. That is my opinion.

The other thing that I really do want to address, and I am solely truly not trying to pick on you, but you just have said some things that I think concern me. Let me just say to you that mailing a bill is not a right. Voting is. You cannot compare those two things, because voting is a right given to us by the Constitution — I am not asking you a question — by the Constitution of the United States. And I can promise you that if my neighbor wanted me to mail their bill, I could, but I can’t take their ballot. You cannot compare those two things.

Because what I know is there was a time in this Nation where being a good neighbor meant something. We helped elderly people. We helped sick people. We helped the people who were disabled. We helped people. Now what we have done is say, I can’t help you if you have a problem. That is — and I don’t see that harvesting has been a major problem anywhere other than in North Carolina. It is the only place that I am aware of that it ever has been a problem. So, we continue to find solutions for problems that don’t exist.”

population of the State of Arizona is approximately more than 7 million people.<sup>701</sup>

Similarly, at the time North Dakota was contemplating a voter ID requirement in 2013, there were also no instances of voter fraud during the 2012 election.<sup>702</sup> There were only two probable cases of double voting arising during the 2016 election.<sup>703</sup>

Additionally, President Nez and Governor Lewis raised a concern that laws enacted without consideration of cultural differences can disenfranchise tribal voters. The definition of “family” is different for Native American families than it is for Anglo-centric families. Barring certain individuals from turning in ballots without input from the tribes has a deleterious effect on their ability to participate in government and the democratic process.<sup>704</sup>

#### *Alaska*

The Alaska State Advisory Committee to the U.S. Commission on Civil Rights included an evaluation of Alaska’s proposed shift to vote by mail and its potential impact on Alaskan Native voters. The Committee included findings in its recent report despite the state’s position that it is not moving to a vote-by-mail process at this time. As a shift toward vote by mail has happened elsewhere across the country, it is important that jurisdictions evaluate how this change would impact the most rural communities in America.

Mail delivery is a significant issue in Alaska. The State Advisory Committee reported serious concerns regarding the interest in vote by mail, as mail delivery is slow in Alaska and can take up to two to three weeks.<sup>705</sup> Mail delivery often relies on air service, and testimony before the State Advisory Committee revealed that some villages may be inaccessible by air for several weeks at a time due to inclement weather.<sup>706</sup> Voters faced similar issues with Post Office Boxes as expressed by rural tribal communities in Arizona. Post Office Boxes are often shared, sometimes with multiple families. As such, voters may not be receiving sufficient or complete election-related materials.<sup>707</sup>

The United States Postal Service transfers mail from villages to a central hub in Anchorage, where it is then postmarked. Rural residents who vote in a village and mail their ballot on time may not have their ballots counted because they are postmarked late.<sup>708</sup> A shift to vote by mail requires reliable postal services, which many rural voters cannot access. States conducting elections via vote-by-mail are still required to comply with Section 203 language requirements. Prior to implementing a vote-by-mail system, tribes must be consulted to ensure their voters can avail themselves of all necessary avenues to cast a ballot and receive that ballot adequately translated.

## LACK OF ACCESS TO THE POLLS AND RESOURCES

The closing of polling locations, lack of on-reservation sites, distance from reservations, and lack of resources can impose unreasonable difficulties for Native Americans seeking to cast a ballot.

During the 2018 elections, two long-standing voting locations were closed within the Fort Berthold Reservation in North Dakota.<sup>709</sup> North Dakota State Representative Buffalo argued that if the state's elected representatives "more accurately reflected the MHA people, they would have known that these were important voting sites and would not have shut them down."<sup>710</sup>

In Arizona, eight tribes are located across two or more counties, subjecting one reservation to two or more sets of local election policies. Four reservations span three counties, increasing the disparate standards of election requirements with which they must comply and compounding the difficulties for tribal voters.<sup>711</sup> In parts of the Navajo Nation, only one in 10 families owns a vehicle, limiting transportation options and access to services.<sup>712</sup>

---

*"One of the most egregious examples of lack of access to in-person early voting involves the Kaibab Paiute Tribe. Kaibab Paiute residents must travel over 280 miles one way to participate in early voting. These voters do not have a polling location on or near the reservation on Election Day."*

— Patty Ferguson-Bohnee, Sandra Day O'Connor School of Law

---

President Nez highlighted how transportation challenges affect a voter's access to the polls, especially when polling places are located at great distances. In 2018, Apache County had only two early voting locations on the Navajo Nation, in the southern part of the reservation.<sup>713</sup> Community members from the Teec Nos Pos Chapter of Navajo Nation, located near the Utah border, were forced to drive 95 miles each way to cast an early ballot.<sup>714</sup>

The Leadership Conference's report on polling place closures found that Arizona closed 320 polling locations

<sup>713</sup> *Id.*

<sup>714</sup> *Id.*

since 2012.<sup>715</sup> After *Shelby County*, Arizona is no longer required to analyze and report on the potential disparate impact of these closures on Native American voters. Nearly every county has closed polling places since preclearance was removed.<sup>716</sup> Professor Ferguson-Bohnee testified that, while every county has in-person early voting off-reservation, there are limited opportunities for in-person early voting on-reservation.<sup>717</sup> In 2016, 10 reservations had some form of in-person early voting. Only five reservations had in-person early voting in 2018.<sup>718</sup>

A lack of adequate resources is a common issue heard from tribal witnesses. Four Directions, Inc.,<sup>719</sup> sued and assisted in suits in multiple states after state and county public officials refused to provide satellite voting offices on American Indian Reservations, violating Section 2 of the Voting Rights Act.<sup>720</sup> The court found in *Sanchez v. Cegavske* that tribes and tribal citizens are not required to fund equal access to the ballot box by counties,<sup>721</sup> O.J. Semans testified Four Directions has found “Secretaries of State and local officials do not believe they are under any obligation under Section 2 to provide equal access to in-person voter registration locations, in-person early voting locations, and in-person Election Day polling places on American Indian Reservations.”<sup>722</sup> Voting options such as mail-in ballots are not an adequate substitute for access to polling locations and early voting, and a lack of these alternatives disenfranchises Native voters.

Four Directions was successful in 2014, and to the present, in persuading the South Dakota Board of Elections to utilize HAVA funds to pay for satellite voting offices on Indian Reservations in South Dakota.<sup>723</sup> However, Mr. Semans detailed several instances in which officials declined to establish satellite voting locations on reservations, both with funding offered and without, even when voting locations are available to state residents not living on reservations.<sup>724</sup> Mr. Semans testified that Standing Rock Chairman Mike Faith made a written request to North Dakota Secretary of State Jaeger to establish early voting on Standing Rock – which was available in Fargo, Bismarck, Manda, Grand Forks, and Minot, North Dakota – on October 28, 2018.<sup>725</sup> Secretary Jaeger declined the request, highlighting a need for Congress to act by providing HAVA funding for Indian Country. Mr. Semans recommended Congress

<sup>725</sup> *Id.* at p. 8.

appropriate additional HAVA funds explicitly for “in-person equal access to the ballot box for Native voters living on tribal lands.”<sup>726</sup>

President Nez testified there are limited resources available for providing information to Navajo citizens. The Navajo reservation is rural, and they lack broadband capability to allow for better information on elections and changes in election law.<sup>727</sup> Governor Lewis highlighted the need for improved poll worker training. The Gila River Indian Community found “numerous instances of poll workers not even offering provisional ballots as an option for Community members” when issues arise.<sup>728</sup> Proper training along with cultural sensitivity could address these election administration issues to ensure tribal voters can cast their ballot with assistance from poll workers.

At the Subcommittee’s hearing in Washington, D.C., USCCR Chair Catherine Lhamon testified that the Native American Rights Fund highlighted one polling place which was moved away from a village. As a result, Native Alaskan voters’ only option to travel to their polling place was by plane.<sup>729</sup> A 2015 investigation by the Department of Justice found Native voters had to travel farther distances than White voters in a number of states.<sup>730</sup> Subsequently, the Department of Justice proposed legislation to require jurisdictions “whose territory includes part or all of an Indian reservation, an Alaska Native village, or other tribal lands to locate at least one polling place in a venue selected by the tribal government,” and to require an equal number of resources at those polling sites.<sup>731</sup> This bill, known as the Native American Voting Rights Act, has yet to pass Congress.

In the Alaska State Advisory Report, the State Committee noted that some rural Alaska Native villages have unreliable internet service or may lack access to broadband internet, which is often necessary to meaningfully participate in elections. The Report highlighted that “an Alaska Native elder walked two miles from her home to the nearest public library that had internet access to download the necessary election forms to participate in early voting.”<sup>732</sup>

## VOTE DILUTION

Representative Ruth Buffalo is the only Native American representative in the North Dakota State House. The district she represents is 370 miles from her traditional homelands of the

Fort Berthold Reservation.<sup>733</sup> She testified that if she were to run for elected office on the Fort Berthold Reservation, the district would not be majority Native American due to the way the district is drawn, as the White population overwhelms the Native population.<sup>734</sup> Furthermore, the reservation is divided into six counties, effectively diluting the Native American presence to the point that they have no representation among county seats.<sup>735</sup>

In Arizona, tribes have fought to preserve the sole majority-minority Native American state legislative district.<sup>736</sup> In the 2010 redistricting cycle, Arizona's Redistricting Commission consulted an expert to ensure district maps did not retrogress. As a result, Arizona's maps received preclearance on its first submission for the first time since it became a covered jurisdiction.<sup>737</sup> There is concern that the Commission might not consider retrogression in the next cycle, as the state is no longer required to seek preclearance approval, leading to tribal communities losing their limited opportunity for elected representation.<sup>738</sup>

## LANGUAGE ACCESS

### Arizona

In Arizona, the language access provisions of Section 203 of the Voting Rights Act mandate coverage of several Native languages for minority language access assistance.<sup>739</sup> In 2000, Arizona was required to provide bilingual registration and voting materials in six different Native American languages, while after 2015 only two were still required.<sup>740</sup> Arizona is currently required to provide language assistance for Navajo and Apache speakers.<sup>741</sup>

The Navajo language is widely spoken by Navajo voters and is covered under Section 203 of the Voting Rights Act.<sup>742</sup> The State is required to provide all elections materials in English and Navajo. Professor Ferguson-Bohnee testified only one of nine covered jurisdictions in 2016 subject to Section 203 for Native American languages provided translated voter registration

information in the covered language.<sup>743</sup> Furthermore, “potential voters had to travel 95 miles one way to obtain in-person voter registration assistance.”<sup>744</sup>

Written language materials are only one form of assistance. Some Native languages are not traditionally written, they are spoken. Moving to predominantly vote-by-mail and providing voting materials in only written translations disenfranchises voters who need a physical polling place so voters can obtain oral language assistance.<sup>745</sup>

### Alaska

In a recently submitted report, the Alaska State Advisory Committee to the U.S. Commission on Civil Rights examined Alaska’s implementation and compliance with the *Toyukak v. Mallott* settlement and order related to language access.<sup>746</sup> Alaska has been required to provide language access materials to limited-English proficiency voters since the 1975 extension of the Voting Rights Act. Alaska was subject to statewide Section 5 requirements at the time of *Shelby County*.<sup>747</sup> In the last 30 years, Alaska has undergone, and lost, two court cases regarding compliance with Section 203.<sup>748</sup>

In July 2013, two Alaska Native citizens and four tribal governments sued the Lieutenant Governor of Alaska and the Division of Elections for failing to provide effective language assistance to limited-English proficient Alaska Native voters in certain areas covered by Section 203.<sup>749</sup> They alleged the state failed to produce an Official Election Pamphlet and other pre-election information in any of the covered Alaska Native languages, effectively denying an opportunity to meaningfully participate in elections.<sup>750</sup> The State reached a settlement to provide materials in Yup’ik and Gwich’in and make additional election administration changes.<sup>751</sup>

During the August 2016 primary election, federal observers visited 19 villages and found no translated voting materials available in six villages, while others were severely lacking in

<sup>751</sup> *Id.*

translated materials.<sup>752</sup> Observers returned for the general election and found six of 12 polling locations had no translated sample ballot for voters. Testimony before the State Advisory Committee noted that while progress has been made, much work still needs to be done.<sup>753</sup>

## CONCLUSION

It was not until 1924 that Native Americans gained equal citizenship and the right to vote. Despite this, Native American voting rights were not fully affirmed until the Court outlawed literacy tests in 1970. Today, Native American voters still face barriers to their full and equal exercise of the franchise.

Unique voting barriers faced by Native Americans must be properly considered before states and localities implement voting changes. Native Americans living on reservations experience high rates of poverty and homelessness, a lack of traditional addresses, difficulties obtaining required IDs and registering to vote, and long distances to travel to polling locations, among other issues.

The issues discussed in this Chapter are just a small cross-section of issues faced by Native voters and do not constitute an exhaustive evaluation of barriers faced by Native American voters. Native voters are considered a protected class under the Voting Rights Act. Testimony shows that tribes must be consulted as changes to voting laws and procedures are considered. The federal government must bear in mind the historic government-to-government relationship between tribes and the federal government, re-evaluate whether states should dictate how elections are administered on reservations, and consider tribal needs in crafting federal voting laws.

---

<sup>752</sup> Alaska State Advisory Committee, *Alaska Native Voting Rights: A Report of the Alaska Advisory Committee to the U.S. Commission on Civil Rights* (June 2019) at p. 36, <https://www.usccr.gov/pubs/2019-09-19-AK-SAC-Voting-Report.pdf>.

<sup>753</sup> Dr. Tucker testified that there was a lack of translated written materials required under the Toyukak Order despite reporting from the Division of Elections that the majority of materials had been translated. For example, when federal observers visited 19 villages during the August 2016 primary election, they found: no translated voting materials were available in six villages (Alakanuk, Kotlik, Arctic Village, Beaver, Fort Yukon, and Venete); the ‘I voted’ sticker was the only material in an Alaska Native language in Marshall and Mountain Village; in Erimonak, the Yup’ik glossary was the only translated material available; and 10 villages had a sample ballot written in Yup’ik but only two (Koliganek and Manokotak) had written translations of the candidate lists.”

<sup>753</sup> *Id.*

## CHAPTER FOUR

### *Election Administration Barriers Hindering the Right to Vote*

How elections are administered significantly impacts a voter's experience and access to the ballot. Congress has passed legislation to alleviate burdens and ease access, including the National Voter Registration Act (NVRA) of 1993 and the Help America Vote Act (HAVA) of 2002. These laws were intended to increase access to voter registration opportunities and improve voting systems and voter access. As the Subcommittee learned over the course of its hearings, many issues facing election administration have not been adequately addressed, including:

- General election administration, such as:
  - Lack of compliance with the National Voter Registration Act (NVRA);
  - Attempts to add documentary proof of citizenship requirements;
  - Inconsistent poll worker training;
  - Lack of adequate resources; and
  - The use (and potential overuse) of provisional ballots
- Continued disenfranchisement of American citizens, including those that:
  - Were formerly incarcerated; and
  - Those in prison/jail
- Misinformation and disinformation campaigns
- Climate disaster response
- The conflict of interest presented when individuals serve as both candidate in and arbiter of the same election

#### GENERAL ELECTION ADMINISTRATION

##### **Failure to Comply with the National Voter Registration Act (NVRA)**

The NVRA, commonly referred to as the “motor-voter” law, was enacted by Congress in 1993 and requires states to establish voter registration procedures for federal elections that enable all eligible voters to register to vote when applying for a driver’s license both by mail and at public assistance or disability agencies.<sup>754</sup> The NVRA also created a federal mail-based form

---

<sup>754</sup> U.S. Commission on Civil Rights, *Increasing Compliance with Section 7 of the National Voter Registration Act, A Briefing Before the United States Commission on Civil Rights* (Aug. 2016), <https://www.usccr.gov/pubs/docs/NVRA-09-07-16.pdf>.

for voter registration that all states are required to accept.<sup>755</sup> Various proposals were introduced in Congress during the 1970s and 1980s to set national standards for voter registration, but passage of the NVRA in 1993 marked the first comprehensive federal effort to address voter registration.<sup>756</sup>

Brenda Wright of Demos testified that “the requirement of pre-registration to exercise the right to vote is still the number one barrier to participation in our democracy. Fifty to 60 million eligible voters, disproportionately people of color, young people, and low-income people, remain unregistered.”<sup>757</sup> Failure to properly comply with and enforce the NVRA hinders access to the franchise. Ms. Wright further testified that, in the November 2016 general election, nearly 1 in 5 people who were eligible but did not vote cited registration issues as their main reason for not doing so.<sup>758</sup>

---

*“The experience of one Black mother of two from Irving is illustrative. After moving to a new neighborhood, Totysa Watkins went online to update her driver’s license and checked “yes” in response to a question in the online form asking whether she wanted to register to vote. She did not learn that, in fact, her attempt at registration would not count under the State’s policies until she showed up at the polling place in 2014, children in tow.”*

— Mimi Marziani, Texas Civil Rights Project

---

As the Subcommittee learned in Texas, the state has failed to comply with the NVRA. Mimi Marziani testified at the Texas listening session that, “Texas does not offer simultaneous voter registration, as required by the NVRA, to the 1.5 million Texans who update their driver’s licenses online each year.”<sup>759</sup> Failure to properly implement the NVRA makes registering to vote and keeping accurate, up-to-date voter rolls more difficult for both voters and the state. It places a heavier burden on voters who are frequent movers, applicants who tend to be poorer, younger and – in Texas – more often people of color.<sup>760</sup>

<sup>755</sup> National Voter Registration Act of 1993, P.L. 103-31, May 20, 1993, 107 Stat. 77; 52 U.S.C. Ch. 205.

<sup>758</sup> *Id.* at p. 8, citing Census Bureau, Current Population Survey, November 2016 Voting and Registration Supplement. Reasons cited for not voting include “did not meet registration deadlines,” “did not know where or how to register,” and “did not meet residency requirements/did not live here long enough.”

<sup>759</sup> *Voting Rights and Election Administration in Texas*: Listening Session Before the Comm. on House Administration, 116<sup>th</sup> Cong. (2019); written testimony of Mimi Marziani at p. 4.

<sup>760</sup> *Id.*

<sup>761</sup> The experience of one Black mother of two from Irving is illustrative. After moving to a new neighborhood, Totysa Watkins went online to update her driver’s license and checked “yes” in response to a question in the online form asking whether she wanted to register to vote. She did not learn that, in fact, her attempt at registration would not count under the State’s policies until she showed up at the polling place in 2014, children in tow. Ms. Watkins told [us], “I felt that my voice was taken away from me

The Lawyers' Committee, along with other civil rights organizations, brought actions to enforce Sections 5 and 7 of the NVRA, which require states to provide voter registration assistance to individuals visiting motor vehicle and public assistance agencies. North Carolina settled one case in 2018 by agreeing to substantial improvements in how the department of motor vehicle and social services agencies offer and process voter registration applications.<sup>761</sup> The Lawyers' Committee also successfully challenged Georgia's runoff election voter registration in 2017 for violating Section 8 of the NVRA.<sup>762</sup> At the time, Georgia required voters register approximately three months before the federal runoff election – the NVRA deadline is set at 30 days.<sup>763</sup>

In Washington, D.C., Brenda Wright of Demos testified that, while Demos and partner organizations have worked to assess and improve compliance with the NVRA, under the current administration the Department of Justice has filed no enforcement actions under Section 5 or Section 7 of the NVRA.<sup>764</sup> Deuel Ross testified that NAACP LDF was successful in a 2014 suit against the Louisiana Secretary of State in which the Fifth Circuit ruled the Secretary is responsible for enforcing compliance with the NVRA across relevant state agencies.<sup>765</sup>

#### Attempts to Add Documentary Proof of Citizenship Requirements

All states require proof of citizenship to register to vote. However, an attestation of citizenship under penalty of perjury has generally been considered sufficient.<sup>766</sup> Some states have attempted to add stricter proof of citizenship requirements to voter registration forms, purporting to combat non-citizens voting in American elections. These claims have been proven false.

Alabama, Arizona, Kansas, and Georgia have enacted laws requiring voters produce documentary proof of citizenship when registering to vote. Additionally, former Election Assistance Commission (EAC) Executive Director Brian Newby attempted to allow Alabama, Georgia, and Kansas to require stringent proof of citizenship instruction when registering to vote using the federal form. The court has currently stopped this practice from moving

---

when my vote wasn't counted. Voting has always been something I value and is a right I have instilled in my children. Texas should not be able to take that away."<sup>767</sup>

<sup>766</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Dale Ho at p. 4, *citing* As the Tenth Circuit has noted, *see Fish v. Kobach*, 840 F.3d 710 (10th Cir. 2016), Congress chose to rely on an attestation to establish eligibility for a wide range of federal programs. See, e.g., 7 U.S.C. § 2020(e)(2)(B)(v) (requiring state applications for Supplemental Nutrition Assistance Program aid be signed under penalty of perjury as to the truth of the information contained in the application and the citizenship or immigration status of household members); 26 U.S.C. § 6065 (requiring that any tax "return, declaration, statement, or other document" be "verified by a written declaration that it is made under the penalties of perjury"); 42 U.S.C. § 1395w–114(a)(3)(E)(ii)(I) (requiring "an attestation under penalty of perjury" as to assets for receipt of prescription drug plan subsidies); 42 U.S.C. § 1436a(d)(1)(A) (requiring an attestation of citizenship or "satisfactory immigration status" for the receipt of housing assistance).

forward. According to a 2017 analysis by the Brennan Center, between five and seven percent of the citizen voting age population, millions of otherwise eligible voters, do not have ready access to documents that would prove their citizenship.<sup>767</sup> This rate is twice as high among citizens earning less than \$25,000 per year.<sup>768</sup> Arizona, along with Kansas, sued the EAC seeking to require the agency to modify the federal voter registration form to require proof of citizenship.

In 2013, the Court held that requiring proof of citizenship was inconsistent with the NVRA.<sup>769</sup> Arizona contends the Court's ruling in *Arizona v. The Inter Tribal Council of Arizona* applies only to federal elections,<sup>770</sup> and created a two-tiered registration system allowing individuals to register with the federal registration form for federal elections, while requiring voters in state and local elections to meet a new, strict citizenship requirement.<sup>771</sup> Civil rights organizations sued, alleging the two-tiered system is an unconstitutional burden on the right to vote.

The ensuing settlement allows the state to continue requiring proof of citizenship to register in state elections, but requires the state to treat federal and state registration forms the same and check motor vehicle databases for citizenship documentation prior to limiting residents to vote only in federal elections.<sup>772</sup> In 2013, the Lawyers' Committee intervened on behalf of the Inter Tribal Council of Arizona to defeat yet another attempt by Arizona and Kansas to modify the state-specific instructions of the federal mail voter registration form to require applicants residing in those states submit proof of citizenship in accordance with state law.<sup>773</sup>

Under Arizona's documentary proof of citizenship law, only limited forms of documents were accepted. While copies of passports and birth certificates could be submitted by mail, naturalization papers were required to be original papers and must be presented in person or be verified with the federal government.<sup>774</sup>

Notwithstanding the litigation history and precedent established around proof of citizenship requirements, Alabama, Georgia, and Kansas again requested changes be made in 2016 to the

<sup>774</sup> U.S. Commission on Civil Rights, *An Assessment of Minority Voting Rights Access in the United States, 2018 Statutory Report* (Sept. 2018) at p. 128.

"Arizona submitted its documentary proof of citizenship rules for preclearance under Section 5, and in 2005, the Attorney General precleared them. Arizona was immediately subject to litigation under Section 2, and a preliminary injunction was issued, but that was overturned by the Supreme Court in October 2016. The Section 2 claim was also ultimately unsuccessful on the merits. Therefore, although Arizona was later blocked from including documentary proof of citizenship on the Federal Form through separate litigation, it was allowed to keep the rules on the state form."

federal form allowing documentary proof of citizenship requirements.<sup>775</sup> Then-EAC Executive Director Brian Newby unilaterally acted to change the instructions accompanying the federal voter registration form to respond to these states' request.<sup>776</sup>

In February 2016, the Brennan Center and others filed suit on behalf of the League of Women Voters and state affiliates (*League of Women Voters v. Newby*) challenging the letter sent by EAC Executive Director Brian Newby in January 2016 allowing Alabama, Georgia, and Kansas to require applicants using the federal voter registration form to provide documentary proof of citizenship.<sup>777</sup> In September 2016, the D.C. Circuit Court of Appeals enjoined the EAC from changing the federal voter registration form. In February 2017, the court remanded the matter to the EAC to determine whether Mr. Newby had authority to allow states to require proof of citizenship. The preliminary injunction remains in place and a final decision is pending.<sup>778</sup> Documentary proof of citizenship is not currently on the federal form.

Kansas enacted a requirement in 2011 that voter registration applicants submit a copy of a legal document establishing U.S. citizenship, such as a birth certificate or a passport.<sup>779</sup> At the time, Kansas was the only state to require a copy of a physical citizenship document to register to vote.<sup>780</sup> The Kansas law went into effect in 2013 and, as Dale Ho testified, the law had a significant effect on the ability of Kansas residents to register to vote.<sup>781</sup>

Little more than three years after the law had gone into effect, 30,732 voter registration applications (approximately 12 percent of the total applications submitted) had been denied.<sup>782</sup> The ACLU challenged the law. Kansas' then-Secretary of State Kris Kobach claimed there were more than 18,000 non-citizens registered to vote in Kansas, but Kobach's own expert witness during trial estimated that of the 30,000 people whose registrations were blocked, more than 99 percent were in fact United States citizens.<sup>783</sup> In a 2016 preliminary injunction,

<sup>778</sup> *Id.*

<sup>779</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Dale Ho at p. 4.

<sup>780</sup> Kansas's law went into effect in 2013, and the effects were devastating for voter registration in the state. By March 2016, after the law had been in effect for a little more than three years, a total of 30,732 voter registration applicants had been denied registration, representing "approximately 12% of the total voter registration applications submitted since the law was implemented." It was as if one out of every eight voter registration applications were thrown in the trash. An analysis by political scientist Michael McDonald from the University of Florida determined that affected voters were disproportionately under the age of 30 (43.2% of rejected registration applicants) and unaffiliated with a political party (53.4% of rejected applicants). And voter registration drives ground to a halt, as the League of Women Voters reported that, after the law went into effect, the number of completed registrations it collected from drives fell by 90%."

<sup>781</sup> *Id.*, see also footnote 10: Three states have similar laws: Alabama, Arizona, and Georgia. Alabama and Georgia have never enforced their respective documentary proof-of-citizenship laws and have indicated no definitive plans to do so; Arizona's law is less stringent, and can be satisfied with a driver's license number, in lieu of a copy of a document. See A.R.S. § 16-166(F)(1).

<sup>783</sup> *Id.*, citing *Fish v. Kobach*, 309 F. Supp. 3d 1048, 1068 (D. Kan. 2018).

<sup>784</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, hearing transcript, Dale Ho at p. 16-17.

Judge Jerome Holmes of the Tenth Circuit Court of Appeals found the law had caused a “mass denial of a fundamental constitutional right,” and partially blocked the law for the 2016 election.<sup>784</sup> At trial in 2018, evidence presented by the State of Kansas from its own investigation showed that, only 39 non-citizens had been registered to vote in Kansas over the last 19 years—about two per year, which could be “largely explained by administrative error, confusion, or mistake.”<sup>785</sup>

The cost of adding a proof of citizenship question is not limited to the potential disenfranchisement of voters. Taxpayers often bear the brunt of litigation costs as well. As Dale Ho testified, four separate lawsuits were needed to block the Kansas law. These suits were not without cost. Secretary Kobach was sanctioned for concealing relevant documents - “taxpayers paid a thousand dollar fine for that” behavior.<sup>786</sup> The court also found Kobach willfully disobeyed a preliminary injunction, writing, “Kansas taxpayers paid approximately \$26,000 for that.”<sup>787</sup> Additionally, the court found “a pattern of flaunting disclosure and discovery rules” ordering Secretary Kobach to take several hours of continuing legal education.<sup>788</sup>

---

*“In 2011, Kansas passed a law requiring voter registration applicants submit a citizenship document, like a birth certificate or a passport. It sounds innocuous, but the effects were devastating. Over 3 years, more than 30,000 voter registration applicants were denied, about 12 percent of all applications during that period. One was our client Donna Bucci, who did not possess a copy of her birth certificate and couldn’t afford one. Another was our client Wayne Fish, who was born on a decommissioned Air Force Base in Illinois and spent 2 years searching for his birth certificate. Two others were our clients Tad Stricker and T.J. Boynton, who actually showed their birth certificates at the DMV, which then failed to forward them along with their voter registration applications. All four were disenfranchised in the 2014 midterms.”*

— Dale Ho, ACLU Voting Rights Project

### Poll Worker Training

The individuals working polling locations each election cycle, the training they receive, and the manner in which they administer election laws are critical to ensuring equal access to the ballot. A poll worker's understanding of voting rights, election administration rules, and language access can make the difference between a voter successfully casting a ballot, being forced to cast an unnecessary provisional ballot that may never be counted, or never casting a ballot at all.

In Arizona, Governor Stephen Roe Lewis of Gila Indian River Community testified that poll workers are often not trained in a culturally appropriate manner to work within tribal populations and do not effectively help and inform tribal voters who may not understand how to best handle issues at the polls.<sup>789</sup>

In Florida, Ms. Gonzalez-Eilert highlighted how more stringent training for poll workers could reduce the improper issuance of provisional ballots. For example, when workers do not check whether a vote-by-mail ballot has been received by the Supervisor of Elections' office, they erroneously issue a provisional ballot when a voter should have been provided a regular ballot.<sup>790</sup> Additionally, there is currently no set of standardized instructions for poll workers to refer to in the Polling Procedures Manual for Language Assistance, which could help poll workers assist limited-English proficiency voters.<sup>791</sup>

Mr. Yang testified language minority voters are often denied much-needed and federally required assistance at polling places for a variety of reasons, including poll workers who do not fully understand voting rights laws.<sup>792</sup> Specifically, poll workers have denied Asian Americans their right to an assistor of their choice or asked for ID when it is not needed.<sup>793</sup> Additionally, poll workers have been hostile to, or discriminated against, Asian American voters at the polls.<sup>794</sup>

In Ohio, a State General Assembly bill considered reducing the number of poll workers per precinct from four to two. Elaine Tso, Chief Executive Officer of Asian Services In Action, Inc. (ASIA, Inc.) testified would "disproportionately impact anyone who needed additional

<sup>793</sup> *Id.*

"For example, during the 2012 general election, a poll worker in New Orleans [mistakenly] thought only LEP voters of languages covered by Section 203 of the VRA were entitled to assistance in voting under Section 208. Since Vietnamese was not a Section 203-covered language either for the county or the state, the poll worker denied LEP Vietnamese voters the assistance of their choice when voting."

<sup>794</sup> *Id.*

"Poll workers have also been hostile to, or discriminated against, Asian American voters at the polls. For example, sometimes only Asian American voters have been singled out and asked for photo identification whether it was legally mandated or not. During the 2008 election, in Washington, D.C., an Asian American voter was required to present identification several times, while a White voter in line behind her was not similarly asked to provide identification. Also, in 2008, poll workers only asked a Korean American voter and his family, but no one else, to prove their identity in Centreville, VA."

assistance at the polls, whether that is inviting a helper for a limited English proficient voter or anyone who needs an accommodation of some sort, because that would need some approval from a poll worker.”<sup>795</sup> Inajo Davis Chappell testified that the Board of Elections hires “a huge group of individuals to work the polls.” Moving the marathon day of voting to the weekend may help improve the number and quality of poll workers they are able to recruit.<sup>796</sup>

### Lack of Resources

A lack of adequate resources impacts a voter’s ability to access the polls, as well as the ability of states and localities to carry out elections. This includes the lack of accessible polling locations for voters with disabilities.

Michelle Bishop, Voting Rights Specialist for the National Disability Rights Network (NDRN), testified at a Washington, D.C. hearing that, according to an ongoing Government Accountability Office (GAO) study, only 40 percent of polling places surveyed had an accessible path of travel in 2016,<sup>797</sup> an all-time high, and up from just 16 percent in 2000.<sup>798</sup> Accessibility at voting stations is decreasing, with 65 percent deemed inaccessible in 2016.<sup>799</sup> In 2016, after GAO combined architectural access data with voting station data, only 17 percent of polling places in America were considered fully accessible for voters with disabilities.<sup>800</sup>

The large shift in polling place closures discussed in Chapter Two does not only impact minority voters, but also voters with disabilities.<sup>801</sup> Ms. Bishop testified that some jurisdictions are claiming “lack of ADA compliance,” including “grossly inflated cost estimates for bringing polling places into compliance with the ADA” as a pretext for closing polling locations.<sup>802</sup> Disability rights advocates and the Department of Justice do not advocate for closing polling locations due to lack of ADA compliance, but instead prefer low-cost best practices to ensure accessible polling places.<sup>803</sup>

The Help America Vote Act and the resources it provides are critical to increasing accessibility. Ms. Bishop testified, that “immediately preceding the passage of the Help America Vote Act, the gap in voter participation between those with and without disabilities was closer to 20 percent;” in 2018, it was 4.7 percent.<sup>804</sup>

In Florida, Ms. Gonzalez-Eilert testified that county election offices are funded by the Board of County Commissioners and augmented by federal HAVA funds via grants from the states.

<sup>802</sup> *Id.*

<sup>803</sup> *Id.*

<sup>804</sup> *Id.* at p. 4.

The state's original HAVA funds are projected to be fully expended at the end of Fiscal Year 2020, leaving a hole in election resources.<sup>805</sup>

Michael Waldman of the Brennan Center testified his organization's study found that, in the 2012 election, voters in precincts with more minority voters experienced longer waits and tended to have fewer voting machines.<sup>806</sup> A more recent study led by economist Keith Chen of the University of California – Los Angeles, found voters in Black neighborhoods waited longer to cast a ballot than voters in White neighborhoods, and were approximately 74 percent more likely to wait longer than half an hour.<sup>807</sup>

Ms. Bishop testified, “congressional funding is sorely needed to ensure that elections officials can continually acquire, maintain, and improve their polling locations and equipment.”<sup>808</sup> O.J. Semans of Four Directions testified in North Dakota that “Congress should urge the EAC to make clear to States that the funds added to HAVA in 2018 by Congress can be used to improve the administration of federal elections, and therefore can be used to fund satellite offices on American Indian Reservations.”<sup>809</sup>

### **Use and Potential Overuse of Provisional Ballots**

HAVA also created a fail-safe in the voting process if voters do not bring ID to the polls, providing for the use of provisional ballots.<sup>810</sup> Provisional ballots are offered to voters who believe they are eligible to vote, but are turned away at the polls.<sup>811</sup> HAVA does not require states to count provisional ballots, but administrators must notify voters as to whether the ballot was counted.<sup>812</sup> Voters may cast a provisional ballot because their name does not appear in the poll book, they lack proper identification, or have recently moved or changed their name.<sup>813</sup>

Ms. Hannah Fried testified that, “widespread polling place changes lead to the overuse of provisional ballots.”<sup>814</sup> All Voting is Local’s analysis of 717 former Section 5-covered counties found that voters in counties with polling place closures are more likely to be asked to cast

provisional ballots.<sup>815</sup> Ms. Fried testified further that, “HAVA contemplated that provisional ballots would be used as a failsafe, but they are less likely to be counted than a regular ballot. Their overuse is the canary in the coal mine, signaling systemic problems that result in voters not knowing where or how to vote.”<sup>816</sup>

In Philadelphia County, Pennsylvania, which is 41 percent Black, voters are five times more likely to be given a provisional ballot than voters in Allegheny, which is 12.7 percent Black, or Berks, which is four percent Black.<sup>817</sup> In 2018, at Ohio’s two Historically Black Colleges and Universities (HBCUs), voters cast a “disproportionate number of provisional ballots and were twice as likely to have their ballots rejected than voters countywide.”<sup>818</sup>

Mike Brickner, Director of All Voting is Local in Ohio, testified that Ohioans, particularly people of color, face high rejection rates for provisional ballots.<sup>819</sup> While the number of provisional ballots cast in Ohio has decreased recently, Ohio still has one of the highest overall numbers of provisional ballots cast.<sup>820</sup> In a study of Franklin County, one of Ohio’s largest counties, All Voting is Local found “people of color, millennials, and low-income voters were all significantly more likely to cast a provisional ballot.”<sup>821</sup> In the 2018 general election, over one in five provisional ballots rejected statewide came from Franklin County.<sup>822</sup> In Greene County, home to one of Ohio’s HBCUs, nearly half the ballots cast in the precinct that serves Central State University were provisional ballots.<sup>823</sup>

In Arizona, when individuals are unable to produce required identification at the polls when voting early in-person or on Election Day they are forced to use a provisional ballot. However, individuals who vote early by mail do not have to show ID to have their ballot counted.<sup>824</sup> This means that provisional ballot voters without the required ID in-person would have been able to vote using a regular ballot if they had voted by mail. Additionally, Professor Ferguson-Bohnee testified that counties in Arizona that do not have vote centers require voters to vote in their proper precinct in order to have their voters counted, but poll workers sometimes give provisional ballots to voters without telling them they will not count if they are at the wrong precinct.<sup>825</sup>

<sup>821</sup> *Id.*

<sup>822</sup> Franklin County accounts for 10.93 percent of the state’s electorate, only slightly trailing Cuyahoga County. Depending on where one lives in the county, voters have very different experiences with provisional ballots. In 2018, the countywide rate of provisional ballots cast was 1.84 percent. However, All Voting is Local’s analysis found people of color, millennials, and low-income voters were all significantly more likely to cast a provisional ballot. Of the three polling locations near Franklin County’s Ohio State University campus, nearly one in ten voters cast a provisional ballot. On campus at the Ohio Union, nearly 65 percent of the provisional ballots cast were rejected by the board of elections.”

## CONTINUED DISENFRANCHISEMENT OF AMERICAN CITIZENS

### Disenfranchisement of Formerly Incarcerated Persons

Each year, millions of Americans who are no longer incarcerated are denied their constitutional right to vote because of a past felony conviction. The number of Americans disenfranchised because of a felony conviction has risen substantially as the U.S. prison population has grown, rising from 1.17 million in 1976 to 6.1 million in 2016.<sup>826</sup> The Sentencing Project estimates more than 6 million Americans were ineligible to vote in the 2018 midterm elections because of a felony conviction.<sup>827</sup> The Sentencing Project further estimated that nearly 4.7 million of these individuals are not incarcerated, but live in one of the 34 states that, at the time of the election, prohibited voting by people on probation, parole, or who have completed their sentence.<sup>828</sup>

The United States' criminal justice system disproportionately targets, arrests, sentences, and incarcerates people of color.<sup>829</sup> According to The Sentencing Project, disenfranchisement policies for felony convictions also disproportionately impact communities of color.<sup>830</sup> Voting-age Black Americans are four times more likely to lose their right to vote than the rest of the population.<sup>831</sup> Black Americans and Whites use drugs at similar rates, yet the imprisonment rate of Black Americans for drug charges is almost six times that of Whites.<sup>832</sup> Because of these disparities in the criminal justice system, felony disenfranchisement law have stripped one in every 13 Black Americans of their right to vote, four times the disenfranchisement rate of non-Black Americans.<sup>833</sup>

Eleven states continue restricting voting rights even after a person has served his or her prison sentence and is no longer on probation or parole – these individuals account for over 50

<sup>832</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Brenda Wright at p. 9-10.

<sup>833</sup> *Voting Rights and Election Administration in America*: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019), written testimony of Brenda Wright at p. 10.

"As of June 2019, only two states, Maine and Vermont, did not restrict the right to vote of anyone with a felony conviction, including allowing those in prison to vote. In the 2016 elections, approximately 2.5 percent of all Americans who would otherwise be able to vote could not vote due to felony convictions; that number jumps to 7.4 percent for African Americans. Communities of color therefore experience reduced political power and the underrepresentation of their interests in government. Ending felony disenfranchisement would help bring equality and equity to the democratic process. Encouraging voting has also been found to aid with reentry and thus promote public safety."

percent of disenfranchised persons.<sup>834</sup> Four states, Florida, Kentucky, Iowa, and Virginia, have constitutions that permanently disenfranchise citizens with felony convictions and grant the governor authority to restore voting rights.<sup>835</sup> Iowa and Kentucky permanently disenfranchise anyone convicted of a felony. Florida recently passed Amendment 4 which restores the rights of more than one million Floridians, while in Virginia, the restoration of voting rights is dependent upon the governor.

Some states have moved to re-enfranchise formerly incarcerated individuals, while others continue to restrict the constitutional rights of otherwise eligible Americans. In North Carolina, state law restores the right to vote automatically upon completion of a sentence for a felony conviction, however the bar continues based on a person's probation or parole status, including when fines and fees are not fully paid, which Caitlin Swain of Forward Justice testified results in both confusion and discriminatory denial of the right to vote.<sup>836</sup>

Prior to 2018, Florida was among four states that permanently denied voting rights to every citizen with a felony conviction,<sup>837</sup> one of the most punitive disenfranchisement policies in the nation. The power to restore voting rights was delegated to the Governor, who was able to set his own clemency policy. Former Governor Rick Scott's clemency policy was among the most restrictive in years. After nearly five years in office (by December 2015), Governor Scott had restored the rights of fewer than 2,000 individuals, while more than 20,000 applications remained pending.<sup>838</sup>

Between 2010 and 2016, the number of disenfranchised Floridians grew from 150,000 to approximately 1.68 million.<sup>839</sup> Fully 10 percent of Florida's voting population was excluded from voting, including one in five Black Americans.<sup>840</sup> According to Advancement Project's Democracy Rising report, 43-44 percent of Florida's Returning Citizen (persons' released from incarceration and reentering the community) population is Black, while the state's Black population is only about 17 percent.<sup>841</sup> The vast majority of those denied the right to vote due to a criminal record are no longer incarcerated, have served their time and living in the communities with no voice in how they are governed.<sup>842</sup> Twenty-seven and one half percent of the country's disenfranchised, formerly incarcerated citizen population lives in Florida.<sup>843</sup>

*"We were unambiguous as voters, seeing as that amendment gained more votes than the sitting Governor, more votes than me, and, again, won with a historic 64 percent of the voters casting ballots saying that we were going to be a State that didn't judge people forever by their worst day."*

— Andrew Gillum, Forward Florida

---

In 2018, as noted above, after years of advocacy, Florida voters approved Amendment 4 by nearly 65 percent of the statewide vote. The passage of Amendment 4 intended to restore the franchise to 1.4 million Floridians. The Amendment became effective on January 8, 2019. On May 3, 2019, the State Legislature undermined the will of the voters with legislation requiring individuals to pay all fines and fees *before* their rights are restored, or have them forgiven by a judge.<sup>844</sup> S.B. 7066 was signed into law by Governor Ron DeSantis on June 28, 2019.<sup>845</sup> The exact amount of fines and fees owed

statewide is unclear, but the South Florida Sun Sentinel estimated in May 2019 that the amount exceed more than \$1 billion in just three of Florida's counties.<sup>846</sup> This amounts to a modern-day poll tax. In June 2019, NAACP LDF and others filed a lawsuit to halt the implementation of S.B. 7066.<sup>847</sup>

On October 19, 2019, a federal judge ruled the state cannot prevent formerly incarcerated persons with a felony conviction from voting, even if they fail to pay court-ordered fines and fees.<sup>848</sup> U.S. District Judge Robert Hinkle ruled that the state can ask that the fines be paid, but cannot bar anyone from voting if they cannot afford it, writing "when an eligible citizen misses an opportunity to vote, the opportunity is gone forever; the vote cannot later be cast. So, when the state wrongly prevents an eligible citizen from voting, the harm is irreparable."<sup>849</sup> The ruling only applies to the 17 individuals named in the lawsuit, but the Florida Supreme Court is slated to hear a separate suit on the issue in November 2019.<sup>850</sup>

This problem extends beyond Florida. The 1901 Alabama constitution permits disenfranchisement of individuals convicted of crimes involving "moral turpitude." Until

<sup>849</sup> *Id.*

<sup>850</sup> *Id.*

2017, the state of Alabama did not define which crimes involved “moral turpitude,” leaving who was to be disenfranchised open to interpretation by individual county voter registrars.<sup>851</sup>

In 2016, Greater Birmingham Ministries and disenfranchised individuals challenging the state’s disenfranchisement process in court. Plaintiffs argued that the state’s disenfranchisement of individuals convicted of a “felony involving moral turpitude” and its conditional restoration of voting rights based on the payment of fines, court costs, fees, and restitution violates the U.S. Constitution and Section 2 of the Voting Rights Act.<sup>852</sup>

In 2017, Governor Ivey signed a law defining moral turpitude and restoring voting rights to many people with previous felony convictions.<sup>853</sup> In 2017, the court allowed part of the plaintiff’s case to move forward, challenging that the “moral turpitude” provision of the Alabama Constitution violates the 8<sup>th</sup>, 14<sup>th</sup>, and 15<sup>th</sup> Amendments as well as the Ex Post Facto clause of the Constitution, and that the fees and fines provision of state law violates the 14<sup>th</sup> Amendment.<sup>854</sup> The case remains pending.

Despite the recent law standardizing and limiting disenfranchisement crimes, Professor Carroll, Chair of the Alabama State Advisory Committee to the USCCR testified that studies suggest 286,266 people (7.62 percent) of Alabama’s voting age population are disenfranchised.<sup>855</sup> The law affected close to 60,000 Alabamians. However, Secretary of State Merrill reportedly refused to publicize the change or inform those who had been re-enfranchised and incorrectly stated that eligibility was dependent on paying all outstanding fines and fees, a statement he later clarified.<sup>856</sup> The Alabama Voting Rights Project submitted supplemental written testimony that, in their efforts to assist more than 2,500 Alabamians with past convictions in regaining their right to vote, they have encountered many individuals who are now eligible under the 2017 law but were unaware because Alabama has not promoted or explained the change.<sup>857</sup>

Arizona has the eighth highest rate of felon disenfranchisement in America.<sup>858</sup> According to testimony from Darrell Hill of the ACLU of Arizona, over 220,000 potential voters, or 4.25 percent of Arizona’s voting-age population are ineligible due to a felony conviction.<sup>859</sup> Arizona’s rate of felony disenfranchisement has nearly tripled over the last 25 years.<sup>860</sup> Disenfranchisement laws disproportionately impact minority voters, with more than one in

10 Black adults ineligible to vote in Arizona.<sup>861</sup> Additionally, over 115,000 of those voters ineligible because of a felony conviction have completed their sentence, probation and/or parole.<sup>862</sup> Several aspects of the process for rights restoration are prescribed by statute, but others are left to the discretion of state and county officials.<sup>863</sup> In April 2019, Governor Doug Ducey signed a law alleviating requirements that people convicted of a first-time felony offense pay outstanding fines in order to have their rights automatically restored.<sup>864</sup>

In 2018, Texas charged Crystal Mason with illegally voting in the 2016 presidential election. Ms. Mason had been recently released from prison and was still on community supervision at the time of the elections but was never informed she could not vote. Ms. Mason was indicted on a charge of illegally voting in Tarrant County, Texas, found guilty, and sentenced to five years in prison – for voting while on probation.<sup>865</sup> In Texas, the right to vote is restored upon completion of a sentence, including prison, parole, and probation.

The point at which the right to vote is restored for formerly incarcerated individuals varies widely from state to state and, in some instances, is subject to the whim of the Governor. In Iowa, then-Governor Vilsack issued an Executive Order in 2005 automatically restoring voting rights for all persons who had completed their sentence. This order was subsequently rescinded by Governor Branstad in 2011.<sup>866</sup> New York Governor Andrew Cuomo used his clemency power in 2018 to restore the voting rights of approximately 35,000 New Yorkers under parole supervision and vowed to continue the practice as new residents enter the parole system.<sup>867</sup> Between 2016 and 2018, then-Governor Terry McAuliffe used his power to individually restore the right to vote to 173,000 Virginians who had completed their sentence.<sup>868</sup> In contrast, current Governor Ralph Northam has only restored the voting rights of just over 22,000 individuals during his two years in office.<sup>869</sup>

### **Disenfranchisement of Incarcerated Persons**

Several million Americans are also disenfranchised while currently incarcerated. According to the Sentencing Project, 2.2 million people reside in America's prisons or jails, an increase of 500 percent over the last 40 years, making the United States the world's leader in incarceration.<sup>870</sup> More than 1 million are disenfranchised because of a felony conviction. Incarceration and disenfranchisement disproportionately affect communities of color.

870 The Sentencing Project, *Criminal Justice Facts*, <https://www.sentencingproject.org/criminal-justice-facts/>.

People of color make up 37 percent of the U.S. population, but 67 percent of the country's incarcerated population.<sup>871</sup> As of June 2019, only two states, Maine and Vermont, did not restrict the right to vote of anyone with a felony conviction, including allowing those in prison to vote.<sup>872</sup>

Prison-based gerrymandering has also long distorted democratic representation. The United States Census counts incarcerated persons as residents of the prison where they are incarcerated, rather than as a resident of their home community.<sup>873</sup> Whole prisons are counted as resident populations in electoral districts, yet in all but two states the people incarcerated within those prisons for felony convictions are denied the right to vote.<sup>874</sup> Ms. Wright testified, because prisons are often located far from the home community of incarcerated persons, counting them in this manner "awards disproportionate representation to rural or semi-rural communities containing prisons at the expense of representation for the home communities of incarcerated persons."<sup>875</sup>

When a state does allow incarcerated persons the right to vote, they typically cannot vote as residents of the prison where they are counted for Census purposes, but instead must vote absentee in the community where they resided before incarceration.<sup>876</sup> Ms. Wright also testified that the practice of prison gerrymandering "defies most state constitutions and statutes, which explicitly state that incarceration does not change a person's legal residence."<sup>877</sup>

Additionally, in Ohio, Naila Awan of Demos testified that, under Ohio law, registered voters arrested and held in Ohio jails after the absentee ballot request deadline and detained through Election Day are prevented from obtaining and casting an absentee ballot.<sup>878</sup> Demos, along with partner organizations, filed a challenge to this practice which is estimated to disenfranchise approximately 1,000 voters each election.<sup>879</sup>

Each election, millions of otherwise eligible Americans are prevented from casting a ballot due to prior convictions or current incarceration. When a citizen is incarcerated, we do not take their citizenship from them, yet we continue to deny their basic right of participation in our democracy.

## MISINFORMATION AND DISINFORMATION

Top U.S. intelligence and law enforcement officials have repeatedly warned of the need to bolster our election security, including guarding against interference from foreign powers using misinformation and disinformation campaigns to disseminate incorrect information and sow division among our electorate. Special Counsel Robert Mueller concluded in his March 2019 report on the investigation into Russian election interference that the “Russian government interfered in the 2016 presidential election in sweeping and systematic fashion.”<sup>880</sup>

The report detailed how Russian operatives used social media and cyberattacks to influence the 2016 presidential election. As to involvement in future American elections, Special Counsel Mueller testified before the House Permanent Select Committee on Intelligence that “[t]hey’re doing it as we sit here.”<sup>881</sup> Interference is not limited to the Russian government, nor is it limited to foreign state actors.

The tactics utilized during 2016 included efforts to mislead and deceive voters about the mechanics and requirements of voting and participating in elections. For example, automated social media accounts targeted Black and Latino voters with information claiming incorrectly that voters could “vote from home” for Hillary Clinton.<sup>882</sup> Researchers found that some Russian tactics of “malicious misdirection” included “Twitter-based text-to-vote scams” and “tweets designed to create confusion about voting rules.”<sup>883</sup>

In a recently released bipartisan report, the Senate Select Committee on Intelligence detailed the extent to which the Russian government specifically targeted minority voters. The panel found, “[N]o single group of Americans was targeted by [Internet Research Agency] information operatives more than African-Americans. By far, race and related issues were the preferred target of the information warfare campaign designed to divide the country in 2016.”<sup>884</sup> The Senate report’s finding supports the earlier assessment by the United States intelligence community that one of the IRA’s information warfare campaign goals was to undermine public faith in the democratic process.<sup>885</sup>

The dissemination of misinformation and disinformation did not end with the presidential election in 2016. During the 2018 midterms, misinformation campaigns were used to attempt to deter voters, and some organizations sent incorrect information to voters. In late October, the Republican National Committee (RNC) sent a mailer to registered voters in Montana stating they could mail absentee ballots postmarked the day before Election Day as long

<sup>885</sup> *Id.*

as they were received by election officials by November 16 (10 days after Election Day). Montana state law requires that absentee ballots must be received by 8:00 p.m. on Election Day.<sup>886</sup> In Montana, a mailer was sent to 90,000 voters incorrectly stating they were not registered to vote.<sup>887</sup>

In her testimony, Elena Nunez detailed how, in Missouri, the state Republican Party sent mailers to 10,000 voters with incorrect information about when their absentee ballots were due.<sup>888</sup> Voters in some states received text messages with incorrect information about their polling locations, as a result, some appeared at wrong location and were subsequently turned away.<sup>889</sup> In Texas, “thousands of students who live on campus at Prairie View A&M had been incorrectly told to register to vote using an address in a different precinct and would need to fill out a change-of-address form before casting a ballot.”<sup>890</sup>

Michael Waldman testified that in a recent analysis for the Brennan Center, University of Wisconsin Professor Young Mie Kim documented hundreds of messages on Facebook and Twitter designed to discourage or prevent people from voting in the 2018 election.<sup>891</sup>

## CLIMATE DISASTER RESPONSE

As climate change continues to intensify, so have natural disasters. With Election Day in November, voter registration deadlines and early voting have fallen victim to hurricane season. In 2012, Hurricane Sandy damaged polling places in New Jersey, necessitating backup plans for polling stations.<sup>892</sup> In 2019, voters in North Carolina’s special congressional elections received conflicting messages. Voters were encouraged to cast their ballots during early voting to avoid potential disruptions from Hurricane Dorian.<sup>893</sup> However, North Carolina counties then made changes to early voting schedules with some shutting down early voting sites or shifting hours.<sup>894</sup>

Florida has been struck by several natural disasters during election season in recent years. Hurricanes Matthew (2016) and Michael (2018) both arrived around the voter registration deadline in Florida – 29 days before Election Day.<sup>895</sup> Hurricane Irma (2017) arrived around

<sup>894</sup> Dan Kane, *Dorian halts early voting in some NC counties for special congressional elections*, The News & Observer (Sept. 4, 2019), <https://www.newsobserver.com/news/weather-news/article234728472.html>.

<sup>895</sup> *Voting Rights and Election Administration in Florida: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong.* (2019), written testimony of Anjenys Gonzalez-Eilert at p. 5.

special and municipal elections.<sup>896</sup> It is likely hurricanes will continue to impact Florida throughout future election seasons.

Florida has had inconsistent election practices dealing with hurricanes. The Secretary of State has been reluctant to extend registration deadlines as a result of recent hurricanes and court action had to be taken.<sup>897</sup> Preparations were made by the governor ahead of Hurricane Michael for the election, but without proper communications and consultation that these preparations and changes can still negatively impact voters. Ms. Gonzalez-Eilert testified 90 percent of the Black community in Panama City were not close to the six voting centers set up to replace precinct voting.<sup>898</sup> After the Supervisor of Elections was contacted by organizations, a vote center was provided for only one day, the day before the election.<sup>899</sup>

In 2016, Chatham County, Georgia was hit by Hurricane Matthew, just a few days before voter registration closed. Almost half the residents lost power during the storm and the county was subject to mandatory evacuation, yet the Governor and then-Secretary of State Brian Kemp refused to extend the voter registration deadline.<sup>900</sup> The Lawyers' Committee sought and obtained emergency relief to extend the registration deadline.<sup>901</sup> Chatham County has over 200,000 voting age citizens, more than 40 percent of whom are Black.<sup>902</sup> The relief obtained by the Lawyers' Committee allowed over 1,400 primarily Black and Latino citizens to vote.<sup>903</sup>

Standardizing election procedures specifically to deal with natural disaster scenarios will help ensure no voter is disenfranchised because of a missed deadline or closed polls. The Election Assistance Commission held its inaugural meeting of the Disaster Preparedness and Recovery Working Group on April 10, 2019, to share information and lay the groundwork for future materials from the Commission designed to assist election officials facing disasters.<sup>904</sup>

## CONFLICTS OF INTEREST: CANDIDATES AS ELECTION ADMINISTRATORS

The 2018 Governor's race in Georgia forced a reexamination of the roll of Secretaries of State running elections when that Secretary is running for office in the same election. Then-Secretary of State Brian Kemp refused to step down or recuse himself from the election administration roll while he simultaneously ran for Governor of Georgia.

As discussed in this report, the State of Georgia and former Secretary Kemp have a record of aggressive purge practices and other actions that undermined confidence in fair election administration. At one point during the gubernatorial campaign, now-Governor Kemp said at a public event that his opponent's (Stacey Abrams) campaign's voter turnout effort "continues to concern us, especially if everybody uses and exercises their right to vote."<sup>905</sup> Throughout the gubernatorial race, then-Secretary Kemp declined to recuse himself from managing the election.<sup>906</sup>

Former President Jimmy Carter criticized Kemp for refusing to step down, calling Kemp's refusal "counter to the most fundamental principle of democratic elections—that the electoral process be managed by an independent and impartial election authority."<sup>907</sup>

The NAACP LDF urged Kemp to recuse himself, noting his voter suppression tactics "would appear to create needless barriers to the exercise of the fundamental right to vote and abridge the ability of voters of color to elect their candidates of choice in violation of the Voting Rights Act of 1965 and to vote free from racial discrimination in violation of the 14<sup>th</sup> and 15<sup>th</sup> Amendments and other laws."<sup>908</sup> Kemp eventually resigned his post as Secretary of State after claiming victory in November 2018, while ballots were still being counted.<sup>909</sup> The Georgia race raised serious concerns regarding Secretaries of State maintaining oversight of the very races in which they are also a candidate.

In Kansas, Secretary of State Kris Kobach campaigned for Governor of Kansas while maintaining his position as Secretary, overseeing the election and initially refusing to recuse himself from the possibility of overseeing a recount.

This issue predates the 2018 election. During the 2000 presidential election in Florida, Republican Katherine Harris served as both the Secretary of State overseeing the recounts and as co-chair of George W. Bush's Florida campaign. The Gore campaign accused Harris of a conflict of interest in the manual recount efforts.<sup>910</sup> The Florida State Attorney General also headed the Gore campaign.<sup>911</sup> Harris' decision to certify George W. Bush the winner led to Democrats suing to enforce a recount, ultimately leading to the infamous case of *Bush v. Gore*, in which the Court ruled that no alternative method of recount could be established in a timely manner and ultimately made George W. Bush president.<sup>912</sup>

## CONCLUSION

Problems in election administration existed before *Shelby County* and they persist as barriers to accessing the ballot. When compounded with the suppressive, discriminatory tactics being deployed throughout states, election administration affects voters' ability to access the polls. Voter registration hurdles, inadequate funding to states to maintain and secure their election infrastructure, poll worker training, overuse of provisional ballots, disenfranchisement of formerly incarcerated people, and protecting elections in the face of natural disasters continue to be areas of concern.

## CONCLUSION

### THE PURPOSE OF THE SUBCOMMITTEE'S HEARINGS

"Voting discrimination still exists; no one doubts that," Chief Justice Roberts said in *Shelby County*.<sup>913</sup> While the Chief Justice acknowledged discrimination exists, he went on to write that the question at hand was whether "extraordinary measures" in the Voting Rights Act were necessary.<sup>914</sup> The *Voting Rights and Election Administration* hearings held by the Subcommittee on Elections of the Committee on House Administration show the answer to that question is an unequivocal yes. Discrimination in voting does still exist, as detailed in this report, as well as the supporting testimony and documents gathered by the Subcommittee. Without the protections of federal oversight, it is nearly impossible to recognize and combat every instance of voter suppression and discrimination.

As Justice Ginsburg pointed out in her dissent, "[T]he Voting Rights Act of 1965 (VRA) has worked to combat voting discrimination where other remedies had been tried and failed."<sup>915</sup> When the Court struck down Section 4(b) of the Voting Rights Act in 2013, the Court rendered the protective structure of Section 5 effectively unenforceable. This decision unleashed a modern-day era of discrimination against minority voters and voter suppression tactics. After *Shelby County*, the nation saw an increase in voter suppression. Previously covered states began passing and implementing laws that would have or had already failed the preclearance process. States that were not covered enacted laws of their own as the Court signaled an end to the longstanding federal protection of the right to vote.

Without congressional action, the right to vote for millions of Americans is left vulnerable to suppressive laws and discriminatory tactics outlawed by Congress and the courts decades ago. Congress has a duty to act. At the beginning of the 116<sup>th</sup> Congress, Speaker of the House Nancy Pelosi and Committee on House Administration Chairperson Zoe Lofgren reconstituted the Committee on House Administration's Subcommittee on Elections which House Republicans eliminated six years earlier. The Subcommittee, which is now chaired by Congresswoman Marcia L. Fudge, determined that its first priority would be collecting evidence illustrating the state of voting rights and election administration in America. The Subcommittee then worked to take Congress to the people, collecting stories and evidence from voters and advocates working to combat these tactics within the states and on a national scale.

The Subcommittee on Elections examined the landscape of voting rights and election administration in America post-*Shelby County* to determine whether Americans can freely

<sup>913</sup> *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612, 2619 (2013).

<sup>914</sup> *Id.*, also citing *Northwest Austin*, 557 U.S., at 203.

<sup>915</sup> The question is whether the Act's extraordinary measures, including its disparate treatment of the States, continue to satisfy constitutional requirements. As we put a short time ago, 'the Act imposes current burdens and must be justified by current needs.'

<sup>915</sup> *Id.*, Justice Ginsberg writing for the dissent.

cast their ballot and if not, what barriers lay in their way. As the Subcommittee held hearings throughout the country, Members of Congress heard time and again that states, both formerly covered and not, have implemented tactics that suppress the votes of minority communities, students, and the poor.

The Subcommittee on Elections held one listening session and eight hearings across eight states and in Washington, D.C. to gather the testimony and evidence analyzed in this report. The Subcommittee heard from 68 witnesses, 66 called by the Majority and 2 called by the Minority, and gathered more than 3,000 pages of testimony and documents. The evidence gathered proves the need for congressional action to protect the right to vote.

## FINDINGS

### Discrimination in Voting Still Exists

In evaluating the state of minority voting rights in its 2018 statutory report, the U.S. Commission on Civil Rights found on a unanimous and bipartisan basis that race discrimination in voting has been pernicious and endures today, voter access issues and discrimination continue today for voters with disabilities and limited-English proficiency, and the right to vote “has proven fragile and to need robust statutory protection in addition to Constitutional protection.”<sup>916</sup> Following *Shelby County*, the elimination of the coverage formula and subsequent unenforceability of the preclearance requirement means voters in previously covered jurisdictions with “long histories of voting discrimination have faced discriminatory voting measures that could not be stopped prior to elections because of the cost, complexity and time limitations of the remaining statutory tools,”<sup>917</sup> and that *Shelby County* effectively signaled a loss of critical federal voting rights supervision.

The Subcommittee heard testimony and collected documents outlining persistent discrimination in voting law changes such as purging voter registration rolls, cut backs to early voting, polling place closures and movements, voter ID requirements, implementation of exact match and signature match requirements, lack of language access and assistance, and discriminatory gerrymandering of districts at the state, local, and federal level.

Improperly executed, “list maintenance” can result in voter purges that have a disproportionate and discriminatory impact on minority voters. At least 17 million voters were purged nationwide between 2016 and 2018.<sup>918</sup> The State of Ohio won a case before the Court, allowing it to implement a purge policy that effectively punishes voters for failing to vote.<sup>919</sup>

## 132 Voting Rights and Election Administration in the United States of America: CONCLUSION

Yet, Ohio's Secretary of State recently admitted the program was rife with error.<sup>920</sup> In multiple states, eligible citizens were wrongfully flagged as potential non-citizens and placed on a purge list.<sup>921</sup> While states must maintain accurate voter rolls, there are ways to do so that do not have a disproportionate impact on minority voters.

Millions of Americans take advantage of in-person early voting. Despite the high rate of utilization, some states have moved to cut back on early voting, while the Secretary of State in Alabama refuses to endorse early voting. Ohio not only cut back the early voting that had been implemented to alleviate egregiously long lines in previous elections, it eliminated a full week in which voters were able to register and cast their ballot on the same day. Some states have cut early voting on college campuses, while others still have specifically targeted "Souls to the Polls" Sundays traditionally utilized by predominantly Black churches. In Florida, it was estimated that more than 200,000 Floridians did not vote in 2012 due to long lines resulting from cuts to early voting.<sup>922</sup> Increased access to early voting is a simple yet substantial way to increase access to the ballot and states should halt efforts to eliminate days Americans can cast their ballots.

Since the *Shelby County* decision, hundreds of polling places have been closed in states previously covered under Section 5. Post-*Shelby County*, states and localities are no longer required to perform disparate impact analyses to determine whether these actions will have a discriminatory impact on voters. Since 2012, Georgia has closed more than 200 polling locations, Texas has closed at least 750, and Arizona has closed 320.<sup>923</sup> In Arizona, the closure of polling places, coupled with a movement toward vote-by-mail and voting centers, has had an outsized impact on Native American voters that should be evaluated and taken into consideration before policy changes are made.

Voter ID has been championed as a necessary move to combat alleged voter fraud by its proponents. While there is no credible evidence of widespread, in-person voter fraud – the only type of fraud voter ID would prevent – these policies continue to be implemented across the country and have a discriminatory impact on minority voters. Voter IDs are financially burdensome for low-income voters, effectively imposing a second-generation poll tax. Even when proponents claim that "free" IDs are available, the IDs are not truly free: acquiring such IDs often requires an applicant to provide underlying documents they may not have and that cost money to obtain and the time and transportation necessary to complete the process is a

<sup>923</sup> The Leadership Conference Education Fund, *Democracy Diverted: Polling Place Closures and the Right to Vote* (Sept. 2019) at p. 26, <http://civilrightsdocs.info/pdf/reports/Democracy-Diverted.pdf>.

cost many voters cannot pay. In North Dakota, Native American voters were significantly and disproportionately impacted by the state's voter ID law requiring a residential street address, since many Native Americans have unstable housing situations or live in homes that do not have street addresses, while many tribal members use Post Office Boxes.

Some states have implemented "exact match" requirements, requiring that a voter's name and information on his or her registration form exactly match the form of their name on file with certain state agencies. In Georgia, this resulted in the voter registration forms of more than 50,000 predominantly Black, Asian, or Latino voters, being put on hold by the Secretary of State's office.<sup>924</sup> Other states have carried exact match requirements over to signature match requirements, both on in-person and absentee ballots. When enforced by poll workers who are untrained in handwriting analysis, these policies have arbitrarily disenfranchised voters; sometimes without their knowledge.

The language access provisions of the Voting Rights Act remain intact despite the decision in *Shelby County*, but that does not mean they are being properly followed or enforced. In Florida, 32 counties were sued in August 2018 to force compliance with Section 4(e) of the Voting Rights Act. The Judge made a telling observation, noting "[I]t is remarkable that it takes a coalition of voting rights organizations and individuals to sue in federal court to seek minimal compliance with the plain language of a venerable 53-year-old law."<sup>925</sup> More needs to be done to ensure states and localities are following through on the legal protections afforded to language minority voters.

Some jurisdictions are still attempting to dilute the voice and vote of minority communities through discriminatory gerrymandering. Before *Shelby County*, preclearance required covered jurisdictions to submit their redistricting plans to the Department of Justice or the U.S. District Court for the District of Columbia for approval before implementation. After *Shelby County*, redistricting plans are no longer subject to preclearance. This means states with a history of racial discrimination can implement new political boundaries for districts for state and federal offices following the 2020 census that could be in effect for several election cycles, since as discussed in this report, it could take years of litigation to challenge those redrawn boundaries in court as discriminatory under Section 2.

### **Election Administration Needs Improvement**

Problems in election administration existed before *Shelby County*, but today, new barriers to voting are compounded by the suppressive, discriminatory tactics being deployed across the country. The Subcommittee received testimony on election administration issues that include, but are not limited to: voter registration hurdles, a lack of funding for states to maintain and secure their election infrastructure, insufficient poll worker training, overuse of provisional ballots, disenfranchisement of formerly incarcerated people, and protecting elections in the face of natural disasters.

---

<sup>924</sup> *Voting Rights and Election Administration in Georgia: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Gilda Daniels at p. 4-5.

<sup>925</sup> The Leadership Conference Education Fund, *Democracy Diverted: Polling Place Closures and the Right to Vote* (Sept. 2019) at p. 4, <http://civilrightsdocs.info/pdf/reports/Democracy-Diverted.pdf>, citing *Rivera Madera v. Detzner*, Slip Op. at p. 25 (Sept. 7, 2018).

Congress passed the National Voter Registration Act in 1993, but more needs to be done to ensure states follow the law and voters are being properly registered. Congress must ensure states have proper funding to carry out critical election duties through Help America Vote Act (HAVA) funds. This includes funding to replace outdated voting equipment and other functions. Funding for proper training of poll workers is critical. The Subcommittee heard numerous times how the actions and interpretations of a poll worker can mean the difference between a voter being able to cast a ballot, being forced to cast a provisional ballot, or being turned away entirely.

Congress should make it clearer that proof of citizenship requirements above and beyond the traditional use of an affidavit were not the intent of Congress. HAVA requires election officials offer a voter a provisional ballot in the event of a question concerning their eligibility.<sup>926</sup> Uneven implementation of election laws and inadequate training of poll workers, among other factors, lead to the overuse of provisional ballots. As Hannah Fried, Director of All Voting is Local, testified, provisional ballots should be used as a “last resort” for voters who encounter a problem that cannot be resolved at the time they cast their ballot.<sup>927</sup> They are less likely to be counted than a regular ballot and every effort should be made to ensure voters cast ballots that will be counted.

We must also address the continued disenfranchisement of formerly incarcerated individuals and the inherent discrimination at hand when otherwise eligible Americans are denied their right to vote. Nearly 6 million American citizens are disenfranchised due to a prior felony conviction, while millions more are incarcerated. Maine and Vermont are the only states that allow incarcerated individuals to vote while in prison but, while the census counts them as residents of the location where they are serving their sentence, they vote absentee in the district in which they previously resided. Disenfranchisement of incarcerated or formerly incarcerated persons is not mandated by the Constitution or federal law, and the formerly incarcerated are not stripped of their citizenship. If the fundamental measure of eligibility to vote is citizenship, perhaps all citizens should be allowed to vote.

A new generation of attacks on voting emerged during the 2016 election. Top U.S. intelligence and law enforcement officials have repeatedly warned about the need to bolster our elections, including guarding against interference from foreign powers using misinformation and disinformation campaigns to disseminate incorrect information and sow division. The Senate Intelligence Committee published a report detailing how the Russian Internet Research Agency (IRA) specifically targeted Black Americans with disinformation campaigns meant to suppress and divide voters. During the 2018 election, hundreds of messages on Facebook and Twitter were documented, designed to discourage or prevent people from voting in the 2018 midterm election.<sup>928</sup>

---

<sup>926</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Hannah Fried.

<sup>927</sup> *Id.* at p. 9.

<sup>928</sup> *Voting Rights and Election Administration in America: Hearing Before the Subcomm. on Elections, 116<sup>th</sup> Cong. (2019)*, written testimony of Michael Waldman at p. 7, see also Young Mic Kim, *Voter Suppression Has Gone Digital* (Nov. 20, 2018), <https://www.brennancenter.org/our-work/analysis-opinion/voter-suppression-has-gone-digital>

Finally, as climate change intensifies, natural disasters have become more severe. With Election Day in November, voter registration deadlines and early voting have been impacted by hurricane season, with mixed levels of protection from state officials. As the frequency and intensity of natural disasters escalate, standardized election procedures and protections for these events would ensure voters are not disenfranchised by circumstances beyond their control.

### **Section 2 is an Insufficient Replacement for Section 5**

Section 2 of the Voting Rights Act was, and remains, a critical tool in the fight to protect the right to vote. However, Section 2 was not intended to work in isolation. It was intended to work in concert with the other vital provisions of the Act, including Section 5. Without the full force of those provision in effect as Congress intended, Section 2 is a reactive, inadequate substitute for the proactive preclearance regime. Section 2 lawsuits can be very lengthy, often taking years to fully litigate and can be very expensive. This can result in discriminatory laws, that may have otherwise been blocked from being implemented in the first place under Section 5, remaining in place for multiple election cycles and denying voters access to the ballot while lawsuits move through the court process.

Section 2 also reverses the burden of proof, requiring the federal government, citizens, and advocates to prove the voting change is discriminatory and harms minority voters, rather than the burden being on the state or locality to prove they are not violating the constitutional right to vote, as was the case under preclearance. In the wake of *Shelby County*, civil rights and voting rights organizations have filed numerous lawsuits seeking to protect the right to vote, while the current Administration's Department of Justice has not filed any Section 2 lawsuits and reversed its position in others. Section 2 cases require resources the average voter simply does not have. On average, these cases can cost millions of dollars and take two to five years to be completed.<sup>929</sup>

### **Voter Turnout is Up, In Spite of Suppressive Practices**

A familiar refrain heard from proponents of suppressive voter measures is that voter turnout is up, so the laws passed by states must not be suppressive as advocates and voters claim. In the first election following *Shelby County*, in 2014, voter turnout was the lowest since World War II.<sup>930</sup> Although the 2018 election saw the highest voter turnout since 1914, this has been attributed to historic voter enthusiasm.<sup>931</sup> This is despite the suite of suppressive, discriminatory laws states have enacted throughout the country – not because of them. While

## 136 Voting Rights and Election Administration in the United States of America: CONCLUSION

voter turnout is up, nearly 50 percent of Americans did not vote in the last election.<sup>932</sup> Without such restrictive and suppressive barriers in place, turnout could have been higher.

Prior to passage of the Voting Rights Act of 1965, Black Americans who were able to cast a ballot overcame immense barriers to do so. That some voters overcame the barriers put between them and the ballot box, does not excuse or make those barriers just.

Throughout American history, wholly unjust practices were held to be legal, until the American people overcame them. After long, hard-fought battles, they were no longer legal. Slavery was legal, but slavery was not just. Jim Crow was legal, but Jim Crow was not just. Separate but equal was legal, but separate but equal was not just. Suppressive voting laws were at times legal, but they were deemed unjust by the American people and the passage of the Voting Right Act and subsequent reauthorizations. Every eligible American is entitled to the unfettered, unabridged right to vote.

To the extent that turnout was up in 2018, it was the result of a concerted effort by advocates and individuals to cast their ballot despite the obstacles before them. Native American tribes in North Dakota spent considerable resources to ensure their members could vote, despite an unjust voter ID law.<sup>933</sup> Turnout among Native American voters remains below the 50 percent threshold that was the basis for enacting the Voting Rights Act.<sup>934</sup> When turnout increases, states and localities should not be closing polling locations, potentially creating long lines and unacceptable wait times many voters cannot endure. Polling conducted ahead of the 2018 elections by Advancement Project, in collaboration with the NAACP and African American Research Collaborative showed that voters of color were driven to vote by widespread attacks on people of color and their access to democracy.<sup>935</sup>

As Catherine Lhamon, Chair of the U.S. Commission on Civil Rights stated, “we ought to be celebrating increased turnout wherever it exists. And we also ought to be recognizing that, across the board, in this country, we have very, very low turnout for voters. And that is, in itself, a concern.”<sup>936</sup>

In a democracy, government should enable its citizens to easily register and cast their ballots. These voter suppression measures are fundamentally anti-democratic as they have shifted the burden onto individuals and advocacy groups to find the means and resources to overcome them.

## MOVING FORWARD

The fundamental right to vote is under attack. The Court's decision in *Shelby County* has served to accelerate the process, giving a green light to historically discriminatory jurisdictions to implement laws once put on hold because they could not clear federal administrative review. Some may seem innocuous on their face, but these laws have a disparate impact on minority voters. Without the full protection of the Voting Rights Act, states are no longer required to perform an analysis of their proposals' effect or justify their actions to a neutral clearing house.

Some states are taking positive steps to protect voting rights. According to the Brennan Center's *Voting Laws Roundup*, 688 pro-voter bills were introduced in 46 states during their 2019 legislative sessions, leading to reforms across the country.<sup>937</sup> For example, New York passed a package of voting reforms including early voting, pre-registration for 16- and 17-year-olds, portability of registration records, consolidated dates for state and federal primaries, and requiring ballots to be distributed to military voters further in advance.<sup>938</sup> Additionally, New York passed constitutional amendments permitting same-day registration and no-excuse absentee voting, which need to be passed again and ratified by the voters.<sup>939</sup>

In Colorado, the state enacted a law restoring voting rights to individuals on release from incarceration and expanded automatic voter registration (AVR).<sup>940</sup> Maine also enacted AVR. Nevada enacted immediate rights restoration to people on release from incarceration, authorized same-day registration, and other reforms. New Mexico also enacted same-day voter registration.<sup>941</sup> Delaware enacted early in-person voting, Virginia enacted no-excuse early in-person voting, and Washington enacted a Native American voting rights act.<sup>942</sup> In March 2018, Washington State's Governor signed AVR into law, along with Election Day registration, pre-registration for 16- and 17-year-old, and a state-level Voting Rights Act.<sup>943</sup> In April 2018, New Jersey's Governor also signed AVR into law. Prior to authorizing AVR, New Jersey launched electronic voter registration in 2007 and allowed 17-year-olds to pre-register to vote.<sup>944</sup>

## THE ROLE OF CONGRESS

Article I, Section 4, of the Constitution expressly empowers the Congress with significant

authority to enact legislation regulating “time, place, and manner” of elections.<sup>945</sup> Although that provision makes states primarily responsible for administering congressional elections, it vests ultimate power in Congress.<sup>946</sup>

The Congress has a clear role in protecting the right of every eligible American to cast his or her ballot. Congress charted a path with the passage of the Voting Rights Act of 1965, one the courts upheld until 2013. The Voting Rights Act was repeatedly reauthorized on a bipartisan basis over the following decades, as Congress continued to hold hearings and gather evidence documenting that ongoing discrimination continued to necessitate congressional action to protect the constitutional right to vote. It is time again to fulfill this obligation.

As the Subcommittee found and has thoroughly documented, the evidence is clear: discrimination in voting still exists. Moreover, states are enacting new suppressive laws that force voters to overcome new hurdles at every turn. Every eligible American has the basic right to participate in our democracy. Even without the full protection of the Voting Rights Act or a Department of Justice that argues cases on behalf of the voter, Congress must uphold its responsibility.

Congress has the constitutional authority to regulate the time, place and manner of federal elections.<sup>947</sup> Congress also has a responsibility to conduct oversight, to gather evidence to inform the legislative process, and to ensure constitutional rights are protected and federal laws are carried out in a manner consistent with congressional intent.<sup>948</sup> Protecting the right to vote is no exception to this responsibility.<sup>949</sup>

The evidence detailed in this report demonstrates the clear need for congressional action. It is time to fulfill the responsibility Congress has abdicated since June 2013 and protect the right to vote for every eligible American.

---

<sup>945</sup> U.S. Const. Art. I, sec. 4, National Archives, transcript available at <https://www.archives.gov/founding-docs/constitution-transcript>.

“The times, places and manner of holding elections for Senators and Representatives, shall be prescribed in each state by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.”

<sup>946</sup> Nat'l Const. Ctr., Michael T. Morley & Franita Tolson, *Common Interpretation: Elections Clause*, <https://constitutioncenter.org/interactive-constitution/interpretation/article-i/clauses/750>.

<sup>947</sup> U.S. Const. Art. I, sec. 4, National Archives, transcript available at <https://www.archives.gov/founding-docs/constitution-transcript>.  
“The times, places and manner of holding elections for Senators and Representatives, shall be prescribed in each state by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.”

<sup>948</sup> U.S. Const. Art. I, sec. 1.

“All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.”

<sup>949</sup> The power to conduct investigations, while not explicitly laid out in the Constitution, has long been understood to reside in the “legislative powers” of U.S. Const. Art. I, sec. 1, *see also McGrain v. Daugherty*, 273 U.S. 135 (1927).

“In actual legislative practice power to secure needed information by such means has long been treated as an attribute of the power to legislate. It was so regarded in the British Parliament and in the Colonial legislatures before the American Revolution; and a like view has prevailed and been carried into effect in both houses of Congress and in most of the state legislatures. . . .

We are of opinion that the power of inquiry — with process to enforce it — is an essential and appropriate auxiliary to the legislative function. It was so regarded and employed in American legislatures before the Constitution was framed and ratified.”

In a bipartisan manner, Congress passed the Voting Rights Act of 1965 and reauthorized and expanded protections in 1970, 1975, 1982, 1992, and most recently in 2006. The last reauthorization, in 2006, passed the House of Representatives 390-33, passed the Senate unanimously, and was signed into law by Republican President George W. Bush. As the Court acknowledged in *Shelby County*, a federal district court subsequently found that “the evidence before Congress in 2006 was sufficient to justify reauthorizing” Section 5 and continuing the Section 4(b) coverage formula, and the Court of Appeals for the D.C. Circuit affirmed that decision.<sup>950</sup>

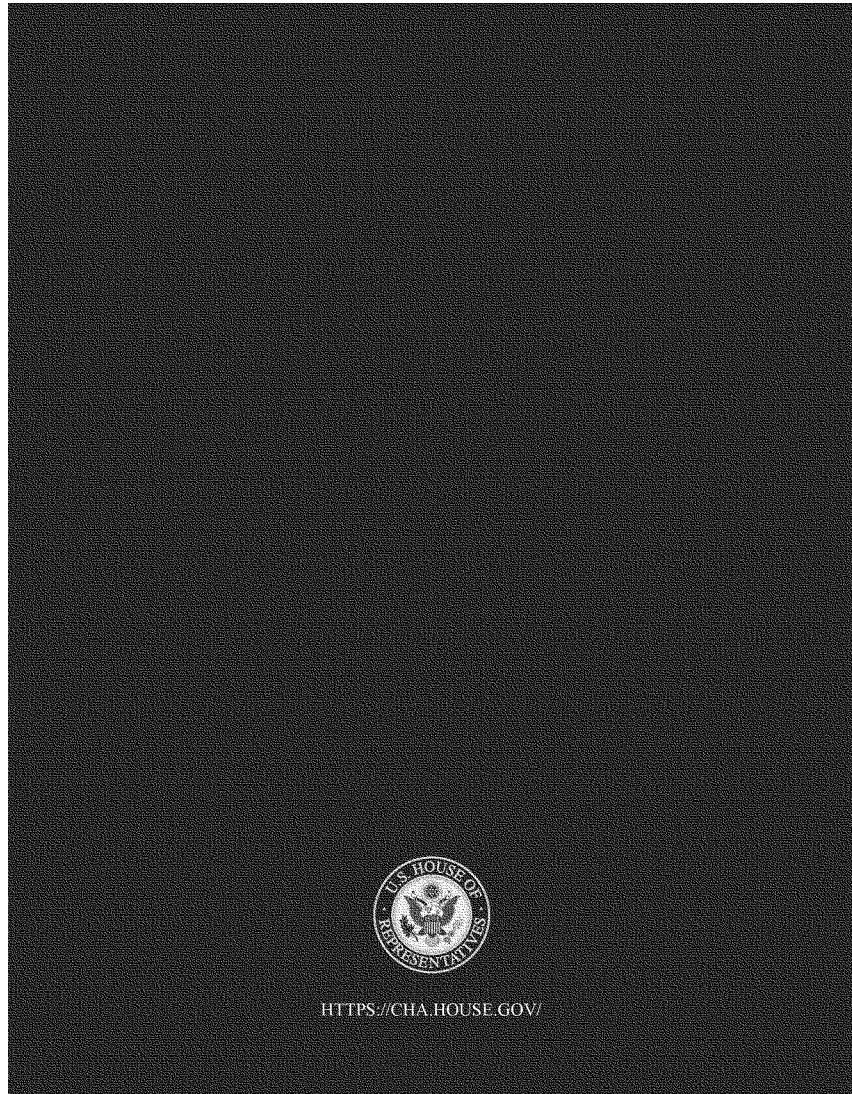

When the Court disagreed – in the face of the overwhelming evidence Congress gathered demonstrating a long history of discriminatory voting practices, its reliance on that record to forge bipartisan congressional intent to take action, and two lower court decisions upholding the reauthorized Voting Rights Act – the Court’s conclusions were based on the determination that “Nearly 50 years later, things have changed dramatically.”<sup>951</sup> While Congress and the lower courts clearly disagreed with that assessment at the time, as the Subcommittee found, in the wake of *Shelby County*, it is ironically the Court’s decision that has precipitated a dramatic change in conditions. This report details a wide range of new discriminatory practices that suppress the vote and not only justify but demand renewed congressional action.

America is not great because she is perfect, America is great because she is constantly working to repair her faults. It is time to repair this fault and recommit to the ideal that every eligible American has the right to vote, free from discrimination and suppression. The Voting Rights Act proved a powerful tool for protecting the cornerstone of American democracy, the right to vote, and to do so freely and fairly. Congress must honor this principle and basic right.

---

<sup>950</sup> *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612, 2622 (2013).

<sup>951</sup> *Shelby County, Ala. v. Holder*, 570 U.S. 529, 133 S.Ct. 2612, 2625 (2013).

Chairman BUTTERFIELD. If I am not mistaken—and staff can correct me if I am wrong—this is hearing number six of six.

STAFF. Five.

Chairman BUTTERFIELD. This is hearing five of five.

And I think we are going to be completing this work, and we are going to be documenting and writing up our findings. And I will be transferring this data, this information, to the Committee on the Judiciary, hopefully by June the 30th. That is my self-imposed deadline. That is my intention.

And then we will await action by the Committee on the Judiciary, both in the House and in the Senate. And, hopefully, within the foreseeable future, we will be able to write a formula, write a bill, and get it passed and signed by the President.

Thank you very much for your testimony.

Without objection, the Subcommittee adjourns.

[Whereupon, at 12:38 p.m., the Subcommittee was adjourned.]

## **QUESTIONS FOR THE RECORD**

---

**Hearing  
 Subcommittee on Elections  
 of the  
 Committee on House Administration  
 "Voting in America: A National Perspective on the Right to  
 Vote, Methods of Election, Jurisdictional Boundaries, and  
 Redistricting"  
 June 24, 2021  
 Majority Questions for the Record  
 for  
 Mr. Eric Holder  
 Chairman  
 National Democratic Redistricting Committee**

1. Often, litigation can take years to work its way through the court system. While that process is ongoing, Americans live and vote under maps that may later be found to be unconstitutional because of racial or partisan gerrymandering.

a. What harm is done to the voter when this happens?

**Answer:**

As is often said, justice delayed is justice denied. And the current redistricting system is unjust: politicians can group voters together based on their race or political party and successfully rob those voters of political power by gerrymandering their districts. Further, those voters very often have to vote in gerrymandered districts for years, even if a court eventually steps in to invalidate the illegal maps.

Though this happens often, one example is particularly telling. In 2011, the North Carolina legislature drew new state legislative and congressional maps that packed Black voters into certain districts and provided Republicans with an insurmountable electoral advantage. Those maps were immediately challenged in various lawsuits in both state and federal court, but they were not invalidated as illegal racial gerrymanders until 2016, after they had been used for multiple elections. And while the replacement maps were eventually struck down as illegal *partisan* gerrymanders, that did not happen until 2019. All of this delay meant that for almost the whole decade, many North Carolinians were voting in districts that were designed to decrease their political power.

It's important to remember that the harms from gerrymandering are permanent -- a single election determines who represents us for at least the next two years, but its effects stretch far beyond that. If representation is skewed by improper racial or partisan considerations, politicians are often insulated from any true general election challenge, meaning they do not have to listen to anyone except big donors and special interest supporters. That means those politicians don't actually represent the voters, and that prevents us from making meaningful progress on the issues Americans care about and

overwhelmingly agree on. The damage done to our states and our country by those warped priorities is not undone even if courts later order some gerrymandered maps to be redrawn.

That's why the reforms in the For the People Act are so vital. Beyond just banning partisan gerrymandering, it will ensure that courts hear and rule on redistricting cases quickly. That will make it much less likely that Americans will be forced to vote under congressional maps that are later shown to be illegal.

- b. How does racial or partisan gerrymandering undermine American democracy and the concept of democratic representation?

**Answer:**

A central part of American democracy is the right to equal representation. But when politicians choose their voters instead of the other way around, people are not represented equally. That is especially true when people are sorted based on their race or their political beliefs, because that sorting is designed to ensure that some groups have less political power than others. And not only does that create unfairness, it violates our founding principles -- our Constitution holds that the government may not treat us differently because of attributes like race or affiliation with a political party.

But racial and partisan gerrymandering does more than just violate the Constitution. As I mentioned in response to the first question, it affects all of our lives -- if elected officials know they will have no serious challenger in a general election, they only need to respond to donors and the most extreme members of their own party, and they ignore the will of the majority. And if Congress and state legislatures do not even attempt to solve the problems that most voters care about, it's hard to say our democracy is truly representative.

- 2. This decade will be the first redistricting cycle since the 1970s without the full protections of the Voting Rights Act. A 2019 report by MALDEF, AAJC, and NALEO found that, since 1982, at least 389 redistricting plans have been challenged and invalidated by a court or the Department of Justice, or amended or withdrawn by lawmakers, because of their discriminatory intent or effects. Who ultimately bears the cost of these challenges, and how does a preclearance regime address this issue?

**Answer:**

As Justice Ginsburg wrote in her *Shelby County* dissent, "Throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet." Experience since *Shelby County* was decided has shown that existing law cannot keep Americans from getting soaked in the rainstorm of voter suppression laws and gerrymandering. Even courts would invalidate those laws, lawsuits take time and money, meaning that

disenfranchised citizens will often face insurmountable obstacles to vindicating their rights.

That is why Section 5 of the Voting Rights Act was so important -- it put the burden on states with histories of voter suppression to prove that new laws were permissible rather than forcing voters to pay the cost of getting those laws struck down by a court. As we've seen just in the last few months, there is no question that states are willing to take advantage of the end of the preclearance regime to enact discriminatory laws for political advantage.

This demonstrates how critical it is for Congress to pass the John Lewis Voting Rights Advancement Act in the coming months. The Act would update the Voting Rights Act's preclearance formula, focusing on those states and localities that have a recent history of enacting regressive voting laws, and give the Department of Justice the power to review suspect measures. Restoring preclearance would mean going into this decade knowing that the most extreme laws will never be in force; failing to do so will mean requiring voters to go to court and wait for years before their rights are restored.

**Minority Questions for the Record  
for  
Mr. Eric Holder  
Chairman  
National Democratic Redistricting Committee**

1. During the hearing, you stated that you would submit supplemental comments concerning your organization's views and your personal views of the MALDEF lawsuit against the State of Illinois for unfair gerrymandering and redistricting practices. Please provide those views to the Committee and acknowledge whether or not your organization supports the lawsuit.

**Answer:**

As you know, both the MALDEF lawsuit, *Contreras v. Illinois Board of Elections*, and a similar lawsuit, *McConchie v. Illinois Board of Elections*, are rooted in the "one-person, one-vote" principle derived from the Constitution's Equal Protection clause. Most importantly, I agree that the one-person, one-vote principle is critically important and must be adhered to in all redistricting plans.

Another issue raised by both lawsuits is the importance of legislative representation for communities of color. A central goal of my organization is to ensure that in this redistricting cycle, communities of color are not only counted properly but are treated fairly in the redistricting process. This means, at the very least, ensuring that legislative and congressional districts are drawn to ensure that such communities can elect candidates of their choice and that their votes are not diluted through gerrymandering.

Rest assured that NDRC will be reviewing maps adopted all across the country to determine whether vote dilution has occurred.

The delayed release of Census data means that many states, like Illinois, will have shorter windows in which to draw maps. Therefore, it is especially important in this cycle that map-drawers, voters, and groups like NDRC work closely together to ensure that states enact maps that adhere to the one-person, one-vote principle and the provisions of the Voting Rights Act that ensure communities of color have the opportunity to elect their candidates of choice.

**HEARING  
SUBCOMMITTEE ON ELECTIONS  
OF THE  
COMMITTEE ON HOUSE ADMINISTRATION  
“VOTING IN AMERICA: A NATIONAL PERSPECTIVE ON THE RIGHT TO  
VOTE, METHODS OF ELECTION, JURISDICTIONAL BOUNDARIES, AND  
REDISTRICTING”  
JUNE 24, 2021  
MAJORITY QUESTIONS FOR THE RECORD  
FOR  
Ms. SARA FRANKENSTEIN, ESQ.  
PARTNER  
GUNDERSON, PALMER, NELSON, & ASHMORE LLP**

1. You are currently the Vice-Chair of the South Dakota State Advisory Committee to the U.S. Commission on Civil Rights. Does your State Advisory Committee have any plans to study access to the ballot and voting rights in your state? If yes, please elaborate on what you plan to study. If not, please explain why not.

**RESPONSE:**

The State Advisory Committee does not currently plan on studying access to the ballot and voting rights in South Dakota. In my law practice, I advise 59 of 66 county auditors who are the election administrators in South Dakota for federal elections. I also receive frequent calls from those election administrators regarding election-related problems that arise, and requests and complaints received from voters. I handle the questions, compliance, and lawsuits against those election administrators. Therefore, this is not something that I would need to further study. I would be happy to supply the information I have to my State Advisory Committee should the rest of the Committee be interested.

**MINORITY QUESTIONS FOR THE RECORD  
FOR  
Ms. SARA FRANKENSTEIN, ESQ.  
PARTNER  
GUNDERSON, PALMER, NELSON, & ASHMORE LLP**

1. Since the Supreme Court's 2013 decision in *Shelby County v. Holder*, have you noticed any enforcement trends related to Sections 2 and 3?

**RESPONSE:** Yes, the trend currently is for American Indian activist groups to bring ballot access cases under Section 2 regarding the location of in-person absentee voting. Our county auditors' offices are located in county courthouses or county administration buildings in the county seat. Our county seats are never on Indian reservation land. South Dakota does not have early voting but rather in-person absentee voting. While voters can vote absentee by mail, some prefer to do so in person. Each county has in-person absentee voting at the county auditor's office, which is always located off reservation land. Those physical dynamics have led to Section 2 cases alleging unequal access to that one particular method of voting – in-person absentee voting.

2. What should be the focus of any exercise of the Voting Rights Act?

**RESPONSE:** The Voting Rights Act should not be used for political gain but rather to ensure elections are "equally open to participation" by all races as highlighted in *Brnovich v. Democratic Nat'l Committee*, 141 S.Ct. 2321, 2337-2338 (2021).

3. How do we ensure the federal legislation properly supports Native American voters?

**RESPONSE:** Any federal election legislation should recognize that American Indian voters often have limited access to U.S. mail. Reservation living often translates to shared mailboxes some distance from homes or P.O. boxes requiring a trip to town.

4. It is our understanding that a small number of South Dakota counties were previously subject to preclearance and that at least some of those counties are made up almost entirely of tribal land. Could you please provide further explanation about this unique situation in South Dakota?

**RESPONSE:** Two South Dakota counties were added as covered jurisdictions based on the test found in 52 U.S.C.A. § 10303(b), which extended coverage over those political subdivisions which 1) maintained a "test or device" (including holding elections in English), and 2) had less than 50% of voting-age citizens registered on November 1, 1972, or less than 50% of such persons voted in the November 1972 Presidential election. In 1975, Shannon County (since renamed Oglala Lakota County) and Todd County were added as covered jurisdictions. 41 Fed.Reg. 784 (Jan. 5, 1976); *See* C.F.R. pt. 51 app (list of covered jurisdictions).

Oglala Lakota County is entirely within the boundaries of the Pine Ridge Indian Reservation, and Todd County is entirely within the boundaries of the Rosebud Sioux Reservation. Both Oglala Lakota and Todd Counties contract with neighboring counties to provide county services. For instance, Oglala Lakota County's contracted courthouse is in the adjacent county of Fall River. Those counties have chosen to contract in this manner as opposed to establishing their own county governments. Therefore, if an Oglala Lakota County resident needs county governmental services in person, a trip off the reservation to the adjacent county is required.

If those counties chose to establish their own county government within their own county boundaries, it would be financially difficult if not impossible to do so. Counties are primarily funded through property taxes paid by the property owners within the county. Land held in trust, such as reservation land, does not generate property taxes. Therefore, the more reservation land in a county, the less revenue base the county has to operate.

5. Please explain how governmental realities affect polling location access for Native Americans.

**RESPONSE:** For Election Day voting, it is often the location of tribal government buildings which serve as polling locations. There are few businesses and churches that can provide adequate space for precinct polling locations, so county auditors often work directly with tribes to utilize tribal government buildings as Election Day precinct polling places. As indicated above, county courthouses are always located off reservation, meaning American Indian voters must travel off reservation should they desire in-person election services prior to Election Day. I have negotiated, however, the use of Help America Vote Act money to fund satellite offices so that a county polling location can open on reservation land prior to Election Day to serve in-person absentee voters.

VOTING LAW CHANGES:  
ELECTION UPDATE

Wendy Weiser and Diana Kasdan

Brennan Center for Justice at New York University School of Law  
A001

**ABOUT THE BRENNAN CENTER FOR JUSTICE**

The Brennan Center for Justice at New York University School of Law is a non-partisan public policy and law institute that focuses on the fundamental issues of democracy and justice. Our work ranges from voting rights to campaign finance reform, from racial justice in criminal law to Constitutional protection in the fight against terrorism. A singular institution — part think tank, part public interest law firm, part advocacy group — the Brennan Center combines scholarship, legislative and legal advocacy, and communications to win meaningful, measurable change in the public sector.

**ABOUT THE BRENNAN CENTER'S DEMOCRACY PROGRAM**

The Brennan Center's Democracy Program works to repair the broken systems of American democracy. We encourage broad citizen participation by promoting voting and campaign reform. We work to secure fair courts and to advance a First Amendment jurisprudence that puts the rights of citizens — not special interests — at the center of our democracy. We collaborate with grassroots groups, advocacy organizations, and government officials to eliminate the obstacles to an effective democracy.

**ACKNOWLEDGEMENTS**

The Brennan Center gratefully acknowledges the Democracy Alliance Partners, Educational Foundation of America, The Ralph and Fanny Ellison Charitable Trust, Ford Foundation, Anne Gumowitz, Irving Harris Foundation, The Joyce Foundation, The JPB Foundation, Mitchell Kapor Foundation, John D. and Catherine T. MacArthur Foundation, Mertz Gilmore Foundation, Open Society Foundations, Rockefeller Family Fund, the State Infrastructure Fund, the Lawson Valentine Foundation, the William B. Wiener Jr. Foundation, and Nancy Meyer and Marc Weiss for their generous support of our voting work.

This report is the joint product of hours of work by many Brennan Center staff. In particular, we owe a very special thank you to Erik Opsal, not only for his thoughtful and thorough editing, but for his invaluable assistance in tracking everything that has happened on the voting front this year, and for his ability to do 10 things at once, and to do them all well. Research Associate Lucy Zhou is owed a debt of gratitude. This report could not have been completed without her endless hours of research and drafting assistance and impeccable skill at managing the many moving parts involved in bringing the final product together. Special thank you also goes to Democracy Program attorney Ian Vandewalker who provided comprehensive, lightning speed legal research throughout. And thank you to research associates Amanda Melillo and Carson Whitelemons for additional research and general assistance and attorneys Vishal Agraharkar, Jonathan Brater, David Earley, Keesha Gaskins, and Lee Rowland, all of whom helped with various aspects of the report on short order. Finally, we thank Michael Waldman, Jeanine Plant-Chirlin, Desiree Ramos Reiner, and John Kowal, whose contributions, encouragement, and strategic vision helped shape this report.

**ABOUT THE AUTHORS**

**Wendy Weiser** directs the Democracy Program at the Brennan Center for Justice at NYU School of Law, a non-partisan think tank and public interest law center. She founded and directed the center's Voting Rights and Elections Project, coordinating litigation, research, and advocacy efforts to enhance political participation and prevent voter disenfranchisement across the country. Her work and the work she directed protected the voting rights of hundreds of thousands of citizens in 2006, 2008, and 2010.

She has authored a number of nationally-recognized publications and articles on voting rights and election reform; litigated ground-breaking voting rights lawsuits; testified before both houses of Congress and in a variety of state legislatures; and provided policy and legislative drafting assistance to federal and state legislators and administrators across the country. She is a frequent public speaker and media contributor on democracy issues.

She is also the co-author of *Voting Law Changes in 2012*, a comprehensive roundup of all state legislative action in 2011 on voting rights, focusing on new laws as well as state legislation that has not yet passed or that failed. She has appeared on CNN, Fox News, Democracy Now!, and NPR's Morning Edition, All Things Considered, and Diane Rehm Show, among other outlets; her political commentary has been published in the New York Times, Roll Call, the Hill, Foreign Affairs, Huffington Post, and elsewhere; and she is frequently quoted by the New York Times, the Washington Post, the National Journal, Politico, and other news outlets across the country. Previously, she directed the center's Fair Courts Project, which seeks to preserve a fair and impartial judiciary. She also served as an Adjunct Professor at NYU School of Law, where she taught the Brennan Center Public Policy Advocacy Clinic.

Prior to joining the Brennan Center, Ms. Weiser was a senior attorney at NOW Legal Defense and Education Fund, where she worked on issues of access to the courts and domestic violence, a litigation associate at Paul, Weiss, Rifkind, Wharton & Garrison, and a law clerk to Judge Eugene H. Nickerson in the United States District Court for the Eastern District of New York. She received her J.D. from Yale Law School and her B.A. from Yale College.

**Diana Kasdan** serves as counsel for the Brennan Center's Democracy Program. As part of the Voting Rights and Election team, Ms. Kasdan focuses on litigation and advocacy to enhance political participation, prevent voter disenfranchisement, and ensure election integrity. She served as counsel in two cases challenging the 2011 Florida law that restricted voter registration drives and reduced early voting. She is also the author of *State Restrictions on Voter Registration Drives*, a new report that comprehensively analyzes state laws across the country that can make it harder for community groups to engage new voters in the electoral process.

Prior to joining the Brennan Center, Ms. Kasdan was a senior staff attorney at the ACLU Reproductive Freedom Project where she litigated a variety of constitutional and civil rights cases in federal and state courts across the country. Ms. Kasdan also developed and led the Project's nationwide advocacy campaign to promote state legislation restricting the use of restraints on pregnant inmates and to improve correctional policies regulating the conditions and care of pregnant women.

Ms. Kasdan graduated magna cum laude from New York University School of Law where she was inducted into The Order of the Coif, was an Arthur Garfield Hay Civil Liberties Fellow, a recipient of the George P. Foulk Memorial Award for Distinguished Scholarship and the Ann Petluck Poses Award for Outstanding Contribution to the Immigrant Rights Clinic, and served as a notes editor for the *NYU Law Review*. Following law school, Ms. Kasdan clerked for the Honorable Nicholas G. Garaufis of the United States District Court for the Eastern District of New York.

## INTRODUCTION

Our nation was founded on the principle that “all men are created equal.” To fulfill this promise, our voting system should be free, fair, and accessible to all eligible citizens.

A year ago, the Brennan Center issued a study documenting the recent and abrupt reversal of America’s long tradition of expanding voting access. Without national notice, legislators pressed scores of new bills that would make it harder for eligible Americans to vote. This report helped spur much-needed public scrutiny of these laws and their possible impact on our elections.

We estimated that these new laws — which included onerous voter ID laws, cutbacks to early voting, and community-based registration drives — “could make it significantly harder for more than 5 million eligible voters to cast ballots in 2012.” That number reflected the sheer quantity and scope of restrictive legislation already then enacted in 14 states.<sup>1</sup>

The drive to curb voting continued beyond October. All told, since January 2011, at least 180 bills were introduced in 41 states. Ultimately, 25 new laws and two executive actions were adopted in 19 states. These states represented 231 electoral votes, or 85 percent of the total needed to win the presidency.<sup>2</sup> This amounted to the biggest threat to voting rights in decades.

Today, the reality is very different, and far better for voters. The dramatic national effort to restrict Americans’ voting rights was met with an equally dramatic pushback by courts, citizens, the Department of Justice, and farsighted public officials.

**What does a survey of the landscape one week before Election Day 2012 now show? Strikingly, nearly all the worst new laws to cut back on voting have been blocked, blunted, repealed, or postponed. Laws in 14 states were reversed or weakened. As a result, new restrictions will affect far fewer than the 5 million citizens we predicted last year. For the overwhelming majority of those whose rights were most at risk, the ability to vote will not be at issue on November 6th.**

At the same time, the fight will continue well past November. Courts will examine laws in Wisconsin, Pennsylvania, and elsewhere. Politicians will introduce more bills to limit voting rights. Most significantly, the U.S. Supreme Court will likely hear two major cases that could substantially cut back on legal protections for voters. It has already agreed to hear a challenge, brought by Arizona, that could curb federal power to protect voting rights. The Court likely will also hear a challenge to Section 5 of the Voting Rights Act, which has proven to be a key protection against discriminatory laws, including many of the ones passed in 2011-12.

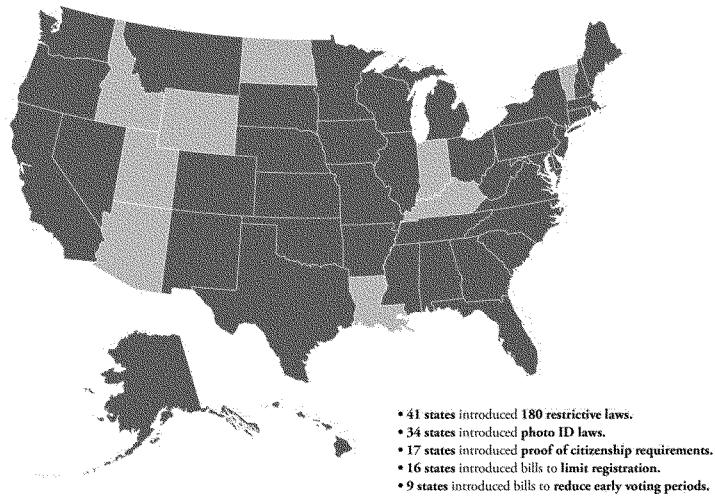

This upcoming legal battle unfolds against the backdrop of the recent struggle over voting rights — and in the wake of a clear demonstration of the vital need for strong laws to protect democracy.

## I. SUMMARY OF THE ASSAULT ON VOTING RIGHTS

### A. Changes in State Law

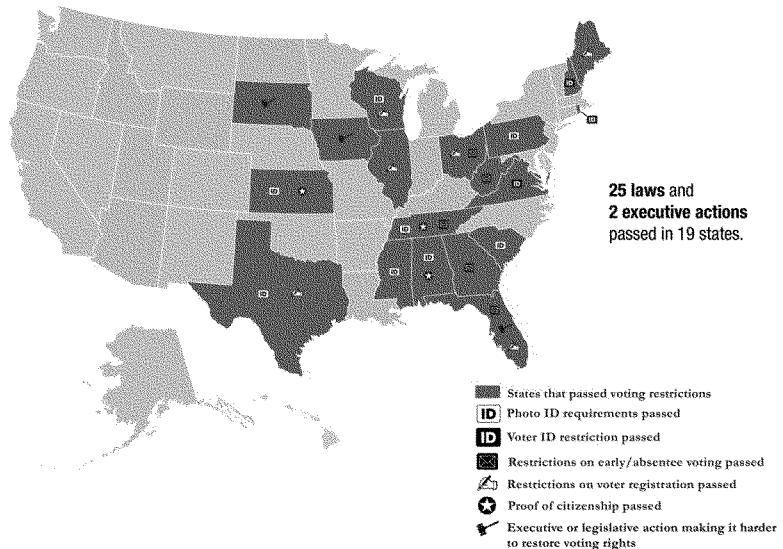

What did these new restrictions look like?

**STATES WITH RESTRICTIVE VOTING LEGISLATION INTRODUCED SINCE 2011**

**Voter ID Laws:** The most common new voting law — passed in nine states — was to require voters to show certain government-issued photo IDs to vote.<sup>3</sup> Every state already had some form of voter ID requirement in place, at least for new voters and often for all, but these laws were far more stringent. These highly inflexible and restrictive laws allow only select forms of ID, like driver's licenses and non-driver's IDs, which 11 percent of voting-age Americans — or 21 million citizens — do not have.<sup>4</sup> Studies also make clear that those without photo IDs are disproportionately seniors, African-Americans, the poor, students, or people with disabilities. Among older voters, 18 percent do not have the kind of photo IDs required by these laws; for African-Americans, 25 percent; and for low-income voters, 15 percent.<sup>5</sup> Three additional states passed new voter ID requirements, albeit ones that are less rigid.

## STATES THAT PASSED RESTRICTIVE VOTING LAWS

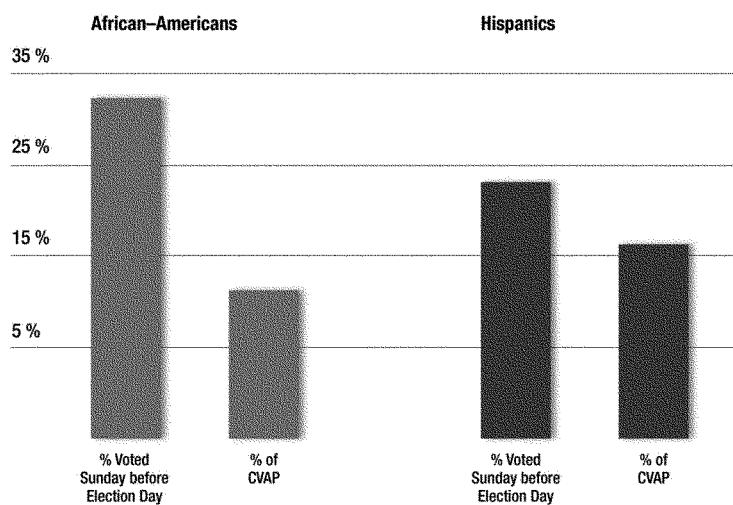

**Documentary Proof of Citizenship Laws:** Three states passed laws to require documentary proof of citizenship to register or to vote.<sup>6</sup> These requirements — which at least 7 percent of voting-age Americans do not have<sup>7</sup> — fall particularly hard on women and low-income citizens. A full one-third of women do not have citizenship documents with their current names and 12 percent of low-income individuals do not have such papers available.<sup>8</sup>

**Laws Making Voter Registration Harder:** Six states passed various laws making it harder for citizens to register to vote,<sup>9</sup> but the most common were restrictions on voter registration drives.<sup>10</sup> For example, in Florida, for a full year, onerous new restrictions on drives shut down groups like the League of Women Voters and Rock the Vote. These drives have historically played an extremely important role in getting people registered so they can vote. In both 2004 and 2008, hundreds of thousands of Florida voters registered through drives.<sup>11</sup> Once the new law passed, many of those drives ground to a halt and many Floridians lost a key opportunity to sign up. African-American and Latino citizens were especially hurt. Nationally, they register through drives at twice the rate as whites.<sup>12</sup> Elsewhere, new laws eliminated highly-popular Election Day registration,<sup>13</sup> and made it harder for people who have moved to stay registered to vote.<sup>14</sup>

**Laws Reducing Early Voting Opportunities:** After decades of states expanding early voting, for the first time there were efforts across the country to reduce this method for enhancing voting opportunities.<sup>15</sup> Five states cut back on early voting, and some in ways that were most likely to make it harder for minorities to get to the polls. For example, Ohio and Florida both eliminated early voting on the Sunday before the election — a day on which African-American and Latino churches organized very successful pews to polls drives in 2008.

A full one-third of citizens who voted early on the eliminated Sunday in Florida in 2008 were African-American, even though African-Americans make up only 13 percent of the state's citizen voting-age population.<sup>16</sup>

**NOVEL THREATS: ENDING SUNDAY EARLY VOTING**  
**Florida 2008**

**Laws Making it Harder to Restore Voting Rights:** Three states also made it harder to restore voting rights for persons with past criminal convictions. The governors of Florida and Iowa both issued executive orders reversing prior policies that increased opportunities to restore rights.<sup>17</sup> And South Dakota passed a law to disenfranchise persons who are on probation.

### B. Purges and Challenges

The onslaught of new laws was only the start. As legislative sessions wound down, efforts picked up to systematically purge voters from the rolls and challenge the eligibility of registered voters. These efforts continued in the final months leading up to the November election, creating additional — often last-minute and unforeseen — barriers to eligible, registered citizens.

Although regular list maintenance is an important tool for maintaining accurate voter registration lists, far too frequently, after secretive and inaccurate purge programs, eligible voters show up to the polls and discover their names have been removed from the voting lists.<sup>18</sup> Federal law, to some extent, constrains states' list maintenance activities, including by prohibiting systematic efforts to purge the voter rolls within 90 days of a federal election.

Colorado, Florida, and Texas, among other states, began to implement large-scale programs to remove registered voters in the latter part of 2012.<sup>19</sup> These attempts were wildly inaccurate and threatened to throw thousands of eligible citizens off the rolls.

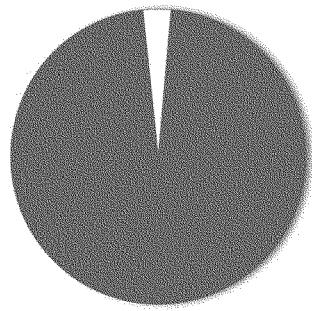

In Texas, in September 2012, a court blocked a last-minute massive purge of nearly 80,000 voters identified as deceased shortly after hundreds of eligible living voters received removal notices.<sup>20</sup> In Florida, Secretary of State Ken Detzner announced he had a list of more than 180,000 potential non-citizens on the rolls, necessitating a purge before the election. Under greater scrutiny, though, that list quickly dwindled to just fewer than 3,000 voters targeted for removal. Within weeks of notices going out to those individuals, at least 500 confirmed their citizenship, including Bill Internicola, a 91-year-old World War II veteran who was born in Brooklyn. By the time Florida was done refining its purge program, including the use of a federal data system, it reported only about 200 potential non-citizens on the rolls. These names are still being checked.<sup>21</sup> This pattern repeated in Colorado. Secretary of State Scott Gessler initially announced there were potentially 11,000 non-citizens on the rolls. That number dropped to just under 4,000, and then down to a list of only 141 people.<sup>22</sup> With less than two weeks to the election, Gessler abruptly announced he found an additional 300 potential non-citizens.<sup>23</sup> At the same time, private organizations including True the Vote, Judicial Watch, and local citizen-led groups have threatened or filed lawsuits demanding purging of the voter rolls.<sup>24</sup>

In addition to purges, there has been an increase in mobilization of political groups to challenge voters at the polls. In nearly every state, antiquated laws known as “challenger laws” allow private individuals to contest the eligibility of a voter either before or on Election Day. The growing use of challenger laws in recent years has exposed abuse that suppresses and intimidates eligible voters.<sup>25</sup> This year, True the Vote and other groups have announced large-scale plans to blanket the polls with challengers and poll watchers.<sup>26</sup> It is not yet known whether the current challenger plans will materialize on Election Day. Past efforts have targeted communities of color, students, and voters with disabilities. Shortly before the 2004 presidential election in Ohio, for instance, a local political party planned to station 3,500 challengers in select voting precincts. A court found that under this scheme, 97 percent of first-time voters in majority-black precincts would have encountered challengers at the polls compared to just 14 percent of first-time voters in majority-white precincts (see chart on next page).<sup>27</sup> Under scrutiny, the controversial plan was abandoned on Election Day.

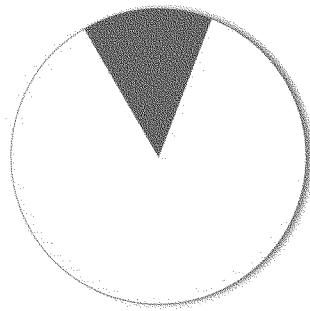

**SPENCER v. BLACKWELL**

Ohio 2004

**97% of new voters in  
majority African-American  
precincts to face challenges**

**14% of new voters in  
majority White precincts  
to face challenges**

That's the bad news. The good news is that, starting in 2012, this overwhelming series of attacks on voting finally came to a halt.

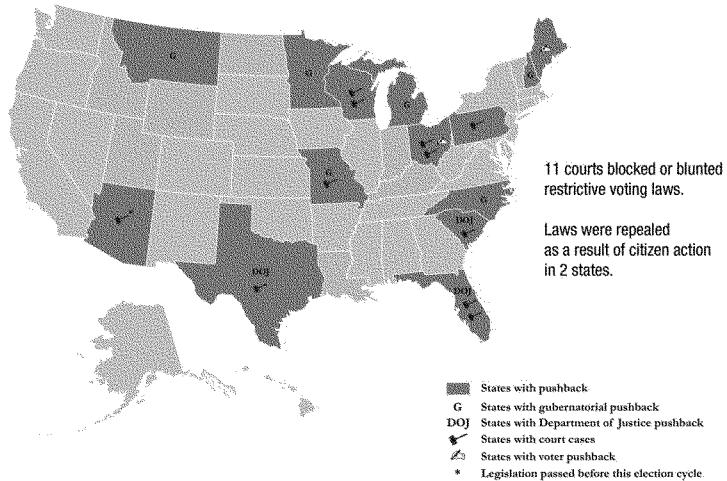

## II. THE PUSHBACK

The dramatic national effort to restrict Americans' voting rights was met with an equally dramatic pushback by citizens, voting rights groups (including the Brennan Center), courts, the Department of Justice, and farsighted public officials. This pushback was largely successful: As of the date of this report, restrictive voting measures have been blocked or blunted in 14 states. Specifically, for the 2012 elections:

- Restrictive photo ID requirements have been blocked in Pennsylvania, South Carolina, Texas, and Wisconsin, and vetoed in Minnesota, Missouri, Montana, New Hampshire, and North Carolina;
- Punitive regulations of voter registration drives have been permanently blocked in Florida and vetoed in Michigan;
- Cutbacks to early voting have been blocked in Ohio and mitigated in Florida;
- A law that required documentary proof of citizenship to register to vote has been blocked in Arizona; and
- Laws that would have cut back on voter registration opportunities have been repealed in Maine and Ohio, and vetoed in Montana.<sup>28</sup>

In the end, the bulk of the most onerous laws that would have made it harder for Americans to vote will *not* be in place for the 2012 elections. Of particular note, most of the voting restrictions adopted in swing states will not be in effect in 2012. By and large, voters have won the battle over voting rights in 2012.

### PUSHBACK AGAINST RESTRICTIVE VOTING LAWS

How did this happen? The pushback has taken a variety of forms — from citizen-led repeal efforts, to gubernatorial vetoes, to objections from the Department of Justice, to court cases. The most significant blow to the movement to restrict voting this year has been the dramatic string of legal victories by citizens and voter advocates, mostly in the past few months.

#### A. Citizen-Led Repeal Efforts

In two states, citizens rallied around referendums to repeal new voting restrictions.

In **Maine**, citizens mobilized against a law passed in June 2011 to eliminate the state's highly popular practice of Election Day registration, which had been in place for nearly four decades. Political scientists credit Election Day registration with increasing voter turnout by 3 to 6 percent.<sup>29</sup> Immediately after the law passed, a broad-based coalition of groups launched a campaign to "repeal" it via ballot initiative. In September 2011, they submitted close to 70,000 signatures (well above the 57,277 needed) to the secretary of state's office to qualify the measure for a "People's Veto," a referendum process that placed a repeal of the newly passed law on the November 2011 ballot.<sup>30</sup> On November 8, 2011, citizens in Maine voted 60 percent to 40 percent to restore Election Day registration in the state.<sup>31</sup>

In **Ohio**, citizens similarly organized to oppose an omnibus voting bill that Gov. John Kasich had signed into law in July 2011. The law cut the early voting period, eliminated the state's *de facto* same day registration week during the early voting period, and barred county boards of election from mailing out return-paid absentee ballots or applications, among other things.<sup>32</sup>

Just after the law's passage, Fair Elections Ohio, a coalition of lawmakers, labor unions, church groups, voting rights advocates, and concerned citizens, led by former Democratic Secretary of State Jennifer Brunner, organized a petition drive to oppose the new law. In Ohio, if a referendum to repeal a law is certified for the ballot, that freezes the law's provisions until after the election. Ultimately, foes submitted more than 307,000 signatures; after the state board of elections found some of the signatures deficient, they submitted even more.<sup>33</sup> In mid-December 2011, Secretary of State Jon Husted certified the referendum for the November 2012 ballot.<sup>34</sup>

Reportedly because of the massive mobilization around the issue, on May 8, 2012, Ohio lawmakers voted along party lines to repeal the new election law.<sup>35</sup> (Of note, Republicans voted to repeal their own statute, while Democrats wanted the referendum to proceed.) The referendum effort did not cover, and the legislature did not repeal, another newly enacted law that would have cut the state's early voting period and eliminated early voting the weekend before the election. That was addressed by the courts, as discussed below.

#### B. Gubernatorial Vetoes and Resistance

In six states, governors vetoed restrictive voting laws that had been passed by state legislatures, and in one more, gubernatorial resistance caused the legislature to soften a new law. Given the consistent partisan divide

over laws making it harder to vote we documented in *Voting Law Changes in 2012*, it is not surprising that all of the vetoes in 2011 were done at the hands of Democratic governors. By 2012, however, perhaps as a result of public pressure, opposition to restrictive voting laws had spread beyond Democrats. In mid-2012, two Republican governors pushed back on new voting restrictions, handing voters additional victories.

#### *I. Voter ID*

In rapid succession in May and June of 2011, Democratic governors in Minnesota, Missouri, Montana, New Hampshire, and North Carolina vetoed restrictive laws passed by Republican legislatures that would have required government-issued photo IDs to vote:

- The **Montana** legislature passed H.B. 152 on April 25, 2011, and Gov. Brian Schweitzer vetoed it on May 5, 2011.<sup>36</sup>
- The **Minnesota** legislature passed S.F. 509 on May 21, 2011, and Gov. Mark Dayton vetoed it on May 26, 2011.<sup>37</sup>
- The **Missouri** legislature passed S.B. 3 on May 26, 2011, and Gov. Jay Nixon vetoed it on June 17, 2011.<sup>38</sup>
- The **North Carolina** legislature passed H.B. 351 on June 16, 2011, and Gov. Beverly Perdue vetoed it on June 23, 2011.<sup>39</sup>
- The **New Hampshire** legislature passed S.B. 129 on June 8, 2011,<sup>40</sup> and Gov. John Lynch vetoed it on June 27, 2011.<sup>41</sup>

In New Hampshire, a second voter ID bill eventually became law. It is far less rigid than the one originally proposed. The original bill (S.B. 129) would have required voters to present a photo ID issued by the U.S. government or the state of New Hampshire, or a driver's license from another state. Voters without acceptable ID would not have had their votes counted unless they returned to a town clerk's office within two and a half days of the election with an acceptable photo ID, a waiver from the secretary of state, or an affidavit of religious exemption. Lynch vetoed this bill, as well as a less restrictive voter ID bill (S.B. 289) introduced in the following session.<sup>42</sup> On June 27, 2012, however, the state legislature voted with two-thirds majorities to override the veto of the second bill.<sup>43</sup>

Under the new law, New Hampshire citizens seeking to vote in person in the 2012 general election will now have to show one of a variety of forms of photo ID — including a driver's license, non-driver's ID card, a U.S. armed services ID card, and a student ID card — or else submit an affidavit of identity at the polls. Beginning in September 2013, some of those forms of ID will no longer be accepted, though voters without acceptable IDs will still be able to vote a ballot that will count after executing an affidavit of identity.

In **Virginia**, Republican Gov. Bob McDonnell surprised observers by similarly pushing back on restrictive voter ID bills. In March 2012, Virginia lawmakers passed S.B. 1<sup>44</sup> and H.B. 9,<sup>45</sup> which would have required voters to present limited forms of photo IDs at the polls. These bills gave voters without those IDs on Election Day one day to present them to election officials. Rather than signing the bills into law, on April 9, 2012, McDonnell introduced several amendments to soften the bills' requirements and reduce their burdens on voters without IDs. To explain his action, the governor cited a desire "to preserve [the] goal of preventing

illegal voting while promoting voter participation, and making sure we do not stand in the way of legitimate voting” and “to ensure that this legislation complies with the requirements of the Voting Rights Act of 1965.”<sup>46</sup> The legislature rejected one of the governor’s proposed amendments — to require election officials to count the provisional ballots cast by voters without accepted IDs if their signatures matched those on file with the state — but adopted the remaining amendments.<sup>47</sup> McDonnell signed the bills into law on May 18, 2012.<sup>48</sup>

Under the new law, Virginians will have to present IDs before voting at the polls, though acceptable IDs include not only photo IDs but also a range of non-photo IDs, including a Virginia voter registration card that is mailed to all registered voters. In his signing statement, McDonnell pledged to “ensure that no voter is overly burdened by the provisions included in this legislation,” and to send “every voter in Virginia a free voter card . . . to ensure they have at least one form of ID to bring with them to the polls.”<sup>49</sup>

## *2. Voter Registration and Other Restrictions*

In two states, governors vetoed bills that would have made it more difficult to register to vote, among other restrictions.

In **Montana**, as in Maine, the new Republican legislature passed a bill on April 5, 2011 that would have eliminated Election Day registration in the state. Democratic Gov. Brian Schweitzer vetoed that bill on April 13, 2011, leaving Election Day registration in place.<sup>50</sup>

In **Michigan**, on July 3, 2012, Republican Gov. Rick Snyder vetoed several controversial bills that would have made it harder to vote.<sup>51</sup> S.B. 754 sought to impose unnecessary administrative burdens on voter registration drives that would have hampered groups seeking to help register voters.<sup>52</sup> S.B. 803 would have required voters to affirmatively state they were citizens before receiving their ballots at the polling place, even though they already affirmed citizenship when registering to vote.<sup>53</sup> Voters who did not affirm their citizenship a second time would be automatically challenged by election officials.<sup>54</sup> Also vetoed, H.B. 5061 would have required a registered voter to check a repeat citizen affirmation box when applying for an absentee ballot. Failure to do so would have resulted in the voter’s absentee ballot not being counted unless she could specifically affirm her citizenship on Election Day.<sup>55</sup>

## C. Pushback in Legislatures

The political pushback against laws making it harder to vote did not only come from governors. In many states where restrictive voting bills were expected to pass, community efforts helped prevent the legislature from passing them in the first place. Overall, in 2011-12, 41 states introduced 180 bills restricting voting. Only 25 of those bills in 19 states eventually passed (and many of those have been blocked since).

Nebraska was one state with a successful legislative pushback. There, legislators introduced a bill (L.B. 239)<sup>56</sup> to require voters to present government-issued photo IDs to vote, as well as an amended bill that would have let voters also present a voter registration card.<sup>57</sup> A coalition of approximately two dozen organizations, including Nebraskans for Civic Reform and the Nebraska Association of County Officials, held protests and

rallies to voice their opposition to the bill,<sup>58</sup> raised public arguments about the negative impact the bill would have on voters and on the state's treasury,<sup>59</sup> and otherwise lobbied state legislators. The bill's backers could not defeat a filibuster, falling three votes short on March 28, 2012.<sup>60</sup>

#### D. Department of Justice Resistance

Throughout 2011, the Department of Justice was silent on the wave of restrictive voting laws in the states. The Department's voting rights law enforcement record during that period was also very sparse.<sup>61</sup> But on December 13, 2011, at a speech at the LBJ Library in Austin, Texas, Attorney General Eric Holder for the first time expressed public concerns over the "state-level voting law changes" that Rep. John Lewis (D-Ga.) had condemned as part of "a deliberate and systematic attempt to prevent millions of elderly voters, young voters, students, [and] minority and low-income voters from exercising their constitutional right to engage in the democratic process."<sup>62</sup> The attorney general said: "It is time to ask: what kind of nation — and what kind of people — do we want to be? Are we willing to allow this era — our era — to be remembered as the age when our nation's proud tradition of expanding the franchise ended?"<sup>63</sup>

Ten days later, the Justice Department issued a letter objecting to South Carolina's new photo ID law under Section 5 of the federal Voting Rights Act.<sup>64</sup> Since then, the Department also has objected to restrictive laws in Texas and Florida. It has delayed and may challenge Mississippi's new law, as well. In some cases, it refused to "preclear" changes; in others, it sought to block restrictions in court. In sum, the Department forcefully stepped forward to protect voters' rights.

Under the Voting Rights Act, certain states with a history of discrimination in voting must get approval — or "preclearance" — from the Department of Justice or a federal court in Washington, D.C. before implementing any changes to their voting laws or practices. The Department, in turn, is required to review all state law changes submitted to it for approval, and to object to those changes unless the state can prove they neither have the purpose nor the effect of worsening minorities' position with respect to the franchise.

Based on the information submitted by **South Carolina**, the Department rejected its voter ID law, finding that non-white voters were far more likely than white voters to lack accepted IDs.<sup>65</sup> This objection prevented South Carolina's law from going into effect — unless and until a court found otherwise. Soon after, the Palmetto State announced it would go to court to fight the Department's determination — and to challenge the constitutionality of a key provision of the landmark Voting Rights Act.<sup>66</sup> At the Republican presidential primary debate on Martin Luther King Day the next month, Texas Gov. Rick Perry praised South Carolina for being "at war with this federal government" over the Voting Rights Act and the state's voter ID law.<sup>67</sup> On February 7, 2012, South Carolina filed a lawsuit seeking judicial preclearance of its voter ID law, but omitted its threatened challenge to Section 5 of the Voting Rights Act.<sup>68</sup> (That provision was nonetheless challenged by a number of other states and jurisdictions.)

While South Carolina's lawsuit was pending, the Department objected to new voting laws from two other states — Texas and Florida — both of which had also filed lawsuits seeking to preclear their laws under the Voting Rights Act. On March 12, 2012, the Department objected to **Texas's** strict photo ID law on the ground that it disproportionately harmed the state's minority voters.<sup>69</sup> The Department found that, based on

the data supplied by the state, between 604,000 and 795,000 registered Texans lacked IDs that would have been accepted for voting under the new law, and that Latinos were between 46 percent and 120 percent less likely than non-Hispanic voters to have state-issued photo IDs.<sup>70</sup>

In Florida's case, the state withdrew its preclearance request before filing its lawsuit in federal court. Nonetheless, as part of the litigation, the Department was required to take a position on whether the voting law changes at issue — new restrictions on voter registration drives, cutbacks to early voting, and new procedures for voters who move to new counties — comported with the Voting Rights Act. On March 20, 2012, the Department said the voter registration and early voting changes did not pass muster because they disproportionately harmed minority voters.<sup>71</sup>

In each of these cases, the Department of Justice's determination under Section 5 of the Voting Rights Act was not the final word because all three states brought suit in federal court in Washington, D.C. The Department's role thus switched from decision-maker to litigant. In this capacity, too, the Department played a critical part in blocking these new laws.

While the Department resisted some of the most onerous new voting laws, it did preclear the new voter ID law in New Hampshire, which had been softened after the governor vetoed a more restrictive bill.<sup>72</sup> (The new law is described in Section III below.) The Department has not yet made a determination with respect to a new voter ID law in Mississippi, but as a result of its review and request for additional information, the law will not be in effect for the 2012 elections.

#### E. Court Victories

By far the most striking pushback against new voting restrictions has come through the courts. Virtually every court to consider a law or policy restricting voting this past year found in favor of the voters. Overall, **11 court decisions in 8 states** blocked or blunted new laws that would have made it harder for eligible Americans to vote.

- **Wisconsin:** In March of this year, two separate state courts blocked Wisconsin's strict new photo ID law on the ground that it violated the state's constitution. One court found the new law unfairly burdened citizens' right to vote under the state constitution,<sup>73</sup> and the other found the law was both beyond the legislature's powers and inconsistent with a state constitutional provision setting out the exclusive qualifications for voting.<sup>74</sup>

Although those decisions are still being appealed, the law will not be in effect for the 2012 election. The impact is significant: According to one court's findings, approximately 221,975 eligible voters in Wisconsin do not have IDs that would have been accepted under the new law.<sup>75</sup> Other estimates are even higher.<sup>76</sup>

- **Missouri:** Also in March 2012, a state court in Missouri blocked an initiative to place a voter ID constitutional amendment on the November 2012 ballot, ruling the language of the ballot initiative was misleading.<sup>77</sup> Because the Missouri Supreme Court struck down the state's prior photo ID law as

unconstitutional, voters will not have to show photo ID at the polls unless and until the state constitution is amended to require such ID.

- **Arizona:** On April 17, 2012, an expanded panel of the U.S. Court of Appeals for the Ninth Circuit sitting en banc blocked an Arizona law, enacted several years earlier, requiring voters to provide documentary proof of citizenship to register to vote. In a 7-2 decision written by a judge appointed by President George W. Bush, the court found that Arizona's law was inconsistent with the federal Motor Voter law, which requires states to "accept and use" a uniform federal voter registration form, delegates authority to a federal agency over that form, and seeks to streamline the registration process nationally.<sup>78</sup>

As a result of this decision, Arizona's proof of citizenship requirement is currently blocked. While the law was in effect, tens of thousands of voters were denied registration because they did not provide adequate proof of citizenship.<sup>79</sup> On August 15, 2012, the U.S. Supreme Court agreed to review this decision during the next term.

- **Florida (voter registration drives):** On May 31, 2012, a federal court in Tallahassee preliminarily blocked enforcement of the most onerous provisions of Florida's new law restricting community-based voter registration drives.<sup>80</sup> The court found the law likely violated the First Amendment and the federal Motor Voter law and noted that "allowing responsible organizations to conduct voter registration drives — thus making it easier for citizens to register and vote — promotes democracy."<sup>81</sup> After the parties reached a settlement agreement, on August 30, 2012, the court issued a final order permanently removing restrictions on community-based voter registration drives.<sup>82</sup>

While the law was in effect, civic groups across the state — including plaintiffs the League of Women Voters of Florida and Rock the Vote — had completely shut down their voter registration drives. As soon as the law was blocked, drives resumed, registering thousands of Florida voters.<sup>83</sup> Registration numbers, which had fallen statewide in the wake of the law, jumped up after the law was enjoined in late May 2012, and August and September were the two months with the highest number of new voter registrations in 2012.<sup>84</sup>

- **Florida (early voting):** In a decision issued on August 16, 2012, a three-judge court in the District of Columbia refused to preclear Florida's new law cutting back on early voting days and hours under the federal Voting Rights Act.<sup>85</sup> The court found the state had not met its burden of showing that the changes to early voting would not have a racially discriminatory effect on voters in Florida's five counties covered by the Act.<sup>86</sup>

As a result of this decision, Florida submitted an early voting plan for the five covered counties to offer the same number of early voting hours as required by the prior law, which was equivalent to the maximum permitted under the new law.<sup>87</sup> Most of Florida's largest counties, including Miami-Dade, Broward, Orange, and Palm Beach, also followed suit.<sup>88</sup> Most Florida voters, therefore, will face the same number of early voting hours as in past elections, but those hours will be spread over fewer days.

- **Texas:** On August 30, 2012, shortly after the Florida decision, another three-judge court in Washington, D.C. rejected Texas's strict photo ID law under the federal Voting Rights Act.<sup>89</sup> The court found the state had not met its burden of showing that the law would not have a discriminatory effect against minorities. To the contrary, the court found the evidence showed that the costs of obtaining qualifying ID "will fall most heavily on the poor and that a disproportionately high percentage of African Americans and Hispanics in Texas live in poverty."<sup>90</sup>

This decision means Texas's voter ID law will not be in effect for the upcoming election or future elections, although the lawsuit continues. (The court is now considering Texas's argument that the federal law at issue — Section 5 of the Voting Rights Act — is itself unconstitutional.) The impact of this on Texas voters will be substantial, although the number of affected voters is difficult to quantify.<sup>91</sup> According to the original data provided by Texas, more than 604,000 registered voters lack qualifying IDs.<sup>92</sup>

- **Pennsylvania:** Pennsylvania's highly restrictive new photo ID law was also blocked in large part by a state court on October 2, 2012.<sup>93</sup> The court had originally refused to enjoin the law under the state constitution, crediting the state's promises that it would be able to get conforming IDs into the hands of all affected voters in time for the election. On September 18, 2012, however, the state Supreme Court, in a 4-2 decision joined by the court's three Republican members, vacated that decision, finding that the trial court had relied too much on supposition, and that the state's implementation of a new photo ID law in the short term would violate the state constitution unless "there will be no voter disenfranchisement" as a result of that implementation.<sup>94</sup> The Court sent the case back to the trial court, which, in turn, issued a temporary order prohibiting the state from disenfranchising voters who do not have photo IDs in 2012.

Under this ruling, the state may still ask voters to present state-issued photo IDs at the polls in November, but it must allow all voters, including those who do not have qualifying IDs, to vote by regular ballot. After November, the injunction will be reconsidered. Although the number of affected voters is disputed, as many as 758,000 registered Pennsylvanians may lack acceptable IDs, according to the Pennsylvania Department of Transportation.<sup>95</sup> The state itself conceded that at least tens of thousands would be affected.

- **Ohio (early voting).** On October 5, 2012, a federal appellate court — agreeing with the federal district court below — blocked Ohio's new law that significantly reduced opportunities for in-person early voting.<sup>96</sup> The suit had been brought by the Obama presidential campaign. Among other things, the new rules prohibited early in-person voting for all citizens except for military service members during the three days before Election Day. The court found the policy violated the U.S. Constitution's Equal Protection Clause. It held that the state could not justify its refusal to offer all voters the same early-voting opportunity it already provided to military voters. The U.S. Supreme Court rejected Ohio's request for emergency relief.<sup>97</sup>

As a result Ohio will offer early voting in the last three days before the election. This will significantly benefit Ohio voters, especially African-Americans, who heavily take advantage of early voting. In Ohio's largest county, Cuyahoga, African-American voters accounted for 28.6 percent of the overall vote but cast 77.9 percent of early in-person ballots. Overall, African-Americans were 26 times more likely to vote early than white voters.<sup>98</sup>

- **Ohio (provisional ballots).** Another appellate court decision, issued on October 11, 2012, prohibited Ohio from refusing to count provisional ballots cast in the right polling place but wrong precinct because of poll-worker error.<sup>99</sup> The Sixth Circuit panel found that it was "fundamentally unfair" to disqualify wrong-precinct ballots caused by poll-worker error, and blocked this policy under both the Due Process and Equal Protection Clauses of the U.S. Constitution.<sup>100</sup> After the case was sent down to the federal district court, the ruling was expanded to cover all wrong-precinct ballots that are the result of poll-worker error, even those cast at the wrong polling place.<sup>101</sup>

The potential impact of this decision is significant. In 2008, more than 14,000 wrong-precinct provisional ballots were cast in Ohio.<sup>102</sup> A closely disputed judicial race in 2010 turned on the disposition of wrong-precinct provisional ballots.<sup>103</sup>

- **South Carolina:** On October 10, 2012, another three-judge federal court in Washington, D.C. ruled there was not enough time left to implement the state's voter ID law for the 2012 general election without significant disenfranchisement.<sup>104</sup> The court did pre-clear the requirement for future elections, but it clarified aspects of the law so that it "does not require a photo ID to vote."<sup>105</sup> Instead, South Carolinians can continue to use their non-photo voter registration card after 2012, so long as the voter signs an affidavit stating the reason for not having obtained a photo ID.<sup>106</sup> The preclearance going forward does not undermine the victory for voters. As Circuit Judge John Bates noted in his concurring opinion, "Act R54 as now pre-cleared is not the R54 enacted in May 2011."<sup>107</sup> Instead, the law was substantially mitigated both by the state's expansive interpretation of an exception to the photo ID requirement and by the state's efforts to expand access to photo ID.

As a result of this decision, SC voters will not be required to provide photo ID in this year's elections, and going forward, they will have the ability to vote a valid ballot even if they do not have approved photo IDs. This means that the 130,000 registered voters who were found to lack acceptable photo IDs<sup>108</sup> will be able to vote and to have their votes counted.

Taken together, these decisions dismantle the bulk of the most restrictive new voting laws that would have been in place for the 2012 elections. The states that saw restrictive laws blocked or blunted by courts produce half the electoral votes needed to win the presidency. Without the courts, millions of citizens would have found it far harder to vote. This dramatically underscores the importance of the courts in protecting Americans' fundamental right to vote.

These decisions are noteworthy not only for their overall effect on voters but also for the sheer consistency of their results. As noted, almost every court to have considered a law or policy making it harder to vote blocked or mitigated it. There are exceptions. Most notably, a federal appeals court allowed severe restrictions

on voter registration drives in Texas to stand; a state appeals court upheld Tennessee's voter ID law in October 2012. But voters have won the vast majority of cases, at least for now. This is true despite the fact that the cases involved a variety of different legal claims and theories in different courts across the country.<sup>109</sup> This is true regardless of the political backgrounds of the judges deciding the cases. This overwhelmingly positive outcome stands in contrast to past election cycles, where litigation results have been more mixed.

What accounts for the remarkable string of litigation victories? In part, judges likely were struck by the scope of potential disenfranchisement. Each of the court cases considered — and often sought to quantify — the extent to which the laws at issue could prevent eligible citizens from voting. Where new laws were found to have a disenfranchising effect, they were typically blocked or mitigated to prevent that effect. Courts have also been sensitive to the fact that the wave of new voting restrictions generally runs counter to core principles of American law, which tend to promote democracy and seek to fulfill the promise of political equality espoused in the Declaration of Independence.

The decisions also suggest that courts are uncomfortable with what appears to be a push by some politicians to manipulate rules so certain voters would find it particularly hard to participate. Although no decision found improper motives behind new laws, courts did raise questions about legislators' purposes. For example, Judge Robert Hinkle in Florida questioned the state's reason for requiring groups conducting voter registration drives to submit completed forms to state officials within 48 hours of their being signed:

[T]he state has little if any legitimate interest in setting the deadline at 48 hours. The short deadline, coupled with substantial penalties for noncompliance, make voter-registration drives a risky business. If the goal is to discourage voter-registration drives and thus also to make it harder for new voters to register, the 48-hour deadline may succeed. But if the goal is to further the state's legitimate interests without unduly burdening the rights of voters and voter-registration organizations, 48 hours is a bad choice.<sup>110</sup>

In Pennsylvania, the state Supreme Court raised serious questions during oral argument as to why the state insisted on trying to rush through a last-minute implementation of a new photo ID law before a working apparatus for issuing acceptable IDs was in place.<sup>111</sup> That concern was reflected in the court's decision, which referenced the state's "ambitious effort" to "bring the new identification procedure into effect within a relatively short timeframe."<sup>112</sup>

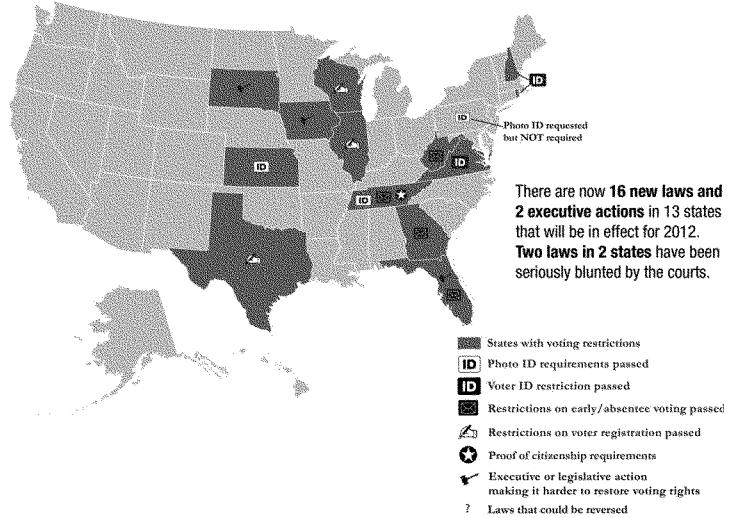

Regardless of the reasons, the results are unmistakable: Voters have largely won the litigation battles of 2012. And, as discussed above, they have successfully fought back new voting restrictions in a variety of other ways as well. The big story of this election cycle, therefore, is not just the massive legislative effort to cut back on voting rights across the country — it is also the massive and surprisingly successful effort by voters to protect their rights. But the job is not yet done.

### III. THE DAMAGE DONE

#### A. New Voting Restrictions In Effect For 2012

Despite these victories, voters are somewhat worse off than they were in 2010. Going into the 2012 election, voters have been saddled with **18 new laws and executive actions in 13 states** that make it harder for eligible citizens to register and to vote.<sup>113</sup> These states account for 165 electoral votes, or 61 percent of the total needed to win the presidency.<sup>114</sup> Also, as discussed below, the legal flux surrounding the laws that passed but were blocked or blunted has contributed to increased confusion and uncertainty about election procedures this year. This has the potential to further impact the 2012 election.

#### RESTRICTIONS STILL IN PLACE FOR 2012 ELECTION

In short — despite the tremendous victories in public squares, statehouses, and courthouses — not all damage has been averted. Following are the remaining voting restrictions that newly apply to millions of eligible citizens.

*1. Laws Making It Harder to Register to Vote*

Leading up to this election, new rules in four states make registering to vote harder, most notably by tightening the rules for voter registration drives.

- In **Florida**, for most of this election cycle, a new regulatory scheme imposed insurmountable obstacles on community-based groups and large national nonprofits that have registered hundreds of thousands of new voters in Florida for decades. Under the federal court order that blocked the law, drives now have 10 days, instead of just 48 hours, to return forms, and the most onerous of the previously-imposed registration and reporting requirements are no longer in force.<sup>115</sup>

Unfortunately, by the time the court acted, groups were left with only four months to register new voters before the close of registration. Many of Florida's largest and most well-established nonpartisan voter registration drives were shut down, or severely handicapped, for an entire year.<sup>116</sup> During that 12-month period, there were **nearly 100,000 fewer new voter registrations in Florida** than there had been during the same period before the 2008 presidential election, according to our analysis.<sup>117</sup> This is a 14 percent decrease in the rate of new registrations from 2008 to 2012. A recent scholarly study of the impact of Florida's restrictions on voter registration found a similar rate of decline in new registrations, noting an even greater drop in new registrations among voters aged 21 and younger.<sup>118</sup>

- In **Texas**, the new rules cracking down on voter registration drives were particularly harsh. Although Texas already regulated drives more severely than perhaps any other state, it enacted new changes to make its laws even more restrictive. In particular, only residents of Texas who are eligible to vote can participate in voter registration drives.<sup>119</sup> This requirement effectively excluded major national voter registration groups from conducting drives in Texas.<sup>120</sup>
- Although **Illinois** also tightened its regulation of voter registration drives, its new rule is not nearly as hurtful as those in Florida and Texas. Voter registration drives participating in the official volunteer system now have less time to return collected applications to election officials.<sup>121</sup> But this reduction in time does not apply to groups only using the national mail-in voter registration form. Nonetheless, participation in the official volunteer system is still common in Illinois because it is mandatory for any drives collecting the state registration forms.<sup>122</sup>
- **Wisconsin** also made registering to vote harder for new residents of the state. It changed its voter eligibility requirements, by extending the minimum period of residency from 10 to 28 days.<sup>123</sup>

*2. Voter ID*

Of the five states enforcing new voter ID laws this November, only two impose strict photo ID requirements. Others afford more flexibility, such as accepting a broader range of IDs or allowing an affidavit of identity.

- In **Kansas and Tennessee**, where the laws are particularly rigid, registered voters will be required to show government-issued photo identification at the voting booth. Of the two, Kansas accepts a considerably broader range of photo IDs than does Tennessee. For example, in addition to a driver's license from *any state*, U.S. passport, or government employee ID, a state student ID card or state public assistance ID card are acceptable.<sup>124</sup> Voters without acceptable ID may vote a provisional ballot, and in most cases they have six days to present acceptable ID to election officials to ensure their votes are counted.<sup>125</sup> Tennessee, on the other hand, expressly refuses to accept student IDs from institutions of higher education.<sup>126</sup> While certain individuals may qualify for the option of executing an affidavit of identity at the polls,<sup>127</sup> most voters without ID will have to cast a provisional ballot and will have only two business days to provide acceptable ID.<sup>128</sup> Thus, for the first time in Kansas and Tennessee, eligible citizens who do not have the kind of ID required by these new laws will bear the burden and costs of obtaining it, or else find themselves unable to cast a regular ballot on Election Day.<sup>129</sup> Others may simply be dissuaded from even registering or going to the polls because they do not have, or cannot readily obtain, the necessary photo ID.
- In contrast, **New Hampshire, Rhode Island, and Virginia** all give voters without photo IDs a variety of options for having their votes counted. New Hampshire and Rhode Island both allow non-photo IDs for 2012 elections and will start having photo ID requirements next year or later. New Hampshire's law will allow election officials to verify voters' identity without strictly requiring one of the forms of ID on the statutory list, and voters without ID may vote after executing an affidavit attesting to their identity.<sup>130</sup> In Rhode Island, voters who are unable to provide approved photo ID will be allowed to vote a provisional ballot, which will be counted if the signatures on the ballot and the voter's registration match.<sup>131</sup> And in Virginia, the list of acceptable IDs includes documents without a photo that show the voter's name and address, such as a utility bill, bank statement, government check, or paycheck.<sup>132</sup>

### *3. Making it Harder to Restore Voting Rights*

In three states, hundreds of thousands of citizens with past felony convictions will be left out of this election and will find it difficult or impossible to restore their voting rights in the future.<sup>133</sup>

- **Florida** and **Iowa** both reversed prior executive actions that made it easier for citizens with past criminal convictions to restore their voting rights. In 2007, Florida Gov. Charlie Crist streamlined the restoration process, and since then the voting rights of at least 150,000 Floridians were restored.<sup>134</sup> But since Gov. Rick Scott turned back the rules last year, no voting rights have been restored in Florida.<sup>135</sup> Similarly in Iowa, although an executive order by then Gov. Tom Vilsack had restored the voting rights of 80,000 persons with past convictions, in 2011, Gov. Terry Branstad revoked that order. Now Iowa permanently disenfranchises all citizens after a criminal conviction.<sup>136</sup>
- In 2012, **South Dakota** passed legislation to deny voting rights to persons with criminal convictions who are on probation. This change compounded existing requirements that already required a person to complete any term of incarceration or parole before the state would restore voting rights.<sup>137</sup>

*4. Reduced Early Voting Opportunities*

This November there will be fewer opportunities to cast a vote early in Florida, Georgia, Tennessee, and West Virginia.<sup>138</sup> The scope of the reduction differs significantly among these four states, and the outcome of the preclearance case in Florida has helped ameliorate the significant loss of heavily-used early voting days in that state.

In Florida and West Virginia, cuts to early voting were fairly substantial. In **Florida**, in addition to eliminating the first five days of early voting, counties lost the option of opening their polls on the last Sunday before the election. In total, Florida went from an early voting period that could extend up to 14 days, to one that is only eight days long.<sup>139</sup> The preclearance decision mitigated this somewhat — by ensuring maximum hours were offered in the five jurisdictions covered by the Voting Rights Act.<sup>140</sup> And most large counties have established hours close to the maximum for this election.<sup>141</sup> **West Virginia** likewise dropped its early voting period to less than two full weeks, reducing the 17 days previously available to 10 days.<sup>142</sup> The reductions in **Georgia** and **Tennessee** were less severe.<sup>143</sup>

Overall, how well voters will adjust to the loss of early voting days is an open question, but it is undisputed that millions will need to do so. In Florida — which made one of the most dramatic cuts — nearly 1 million voters in 2008 cast their ballots during the days that have been eliminated, which included the last Sunday before Election Day.<sup>144</sup> This will create difficulties and burdens for all Florida voters, but it is black voters who will bear the brunt of constricted access to the polls. In 2008, black voters in Florida used the now-eliminated first week of early voting at nearly twice the rate of white voters, and they relied on the last Sunday at more than three times the rate of white voters.<sup>145</sup>

The popularity of early in-person voting among black voters is not unique to Florida. According to the Census Bureau, early in-person voting by African-Americans in southern states nearly tripled from the 2004 to 2008, and was much higher than the rate among white voters in 2008.<sup>146</sup> Scholars expect this trend to continue.<sup>147</sup> Notably, the new state laws reducing early in-person voting are all concentrated in southern states.<sup>148</sup>

**B. The Collateral Damage: Confusion and Misinformation**

In a typical year, confusion and misinformation often mar American elections. This year saw dozens of new rules proposed, enacted, challenged, blocked, repealed, appealed, and postponed — all within months of a major election. Ordinary problems could compound.

Most at risk for confusion: States where voter ID laws were blocked.

In Pennsylvania, for example, under the terms of the court's injunction, voters may only be *asked* to show photo ID at the polls during the November election, but voters without ID can still vote a regular ballot. However, reports — including a legal petition for relief — document that voters were still receiving incorrect information about ID requirements from state and local election officials just weeks before the election. The state's television advertisements telling voters to bring photo ID ran before and after the court's ruling.<sup>149</sup> As

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

of mid-October, the state Department of Aging was sending mailings to thousands of seniors incorrectly stating, “Voters are required to show photo ID on Election Day.”<sup>150</sup> The Brennan Center discovered similar misinformation on the official websites for two of the state’s largest counties.<sup>151</sup> And a state newspaper recently published an article misinforming voters that photo ID was still required.<sup>152</sup> In Texas, election officials sent every voter a card saying photo ID would be required “upon federal approval”<sup>153</sup> — but never sent a follow up note saying that approval had been denied.

Indeed, even absent inaccurate information directly from the state, it is well documented that voters are frequently asked to show photo identification at the polls when state law does not require it. A leading national study found that at least half of voters were asked for photo ID by poll workers, even in states without ID requirements.<sup>154</sup> Not all voters are asked to show ID. Poll workers ask far more minority voters to show ID than their white counterparts.<sup>155</sup>

Voters may also be confused about when they can vote in states that trimmed early voting. In Ohio, whether polls would remain open to all voters on the last three days of the early voting period was the subject of litigation and remained an open question until as late as October 16.<sup>156</sup> As lawsuits unfolded in Florida, it was unclear until September how early voting changes would apply.<sup>157</sup> Moreover, the terms under which Florida’s early voting changes were ultimately precleared require the five counties covered by Section 5 of the Voting Rights Acts to offer the maximum allowed hours each day, for a total of 96 hours of early voting.<sup>158</sup> Other counties, however, are not subject to this requirement. Those counties now have substantial discretion to decide the specific hours they will be open each day.<sup>159</sup> Fortunately, it appears most of the largest counties will offer hours close to the maximum, thus cushioning the blow of lost days.<sup>160</sup> But confusion may persist.

Finally, the eligibility of persons with prior criminal convictions is frequently a point of confusion for voters and election officials alike. Too often, these citizens are not properly informed of their rights, even when they remain eligible to vote (or have regained rights).<sup>161</sup> And persons with past convictions who are in fact properly registered to vote have been wrongly purged from the voter lists or challenged at the polls.<sup>162</sup> These problems are of particular concern this year in Florida, Iowa, and South Dakota where, for the first time in 15 years, states have taken actions to roll back rather than restore voting rights.<sup>163</sup>

## IV. THE BATTLES TO COME

The national fight over voting rights will continue beyond November. We may be at a high water mark for voter access today. Going forward, we not only have to defend the victories already won, but we also have to stave off additional efforts to cut back on voting rights. The fight will play out in three main arenas: In the courts, in the U.S. Supreme Court, and in statehouses across the country.

## A. In the Courts

First and foremost, many of the court victories won before this year's elections are temporary. The final decisions are those blocking Florida's voter registration drive law, mitigating South Carolina's voter ID law, preventing Missouri's photo ID ballot initiative from going onto the ballot, and preventing five Florida counties from implementing reduced early voting hours. All of the other decisions are subject to further review either on appeal or in the same courts. That means the outcomes could change.

These are the cases to watch:

- Both **Wisconsin** state court decisions striking down the state's strict photo ID law are subject to further review by the state appellate courts. The state Supreme Court refused to hear the case on an expedited basis before the election.<sup>164</sup> But both cases are currently before the state Court of Appeals and arguments are expected after the election.<sup>165</sup> (Because the cases are based on claims that the law violates the state constitution, they will not be subject to additional review in the U.S. Supreme Court.)
- Both federal appeals court decisions relating to **Ohio** — covering provisional ballots and early voting — are subject to review by the U.S. Supreme Court. With the support of attorneys general from 15 other states, Ohio asked the Supreme Court for, and was denied, emergency relief from the early voting decision.<sup>166</sup> But Ohio may still file petitions for review in both cases that would be considered on a regular timeline.
- Litigation continues in the federal court case that permanently blocked **Texas**'s photo ID law. Although the court already found that Texas cannot justify its new law under Section 5 of the federal Voting Rights Act, the Lone Star State has argued that the provision itself is unconstitutional. The court is therefore now considering the constitutionality of that landmark federal law. Both the court's initial ruling on the preclearance and its upcoming ruling on the Voting Rights Act can be appealed to the U.S. Supreme Court.
- Litigation is also ongoing in the state court case that blocked **Pennsylvania**'s photo ID law for the 2012 elections. The law is blocked only for the 2012 elections;<sup>167</sup> it will be in effect in future years unless the court decides to permanently block it. Even if the court upholds the law, Pennsylvania's voters will be better off as a result of the litigation. Beforehand, the process to obtain state-issued photo ID in Pennsylvania was, according to the state Supreme Court, "a rigorous one" that was not consistent with principles of "liberal access."<sup>168</sup> Recognizing that, during the course of the litigation,

Pennsylvania created a new form of free state-issued photo ID that is much easier to obtain and will be accepted for voting.<sup>169</sup> That ID was created only at the end of August, so it remains to be seen whether it will significantly mitigate the disenfranchising effect of Pennsylvania's voter ID law.<sup>170</sup>

#### B. In the U.S. Supreme Court

The high court will hear two major cases next term that could substantially undermine legal protections for voters. The outcome of these cases may affect whether or not voters have any recourse in the courts to challenge discriminatory laws that make it harder for eligible Americans to vote.

The first case, *Gonzalez v. Arizona*, addresses Arizona's law that required individuals to produce documentary proof of their citizenship in order to vote. The Ninth Circuit Court of Appeals found that the state law was inconsistent with the National Voter Registration Act of 1993, a federal statute commonly referred to as "Motor Voter." It applied a special "preemption" analysis applicable to laws, like Motor Voter, enacted under Congress's authority under the U.S. Constitution's Elections Clause. The Supreme Court will consider both how the Motor Voter law works, and when a federal election law preempts a state law. If the Court overreaches, it could threaten Congress' core power to enact uniform federal election laws.

Although no case is docketed yet, the Supreme Court will likely rule on the constitutionality of Section 5 of the Voting Rights Act next term. This landmark civil rights law is widely acknowledged as being responsible for dismantling Jim Crow. It ensures that every American enjoys an equal opportunity to vote, regardless of race. It is among the few tools citizens have to fight back against discriminatory voting laws. It is also the main reason that voter ID laws in Texas and South Carolina, as well as early voting restrictions in five Florida counties, will not be in effect this election.

Six years ago, Congress voted by overwhelming bipartisan majorities to renew Section 5, saying the law was still needed to prevent discrimination in the voting system. The vote was unanimous in the Senate and 290-33 in the House. President George W. Bush signed it into law. Over the past two years, however, as states were passing laws making it harder to vote, seven states and localities asked courts to invalidate Section 5.<sup>171</sup> Of the suits that are still pending, the ones brought by Shelby County in Alabama, Kinston in North Carolina, and the state of Texas are the most likely to reach the Supreme Court. A three-judge federal court in Washington, D.C. upheld the constitutionality of Section 5 in a strong and thorough opinion in the Shelby County case, and the Court is reportedly considering before the election whether to take up that case. Three years ago, in a case brought by a public utility in Northwest Austin, several Justices questioned the continuing constitutional validity of Section 5.<sup>172</sup> That case predated new developments that strengthen the case for the law's constitutionality, but it nonetheless raises serious concerns.

At stake: One of the most effective legal tools for ensuring equality in the voting process and the most significant bulwark against discriminatory new voting laws. As Judge Bates found in the case blocking South Carolina's voter ID law, Section 5 plays a vital role in staving off discriminatory voting changes. He explained, "[w]ithout the review process under the Voting Rights Act, South Carolina's voter photo ID law certainly would have been more restrictive."<sup>173</sup>

**C. In the Statehouses**

The past two years saw a sharp spike in harsh new bills to curb voting. This baleful trend was already well underway before 2011, and will likely continue.<sup>174</sup> Indeed, while 25 bills restricting voting passed into law over the past two years, 180 were introduced; and many are expected to come back in the next legislative session. Of particular concern are the nine bills that passed but were vetoed in six states. The battle over voting rights will thus resume in statehouses across the country next year.

## CONCLUSION

In the wake of a massive wave of new laws that could have made it harder for millions of Americans to vote this year, voters have largely stood their ground. They have managed successfully to push back against the bulk of the most restrictive new laws, ensuring that far fewer voting restrictions will be in place for the 2012 elections. The most significant assault on voting rights in decades has thus been seriously blunted.

Although the election will soon be over, the fights over voting rights will, unfortunately, continue. Many of the battles won in 2012 will be refought in 2013. Court cases in Pennsylvania, Wisconsin, Texas, and Ohio are ongoing. The U.S. Supreme Court is taking up voting issues. And state legislators across the country are gearing up to introduce new restrictive voting laws. Americans cannot yet rest easy.

But Americans can learn from the battles over voting rights in 2012. We can learn the importance of strong national laws protecting voting rights, like the federal Voting Rights Act and the Motor Voter law, both of which made a big difference this year. We can learn the importance of strong courts to enforce those rights. And we can learn that enough is enough.

It is simply not acceptable to be fighting over vote suppression in 2012. It is not acceptable for politicians to try to fix the rules of the game in a way that makes it harder for some groups of Americans to have their say. Americans deserve a voting system that is free, fair, and accessible, but partisan voting wars threaten that ideal. To move past those wars, we need to focus on reforms that improve the system, not ones that game it. We need to better use technology to achieve that goal. And we particularly need to modernize our voter registration system to enhance both access and integrity.

POST (Oct. 23, 2012), available at [http://www.washingtonpost.com/national/apnewsbreak/300-more-suspected-noncitizens-on-colorado-voter-rolls-in-2nd-round-of-checks/2012/10/23/1e06cba0-1d73-11e2-8817-41b9a7aaab7\\_story.html](http://www.washingtonpost.com/national/apnewsbreak/300-more-suspected-noncitizens-on-colorado-voter-rolls-in-2nd-round-of-checks/2012/10/23/1e06cba0-1d73-11e2-8817-41b9a7aaab7_story.html).

<sup>23</sup> Moreno, *300 More Suspected Noncitizens on Colorado Voter Rolls in 2nd Round of Checks*, *supra* note 2.

<sup>24</sup> Complaint, *Judicial Watch, Inc. v. Hosted*, No. 2:12-cv-792 (S.D. Ohio Aug. 30, 2012); Complaint, *Judicial Watch, Inc. v. King*, No. 1:12-cv-800 (S.D. Ind. June 11, 2012); Press Release, Brennan Center for Justice, Michigan Secretary of State Must Ensure Transparency, Fairness and Protect Voters' Rights (Oct. 10, 2012), available at [http://www.brennancenter.org/content/resource/michigan\\_secretary\\_of\\_state\\_must.ensure\\_transparency\\_fairness\\_and\\_protect\\_v/](http://www.brennancenter.org/content/resource/michigan_secretary_of_state_must.ensure_transparency_fairness_and_protect_v/)

<sup>25</sup> Based on a new analysis of the voter challenger laws in all fifty states, the recent Brennan Center report, VOTER CHALLENGERS, makes the following key findings: challenger laws are susceptible to abuse, historically they have been used to suppress newly franchised groups, and in recent years they have been used to target voters of color, students, and voters with disabilities. NICOLAS RILEY, VOTER CHALLENGERS (2012), available at [http://brennan.3cdn.net/9edfc63808b7bf0c09\\_y5m6wfl3a.pdf](http://brennan.3cdn.net/9edfc63808b7bf0c09_y5m6wfl3a.pdf). These findings are consistent with an earlier Brennan Center report assessing voter challenges as one component of a broader spectrum of "ballot security" operations carried out by political operatives and private groups and that have the effect of suppressing eligible voters. WENDY WEISER & VISHAL AGRAHARKAR, BALLOT SECURITY AND VOTER SUPPRESSION: WHAT IT IS AND WHAT THE LAW SAYS (2012), available at [http://brennan.3cdn.net/49ec3e9f92cd004786\\_iqm6haoz3.pdf](http://brennan.3cdn.net/49ec3e9f92cd004786_iqm6haoz3.pdf).

<sup>26</sup> Nicolas Riley, *Challengers Can Cause Headaches at the Polls*, BRENNAN CENTER FOR JUSTICE (Aug. 31, 2012), available at [http://www.brennancenter.org/blog/archives/challengers\\_can\\_cause\\_headaches\\_at\\_the\\_polls/](http://www.brennancenter.org/blog/archives/challengers_can_cause_headaches_at_the_polls/); DEMOS & COMMON CAUSE, *BULLIES AT THE BALLOT BOX: PROTECTING THE FREEDOM TO VOTE AGAINST WRONGFUL CHALLENGES AND INTIMIDATION* (2012), available at <http://www.demos.org/sites/default/files/publications/BulliesAtTheBallotBox-Final.pdf>.

<sup>27</sup> RILEY, *supra* note 25 at 39 n.159; Order Granting Plaintiffs' Motion for Temporary Restraining Order at 3, Spencer v. Blackwell, No. C-1-04-738 (S.D. Ohio Nov. 1, 2004).

<sup>28</sup> Detailed information about each of these laws, including descriptions and dates of passage, can be found in the Brennan Center's report, 2012 VOTING LAW CHANGES, *supra* note 2.

<sup>29</sup> R. MICHAEL ALVAREZ & JONATHAN NAGLER, ELECTION DAY VOTER REGISTRATION IN CALIFORNIA 2 (2011), available at <http://www.commoncause.org/atf/cf/%7BFEB3C17E2-CDD1-4DF6-92BE-BD4429893665%7D/CA%20EDR%20Report%20-%20FINAL%20APR%202011.pdf>. The research suggests that the positive turnout effects are even higher for some demographic groups, including younger voters, those who have moved, and newly naturalized citizens. *Id.* at 4.

<sup>54</sup> Following the veto of S.B. 803, Michigan Secretary of State Ruth Johnson nevertheless ordered local election officials to put a citizenship check-box on ballot applications. The secretary's directive was applied inconsistently across the state. Because of this, a federal court found that continuing to use the checkbox in the upcoming election would likely violate voters' rights to equal protection and thus prohibited use of the check-box for 2012. <sup>113</sup> Florida, Georgia, Illinois, Iowa, Kansas, New Hampshire, Rhode Island, South Dakota, Tennessee, Texas, Virginia, West Virginia, and Wisconsin. 2012 VOTING LAW CHANGES, *supra* note 2.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

<sup>114</sup> The thirteen states that have passed restrictive voting laws and executive actions with the potential to impact the 2012 election account for 165 electoral votes: Florida (29), Georgia (16), Illinois (20), Iowa (6), Kansas (6), New Hampshire (4), Rhode Island (4), South Dakota (3), Tennessee (11), Texas (38), Virginia (13), West Virginia (5), and Wisconsin (10).

<sup>115</sup> See *supra* note 82.

<sup>116</sup> The new rules for voter registration drives became effective on May 20, 2011. Florida Division of Elections, May 20, 2011 Emergency Regulations for Third-Party Voter Registration Organizations and Memorandum from Kurt S. Browning to Supervisors of Elections (May 19-20, 2011), available at [http://brennan.3cdn.net/bf429fcfd66bdjf833\\_irvn6bbwt.pdf](http://brennan.3cdn.net/bf429fcfd66bdjf833_irvn6bbwt.pdf). On May 31, 2012, Judge Hinkle issued his order preliminarily blocking the most onerous rules. That order remained in effect while the parties negotiated a settlement and until a final permanent order was entered on August 30, 2012. During this yearlong period, plaintiffs League of Women Voters of Florida, Rock the Vote, and Florida PIRG Education Fund conducted no voter registration drives. And many other nonpartisan groups severely curtailed or delayed their voter registration drive activities. KASDAN, *supra* note 11, at 2 & n.9.

<sup>117</sup> An analysis of the Florida Division of Elections monthly reports of new voter registration applications received reveals that from June 1, 2011 through May 31, 2012, there were 597,576 new voter registration applications received. From June 1, 2007 through May 31, 2008, there were 695,589 new voter registrations received. This is a difference of 98,013 registration applications within the same 12 month cycle. Thus, there is a 14 percent decrease in new registrations when comparing the period when HB 1355 was in effect, before the 2012 presidential election, to the same months, when no similar restriction was in place, before the last presidential election. The monthly reports of new registrations, from which these numbers were calculated, are available at <http://election.dos.state.fl.us/voter-registration/archives/index.shtml>.

<sup>118</sup> Michael C. Herron and Daniel A. Smith, *House Bill 1355 and Voter Registration in Florida*, Presentation for the 2012 Annual Meeting of the American Political Science Association 20 (Sept. 12, 2012), available at <http://www.dartmouth.edu/~herron/FloridaVoterRegistrationsHB1355.pdf>

<sup>136</sup> *Id.*; Iowa Exec. Order No. 42 (July 4, 2005), available at [http://brennan.cdn.net/563fe831695be5a1fa\\_nwm6bybik.pdf](http://brennan.cdn.net/563fe831695be5a1fa_nwm6bybik.pdf).

<sup>137</sup> S.D. CODIFIED LAWS § 12-4-18.

<sup>138</sup> 2012 VOTING LAW CHANGES, *supra* note 2, at 29 (describing Florida, Georgia, Tennessee, and West Virginia laws cutting back on early voting periods).

<sup>139</sup> *Florida v. United States*, \_\_\_\_ F. Supp. 2d \_\_\_, No. 11-1428, 2012 WL 3538298 (D.D.C. Aug. 16, 2012) at \*15-16.

<sup>140</sup> See Response by the United States to Florida’s Mot. for Judgment at 2, *Florida v. United States*, No. 11-1428 (D.D.C. Sept. 5, 2012); see also United States Notice to the Court, *Florida v. United States*, No. 11-1428 (D.D.C. Sept. 12, 2012).

<sup>141</sup> Notice of County Early Voting Plans, *Brown v. Detzner*, No. 3:12-cv-00852, (M.D. Fla. Sept 14, 2012).

<sup>142</sup> W. VA. CODE § 3-3-3(a).

<sup>143</sup> In Georgia, the legislature enacted an “advance voting” period during which voters can cast early ballots, which begins on the fourth Monday prior to each primary or general election and lasts until the Friday immediately prior to the election. Previously, early ballots could be cast at any time after the early ballots had been printed, which had to occur at least 45 days prior to the election. 2012 VOTING LAW CHANGES, *supra* note 2, at 5-6. In Tennessee the early voting period was shortened by two days to thirteen days in presidential primary elections, but no changes were made to the fifteen-day early voting period for general elections. *Id.* at 25-26.

<sup>144</sup> According to data from Florida’s statewide voter registration and voter history file, which was analyzed by Professor Paul Gronke, a leading expert on early voting, 836,224 voters used the first five days of the 14 day-long early voting period and another 78,380 used the last Sunday. Amended Rule 26(a)(2)(B) Expert Report and Declaration of Paul Gronke PhD, Exhibits 9 & 10, *Florida v. United States*, No. 1:11-cv-1428 (D.D.C. May 14, 2012); see also *Florida v. United States*, \_\_\_\_ F. Supp. 2d \_\_\_, No. 11-1428, 2012 WL 3538298 (D.D.C. Aug. 16, 2012) at \*18-19.

<sup>145</sup> In 2008, 15.5 percent of all black voters in Florida used the first five days of early voting, as compared to 9.3 percent of all white voters. And on the last Sunday, 4.21 percent of all black voters voted, as compared to 1.35 percent of white voters. Amended Rule 26(a)(2)(B) Expert Report and Declaration of Paul Gronke PhD, Exhibits 9 & 10, *Florida v. United States*, No. 1:11-cv-1428 (D.D.C. May 14, 2012); see also *Florida v. United States*, \_\_\_\_ F. Supp. 2d \_\_\_, No. 11-1428, 2012 WL 3538298 (D.D.C. Aug. 16, 2012) at \*18 (“African-American voters used the repealed days of early voting at rates nearly double those of white voters in 2008.”) (emphasis in original).

<sup>146</sup> See Gronke Report at 10-11, Ex. 4, *supra* note 145.

<sup>147</sup> See *Florida v. United States*, 2012 WL 3538298, at \*18; see also Gronke Report, *supra* note 145. The heightened use of early in-person voting among black voters is a pattern identified in Ohio as well. See *supra* note 98 and accompanying text.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

<sup>151</sup> In a review of election websites for large counties, inaccurate information about the status of the photo ID law was found on the websites for both Delaware County and the City of Philadelphia. Before the Brennan Center contacted election officials in mid-October to correct the erroneous information, Delaware County's website include a newsletter instructing voters that "a new state Voter ID law requires all voters to show a valid photo ID to be eligible to vote at the polling place on Nov. 6." (Documentation on file with authors.)

<sup>152</sup> Ian Millhiser, *Pennsylvania Newspaper Owned by Top Right-Wing Funder Falsely Claims ID Is Required to Vote*, THINKPROGRESS, (Oct. 22, 2012), available at <http://thinkprogress.org/justice/2012/10/22/1056351/pennsylvania-newspaper-owned-by-top-right-wing-funder-falsely-claims-id-is-required-to-vote/>.

<sup>153</sup> See Laura Conaway, *You Do Not Need I.D. To Vote In Texas*, THE MADDOW BLOG, Oct. 26, 2012, at [http://maddowblog.msnbc.msnbc.com/\\_news/2012/10/26/14700827-you-do-not-need-id-to-vote-in-texas](http://maddowblog.msnbc.msnbc.com/_news/2012/10/26/14700827-you-do-not-need-id-to-vote-in-texas) (reproducing copy of Texas mailing).

<sup>154</sup> Stephen Ansolabehere, *Effects of Identification Requirements on Voting: Evidence from the Experiences of Voters on Election Day*, PS: POLITICAL SCIENCE, Jan. 2009, at 128 (reporting results from analysis of individual-level data based on nationwide surveys of voters in the 2006 general midterm election and 2008 presidential primary election). Specifically, Ansolabehere finds: "In the 2006 sample, 49% of respondents reported that the poll workers asked them to show photo ID when they voted. In the 2008 sample that figure had risen to 56%. This rate is strikingly high. In 2006 only two states actually required photo identifications; the other Voter ID states allowed poll workers to request ID. In other words, poll workers are using their discretion and asking voters to show photo ID." *Id.*

<sup>155</sup> "In the 2006 general election, 47% of white voters reported being asked to show photo identification at the polls, compared with 54% of Hispanics and 55% of African Americans. In the 2008 Super Tuesday primary states, 53% of whites were asked to show photo ID, compared with 58% of Hispanics and a staggering 73% of African Americans." *Id.*

VOTING LAW CHANGES IN 2012

Wendy R. Weiser and Lawrence Norden

## ABOUT THE BRENNAN CENTER FOR JUSTICE

The Brennan Center for Justice at New York University School of Law is a non-partisan public policy and law institute that focuses on the fundamental issues of democracy and justice. Our work ranges from voting rights to campaign finance reform, from racial justice in criminal law to presidential power in the fight against terrorism. A singular institution—part think tank, part public interest law firm, part advocacy group—the Brennan Center combines scholarship, legislative and legal advocacy, and communications to win meaningful, measurable change in the public sector.

## ABOUT THE BRENNAN CENTER'S DEMOCRACY PROGRAM

The Brennan Center's Democracy Program works to repair the broken systems of American democracy. We encourage broad citizen participation by promoting voting and campaign reform. We work to secure fair courts and to advance a First Amendment jurisprudence that puts the right of citizens—not special interests—at the center of our democracy. We collaborate with grassroots groups, advocacy organizations, and government officials to eliminate the obstacles to an effective democracy.

## ACKNOWLEDGEMENTS

The Brennan Center gratefully acknowledges the Bauman Foundation, Carnegie Corporation of New York, Democracy Alliance Partners, Ford Foundation, The Joyce Foundation, The Irving B. Harris Foundation, Mitchell Kapor Foundation, Michael Kieschnick, Nancy Meyer and Marc Weiss, Open Society Foundations, Rockefeller Family Fund, Tides Advocacy Fund, and Wallace Global Fund for their generous support of our voting work.

This report is the joint product of hours of work by many Brennan Center staff. In particular, we owe a special thanks to Brennan Center attorneys Keesha Gaskins, Myrna Pérez, Lee Rowland, and Nic Riley, all of whom drafted or edited sections of the report and the attached appendix. We also thank Jonathan Brater and Nick Bauer, who reviewed and edited portions of the document.

The report could not have been completed without many hours of research and general assistance from current and former Brennan Center research associates, most especially Lianna Reagan, John Travis, Nhu-Y Ngo, and Maria Da Silva. Brennan Center interns Sarah Ferguson and Meredith McCoy also provided valuable assistance for the appendix.

This report benefited greatly from the insightful and thorough editorial assistance of Jeanine Plant-Chirlin and Andrew Goldston.

We also thank Brennan Center Executive Director Michael Waldman for his strategic insight, helping shape and frame the final product.

## ABOUT THE AUTHORS

**Wendy R. Weiser** directs the Democracy Program at the Brennan Center for Justice at NYU School of Law, a non-partisan think tank and public interest law center. She founded and directed the center's Voting Rights and Elections Project, coordinating litigation, research, and advocacy efforts to enhance political participation and prevent voter disenfranchisement across the country. Her work and the work she directed protected the voting rights of hundreds of thousands of citizens in 2006, 2008, and 2010.

She has authored a number of nationally-recognized publications and articles on voting rights and election reform; litigated ground-breaking voting rights lawsuits; testified before both houses of Congress and in a variety of state legislatures; and provided policy and legislative drafting assistance to federal and state legislators and administrators across the country. She is a frequent public speaker and media contributor on democracy issues.

**Lawrence Norden** is Deputy Director of the Brennan Center's Democracy Program. He has authored several nationally recognized reports and articles related to voting rights, voting systems and election administration.

In April 2009, Mr. Norden completed his duties as Chair of the Ohio Secretary of State's bipartisan Election Summit and Conference, authoring a report that recommended several changes to Ohio's election administration practices and laws; the report was endorsed by most of the State's voting rights groups, as well as the bipartisan Ohio Association of Election Officials. In June 2009, he received the Usability Professional Association's Usability In Civic Life Award for his "pioneering work to improve elections." Mr. Norden is the lead author of the book *The Machinery of Democracy: Protecting Elections in an Electronic World* (Academy Chicago Press) and a contributor to the *Encyclopedia of American Civil Liberties* (Routledge 2007).

Mr. Norden is an Adjunct Professor at the NYU School of Law, where he teaches the Brennan Center Public Policy Advocacy Clinic.

## EXECUTIVE SUMMARY

Over the past century, our nation expanded the franchise and knocked down myriad barriers to full electoral participation. In 2011, however, that momentum abruptly shifted.

State governments across the country enacted an array of new laws making it harder to register or to vote. Some states require voters to show government-issued photo identification, often of a type that as many as one in ten voters do not have. Other states have cut back on early voting, a hugely popular innovation used by millions of Americans. Two states reversed earlier reforms and once again disenfranchised millions who have past criminal convictions but who are now taxpaying members of the community. Still others made it much more difficult for citizens to register to vote, a prerequisite for voting.

These new restrictions fall most heavily on young, minority, and low-income voters, as well as on voters with disabilities. This wave of changes may sharply tilt the political terrain for the 2012 election. Based on the Brennan Center's analysis of the 19 laws and two executive actions that passed in 14 states, it is clear that:

- These new laws could make it significantly harder for more than five million eligible voters to cast ballots in 2012.<sup>1</sup>
- The states that have already cut back on voting rights will provide 171 electoral votes in 2012—63 percent of the 270 needed to win the presidency.
- Of the 12 likely battleground states, as assessed by an August *Los Angeles Times* analysis of Gallup polling, five have already cut back on voting rights (and may pass additional restrictive legislation), and two more are currently considering new restrictions.<sup>2</sup>

States have changed their laws so rapidly that no single analysis has assessed the overall impact of such moves. Although it is too early to quantify how the changes will impact voter turnout, they will be a hindrance to many voters at a time when the United States continues to turn out less than two thirds of its eligible citizens in presidential elections and less than half in midterm elections.

This study is the first comprehensive roundup of all state legislative action thus far in 2011 on voting rights, focusing on new laws as well as state legislation that has not yet passed or that failed. This snapshot may soon be incomplete: the second halves of some state legislative sessions have begun.

## INTRODUCTION

Legislators introduced and passed a record number of bills restricting access to voting this year. New laws ranged from those requiring government-issued photo identification or documentary proof of citizenship to vote, to those reducing access to early and absentee voting, to those making it more difficult to register to vote. In total, at least nineteen laws and two executive actions making it more difficult to vote passed across the country, at least forty-two bills are still pending, and at least sixty-eight more were introduced but failed.

As detailed in this report, the extent to which states have made voting more difficult is unprecedented in the last several decades, and comes after a dramatic shift in political power following the 2010 election. The battles over these laws were—and, in states where they are not yet over, continue to be—extremely partisan and among the most contentious in this year's legislative session. Proponents of the laws have offered several reasons for their passage: to prevent fraud, to ease administrative burden, to save money. Opponents have focused on the fact that the new laws will make it much more difficult for eligible citizens to vote and to ensure that their votes are counted. In particular, they have pointed out that many of these laws will disproportionately impact low-income and minority citizens, renters, and students—eligible voters who already face the biggest hurdles to voting.

This report provides the first comprehensive overview of the state legislative action on voting rights so far in 2011. It summarizes the legislation introduced and passed this legislative session, provides political and legal context, and details the contentious political battles surrounding these bills.

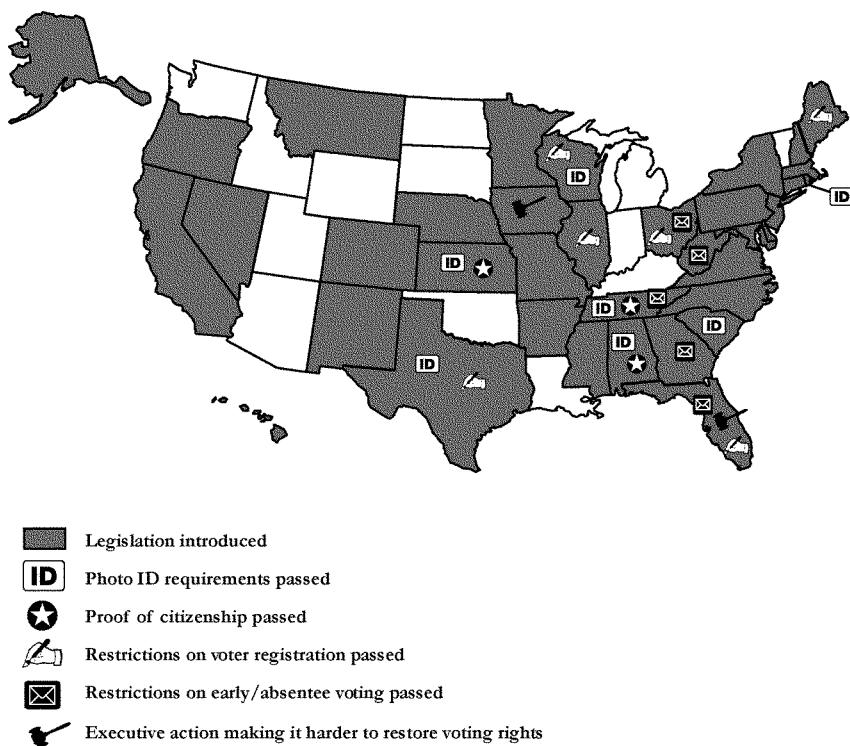

Overall, legislators introduced and passed the following measures:

- **Photo ID laws.** At least thirty-four states introduced legislation that would require voters to show photo identification in order to vote. Photo ID bills were signed into law in seven states: Alabama, Kansas, Rhode Island, South Carolina, Tennessee, Texas, and Wisconsin. By contrast, before the 2011 legislative session, only two states had ever imposed strict photo ID requirements. The number of states with laws requiring voters to show government-issued photo identification has quadrupled in 2011. To put this into context, 11% of American citizens do not possess a government-issued photo ID; that is over 21 million citizens.
- **Proof of citizenship laws.** At least twelve states introduced legislation that would require proof of citizenship, such as a birth certificate, to register or vote. Proof of citizenship laws passed in Alabama, Kansas, and Tennessee. Previously, only two states had passed proof of citizenship laws, and only one had put such a requirement in effect. The number of states with such a requirement has more than doubled.
- **Making voter registration harder.** At least thirteen states introduced bills to end highly popular Election Day and same-day voter registration, limit voter registration mobilization efforts, and reduce other registration opportunities. Maine passed a law eliminating Election Day registration, and Ohio ended its weeklong period of same-day voter registration. Florida,

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

Illinois, and Texas passed laws restricting voter registration drives, and Florida and Wisconsin passed laws making it more difficult for people who move to stay registered and vote.

- **Reducing early and absentee days.** At least nine states introduced bills to reduce their early voting periods, and four tried to reduce absentee voting opportunities. Florida, Georgia, Ohio, Tennessee, and West Virginia succeeded in enacting bills reducing early voting.
- **Making it harder to restore voting rights.** Two states—Florida and Iowa—reversed prior executive actions that made it easier for citizens with past felony convictions to restore their voting rights, affecting hundreds of thousands of voters. In effect, both states now permanently disenfranchise most citizens with past felony convictions.

## I. VOTER IDENTIFICATION

### A. Background

By far the most widespread legislative development this session involved bills to impose stricter documentary identification requirements on voters. Voter ID laws—especially those that require voters to show one of a small number of government-issued photo IDs to vote—have been the subject of intense debate over the past few election cycles, and the debate heated up this year.

Proponents of strict voter ID laws maintain that they are reasonable measures to prevent fraud by persons improperly casting ballots in the names of other registered citizens, real or imagined. They dispute that such laws will discourage voting by any group, claiming that photo IDs are needed for many aspects of modern life, including boarding an airplane or entering certain government buildings.<sup>3</sup> Opponents maintain that photo ID laws exclude large swaths of the electorate, since 11% of citizens—and an even greater percentage of low-income, minority, young, and older citizens—do not have state-issued photo IDs.<sup>4</sup> They argue that photo ID requirements are similar to a poll tax, whether or not the IDs are offered for free, because to obtain the necessary IDs citizens must produce documents that cost money, like passports and birth certificates.<sup>5</sup> Opponents also claim that impersonation voter fraud—the only type of fraud prevented by voter ID laws—almost never happens since our laws adequately protect against and punish such fraud.<sup>6</sup> Although the best available study found that strict voter ID laws reduce turnout, neither side can definitively demonstrate the extent of the effect on voter turnout, since such laws have not been in effect long enough to permit accurate study.<sup>7</sup> Each side also questions the other's motives.

Voter ID is nothing new—indeed, federal law requires every new voter who registers by mail to show ID before voting,<sup>8</sup> and a variety of states have additional common-sense ID requirements.<sup>9</sup> What is new, however, is the degree to which the voter ID bills that were proposed and passed this session were restrictive, excluding many common forms of photo and non-photo IDs, such as student IDs and Social Security cards, and offering no alternative mechanisms for eligible citizens without the selected IDs to cast ballots that will count. What also is new is the extent to which such restrictive bills passed this session.

Prior to the 2006 elections, *no* state required its voters to show government-issued photo ID at the polls (or elsewhere) in order to vote. In 2006, Indiana became the first state in the nation to do so. Although Georgia and Missouri passed photo ID laws at around the same time, both states' laws were blocked by courts on the ground that they interfered with the right of eligible citizens to vote—under the U.S. Constitution in Georgia's case and the Missouri State Constitution in Missouri's case.<sup>10</sup> In 2008, the U.S. Supreme Court upheld Indiana's voter ID law against a constitutional attack.<sup>11</sup> After lengthy litigation in response to which Georgia amended its voter ID law several times, Georgia's law was eventually upheld as well.<sup>12</sup> That law first went into effect in late 2007, making Georgia the second state in the nation to require its citizens to show photo ID at the polls.

Thus, as of the start of this legislative session, only two states had ever imposed strict photo ID requirements on voters, and only for a short period of time. Several other states—Florida, Hawaii, Idaho, Louisiana, Michigan, and South Dakota—also requested, and still request, photo ID from their voters at the polls, but if a voter in those states does not have photo ID, she can still cast a ballot that

will count after an alternative verification procedure, like a signature match or a sworn affidavit. The remainder of the states had more flexible voting identification requirements.<sup>13</sup>

#### B. Roundup of Legislative Developments

This year, at least thirty-four states introduced a record number of bills to require photo ID to vote.<sup>14</sup> As Jenny Bowser, senior fellow at the National Conference of State Legislatures, observed, “It’s remarkable ... I very rarely see one single issue come up in so many state legislatures in a single session.”<sup>15</sup>

Photo ID bills passed and were signed into law in seven states to date: Alabama, Kansas, Rhode Island, South Carolina, Tennessee, Texas, and Wisconsin.<sup>16</sup> (The Alabama, South Carolina, and Texas laws cannot go into effect unless and until they are pre-cleared by either the U.S. Department of Justice or a federal court under the Voting Rights Act.) Bills also passed but were vetoed in five additional states: Minnesota, Missouri, Montana, New Hampshire, and North Carolina.<sup>17</sup> A number of additional states—including Pennsylvania<sup>18</sup>—still have active photo ID bills pending in ongoing legislative sessions. In New Hampshire, legislators failed to override the Governor’s veto,<sup>19</sup> and in North Carolina, legislators could attempt to push a new voter ID bill despite the Governor’s veto.<sup>20</sup>

In addition, Missouri legislators passed a ballot measure to amend the state constitution to allow the state to impose photo ID requirements on voters; the measure will appear on the state ballot in November 2012.<sup>21</sup> (If the measure passes, legislators will have to enact further legislation before a photo ID requirement could be imposed.) Supporters of strict voter ID in Mississippi similarly introduced a ballot initiative that will appear on the November 2011 ballot.<sup>22</sup>

#### C. What the Bills Say

In general, the photo ID bills that were introduced this session are more restrictive than those in prior sessions, including fewer forms of acceptable IDs, fewer exemptions, or fewer alternative mechanisms for eligible voters without the specified IDs to vote.

Those laws that have passed this session vary in several respects, including: (1) the types of photo ID that voters are permitted to show for voting; (2) whether the requirement to provide ID applies only to in-person voters or to those who vote by mail as well; (3) whether there are any exemptions from the requirement to provide ID; and, most importantly, (4) whether there is an alternative way for a voter who does not have an accepted form of photo ID to cast a ballot that counts. Detailed descriptions of each bill are included in the appendix to this report.

*The types of ID permitted.* With the exception of Rhode Island, each of the states that passed voter ID bills require voters to show government-issued photo IDs, though the list of acceptable IDs differs from state to state. All seven states accept an unexpired driver’s license, non-driver’s ID issued by a motor vehicle department, U.S. passport, or U.S. military photo ID. All states except for Kansas and South Carolina also accept U.S. naturalization documents bearing a photo. Alabama, Rhode Island, and Tennessee broadly accept any photo ID issued by state and federal governments, though Tennessee expressly excludes student IDs from consideration. Only Alabama, Kansas, and Rhode Island accept

student photo IDs issued by state institutions of higher education. Wisconsin purports to accept certain state-issued student IDs, but the state's new law imposes criteria for such IDs that few if any state schools' IDs meet. Kansas and Texas expressly allow concealed handgun licenses, and Alabama, Rhode Island and Tennessee accept such IDs as well. Only Alabama and Wisconsin accept a tribal ID card with a photo. Rhode Island is the only state that accepts non-governmental photo IDs for voting; indeed, any current ID with a voter's name and photograph suffices.

*Who must show photo ID.* All seven states require individuals appearing to vote in person at a polling place to show photo ID. Only Alabama and Kansas require all persons who vote absentee to submit a copy of their photo IDs with their mail-in ballots. Those states are now the first two states in the nation ever to require photo ID with absentee ballots. Wisconsin requires permanent absentee voters to submit a copy of their photo IDs, but only the first time they vote absentee. As a practical matter, all absentee voters in Wisconsin will have to provide a copy of their photo IDs when the law first goes into full effect in 2012.

*Exemptions.* Several states exclude certain categories of voters from the requirement to show photo ID for voting. Alabama exempts individuals who are entitled to vote absentee under federal laws protecting certain military and overseas voters and certain elderly and disabled voters. Wisconsin also exempts military and overseas voters, as well as voters designated as "confidential," such as police officers or domestic violence victims. It does not exempt elderly or disabled voters other than those indefinitely confined to certain care facilities. Tennessee exempts voters who are either hospitalized or in nursing homes. Texas exempts certain voters with disabilities who can produce a statement that they have been determined to be disabled by specified government agencies and do not have the required ID. And Kansas exempts only permanently disabled and absent military voters from its law, but allows persons over sixty-five to show expired photo IDs.

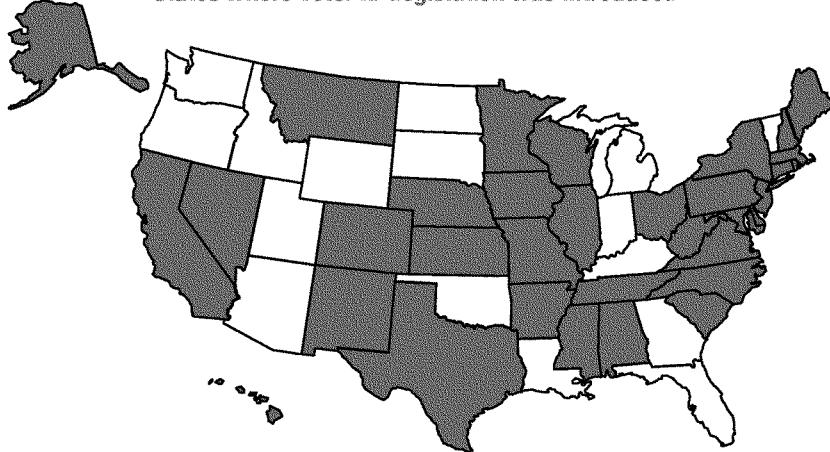

*Alternative voting procedure.* Three states—Rhode Island, South Carolina, and Tennessee—offer an alternative way for all or many voters who are unable to produce photo ID to vote and have their votes count. In Rhode Island, citizens who do not have photo ID must vote by provisional ballot, and election officials are directed to count all such ballots so long as the signature on the provisional ballot envelope matches the signature on the voter's registration. In South Carolina, persons who have a "reasonable impediment" to obtaining a photo ID or a religious objection to being photographed may cast a provisional ballot along with an affidavit explaining why they do not have ID. Election officials are directed to count those ballots unless there are grounds to believe the affidavit is false. In Tennessee, persons who cannot afford a photo ID or who have a religious objection to being photographed can swear an affidavit of identity and vote a regular ballot. These alternative means of demonstrating one's identity and voting without a photo ID separate these states' laws from the much stricter laws of Alabama, Kansas, Texas, and Wisconsin.<sup>23</sup>

*Free IDs.* The U.S. Supreme Court has made it clear that states that require their voters to present government-issued photo IDs for voting must make such IDs available to voters free of charge.<sup>24</sup> And indeed, each of the seven state laws provides a mechanism for free IDs for persons who need them for voting. Kansas and Tennessee specify that free IDs will be available only to those who swear an affidavit saying they need the ID for voting purposes and do not have other qualifying photo ID. It is not clear

whether those states or the others will sufficiently advertise their free ID offers so that eligible but indigent voters can obtain such IDs. For example, it appears that Wisconsin officials have taken the position that prospective voters must expressly request free IDs before one is offered; according to a key transportation official, “the statutory language specifically puts the onus on the customer for getting the ID for free for voting.”<sup>25</sup> DMV officials reportedly turned away a Madison, Wisconsin voter when she did not have enough money to renew her photo ID because she did not specifically request a free ID for voting.<sup>26</sup> And a former state employee claimed that he was fired because he sent an e-mail to coworkers urging them to inform people that the free IDs had to be specifically requested.<sup>27</sup> It is unclear under the case law whether and under what circumstances states may be required to defray the costs of the documents voters need in order to obtain photo IDs—most notably birth certificates, which typically cost between \$15 and \$25.<sup>28</sup> Currently, only Kansas’s law allows voters born in the state to obtain a birth certificate free of charge if needed to obtain ID for voting.

*Effective Dates.* The ID provisions for all of the new ID laws have effective dates on or before 2012, with two exceptions. The photo ID requirements in Alabama will not go into effect until 2014, if they are pre-cleared under the Voting Rights Act. The Rhode Island law goes into effect in 2012, but only partially; it allows either photo or non-photo ID (including, but not limited to, social security cards and government-issued medical cards) prior to 2014. Beginning in 2014, Rhode Island will allow only photo IDs at the polls.

#### States Where Voter ID Legislation Was Introduced

Alabama, Alaska, Arkansas, California, Colorado, Connecticut, Delaware, Hawaii, Illinois, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, West Virginia, and Wisconsin.

### Making it Harder for Students to Vote

A fair amount of attention has been paid this year to the impact of voter ID laws on students. Three of the seven photo ID bills to have passed—South Carolina's, Texas's, and Tennessee's—expressly do not allow students to use photo IDs issued by state educational institutions to vote, and Wisconsin's bill effectively excludes most student IDs as well.

When **Wisconsin**'s photo ID bill was first introduced, it too excluded all student IDs.<sup>29</sup> After substantial public debate and controversy,<sup>30</sup> the bill was amended to permit student IDs that meet certain criteria. The problem is that the student IDs currently issued by the University of Wisconsin system and various other schools do not meet those criteria. The University of Wisconsin would have to spend an estimated \$1.1 million to issue new ID cards to students for its photo IDs to be accepted for voting purposes.<sup>31</sup>

Many question the fairness of voter ID laws that exclude government-issued photo IDs held by such a large segment of the population. This is especially the case with laws like Texas's, which does not allow voters to use student IDs but does allow them to use concealed weapon licenses for voting.<sup>32</sup> Some read into the fact that these bills exclude student IDs as a partisan motive to exclude certain groups of voters more likely to Democratic.<sup>33</sup>

The legislative targeting of students this session was not limited to voter ID laws. In **New Hampshire**, for example, Republican lawmakers introduced highly controversial legislation that would have prevented students and members of the military who previously lived elsewhere from acquiring voting residency in the state.<sup>34</sup> No other state singles out students or any other group for special voting residency requirements—and for good reason; as the Brennan Center pointed out, such a discriminatory rule clearly violates the U.S. Constitution.<sup>35</sup> The Speaker of the State House was notoriously caught on tape telling a Tea Party group that he supported the bill because students tend to vote Democratic. He said, “the kids [are] coming out of the school and basically doing what I did when I was a kid. Voting as a liberal. You know, that’s what kids do. They don’t have life experience and they just vote their feelings.”<sup>36</sup> After strong public pressure, including opposition from both College Democrats and College Republicans, the bill failed on the House floor.<sup>37</sup>

The targeting of student voters has also gone beyond legislation. The newly-elected Secretary of State of **Maine** recently announced he was forwarding a list of 206 students who were registered to vote in the state but paid out-of-state tuition to law enforcement for voter fraud investigations.<sup>38</sup> But under Maine law, like in other states, the rules for tuition are very different from those for voting; many students meet the legal voting residency requirements while still being ineligible for in-state tuition.<sup>39</sup>

#### D. Legislative Battles

The voter ID battles this session differed from the past not only because the proposed laws were more restrictive but also because those pushing the bills prioritized them far more than their predecessors and commanded far greater legislative support. Another new feature of the legislative landscape was the reported involvement of the American Legislative Exchange Council (ALEC), a conservative group made up of state legislators and business and other interests. As in past sessions, voter ID bills were hotly contested along partisan lines, with Republicans largely supporting and Democrats largely opposing stricter ID requirements.

##### *1. A High Priority After Years Without Success*

State legislators across the country have been pushing strict photo ID requirements for almost a decade now, with little success before this year. In recent legislative sessions, a majority of states—though fewer than this year—saw the introduction of stricter voter ID bills.<sup>40</sup>

Although most voter ID bills did not advance very far in those years, there was a strong push in some states, especially where ID laws passed this year. Wisconsin's new voter ID law passed a decade after then-legislator and now-Governor Scott Walker first authored a photo ID bill; former Governor Jim Doyle vetoed the bill three times between 2002 and 2005.<sup>41</sup> In Kansas, legislators were successful in passing a voter ID bill in 2008, but it was vetoed by then-Governor Kathleen Sebelius. In Texas, strict voter ID bills came close to passage in both 2007 and 2009, but were blocked under a state procedure akin to the filibuster.<sup>42</sup> In 2009, legislators in the South Carolina House passed a photo ID bill over angry resistance from their Democratic colleagues,<sup>43</sup> inciting them to storm out of the session in protest.<sup>44</sup> In Tennessee in 2009, a voter ID bill passed the Senate, but died in the House.<sup>45</sup> In Mississippi in 2009, legislators fought so hard for a restrictive voter ID bill that they killed a compromise proposal to require photo ID because it was not strict enough—and the bill would have also permitted early voting.<sup>46</sup> In Alabama, a photo ID bill was part of the Republican Party's legislative agenda for more than a decade, with recent bills introduced in 2007, 2009, and 2010.<sup>47</sup> Following a failed bill in 2007,<sup>48</sup> Rhode Island's House passed a voter ID bill in 2009, but a Senate version stalled.<sup>49</sup>

In most states, however, strict voter ID bills did not advance very far before this year. Indeed, previously only two states (Indiana and Georgia) had ever implemented a photo ID requirement for voters. Between 2006 and 2011, no state passed a photo ID law. This year, in contrast, strict voter ID bills met with far greater success, passing twelve state legislatures—though ultimately vetoed in five—and passing one legislative chamber in at least six more.<sup>50</sup>

##### *a. Change in Partisan Control*

There are at least two major reasons for this change. The first is the stark shift in the partisan makeup of state legislatures after 2010. As noted, there is typically a sharp partisan divide over the issue of strict voter ID requirements, with Republicans generally pushing more restrictive measures and Democrats generally opposing them. This year, in every case but one, strict voter ID bills were introduced by Republican legislators. Newly elected legislators introduced about a quarter of these bills.<sup>51</sup>

As a result of Republican electoral success in state houses across the country in 2010, proponents of strict voter ID bills were able to garner much greater legislative support than in the past. In the 2010

elections, Republicans picked up at least 675 state legislative seats across the country.<sup>52</sup> Republicans therefore controlled both legislative chambers in twenty-six states, up from fourteen earlier in 2010.<sup>53</sup> In Wisconsin, for example, both houses switched to Republican control for the first time since 1998; Republicans gained fourteen seats in the Assembly and four in the Senate.<sup>54</sup> Similarly, in Alabama, Republicans won overwhelming majorities in both legislative chambers in 2010, and they made voter ID a priority.<sup>55</sup> With the exception of Rhode Island, every state that enacted stricter voter ID requirements this session had both houses and the governor's office controlled by Republicans.

**Focus: Rhode Island and Ohio—Exceptions That Prove the Rule.** As noted above, support and opposition to voter ID laws in state legislatures in 2011 fell almost entirely along partisan lines, with Republicans largely supporting and Democrats largely opposing stricter ID requirements. There were two notable exceptions.

In Rhode Island the photo ID bill that eventually became law was introduced by a Democratic legislator, passed two legislative chambers controlled by Democrats, and was signed by an independent governor. Senate sponsor Harold Metts said, “[I]n this day and age, very few adults lack one of the forms of identification that will be accepted, and the rare person who does can get a free voter ID card from the Secretary of State. While I’m sensitive to the concerns raised, at this point I am more interested in doing the right thing and stopping voter fraud.”<sup>56</sup> But Rhode Island’s bill is significantly less restrictive and differs substantially from the others that passed this session, in two major respects. First, unlike the other states that provide a narrow list of acceptable photo IDs, Rhode Island broadly accepts any ID with a voter’s name and photograph.<sup>57</sup> Second, although Rhode Island now requires that all voters present photo ID before receiving a ballot in person, a voter without photo ID may sign an affidavit that she does not have a photo ID and cast a provisional ballot that will count if the signature on the ballot matches the voter’s registration signature. In other words, a voter without photo ID can still cast a ballot that will count.

In Ohio the usual pattern was broken in a different way: a very restrictive photo ID bill was introduced by a Republican state legislator and uniformly opposed by Democrats, but it was ultimately defeated because of opposition from several prominent Republicans, including the Secretary of State.<sup>58</sup> In rejecting a proposal from the Ohio House that would only have allowed voters to present one of four types of government issued ID, Secretary Husted stated:

I want to be perfectly clear, when I began working with the General Assembly to improve Ohio’s elections system it was never my intent to reject valid votes. I would rather have no bill than one with a rigid photo identification provision that does little to protect against fraud and excludes legally registered voters’ ballots from counting.<sup>59</sup>

The reaction of Husted and some of his fellow Republicans in the state senate may have something to do with the fact that Ohio is several years ahead of most of the country when it comes to acrimonious partisan fighting over election administration. In particular, the passage of a voter ID bill in 2005 by a Republican-controlled legislature, in a partisan battle typical of this year’s fights, led to years of costly litigation and negative publicity about the new law.<sup>60</sup> That battle ultimately ended in a court-ordered settlement in 2009.<sup>61</sup> In the meantime, the new requirements received exceptionally harsh coverage from commentators and editorial boards across the state,<sup>62</sup> while election officials of both major parties complained that the

law was far too complicated and difficult to administer.<sup>63</sup> Given this history, it is perhaps not surprising that there were elected officials of both political parties who preferred to stay away from a proposal that would have imposed an even more restrictive set of ID requirements on Ohio voters.

*b. Heightened Priority*

The second reason for the greater success of photo ID bills this year is that legislators made them more of a priority than they had been in the past. Many of the Republican legislators and election administrators swept into office in 2010 made voter ID a significant campaign issue as well as a major legislative priority. Previously, it was rare for voter ID to become a campaign issue; in 2010, in contrast, newly elected Secretaries of State Matt Schultz of Iowa, Kris Kobach of Kansas, Scott Gessler of Colorado, and Dianna Duran of New Mexico all made voter ID a prominent part of their campaign platforms.<sup>64</sup> Newly-elected Wisconsin Governor Scott Walker similarly made voter ID a campaign issue in 2010.<sup>65</sup> Even before the legislative sessions began, state lawmakers had already pre-filed voter ID bills in a number of states.<sup>66</sup>

**Focus: Texas.** The Texas example is illustrative. After Republicans gained twenty-six seats in the State House, Texas State Representative Debbie Riddle camped out overnight in the State Legislature to be the first to pre-file voter ID legislation.<sup>67</sup> (As it turns out, her proposed bill was not the legislation that eventually passed.) Eager lawmakers introduced so many voter ID bills—at least fourteen—that a new “House Select Committee on Voter ID and Voter Fraud” was established to review the legislation. To ensure that more stringent voter ID rules would pass quickly, Texas Governor Rick Perry used emergency powers to alter the usual legislative process, declaring voter ID an “emergency item,” allowing legislators to begin deliberation on voter ID bills immediately instead of waiting until after the first sixty days of the session, as is customary.

This rush came after at least six years of contentious and partisan debate in Texas on voter ID.<sup>68</sup> Democrats successfully blocked voter ID bills in the last three legislative sessions, under dramatic circumstances. In 2007, a Democratic senator on sick leave left his bed and rushed to the State Capitol to block a vote on proposed voter ID legislation. After casting the deciding vote to prevent debate, he went to the lounge and vomited.<sup>69</sup> That same session, another state senator rallied to block proposed legislation, despite the fact that he was suffering complications from a recent liver transplant and needed a hospital bed to be kept about one hundred feet from the Senate floor.<sup>70</sup> Two years later, in 2009, sparring<sup>71</sup> over a new voter ID proposal drove marathon hearings running for twenty-three hours straight.<sup>72</sup>

*c. Support by Conservative ALEC*

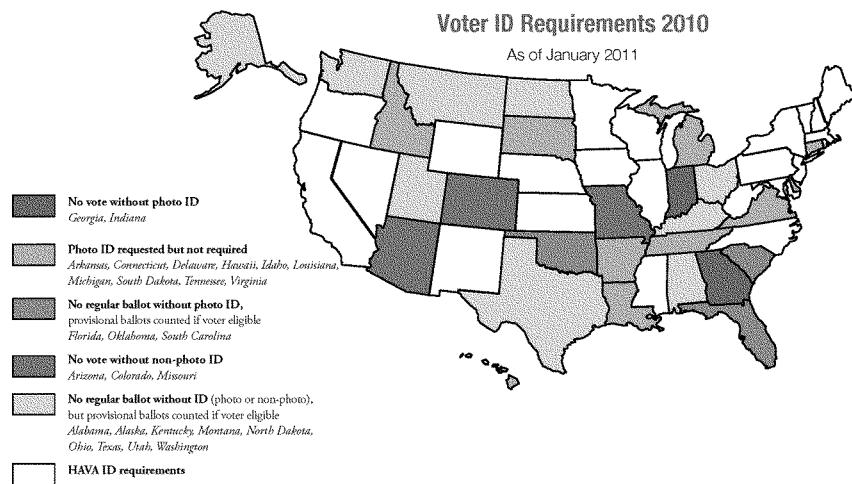

A third possible reason for the success of voter ID bills this year is the reported involvement of the American Legislative Exchange Council (ALEC), a powerful conservative group that brings together state legislators and private interests to develop and support state legislation and policy. According to the *New York Times*, “[m]any of [this session’s voter ID] bills were inspired by the American Legislative Exchange Council, a business-backed conservative group, which has circulated voter ID proposals in scores of state legislatures.”<sup>73</sup> In 2009, according to other media reports, not long after ALEC featured a cover story called “Preventing Election Fraud” in its member magazine, the organization adopted

model voter ID legislation and circulated it to its members across the country.<sup>74</sup> The voter ID bills that were eventually introduced and passed in the states this session all bear some resemblance to ALEC's model legislation. Although the extent of ALEC's involvement in voter ID legislation is unknown, the organization boasts that each year more than 1,000 bills based on its models are introduced in state legislatures, and that approximately 17% of those bills become law.<sup>75</sup> In addition to developing model bills, ALEC typically provides a range of support services to help advance the policies it supports, including trainings and seminars, studies, talking points, strategic plans, and action alerts.<sup>76</sup>

## *2. The Debate*

As in previous legislative sessions, with the exception of Rhode Island, the debates over photo ID bills were highly charged and divided along partisan lines.

Nowhere was the debate more heated than in **Wisconsin**. There, Republican legislators considered passing the hotly contested photo ID bill while the Democrats were absent, boycotting the legislature to block the bill that eliminated collective bargaining rights for public employees.<sup>77</sup> Because the photo ID bill entailed significant costs for the state, state legislative rules prevented Republicans from proceeding unilaterally without a quorum. But the drama did not stop there. Once the Democrats returned, the State Senate passed the voter ID bill in a hasty and boisterous vote, denying opponents the opportunity to debate or speak out against the bill. Senate President Mike Ellis cut off the most senior member of the chamber, State Senator Fred Risser, to call a vote. Democratic members sought to stop the roll call, but President Ellis declared the bill passed once it had received enough votes. Some Democratic senators did not vote out of protest or confusion, and reportedly could not add their votes after the commotion was over.<sup>78</sup> Similarly, in **Alabama**, Senate leadership limited debate on the voter ID bill to twenty minutes.<sup>79</sup>

The debates were also characterized by a high level of mistrust between both sides. Opponents of voter ID accused proponents of attempting to shrink the electorate for partisan gain. Former President Bill Clinton, for example, asserted that voter ID laws are intended to specifically hurt Democratic voters, and that proponents “are trying to make the 2012 electorate look more like the 2010 electorate than the 2008 electorate.”<sup>80</sup> Columnist E.J. Dionne wrote that “[s]ometimes the partisan motivation” behind these efforts “is so clear.”<sup>81</sup> Proponents, on the other hand, accused proponents of trying to ignore or even foster voter fraud. According to one columnist, the Democrats’ “rhetoric is over the top, probably because voter ID does get at the problem of voter fraud which—for some Democrats—is not so much a theory as a turn out model, a key to winning close elections.”<sup>82</sup>

The content of the debate on voter ID bills was noteworthy for its consistency across the country. Proponents of photo ID bills consistently cited allegedly rampant voter fraud in their states and the need for greater ballot security to justify legislation. For example, in support of voter ID legislation, Kansas Secretary of State Kris Kobach relied upon 221 reported instances of voter fraud in Kansas between 1997 and 2010.<sup>83</sup> Similar claims were made by proponents of voter ID in other states.<sup>84</sup> Many also argued that voting is a “privilege” for which it is reasonable to require voters to expend effort.<sup>85</sup>

Opponents, on the other hand, argued that photo ID requirements will disenfranchise thousands of eligible Americans—especially low-income citizens, minorities, students, and older Americans.<sup>86</sup> They also pointed out that the kind of fraud addressed by ID requirements hardly ever occurs in American elections.<sup>87</sup> For opponents, voting is a fundamental right rather than a privilege. Thus, in explaining his veto of a photo ID bill, New Hampshire Governor John Lynch said, “[t]he right to vote is a

fundamental right ... [The voter ID bill] creates a real risk that New Hampshire voters will be denied their right to vote.<sup>88</sup> And, as discussed below, opponents focused on the high costs of voter ID laws.

As voter ID laws were being considered across the country, members of Congress began weighing in on the issue, with a strong partisan divide. Upon achieving their new majority, House Republicans announced concerns about election administration and called for additional measures to “better protect the electoral process.”<sup>89</sup> Congressional Democrats, on the other hand, decried the new push toward restrictive voter ID requirements. Representative John Lewis (D-GA) said, “this year’s Republican-backed wave of voting restrictions has demonstrated that the fundamental right to vote is still subject to partisan manipulation.”<sup>90</sup> Some congressional Democrats took to the house floor to denounce the new legislative efforts on voter ID, raising questions about the motives underlying those efforts. Congresswoman Marcia Fudge (D-OH), a leading opposition voice, charged that “these efforts have an all-too familiar stench of the Jim Crow era.”<sup>91</sup> Representative G.K. Butterfield (D-NC) charged that the voter ID push “is a cynical and malicious Republican attempt to suppress minority and elderly voters who turned out in historical numbers for the ‘08 elections.”<sup>92</sup> One hundred and fifteen Democratic House members signed a letter to Attorney General Eric Holder asking him to oppose the new voter ID provisions.<sup>93</sup> Voter ID was a prominent topic in a September 8, 2011 hearing before a Senate Subcommittee chaired by Senator Dick Durbin examining the rash of new state voting laws that threaten to suppress voter turnout across the country.<sup>94</sup>

### *3. When All Else Fails: Ballot Measures*

Lawmakers who were unsuccessful in passing strict voter ID laws or whose laws were blocked by the courts have begun trying a new route: passing ballot measures to amend their state constitutions, as **Oklahoma** did in 2010. Oklahomans passed voter ID as a ballot measure in 2010, after a voter ID bill was vetoed by then-Governor Brad Henry. The new law—which is not nearly as restrictive as other measures introduced this year<sup>108</sup>—was implemented on July 1, 2011.

Though **Missouri** Governor Jay Nixon vetoed a photo ID bill this year, the Legislature passed a voter ID ballot measure, which cannot be vetoed, and which will be on the Missouri ballot in November 2012. The ballot measure would amend the State Constitution to allow the Legislature to impose stricter photo ID requirements on voters. This constitutional amendment effort comes five years after the Missouri State Supreme Court ruled a highly controversial voter ID law unconstitutional, noting that it would burden voters.<sup>109</sup> No state photo ID requirement can be imposed on Missouri voters unless the State Constitution is amended to overturn that decision. And even if the ballot measure passes, voters will not be required to show photo ID unless the Legislature passes and the Governor signs additional legislation.

Supporters of stricter voter ID have been pushing ballot measures in other states as well. A ballot measure requiring photo ID to vote will appear on the **Mississippi** ballot in November 2011.<sup>110</sup> In **Minnesota**, legislators in the House introduced a ballot measure to amend the State Constitution to require voter ID to counter this year’s veto; the measure has not yet been introduced in the Senate.<sup>111</sup>

### The Costs of Voter ID

The high cost of implementing voter ID laws was a big issue this session, when states were facing serious fiscal crises. States that pass voter ID laws must, according to court decisions, incur a range of costs, including the costs of providing free photo IDs to voters who do not have them, ensuring that IDs are reasonably accessible to all voters, and educating the public and election officials.<sup>95</sup> Although there was widespread agreement that voter ID laws entail necessary costs, there were disputes over what those costs would be, with bill opponents accusing proponents of dramatically understating the costs.<sup>96</sup>

The high cost of voter ID requirements caused local and county election officials in some states—including Iowa, Pennsylvania, and Wisconsin—to oppose new voter ID laws.<sup>97</sup> They also deterred legislators in Nebraska and Iowa, two states that considered, but did not pass, voter ID legislation this year.

**Nebraska.** The fiscal note attached to Nebraska's photo ID bill (L.B. 239), estimated negligible costs associated with its implementation, assuming that only voters who could prove they were indigent would be provided with free IDs.<sup>98</sup> Opponents argued that forcing voters to prove indigence before they could be provided with a photo ID could subject the bill to constitutional challenge, and argued that all IDs should be free.<sup>99</sup> The original sponsor of the bill, Senator Charlie Janssen, proposed an amendment the bill that would have added non-photo ID and voter registration confirmation cards to the list of acceptable forms of voting identification.<sup>100</sup> This drew a rebuke from Larry Dix, director of the Nebraska Association of County Officials, who said the amendment would increase costs for the counties without providing any extra security. "I don't see that the [proposed amendment] solves the problem at all," he said, "there's no security in that."<sup>101</sup> Ultimately, the bill failed to leave committee and therefore died when the legislative session ended.<sup>102</sup>

**Iowa.** The Iowa State Association of County Auditors (ISACA)—a bipartisan organization representing county auditors, who are responsible for administering elections at the county level—opposed the voter ID bill proposed in their state.<sup>103</sup> ISACA conducted an independent study of the impact of voter ID measures in Indiana, and found that the proposed Iowa bill would impose too high a cost and burden on local election jurisdictions to justify its adoption.<sup>104</sup> As one county auditor put it, the legislation would be an “unfunded mandate” on counties, who would have to bear the brunt of meeting the obligation of “educating the public and the voter [about the bill’s requirements].”<sup>105</sup> As a result, the Association voted to officially oppose H.F. 95.<sup>106</sup> Both Democratic and Republican representatives in ISACA opposed the measure, with not one person voting to support it and with 16 of 60 county representatives choosing to remain neutral. According to Mike Gronstal, the Senate majority leader, the opposition from ISACA was one of the main reasons the bill ultimately failed.<sup>107</sup>

## II. DOCUMENTARY PROOF OF CITIZENSHIP TO REGISTER OR VOTE

### A. Background

In general, except for certain local elections, a person must be a U.S. citizen over eighteen years old to be eligible to participate in American elections. A voter typically establishes her eligibility by swearing an affidavit, under penalty of perjury, that she is a U.S. citizen of voting age and meets all the other eligibility requirements of her state (such as residency and lack of disqualifying criminal convictions).<sup>112</sup> A non-citizen or other ineligible person who falsely claims eligibility and either registers to vote or votes is subject to serious criminal penalties—including five years in prison and \$10,000 in fines under federal law<sup>113</sup>—and also deportation.

Until recently, no state has ever required any voter to produce documentary proof of citizenship—or age or any other component of eligibility—to participate in elections. In 2004, however, as part of a broad-ranging ballot initiative, called Proposition 200, regulating the treatment of immigrants, Arizona for the first time passed a law requiring prospective voters to present documentary proof of citizenship in order to register to vote.<sup>114</sup> The Arizona law, which went into effect before the 2006 elections,

**As of the start of this legislative session, only two states had ever sought to require documentary proof of citizenship for voter registration or voting.**

---

specifically directs election officials to reject voter registration applications that are not accompanied by one of several specified citizenship documents,<sup>115</sup> thus denying those individuals the ability to vote. Until this year, this Arizona law was an outlier, unique in the country.

Arizona's proof of citizenship law sparked significant controversy from the outset. In March 2006, the U.S. Election Assistance Commission, a bipartisan federal agency charged with regulating certain election administration matters, voted to reject Arizona's request to amend the federal voter registration application form to reflect the state's new rules.<sup>116</sup> Shortly afterward, the law was challenged in federal court;<sup>117</sup> it has been wrapped up in litigation ever since. In the most recent ruling in that case, a panel of the U.S. Court of Appeals for the Ninth Circuit held that the proof of citizenship requirement conflicts with federal law—specifically, the National Voter Registration Act of 1993.<sup>118</sup> The Ninth Circuit agreed to rehear that case *en banc*, and oral argument was held before a larger panel on June 21, 2011. The court has not yet issued its decision.

Georgia became the second state to pass a proof of citizenship law in 2009, requiring prospective voters to provide documentary proof of citizenship in order to register to vote.<sup>119</sup> This came after the Department of Justice blocked implementation of an earlier Georgia policy for checking the citizenship of registered voters as unreliable and discriminatory.<sup>120</sup> The Department of Justice ultimately approved of Georgia's proof of citizenship law in April 2011,<sup>121</sup> but the state has not yet put the law into effect.

Thus, as of the start of this legislative session, only two states had ever sought to require documentary proof of citizenship for voter registration or voting, only one had implemented such a requirement, and the legality of the requirement had not yet been resolved (and still is not resolved) in the courts.

The push for proof of citizenship requirements should also be considered in the context of the bills targeting immigrants that swept the states this year. Alabama, Arizona, Georgia, Indiana, South Carolina, and Utah are among the states that passed laws supposedly designed to restrict benefits for, and crack down on, undocumented immigrants.<sup>122</sup> As with Proposition 200, Arizona was the national leader in this effort, with its highly controversial H.B. 1070.

### B. Roundup of Legislative Developments

This session, at least twelve states introduced legislation that would require documentary proof of citizenship to register or vote: Alabama,<sup>123</sup> Colorado,<sup>124</sup> Connecticut,<sup>125</sup> Kansas,<sup>126</sup> Maine,<sup>127</sup> Massachusetts,<sup>128</sup> New Hampshire,<sup>129</sup> Nevada,<sup>130</sup> Oregon,<sup>131</sup> South Carolina,<sup>132</sup> Tennessee,<sup>133</sup> and Texas.<sup>134</sup> Washington State introduced a resolution to request that any federal voting mandates make funding contingent upon the adoption of photo ID and proof of citizenship requirements.<sup>135</sup> Three proof of citizenship bills passed: in Alabama, Kansas, and Tennessee.<sup>136</sup> The new Kansas and Tennessee laws go into effect immediately; the Alabama law must await approval by the U.S. Department of Justice or a federal court under the Voting Rights Act.<sup>137</sup> To date, Alabama has not yet submitted the law for preclearance.<sup>138</sup>

### C. What the Bills Say

The new Alabama and Kansas proof of citizenship laws are virtually identical. Like the 2004 Arizona law, both laws require prospective voters to provide documentary evidence of U.S. citizenship with their voter registration applicants, and election officials to deny registration to any applicant who does not provide satisfactory documentation.<sup>139</sup> Acceptable documents include: any driver's or non-driver's ID that includes a notation that the person submitted proof of U.S. citizenship, a U.S. birth certificate, a U.S. passport or U.S. naturalization documents, certain tribal IDs, and other rare documents.<sup>140</sup> The Alabama and Kansas laws apply only to new registrants; they specifically exempt all people already registered in the state, even those who move and must update their voter registration records.<sup>141</sup> Neither law includes any exceptions for prospective voters who were not previously registered. Both laws specify that applicants whose registrations are denied because they failed to include satisfactory proof of citizenship may challenge election officials' determination in court.<sup>142</sup> The bills that did not pass this session similarly would have required documentary proof of citizenship to register to vote.

Unlike the Alabama and Kansas laws, the Tennessee law applies only to individuals flagged by state officials as potential non-citizens based on a database check. The Tennessee law therefore applies to a smaller number of prospective voters.

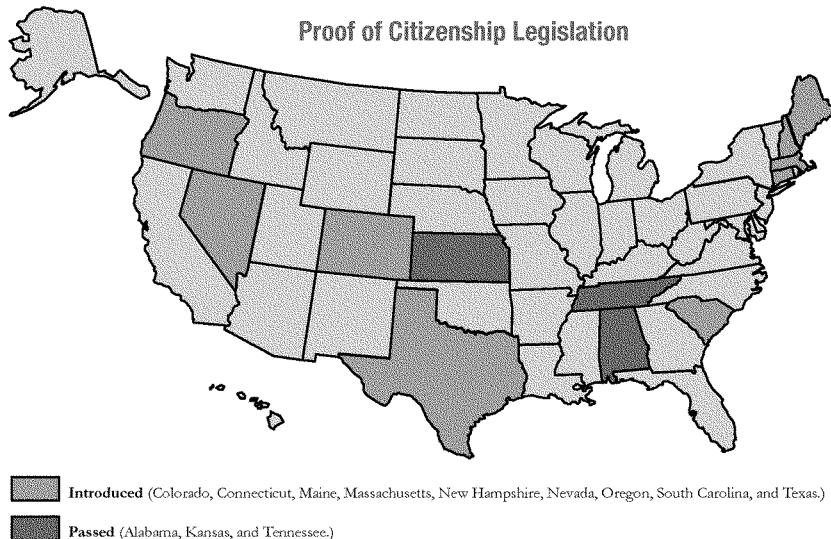

### D. Legislative Battles

Legislative debate over proof of citizenship bills was at times rancorous. For example, in Colorado, Democratic legislators and others pressed Republican Secretary of State Scott Gessler on his claims of widespread voter fraud by non-citizens. One Colorado Democratic representative demanded that Mr.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

Gessler turn over evidence of actual instances of non-citizens voting.<sup>143</sup> Another representative insisted that Mr. Gessler prosecute actual instances of voter fraud of which he was aware, suggesting that Mr. Gessler did not actually have any cases that could be prosecuted.<sup>144</sup> County clerks also demanded that Gessler turn over evidence of voter fraud, insisting that they were not aware of any such instances.<sup>145</sup> The legislative debates over proof of citizenship mirrored those over voter ID. Proponents claimed that proof of citizenship requirements are needed to prevent non-citizens from illegally voting in elections. In several states, proponents claimed to have uncovered evidence of such illegal voting. Colorado Secretary of State Scott Gessler, for example, claimed that up to 11,805 non-citizens were registered to vote in Colorado,<sup>146</sup> while Kansas Secretary of State Kris Kobach claimed to have found 67 non-citizens illegally registered to vote in Kansas.<sup>147</sup> These claims were hotly disputed, and they have since been debunked.<sup>148</sup> Nonetheless, Representative Gregg Harper (R-MS) called the finding “shocking,” and at a hearing he chaired on the topic, said, “[w]e simply cannot have an electoral system that allows thousands of non-citizens to violate the law and vote in our elections … [w]e must do more to protect the integrity of our electoral processes.”<sup>149</sup>

Opponents, on the other hand, claimed that proof of citizenship requirements exclude large numbers of eligible voters, pointing out that millions of eligible Americans—at least 7% according to a leading study by the Brennan Center<sup>150</sup>—do not have ready access to the documents needed to prove citizenship. As Tennessee State Senator Thelma Harper said, “[i]t hampers people who want to be a part of the system.”<sup>151</sup> Opponents further disputed the claim that there is a problem of non-citizen voting in American elections, pointing out that only a minuscule number of non-citizens have been found to have voted illegally, and that it is already easy to catch non-citizen voters since they leave a clear paper trail.<sup>152</sup>

### III. MAKING VOTER REGISTRATION HARDER

In every state but one, citizens must be registered in order to vote. Voter registration facilitates election administration by enabling election officials to more easily plan for elections, process voters, and prevent fraud. But registration requirements can also function as a barrier to many eligible voters, preventing them from participating because of technical hurdles or missed deadlines.<sup>153</sup>

Experts have long pointed out that the nation's outdated registration system is among the most significant barriers to voting, resulting in the disenfranchisement of millions of Americans during every federal election.<sup>154</sup> In 2001, the Carter-Ford National Task Force on Election Reform found that "[t]he registration laws in force throughout the United States are among the world's most demanding ... [and are] one reason why voter turnout in the United States is near the bottom of the developed world."<sup>155</sup> This impact has not abated: around 3 million Americans tried to vote in the 2008 Presidential election but could not, due to voter registration problems.<sup>156</sup>

The general thrust of the law over the past few decades has been to ease registration requirements to make it easier for eligible citizens to get on the voter rolls. The most significant advance was the National Voter Registration Act of 1993, also known as the "Motor Voter" law, which made voter registration opportunities widely available across the country.<sup>157</sup> More recently, states have taken the lead in modernizing their voter registration systems so that more voters are getting on the rolls and the rolls are getting more accurate.<sup>158</sup>

This year, the tide reversed. Instead of efforts to increase voter registration, this year new registration requirements have been instated that will make it more challenging for eligible citizens to ensure that they are registered to vote on Election Day. Voter registration regulations range from restrictions on individuals and groups who help register voters, to efforts to scale back Election Day and same-day registration, to new rules making it harder for voters to stay registered after they move.

#### Part 1: Voter Registration Drive Regulations

##### A. Background

Voter registration rates in the United States are routinely lower than they are in other democracies around the world: more than a quarter of voting-age Americans are not registered and thus cannot vote.<sup>159</sup> This is in part because, unlike in other democracies, U.S. state governments do not assume the responsibility of getting voters onto the rolls; instead, we rely on individual voters to ensure that they are registered. Community-based voter registration drives play an important role in encouraging and assisting other citizens to register to vote. Restrictions on voter registration drive activity have a direct impact on who has access to voter registration and who gets registered to vote.

Although community-based voter registration drives have been around in some form for decades, Congress helped expand such voter registration activity by passing the National Voter Registration Act of 1993 (NVRA).<sup>160</sup> Among other things, the NVRA greatly simplified voter registration application

forms, required states to follow uniform rules for accepting those forms, and required them to make blank forms generally available “with particular emphasis on making them available for organized voter registration programs.”<sup>161</sup> As a result, civic groups were easily able to obtain and circulate voter registration forms to potential voters who might not otherwise register or become engaged in the electoral process.

Voter registration drives have become an increasingly important registration method in the past decade, especially for low-income citizens, students, members of racial and ethnic minority groups, and people with disabilities. For example, in the 2004 general election, large-scale voter registration drives report assisting almost 10 million citizens to register to vote, contributing to a surge in new registrations and increased turnout in that election. In one county in Florida alone, voter registration organizations were responsible for registering 62.7% of all newly registered voters.<sup>162</sup> Nationally, Census data show that Hispanic and African-American voters are approximately twice as likely to register to vote through a voter registration drive as white voters.<sup>163</sup>

Voting rights advocates point to increased voter registration rates, especially among minority, low-income, and younger citizens, as a positive effect of voter registration drives and a reason to expand them. They also cite recent falling voter registration rates as a reason to encourage voter registration drives. The 2010 election saw a plunge in new voter registrations, as new voter registrations in 2010 were down almost 17% from the 2006 cycle.<sup>164</sup> This was accompanied by a dramatic decrease in voter registration drive activity, for the first time in years. But voter registration drives have unfortunately become an increasingly controversial political topic.

Over the past few years, there has been a growing effort to push back against voter registration drives. Opponents have argued that voter registration drives are susceptible to fraud, citing allegations of fraud related to ACORN, a defunct organization that focused on registering low-income voters.<sup>165</sup> Presidential candidate John McCain cited allegedly fraudulent registration cards submitted by ACORN as “one of the greatest frauds in voter history in this country, maybe destroying the fabric of democracy.”<sup>166</sup> Other opponents have argued that voter registration should be made more difficult to reflect the importance of the right to vote.<sup>167</sup> At the extreme end of the spectrum, some have argued that by specifically empowering low-income voters to register, voter registration drives are “antisocial and un-American.”<sup>168</sup>

Recently, a number of state legislatures have pushed legislation to regulate and restrict community-based voter registration drives. This extensive regulation of voter registration drive activity is a unique government regulation of private political activity. These regulations have serious consequences for citizens’ ability to organize and conduct voter registration drives; for example, the recent Florida law imposing a set of new restrictions on third-party voter registration activity (discussed at length below) has resulted in the volunteer-based League of Women Voters placing a moratorium on all voter registration work because the law imposes too great a burden on voter registration. The type and extent of laws governing voter registration have a direct impact on who gets to participate in the process, and who is permitted to assist them in doing so.

## B. Roundup of Legislative Developments

Bills placing new restrictions on voter registration groups have been proposed in at least seven states—California (passed in both houses; awaiting governor's action), Florida, Illinois (pending), Mississippi (failed), Nevada (restrictions removed by amendment), New Mexico (failed), North Carolina (pending), and Texas.

These bills have been signed into law in Florida and Texas. Florida and Texas stand out as two states that have long histories of restricting voter registration drives, and the new laws passed in this session will make both states further outliers in limiting this activity. Neither state had reported cases of registration fraud linked to voter registration drives in the past election cycle, nor any other apparent precipitating cause for the further regulations imposed by these bills.

## C. What the Bills Say

Although the bills seeking to regulate voter registration drives vary in their content, there are several recurring elements. Almost universally, these bills would require citizen registration groups to register with the state before undertaking a voter registration drive.<sup>169</sup> They may also require special training for volunteers; the use of special forms, disclosure, and reporting systems; or short deadlines for the submission of voter registration forms. Violation of these rules, or registering voters outside the mandated system, usually carries criminal or civil penalties. The legislation that succeeded this year is described below.

**Florida.** Florida's House Bill 1355, a mammoth 158-page omnibus bill, was signed by Governor Rick Scott on May 19th.<sup>170</sup> The new law requires voter registration groups to pre-register with the state before engaging in any voter registration activity, requires every volunteer or employee to sign a sworn affidavit under penalty of perjury listing all criminal penalties for false registration, and mandates that every registration form collected by a voter registration group be physically received by county officials within 48 hours of signature or face strict civil penalties and fines. In order to comply with this tight turnaround time, groups must write the precise date and time when an individual completes a voter registration form on each registration form. The law also requires voter registration groups to place their government-issued organizational code on each form they obtain from elections officials or receive from a voter, to track the precise numbers of both state and federal voter registration forms that each group obtains or collects, and to submit those figures in monthly electronic reports to the state.

**Texas.** Texas introduced a series of bills that would limit the ability of persons to register others to vote, two of which were signed into law (H.B. 1570 and H.B. 2194).<sup>171</sup> H.B. 1570 requires that anyone who registers voters first be deputized and attend a mandatory training; the law delegates the development of the training to the Secretary of State, and explicitly permits an "exam" at the end of the training.<sup>172</sup> H.B. 2194 requires anyone registering others to be a Texas resident and qualified voter, and prohibits performance-based compensation for anyone who is paid to register voters.<sup>173</sup>

#### D. Legislative Battles

The two bills signed into law in 2011 that restrict voter registration drive activity were uniformly supported by Republican legislators. In Florida, the law passed along straight party lines in the House of Representatives, with all Democrats opposing. Democrats were joined by two Republicans voting against the bill in the State Senate.<sup>174</sup> In Texas, which passed two companion bills restricting third-party voter registration, one bill passed unanimously,<sup>175</sup> while its companion bill passed only the Senate unanimously,<sup>176</sup> with seven House members, all Democrats of color, voting against the bill.<sup>177</sup>

##### *Florida History*

Florida has a history of implementing restrictive rules for voter registration drives—rules that have been successfully challenged before. (The Brennan Center for Justice has litigated twice in the past on behalf of Florida civic groups to challenge these restrictions.<sup>178</sup>)

The first major imposition of restrictions on voter registration drives occurred in 2005, a year after ACORN's community organizing work resulted in enough signatures to place a citizen initiative on the ballot to increase Florida's minimum wage. The law required third-party voter registration groups to meet a new ten-day deadline to submit registration forms to election officials, no matter how far away the registration deadline, and imposed hefty and potentially unlimited fines for each form submitted after that time under a strict liability scheme. The law specifically excluded political parties from its new restrictions.

On May 18, 2006, the League of Women Voters of Florida and other voter registration groups filed a lawsuit in federal court challenging as unconstitutional the 2005 Florida law regulating voter registration drives.<sup>179</sup> On August 28, 2006, a federal court in Miami blocked enforcement of the Florida law.<sup>180</sup>

After the state appealed that ruling, the Florida state legislature went back and reenacted a similar law with some changes in 2007, which the League and others also challenged.<sup>181</sup> During the lawsuit, the Secretary of State agreed not to implement the law before an administrative rulemaking process was completed. Civic groups were therefore able to resume their regular registration activities leading up to the 2008 election. In early 2009, the Florida Division of Elections proposed a final rule implementing the challenged statute in a way that reduced the negative impact on voter registration groups. The parties agreed to settle the lawsuit, and on June 17, 2009, the case was dismissed. The 2007 law has since been in effect.

##### *2011 Debate in Florida*

Between 2009 and 2011, there was no controversy in Florida involving voter registration and indeed nothing to suggest why the state legislature again took up the subject of restricting voter registration drives. Proponents of H.B. 1355, the omnibus voting bill that included new restrictions on voter

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

registration drives, merely claimed that they sought to reduce fraud. They also made it very clear that they wanted to make voting harder. The bill's sponsor, Florida State Senator Mike Bennett (R-Bradenton), was quoted as saying "But I have to tell you, I don't have a problem making it harder. I want people in Florida to want to vote as bad as that person in Africa who walks 200 miles across the desert. This should not be easy. This should be something you should do with a passion."<sup>182</sup> Florida State Senator Ellen Bogdanoff agreed: "Democracy should not be a convenience," she said.<sup>183</sup>

The new Florida law garnered broad opposition from civic and minority rights groups and prompted tens of thousands of emails to Governor Rick Scott urging him to veto the bill. Nonetheless, the law quickly passed on straight party lines and was signed into law, over strong opposition and condemnation by the Democratic Party. Shortly after its enactment, the all-volunteer Florida League of Women Voters and a variety of other voter registration groups announced they would discontinue their voter registration activities in the state. The League explained that the new law "imposes an undue burden on groups such as ours that work to register voters,"<sup>184</sup> and that "we cannot and will not place thousands of volunteers at risk, subjecting them to a process in which one late form could result in their facing financial and civil penalties."<sup>185</sup>

The Florida law is currently being considered by a federal court for "preclearance," federal approval required for jurisdictions covered under Section 5 of the Voting Rights Act because of a history of discrimination. Section 5 requires covered jurisdictions to supply evidence that changes to a state's election laws will not harm minority voters before those changes may go into effect. Five of Florida's sixty-seven counties are covered jurisdictions, where H.B. 1355 remains on hold awaiting preclearance; Secretary of State Browning has ordered election supervisors in the sixty-two non-covered counties to implement the law. Voting rights advocates have submitted evidence to both the Department of Justice and the federal court arguing that the new restrictions on voter registration drives, as well as the bill's other provisions reducing early voting days and eliminating cross-county address changes at the polls, will disproportionately impact Florida's minority voters.

### Impact of New Voting Laws on Minority Voters

Opponents of the bills and laws detailed in this report frequently point to their negative impact on the ability of African American and Latino citizens to vote, and with good reason: there is substantial evidence that these laws will make it far more difficult for minorities than whites to vote.

For instance, **Florida's** new law—which places so many new burdens on voter registration drive activity that most groups have discontinued their voter registration activities in the state—will almost certainly hit African American and Hispanic voters hardest. In Florida, U.S. Census Bureau data from the 2004 and 2008 election cycles show that both African-Americans and Hispanics rely more heavily than white voters on community-based voter registration drives; in fact, African-American and Hispanic citizens in Florida are more than twice as likely to register to vote through such drives as white voters.<sup>186</sup>

Similarly, the most restrictive voter ID laws, which only allow a small number of specified government issued photo IDs to vote, seem certain to create more burdens for minority citizens. According to one study, as many as 25% of African-American voters do not possess a current and valid form of government issued photo ID, compared to 11% of voters of all races.<sup>187</sup> And the kinds of government issued IDs that are permitted in the various state laws often put minorities at an even greater disadvantage. For instance, as noted above, the new **Texas** voter ID law, permits voters to use a concealed handgun license as proof of identity, but precludes voters from using a student ID, even if the student ID was issued by a state university. As the Texas Department of Public Safety recently noted, African Americans are significantly underrepresented among the state's handgun license holders. Of the more than 100,000 concealed handgun licenses issued in Texas last year, only 7.69% were issued to African Americans, even though African Americans constitute 12.1% of the state's voting age population. In contrast, African Americans are more likely to attend a public university in Texas than whites. According to the 2009 American Community Survey, 8.0% of voting-age African Americans in Texas attended a public university compared with only 5.8% of voting age whites.<sup>188</sup>

New restrictions on early voting will also have their biggest impact on people of color. Opponents of these restrictions have been particularly angered by the efforts to eliminate Sunday early voting, which they see as explicitly targeting African-American voters. **Florida** eliminated early voting on the last Sunday before Election Day, and **Ohio** has eliminated early voting on Sundays entirely. There is substantial statistical and anecdotal evidence that African Americans (and to a lesser extent Hispanics) vote on Sundays in proportionately far greater numbers than whites.<sup>189</sup> For instance, in the 2008 general election in Florida, 33.2% of those who voted early on the last Sunday before Election Day were African American and 23.6% were Hispanic, whereas African Americans constituted just 22.7% of all early voters for all early voting days, and Hispanics just 11.6%.<sup>190</sup>

## Part 2: Eliminating Same-Day Registration

### A. Background

Prior to 2011, eight states—Idaho, Iowa, Maine, Minnesota, Montana, New Hampshire, Wisconsin, Wyoming—allowed for Election Day registration (“EDR”), meaning that citizens could register and vote at their local polling place on Election Day.<sup>191</sup> Maine was the first state to adopt EDR, in 1973; Iowa was the most recent, in 2008.<sup>192</sup> In 2007, North Carolina adopted same day registration for the early voting period, but not on Election Day.<sup>193</sup> Beginning in 2008, Ohio allowed same day registration for the first week of early voting.<sup>194</sup> (Other states provide for EDR in certain circumstances; for instance, in Connecticut and Rhode Island, voters who register on Election Day may vote for presidential candidates only.)

Voting rights advocates have long praised EDR.<sup>195</sup> Because it has existed in some states for nearly forty years, there is a substantial record of its benefits. States with EDR have consistently had higher turnout than states without, and the top five states for voter turnout in 2008 were all EDR states.<sup>196</sup> There is also evidence that EDR specifically increases turnout among young voters.<sup>197</sup>

Proponents of EDR point out that it greatly reduces the use of provisional ballots<sup>198</sup> (under federal law, provisional ballots are provided to voters when there is a question about the voter’s eligibility, very often related to whether they are properly registered). Most voting rights advocates prefer the use of regular ballots to provisional ballots where possible, because a significant percentage of provisional ballots go uncounted in every election.<sup>199</sup>

The most common objection to EDR is that it “invites” voter fraud.<sup>200</sup> This has been the main public explanation provided by supporters of bills to end same day registration, though some have also argued that same day registration imposes administrative burdens on those running the polls on Election Day.<sup>201</sup>

Bills to eliminate same day registration in 2011 were uniformly sponsored by Republicans. The bills that passed the Montana and Ohio legislatures were unanimously opposed by Democratic legislators in the legislative chambers that voted on them.<sup>202</sup>

The partisan split over Election Day Registration has not always existed. When Maine became the first state to adopt EDR in 1973, the Republicans controlled both houses of the Legislature, and the proposal passed unanimously.<sup>203</sup>

### B. Roundup of Legislative Developments

Bills to eliminate EDR or same day registration were introduced in five states: Maine, Montana, New Hampshire, North Carolina and Ohio. The bills in Maine and Ohio have been enacted, though both bills may be overturned in the coming months by ballot initiative processes currently underway in each state. The bill in Montana passed the legislature, but was vetoed by Governor Brian Schweitzer on March 4, 2011.<sup>204</sup> The bill in North Carolina is still pending.

### C. What the Bills Say

**Maine.** On June 21, Governor Paul LePage signed a bill to repeal Maine's 38-year old law allowing same-day voter registration.<sup>205</sup> It was the oldest EDR law in the country. The Montana bill that was vetoed similarly would have eliminated EDR in that state.

**Ohio.** Beginning in 2008, the state of Ohio adopted what effectively became same day registration during the first week of early voting.<sup>206</sup> In both 2008 and 2010, the first week of early voting overlapped with the final week before the registration deadline, and meant that citizens were able to register and vote on the same day.<sup>207</sup> An omnibus election reform bill, signed by Governor John Kasich on July 1, substantially reduced the early voting period, thereby eliminating "Golden Week," and Ohio's *de facto* same day registration period.

**North Carolina.** Current law in North Carolina allows eligible voters to register to vote or update their registration information during the early voting period. A bill currently under consideration in the North Carolina Senate would eliminate same day registration (it would also reduce the early voting period, as discussed below) and the ability of voters to update their registration information during early voting.<sup>208</sup>

#### The Special Case of Ohio's Referendum

Ohio is no stranger to partisan fights over election law. With Republicans in control of both the Legislature and the executive branch this year, it is not particularly surprising that the state passed a new omnibus election law dramatically altering the state's election code. It was signed by Governor Kasich on July 1 and passed along party lines—without a single Democratic vote.<sup>209</sup> The bill, supported by the current Republican secretary of state of Ohio, impacted many areas of election administration.<sup>210</sup> Among the most significant changes relevant to this report, it cut the in-person early voting period by two thirds, eliminated early voting on Sundays, eliminated the state's *de facto* "same day registration" week during the early voting period, and forbade county boards of election from mailing out return-paid absentee ballot applications or absentee ballots.<sup>211</sup> Democrats argued that the bill would suppress votes, particularly votes of groups that traditionally favor Democrats, like African-Americans.<sup>212</sup>

Unlike minority parties in most other states, Democrats had a weapon that allowed them to fight changes to the election code even after they were passed into law: the Ohio referendum. Under the unique rules of that state, if opponents of the bill get enough signatures, all of the new provisions will be stayed until the referendum vote in November 2012.<sup>213</sup> Former Democratic Secretary of State Jennifer Brunner has led a petition drive to do just that.<sup>214</sup> If organizers gather enough signatures by September 29 to qualify for the referendum in November 2012, none of the bill's provisions will go into effect before the referendum.<sup>215</sup> That would mean, among other things, that Ohio would continue to operate under its old rules for early and absentee voting in 2012.

#### D. Legislative Battles

Efforts to repeal same day registration fell almost entirely along partisan lines. In states where repeal proposals received votes, most or all Republican legislators supported the repeal, and all Democratic legislators opposed it.<sup>216</sup>

A primary argument of those seeking repeal was that same day registration increased the possibility of fraud. “When you’re able to register and vote on the same day, there’s simply not the time to go and make sure that the registration is proper,” argued Ohio State Senator Mark Wagoner.<sup>217</sup> Legislators seeking repeal also frequently emphasized the responsibility of the voter to ensure she could vote on Election Day. Maine Senate Republican Nichi Farnham stated “If it is something that’s so important, our right to vote, then why would it be a problem to plan ahead to register?”<sup>218</sup>

In contrast to other states, proponents of the EDR repeal in Maine often placed more emphasis on the administrative burden of EDR than fraud, perhaps because of EDR’s long history there, and the absence of evidence of voter fraud during that time.<sup>219</sup> Republican Secretary of State Charles E. Summers, Jr. wrote in an op-ed that “I have never argued that this is a measure necessary to prevent voter fraud ... In fact, I have stressed repeatedly that this bill has been designed to relieve some of the stress on the system.”<sup>220</sup> Proponents of EDR in Maine have responded to this argument by pointing out that elimination of EDR means the state must adopt a system for provisional ballots,<sup>221</sup> which comes with its own additional costs and administrative burdens.<sup>222</sup>

Not surprisingly, opponents of repeal were unanimous in disputing claims that same day registration invited fraud. Montana Representative Bryce Bennett pointed to the fact that the current Secretary of State and two of her predecessors all argued that EDR had not led to any fraud.<sup>223</sup> Maine Representative Mark Dion made similar comments about EDR in his state. “The notion that same day voter registration leads to voter fraud is a myth . . . This is a solution in search of a problem.”<sup>224</sup>

Opponents of repeal also pointed to the benefits of EDR, including increased registration among the young and those who moved shortly before Election Day, greater voter turnout, and greater convenience for voters. Montana Secretary of State Linda McColloch argued that since its passage in 2006, 19,000 people registered to vote on Election Day in Montana, and that the repeal attempt ran “counter to the core freedoms of our democracy ... [i]f you support freedom, and you support democracy, you cannot support a bill that will turn your neighbors away at the polls.”<sup>225</sup>

##### **Focus: Maine and the People’s Veto**

Because Maine has a referendum process known as “the People’s Veto,” which allows Maine citizens to reverse a legislative decision, it is not clear that the repeal of EDR will be in effect on Election Day. On

---

“The notion that same day voter registration leads to voter fraud is a myth . . . This is a solution in search of a problem.”

—Maine Rep. Mark Dion

---

June 21, the same day that Governor Paul LePage signed the bill to repeal EDR, a coalition led by the League of Women Voters of Maine filed papers to launch a People's Veto campaign. They have gathered enough signatures to get the question on the November 2011 ballot.<sup>226</sup> It will appear as question number one on the ballot.<sup>227</sup>

### Part 3: Other Restrictions on Voter Registration

While attempts to limit voter registration drives and same day registration were the most widespread efforts to restrict voter registration this year, there have been additional, state-specific efforts that will make it more difficult for voters to ensure that they are registered and able to vote at their current addresses on Election Day. We provide two examples of these new limitations below.

**Florida.** Though Florida does not have Election Day registration, it does have a longstanding policy permitting voters who changed their address before an election to update their new address at the polls on Election Day, where the voters' existing registrations were cross-checked in a state database before the voters were given a ballot. The Florida omnibus bill eliminated that right. This has the potential to disenfranchise a significant number of voters in Florida, especially those who move and are unaware of the change in law or who move within the state after the registration deadline.

**Wisconsin.** Wisconsin also worked to limit voter registration possibilities. Though commonly known for its voter ID provisions, there are other voter registration restrictions in the new Wisconsin election law, including extending the length of residency period before an eligible person may register to vote from ten to twenty-eight days.

## IV. MAKING VOTING HARDER: RESTRICTING EARLY IN-PERSON AND MAIL-IN ABSENTEE VOTING

### A. Background

For years, the growth of early voting—through in-person early voting sites and no-fault absentee voting by mail—has been dramatic, and seemed unstoppable. 2011 marks the first year that inexorable progress may have stalled. Early in-person and absentee voting have come under attack by legislatures around the country; these attacks have been particularly successful against early in-person voting.

The numbers tell the story of early voting's growth in just the last decade. In 2000, an overwhelming majority of Americans still voted at their local polling places on Election Day; less than 4% voted at early voting sites, and only 10% voted by mail. By 2008, more than a third of American voters voted early. The percentage of Americans voting at early voting sites had increased nearly five-fold, to 18%, and the percentage voting by mail nearly doubled to 19%.<sup>228</sup>

The primary benefit of early voting is convenience. Voters are provided more options and days during which they can vote.<sup>229</sup> While there is little evidence that early and absentee voting increase turnout,<sup>230</sup> there is strong anecdotal evidence that it makes election administration easier, reducing the crush of voters at the polling place on a single day.<sup>231</sup> In the past, that Election Day crush has led to hours-long lines, and resulted in the *de facto* disenfranchisement of tens of thousands of voters.<sup>232</sup>

Through much of its growth, early voting has had strong support from both Democrats and Republicans.<sup>233</sup> In 2011, most, though not all, of the new restrictions on early voting have been proposed by Republicans and adopted by Republican-controlled legislatures.

As discussed below, the reasons most often provided for restricting early voting were cost and administrative burden, though they sometimes also included arguments that the restrictions would reduce fraud.<sup>234</sup> Opponents of the new restrictions frequently disputed the alleged savings,<sup>235</sup> and many argued that the changes were really a response to the success in 2008 of Barack Obama's campaign to get the candidate's supporters—and in particular black voters—to vote before Election Day.<sup>236</sup>

### B. Roundup of Legislative Developments

At least nine states—Florida, Georgia, Maryland, Nevada, New Mexico, North Carolina, Ohio, Tennessee, West Virginia—all considered bills to reduce their respective early voting periods this year.<sup>237</sup> At least four states—Georgia, New Jersey, Ohio, and Wisconsin—saw the introduction of bills to change or add new restrictions on absentee voting.<sup>238</sup>

Texas introduced a law that would omit early voting locations from official notices of a general or special election, but the measure did not pass.<sup>239</sup> In Wisconsin, a provision to eliminate no-excuse absentee voting was later removed from the state's voter ID bill.<sup>240</sup>

Ultimately, laws reducing early voting were passed and signed into law in five states: Florida, Georgia, Ohio, Tennessee, and West Virginia. Pending bills remain in North Carolina, Georgia, and New Jersey.

### C. What the Bills Say

**Ohio.** As already discussed, Governor Kasich of Ohio signed into law an omnibus election reform bill on July 1. Among other things, this new law also substantially reduced early in-person voting and access to vote by mail. Under the new law, the in-person voting period was cut by more than two thirds, from thirty-five days to eleven.<sup>241</sup> Early voting on Saturday afternoon and Sunday was eliminated entirely.<sup>242</sup>

Controversially, the new law also prohibited county boards from mailing absentee ballot applications to all voters, or prepaying postage on absent voter's ballot applications.<sup>243</sup> Both practices were employed by Franklin (Columbus) and Cuyahoga (Cleveland) counties in past elections, and were credited by some voting rights advocates and election officials with reducing congestion at the polls on Election Day, and eliminating equity issues associated with requiring voters to pay to mail in their ballots.<sup>244</sup> Proponents of this ban, including Secretary of State Jon Husted, supported it on the grounds that all counties should adopt the same practices with regards to absentee ballots, and some counties could not afford to mail absentee ballot applications to all voters or prep掏 postage on those applications.<sup>245</sup> The impact of this law may have been largely thwarted by the Cuyahoga County Council, which voted to have its public works department oversee mailings of absentee ballot applications to all voters (the ban only applied to elections boards). As a result, Secretary Husted—arguing that uniformity in county practices was of paramount concern—decided that the State will mail absentee ballot request forms to voters in *all* counties ahead of the 2012 presidential election.<sup>246</sup>

**Florida.** The same Florida law that led the League of Women Voters to discontinue its voter registration operations also reduces the early voting period from two weeks to one. Florida also eliminated the Sunday before Election Day as an early voting day.<sup>247</sup>

**Other states with new laws.** In **Georgia**, on May 13, Governor Nathan Deal signed H.B. 92 into law, which reduces the early voting period from forty-five to twenty-one days.<sup>248</sup> In **Tennessee**, in June, Governor Bill Haslam signed S.B. 923<sup>249</sup> which shortens the early voting period by two days. In **West Virginia**, on March 18, Governor Earl Ray Tomblin signed S.B. 581, which reduces early voting by five days, but allows early voting on Saturdays for the first time.<sup>250</sup>

**Pending bills.** In **Georgia**, H.B. 138 would limit when in-person absentee ballots may be cast by requiring that when an absentee ballot is requested in person during the early voting period, the absentee ballot must be cast within the registrar's office at that same time.<sup>251</sup> In **New Jersey**, S.B. 1596 would end no-excuse absentee voting.<sup>252</sup> In **North Carolina**, S.B. 657 would cut down the early voting period by one week and eliminate Sunday voting.<sup>253</sup> Another election law bill, S.B. 47, also originally contained a provision that would eliminate Sunday early voting. That provision, however, has since been removed from the bill.<sup>254</sup>

#### D. Legislative Battles

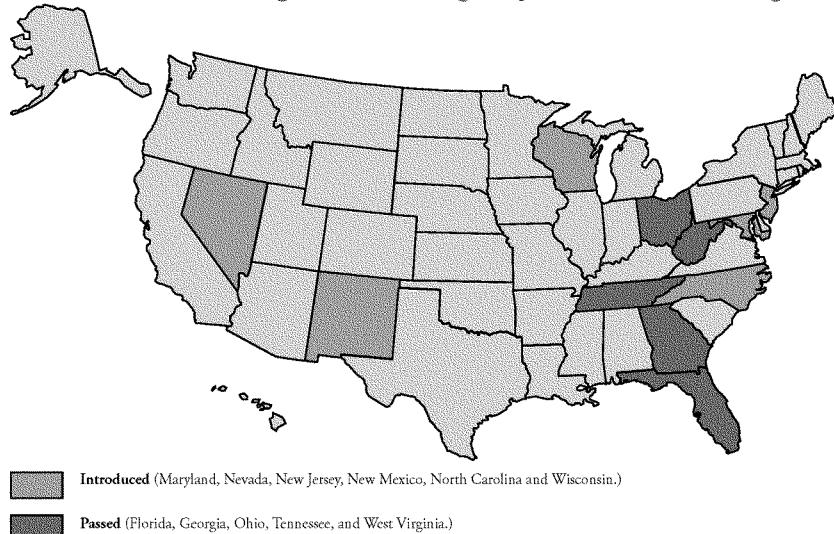

This year saw a substantial push in several states to reduce or, in some cases, eliminate these programs, and substantial resistance to those efforts. Of the five states that reduced early voting, four—Florida, Georgia, Ohio and Tennessee—saw sharp partisan divisions over those reductions. In all four cases, Republicans had uniform control over the legislative and executive branches, and passed the reductions over frequently vociferous objection by Democrats.<sup>255</sup> In the fifth state, West Virginia, the law reducing the early voting period also added early voting on Saturdays for the first time. It received bipartisan support.<sup>256</sup>

Until this year, the expansion of early voting seemed unstoppable. In 1972, just two states allowed no-fault absentee voting and five allowed early in-person voting. By 2010, thirty-two states and the District of Columbia allowed no-fault absentee voting, while thirty states and the District of Columbia allowed in-person early voting.<sup>257</sup>

##### *The Debate*

While some of the bills that reduced in-person early voting also put new restrictions on absentee voting by mail, it was the reduction of in-person early voting that received the most attention, and was the source

**Legislation Affecting Early and/or Absentee Voting**

of the most bitter disagreements between the political parties. Proponents of such reductions usually praised the convenience of early voting, while arguing that it needed to be limited to reduce costs and administrative burdens on election officials. In Georgia, Republican Representative Bill Hembree stated that “We need to maintain early voting, which is very popular, [but] we also need to keep in mind that cities and counties are having economic problems. This bill still allows people to vote early, but saves money.”<sup>258</sup> Supporters of a bill to reduce early voting in North Carolina made similar points. The *Herald Sun* editorialized “this is not a black and white issue, as some who want to inject race into everything are trying to say. This is a green and white issue … as in saving the taxpayers a few greenbacks.”<sup>259</sup>

Democrats and others who opposed these measures were less sure of the motives behind the bills and disputed the cost savings. In Georgia, Democratic State Senator Donzella James said, “We must provide every way possible for people to vote. It’s not costing that much. The staff is already there and the facilities are available.”<sup>260</sup> In North Carolina, George Gilbert, Director of Elections for Guilford County, argued that a reduction of early voting would not bring any savings. “If early voting begins later, a crush of voters will require more early voting sites to accommodate the crowds. There won’t be any cost savings.”

Some Democrats and editorial boards argued that the real motivation for reducing early voting was the success of the Obama campaign in using early voting in 2008. Morgan Jackson, a Democratic consultant stated, “This is pure partisanship … they see the numbers that Obama rolled up in early voting (and) they want to eliminate it.”<sup>261</sup> A *New York Times* editorial made a similar argument. “Early voting skyrocketed to a third of the vote in 2008, rising particularly in the South and among black voters supporting Barack Obama,” the *Times* wrote, adding “and that, of course, is why Republican lawmakers in the South are trying desperately to cut it back.”<sup>262</sup> The suspicion that partisanship, rather than cost savings, was the main motivation for new early voting restrictions was particularly strong for proposals that eliminated or significantly reduced early voting on Sundays, thought to be a day of high turnout for black voters.<sup>263</sup>

### Early Voting on Sunday and the Black Vote

Among the most controversial early voting reductions has been the partial or full eliminations of early voting on Sunday. Ohio has eliminated in-person early voting on Sundays entirely,<sup>264</sup> Florida has eliminated it on the last Sunday before Election Day,<sup>265</sup> and a North Carolina bill proposes to eliminate all in-person early voting on Sundays.<sup>266</sup> Critics have cried foul, arguing that these measures are “aimed squarely at reducing African-American turnout.”<sup>267</sup> In particular, these critics charge, it is common for Black voters to go to the polls in large groups on Sundays, after church,<sup>268</sup> and for some African-American churches to organize “Souls to the Polls” voting drives.<sup>269</sup> In Florida, a local Democratic club leader noted that “Churches had either hired buses, or used their buses to take people to the polls, or even suspending [sic] the service on the Sunday before.”<sup>270</sup> The Palm Beach Post stated that “[m]ore than half of the black voters in the [November 2008] election voted before Election Day and many of them went on [the] final Sunday.”<sup>271</sup> In Ohio, WilliAnn Moore, coordinator of the northwest Ohio district of the NAACP, labeled Ohio’s new legislation “voter-suppression legislation,” taking specific aim at the part of the law that eliminated Sunday early voting, noting that it had become a regular practice in the black community for voters to “pile into vans after church to cast their ballots.”<sup>272</sup>

Where available, the evidence supports the contention that black (and to a lesser extent Hispanic) voters used Sunday early voting in numbers proportionally greater than other groups. For instance, in the 2008 general election in Florida, 33.2% of those who voted early on the last Sunday before election day were black and 23.6% were Hispanic, whereas blacks constituted 22.7% of all early voters statewide (for all early voting days) and Hispanics constituted 11.6%.<sup>273</sup>

Among those who supported these laws, which reduced early voting in additional ways, there was little public explanation of why Sunday was specifically targeted, other than the general argument that the elimination was needed to reduce costs and administrative burden. In North Carolina, Senator Jim Davis, the sponsor of his state’s bill, opined that “We were just trying to minimize the time early voting polls were open ... so the expense is not so great for local election boards ... [e]verybody who wants to vote still can vote.” One of his colleagues, Senate Leader Phil Berger, got closer to the issue of eliminating Sunday voting stating, “It’s my understanding that there are some folks who feel that Sundays should not be mixed politics and religion, that it’s probably better to have a day that folks take a day off from politics. That’s one of the comments that I’ve heard.”<sup>274</sup>

## V. MAKING IT HARDER TO RESTORE VOTING RIGHTS

### A. Background

Disenfranchisement after criminal conviction remains the single most significant barrier to voting rights in the United States. Nationally, 5.3 million American citizens are not allowed to vote because of a criminal conviction; of those, 4 million have completed their sentences and live, work, and raise families in their communities.<sup>275</sup> This disenfranchisement disproportionately impacts African-American men. Nationwide, 13% of African-American men have lost the right to vote, a rate that is seven times the national average.<sup>276</sup> Given current rates of incarceration, three in ten of the next generation of African-American men across the country can expect to lose the right to vote at some point in their lifetime.<sup>277</sup>

These voting bans are exceptional among democratic nations. The United States is one of only two countries that disenfranchise large numbers of persons for lengthy or indefinite periods after they have completed their time in prison.<sup>278</sup>

While the history of felon disenfranchisement laws in the United States dates to the nation's earliest days,<sup>279</sup> its greatest growth came in the decades after the Civil War. By 1900, thirty-eight states had some type of criminal voting restriction, most of which disenfranchised convicted individuals until they received a pardon.<sup>280</sup>

The last decade and a half saw a striking reversal of these restrictions. Since 1997, twenty-three states either restored voting rights or eased the restoration process; nine of these states repealed or amended lifetime disenfranchisement laws.<sup>281</sup> These changes occurred under both Republican and Democratic governors.<sup>282</sup>

Iowa and Florida saw the most recent dramatic restoration of voting rights. In Iowa, in 2005, Democratic Governor Tom Vilsack issued an executive Order ending the state's permanent disenfranchisement policy (at the time, Iowa was one of only three states with such a broad restriction on voting) and restoring voting rights to 80,000 Iowans.<sup>283</sup>

Like Iowa, Florida also had a notoriously severe law modified by executive action. Prior to 2007, nearly one million Floridians were permanently disenfranchised in the state; almost a quarter of them were African-American. In 2007, Republican Governor Charlie Crist amended the State's clemency rules in an attempt to streamline the restoration process for some individuals with non-violent convictions. Since restoration rules were streamlined, the voting rights of at least 150,000 Floridians were restored.<sup>284</sup>

### B. Roundup of Legislation and Executive Actions

Last year marked the end of fifteen years of progress restoring the right to vote to formerly incarcerated persons. Specifically, the dramatic changes in Iowa and Florida were reversed. By executive action, the Governors Terry Branstad of Iowa and Rick Scott of Florida, both Republicans, returned their state

policies to *de facto* permanent disenfranchisement for all citizens convicted of felonies. In Florida, this has meant that 87,000 persons who were in the “backlog” of cases waiting for restoration under Governor Crist’s new rules will not get their voting rights restored.

Also in 2011, Nevada Governor Brian Sandoval, also a Republican, vetoed a bill that would have automatically restored voting rights to anyone who honorably completed a felony sentence of imprisonment, probation, or parole. The bill had received bipartisan support in the Legislature.

Five states saw bills further restricting the ability of people with criminal convictions to participate in the political process: Alabama, Maryland, South Carolina, Washington, and West Virginia. None of these bills have passed.<sup>285</sup>

### C. Content of Executive Actions

**Florida.** Governor Scott changed Florida’s clemency rules, and the change denies the right to vote to hundreds of thousands, maybe as many as a million, Florida citizens. These changes make Florida the most punitive state in the country when it comes to disenfranchising people with criminal convictions in their past.

The Florida Constitution denies the right to vote for life to anyone with a felony conviction, unless he is granted clemency by the governor. It essentially gives the governor, an elected official, the power to decide who will (or will not) be allowed to vote in the next election.

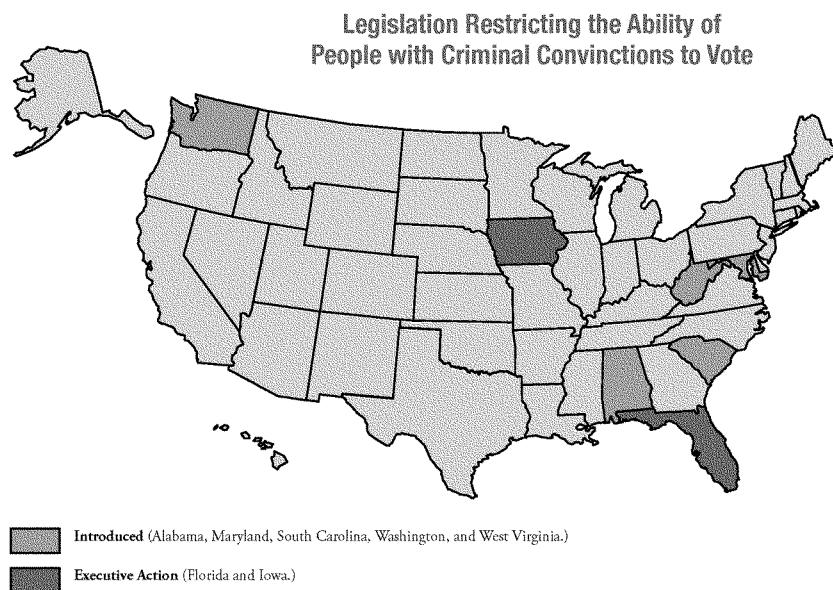

The new clemency rules<sup>286</sup> not only roll back reforms<sup>287</sup> passed by former Governor Charlie Crist, but they are far more restrictive than those in place under former Governor Jeb Bush. Under the new rules, people with even nonviolent convictions must wait five years after they complete all terms of their sentence before even being allowed to apply for restoration of civil rights. The clock resets if an individual is arrested for even a misdemeanor during that five-year period, even if no charges are ever filed. Some people must wait seven years before being able to apply, and must appear for a hearing before the clemency board. A provision allowing people to apply for a waiver of the rules, in place under Governors Bush and Crist, is eliminated. Everyone applying for clemency must provide various documents with their application—Bush and Crist had made an exception for those applying for restoration of civil rights. Florida’s law is now the most restrictive in the country.<sup>288</sup>

**Iowa.** Governor Branstad, almost immediately after taking office, revoked Executive Order 42, a policy signed in 2005 by former Governor Tom Vilsack, which automatically restored voting rights to individuals with criminal convictions once they had completed their sentences.<sup>289</sup> Under the new policy, Iowa has become one of just four states that permanently disenfranchise all citizens after a criminal conviction. Prior to Executive Order 42, Iowa disenfranchised adults at a rate twice the national average, and had the nation’s highest rate of African-American disenfranchisement.<sup>290</sup>

**Nevada.** Governor Sandoval vetoed Assembly Bill 301, a bill passed with bipartisan support in the State Legislature. The bill would have streamlined and simplified Nevada’s complicated laws governing the restoration of voting rights after a criminal sentence, and would have automatically restored voting rights to anyone who honorably completed a felony sentence of imprisonment, probation, or parole.

#### D. The Debate

Governor Scott's and Governor Branstad's actions to reverse recent voting rights gains for persons with felony convictions were the subject of considerable publicity and debate in their states. The debate in Florida and Iowa mirrored the debate nationally about restoring the voting rights of formerly incarcerated persons. Those favoring further restrictions argued that persons convicted of felonies needed to "earn" the right to vote again,<sup>291</sup> while those opposed to harsher restrictions argued that preventing these citizens from voting was counter-productive and anti-democratic,<sup>292</sup> further penalizing those who had already completed their prison sentence,<sup>293</sup> and undermining the state's interest in re-integrating such citizens into society and reducing recidivism.<sup>294</sup>

## ENDNOTES

<sup>1</sup> This estimate is derived as follows: (1) New photo ID laws for voting will be in effect for the 2012 election in five states (Kansas, South Carolina, Tennessee, Texas, Wisconsin), which have a combined citizen voting age population of just under 29 million. 3.2 million (10.3%) of those potential voters do not have state-issued photo ID. Although Rhode Island's law will be in effect in 2012, the requirements are less onerous than those in the other states and so it was excluded. (2) New proof of citizenship laws will be in effect in three states (Alabama, Kansas, Tennessee), two of which will also have new photo ID laws. Assuming conservatively that those without proof of citizenship overlap substantially with those without state-issued photo ID, we excluded those two states. The citizen voting age population in the remaining state (Alabama) is 3.43 million. Of those potential voters, 240,000 (7%) do not have documentary proof of citizenship. (3) Two states (Florida and Texas) passed laws restricting voter registration drives, causing all or most of those drives to stop. In 2008, 2.13 million voters registered in Florida and, very conservatively, at least 8.24% or 176,000 of them did so through drives. At least 501,000 voters registered in Texas, and at least 5.13% or 26,000 of them did so via drives. (4) Maine abolished Election Day registration. In 2008, 60,000 Maine citizens registered and voted on Election Day. (5) The early voting period was cut by half or more in three states (Florida, Georgia and Ohio). In 2008, nearly 8 million Americans voted early in these states. An estimated 1 to 2 million voted on days eliminated by these new laws. (6) Two states (Florida and Iowa) made it substantially more difficult or impossible for people with past felony convictions to get their voting rights restored. Up to one million people in Florida could have benefited from the prior practice; based on the rates of restoration in Florida under the prior policy, 100,000 citizens likely would have gotten their rights restored by 2012. Other voting restrictions passed this year that are not included in this estimate.

<sup>2</sup> The 12 states identified as "swing states" are Arizona, Colorado, Florida, Georgia, Iowa, Nevada, North Carolina, New Mexico, Ohio, Oregon, Pennsylvania and Virginia. David Lauter, *Obama's Gallup Numbers Show 12 States in Play in 2012*, L.A. TIMES, Aug. 15, 2011, <http://articles.latimes.com/2011/aug/15/news/la-pn-inside-gallup-20110815>. The five of those states that cut back on voting rights are Florida, Georgia, Iowa, Nevada, and Ohio. The four of those states with pending legislation are Georgia, Iowa, North Carolina, and Pennsylvania.

J., May 23, 2011, <http://online.wsj.com/article/SB1000142405274870481660457633650886790480.html>; *New State Voting Laws*, THE DIANE REHM SHOW (NPR radio broadcast, June 21, 2011), available at <http://thedianerhmshow.org/shows/2011-06-21/new-state-voting-laws/transcript>.

<sup>4</sup> Opponents of strict voter ID laws argue that the impersonation of registered voters at the polls—the only type of voter fraud that voter ID bills have the potential to address—rarely occurs. They note that while there is no credible evidence that impersonation fraud occurs, reliable evidence proves that photo ID and proof of citizenship bills erect hurdles that prevent real citizens from voting. The citizens affected are predominantly elderly and indigent voters, and citizens from minority communities. <sup>6</sup> JUSTIN LEVITT, THE TRUTH ABOUT VOTER FRAUD, BRENNAN CENTER FOR JUSTICE (2007), available at <http://www.brennancenter.org/content/resource/truthaboutvoterfraud/>.

<sup>7</sup> The most rigorous study on voter ID and turnout to date, recently published in the leading political science methodology journal, found that stricter voter ID requirements depress turnout, particularly among less educated and lower income populations. See R. MICHAEL ALVAREZ ET AL., AN EMPIRICAL BAYES APPROACH TO ESTIMATING ORDINAL TREATMENT EFFECTS 26-30 (2010), available at [http://brennan.3cdn.net/a5782740c4185414a8\\_snm6bfwg.pdf](http://brennan.3cdn.net/a5782740c4185414a8_snm6bfwg.pdf). Some studies suggest that voter ID laws have only a small or no effect on turnout. See Jason Mycock et al., *The Empirical Effects of Voter-ID Laws: Present or Absent?*, 42 PS: POL. SCI. AND POL. 121 (2009), available at [http://journals.cambridge.org/action/displayFulltex?type=1&fid=3260872&jid=PSC&volumeId=42&issueId=01&aid=3260864&bodyId=&membersonumber=&societyETOCSession#](http://journals.cambridge.org/action/displayFulltex?type=1&fid=3260872&jid=PSC&volumeId=42&issueId=01&aid=3260864&bodyId=&membersonumber=&societyETOCSession=). But unlike the Alvarez study, these studies use aggregate data, which cannot provide any meaningful insight into how specific inputs—like voter ID—affect the behavior of individuals within a large group. For a comprehensive list of studies on voter ID, see *Research and Publications on Voter ID*, BRENNAN CENTER FOR JUSTICE, [http://www.brennancenter.org/content/resource/research\\_on\\_voter\\_id/](http://www.brennancenter.org/content/resource/research_on_voter_id/) (last visited July 15, 2011).

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

<sup>8</sup> See 42 U.S.C. § 15483(b) (2010).

<sup>9</sup> See generally VOTER IDENTIFICATION REQUIREMENTS, NAT'L CONFERENCE OF STATE LEGISLATURES (NCSL), <http://www.ncsl.org/default.aspx?tabid=16602> (last updated July 13, 2011).

<sup>10</sup> Common Cause/Ga. v. Billups, 406 F. Supp. 2d 1326, 1369-70 (N.D. Ga. 2005); Weinschenk v. Missouri, 203 S.W.3d 201 (Mo. 2006).

<sup>11</sup> The Court upheld Indiana's law on the ground that the "evidence in the record [was] not sufficient" to justify striking down the whole statute. Crawford v. Marion Cnty. Election Bd., 553 U.S. 181, 200-203 (2008). The Court expressly left open the possibility of future constitutional challenges to Indiana's law and other voter ID laws.

<sup>12</sup> Common Cause/Ga. v. Billups, 544 F.3d 1340 (11th Cir. 2009); Democratic Party of Ga. v. Perdue, 707 S.E.2d 67 (Ga. 2011) (upholding Georgia's voter ID law against a challenge under the state constitution) Georgia's initial voter ID law was previously blocked by a federal court in October 2005. Common Cause/Ga. v. Billups, 406 F. Supp. 2d 1326 (N.D. Ga. 2005). The court blocked an amended version of that law in July 2006 and again in September 2006. See Common Cause/Ga. v. Billups, 544 F.3d 1340, 1347-48 (11th Cir. 2009) (discussing injunctions in 2006). A state trial court had also blocked enforcement of the 2006 version of Georgia's voter ID law; this decision was later overturned by the Georgia Supreme Court due to the plaintiff's lack of standing. Perdue v. Lake, 647 S.E.2d 6 (Ga. 2007).

<sup>13</sup> See BRENNAN CENTER FOR JUSTICE, ID REQUIREMENTS DISCOURAGE VOTERS (Jan. 1, 2011) (map of state voter ID laws prior to the 2011 legislative session), available at <http://www.brennancenter.org/page/-/Democracy/Voter%20ID%202010%20States.pdf>; Voter Identification Requirements, NCSL, <http://www.ncsl.org/default.aspx?tabid=16602> (last updated July 13, 2011) (information on previous and existing voter ID statutes).

<sup>83</sup> Kobach, *supra* note 3. Kobach's claim of voter fraud is misleading. A review of the 221 allegations of reported "voter fraud" over 13 years revealed only seven convictions—two for electioneering too close to the polls and five for double-voting between states or counties. None would have been prevented by the introduction of photo ID requirements. See Keesha Gaskins, *Debunking Misinformation on Photo ID*, BRENNAN CENTER FOR JUSTICE (June 9, 2011), [http://www.brennancenter.org/blog/archives/debunking\\_misinformation\\_on\\_photo\\_id/](http://www.brennancenter.org/blog/archives/debunking_misinformation_on_photo_id/).

<sup>84</sup> For instance, Pennsylvania Republican Party Chairman Rob Gleason said: "Unfortunately, voter fraud is a real problem in Pennsylvania and it is incumbent upon our Legislature to protect the sanctity of our electoral process." Linda Finarelli, *House Passes Bill Requiring Photo ID to Vote*, MONTGOMERY MEDIA, July 9, 2011, [http://www.montgomerynews.com/articles/2011/07/09/north\\_penn\\_life/news/doc4e15dfb4ab1b2865778317.txt?viewmode=default](http://www.montgomerynews.com/articles/2011/07/09/north_penn_life/news/doc4e15dfb4ab1b2865778317.txt?viewmode=default). South Carolina House Speaker Bobby Harrell said, "If we do not protect that voting right from fraud and abuse, we are not protecting the ideals of democracy." Press Release, S.C. Statehouse Blog, House Again Passes Voter ID (Jan. 26, 2011), available at <http://sc.statehouseblogs.com/2011/01/26/house-again-passes-voter-id-press-release/>.

<sup>85</sup> For example, Minnesota House Speaker Kurt Zellers said in a radio interview, "I think [voting is] a privilege, it's not a right. Everybody doesn't get it because if you go to jail or if you commit some heinous crime your rights are taken away. This is a privilege." See Eric Roper, *Zellers: Voting Is "Privilege, Not Right"*, MINNEAPOLIS STAR TRIB.: HOT DISH POLITICS (Apr. 21, 2011, 5:50 PM), <http://www.startribune.com/politics/blogs/120393764.html>.

<sup>86</sup> Press Release, John Lynch, Governor, State of N.H., Governor Lynch's Veto Message Regarding SB 129 (June 27, 2011), available at <http://www.governor.nh.gov/media/news/2011/062711-sb129.htm>.

VOTING LAWS ROUNDUP 2013 | Brennan Center for Justice  
APPENDIX A

**BRENNAN CENTER FOR JUSTICE** Issues Our Work Experts Get Involved About Library Press

[Home](#) / [Our Work](#) / [Research & Reports](#) / [Voting Laws Roundup 2013](#)

**Also see our roundup of voting law changes in 2012 and 2014.**

Election 2012 was marred by problems for voters nationwide. The northeast was beset by Superstorm Sandy, displacing hundreds of thousands of registered voters on Election Day. Across the country, millions of Americans stood in long lines at crowded polling stations to exercise their right to vote.

One year later, an encouraging number of states have taken steps to provide voters more access to the ballot box. At least 237 bills were introduced in 46 states to increase access. Unfortunately, others have restricted access — 33 states introduced 92 restrictive bills — and the Supreme Court has made it easier for some of them to do so by striking down a key provision of the Voting Rights Act. While 10 states passed 13 bills in 2013 to expand voting opportunities, eight states passed nine restrictive laws.

We will continue to monitor voting changes in the lead up to the 2014 legislative session. Already, four states have pre-filed election bills we will be watching with interest next year — including three measures to restrict voting, and six to expand it.

**Numbers Overview**

VOTING LAWS CENTER FOR JUSTICE

## APPENDIX A

Since the beginning of 2013, and as of December 18, 2013, **restrictive voting bills** have been introduced in more than half the states:

At least **92 restrictive bills** were introduced in **33 states**.

Of those, **13 restrictive bills** are still pending in **5 states**.

Of those, **5 restrictive bills** are currently active in **2 states**, [1] in that there has been legislative activity beyond introduction and referral to committee (such as hearings, committee activity, or votes).

**8 states** have already passed **9 restrictive bills** this session.

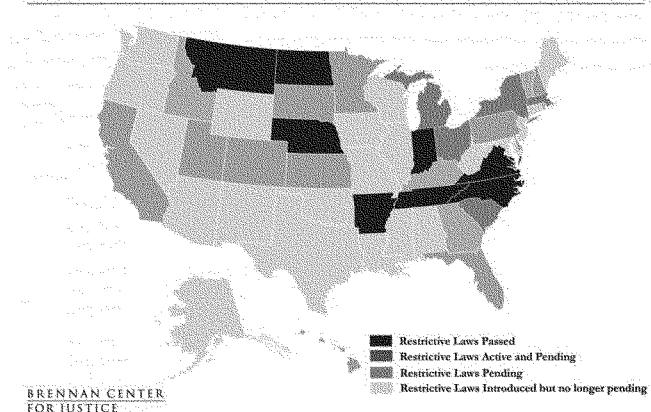

At the same time, across the country, politicians from both sides of the aisle have introduced and supported bills that **expand access** to registration and voting.

At least **237 expansive bills** that would expand access to voting were introduced in **46 states**.

Of those, **73 expansive bills** are still pending in **7 states**.

Of those, **17 expansive bills** are currently active in **4 states**, [2] in that there has been legislative activity beyond introduction and referral to committee (such as hearings, committee activity, or votes).

**10 states** have passed **13 bills that expand opportunities** for eligible citizens to register and to vote.

**Voting Restrictions****Restrictive voting legislation in 2013**

*Note: In the cases where more than one piece of restrictive legislation has been introduced in a state, the map reflects the state's passed, active, or pending status based on its most active piece of legislation.*

**Restrictions Passed in 2013**

VOTING LAWS ROUNDUP 2013 Brennan Center for Justice

**Arkansas:**

## APPENDIX A

Photo ID required to vote (legislature overrode gubernatorial veto).

**Indiana**

Authorizes challengers to demand proof of identification.

**Montana**

Referendum to repeal Election Day Registration, placed on the ballot for 2014.

**Nebraska**

Reduces the early voting period.

**North Carolina**

Photo ID required to vote, eliminates same-day registration, eliminates pre-registration for 16- and 17-year-old citizens, reduces the early voting period.

**North Dakota**

Photo ID required to vote.

**Tennessee**

More restrictive Photo ID requirement.

**Virginia:**

Photo ID required to vote.

Restrictions on third party registration.

**Summary of Introduced and Pending Restrictive Voting Legislation** (see a detailed summary of passed and pending laws)

**Identification laws**

- o **Photo ID laws.** At least 25 states introduced legislation either requiring voters to show photo ID at the polls or making existing photo ID laws more restrictive.[3]
- o **Proof of citizenship laws.** At least eight states introduced legislation requiring proof of citizenship, such as a birth certificate, to register or vote.[4]

VOTING LAWS ROUNDRUP 2013, Brennan Center for Justice

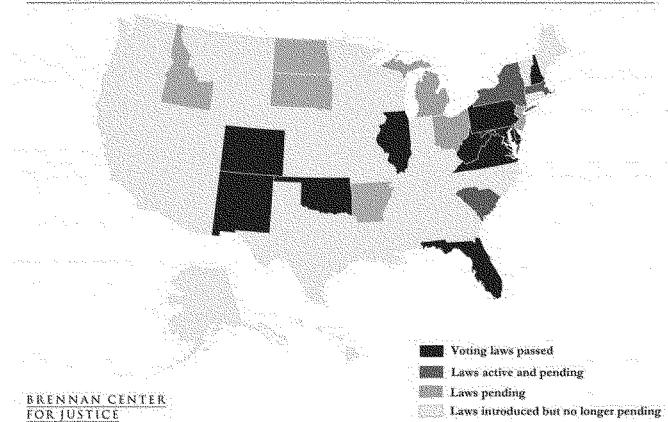

**APPENDIX A**

**Making voter registration harder.** At least eight states introduced bills to end Election Day or same-day voter registration, limit voter registration mobilization efforts, and reduce other registration opportunities.<sup>[5]</sup>

**Reducing early voting opportunities.** At least eight states introduced bills that limit existing opportunities to vote early in person.<sup>[6]</sup>

**Making it harder to restore voting rights.** At least two states introduced legislation that would further restrict the right to vote to persons with criminal convictions.<sup>[7]</sup>

**Making it harder for students to vote.** At least two states proposed legislation that would make it harder for students to register and vote.<sup>[8]</sup>

**Enhancing Voter Access****Laws to expand access to voting in 2013**

Note: In the cases where more than one piece of expansive legislation has been introduced in a state, the map reflects the state's passed, active, or pending status based on its most active piece of legislation.

A new influx of bills to enhance voter access drew support on both sides of the aisle.

**Expansive Voting Laws Passed in 2013****Colorado**

5/25/2021

VOTING LAW ROUNDUP 2013 Brennan Center for Justice

## APPENDIX A

**Modernizing Voter Registration.** At least 26 states<sup>[1]</sup> introduced bills that would modernize the voter registration system, in whole or in part, and make it easier for eligible citizens to register.

- **Broad-based modernization.** At least four states<sup>[12]</sup> introduced wide-ranging legislation to modernize the voter registration process using a combination of technology and fail-safe protections. Both houses of Congress introduced comprehensive bills to modernize voter registration.
- **Automation.** At least six states<sup>[13]</sup> introduced legislation that would introduce or expand automation of the voter registration process at government agencies.
- **Online registration.** At least 13 states<sup>[14]</sup> introduced bills that would establish or enhance the use of online registration systems.
- **Same day registration.** At least 19 states<sup>[15]</sup> introduced bills that would allow voters to register on the same day they vote. Same day registration (SDR) bills can vary in that some allow same day registration on Election Day only (EDR), some allow it during an early voting period only, and some may allow both options.
- **Portability.** At least four states<sup>[16]</sup> introduced bills that would allow a voter's registration to move with her when she moves to a new address in the state.

**More early voting opportunities.** At least 20 states<sup>[17]</sup> introduced bills that would newly introduce, or expand, opportunities for early in person voting. While New Jersey passed a bill to introduce early voting in the state, Governor Christie vetoed it on May 9, 2013.

**Restoring voting rights.** At least 14 states<sup>[18]</sup> introduced bills that would expand opportunities for those with criminal convictions to regain their right to vote. In Virginia, Governor Robert McDonnell issued an executive order automatically restoring the right to vote upon completion of sentence for those with past non-violent criminal convictions.

**Pre-registering students to vote.** At least 13 states<sup>[19]</sup> introduced bills that would allow students under the age of 18 to pre-register, so that upon turning 18 they are registered to vote.

**Reducing long lines.** At least four states<sup>[20]</sup> introduced bills that aim to reduce waiting times by requiring, or assessing, the implementation of minimum standards for efficient polling place administration.

#### Looking to 2014

States are already beginning to file bills in preparation for the 2014 legislative session. At least four states have introduced voting laws we will be watching. In Missouri, three bills have been pre-filed that would require voters to show photo ID at the polls. In Kentucky, three bills have been pre-filed that would restore voting rights to persons with past criminal convictions. A bill that would restore voting rights was also pre-filed in Virginia. In Florida, two bills have been introduced that would make it easier for eligible citizens to register to vote. Check back here for regular updates on what we can expect in the next session.

EXPERT BRIEF

## Voting Laws Roundup 2014

Voting rights continues to be a highly contentious issue in America. This is the Brennan Center's regularly-updated, comprehensive roundup of introduced, pending, active, and passed voting bills.

PUBLISHED: December 18, 2014

Voting rights continues to be a highly contentious issue in America. Starting after the 2010 midterm elections, legislators in dozens of states introduced scores of laws to make it harder to vote. Voters and advocates pushed back at the ballot box and the courts. Some lawmakers started pushing laws that improve access to the ballot box.

Below you will find a regularly-updated, comprehensive roundup of introduced, pending, active, and passed voting bills.<sup>[1]</sup>

**See our roundup of voting law changes since the 2010 election. Also see our roundup of voting law changes in 2012 and 2013.**

### Numbers Overview

Since the beginning of 2014, and as of November 11, 2014, legislators from both sides of the aisle have introduced and supported bills that expand access to registration and voting:

At least **340 expansive bills** that would increase access to voting were introduced in **42 states plus the District of Columbia** whose legislatures have had floor activity in 2014.

5/25/2014

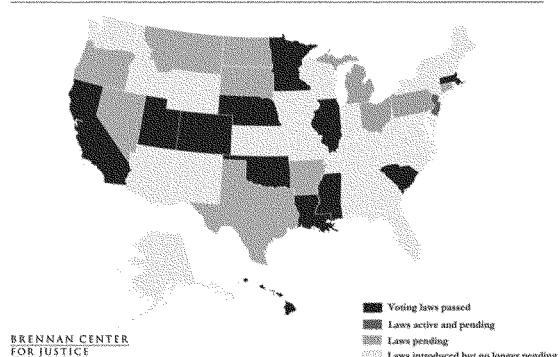

VOTING LAW ROUNDUP 2014: Brennan Center for Justice

12 states plus the District of Columbia have passed 19 expansive bills this session.<sup>[2]</sup>**APPENDIX A**

Vigilance is still required, as numerous **restrictive voting bills** have been introduced in a number of states:

At least **83 restrictive bills** were introduced in **29 states** whose legislatures have had floor activity in 2014.

**Two states** have passed **4 restrictive bills** this session.

**Enhancing Voter Access****Laws to expand access to voting in 2014**

*Note: In the cases where more than one piece of expansive legislation has been introduced in a state, the map reflects the state's passed, active, or pending status based on the piece of legislation that has advanced farthest in the legislative process.*

A new influx of bills to enhance voter access is drawing support on both sides of the aisle, many bearing much similarity to the recommendations offered by the president's bipartisan commission. Efforts to modernize our voter registration system are particularly prevalent.

**Expansive Voting Laws Passed in 2014****California**

- A.B. 1589: Streamlines ballot requests for military voters.
- S.B. 1063: Provides voter registration assistance to eligible applicants in juvenile detention facilities.
- S.B. 113: Expands pre-registration to vote to 16-year-old citizens.

**Colorado**

**South Carolina**

## APPENDIX A

**S.B. 825:** Expands absentee voting options for military voters and their families.**Utah****H.B. 156:** Establishes pilot program for Election Day registration.**S.B. 117:** Allows registered voters without a DMV signature to update their registration information online.**S.B. 135:** Gives voters more time to register through certain methods.**Washington, D.C.****B. 20-0264:** Establishes online registration.**Summary of Introduced and Pending Legislation to Expand Access to Voting**

**Modernizing voter registration.** At least **29 states plus the District of Columbia** have introduced bills that would modernize their voter registration systems, in whole or in part, and make it easier for eligible citizens to register.<sup>[3]</sup> Bills to modernize voter registration have passed in 6 states plus the District of Columbia: Hawaii, Illinois, Massachusetts, Minnesota, Nebraska, and Utah.

- **Broad-based modernization.** At least **3 states** have introduced wide-ranging legislation to modernize the voter registration process using some combination of electronic transfer of voter registration information, online registration, portability, and fail-safe protections.<sup>[4]</sup>
- **Electronic registration.** At least **6 states** have introduced bills that would allow for electronic transfer of voter registration information at state agencies.<sup>[5]</sup>
- **Online registration.** At least **18 states plus the District of Columbia** have introduced bills that would establish or enhance the use of online registration systems.<sup>[6]</sup>
- **Same-day registration.** At least **19 states** have introduced bills that would allow voters to register on the same day they vote.<sup>[7]</sup> Same-day registration (SDR) bills can vary in that some allow same-day registration on Election Day only (EDR), some allow it during an early voting period only, and some may allow both options.
- **Portability.** At least **6 states** have introduced bills that would allow a voter's registration to move with her when she moves to a new address within the same county or state.<sup>[8]</sup>

**More registration opportunities.** At least **9 states** have introduced bills that would expand opportunities to register to vote.<sup>[9]</sup>

**Pre-registering students to vote.** At least **13 states** have introduced bills that would allow students under the age of 18 to pre-register, so that upon turning 18 they are registered to vote.<sup>[10]</sup>

**More early voting opportunities.** At least **23 states** have introduced bills that would newly introduce, or expand, opportunities for early in-person voting.<sup>[11]</sup>

APPENDIX A

**Restoring voting rights.** At least **12 states** have introduced bills that would expand opportunities for those with criminal convictions to regain their right to vote.[12]

**Identification laws.** At least **11 states** have introduced bills that would relax existing voter ID or proof of citizenship laws.[13]

**Making it easier for students to vote.** At least **2 states** have introduced bills that would make it easier for students to register and vote.[14]

**Reducing long lines.** At least **3 states** have introduced bills to reduce waiting times by requiring, or assessing, the implementation of minimum standards for efficient polling place administration.[15]

**Improving disability access.** At least **5 states** have introduced bills that would make it easier for voters with disabilities to cast a ballot.[16]

**Improving language access.** At least **2 states** have introduced bills that would expand language access for voters who speak a language other than English.[17]

**Improving access for military voters.** At least **7 states** have introduced bills aimed at expanding opportunities to vote for voters in the military.[18]

**Expanding access to absentee ballots.** At least **15 states** have introduced bills aimed at expanding opportunities to cast an absentee ballot.[19]

**Guaranteeing the right to vote.** At least **4 states** have introduced bills that would amend their constitutions to guarantee the right to vote.[20]

**State preclearance.** At least **3 states** have introduced bills that would require a preclearance procedure modeled after Section 5 of the Voting Rights Act.[21]

**Improving list maintenance.** At least **1 state** has introduced a bill to improve voter list maintenance to protect eligible individuals against wrongful removal.[22]

**Preventing deceptive practices.** At least **3 states** have introduced bills that would make it a crime to knowingly distribute false information about an election to mislead voters.[23]

#### Voting Restrictions

APPENDIX A  
Laws to restrict access to voting in 2014

*Note: In the cases where more than one piece of restrictive legislation has been introduced in a state, the map reflects the state's passed, active, or pending status based on the piece of legislation that has advanced farthest in the legislative process.*

**Restrictive Voting Laws Passed in 2014**

**Ohio**

**S.B. 205:** Conditions any determination by the Secretary of State to mail unsolicited absentee ballot applications on legislative funding for that particular mailing.

**S.B. 216:** Prohibits individuals who lack identification or a Social Security number from voting even with a provisional ballot.

**S.B. 238:** Reduces early voting period and eliminates same day registration by eliminating the week during which voters could simultaneously register to vote and cast a ballot early and in person.

**Wisconsin**

**S.B. 324:** Reduces early voting period and hours.

**Summary of Introduced and Pending Restrictive Voting Legislation**

**Identification laws**

- o **Photo ID laws.** At least **19 states** have introduced bills either requiring voters to show photo ID at the polls or making existing photo ID laws more restrictive.[24]

A119

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2014>

6/9

5/25/2021

VOTING LAWS ROUNDUP 2014 | Brennan Center for Justice

## APPENDIX A

- o **Proof of citizenship laws.** At least **4 states** have introduced bills requiring proof of citizenship, such as a birth certificate, to register or vote.<sup>[25]</sup>

**Making voter registration harder.** At least **13 states** have introduced bills to limit voter registration mobilization efforts and reduce other registration opportunities.<sup>[26]</sup>

**Reducing early voting opportunities.** At least **4 states** have introduced bills to limit existing opportunities to vote early in person.<sup>[27]</sup>

**Making it harder for students to vote.** At least **2 states** have introduced bills that would make it harder for students to register and vote.<sup>[28]</sup>

**Reducing access to absentee ballots.** At least **6 states** have introduced bills that would reduce access to absentee ballots.<sup>[29]</sup>

**Making voter purges worse.** At least **2 states** have introduced bills to limit protections for voter purges and increase the chance of wrongful removal of eligible voters.<sup>[30]</sup>

<sup>[1]</sup> This document tracks certain voting legislation making it easier or harder to register or vote. Note that the numbers in this document do not tally several types of election- and voting-related legislation, including: ballot design, voting machines, enfranchisement of people under 18 or non-citizens, public or individual notice requirements, or expanding authority to conduct elections primarily by mail ballot. The document also does not track other administrative changes that could indirectly expand or restrict access, such as counting provisional ballots, or minor departures from the status quo that are unlikely to have a substantial impact. The numbers in this document also do not reflect changes to rules for challenging voter eligibility. Additionally, bills that carry over to the 2014 session from a prior session are included in the counts of "introduced" bills.

<sup>[2]</sup> For purposes of this document, a bill has passed if it has advanced through all required stages in the legislative and executive branches, including signature by a governor if necessary. Thus, in most cases a bill that has advanced through both houses of the legislature is not counted as passed unless a governor has signed it. Certain types of legislation, such as resolutions, can advance fully through the legislative process without signature by a governor; these are counted as passed if they have cleared the legislative branch. Legislation that places a ballot measure before voters is counted as passed, even if voters have not yet approved the measure, as long as the legislation has advanced through all necessary stages of the legislative and executive process. If a ballot measure has been rejected by voters, it is no longer counted as passed. Accordingly, the controversial Missouri measure which would have allowed for six days of early voting, but would have set a constitutional limit on the legislature's ability to provide additional early voting days is not counted as passed at this time because it was rejected by voters on November 4, 2014.

<sup>[3]</sup> Alabama, Alaska, Arizona, California, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Tennessee, Utah, Vermont, Washington, Washington D.C., Wisconsin.

**EXPERT BRIEF**

## Voting Laws Roundup 2015

As the early stages of the 2016 presidential race begin, state legislatures are already considering hundreds of laws that could determine voters' access to the ballot.

PUBLISHED: June 3, 2015

 Ensure Every American Can Vote  
Voting Reform

As the early stages of the 2016 presidential race begin, state legislatures are already considering hundreds of laws that could determine voters' access to the ballot. Since the beginning of the 2015 legislative session, and as of May 13, 2015, at least **113 bills** that would **restrict access** to registration and voting have been introduced or carried over in **33 states**. Over the same time period, at least **464 bills** that would **enhance access** to voting were introduced or carried over in **48 states** plus the District of Columbia.

For the third year in a row, bills to expand voters' access to the ballot box outpace those to restrict voting, both in terms of introduction and enactment. This strong show of support for making the ballot accessible has not necessarily put voters ahead of where they have been in recent years, because some recent restrictive legislation continues to make it harder for citizens to participate.

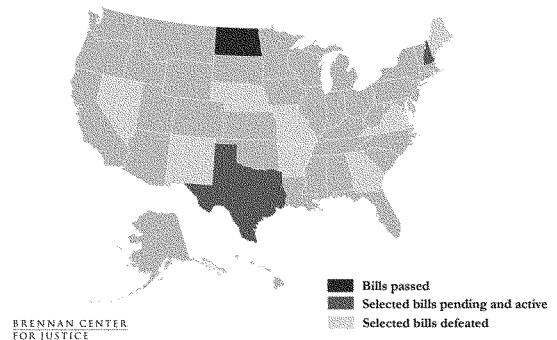

#### [Voting Restrictions](#)

Of the **113 bills** restricting access in this legislative session (including bills carried over from last session), **6** of them are active in **5 states**, in that there has been legislative activity beyond introduction and referral to a committee in 2015 (such as hearings, committee activity, or votes).

5/25/2021

VOTING LAWS CENTER 2015 | Brennan Center for Justice  
APPENDIX A

## Selected bills to restrict access to voting in 2015

*Note: If a state falls into more than one category, the map reflects the legislation that has advanced furthest in the legislative process.*

**Voter ID remains at the forefront of the voting wars, but enactment has slowed.** Nearly half of the voting bills introduced so far this session that restrict access are aimed at establishing voter ID requirements or tightening pre-existing ones. Voter ID remains largely a partisan issue. Of the 52 restrictive ID bills introduced so far, most have Republican-only sponsorship. Only one state, North Dakota, passed a voter ID bill this legislative session — all others failed. Nevada, a Republican-led state without an existing strict photo ID law, had a rancorous fight. Arkansas and Missouri, where state courts struck down ID laws, had renewed efforts this session to put ID requirements before the voters as ballot questions. Voter ID bills also failed in Maine, Nebraska, and New Mexico.

**Only one restrictive bill has been enacted thus far.** This session, North Dakota passed a bill making its already-restrictive voter ID law even more onerous for voters. Thus far, this is the only restrictive law passed and signed, and it is noteworthy that it exacerbates existing restrictions rather than imposing a new one. This stands in contrast to recent prior years, which saw numerous burdensome voting bills at around this time of year. As amended, North Dakota's new law allows for only four forms of ID: a current North Dakota driver's license or non-driver ID card, a tribal ID, and a long-term care certificate. Persons stationed or living outside of the country can present a current military ID or passport. The ID requirement applies to absentee voters, with a narrow exception for voters with disabilities unable to travel to get an accepted ID. In those instances, a disabled voter may obtain an absentee ballot without ID, but only if another eligible North Dakota voter confirms in writing that the absentee voter is eligible to vote.

**As court battles continue, state legislators are also waging wars against voting restrictions.** There are ongoing lawsuits over new voting restrictions in Arizona, North Carolina, and Texas. In a few states, legislative battles happened alongside those court fights. The most interesting example comes from Texas, which has a high-profile court battle over photo ID. The Texas legislature enacted a bill that would provide a certified copy of a Texas birth certificate free of charge to a voter who states she is seeking it to obtain an election identification certificate,

A124

[VOTING LAW ROUNDUP 2015](https://www.brennancenter.org/research-reports/voting-laws-roundup-2015), Brennan Center for Justice**APPENDIX A**

a minor adjustment. More impactful ameliorative bills failed to pass. More alarming, a bill passed by the Texas legislature would exacerbate the restrictive ID law by eliminating non-expiring photo identification cards for the state's senior citizens. There are also bills pending in North Carolina — which has a trial beginning this July over new voting restrictions passed in an omnibus law in 2013 — to restore some early voting hours cut by the challenged law and to expand the list of IDs accepted to vote, but neither is active. In Arizona, where there is an ongoing suit over a requirement that voters present documentary proof of citizenship before registering, legislators introduced bills to repeal or mitigate the burdensome law, but the session expired with none of the bills progressing.

**Restrictive Bills Passed in 2015**

North Dakota	Voter ID (HB 1333) (passed and signed)
--------------	--

**Selected Restrictive Bills Defeated in 2015**

Arkansas	Voter ID (HJR 1007/SJR 7)
Maine	Voter ID (LD 197)
Georgia	Early Voting (HB 194)
Missouri	Voter ID (HB 30, HB 339)
Nebraska	Voter ID (LB 111)
Nevada	Voter ID (SB 169, SJR 15, AB 253, AB 266)
New Mexico	Voter ID (HB 340)

VOTING LAWS ROUNDUP 2015 Brennan Center for Justice  
APPENDIX A**Enhancing Voter Access**

Legislators from both sides of the aisle introduced and supported numerous voting bills expanding access to the ballot box as well. Of the **464** bills enhancing access that have been introduced or carried over this legislative session, **33** are active in **16 states**.

**Selected bills to expand access to voting in 2015**

*Note: If a state falls into more than one category, the map reflects the legislation that has advanced furthest in the legislative process.*

**Oregon triggers a surge of automatic registration bills.** In March, Oregon passed a breakthrough law to modernize voter registration by automatically registering eligible citizens who have driver's licenses (and do not ask to remain unregistered). Soon after Oregon's bill was introduced, 14 additional states — Alabama, Arizona, Arkansas, California, Georgia, Illinois, Louisiana, Minnesota, New Jersey, New York, Ohio, South Carolina, Texas, and Vermont — plus the District of Columbia introduced bills that would automatically register citizens who have, apply for, or update driver's licenses, and that information would be electronically sent over. In some states, such as Georgia, Illinois, and Ohio, the legislation would register citizens who have conducted business with other government agencies as well. The bills vary as to the specific mechanism by which individuals are registered, and other details — for instance, when and how an individual may opt out of registration. But all seek to reduce the burden on individual voters and instead require the government to ensure eligible citizens are registered.

**Online registration continues to pass with bipartisan support.** As in recent legislative sessions, several states — Florida, New Mexico, and Oklahoma — enacted online registration on a bipartisan basis.

5/25/2021

VOTING LAWS ROUNDUP 2015 Brennan Center for Justice

## APPENDIX A

**Other reforms are gaining bipartisan support.** In Vermont, a bill to establish Election Day registration was enacted on a bipartisan basis. Indiana enacted a bill, with bipartisan support, to allow state agencies that issue SNAP and TANF benefits to electronically transfer voter registration information to election officials (which is currently in place only at the DMV). A bill to restore voting rights to people with past criminal convictions **passed** the Maryland legislature in April by a substantial majority and with some bipartisan support, but was vetoed by the governor. The legislature will have the opportunity to override the veto when it is back in session; the bill passed the State Senate with **enough votes to override a veto** and the House only two short of the necessary amount. In Minnesota, a bill restoring voting rights with bipartisan co-sponsorship advanced before being defeated.

**Bills to Enhance Voter Access Passed in 2015**

District of Columbia	Online Registration (LB 1035) (passed in 2014, signed in 2015)
Florida	Online Registration (SB 228) (passed and signed)
Indiana	Optional Electronic Registration (at agencies administering TANF and SNAP benefits) (SB 465) (passed and signed)
Montana	Disability Access (HB 209) (passed and signed)
New Mexico	Online Registration (SB 643) (passed and signed)
Oklahoma	Online Registration and Optional Electronic Registration (SB 313) (passed and signed)
Oregon	Automatic Registration (HB 2177) (passed and signed)
Utah	Expansion of Same Day Registration Pilot Project (HB 219) (passed and signed) Pre-registration (HB 340) (passed and signed)
Texas	Voter ID (SB 983) (passed and signed)
Vermont	Election Day Registration (S 29) (passed and signed)
Virginia	Voter ID (HB 1653) (passed and signed) Polling Place Standards (SB 1062) (passed and signed)
Wyoming	Voting Rights Restoration (HB 15) (passed and signed)

**APPENDIX A**

**Selected Bills to Enhance Voter Access Defeated in 2015**

Hawaii	Electronic Registration (HB 401)
Kentucky	Online Registration (HB 214)
Virginia	Voting Rights Restoration (SJR 238)
Maryland	Voting Rights Restoration (SB 340/HB 980) (vetoed)
Minnesota	Voting Rights Restoration (SF 878) (provision removed from version of bill that passed) Voting Rights Restoration, Pre-registration, Automatic Registration, Early Voting (SF 455) (provisions removed from version of bill that passed)
Oklahoma	Voter ID (SB 86), (HB 1511)
Washington	Pre-registration (HB 1294)

**Selected Bills to Enhance Voter Access Pending and Active in 2015**

California	Automatic Registration (AB 1461) (passed)
Iowa	Online Registration (SF 331) (passed Senate)
New York	Ballot Design (A 3389) (passed Assembly)

Also see our roundup of voting law changes in 2012, 2013, and 2014.

**Voting Rights Context**

These voting law changes come amid a high-pitched battle over voting rights.

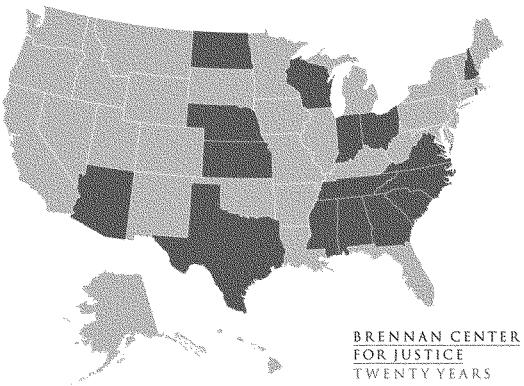

5/25/2021

VOTING LAWS CENTER FOR JUSTICE

**APPENDIX A**

Since the 2010 election, **22 states** have new laws making it harder to vote — ranging from photo ID requirements to early voting cutbacks to registration restrictions — and 17 states will have them in place for the first time in a presidential election in 2016. Those 17 states are: Alabama, Arizona, Georgia, Indiana, Kansas, Mississippi, Nebraska, New Hampshire, North Carolina, North Dakota, Ohio, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin.\*

*\*Note: This list was updated to include Arizona in March 2016.*

## Voting Laws Roundup 2016

For the fourth year in a row, bills that would expand voters' access to the ballot box have outpaced those that would restrict voting, in terms of both introduction and passage.

PUBLISHED: April 18, 2016

 Ensure Every American Can Vote  
Voting Reform

The 2016 election season is already in full swing. As voters in a number of states face new restrictions for the first time in a presidential election, we've already seen problems in primaries across the country. A new photo ID requirement led to long lines in Wisconsin. A reduction in polling places forced some to wait five hours to vote in Arizona. New rules created confusion in North Carolina. This could be an early glimpse of problems in November — as voters face the first presidential election in 50 years without the full protections of the Voting Rights Act, which was designed to prevent discrimination in voting.

Against this backdrop, legislators are considering a variety of changes to their states' voting laws. At the beginning of the 2016 legislative session, and as of March 25, 2016, at least **422 bills** to enhance voting access were introduced or carried over in **41 states** plus the District of Columbia. Meanwhile, at least **77 bills** to restrict access to registration and voting have been introduced or carried over from the prior session in **28 states**.

Thus far, two key trends have emerged in 2016:

1. **Automatic voter registration has taken off across the country.** Legislators in **West Virginia** and **Vermont** both passed groundbreaking bills with strong bipartisan support — West Virginia's has already been enacted, and Vermont's awaits the governor's signature. This progress comes as Oregon, which **passed** automatic voter registration in 2015, has reported substantial early **success** with its new system. After just a few months,

A131

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2016>

1/4

5/25/2021

VOTING LAW CENTER 2016 Brennan Center for Justice

registration rates have increased nearly fourfold. California also passed a bill in late 2015, and supporters are looking forward to full implementation next year.

- 2. States are passing fewer voting restrictions, but nonetheless, restrictions in 14 states will be on the books for the first time in a presidential election in 2016.** Overall, states are passing fewer laws to restrict voting rights — and voter ID bills are once again the most common type of restriction — but this may be due to states already having restrictive voting laws in place. In 2016, 14 states will have restrictive voting laws in effect for the first time in a presidential election. Restrictions in most of these 14 were passed before this year. (*Note: This paragraph was updated September 23, 2016 to change the number of states with new restrictions, reflecting recent court victories.*)

For the fourth year in a row, bills that would expand voters' access to the ballot box have outpaced those that would restrict voting, in terms of both introduction and passage. These bills, a number of which have bipartisan support, included efforts to modernize voter registration systems and restore voting rights to eligible citizens with past criminal convictions.

#### **Expansive Legislation**

**Automatic voter registration is picking up speed and bipartisan support.** The 2016 session saw more automatic voter registration bills introduced than any other kind of voting legislation. Under automatic registration, the government automatically and securely registers every eligible citizen who interacts with designated government offices unless the person declines to register.

**West Virginia** passed an automatic voter registration bill, the first with significant bipartisan support, making it the third state after Oregon and California to adopt this reform.

In **Vermont**, the final version of the bill passed nearly unanimously, and observers expect the measure to be signed into law soon. It is the second state to pass automatic registration with strong bipartisan support.

**Illinois** may also still pass legislation in the current session. Illinois' bill is exciting because it provides for automatic registration not only at DMVs but also at other agencies, like social service and disability offices, expanding the breadth of this reform to reach a wider array of eligible citizens.

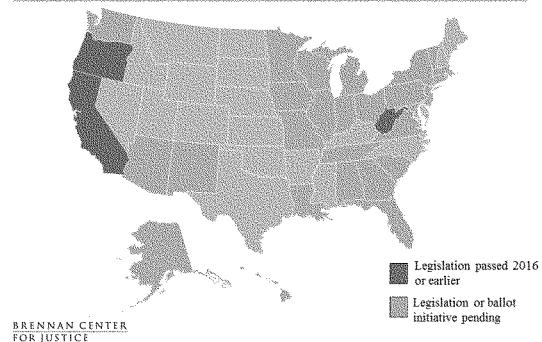

Although **Maryland** did not pass automatic voter registration, the state's legislature passed a broad voting reform bill, requiring all of the state's voter registration agencies to transfer voter information electronically to state election officials. Doing so would add a key building block for future automatic registration in the state. The governor is expected to sign the bill, which enjoyed strong bipartisan support, into law.

All in all, 28 states and the District of Columbia have considered automatic registration this year (including legislation carried over from 2015 sessions). In addition, groups in several states, like **Alaska**, are pursuing ballot initiatives to adopt automatic registration.

5/25/2021

**VOTING LAWS ROUNDUP 2016**  
Brennan Center for Justice  
APPENDIX A

**States Considering Automatic Voter Registration in 2016**

**Online voter registration continues to advance in the states.** At least 15 states considered online registration legislation. Idaho, Rhode Island, and Wisconsin (which also included restrictive elements discussed below) adopted the reform, and Tennessee is also poised to pass it this session. Most states now offer some form of online voter registration.

**Rights restoration remains a popular reform.** Restoration of voting rights to those with past criminal convictions was the second most popular type of reform this session after efforts to modernize registration, with 27 bills introduced in 15 states. Maryland's legislature overrode a gubernatorial veto to restore the rights of 40,000 Marylanders. And in Kentucky, a dispute continues over Gov. Matt Bevin's suspension of an executive order restoring voting rights to those convicted of certain crimes. Legislation that would amend Kentucky's constitution to automatically restore voting rights passed the state House by a wide margin and received substantial bipartisan support, but has stalled in the state Senate.

**Restrictive Legislation**

**States are passing fewer laws that restrict voting rights overall, but voter ID bills are still the most common type of restriction being introduced.** The pace of states' adoption of restrictive voting legislation continues to slow, perhaps because many states already have them on the books.

Although voter ID bills are the most common form of restrictive legislation that has been introduced, other types of restrictions have gained traction.

**19 states saw 37 voter ID bills** introduced or carried over into the 2016 session. Legislators in Missouri introduced a photo ID requirement, though it will require voter approval through a state constitutional amendment. The bill passed the state House and awaits a vote in the Senate. West Virginia passed a less restrictive voter ID requirement, but as part of legislation that included automatic registration, described above.

3/4

5/25/2021

VOTING LAWS CENTER FOR JUSTICE

## APPENDIX A

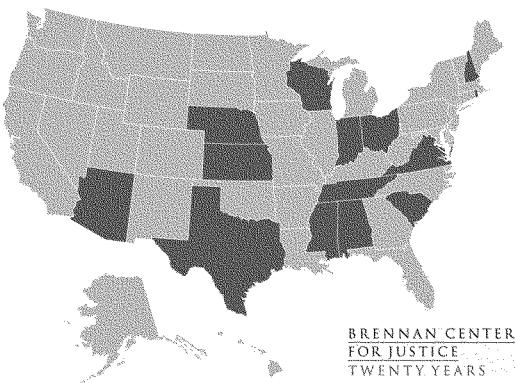

On the brighter side, **Florida** made its law less restrictive, adding veterans' health IDs, concealed-carry licenses, and government employee IDs to its list of photo ID forms accepted for voting, as long as those IDs were unexpired and contained the voter's name and photograph.

**Two states passed laws that may limit voter mobilization.** **Arizona** made it a felony for anyone other than a family/household member or caregiver of the voter to collect and submit the voter's absentee ballot. In prior years, several states prescribed rules to limit third-party collection and delivery of absentee ballots. Arizona's would be among the strictest, and may create significant barriers for minority or elderly communities, who historically have relied on absentee ballots and assistance from civic groups to cast their votes. In **Wisconsin**, the state eliminated "special registration deputies" — volunteers who were previously permitted to verify voters' residency when they collected or submitted voter registration applications. The law threatens the ability to civic groups to conduct voter registration drives in the state.

**New voting restrictions in place in 2016.** Aside from new restrictions considered in 2016, there are **14 states** with voting restrictions *in place* for the first time in a presidential election this year. The new measures range from strict photo ID requirements to early voting cutbacks to registration restrictions.

Those 14 states are: Alabama, Arizona, Indiana, Kansas, Mississippi, Nebraska, New Hampshire, Ohio, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin. See the following map:

Voting Restrictions in Place for First Time in Presidential Election in 2016

This is part of a broader movement to curtail voting rights, which began after the 2010 election, when state lawmakers nationwide started introducing hundreds of harsh measures making it harder to vote. Overall, 20 states have new restrictions in effect since the 2010 midterm election.

(Note: The restrictive laws section was updated September 23, 2016 to change the number of states with new restrictions, reflecting recent court victories.)

**EXPERT BRIEF**

## Voting Laws Roundup 2017

In 2017, changes to voting laws are again poised to play a major role in state legislative agendas.

PUBLISHED: May 10, 2017

**Ensure Every American Can Vote**  
 Voting Reform

(Note: This updates the Roundup previously published on March 27, 2017.)

At this point in the year, every state's legislature is either in session or has completed its 2017 calendar. As has been the case all decade, legislators across the country are trying to reshape state voting laws. In several places, this means it will soon be harder to vote: **Five states** have already enacted bills to cut back on voting access, and **one more** is on the verge of doing so. By comparison, three states enacted voting restrictions in 2015 and 2016 combined. Overall, however, more bills to expand access to voting were introduced this year than bills that would restrict voting access. Still, of the legislation making the most substantial impact on voting access, more legislation to limit participation is advancing toward passage. Moreover, governors in Nebraska and Nevada have vetoed the bills that would expand access to the franchise.

#### Overview of Legislation to Restrict Voting Access

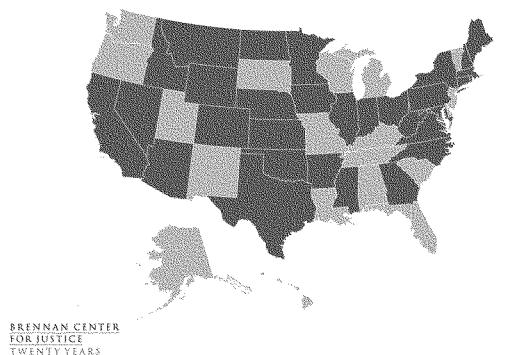

Overall, at least **99 bills** to restrict access to registration and voting have been introduced in **31 states**. **Thirty-five** such bills saw significant legislative action (meaning they have at least been approved at the committee level or beyond) in **17 states**.

A135

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2017>

1/8

5/25/2021

VOTING LAWS ROUNDUP 2017, Brennan Center for Justice  
APPENDIX A**Bills to Restrict Access to Voting in 2017****Several states will soon implement major new voting restrictions**

Five states have already enacted laws making it harder to register or vote, one more is on the verge of doing so, and more states could act later this year:

**Iowa's** governor signed a broad-based law that will require voter ID, restrict voter registration efforts, and impose new burdens on Election Day registration and early and absentee voting. Although not as restrictive as a North Carolina law that passed in 2013 (and was blocked by a federal court), Iowa's law similarly restricts voting in a number of different ways.

**Arkansas** passed two bills to bring back voter ID to the state after a court struck down an earlier law.

**North Dakota** also enacted legislation to re-impose an identification requirement after a court blocked a strict ID law in 2016.

**Indiana** enacted a law that will implement a purge of registered voters from the rolls. The program will remove voters in a manner similar to purges in other states that have been criticized for being error-prone and inadequately protective of eligible voters.

**Montana's** house and senate passed a bill that will prevent civic groups and individuals from helping others vote absentee by collecting and delivering their voted ballots. The bill now goes to voters as a November 2018 ballot measure.

**Georgia's** legislature sent bill that would make voter registration more difficult to the Governor, and he signed it on May 9.

**Voter ID bills are still the most common form of voting restriction moving in state legislatures**

Since 2010, ten states have passed more **burdensome voter ID requirements**. As in previous years, voter ID is the most common type of legislation to restrict voting access this year. Overall, **39 bills** imposing harsher voter ID requirements were introduced in **22 states**. As noted above, **three states** — Arkansas, Iowa, and North Dakota have already enacted voter ID laws.

A136

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2017>

2/8

5/25/2021

VOTING LAWS ROUNDUP 2017 Brennan Center for Justice

**APPENDIX A**

Legislation pending in other states poses risks to voting access. For example, **Oklahoma's** Senate passed a bill that would add a voter ID requirement to the state constitution. The bill passed with a wide margin in the Senate, setting up a likely house vote. Meanwhile, **Texas's** senate has passed a voter ID bill, discussed in further detail below, that would put in place a voter ID provision less voter-friendly than the current, court-ordered provision.

**Restrictions on voter registration are a close second**

After voter ID, making the voter registration process more burdensome is the most popular subject of bills to cut back on voting access. Overall, **33** bills to make the voter registration process more burdensome have been introduced in **22** states. Bills have at least been considered and approved by a legislative committee in Connecticut, Iowa, Kansas, Maryland, New Hampshire, Rhode Island, Texas, Virginia. Of these, **New Hampshire's** has the most momentum: a bill to make registration more difficult for students, supported by the Secretary of State, has passed the Senate.

**The majority of states acting to restrict voting are legislating on topics where courts previously acted to protect voters**

Most of the states that have already enacted or on the verge of enacting new voting restrictions are passing legislation of the same subject on which courts have recently acted to protect voters from past voting restrictions.

**Arkansas** has passed two harmful voter ID bills. One, which restores a statutory requirement that voters show one of a limited set of ID, has been enacted. The other, which would amend the state constitution to require voter ID, must be approved by the voters in the form of a ballot initiative before taking effect. A state court blocked a previous ID law in 2014.

**Georgia** enacted a law imposing a requirement that information on voter registration forms match exactly with other state records — a burdensome process known as “no match, no vote.” Only months earlier, the secretary of state agreed in a court settlement to stop a similar procedure that had prevented tens of thousands from registering.

**Iowa** enacted an omnibus voting bill, described in further detail above, on May 5. The bill includes a requirement that suspected non-citizens be deleted from the voter rolls. Such removals programs, if conducted without safeguards to adequately ensure those being removed are actually ineligible, can sweep in thousands of eligible voters, as has happened in Colorado and Florida. In 2014, a state court blocked former Secretary of State Matt Schultz from purging suspected noncitizens because he lacked authority to carry out the program in the manner he intended.

**North Dakota's** Governor signed a bill on April 25 that would restore a strict voter ID requirement in the state. In 2016, a federal court partially blocked a previous ID law that accepted a narrow range of identification documents and did not provide any meaningful voting opportunities for voters without the accepted ID. The new bill slightly expands options to use for ID, but eliminates the process the court imposed, which allows voters without IDs to cast a ballot that counts on Election Day, and instead included a more burdensome process. One legislator argued that the bill does not pass constitutional muster.

**Texas's** legislature is considering a voter ID bill that is on the verge of being passed a house committee has already approved the legislation and it has already passed the senate. The state attorney general has described the bill as a response to a court's blocking of the state's previous strict voter ID law. Critics observe that the bill, if enacted, would put in place a voter id requirement that is more stringent than the existing court-ordered process.

## 602

5/25/2021

VOTING LAW ROUNDUP 2017, Brennan Center for Justice  
APPENDIX A

**Bills to restrict voter access approved by state legislatures in 2017**

	Voter ID (HB 1047) (passed and signed)
Arkansas	Voter ID (HJR 1016) (passed house and senate; signed by governor; must be approved as ballot measure to become law)
Georgia	Voter registration (HB 268) (passed and signed)
Indiana	Voter purge (SB 442) (passed and signed)
Iowa	Voter ID, restrictions on voter registration drives, Election Day registration, absentee voting (HF 516) (passed house and senate). Also contains voter list maintenance provisions that, if implemented improperly, could lead to voter purges.
Montana	Absentee ballot collection (SB 352) (passed house and senate; must be approved as ballot measure to become law)
North Dakota	Voter ID (HB 1369) (passed and signed)

**Overview of Legislation to Expand Voting Access**

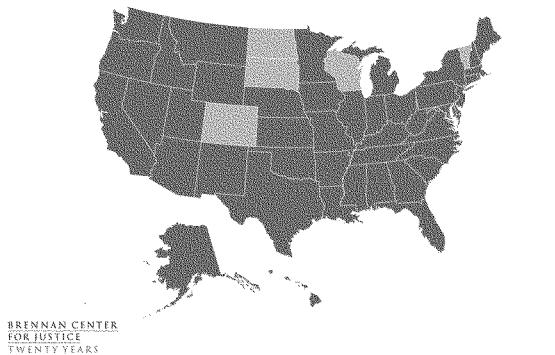

Overall, at least **531 bills** to enhance voting access have been introduced in **45 states**. **One hundred fifty-six bills** have at least been considered and approved by a legislative committee in **30 states**.

A138

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2017>

4/8

5/25/2021

VOTING LAWS ROUNDUP 2017 Brennan Center for Justice  
APPENDIX A**Bills to Expand Access to Voting in 2017**BRENNAN CENTER  
FOR JUSTICE  
TWENTY YEARS

**Fifteen state legislatures have passed bills to expand access to voting, but Governors have vetoed the most impactful legislation**

**Eight states** have enacted bills that will make voting and registration easier, seven states have not yet enacted legislation but have passed it through their state legislatures, and **more than a hundred bills** to improve voting access have at least advanced through a committee. The two bills that would make the biggest impact on voting access, however, have been vetoed.

**Florida, Kansas, New Jersey, Tennessee, Utah, Virginia** enacted legislation that would make it easier to vote without showing up to the polls on Election Day.

- **New Jersey** improved voting for military voters.
- **Utah** expanded early and absentee voting opportunities.
- The other states upgraded their absentee voting procedures.

**Indiana** improved its process for registering voters who visit the state drivers' license offices.

**Wyoming** eased the process for restoring the right to vote for people with criminal convictions.

**Idaho** made its voter ID law slightly less burdensome.

The most significant reforms to pass, however, have been vetoed by Republican governors.

- **Nevada**'s assembly and senate passed legislation to establish automatic voter registration, but Republican Governor Brian Sandoval vetoed it. The legislation, an initiative petition, now goes to the voters, who could approve it by directly voting on it in the November 2018 general election.
- **Nebraska** Governor Pete Ricketts, also a Republican, vetoed a bill that would have restored the right to vote to citizens with criminal convictions upon their release from incarceration. The veto came after Nebraska's unicameral legislature (which is technically nonpartisan, but controlled by legislators generally identified as politically conservative), passed the bill by a 27-13 margin. An attempted veto override failed, with the chamber splitting 23-23 for override.

## 604

5/25/2021

VOTING LAWS ROUNDUP 2017, Brennan Center for Justice

APPENDIX A

### Automatic registration and other reforms to modernize voter rolls are common forms of legislation to expand voting access

Automatic voter registration (AVR) remains a popular pro-voter reform that is being introduced in legislatures across the country, building on momentum from the last two years. AVR is a new reform that leverages existing technology to help get voters registered. It also changes our system from one in which voters must affirmatively register to vote to one in which they are registered unless they "opt out." In 2015 and 2016, six states passed or implemented AVR.

This year, AVR became law in the **District of Columbia**.

A bill in **Illinois**, which nearly enacted the reform last year, just passed the Senate by a 48-0 vote. The bill is similar to legislation introduced and supported by both Democrats and Republicans in the last legislative session, and there is a strong possibility the bill will pass.

**Nevada** passed an automatic voter registration bill through both legislative chambers, but it was **vetoed** by the governor. It will be on the ballot in 2018 for the voters to decide.

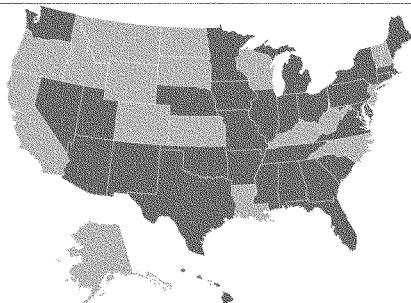

**Utah's** House also passed an automatic voter registration bill, but it died in the Senate.

**Colorado, Connecticut, and Georgia** are moving forward to implement automatic voter registration administratively.

Overall, at least **86 bills** to implement or expand AVR have been introduced in at least **32 states**.

Legislation has at least been approved by a legislative committee in **Arkansas, Connecticut, Hawaii, Illinois, Maryland, Nebraska, Rhode Island, Virginia, and Washington**, and efforts to introduce and pass legislation have also received media attention in **Maine** and **Maryland**.

### Automatic Voter Registration Bills in 2017

BRENNAN CENTER  
FOR JUSTICE  
TWENTY YEARS

### Legislation to expand early and absentee voting is popular

In addition to the six states that have already enacted legislation to make early, absentee, and military voting easier, **seven** states have at least moved early voting legislation through a committee, and **nineteen** states have

A140

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2017>

6/8

5/25/2021

VOTING LAWS ROUNDUP 2017, Brennan Center for Justice

## APPENDIX A

done the same with absentee voting legislation. Overall, **165 bills** to improve early voting or absentee voting access have been introduced in **35 states**.

**Legislation restoring the right to vote to people with past convictions is also common**

As described above, **Nebraska and Wyoming**'s legislatures approved bills to help restore the right to vote to people with past criminal convictions. Nebraska's bill was vetoed.

**Nevada's** Senate passed a bill that would improve the rights restoration process in the state, and a bill is also moving in the House. Nevada's Governor has opposed past efforts to restore the right to vote.

In **Virginia**, different versions of a bill that would improve voting access for certain persons with criminal convictions passed in the house and senate, but neither was enacted.

Overall, **55 bills** to help restore the right to vote to persons with past criminal convictions have been introduced in **18 states**, and bills have at least been approved by a committee in **17 states**.

**Bills to enhance voter access approved by state legislatures 2017:**

Florida	Absentee voting (H 105) (passed and signed)
Idaho	Voter ID (HB 149) (passed and signed)
Indiana	Electronic voter registration (HB 1178) (passed and signed)
Kansas	Absentee voting (HB 2158) (passed and signed)
Maryland	Voter registration (HB 1626) (passed house and senate)
Montana	Absentee voting (HB 287) (passed house and senate)
Nebraska	Voting rights restoration (LB 75) (passed unicameral legislature; vetoed by governor)
Nevada	Automatic voter registration (IP 1) (passed house and senate; vetoed by governor)
New Jersey	Military voting (SB 92) (passed and signed)
New Mexico	Disability access (HB 98) (passed house and senate)
Oklahoma	Early voting (SB 347) (passed house and senate)

 F O R J U S T I C E

*at New York University School of Law*

**Voting Laws Roundup 2018**

Legislative sessions have either commenced or concluded in every state that is meeting this year, except North Carolina, and the most notable takeaway of this session so far is the remarkable momentum around automatic voter registration, or AVR. What follows is the Brennan Center's analysis of state legislative activity as of April 2, 2018.<sup>1</sup>

In March, the New Jersey Senate passed an AVR bill out of committee with a bipartisan vote. In the same month, Washington's governor signed AVR into law and the Maryland Legislature passed an AVR bill and sent it to the state's governor. In addition, the Massachusetts House has passed an AVR bill out of committee. The Utah Senate passed an AVR bill this year, but it died in the House.

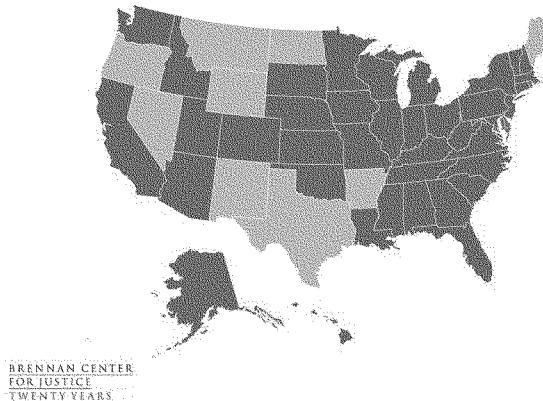

Broadly speaking, more pro-voter reforms are moving than anti-voter restrictions. Washington state has been a significant locus of pro-voter reform this year: in addition to AVR, the Legislature passed – and the governor signed – a package of reforms, including election day registration, pre-registration for 16- and 17-year-olds, and a state-level Voting Rights Act. California and Utah have also enacted laws improving voter access. In total, as of April 2 – when we at the Brennan Center completed our latest round of legislative bill tracking – at least **12 states** have advanced at least **20 bills expanding voting access** through at least **one state legislative chamber**.<sup>2</sup>

Nevertheless, efforts to restrict access to the franchise persist. At least **five states** have advanced at least **six bills restricting voting access** through at least **one chamber**.<sup>3</sup> Notably, the New Hampshire Legislature has passed a bill targeting student voting. In addition, the Georgia Senate passed a pair of bills cutting voting hours in Atlanta, one of which also would have restricted early voting options on weekends. But those bills were rejected by the state Assembly.

Finally, states have taken only tentative steps to address significant election security issues ahead of the 2018 elections. So far this year, at least **six states** have advanced at least **eight bills** related to **election security** through at least **one chamber**.<sup>4</sup> At the federal level, Congress recently appropriated \$380 million to help states upgrade their voting systems. This is a necessary, but far from sufficient, step toward securing our voting systems.

Overview of Expansive Bills

As of April 2, at least **41 states and Washington D.C.** have **introduced or carried over** at least **514 bills** expanding voting access.

**Expansive Bills Introduced or Carried Over in 2018**

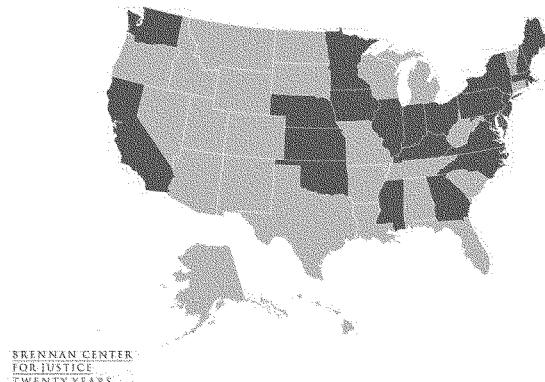

Pro-voter reforms that have moved thus far this year include:

- **Bills That Have Been Signed (*Three States*).**
  - **Washington state** has enacted: (1) a law implementing **automatic voter registration**, (2) a law implementing **election day registration**, (3) a law implementing **pre-registration** for 16- and 17-year-olds, and (4) a state-level **Voting Rights Act** that grants citizens the right to challenge electoral systems that deny race, color, or language minority groups an equal opportunity to elect candidates of their choosing.
  - **California** has enacted a law implementing **pre-registration** through its AVR system.
  - **Utah** has enacted (1) a law that **extends registration deadlines** and (2) a law that may encourage certain counties to offer **early voting** opportunities.
- **Bills Passed by the Legislature (*Three States*).**
  - The **Maryland** Legislature has passed (1) a bill implementing **automatic voter registration** and (2) a constitutional amendment that would permit the Legislature to implement **election day registration**. If ultimately enacted, the amendment will go to the voters in a November referendum.
  - The **South Dakota** Legislature has passed a bill facilitating the **addition of registration locations**.
  - The **Wisconsin** Legislature has passed a bill permitting the use of **tribal identification to register to vote**.
- **Bills Passed by One Legislative Chamber (*Eight States*).**
  - The **Indiana** Senate has passed a bill that would implement **no-excuse absentee voting**.
  - The **Kansas** Senate has passed a bill improving **access for voters with disabilities**.

- The **Maryland** House and Senate have each passed separate bills that would implement **no-excuse absentee voting in municipal elections**.
- The **Michigan** Senate has passed a bill that would permit applicants to **register to vote online** through the secretary of state's website.
- The **New York** Assembly has passed a bill extending the deadline for receipt of **absentee ballot** applications.
- The **Oklahoma** Senate has approved a bill facilitating opportunities for **early in-person voting**.
- The **Pennsylvania** Senate has passed a bill easing access to **absentee ballots for voters with disabilities**.
- The **Wisconsin** House has approved a bill **expanding access for military voters**.

Overview of Restrictive Bills

As of April 2, 2018, at least **24 states** have **introduced or carried over** at least **70 bills** restricting voting access.

**Restrictive Bills Introduced or Carried Over in 2018**

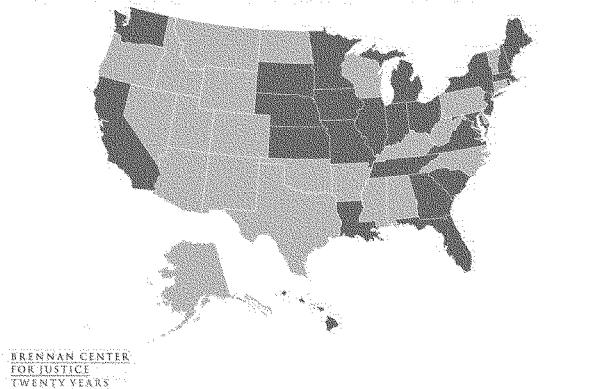

No states have enacted restrictive laws yet this year, but restrictive legislation is still advancing.

- **Bills Passed by the Legislature (*Two States*)**
  - The **Indiana** Legislature has approved a **list maintenance** bill that fails to fix the problems with its current list maintenance practices (though as we previously observed in footnote 3, this bill presents an unusual case).
  - The **New Hampshire** Legislature has passed a bill that appears to be directed at **deterring student voting**.
- **Bills Passed by One Legislative Chamber (*Four States*)**
  - The **Kentucky** House has passed a bill restricting access to **absentee voting**.

- The **New Hampshire** House has passed a bill that appears to be directed at **deterring student voting**.
- The **Ohio** Senate has passed a bill **reducing the minimum required number of precinct officials** in certain circumstances.
- The **Oklahoma** House has passed a bill authorizing the state Election Board to compare the state voter registration database to other state and federal databases and requiring the Board to **refer** any individuals on the voter rolls identified as **potential non-citizens** to the **district attorney**.

Overview of Election Security Bills

As of April 2, 2018, at least **26 states** have **introduced or carried over** at least **79 bills** related to election security. Note that this count does not include appropriations bills or administrative action, nor is the Brennan Center opining on the impact or potential efficacy of these bills in this document.

**Election Security Bills Introduced or Carried Over in 2018**

Election security bills that have moved thus far this year include:

- **Bills That Have Been Signed (*Three States*):**
  - **Indiana** has enacted (1) a law containing a variety of provisions related to **maintaining voting equipment**; updating the **permissible error rate** for voting systems to reflect current federal standards; and requiring county election boards to **notify** the Secretary of State within 48 hours of **certain security violations**, and (2) a law regarding **post-election reconciliation of vote counts**.
  - **South Dakota** has enacted a law prohibiting voting equipment from being connected to the Internet and prohibiting ballot marking devices from saving or tabulating votes.
  - **Washington** has enacted a law expanding the types of **post-election audits** election officials may run on direct recording electronic or in-person ballot marking systems to include random checks of ballot counting equipment, risk-limiting audits, and electronic audits of ballot counting equipment.

- **Bills Passed by One Legislative Chamber (*Three States*).**

- The **Maryland** House has passed (1) a bill requiring **post-election, manual audits** of voter-verifiable paper records for general elections (and authorizing such audits for primary elections) and (2) a bill requiring the state election administrator to **notify the governor and other elected officials** and agencies, within seven days, of **security violations** involving state elections systems.
- The **Michigan** House has passed a bill requiring that electronic voting systems use **paper ballots for tabulating purposes**.
- The **Missouri** House has passed a bill that beginning January 1, 2019 bans future purchase of **direct recording electronic voting machines** and requires that all newly purchased electronic voting systems read paper ballots that voters have marked by hand or, in the case of disabled voters who need assistance, from paper ballots that have been marked by paper-ballot marking devices designed to assist disabled voters.

Appendices listing the bills referenced in this analysis can be found [here](#).

---

<sup>1</sup> This document tracks certain voting legislation making it easier or harder to register or vote, as well as certain legislation related to election security. Note that there are several types of election- and voting-related legislation that we do not track, including: redistricting, ballot design, enfranchisement of people under 18 or non-citizens, or public or individual notice requirements. The document also does not track administrative changes that could expand or restrict access.

<sup>2</sup> California, Indiana, Kansas, Maryland, Michigan, New York, Oklahoma, Pennsylvania, South Dakota, Utah, Washington, Wisconsin. This count – and the counts of restrictive and election security bills passed through one chamber – does not include bills that passed through one chamber last year and carried over, or bills that passed through one chamber and subsequently failed.

<sup>3</sup> Indiana, Kentucky, New Hampshire, Ohio, Oklahoma. Indiana's current law violates the National Voter Registration Act of 1993. This Indiana bill introduces some protections against improper purges, but it does not address Indiana's unlawful failure to give notice to voters prior to purging them.

<sup>4</sup> Indiana, Maryland, Michigan, Missouri, South Dakota, Washington.

## Voting Laws Roundup 2019

With most legislatures closed, major positive reforms were enacted, but a handful of states made it more difficult to vote.

Brennan Center for Justice LAST UPDATED: July 10, 2019  
PUBLISHED: July 10, 2019

 **Ensure Every American Can Vote**  
Voting Reform

At this point in the year, 42 state legislatures have concluded their last regular legislative session in the leadup to a presidential election year. Looking back at this session, three new, Democratic trifectas – New York, Nevada, and Colorado – were responsible for an outsize portion of the most impactful expansive voting laws enacted so far this year.<sup>1</sup>

At the same time, a late-session surge in legislation cutting back voting access was successful in creating new restrictions in five states. Most significantly, in Florida, a new restriction cuts back on the gains made by Amendment 4. This new restriction could dramatically curtail the number of people who get their voting rights back under Amendment 4 and it flies in the face of the voters' decision last November to expand voting access. In addition, in Tennessee, lawmakers added new burdens on voter registration drives. And in Texas, lawmakers pushed through a new restriction on early voting, but it could have been even worse, if a powerful coalition had not come together to stop an even more restrictive bill that was moving toward passage.

Overall, since the start of the session, 46 states have introduced or carried over 688 bills expanding access compared to 29 states have introduced or carried over at least 87 bills restricting voting access. In addition, 33 states have introduced or carried over at least 108 bills related to election security.

VOTING LAWS ROUNDUP 2019 Brennan Center for Justice

APPENDIX A

## Expansive Voting Bills

The massive burst of pro-voter bills introduced this session – 688 bills in 46 states – translated into significant reform across the country. As a group, states with new, Democratic trifectas led the way in terms of expansive laws this year – and, within that group, New York, Colorado, and Nevada enacted multiple, high-impact reforms. In addition, Delaware and Virginia enacted early in person voting. And a number of other states – under Democratic, GOP, and mixed control – enacted reforms that are either more incremental or alleviate past voter suppression.

(Click [here](#) for a list of expansive bills that have passed at least one house and are still alive – as we are now deep into the legislative calendar, bills that have seen significant movement are generally the ones to watch for passage.)

A couple of other trends emerged as well. States enacted a number of bills providing notice and cure opportunities for absentee ballots and voter registrations. In addition, despite Florida's decision to cut back on Amendment 4, rights restoration continues to gain momentum. See below for more details:

**New Democratic Trifectas.** Following the 2018 election, Democrats **newly obtained** trifecta control of state government in six states. At the start of 2019, U.S. House Democrats made democracy reform a central part of the party's agenda, by introducing (and then passing) a democracy reform bill as H.R.1 – the first bill in the new House. Each of the six states with new Democratic trifectas states has enacted (or is shortly expected to enact) major pro-voter reforms.

- **New York** passed the most significant reforms this year, enacting into law a package of voting reforms at the start of the legislative session, including: **early voting** (SB 1102), **pre-registration** for 16- and 17-year-olds (AB 774), and **portability** of registration records (AB 775), as well as a law that consolidated the dates for state and federal primaries and required ballots to be distributed to military voters farther in advance of elections (AB 779). The legislature also passed constitutional amendments to permit **same-day registration** (SB 1048) and **no-excuse absentee voting** (SB 1049), which will need to be passed again and then ratified by the voters.
- **Colorado** enacted a law **restoring voting rights** to individuals on release from incarceration (HB 19-1266) and a law expanding **AVR** and writing that reform into the statute books (it had previously been put in <sup>A149</sup>

5/25/2021

VOTING LAWS ROUNDUP 2019 Brennan Center for Justice

## APPENDIX A

place as an administrative measure by election and DMV officials) (HB 19-235). In addition, the state enacted a law improving voting access for voters with disabilities (SB 19-202) and a law with several additional reforms, including new standards for vote centers and improvements to the registration process for voters living on Indian reservations (HB 19-1278).

- o The **Illinois** legislature sent Governor Pritzker a bill that would enhance voting access for eligible voters confined in jails (SB 2090).
- o **Maine** enacted **AVR** (HB 1463).
- o **Nevada** enacted a law providing **immediate rights restoration** to people on release from incarceration (AB 431) and a law that authorizes **same day registration**, improves the provisional ballot process and extends early or absentee voting deadlines, among other reforms (AB 345).
- o **New Mexico** enacted same day voter registration (SB 672).

**Additional Notable Reforms.** Several states passed additional expansive reforms through their legislative process. Both red and blue states took steps to expand access this year – continuing a trend we have seen throughout the decade. While GOP-controlled states passed a wide variety of pro-voter measures, the most common were reforms to enhance absentee voting and access for voters with disabilities. Reforms include:

- o **Delaware** enacted **early in-person voting** (HB 38).
- o **Georgia** enacted into law reforms addressing a variety of problems with its voting systems (and the lawsuits that challenged them), including improvements to its “no match, no vote” policy, voter purges, absentee voting, provisional voting, voting for people with disabilities (HB 316).
- o **Virginia** enacted **no-excuse early in-person voting** (SB 1026/HB 2790).
- o **Washington** enacted a Native American voting rights act (SB 5079).

**Notice/Cure Process.** States’ processes for determining the validity of voting materials like absentee ballots or registration applications are critically important but can result in improper disenfranchisement. For example, some states require elections officials to compare the voter’s signature on an absentee ballot with the signature they have on file and to reject the ballot if the signatures do not match. In some cases, though, states offer inadequate guidance to officials to make the comparison and inadequate recourse to voters whose ballots have been rejected.

This year, several states enacted laws that require election officials to notify and/or permit voters to cure deficiencies in absentee ballots, absentee ballot applications, or voter registration applications (or improve their existing processes), including: Arizona (SB 1054), Florida (SB 7066), Georgia (HB 316), Kansas (SB 130), and Virginia (HB 1042).

**Rights Restoration Momentum Continues.** Last year, Florida voters enacted the paradigm-shifting Amendment 4, and New York and Louisiana also made major improvements to their rights restoration laws. This year, while Florida lawmakers cut back on Amendment 4, lawmakers in other states pushed forward.

- o As noted above, **Colorado** and **Nevada** enacted rights restoration laws. In addition, **Arizona** enacted a law that would eliminate the obligation for people with only one felony conviction to pay certain types of legal financial obligations before having their voting rights restored (HB 2080). People are still required, however, to pay any outstanding restitution.
- o **California** (AB 646) and **New Jersey** (SB 2100) continue to consider rights restoration legislation.
- o Moreover, even though efforts in Iowa (HJR 14) and Tennessee came up short this year, the seriousness of those efforts, in states with extremely restrictive rights restoration regimes, is a further indication of the momentum behind this critical reform.

5/25/2021

VOTING LAWS CENTER 2019 Brennan Center for Justice

APPENDIX A

## Restrictive Voting Bills

While some states are expanding voting access, others are cutting it back. At least seven restrictive bills in five states have been signed into law. All of the five states with new restrictions are under Republican trifecta control, and all of them had already passed restrictions making it more difficult to vote previously since we started systematically tracking anti-voter legislation in 2011.

(Click [here](#) for a list of restrictive bills that have passed at least one house in states with open sessions.)

The most noteworthy restrictions that passed this year are in Florida, where lawmakers cut back on Amendment 4, and Tennessee, which enacted new restrictions on voter registration drives. Arizona, Indiana, and Texas also signed new restrictions into law. Opponents, however, were able to stop a major additional piece of legislation in Texas.

**Florida** enacted a law that **cuts back on the historic changes to the state's felony disenfranchisement laws** that voters passed overwhelmingly in November 2018 (SB 7066). Voting rights advocates, including the Brennan Center, have filed a lawsuit challenging the law.

**Tennessee** enacted into law wide-ranging **new restrictions on third-party voter registration** (HB 1079 and SB 971). The initial version of the bill imposed new registration and training requirements on third-party registration groups, as well as civil and criminal penalties for, among other things, submitting too many "deficient" voter registration forms. The amended version improves on this by carving out volunteers and organizations that only use volunteers from the new requirements. Voting rights groups have filed lawsuits challenging these new restrictions.

**Arizona** enacted laws that **extend voter ID requirements to early voting** (SB 1072) and **restrict access to emergency early/absentee voting** (SB 1090). These bills appear to be a GOP reaction to the use of emergency vote centers in Maricopa County during the 2018 Senate election.

**Indiana** enacted a law **cutting the deadline** for submitting an **absentee ballot application** for most voters from eight days to 12 days prior to the election (HB 1311) and a law **restricting state court lawsuits to extend polling place hours** (SB 560).

A151

4/6

5/25/2021

VOTING LAWS ROUNDUP 2019 Brennan Center for Justice

## APPENDIX A

**Texas** enacted a law **restricting mobile early voting** sites (HB 1888). Voters and voting rights advocates joined in a powerful coalition, however, to halt another highly restrictive bill that was moving towards passage. SB 9 would have significantly increased penalties and risk of prosecution for election code violations by voters; permitted poll watchers to inspect voter ID; and imposed new restrictions on people assisting voters with physical limitations or who cannot read the ballot, among other measures.

## Election Security Bills

In advance of the 2020 elections, state legislatures showed renewed interest in shoring up election infrastructure and implementing election integrity measures. Ten states have signed into law 14 election security bills thus far this year, and another three states have passed bills through their legislature.

(Click [here](#) for a list of election security bills that have passed at least one house in states with open sessions.)

Several states have recognized the critical importance of post-election audits to verify vote totals. The urgency of adopting these audits has only increased in light of the foreign interference in the 2016 election – and the likelihood that foreign powers will attempt to interfere in next year's election. Still, more work remains in order for states to be ready for 2020.

The following bills have been enacted into law or passed through the legislature:

**Arkansas** enacted a law that requires post-election audits (SB 524).

The **California** legislature passed a bill authorizing the Secretary of State to require data security training as a condition of receiving voter registration information.

The **Delaware** legislature passed a bill that makes the paper ballot is the legal ballot of record, enhances pre-election voting machine inspection requirements, and requires post-election audits (SB 121).

**Florida** enacted a law requiring the Secretary of State to promulgate security standards addressing chain of custody of ballots, transport of ballots, and ballot security (SB 7066). (Note that this bill also cuts back on

A152

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2019>

5/6

5/25/2021

## VOTING LAWS ROUNDUP 2019 Brennan Center for Justice

## APPENDIX A

(Amendment 4, as explained above.)

**Georgia** enacted a law that requires voting machines to produce a paper record and authorizes a risk-limiting audit pilot program (HB 316),<sup>1</sup> as well as a law that requires the Secretary of State to establish security protocols to protect voter registration information (HB 392).

**Indiana** enacted a law requiring two-factor authentication to access the computerized voter registration list as well as requiring election vendors to disclose foreign ownership (SB 558); a law authorizing a risk-limiting audit pilot program (SB 405); a law prohibiting the acquisition and, eventually, the use of direct recording electronic voting machines ("DREs"), and imposing new security measures for e-pollbooks, among other measures (SB 570); and a law mandating annual cybersecurity training for county elections officials (SB 560).

**Iowa** enacted a law directing state and local election officials to adopt new election cybersecurity measures (HF 692).

**Maryland** enacted a law requiring vendors to disclose foreign ownership (SB 743).

**Nevada** enacted a law that would mandate risk-limiting audits starting in 2022 (and a pilot risk-limiting audit program for the 2020 election) and establish a cybersecurity training requirements for local elections officials (SB 123).

**Oklahoma** enacted a law: authorizing the State Board of Elections to order post-election audits, requiring county election officials to undertake new cyber-security measures, and authorizing the State Board to declare an election emergency in response to security threats or interference (SB 261).

The **Oregon** legislature has passed a bill authorizing risk-limiting audits (SB 944).

**South Dakota** enacted a law that requires vote centers and counties that use e-pollbooks to have printed paper copies of the registration list.

**Texas** enacted a law that would direct the Secretary of State to establish new cybersecurity rules for protecting elections data, among other reforms (HB 1421).

**Endnotes**

1. This document tracks certain voting legislation making it easier or harder to register or vote, as well as certain legislation related to election security. Evaluating which laws to include requires exercising judgment and is not susceptible to precise quantification. Note that there are several types of election- and voting-related legislation that we do not track, including: redistricting, ballot design, enfranchisement of people under 18 or non-citizens, or public or individual notice requirements. The document also does not track administrative changes that could expand or restrict access.

2. The bill, however, is highly controversial: it does not require the use of hand-marked paper ballots and critics are concerned that it would result in the state purchasing voting systems that only use ballot-marking devices.

## Voting Laws Roundup 2020

The Brennan Center's latest voting laws roundup catalogs new bills relating to the voting process in 2020.

LAST UPDATED: February 4, 2020  
 PUBLISHED: February 4, 2020

 Ensure Every American Can Vote  
 Voting Reform

The start of 2020 state legislative sessions has been marked by a flurry of activity around pro-voter reforms, particularly in states with Democratic control over both chambers of the legislature and the governor's office (i.e., where there is a Democratic trifecta).

New Jersey, for example, enacted three bills in January to establish online voter registration, end prison-based gerrymandering, and create more transparency around district boundaries.

Virginia legislators seek to enact a broad-based, pro-voter agenda, and the commonwealth accounts for nearly a quarter of the expansive bills introduced in 2020. Virginia Democrats hold full control over state government for the first time in more than two decades.

Legislators in two other Democratic trifectas—New York and Washington—expect to pass automatic voter registration (which has already passed the New York Senate) and rights restoration (which has moved out of a Washington Senate committee).

Of the 40 states that have opened their regular legislative sessions, 29 states have introduced at least 188 bills to expand access to the franchise, primarily by making registration easier and reducing restrictions on absentee voting.<sup>11</sup> We estimate that most of the 188 new expansive bills, if enacted, would go into effect by or

5/25/2021

VOTING LAWS ROUNDUP 2020 | Brennan Center for Justice

## APPENDIX A

before Election Day, November 3. When combined with bills carried over from last year, the new bills bring the total of expansive bills currently before state legislatures to **471**.<sup>A2</sup>

Still, there are parallel efforts to restrict voting access. Legislators have introduced at least **35 bills** that would **restrict access in 15 states**.<sup>A3</sup> Thus, when combined with bills carried over from last year, there are currently 57 restrictive bills before state legislatures.<sup>A4</sup>

We estimate that most of the 35 new restrictive bills, if enacted, would go into effect by or before Election Day in November. **Unsurprisingly, a substantial portion of these bills seek to impose stricter voter ID requirements.** And, building off a resurgence of efforts to limit voter assistance (which coincides with the growing use of absentee and mail-in ballots), legislators in three states—Florida, Oklahoma, and Hawaii—have introduced bills that would **limit who may assist voters in applying for and delivering absentee and mail ballots**. In addition, legislators in two states, Florida and New Jersey, have introduced bills that would require election administrators to affirmatively undertake steps to purge supposed noncitizens from the rolls, and they would use flawed data regarding citizenship to do so.

Of course, these bill counts do not capture all efforts to restrict or expand access to the vote – there is significant action occurring outside of state legislatures. For example, voting rights are being threatened by non-legislative actions, like voter roll purges. In December, Georgia purged over 300,000 voters from its rolls on the basis of their inactivity, and Wisconsin may purge more than 200,000. At the local level, activists have sent a series of letters to dozens of local election officials threatening them with legal action if they do not undertake more aggressive purges (ripping a page out of the 2017 voter suppression playbook).

Finally, following the **election security concerns** that surfaced in the 2016 election, we continue to see legislative activity around this issue, though few of these policies are likely to have an impact before the 2020 election. Thus, as of February 3, **15 states**<sup>A5</sup> have introduced bills related to **election security**, and **11 states**<sup>A6</sup> are still considering **46 carry-over bills** related to election security. Note, however, that this count does not include appropriations bills or administrative action – two important tools for improving election security.

## Overview of Expansive Bills

As of February 3, 2020, legislators had introduced at least 188 bills expanding access to the franchise in 29 states.

A155

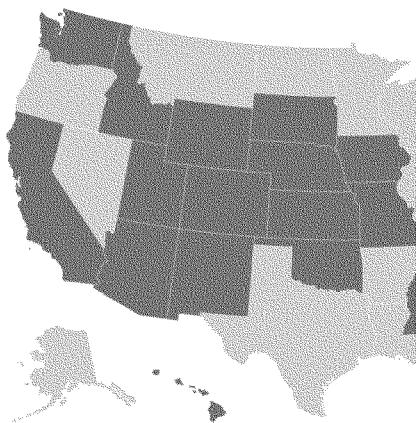

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2020>

2/7

5/25/2021

VOTING LAWS ROUNDUP 2020 | Brennan Center for Justice  
APPENDIX A**Expansive Bills Prefiled or Introduced in 2020**

February 2020

The bulk of pro-voter bills introduced this year aim to reform registration.

**Registration Reforms**

- **AVR (Ten states).** New York is poised to pass automatic voter registration (“AVR”). Indeed, on its first day in session this year, the New York Senate passed an AVR bill carried over from 2019. AVR is a transformative reform that registers eligible voters unless they “opt out” of registration and leverages existing technology to more efficiently update the voter rolls. Ten other states—Hawaii, Idaho, Iowa, Kentucky, Mississippi, Missouri, New Jersey, Oklahoma, Virginia, and Washington—have introduced 20 bills this year that would implement or strengthen AVR. Like New York, Arizona is also advancing an AVR bill carried over from last year. Sixteen states and the District of Columbia have already approved automatic voter registration.
- **Same Day Registration (Seven states).** Florida, Hawaii, Indiana, Kentucky, Missouri, New Jersey, and West Virginia have introduced bills that would allow voters to register on Election Day.
- **Pre-Registration (Five states).** Hawaii, Indiana, Kentucky, Virginia, and Washington have introduced bills permitting minors to pre-register to vote prior to their eighteenth birthdays. Virginia’s pre-registration bill is expected to pass, but—because the provision seeks to amend the state’s constitution—the bill would need approval from both chambers again next year, before going to the voters.
- **Portability (Three states).** California has introduced a bill that would allow voters to update their registration or change party affiliation from the fourteenth day before election to the close of polls on Election Day. West Virginia has introduced a bill that would permit voters to update their address when voting early in-person and vote without challenge. Hawaii has introduced companion bills that permit

5/25/2021

VOTING LAWS ROUNDUP 2020 Brennan Center for Justice

**APPENDIX A**

voters to change their registration information seven days before an election (instead of 14) and still receive mail ballots.

**Absentee Voting (Thirteen states).** Alabama, Indiana, Iowa, Kentucky, Maine, Mississippi, Missouri, New Jersey, Oklahoma, Tennessee, Virginia, West Virginia, and Wyoming have proposed 45 bills collectively that would ease restrictions on absentee voting, with most bills aimed at removing the requirement that voters establish an excuse before they can vote absentee. One of the bills out of Virginia would permit voters who are confined while awaiting trial or for a misdemeanor conviction to vote absentee as an exception to the requirement that first-time voters who registered by mail must vote in person.

**Re-enfranchising persons with past convictions (Eleven states).** Washington (**SB 6228**), Florida, Iowa, Kentucky, Mississippi, Missouri, Nebraska, New York, Oklahoma, Tennessee, and Virginia have introduced bills to grant greater access to the ballot for individuals with criminal convictions. These bills come on the heels of rights restoration laws enacted in 2019 in Nevada, Colorado, and **New Jersey**. The 2020 bills in Kentucky, Virginia, and Nebraska aim to amend the state constitutions, though Kentucky and Virginia already restore voting rights by executive action. Florida legislators have introduced a bill that would eliminate the requirement that returning citizens pay off all court costs, fees, and fines before their rights are restored (though the prerequisite of paying off restitution obligations would remain). The Brennan Center and allies have challenged in federal court the current Florida statute that makes voting contingent on the payment of legal financial obligations limitations.

**Early Voting (Twelve states).** Alabama, Arizona, Kentucky, Maryland, Mississippi, Missouri, New Jersey, New York, Oklahoma, Tennessee, Virginia, and West Virginia have introduced bills expanding opportunities for early in-person voting.

**Easing Voter ID Restrictions (Eight states).** Virginia, Indiana, Iowa, Missouri, New Mexico, South Dakota, Tennessee, and Wyoming have introduced bills easing the burden of existing voter ID laws, such as making it acceptable to use other forms of identification (e.g., university or tribal IDs), removing the requirement that an ID contain a photograph. Virginia has introduced seven different bills that would eliminate entirely or ease its photo ID requirements.

**Access for People with Disabilities (Three states).** Kentucky, Maryland, and Missouri have introduced bills to improve access for voters with disabilities.

**List Maintenance (Two states).** Missouri has introduced a bill that would extend the time during which a voter must be inactive before the voter's registration can be cancelled. Mississippi has introduced a bill that would prohibit the state from purging voters within 120 days of an election.

## Overview of Restrictive Bills

As of February 3, 2020, legislators had introduced at least 35 bills restricting access in 15 states. The vast majority of these bills impose stricter voter ID or absentee voting requirements.

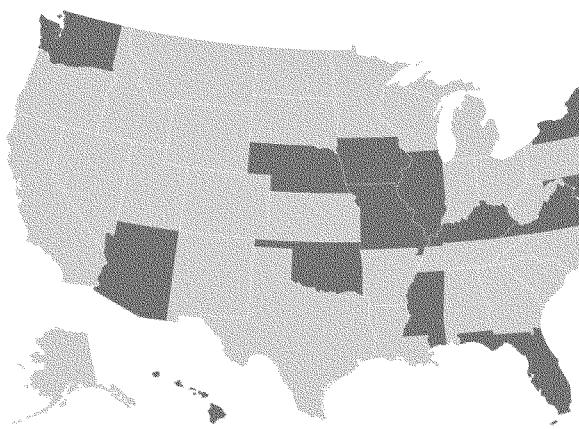

A157

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-2020>

4/7

**Restrictive Bills Prefiled or Introduced in 2020**

February 2020

The restrictions introduced this year include:

**More Restrictive Voter ID (Nine states).** Arizona has introduced a bill that prohibits the use of school IDs for voter verification and eliminates the ability to use other identity verification documents; Kentucky, Illinois, Maryland, Nebraska, and New Jersey have introduced bills imposing photo ID requirements to vote (the MD, IL, and NJ requirements would be especially strict); New York has proposed a bill that would require proof-of-citizenship to register to vote; Oklahoma has proposed a bill that would require fingerprinting upon registration to vote; and Missouri has proposed a bill that would eliminate the possibility for those without ID to submit an attestation and then vote using a regular ballot.

**More Burdens on Absentee Voting (Five states).** Virginia has introduced three bills increasing burdens related to overseas absentee voting. Kentucky has introduced a bill that would require voter ID at the polls (as noted above) and that applications for an emergency absentee ballot be accompanied by proof of ID.

**Limitations on the Assistance of Voters (Three states).** Florida, Hawaii, Oklahoma have introduced bills limiting those who may assist with or deliver vote-by-mail or absentee ballots. A Florida bill, for example, would limit who may be designated to pick up and deliver a voter's mail-in ballot to the elector's caregiver, household member, immediate family member, or legal guardian. Currently, any person could assist in picking up a voter's ballot, so long as that person didn't pick up more than two vote-by-mail ballots.

**Aggressive Prosecution (Three states).** Florida and New Jersey have introduced bills that make it a felony to collect the ballot of another if the person collecting the bill is not the kind of person specifically authorized to do so. New York has introduced a bill that would make it a felony for a person to register or attempt to register to vote if the applicant is not a U.S. citizen, without a knowledge (or, mens rea) requirement.

5/25/2021

VOTING LAW ROUNDUP 2020 | Brennan Center for Justice

## APPENDIX A

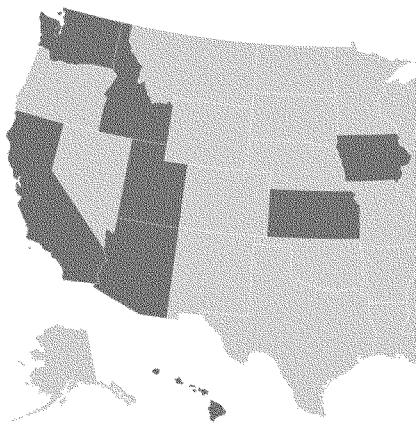

**Overview of Election Security Bills**

Fifteen states have introduced bills related to election security thus far this year. Note that these bills do not include appropriations bills or administrative action, nor is the Brennan Center opining on the impact or potential efficacy of these bills in this document.

---

**Election Security Bills Prefiled or Introduced in 2020**

February 2020

Fourteen states seek to make some improvements to election security. For example, three states would create offices related to election security or grant existing bodies more authority over election security. (CA **SB 808**, NJ **AB 291**, and VA **HB 539**). Five states have introduced bills related to audits, addressing procedures, paper ballots, and technology acquisition. (IA **LD 5426**, KS **SB 310**, SC **HB 4725**, TN **HB 1863**, and WA **SB 6412**). Legislatures in Maryland (**HB 392**), Utah (**SB 42**), Arizona (**SB 1135**), and Indiana (**SB 179**) have introduced measures related to manufacturing voting equipment in the United States, protecting voters' signature on mail ballots, and guidelines for electronic vote adjudication and the use of batteries in voting systems.

But legislators in one state—Florida—have introduced a bill that would undermine security. Florida's HB 1005 / SB 1312 would result in an end-run around certification processes for voting systems in the state by permitting a single proprietary software to be used for recounts. Florida election security advocates oppose the bill because it risks exposing Florida recounts to interference.

## THE STATE OF VOTING IN 2014

By Wendy Weiser and Erik Opsal

### Executive Summary

As we approach the 2014 election, America is still in the midst of a high-pitched and often highly partisan battle over voting rights. On one side are politicians passing laws and executive actions that would make it harder for many citizens to vote. This started after the 2010 midterm elections, when new state legislative majorities pushed a wave of laws cracking down on voting. On the other side are groups of voters and advocates pushing back — in the legislatures, at the ballot box, and especially in the courts.

Until recently, the Voting Rights Act was a critical tool in the fight, but the U.S. Supreme Court gutted the law's core protection last year. Since then, a number of states moved forward with controversial voting changes, including those previously blocked under the Voting Rights Act. As most state legislative sessions wind down, the focus shifts to activity in the courts, which are currently considering major challenges to new restrictions across the country.

In short, many Americans face an ever-shifting voting landscape before heading to the polls this November.

In advance of this crucial midterm election, this report details the new voting restrictions put in place over the past few years, the laws that are in place for the first time in 2014, and the major lawsuits that could affect this year's elections. Our key findings include:

- **Since the 2010 election, new voting restrictions are slated to be in place in 22 states.** Unless these restrictions are blocked — and there are court challenges to laws in six of those states — voters in nearly half the country

could find it harder to cast a ballot in the 2014 midterm election than they did in 2010. The new laws range from photo ID requirements to early voting cutbacks to voter registration restrictions. Partisanship and race were key factors in this movement. Most restrictions passed through GOP-controlled legislatures and in states with increases in minority turnout.

- **In 15 states, 2014 will be the first major federal election with these new restrictions in place.** Ongoing court cases could affect laws in six of these states.
- **The courts will play a crucial role in 2014, with ongoing suits challenging laws in seven states.** Voting advocates have filed suits in both federal and state courts challenging new restrictions, and those suits are ongoing in seven states — Arizona, Arkansas, Kansas, North Carolina, Ohio, Texas, and Wisconsin. There is also an ongoing case in Iowa over administrative action that could restrict voting. More cases are possible as we get closer to the election.

There has also been some positive momentum. Laws to improve the election system and increase voting access passed in 16 states since 2012, and these laws will be in effect in 11 states this November. The most common improvements were online registration and other measures to modernize voter registration, and increased early voting.

Still, this national struggle over voting rights is the greatest in decades. Voters in nearly half the country could head to the polls in November worse off than they were four years ago. This needs to change.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

### New Laws Restricting the Vote

Election laws have long been prone to politicization, but for decades there were no major legislative movements to restrict voting. Indeed, the last major legislative push to cut back on voting rights was after Reconstruction. The first stirrings of a new movement to restrict voting came after the 2000 Florida election debacle. Indiana and Georgia passed restrictive photo ID laws in 2005 and 2006, respectively, and Arizona voters approved a ballot initiative in 2004 requiring registrants to provide documentary proof of citizenship when signing up.

But the 2010 election marked a major shift. From early 2011 until the 2012 election, state lawmakers across the country introduced at least 180 restrictive voting bills in 41 states. By the 2012 election, 19 states passed 27 restrictive voting measures, many of which were overturned or weakened by courts, citizen-led initiatives, and the Department of Justice

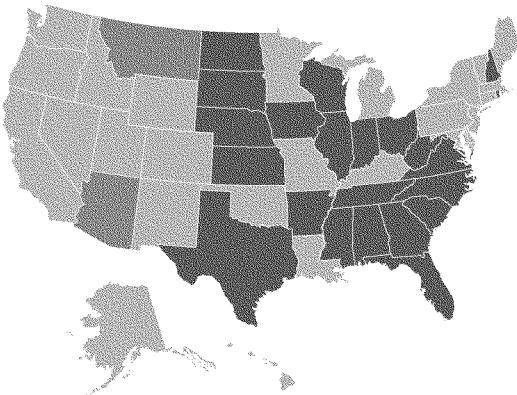

before the election. States continued to pass voting restrictions in 2013 and 2014.<sup>1</sup>

What is the cumulative effect of this legislative movement? As of now, a few months before the 2014 midterm elections, new voting restrictions are set to be in place in 22 states.<sup>2</sup> Ongoing court cases could affect laws in six of these states.<sup>3</sup> Unless these restrictions are blocked, citizens in nearly half the nation could find it harder to vote this year than in 2010.

Partisanship played a key role. Of the 22 states with new restrictions, 18 passed entirely through GOP-controlled bodies,<sup>4</sup> and Mississippi's photo ID law passed by a voter referendum. Two of the remaining three states — Illinois and Rhode Island — passed much less severe restrictions. According to a recent study from the University of Massachusetts Boston, restrictions were more likely to pass "as the proportion of Republicans in the legislature increased or when a Republican governor was elected."

### STATES WITH NEW VOTING RESTRICTIONS SINCE 2010 ELECTION

*Click on map for interactive version. Note: This map includes two states — Montana and Arizona — that do not technically fit the title and thus are reflected in light red.<sup>3</sup>*

1. Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Mississippi, Nebraska, New Hampshire, North Carolina, North Dakota, Ohio, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, and Wisconsin. For a detailed description of each state's laws, see our [interactive map](#) or [this list](#).
2. Arkansas, Kansas, North Carolina, Ohio, Texas, and Wisconsin. There is also a challenge to an Arizona law not reflected here because that law passed before 2010.
3. Montana lawmakers passed legislation on the November ballot to repeal Election Day registration, but that repeal will not actually be in effect this year. An Arizona law requiring documentary proof of citizenship when registering was passed in 2004, but blocked in 2012 for a vote using the federal registration form. In response, Arizona joined Kansas, which has a similar law, [bill 1311](#), to force the U.S. Election Assistance Commission (EAC) to change the federal form to allow the two states to require such documents. In March 2014, a federal judge ruled the EAC must change the form, but the 10th Circuit Court of Appeals stayed that decision while it considers the appeal. Arizona is included here because until now, the federal form has never been amended to allow for documentary proof of citizenship in any state.
4. By GOP-controlled body, we mean: (1) Both chambers of the legislature were controlled by Republicans and a Republican governor signed the bill; (2) Republicans controlled both chambers and overrode a veto from a Democratic governor; or (3) a Republican governor took executive action without legislative involvement. States in the first category were Alabama, Florida, Georgia, Indiana, Kansas, Nebraska (unicameral legislature with GOP governor), North Carolina, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Virginia (the GOP lieutenant governor broke a tie between an equally divided Senate); and Wisconsin. States in the second category were Arkansas and New Hampshire. Iowa and Florida fall into the third category.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

Race was also a significant factor. Of the 11 states with the highest African-American turnout in 2008, 7 have new restrictions in place.<sup>5</sup> Of the 12 states with the largest Hispanic population growth between 2000 and 2010, 9 passed laws making it harder to vote.<sup>6</sup> And nearly two-thirds of states — or 9 out of 15 — previously covered in whole or in part by Section 5 of the Voting Rights Act because of a history of race discrimination in voting have new restrictions since the 2010 election.<sup>7</sup> Social science studies bear this out. According to the University of Massachusetts Boston study, states with higher minority turnout were more likely to pass restrictive voting laws. A [University of California study](#) suggests that legislative support for voter ID laws was motivated by racial bias.

What do these laws look like?

- **Voter ID:** A total of 13 states passed more restrictive voter ID laws between 2011 and 2014, 11 of which are slated to be in effect in 2014.<sup>8</sup> Nine states passed strict photo ID requirements,<sup>9</sup> meaning a citizen cannot cast a ballot that will count without a specific kind of government-issued photo ID. An additional four states passed less strict ID requirements.<sup>10</sup> Eleven percent of Americans do not have government-issued photo ID, according to a [Brennan Center study](#), which has been confirmed by [numerous](#) independent studies. Research shows these laws disproportionately harm minorities, low-income individuals, seniors, students, and people with disabilities. In Texas, for example, early data from the state showed that between 600,000 and 800,000 registered voters did not have the kind of photo ID required by the state's law, and that Hispanics were 46 to 120 percent more likely to lack an ID than whites. In North Carolina, [estimates show](#) that 318,000 registered voters — one-third of whom are African American — lack a DMV-issued ID.<sup>11</sup>

- **Voter Registration:** A total of nine states passed laws making it harder for citizens to register to vote between 2011 and 2014.<sup>12</sup> These measures took a variety of forms. Four states<sup>13</sup> have new restrictions on voter registration drives. Nationally, African Americans and Hispanics register through drives at twice the rate as whites.<sup>14</sup> Three states<sup>15</sup> also passed laws requiring registrants to provide documentary proof of citizenship, which as many as [7.7 percent](#) of Americans do not have readily available. North Carolina eliminated highly-popular same-day registration, and Wisconsin made it harder for people who have moved to stay registered.
- **Early Voting:** Eight states passed laws cutting back on early voting days and hours.<sup>16</sup> These restrictions could exacerbate lines on Election Day and are particularly likely to hurt minority voters. For example, in North Carolina, Department of Justice [data](#) show that 7 in 10 African Americans who cast ballots in 2008 voted during the early voting period, and 23 percent of them did so during the week that was cut. Many states eliminated weekend and evening hours, when minority voters are more likely to cast a ballot. According to a [study](#) in Ohio in 2008, 56 percent of weekend voters in Cuyahoga County, the state's most populous, were black.

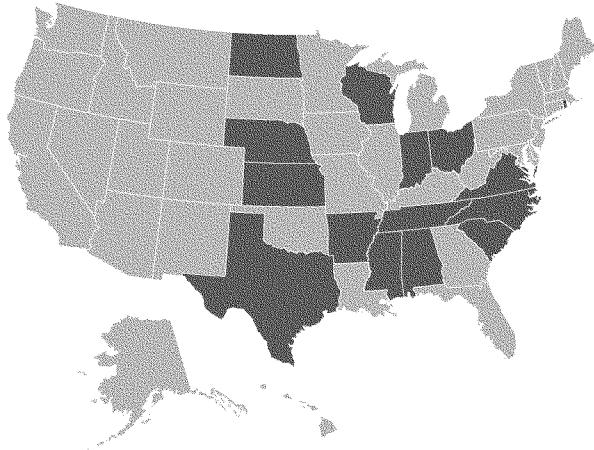

- **Restoring Voting Rights to People with Past Convictions:** Three states also made it harder to restore voting rights for people with past criminal convictions.<sup>17</sup> These laws disproportionately impact African Americans. Nationwide, [7.7 percent](#) of African Americans have lost the right to vote, compared to 1.8 percent of the rest of the population.

- 
5. Mississippi (73.1 percent), South Carolina (72.5), Wisconsin (70.5), Ohio (70.0), Georgia (68.1), and Virginia (68.1). Source U.S. Census Bureau, *Voting and Registration in the Election of November 2008 - Detailed Tables, Table 4b (Reported Voting and Registration of the Voting-Age Population, by Sex, Race and Hispanic Origin, for States: November 2008)*. <http://www.census.gov/popest/votingandregistration/publications/p20-2008-002.html>.
6. South Carolina (148 percent growth), Alabama (145), Tennessee (134), Arkansas (114), North Carolina (111), Mississippi (106), South Dakota (103), Georgia (96), and Virginia (92). 7. Alabama, Florida (partially covered), Georgia, Mississippi, North Carolina (partially covered), South Carolina, South Dakota (partially covered); Texas, and Virginia.
8. Alabama, Arkansas, Kansas, Mississippi, New Hampshire, North Carolina, North Dakota, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin. The North Carolina law will not be in effect for 2016, and the Wisconsin law was blocked by the courts in ongoing litigation. Some of these states passed more than one voting restriction and thus appear in other categories as well.
9. Alabama, Arkansas, Kansas, Mississippi, North Carolina, Tennessee, Texas, Virginia, and Wisconsin. The North Carolina law will not be in effect for 2016, and the Wisconsin law was blocked by the courts in ongoing litigation.
10. A photo ID is required in New Hampshire, Rhode Island, and South Carolina, but there is an affidavit alternative. A non-photo ID is required in North Dakota.
11. A study from the North Carolina Board of Elections estimates 318,643 registered voters lack a DMV-issued photo ID. Approximately one-third of that total (107,081) are African American. Available here: <http://ncigr.law.unc.edu/electionlaw/litigation/documents/League1501.pdf>.
12. Alabama, Florida, Illinois, Kansas, North Carolina, Tennessee, Texas, Virginia, and Wisconsin. Due to an error, Nebraska was previously included in this list. It was updated and removed on October 9, 2014.
13. Florida, Illinois, Texas, and Virginia.
14. Voting Law Changes in 2012, at 20 & 48 (2011), available at [http://www.brennancenter.org/sites/default/files/legacy/DEMOCRACY/VRF/Berman\\_Voting\\_Laws\\_V10.pdf](http://www.brennancenter.org/sites/default/files/legacy/DEMOCRACY/VRF/Berman_Voting_Laws_V10.pdf); State Restrictions on Voter Registration Drives, at 3 & 9 (2012), available at <http://www.brennancenter.org/sites/default/files/legacy/publications/State%20Restrictions%20on%20Voter%20Registration%20Drives.pdf>.
15. Alabama, Kansas, and Tennessee. The Kansas law is only in effect for the state registration form. Alabama and Tennessee election officials have yet to implement their state's laws.
16. Florida, Georgia, Nebraska, North Carolina, Ohio, Tennessee, West Virginia, and Wisconsin.
17. Florida, Iowa, and South Dakota.

## What's New in 2014

In 15 states,<sup>18</sup> 2014 will be the first major federal election with new voting restrictions in place. Ongoing court cases could affect laws in six of these states.<sup>19</sup> The uncertainty over these laws could lead to problems on Election Day, as they

did in 2012, when voting changes, even those not in effect, contributed to long lines.<sup>20</sup> We have already seen problems with new ID requirements in low-turnout primaries, *such as in Arkansas* this May, which could foreshadow more serious problems in November.

VOTING RESTRICTIONS IN PLACE FOR FIRST TIME  
IN FEDERAL ELECTION IN 2014

18. Alabama, Arkansas, Indiana, Kansas, Mississippi, Nebraska, North Dakota, Ohio, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin.  
 19. Arkansas, Kansas, North Carolina, Ohio, Texas, and Wisconsin. There is also a challenge to an Arizona law not reflected here because that law passed before 2010.  
 20. How to Fix Long Lines at 4 (2013), available at [http://www.brennancenter.org/sites/default/files/publications/How\\_to\\_Fix\\_Long\\_Lines.pdf](http://www.brennancenter.org/sites/default/files/publications/How_to_Fix_Long_Lines.pdf).

### Lawsuits Over Voting Restrictions

Voter advocates are fighting many of these new restrictions, especially in court. Voting restrictions are currently being challenged in court in seven states — Arizona, Arkansas, Kansas, North Carolina, Ohio, Texas, and Wisconsin. A lawsuit over a voter purge is also ongoing in Iowa. Most of the cases we are watching this year will likely be decided, at least preliminarily, in the coming months and could thus impact the 2014 election.

Challenges to restrictive voting laws have had a successful track record to date. Before the 2012 election, [10 courts](#) blocked new restrictions in at least 7 states.<sup>21</sup> Some of those legal fights continued into this year — in Pennsylvania (where a case challenging a strict new photo ID requirement is now over after the governor chose not to appeal a ruling against the law), in [Texas](#) (where a court found the state's voter ID law discriminatory under Section 5 of the Voting Rights Act, but then the Supreme Court effectively invalidated Section 5, prompting a new lawsuit challenging the same voter ID law under a different legal provision), and in [Arizona](#) (where the Supreme Court ruled against the state's new documentary

proof of citizenship requirement for voter registration but left room for the state to sue again to seek a different result).

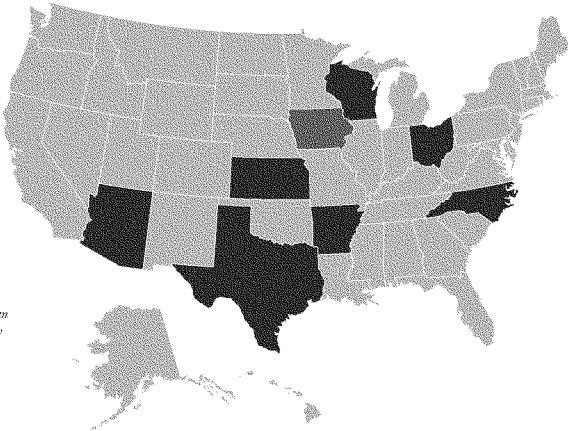

Over the past few years voters have won decisively in Pennsylvania on voter ID; in Florida on voter registration restrictions, early voting cutbacks, and a voter purge; in Ohio on early voting cutbacks and provisional ballot counting; and in a few cases challenging ballot measure language.

Voters received favorable decisions in ongoing lawsuits in Wisconsin and Arkansas on voter ID and Iowa on voter purges. Voters also won a lawsuit challenging Texas's voter ID law that is now being [re-litigated](#) under a different provision of law after the Supreme Court gutted a key provision of the Voting Rights Act.

Voters have also experienced losses — in Tennessee on voter ID, in Texas on voter registration drive restrictions, and in South Carolina on voter ID (though during the course of the litigation, the state interpreted the law in a way that was much less restrictive). All of those laws are in place this year.

### MAJOR VOTING LITIGATION THAT COULD IMPACT 2014

*Click on map for interactive version. Note: An Iowa suit, reflected in light blue, involves an administrative action, not a law passed by the legislature.*

21. Arizona, Florida, Missouri, Ohio, Pennsylvania, Texas, and Wisconsin.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

### Improving Voting Access

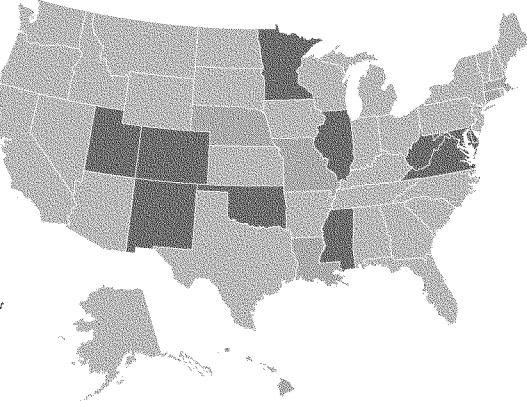

There has also been some positive momentum to improve voting. After long lines marred the 2012 election, dozens of states introduced legislation in 2013 and 2014 to improve access to the polls. Overall, laws to improve the voting process passed in 16 states, and are set to be in effect in 11 states this November.<sup>22</sup> Five of these states also passed voting restrictions.<sup>23</sup>

What do these laws look like?

- **Voter Registration Modernization:** A total of 11 states passed laws to modernize the voter registration system and make it easier for eligible citizens to sign up.<sup>24</sup> (A number of states, like New York, implemented reforms administratively and are not reflected here.) Research shows these upgrades can increase registration rates, efficiency, and accuracy, save money, and curb the potential for fraud.
  - Seven states passed laws creating or upgrading online registration systems.<sup>25</sup>
  - Five states added same-day registration options.<sup>26</sup>
  - Two states passed laws requiring motor vehicle offices to transfer voter registrations electronically to local election offices.<sup>27</sup>
- **Pre-Registration:** Three states passed laws allowing 16- and 17-year-olds to pre-register to vote before turning 18.<sup>28</sup>
- **Restoring Voting Rights to People with Past Convictions:** Delaware passed a constitutional amendment expanding opportunities for people with criminal convictions to regain their right to vote.
- **Easing Voter ID Burdens:** Oklahoma passed a law making its existing photo ID law less restrictive.
- **Access to Ballots:** Colorado expanded access for voters who speak a language other than English. Mississippi and Oklahoma also expanded access to absentee ballots.

### STATES THAT EXPANDED VOTING IN 2013 AND 2014

*Click on map for interactive version. Note: Laws in Hawaii, Louisiana, Massachusetts, and Nebraska will not be in effect in 2014. Missouri and Connecticut voters will consider ballot measures this year to add early voting. These states are shown in light green.*

22. Laws in Colorado, Delaware, Illinois, Maryland, Minnesota, Mississippi, New Mexico, Oklahoma, Utah, Virginia, and West Virginia are slated to be in effect in 2014. Measures in Hawaii, Louisiana, Massachusetts, and Nebraska will be in effect at a later date. Missouri voters will consider a ballot measure this November. Connecticut citizens will also vote on an early voting ballot measure this year, but that bill passed prior to 2013 and is not included in this count. For a detailed description of each state's laws, see our [interactive map](#) or [this list](#).

23. Illinois, Nebraska, Mississippi, Virginia, and West Virginia.

24. Colorado, Hawaii, Illinois, Maryland, Massachusetts, Minnesota, Nebraska, New Mexico, Utah, Virginia, and West Virginia.

25. Illinois, Massachusetts, Minnesota, Nebraska, Utah, Virginia, and West Virginia.

26. Colorado, Hawaii, Illinois, Maryland, and Utah. Both Illinois and Utah are pilot programs.

27. Nebraska and New Mexico.

28. Illinois, Maryland, and Massachusetts. Illinois's bill is a pilot program for 2014 only.

29. Colorado, Louisiana, and Massachusetts.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

There was also movement on the national level. The bipartisan Presidential Commission on Election Administration released a widely-praised [set of recommendations](#) to fix many of the problems persistently plaguing the voting system. These ideas included modernizing voter registration and increasing early voting opportunities. A few states — Hawaii, Illinois, Nebraska,

Massachusetts, and Minnesota — adopted some of these reforms in 2014. And in Congress, Republicans and Democrats introduced a bill to [strengthen the Voting Rights Act](#). Unfortunately, that measure [appears stalled](#). Democrats in Congress also introduced a [host of bills](#) to modernize the voting system, reduce long lines, and increase access to the polls.

## The State of Voting 2018

by Wendy Weiser and Max Feldman

### Introduction

This fall, voters will head to the polls for the first time since our presidential election was decided by a margin of just 80,000 votes across three states. Clearly, every vote counts.

Nevertheless, on November 6, voters will face serious challenges to making their voices heard at the ballot box. These obstacles include voter ID laws and curbs on early voting. Extremely gerrymandered electoral maps and unresolved concerns regarding foreign interference in our elections also undermine the free and fair vote that is essential to our democracy.

As in previous election years, the Brennan Center has been tracking not just the laws but the political forces that may impact this year's midterms.

In 2018, voters in at least eight states will face more stringent voting laws than they did in the last federal election. These restrictions are a continuation of a trend, beginning in 2011, of states passing laws making it harder to vote. Overall, voters in 23 states will face tougher restrictions than they did in 2010. Lawsuits and legal campaigns have in some cases mitigated a number of the most pernicious new laws, and future court decisions could still impact the voting landscape before November. Regardless, *more* voters in *more* states will face unnecessary hurdles to casting a ballot this fall.

Restrictive laws, however, are not the only challenges to the vote.

The electoral landscape is still highly skewed by gerrymandering. Earlier in the decade, partisan legislatures drew extremely gerrymandered legislative maps, using modern data and technology to manipulate electoral lines for political advantage. The resulting maps have tilted electoral outcomes, producing dramatic incongruities between what voters want and what they get out of their elections and making it difficult to hold representatives accountable. Despite recent legal victories against political and racial gerrymanders, most of those flawed maps will still be in place in November.

In addition, nearly three-quarters of Americans are worried about foreign interference in our elections — worries that could create a crisis of legitimacy. The story is by now well-known: Agents connected to the Russian government targeted election systems in 18 states in 2016, and the threat hasn't dissipated. State actors and even rogue hackers continue to have our election systems in their sights.

Still, there is reason for optimism. Voters and their allies have taken to the courts to throw out unfair laws. Lawsuits challenging skewed legislative maps have recently resulted in a wave of victories, and for the first time in decades, the Supreme Court is set to rule in a case that could put real limits on partisan gerrymandering. Lawmakers and government officials are waking up to the fact that our election systems are vulnerable and that they can and *must* be repaired.

The electoral pressure-cooker has spurred many Americans to action. This November, citizens will be able to vote on ballot measures to end partisan gerrymandering in Michigan, to end lifetime felony disenfranchisement in Florida, and to adopt automatic voter registration in Nevada. Even amid the highly partisan battle over the franchise, bills to expand voting have been moving through state legislatures with broad bipartisan support — far more than bills to restrict access. We are at an inflection point.

In this piece we take stock of the state of voting in 2018, plotting where we are in the fight over voting rights and fair maps and evaluating and offering context for key issues that will affect not only the November election but also our democracy going forward. The most significant takeaways are:

- This is the first election where there is widespread awareness of the risk of foreign hacking of our election systems. In 2016, Russian agents manipulated our electoral process and attempted to interfere with our voting systems. While there is no evidence that they succeeded in tampering with our systems, the threat is significant going into 2018. There is a race to spur states to upgrade the security of their systems, but millions of Americans will vote this November using vulnerable voting systems.
- Many voters' voices will be unfairly muted this November because numerous jurisdictions, several of which are critical to the control of Congress and statehouses, are extremely gerrymandered. The Supreme Court could soon find that these districts are not only unfair but also unconstitutional. A decision striking down extreme partisan gerrymandering would be a win for voters in the longer term, but it will change little for voters this November.
- The decade-long battle over restrictions to the franchise continues, with neither side yielding significant ground. But more than a dozen lawsuits challenging these restrictions are ongoing. This fight will likely remain at an impasse — with states implementing restrictions, courts blocking some of them in whole or in part, and states responding with new restrictions — until there is a more definitive consensus in the courts.
- There is new public energy for positive change in voting. This is the first election where many voters will benefit from automatic voter registration: Seven states and the District of Columbia will have AVR in place by November. (Only Oregonians were able

to take advantage of AVR in a significant way prior to the 2016 election.) In addition, a broad swath of states will have significant voting referendums on the ballot this November, many put there by citizens themselves.

### Election Security

In the lead-up to the 2016 election, Russia launched an unprecedented attack on our election infrastructure. According to the recent [report](#) issued by the Senate Select Committee on Intelligence, Russian agents targeted election systems in 18 states, conducted malicious access attempts on voting-related websites in at least six states, and gained access to voter registration databases in a small number of states. While there is no evidence that the attempt to tamper with our voting systems was successful (unlike the attempt to manipulate the election discourse), the incident laid bare the serious security vulnerabilities of our nation's voting machines and voter registration databases. Intelligence officials [unanimously conclude](#) that Russia and other hostile foreign powers will continue to try to interfere in American elections, using what they have learned to hone more sophisticated and effective techniques.

Since 2016, states and the federal government have taken some important steps to increase election system security. But unfortunately, very little progress has been made in two critical areas: (1) few states or localities have replaced the voting machines most vulnerable to hacking; and (2) few states have mandated manual post-election audits, which use the paper records of votes to check voting machine software totals, thereby enabling officials to discover and recover from cyberattacks. In addition, while we have not fully assessed how many states have upgraded their voter registration systems since last year, progress on that front appears insufficient as well. As a result, we are approaching the 2018 elections with many voting systems vulnerable to attack.

Here is the current overview of the largest threats related to voting machines:

- [Thirteen states](#) still use paperless Direct Recording Electronic (DRE) voting machines — which do not provide a record that can be reliably audited after an election — as their primary voting equipment in some or all polling places. (Those states are Arkansas, Delaware, Georgia, Indiana, Kansas, Kentucky, Louisiana, Mississippi, New Jersey, Pennsylvania, South Carolina, Tennessee, and Texas.) Five of those states use paperless DREs statewide, while eight use them in at least some of their counties.

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

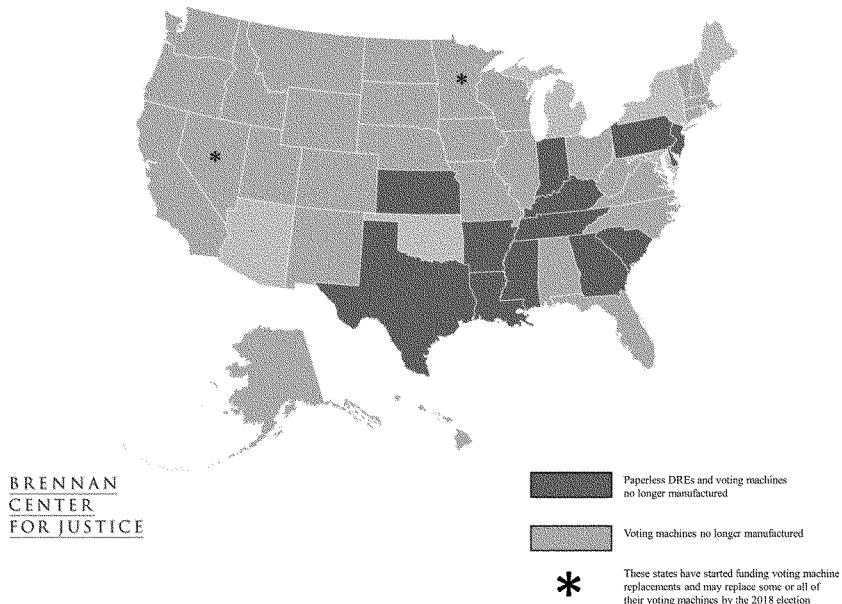

- Forty-three states will be using voting machines that are no longer manufactured. Officials in 33 states say they must replace their machines by 2020. In most cases, elections officials do not yet have adequate funds to do so.
- Only one state — Colorado — will mandate “risk-limiting” audits, which are post-election audits designed to provide a high level of statistical confidence that a software hack or bug could not have produced the wrong outcome.

A number of states that are likely to have closely watched competitive midterm elections have vulnerable voting systems. Of the states that are likely to have a competitive House, Senate or gubernatorial election, according to

Cook Political Report, or a contest for control of the state legislature, according to Ballotpedia:

- Six with House, Senate, or gubernatorial toss-up races or close races for state legislative control still use paperless DREs (Delaware, Indiana, New Jersey, Pennsylvania, Tennessee, Texas), as do three with somewhat less competitive races (Georgia, Kansas, Kentucky); and
- Three states with toss-up races have voter-verifiable paper trails but do not mandate *any* post-election audit, risk-limiting or otherwise (Maine, Michigan, and North Dakota), as do two states with somewhat less competitive races (Nebraska and New Hampshire).

### States with Vulnerable Voting Systems

Voter registration systems are also still at risk:

- As of June 2017, 41 states were still using voter registration databases that were initially created a decade ago or longer. These outdated systems were not designed to withstand current cybersecurity threats. A number of those states have since taken steps to upgrade their registration systems. While we have not yet assessed the full extent of progress, Michigan and New Jersey expect to complete upgrades before November's election, Virginia is completing the first phase of a three-year upgrade plan, and North Carolina and Washington have at least started an upgrade process. Additional states may soon join this list, using new federal funds to bolster registration list security before November. In Minnesota, however, Gov. Mark Dayton vetoed the budget bill that was needed to authorize the secretary of state to use new federal funds for this purpose, even though the secretary said that it was the state election system's highest security need.

Unless significant steps are taken to bolster the security of our election infrastructure over the remaining months, there is a serious risk of additional successful attacks that will erode the public's confidence in the legitimacy of our elections. Attacks by cybercriminals or nation states could take down election websites with important information — including polling location information, voter registration status, and unofficial election results — or even potentially change the software-generated vote totals on individual voting machines. Worse, existing vulnerabilities leave open the possibility that control of our federal government could be determined by voting machines that are hackable and provide no auditable paper trail. While unlikely, this scenario is certainly possible. Virginia narrowly avoided this nightmare in 2017 when control of the state House was determined after a recount of paper ballots in a city that had decertified its paperless DREs right before the election.

#### Progress So Far

Although there has not been sufficient movement to upgrade our nation's voting equipment in advance of the 2018 elections, there has been some progress in addressing election security issues. Specifically:

- At the federal level, Congress recently appropriated \$380 million to help states upgrade their voting systems — the first significant step at the federal level on election security and the most significant investment in election security since 2002. Unfortunately, this money came too late for states to be able

to use the money to upgrade systems by the 2018 elections. In addition, two major pieces of bipartisan legislation were introduced in Congress to ensure vital election security reforms: the Senate's Secure Elections Act (S. 2261), co-sponsored by Sens. James Lankford (R-Okla.) and Amy Klobuchar (D-Minn.), and the House's bipartisan PAPER Act (H.R. 3751), co-sponsored by Reps. Mark Meadows (R-N.C.) and James Langevin (D-R.I.). While these bills are critically important, their passage at this point would not impact election security in 2018.

- The U.S. Election Assistance Commission (EAC) and the Belfer Center at Harvard University have provided cybersecurity training to hundreds of state and local election officials, while the Department of Homeland Security, the EAC, and state and local officials have established a coordinating council to allow them to share threat information and pool security resources.
- At the state level, since the 2016 election, only Virginia has stopped using its paperless DREs. In Pennsylvania — a critical battleground state — Gov. Thomas Wolf has ordered all counties to select new voting systems by the end of 2019, but this order obviously will not halt the use of paperless DREs in time for the 2018 elections. Only four states have enacted laws improving their post-election audit systems since 2016. No states have taken significant action to upgrade their outdated voter registration systems. Legislation to improve election security was introduced in at least 26 states, but most of those bills did not advance during this legislative cycle.

#### What Can Be Done Before November?

Although the 2018 elections will almost certainly move forward with aging, vulnerable voting equipment, it is not too late to significantly reduce election security risks. Here is what needs to happen between now and November to bolster election security:

- While unlikely, it is still possible for enterprising states to replace their antiquated voting machines with new, auditable voting systems before November. In 2017, Virginia decertified and replaced its DRE machines only two months before its statewide elections. There is a chance that this could happen in New Jersey, too: New Jersey lawmakers recently introduced a bill that would halt the use of DREs in certain counties this November. States that do not replace paperless DREs before November should still move expeditiously this year so that

they can upgrade their voting equipment before the 2020 elections.

- States that do not replace paperless DREs should take several basic steps to secure their voting machines for 2018, including adding strong passwords and two-factor password authentication, engaging in rigorous systems testing, ensuring that all PC and server operating systems and software have the latest security patches, and providing cybersecurity training. Similar defenses are needed for voter registration systems.
- Where possible, states should implement effective post-election audits. Legislatures can still mandate such audits, and in many states, elections administrators have the authority to audit vote tallies after an election even if they are not required to do so by state law. They should do so.
- State elections officials should engage in detailed contingency planning in case of a system breach or failure, including preparing backup paper ballots and paper voter registration lists.

At this point, there is reason for optimism that many states will, in fact, take at least some of these interim steps to secure their voting systems. At least 17 states have formally requested that the Department of Homeland Security (DHS) conduct risk assessments of their election systems. In each state, DHS should be able to identify cybersecurity risks and best practices for securing election systems ahead of this November's election. In the coming months, many more states plan to request this DHS review or will use private vendors to do so. These assessments will almost certainly result in the application of additional security patches and the revamping of contingency plans. In addition, election officials in several counties and states are working with outside experts to develop new post-election audit protocols.

#### Restrictive Voting Laws

Over the past decade, states enacted a wave of laws restricting access to voting. This fall, voters in at least eight states will face more stringent voting laws than they did in the last federal election cycle in 2016. Voters in 23 states will face tougher restrictions than they did in 2010. The most common restrictions involve voter ID laws, but they also include additional burdens on registration, cutbacks to early voting and absentee voting, and reduced voting access for people with past criminal convictions. If these laws remain in effect, they have the potential to make it harder for millions of Americans to vote. Even with an expected wave of enthusiasm this November, a growing body of research

shows these laws reduce participation, particularly among communities of color, low-income voters, young people, older citizens, and people with disabilities.

These laws are part of a broader trend: Following the 2010 wave election, there were two shifts that continued to distort our electoral system. First, as discussed at length below, state legislatures drew extremely gerrymandered maps following the 2010 Census. Second, states started to enact a series of laws that made it markedly more difficult for some of their citizens to register and vote. Lawsuits and legal campaigns helped block or mitigate most of the harshest new restrictions prior to the 2012 election. But the Supreme Court's 2013 *Shelby County v. Holder* ruling, which neutered the strongest legal protection against voting discrimination, changed the landscape. A flood of new barriers to voting that would have otherwise been blocked were implemented at once, and newly unfettered legislatures were incentivized to press forward with additional restrictions. The new laws were again met with legal challenges, and voters experienced a seesaw effect as new voting rules were imposed, blocked by courts, and then reinstated in modified form, only to be challenged again. Throughout, thousands upon thousands of would-be voters were thwarted at the ballot box over the course of multiple elections.

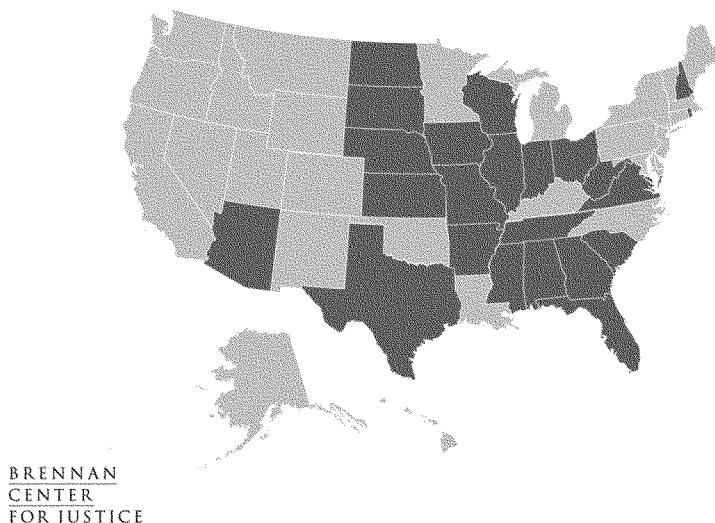

Here is where things stand now:

#### Changes in Voting Restrictions Since 2016

Since 2016, at least eight states have enacted new voting restrictions. Four of those states — Arkansas, Iowa, Missouri, and North Dakota — enacted new voter ID laws (but as noted below, a court has partially halted the North Dakota law for now). Texas also passed a new voter ID law, though its earlier strict voter ID law was partially in effect in 2016. Georgia, Indiana, Iowa, and New Hampshire imposed new burdens on voter registration. And Iowa cut back on early and absentee voting. In addition to these new laws, there have also been new lawsuits that may impact which restrictive voting laws are in effect in 2018. These are discussed in the next section, below.

Looking ahead, it is not clear whether state legislatures will continue their almost decade-long trend of passing restrictive voting laws, at least in the face of a steady stream of courtroom wins for voting rights. Indeed, this year, states have not enacted any significant new voting restrictions — at least not yet. That could change if legislators sense that courts are growing less vigilant in protecting voting rights.

## Restrictive Voting Laws Since 2011

### Overview of Restrictive Laws Since 2011

Going into the 2018 elections, voters in 23 states — nearly half the country — will face additional restrictions on voting as compared to 2010, the year before state legislative efforts to cut back on voting access first mushroomed. These 23 states are in red on the map above.

Strict voter ID requirements are the most common type of new restriction. Overall, 13 states have harsher voter ID laws than they did in 2010, and 15 states have toughened their laws since 2006. Before 2006, no state had a strict photo ID requirement in effect.

### List of New Voting Restrictions

Below is the complete list of new voting restrictions since 2010, taking into account changes as a result of successful lawsuits, ballot initiatives, and legislative efforts. An asterisk (\*) denotes a voting requirement that will be in place for the first time in a federal election this November.

### Potential Impact

If these laws remain in effect, they will make it harder for millions of Americans to vote. The cumulative effect of a decade of voting restrictions could be substantial, but their depressive effect may be masked this November by a spike in electoral enthusiasm and new candidates bringing voters to the polls. Still, the new laws will likely thwart many.

As stated above, a growing body of research, although still nascent, finds that voting restrictions reduce participation, especially among communities of color, low-income voters, youth, older voters, and voters with disabilities. In 2016, for instance, Wisconsin's voter ID law disenfranchised about 17,000 registered voters, according to one study. Overall, roughly 300,000 eligible Wisconsinites lacked IDs that could be used for voting that year, according to a federal court's findings. Another analysis found that local cutbacks to early voting in North Carolina depressed African-American turnout in 2016 even though a federal court had blocked statewide cutbacks as discriminatory. The U.S. Government Accountability Office

BRENNAN CENTER FOR JUSTICE  
APPENDIX A

State	Voting Restrictions
Alabama	<ul style="list-style-type: none"> <li>Strict voter ID requirement (2011 law)</li> <li>Documentary proof of citizenship (2011 law; not yet implemented)</li> </ul>
Arizona	<ul style="list-style-type: none"> <li>Documentary proof of citizenship to register (2004 ballot initiative; currently blocked for registrations using federal form)</li> <li>Polling place consolidation (2016 law)</li> <li>Limitations on mail-in ballot collection (2016 law)</li> </ul>
Arkansas	<ul style="list-style-type: none"> <li>Voter ID requirement (2017 law) *</li> </ul>
Florida	<ul style="list-style-type: none"> <li>Reduced early voting period (2011 law, mitigated by 2012 court ruling and by subsequent 2013 statute restoring some early voting days)</li> <li>Curbed voter registration drives (2011 law, mitigated by court decisions)</li> <li>Reduced access to rights restoration for those with past criminal convictions (2011 gubernatorial action)</li> </ul>
Georgia	<ul style="list-style-type: none"> <li>"No match, no vote" limit on access to voter registration (2017 law) *</li> <li>Reduced early voting period (2010 law)</li> <li>Documentary proof of citizenship to register (2009 law)</li> <li>Strict voter ID requirement (2006 law)</li> </ul>
Illinois	<ul style="list-style-type: none"> <li>Curbed voter registration drives (2011 law)</li> </ul>
Indiana	<ul style="list-style-type: none"> <li>Aggressive voter purge requirements (2017 law) *</li> <li>Documentary proof of citizenship for certain individuals (2013 law)</li> <li>Strict voter ID requirement (2006 law)</li> </ul>
Iowa	<ul style="list-style-type: none"> <li>Voter ID requirement (2017 law; will be partially implemented in 2018) *</li> <li>Restrictions on voter registration drives (2017 law) *</li> <li>Limited access to election-day registration (2017 law) *</li> <li>Limited early and absentee voting (2017 law) *</li> <li>Stricter voting rights restoration policy for the formerly incarcerated (2011 reversed executive action)</li> </ul>
Kansas	<ul style="list-style-type: none"> <li>Strict voter ID requirement (2011 law)</li> <li>Documentary proof of citizenship (2011 law; currently blocked for registrations at motor vehicle offices and those using federal voter registration forms)</li> </ul>
Mississippi	<ul style="list-style-type: none"> <li>Strict voter ID requirement (2011 ballot initiative)</li> </ul>
Missouri	<ul style="list-style-type: none"> <li>Voter ID requirement (2016 law and ballot initiative) *</li> </ul>
Nebraska	<ul style="list-style-type: none"> <li>Reduced early voting period (2013 law)</li> </ul>
New Hampshire	<ul style="list-style-type: none"> <li>Restricted student voting and registration (2017 law) *</li> <li>Voter ID requested, but not required (2017 law)</li> </ul>
North Dakota	<ul style="list-style-type: none"> <li>Voter ID requirement (2017 law, partially halted by court, and less restrictive than earlier law struck down by court) *</li> </ul>
Ohio	<ul style="list-style-type: none"> <li>Reduced early voting period and abolished same-day registration period (2014 law)</li> <li>Restricted absentee and provisional ballot rules (2014 law)</li> </ul>
Rhode Island	<ul style="list-style-type: none"> <li>Voter ID requirement (2011 law)</li> </ul>
South Carolina	<ul style="list-style-type: none"> <li>Voter ID requirement (2011 law, mitigated after lawsuit)</li> </ul>
South Dakota	<ul style="list-style-type: none"> <li>Stricter voting rights restoration policy for the formerly incarcerated (2012 law)</li> </ul>
Tennessee	<ul style="list-style-type: none"> <li>Strict voter ID requirement (2011 law)</li> <li>Reduced early voting period (2011 law)</li> <li>Proof of citizenship required for certain individuals (2011 law)</li> </ul>
Texas	<ul style="list-style-type: none"> <li>Voter ID requirement (2017 law, which is less restrictive than 2011 law struck down by court but more restrictive than the temporary ID requirement in place in 2016) *</li> <li>Curbed voter registration drives (2011 law)</li> </ul>
Virginia	<ul style="list-style-type: none"> <li>Strict voter ID requirement (2012 law)</li> <li>Restricted third-party voter registration (2012 law)</li> </ul>
West Virginia	<ul style="list-style-type: none"> <li>Reduced early voting period (2011 law)</li> </ul>
Wisconsin	<ul style="list-style-type: none"> <li>Voter ID requirement (2012 law, implemented for the first time in 2016)</li> <li>Added longer residency requirement before a person could register to vote (2012)</li> </ul>

found that new voter ID laws depressed turnout by about 2 to 3 percent in Kansas and Tennessee in 2012.

The impact of new laws will likely be especially pronounced in states with highly competitive elections. Missouri, for example, enacted a voter ID law last year and soon will hold a closely watched U.S. Senate election. A court rejected a challenge to the measure earlier this year, and absent a victory on appeal, the law will be in place this November. North Dakota will also hold a very competitive Senate election with a new voter ID law. A court has temporarily blocked part of that law, but its order has been appealed. Indiana will hold a very competitive Senate election, and unless a court strikes down the state's new aggressive voter purge law, many eligible voters could show up to the polls to vote only to find that they have been mistakenly removed from the rolls. And Iowa will administer a broad new set of voter restrictions in November, coinciding with a highly competitive election for U.S. Congress.

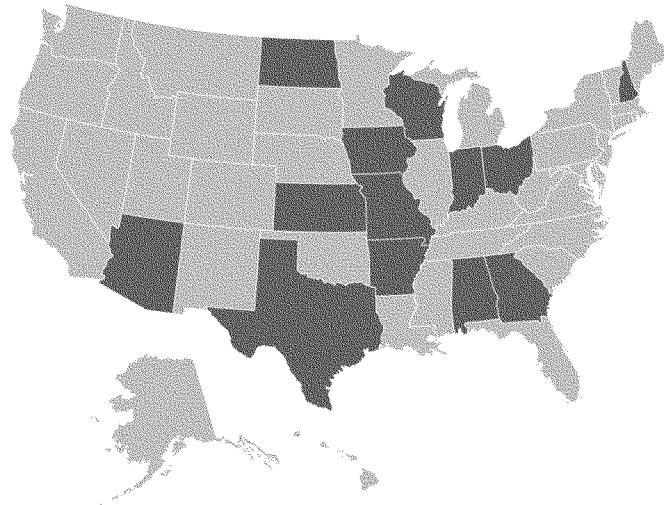

Voting problems will likely be compounded because many of the restrictions will be in place for the first time this

November. Overall, voters in eight states will face more onerous voting hurdles for the first time this year. Major changes to voting rules often cause voter confusion and errors by poll workers and election officials when they are first implemented, exacerbating their negative effect.

#### What Can Be Done Before November?

The most effective way to prevent a restrictive voting law from marring an election is to obtain a judicial order stopping it from going into effect. As discussed in the next section, courts in a number of states could issue decisions in pending lawsuits that could impact voting in November. Additional cases may be filed. Where voting restrictions cannot be limited or eliminated by courts, voter education and mobilization are a necessary line of defense to ameliorate the disenfranchising effects of these laws. Voters must be made aware of new voting requirements, election officials must be trained to implement the restrictions fairly and lawfully, and state and non-state actors should assist eligible voters in overcoming the restrictions on or before election day.

### Ongoing Litigation Against Voting Restrictions

### Litigation That Could Impact Voting Access

Over the past few years, the voting rights landscape has been shaped by both victories and losses in cases challenging new voting barriers. Particularly since 2013, when the Supreme Court's *Shelby County v. Holder* decision effectively eliminated the U.S. Department of Justice's oversight of state voting regulations, the courts have been the primary venue for reversing or limiting the effects of burdensome and discriminatory voting laws. This year, the courts continue to play a critical role in shaping Americans' access to the franchise.

### Ongoing Litigation Against Voting Restrictions

Major litigation against restrictive voting laws is currently ongoing in at least 13 states (pictured in blue on the map above), and other lawsuits against state election administration practices could impact voting as well. There are active cases challenging voter ID laws in Alabama, Arkansas, Iowa, Missouri, North Dakota, Texas, and Wisconsin; voter registration restrictions in Alabama, Arizona, Georgia, Kansas, and New Hampshire; early voting restrictions in Wisconsin; and voter purge practices in Indiana and Ohio. The most common claims are that new laws are discriminatory, in violation of the federal Voting Rights Act or the Constitution; that they impermissibly burden the right to vote in violation of the federal or state constitutions; and that they violate voter protections under the National Voter Registration Act. The fate of these laws could substantially affect the voting landscape and the composition of the electorate in 2018.

Here are some key cases to watch:

- **U.S. Supreme Court/Ohio:** A case challenging Ohio's voter list maintenance practices awaits decision by the U.S. Supreme Court. Specifically, Ohio is using a voter's failure to vote over a two-year period, by itself, as a basis to start a process of removing that voter from the rolls. The plaintiffs argue that this practice, which has resulted in thousands of eligible voters being removed from the rolls, violates the National Voter Registration Act of 1993. While the case's outcome could impact how states conduct voter purges and whether there are sufficient protections against improper purges, the legal issues involved are distinct and will not directly impact the vast majority of legal challenges to new voting laws.
- **Alabama:** The federal Court of Appeals for the Eleventh Circuit expedited an appeal from a decision rejecting a challenge to Alabama's voter ID law and has tentatively scheduled oral argument for the end of July.
- **Arizona:** Plaintiffs are challenging the state's "dual registration" system, which it put in place following a Supreme Court decision that prevented it from requiring documentary proof of citizenship in connection with the federal voter registration form. The system requires documentary proof of citizenship in order to vote in state elections.
- **Arkansas:** A state trial court issued an order halting enforcement of the state's voter ID law. But the state Supreme Court stopped the trial court's order from going into effect for the May 22 primary election, even though the high court had struck down a previous iteration of the voter ID law as inconsistent with the state Constitution. Unless the state Supreme Court upholds the trial court's order on appeal, Arkansas voters will face a photo ID requirement for the first time in a federal election this November. In addition, perhaps to hedge its bets, the Arkansas Legislature has put a ballot initiative amending the state Constitution to require voter ID on the November ballot.
- **Indiana:** A federal court will likely soon issue a decision on whether to freeze a new state purge program. Under a new Indiana law, election officials must purge voters from the rolls if their records are flagged by the controversial "Crosscheck" data repository. A recent study estimated that up to 99.5 percent of Crosscheck flags for double-voting in a sample of 800,000 were inaccurate. While the state has agreed to hold off on these purges before July 1, if the law is not blocked before then, a major purge of the voter rolls could occur prior to this year's election.
- **Iowa:** Voter groups filed a lawsuit on May 30 challenging the state's new restrictive voting law, including its voter ID, absentee ballot counting, and early voting provisions.
- **Kansas:** There are at least two court cases challenging the state's documentary proof of citizenship requirement for voting awaiting decision. A federal district court in Kansas held a trial in March on the state's requirement that individuals registering at the department of motor vehicles must present proof of citizenship. And a federal court in the District of

A decision may be issued before the election. Unless the appellate court reverses the district court's decision before the election, Alabamans will be required to show photo ID to vote again this November. In 2014, Alabama's Secretary of State estimated that roughly 280,000 Alabama voters lacked the requisite ID, according to the plaintiffs' [complaint](#) in this case.

### 9 | BRENNAN CENTER FOR JUSTICE

Columbia heard arguments before the 2016 election in a case challenging the decision by a federal agency to apply Kansas's documentary proof of citizenship requirement to applicants using the federal voter registration form. (This case also applies to **Alabama** and **Georgia** applicants.) In both cases, the courts have temporarily blocked the state's requirements as applied to relevant applicants. If either court reverses course before November, it could have a major impact: When the proof of citizenship requirement was in place from 2013 through 2015, it prevented more than 35,000 Kansans from registering.

- In **Missouri**, a trial court dismissed a challenge to the state's new voter ID law, but that decision has been appealed, and a decision in the appeal is expected prior to the election.
- In **New Hampshire**, there is a bench trial on a restrictive voter registration law scheduled for August. If that schedule holds (and there is currently some jockeying over whether the judge in the case will recuse himself), then a decision could be issued before November. Critics claim that the law was designed to prevent students from voting in a state where the 2016 Senate election was decided by roughly 1,000 votes.
- In **North Dakota**, a federal district court has issued an order temporarily halting the state from enforcing parts of its voter ID law that could disenfranchise significant numbers of Native Americans. The state has appealed that decision and is seeking a stay of the district court's order, pending resolution of the appeal. If the order is reversed, thousands of Native Americans could be disenfranchised, according to the court.
- **Texas:** The Fifth Circuit Court of Appeals recently issued a decision permitting Texas's new photo ID law to go into effect. Texas has been applying that law since the beginning of the year, and even if there is a further appeal of the Fifth Circuit's decision, the law will likely govern this November's elections.
- **Wisconsin:** The Seventh Circuit Court of Appeals heard oral argument well over a year ago in two challenges to various aspects of Wisconsin's election law, including voter ID and early voting restrictions enacted earlier this decade. The court is likely to decide these appeals before November. (For context, the appeals were noticed nearly two years ago — the median time from the filing of a notice of appeal to a decision in the Seventh Circuit is about eight months.) Most of the restrictions have been temporarily halted by a court order, although the voter ID law is largely in place.

Groups have also challenged administrative decisions that disenfranchise voters. Earlier this year, a district court judge in Florida struck down the state's cumbersome process of restoring voting rights to individuals convicted of felonies, although that decision is on appeal. In May, a lawsuit was filed challenging Florida's decision to block state university campuses from hosting early voting sites.

With some notable exceptions, voters have fared reasonably well in lawsuits challenging the most onerous new voting laws over the past decade. A litigation scorecard, tracking the outcomes of the decade's major cases against voting restrictions, is included in the appendix.

#### **Look Ahead: The U.S. Supreme Court**

Looking ahead, the Supreme Court is poised to take up a major voting rights case. The Court's last effort to consider the legality of a state voting restriction — a decade ago in *Crawford v. Marion County Election Board* — left key questions unresolved. The issue of discrimination was raised in the case, and so the Court did not clarify the contours of laws protecting against voting discrimination. Nor did the Court definitively address the scope of constitutional protections for voting. When the Court does take up a new voting case, it will likely determine the strength of voting rights protections for years to come.

Over the past few years, the Court has sent strong signals that it is inclined to take up such a case. It took the unusual step of weighing in on orders from two separate lower courts (involving challenges to North Carolina's major voting restriction law and Wisconsin's voter ID law) — something the Court typically does only if there is a "reasonable probability" it will take the case. And while the Court ultimately refused to hear both cases (twice in the North Carolina case), Chief Justice Roberts took the unusual step of issuing a special statement explaining that the Court's refusal to hear the North Carolina case did not reflect an opinion on the merits of the case.

A number of major cases that appeared to be barreling toward the high court over the past two years did not or have not yet reached it. In Texas, a challenge to the state's voter ID law appeared to be first in line for Supreme Court review, but the state Legislature amended the law in 2017, changing the course of the litigation against the state's original law. (The Brennan Center represents a group of plaintiffs in the Texas case.) A widely watched challenge to a package of North Carolina voting restrictions also appeared to be teed up for Supreme Court review, but the Court denied review, after a newly elected governor tried to withdraw the state's petition seeking review. In addition, challenges to a set of restrictions

passed in Wisconsin were also expected to be in the mix for Supreme Court review, but the federal court of appeals has not yet issued a decision that the Court could review.

The only case the Court took up this year is the case challenging Ohio's voter list maintenance practices, discussed above. While the case could impact state practices for purging voter rolls, it will not address the main legal questions at issue in typical cases against new voting restrictions. We will likely know by the end of the year whether next year's docket will include a blockbuster voting case.

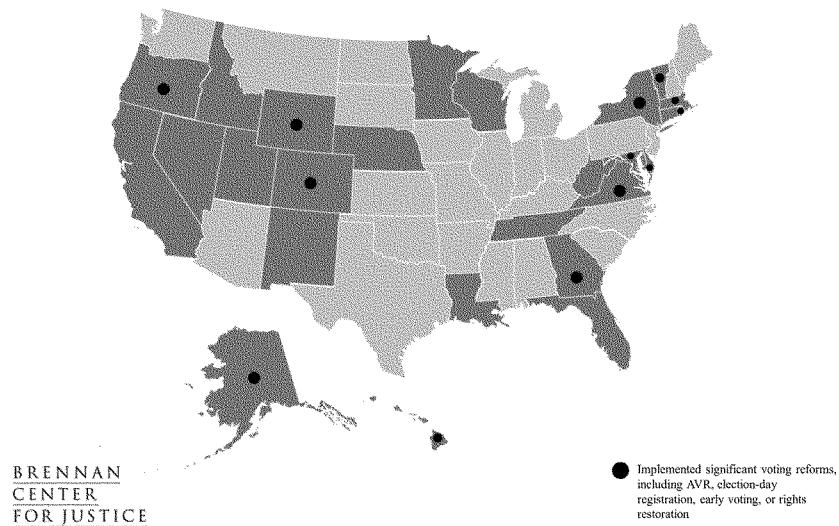

#### Expansive Voting Laws

While many states have moved to restrict their citizens' access to the ballot in the past decade, others have expanded access to their voting process. These recent pro-voter victories form an important part of the overall voting landscape going into 2018. Most significantly, new automatic voter registration (AVR) systems will be in place in seven states and the District of Columbia this year, five of them for the first time.

#### New Laws in Place

- This year, five states — Alaska, California, Colorado, Rhode Island, and Vermont — and the District of Columbia will have [automatic voter registration](#) (AVR) in place for the first time in the lead-up to a federal election. In total, seven states and the District of Columbia will have up-and-running AVR systems prior to the 2018 elections, including Georgia and Oregon, which implemented AVR in advance of the 2016 elections. (Two additional states are scheduled to, but may not have, AVR in place by the 2018 elections, and three states will not implement the reform until after the election.) AVR is transformative, yet simple: When eligible citizens visit a government office, such as a state's department of motor vehicles, they are automatically registered to vote unless they decline.
- So far this year, three more states have enacted AVR laws: Maryland, New Jersey, and Washington. That brings the total number of states that

### Major Expansions to Voting Access Since 2013

have adopted AVR to 12 plus the District of Columbia.

- AVR could significantly increase the number of people who register and vote in these states this November. In [Oregon](#), which adopted AVR in 2016, the rate of new registrations at the department of motor vehicles quadrupled, and the overall registration rate jumped by nearly 10 percent after it was implemented. Many of these new registrants turned out to vote. While Oregon had no competitive statewide races, its voter turnout increased by 4 percent in 2016, which was 2.5 percentage points higher than the national average.
- AVR is a rare voting reform to have garnered broad bipartisan support. For example, West Virginia's largely Republican Legislature passed an AVR bill, and its Democratic governor signed it into law; conversely, Illinois's Democratic-majority Legislature passed AVR with unanimous support, and its Republican governor signed it into law. Alaskans passed AVR via ballot initiative with nearly 65 percent of the vote in 2016, the same year they gave Donald Trump a 15-point victory over Hillary Clinton.
- Also this year, thousands of New Yorkers who had previously lost their voting rights because of a criminal conviction could newly be eligible to vote as a result of an executive order that Gov. Andrew Cuomo issued in April, indicating he will restore voting rights to certain New Yorkers on parole. As of May 2018, approximately [24,000 New Yorkers](#) have had their voting rights restored, and there are plans to restore voting rights on a monthly basis going forward.
- In Louisiana, Gov. John Bel Edwards recently signed a law restoring voting rights to individuals on probation and parole if they have been out of prison at least 5 years. According to state officials, this reform could enfranchise roughly 2,000 citizens of Louisiana, but it will not take effect until 2019.
- Since the 2016 elections, three other states have also expanded the right to vote for the formerly incarcerated. In [Virginia](#), right before the last election, voting rights were restored with great fanfare to more than 61,000 citizens, but not until after the voter registration deadline had passed for the 2016 election. This will be the first federal election in which those citizens can vote. In Alabama, the Legislature passed clarifying legislation that had the effect of reducing the number of crimes for which citizens can be disenfranchised. And in [Nevada](#), the governor signed a law restoring voting rights to those who committed certain crimes and previously would have been permanently disenfranchised; that law will not go into effect until January 2019.
- Florida is seriously considering a significant reform that could add to that total. Its citizens, as explained below, have collected enough signatures to qualify a referendum for the ballot that would end the state's lifetime ban on voting for individuals with criminal convictions. This reform will not affect the composition of the electorate in November.
- More broadly, compared to the 2016 election, at least 16 states will have implemented significant new laws that will make it easier to register or vote this year. This count includes states that passed laws before November 2016 but did not put them into effect for the 2016 election. (Since we started tracking legislation expanding voting access in 2013, 25 states and the District of Columbia have implemented significant reforms expanding access, and four states have eased their ID requirements for voting or registration.) In addition to the AVR and rights restoration laws discussed above, these reforms include same-day and election-day registration, online voter registration, and expanded early voting opportunities. Online registration is among the most common reforms implemented in the past two years — five states implemented online registration, bringing the total number of states with [online](#) registration to 37 plus the District of Columbia (Oklahoma has enacted online registration, but does not expect to implement it until [2020](#).) This reform, which was a major innovation last decade and early into this one, is now the norm. Beyond the states that have implemented reforms, other states, like [Washington](#), have enacted pro-voter reforms that will not be in effect this year.

#### Other Voting Issues to Watch

##### Voter Roll Purges

This year, there is a heightened risk that elections officials will mistakenly remove large numbers of eligible voters from the rolls. Properly done, efforts by election officials to clean up the voter rolls by removing names that should not be there promotes election integrity and efficiency. But when done hastily or incorrectly, the resulting

"purges" can sweep in and disenfranchise large numbers of eligible voters. An upcoming Brennan Center report finds that states are now purging many more people than they did a decade ago, without marked improvements in their techniques, and with fewer legal protections for voters. There are two main dangers to watch this year.

First, watch for whether local elections officials capitulate to a threat campaign launched by private groups promoting aggressive — and reckless — removals of voters from the rolls. This past September, a group called the Public Interest Legal Foundation threatened or filed lawsuits against 248 jurisdictions, claiming their list maintenance practices were inadequate. Other groups, including the American Civil Rights Union and Judicial Watch, have similar lawsuits pending in three states. (Voter advocacy groups, including the Brennan Center, have pushed back against this effort by providing guidance to jurisdictions about how to properly comply with their list maintenance obligations under federal law and by intervening in their lawsuits.)

Second, watch for whether the U.S. Department of Justice tries to force states to remove voters from the rolls. In June 2017, the Department of Justice took the unusual step of sending letters to 44 states demanding that they provide detailed information on their list maintenance practices. Some have understood this as a possible prelude to legal action and recalls efforts undertaken by the George W. Bush administration in the mid-2000s to pressure U.S. attorneys to sue states for failing to purge their voter rolls aggressively enough.

#### **Ballot Security Operations**

There is also a risk of improper ballot security and vote suppression efforts at the polls this November. "Ballot security" is a term used to describe a set of practices by private groups, candidates, or political parties with the stated goal of preventing voter fraud. These practices include efforts to identify improperly registered voters, often using unreliable methods; efforts to formally challenge the eligibility of individual or groups of voters; and efforts to discourage voters from committing fraud. In the heated environment of political campaigns, there is a high risk that these kinds of operations will lead to voter intimidation or deception.

There is reason to worry about an increase of these types of efforts this year. This election may be the first in more than 30 years that the Republican National Committee (RNC) is not bound by a consent decree requiring it to get approval from federal court before conducting any ballot security operations. Before the consent decree effectively stopped it, the RNC was the nation's premier

organizer of these suppressive efforts. Smaller organizations have tried to mobilize ballot security efforts in recent years, but they lacked the RNC's reach and resources. If the RNC gets back into the ballot security game, we may see a revival of these vote suppression efforts at the polls. Indeed, the party's standard-bearer, President Trump, has personally championed ballot security measures. As a candidate in 2016, he encouraged vigilante monitoring of polling places, and since then he has continued to fan unfounded fears of widespread voter fraud. In addition, the Department of Justice, which is our nation's leading bulwark against voter intimidation, has signaled a broad retreat from enforcing voting rights. The consent decree is not dead yet, though — the Democratic National Committee has appealed the court's decision to dissolve it.

#### **Redistricting and Gerrymandering**

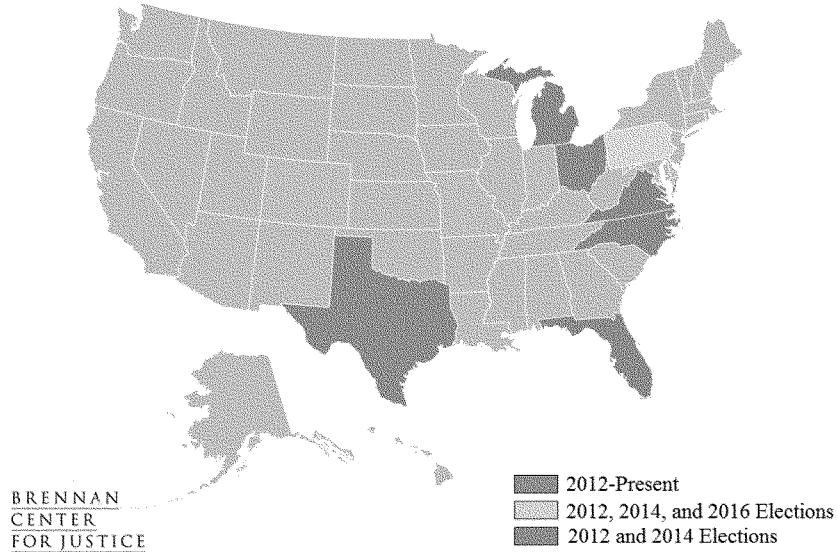

Historically, midterm elections have offered the chance for American voters to change course in the country's political path. But because of the pervasive gerrymandering that took place after the 2010 Census, the impact of the 2018 midterms could prove to be far more muted.

A Brennan Center study found that extreme partisan gerrymandering in half a dozen key states provides Republicans with an advantage of up to 16 or 17 seats in the current House of Representatives — a significant share of the 24-seat majority that Republicans held at the start of this Congress. That advantage will decrease somewhat after the 2018 midterm election because of a court-ordered redrawing of Pennsylvania's congressional map in February. But even with a new Pennsylvania map, Democrats face significant structural barriers to winning their first House majority since maps were redrawn in 2011.

According to the Brennan Center's estimates, Democrats would have to win the national popular vote by 10.6 percentage points, or benefit from extraordinary shifts in partisan enthusiasm, in order to win a majority in the next House. While some have estimated Democrats' structural disadvantage to be somewhat smaller, the consensus is that even a historically large popular vote win will yield far fewer House seats than similarly sized, or even smaller, past popular vote wins. There is a real risk that Democrats will win the national popular vote but will not win a majority of House seats — something that also happened in 2012. In other words, biased maps could be determinative in the outcome of November's elections for control of the U.S. House of Representatives, as well as of several state legislatures.

The problem of gerrymandering is not new this year; indeed, many Americans will vote this November in the

## Extremely Gerrymandered Congressional Maps

fourth election in a row under severely gerrymandered maps. This is both because the gerrymanders of this decade have been much more extreme and durable than those of the past and because in most of the country there has been no judicial or other mechanism to rein them in. That could change this summer. While there will likely be few changes to any maps before November, there are some important stories to watch over the course of the summer and fall.

### A New Map in Pennsylvania, but Not in North Carolina

- In Pennsylvania, voters will go to the polls this November using a new congressional map as the result of a [decision](#) of the Pennsylvania Supreme Court in January that found that the state's original map was a partisan gerrymander in violation of the Pennsylvania Constitution. That ruling resulted in the replacement of a map that locked in a 13-to-5 Republican advantage — in a state that is roughly evenly divided between Democrats and Republicans — with a new map drawn by a court-appointed

special master. The new map is substantially more responsive to electoral shifts, making Pennsylvania a central 2018 battleground and potentially the key to control of the House. According to a Brennan Center estimate, Democrats and Republicans each have the opportunity to win between [7 and 11](#) seats, and the respected Cook Political Report currently includes eight Pennsylvania congressional districts on its [list](#) of competitive races (the second highest number of competitive races of any state after much larger California).

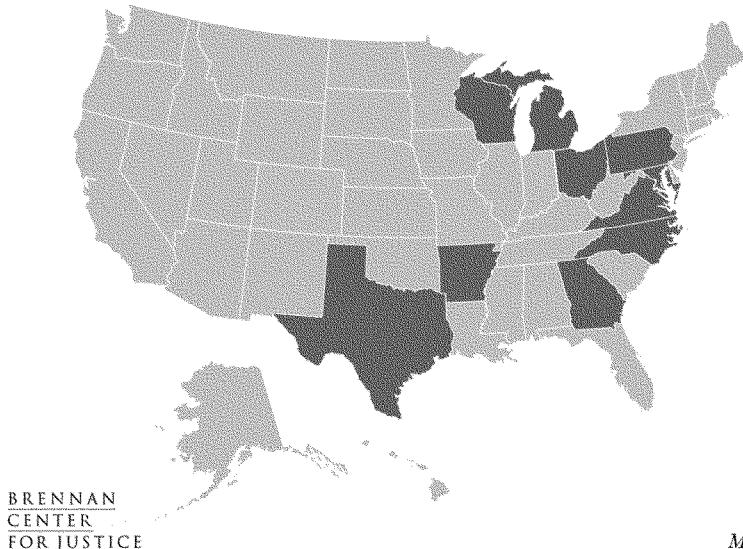

- By contrast, voters in North Carolina will go to the polls for the second election in a row using a map drawn in 2016 to replace an earlier map found by courts to be an unconstitutional racial gerrymander. Like the original map, the replacement map, which lawmakers described as a “[political gerrymander](#),” locks in a 10-to-3 Republican advantage in a state where there is robust competition between the parties at the statewide level. Although a three-judge panel [struck down](#) the replacement map in January as a partisan gerrymander, the Supreme Court put the

drawing of a new map on hold while it considers North Carolina lawmakers' appeal (likely to be heard in the fall of 2018 — see below).

#### Redistricting Cases at the Supreme Court

- While decisions will likely come too late to affect the 2018 midterms, the U.S. Supreme Court could set the stage for further redrawing of the nation's electoral maps this summer when it is expected to rule in closely watched partisan gerrymandering cases from [Wisconsin](#) and [Maryland](#). The former challenges a Republican gerrymander of Wisconsin's state assembly map and the latter a Democratic gerrymander of Maryland's 6th Congressional District. The two decisions will be the Supreme Court's first partisan gerrymandering opinions since it badly deadlocked on the question of the constitutionality of partisan gerrymandering in the mid-2000s in *Vieth v. Jubelirer* and *LULAC v. Perry*. Together, the Wisconsin and Maryland decisions will give the high court an opportunity to finally establish a standard for gauging when a map is unconstitutional.
- If the court does rule that there are constitutional limits to partisan gerrymandering, the impact would be significant both in the near and long term. Not only would the rulings result in changes to maps used in the 2020 elections, they, more importantly, would radically change the legal framework in place for the next round of redistricting in 2021.
- The Supreme Court also will rule this summer in a [Texas redistricting case](#) that could result in several congressional and state house districts being redrawn for the 2020 elections because of unconstitutional racial gerrymandering and/or violations of the Voting Rights Act. This case is significant because it also could set the stage for Texas to be placed back under preclearance coverage using the "bail in" provisions of section 3 of the Voting Rights Act. If this happens, Texas would once again be required to get certain election-related laws preapproved before putting them into effect — something it has not had to do since the Supreme Court's 2013 decision in *Shelby County v. Holder*.

#### Ongoing Redistricting Litigation

May 2018

- The Supreme Court also is expected to decide before the end of June whether it will hear North Carolina's appeal of a lower-court decision striking down that state's 2016 congressional map as a partisan gerrymander. Most observers expect the high court to set the case for argument in the Supreme Court term that starts October 2. However, the court also could decide the case without oral argument (as requested by the plaintiffs) or send the case back to the trial court for consideration in light of the Supreme Court's decisions in the Wisconsin and Maryland cases.

#### Other Noteworthy Redistricting Cases

- In addition to the Wisconsin, Maryland, and North Carolina partisan gerrymandering cases at the Supreme Court, partisan gerrymandering challenges are in their early stages in federal district court in Ohio, challenging the state's congressional map, and in Michigan, challenging both congressional and legislative maps. Rulings could be possible this fall in either or both cases.
- In Virginia, a decision could come from a three-judge panel this spring or summer in a racial gerrymandering challenge to 11 of the state's house of delegates districts. The panel previously rejected the challenge, but the Supreme Court reversed, ruling that the panel had used the wrong standard in assessing the claims.
- Also in Virginia, on May 31, the state Supreme Court rejected a challenge to the state's legislative maps under the Virginia Constitution, terminating hopes that the maps would be redrawn in advance of the 2019 state elections.

#### Redistricting Reform Efforts

There also is significant momentum toward redistricting reform in the states. As discussed below, voters in four states have succeeded in putting initiatives on their state ballots to reform the redistricting process, either by creating an independent redistricting commission to draw political boundaries or by constraining map drawers. In May (during the primary election), Ohio voters, by a 3-to-1 margin, passed a referendum reforming the redistricting process for congressional seats. Starting in 2021, new congressional maps will require either support of a supermajority in the Ohio Legislature, as well as a minimum level of support from the minority party in each chamber, or compliance with strict new rules, including a prohibition on maps that unduly favor a political party.

#### November Ballot Measures That Could Impact Voting Access

November's election is also remarkable for the sheer number of ballot initiatives that address voting issues — far more such ballot initiatives than in any election in recent memory. Voters in nine states will have the opportunity this year to vote on ballot initiatives to change voting and redistricting processes. Initiatives in Arkansas and Montana would make it more difficult for citizens to vote. Initiatives in Florida, Maryland, and Nevada would substantially expand access to the franchise. And initiatives in Colorado, Michigan, Missouri, and Utah would improve the redistricting process. Voter decisions on these ballot measures could have a major impact on voting for years to come. Here is an overview of those measures:

##### Initiatives restricting voting access

- In Arkansas, voters will decide whether to enshrine a strict voter ID requirement in their state constitution, on top of the voter ID law enacted by the state Legislature last year. The Arkansas Supreme Court struck down the state's previous strict voter ID law as unconstitutional in 2014.
- In Montana, voters will vote on a measure that prevents civic groups and individuals from helping others vote absentee by collecting and delivering their voted ballots. Opponents claim that the measure will create unnecessary barriers to voting and could impact student voters in particular.

##### Initiatives expanding voting access

- In Florida, voters will vote on a citizen-initiated ballot measure to automatically restore the voting rights of individuals who have been convicted of felonies (other than murder and sexual offenses) when they complete all terms of their sentences. If the referendum passes, it has the potential to transform Florida's electorate: 1.4 million Floridians would regain their eligibility to vote. Florida's law currently disenfranchises, by far, the most people in the country. It is also an outlier in terms of its punitiveness. Florida is currently one of only three states that disenfranchises all people with felony convictions for life. If the Florida law is amended, only Iowa and Kentucky will have lifetime voting bans.
- In Maryland, voters will cast their ballot on a proposed constitutional amendment authorizing the Legislature to permit election-day voter registration. Maryland already allows same-day registration during its early voting period. This would make Maryland

the 19th state (plus the District of Columbia) to enact election-day registration, according to the National Conference of State Legislatures. Experts believe that this reform increases turnout by 5 to 7 percent.

- In **Nevada**, voters will weigh in on whether to adopt automatic voter registration. This reform could be particularly transformative in a state that has a history of scandals over voter registration drives as well as one of the lowest voter registration rates in the nation. AVR was first put before the state Legislature by a citizen-initiated petition supported by tens of thousands of Nevadans. The bill was passed by the state Legislature with substantial bipartisan support. Nevertheless, Gov. Brian Sandoval vetoed it, setting up this year's ballot initiative. If enacted, AVR could help to get many of the more than 770,000 eligible citizens who are not registered onto the rolls.
- In **Michigan**, a coalition is collecting signatures to put a constitutional amendment on the ballot that would include a variety of pro-voter reforms, including AVR at the secretary of state's office, election-day registration, and no-excuse absentee voting, as well as requiring post-election audits. This suite of reforms could transform voting in Michigan, improving the way people register and vote and how their votes are counted.

#### Initiatives improving redistricting

- In **Colorado**, two amendments on the ballot this November would put a 12-member commission in charge of drawing the state's congressional and legislative districts. (Congressional districts are currently drawn by the state Legislature and legislative districts are drawn by a commission of political appointees.) The commission would have an equal number of Democrats, Republicans, and unaffiliated members. A majority of eight commission members, including at least two unaffiliated members, would be required to approve a map. The commission would be required to hold at least three public hearings in each congressional district before approving a redistricting map. The proposals also establish new substantially stronger criteria for map drawing, including provisions barring partisan gerrymandering and rules favoring competitive districts. If adopted, the amendments would guarantee unaffiliated voters a role in the redistricting process for the first time.
- In **Michigan**, a grassroots ballot initiative that began with a single Facebook post in November 2016 would create a 13-member citizens' redistricting com-

mission, consisting of four Democrats, four Republicans, and five members not affiliated with a major party, to draw both the state's congressional and legislative boundaries. (Both congressional and legislative districts are currently drawn by the state Legislature.) A majority vote of the commission would be required to approve a plan, which must include at least two commissioners affiliated with each major political party, and two commissioners affiliated with neither party. Any map approved by the commission would be subject to new rules, including a requirement that the map not unduly favor a political party as determined by accepted measures of partisan fairness.

- In **Missouri**, a citizen-proposed constitutional amendment will be on the 2018 ballot that would give a nonpartisan state demographer primary responsibility for drawing state legislative lines for consideration by the state's existing legislative apportionment commissions (one for the state House and one for the state Senate). Although the legislative apportionment commissions can modify the demographer's maps, any changes will require a supermajority of the commission. If voters approve the measure, Missouri would be one of the first states in the nation to require that proposed maps be tested using a specific statistical measure of partisan fairness.
- In **Utah**, voters will weigh in this November on a citizen-led ballot initiative that would create a seven-member advisory redistricting commission to propose redistricting plans for consideration by Utah lawmakers, starting in 2021. (Congressional and legislative districts are currently drawn by the state Legislature.) The commissioners, who would be appointed by the governor and legislative leaders, would be required to follow ranked-order criteria to draw the state's congressional and legislative districts, which would include preserving local communities of interest and traditional neighborhoods. The proposal also would prohibit the commission and the Legislature from considering partisan political data unless necessary to comply with other redistricting criteria. To ensure that maps are not gerrymandered, the amendment requires map drawers to use best available scientific and statistical methods, including measures of partisan bias, to test maps. Uniquely among states that use advisory commissions, the Utah amendment would require the Legislature to issue a written report if it rejects a commission-drawn map. The report would have to explain both why the Legislature rejected the commission's proposed map and why the map adopted by the Legislature better satisfies the amendment's map-drawing criteria.

**Appendix: Voting Litigation Scorecard**

Here is a summary of the outcomes of major lawsuits challenging new voting restrictions over the past decade. They are mostly federal cases, except where otherwise indicated:

**LITIGATION VICTORIES**

State	Year of Key Ruling	Law Blocked/Mitigated	Outcome
Alabama, Georgia, Kansas	2016	Documentary proof of citizenship for registration	Blocked for use on federal voter registration form.
Georgia	2016	"No match, no vote" purge practice	State agreed to suspend the practice before a hearing was held. New "no match, no vote" bill subsequently enacted in 2017.
Kansas	2014, 2016	Documentary proof of citizenship for registration	Documentation requirement for the DMV voter registration form, the state voter registration form (challenged in state court), and the federal registration form all blocked.
North Carolina	2016	Single legislative package of restrictions: strict voter ID; cutbacks to early voting; elimination of same-day registration, preregistration, and out-of-precinct voting	Struck down
Texas	2012, 2016	Strict voter ID	Struck down, both <u>before</u> and <u>after</u> the <i>Shelby</i> ruling. Legislature subsequently passed an amended voter ID law in 2017.
Wisconsin	2016	Strict voter ID; early voting, residency, absentee ballot distribution, and student voting restrictions	Process for obtaining free voter ID modified and restrictions on use of certain types of ID struck down. Other challenged restrictions struck down.
Arizona	2013, 2014	Documentary proof of citizenship for registration	Blocked for <u>state and federal</u> voter registration form
Arkansas	2014	Voter ID	Struck down by state court. New voter ID law subsequently enacted in 2017.
Pennsylvania	2014	Strict voter ID	Struck down by state court
Florida	2006, 2007, 2008, 2012	Cutbacks to early voting; restrictions on voter registration drives; restrictions on processing voter registration forms	Cutbacks to <u>early voting</u> struck down in part. Restrictions on <u>registration drives and form processing</u> blocked.
South Carolina	2012	Voter ID	Blocked for 2012 election, and most harmful effects mitigated for future elections
Georgia	2005, 2006	Strict voter ID	Blocked for 2006 elections by <u>state and federal courts</u> , but an amended version of the law was subsequently upheld
Missouri	2006	Strict voter ID	Struck down by state court
Ohio	2006	Documentary proof of citizenship for naturalized citizens at the polls	Struck down

## UNSUCCESSFUL LITIGATION

State	Year of Key Ruling	Law Challenged
Ohio	2016	Cutbacks to early voting
Ohio	2016	Hurdles to counting provisional and absentee ballots
Virginia	2016	Strict voter ID
Tennessee	2015	Strict voter ID
Wisconsin	2014	Strict voter ID (challenged in both state and federal court)
Texas	2012	Third-party voter registration restrictions
Indiana	2008, 2010	Strict voter ID (challenged in both state and federal court)

Voters have also been successful in challenging state administrative decisions. A pair of lawsuits brought in 2016 successfully challenged election officials' decision to reduce the number of polling sites in Maricopa County, Arizona. And in 2013, a state court in Colorado rejected the secretary of state's incorrect interpretation of the state's vote-by-mail statute, which would have obstructed thousands of Coloradans from voting.

## Voting Laws Roundup: May 2021

States have already enacted more than 20 laws this year that will make it harder for Americans to vote — and many legislatures are still in session.

PUBLISHED: May 28, 2021

 Ensure Every American Can Vote  
Vote Suppression

Across the country, the effort to restrict the vote continues, with a wave of bills moving through state legislatures and becoming law.

Between January 1 and May 14, 2021, at least **14 states enacted 22 new laws** that restrict access to the vote.<sup>¶1</sup> The United States is on track to far exceed its most recent period of significant voter suppression — 2011. By **October of that year**, 19 restrictive laws were enacted in 14 states. This year, the country has already reached that level, and it's only May.

More restrictions on the vote are likely to become law, as roughly one-third of legislatures are still in session. Indeed, at least **61 bills with restrictive provisions are moving through 18 state legislatures**. More specifically, **31 have passed at least one chamber**, while another 30 have had some sort of committee action (e.g., a hearing, an amendment, or a committee vote). Overall, lawmakers have introduced at least 389 restrictive bills in 48 states in the 2021 legislative sessions.<sup>¶2</sup>

6/21/2021

Voting Laws Roundup: May 2021 | Brennan Center for Justice

**APPENDIX A**

The restrictive laws from 2011 were enacted after the 2010 elections brought a **significant shift** in political control over statehouses — and as the country confronted backlash to the election of its first Black president. Today's attacks on the vote come from similar sources: the racist voter fraud allegations behind the Big Lie and a desire to prevent future elections from achieving the historic turnout seen in 2020.

Americans' access to the vote is in unprecedented peril. But Congress can protect it. The **For the People Act**, passed by the House and now awaiting action in the Senate, would block many of the state-level restrictions that have been or may soon be enacted into law.

At the same time, at least 880 bills with expansive provisions have been introduced in 49 states.<sup>43</sup> Of these, at least 28 bills with expansive provisions have been signed into law in 14 states. At least 115 bills with expansive provisions are moving in 25 states: 45 have passed at least one chamber, and 70 have had some sort of committee action.

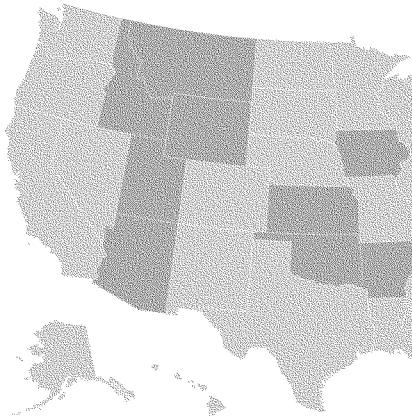

*You can find a resource listing restrictive and expansive state voting legislation by bill number [here](#).*

## Restrictive Bills

Voting Laws Roundup: May 2021 | Brennan Center for Justice

**BREAKDOWN OF VOTING LAWS****APPENDIX A**

In a backlash to 2020's historic voter turnout and unprecedented vote-by-mail usage, state lawmakers have imposed a variety of significant restrictions on both mail voting and in-person voting. Florida, Georgia, and Iowa have each used single omnibus bills, which incorporate many restrictions, to undertake a full-fledged assault on voting. By contrast, Arkansas and Montana lead the country in the number of restrictive bills enacted (four each), each of which addresses a narrower range of issues. Laws enacted in Arkansas, Florida, Georgia, Iowa, and Montana are already being challenged in court.

**At least 16 mail voting restrictions in 12 states will make it more difficult for voters to cast mail ballots that count.**<sup>44</sup> Six laws shorten the timeframe for voters to request a mail ballot, including a Georgia law that will reduce that window by more than one-half.<sup>45</sup> Five laws make it more difficult for voters to automatically receive their ballot or ballot application — either by making it harder to stay on absentee voting lists or by prohibiting officials from sending applications or ballots without the voter's affirmative request.<sup>46</sup> Nine laws in eight states make it more difficult for voters to deliver their mail ballots, including a law in Arkansas that makes the in-person ballot delivery deadline earlier, six laws that restrict assistance to voters in returning their mail ballots, and four laws that limit the availability of mail ballot drop boxes.<sup>47</sup> Three laws impose stricter signature requirements for mail voting,<sup>48</sup> while three others impose stricter or new voter ID laws for mail voting.<sup>49</sup>

**At least 8 states have enacted 11 laws that make in-person voting more difficult.** Three states have enacted four laws that impose new or harsher voter ID requirements for in-person voting.<sup>50</sup> Four laws make faulty voter roll purges more likely, risking confusion and disenfranchisement when voters show up at the polls.<sup>51</sup> Montana eliminated Election Day registration and moved up its registration deadline to the day before Election Day.<sup>52</sup> Three states have limited the availability of polling places: Montana permitted more locations to qualify for reduced polling place hours; Iowa reduced its Election Day hours, shortened the early voting period, and limited election officials' discretion to offer additional early voting locations; and Georgia reduced early voting in many counties by standardizing early voting days and hours.<sup>53</sup>

6/21/2021

Voting Laws Roundup, May 2021 | Brennan Center for Justice  
BREAKDOWN OF VOTING LAW CHANGES  
APPENDIX A**New Restrictive Laws**

EFFECT ON VOTING	BILL NUMBER
Shorten window to apply for a mail ballot	AL HB 538, AR SB 643, GA SB 202, IA SF 413, KY HB 574, OK HB 2663
Shorten deadline to deliver mail ballot	AR SB 643
Make it harder to remain on absentee voting lists	AZ SB 1485, FL SB 90
Eliminate or limit sending mail ballot applications to voters who do not specifically request them	GA SB 202, IA SF 413, KS HB 2332
Eliminate or limit sending mail ballots to voters who do not specifically request them	FL SB 90
Restrict assistance in returning a voter's mail ballot	AR HB 1715, FL SB 90, IA SF 413, KS HB 2183, KY HB 574, MT SB 530
Limit the number, location, or availability of mail ballot drop boxes	FL SB 90, GA SB 202, IA SF 413, IN SB 398
Impose stricter signature requirements for mail ballots	AZ SB 1003, ID HB 290, KS HB 2183
Tighten or impose voter ID requirements for mail voting	FL SB 90, GA SB 202, MT SB 169
Tighten or impose voter ID requirements for in-person voting	AR HB 1112, AR HB 1244, MT SB 169, WY HB 75
Expand voter purges or risk faulty voter	IA SF 413, FL SB 90, KY HB 574.

**Restrictive Bills That Are Moving**

As of May 14, 2021, there are at least 61 bills with restrictive effects moving through 18 state legislatures, in addition to the bills that have already become law.<sup>¶14</sup> More than one-third of these moving bills are in only three states: Texas and Michigan with nine bills each, and Wisconsin with seven. Texas legislators are still considering SB 7, an omnibus voter suppression bill, in conference. To date, however, the final language of the bill has not been released from the conference committee.

At least 32 moving bills in 15 states would restrict the ability to **vote by mail**.<sup>¶15</sup> In Wisconsin, AB 201 and SB 204 would eliminate the ability of voters other than military voters to automatically receive an absentee ballot for each election. At least six moving bills would prohibit the unsolicited sending of mail ballot applications or ballots.<sup>¶16</sup> At least four moving bills would make it harder for absentee voters to obtain assistance submitting their ballots.<sup>¶17</sup>

At least 15 bills moving in 10 states would impose **new or stricter voter ID requirements**.<sup>¶18</sup> Six of these bills would impose new or stricter ID requirements to vote in person.<sup>¶19</sup> Seven would require voters to present an ID number or an ID to vote by mail.<sup>¶20</sup>

At least 14 bills moving in 6 states would **expand voter purge practices** in ways that risk improper removals.<sup>¶21</sup> At least eight bills would require the use of new and often unreliable data sources to eliminate voters from the rolls.<sup>¶22</sup>

6/21/2021

Voting Laws Roundup: May 2021 | Brennan Center for Justice

**BREAKDOWN FOR 2021**

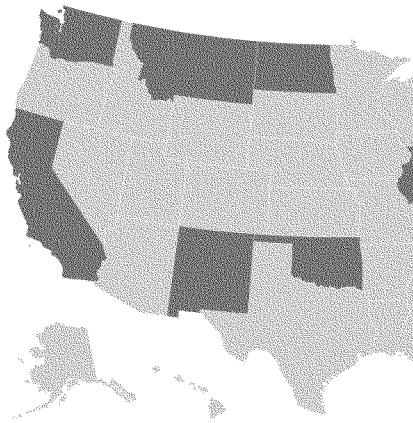

APPENDIX A

At least 11 bills moving in 6 states would **increase barriers to voter registration.**<sup>¶23</sup> MN SF 173 and RI HB 6099 would require voters to provide an ID or ID number when registering to vote. Four bills would prohibit or restrict the ability to register to vote on Election Day.<sup>¶24</sup> In Arizona, HB 2793 would preemptively prohibit automatic voter registration, while HB 2811 would preemptively prohibit Election Day registration.

## Expansive Bills

### Bills Enacted into Law

#### States with New Expansive Laws

Despite the wave of voter suppression efforts in 2021, some states have enacted legislation to make it easier for Americans to access the ballot box. These laws are focused on expanding early voting, making mail voting easier, and improving accessibility for voters with disabilities. Virginia has enacted nine expansive bills this session, the most of any state.<sup>¶25</sup>

At least seven laws would **expand the availability of early voting.** For example, New Jersey and Kentucky codified in-person early voting, and Massachusetts extended early voting through June of this year.<sup>¶26</sup>

And at least eight laws in six states **make mail voting easier.**<sup>¶27</sup> That includes five laws in four states that expand mail ballot drop box access or ballot drop-off locations<sup>¶28</sup> and five laws in four states that codify procedures so that voters learn of and can fix mistakes and defects in their mail ballots.<sup>¶29</sup>

5/13

6/21/2021

Voting Laws Roundup: May 2021 | Brennan Center for Justice

**BREAKDOWN OF VOTER LAWS BY STATE****APPENDIX A**

At least six states have enacted eight laws that seek to make voting **more accessible for voters with disabilities**.

<sup>¶30</sup> Washington and New York **restored voting rights** to people with past convictions so that every American living in the community is eligible to vote.<sup>¶31</sup> Two states made voter registration easier for young voters: New York expanded automatic voter registration to include the State University of New York, while Virginia expanded pre-registration to 16-year-olds.<sup>¶32</sup>

**New Expansive Laws**

EFFECT ON VOTING	BILL NUMBERS
<b>Expand early voting opportunities</b>	IN HB 1479, KY HB 574, MA HB 73, MD HB 745, NJ SB 3203, OK HB 2663, VA HB 1968
<b>Expand mail ballot drop box access/drop-off locations</b>	IL HB 1871, KY HB 574, MD SB 683, VA HB 1888, VA SB 1245
<b>Ease mail voting (misc.)</b>	IN SB 398, KY HB 574, MD SB 683, ND HB 1253, VA SB 1097, VA SB 1245, VA HB 1888
<b>Provide greater access to voters with disabilities</b>	IN SB 398, KY HB 574, MA HB 73, MT SB 15, ND HB 1253, VA HB 1921, VA SB 1245, VA SB 1331
<b>Restore voting rights to people with past convictions</b>	NY SB 830B, WA HB 1078
<b>Ease voter registration</b>	ND HB 1078, NY AB 2574, VA HB 2125
<b>Protect polling place access</b>	MD HB 745, NM HB 231

**Expansive Bills That Are Moving**

As of May 14, 2021, there are at least 115 bills with expansive provisions that are moving across 25 states, in addition to the bills that have already become law. New York has 20 moving bills with expansive provisions, the most of any state.<sup>¶33</sup> These include two bills that, if approved by New York voters in November, would amend the state's constitution to allow for no-excuse absentee voting and same-day voter registration.<sup>¶34</sup> In addition, there are 13 moving expansive bills in Connecticut and 10 in Oregon.<sup>¶35</sup>

More than half of the expansive bills that are moving would **make it easier to vote by mail**. There are 59 moving bills across 20 states that would make it easier to obtain and return a mail ballot and have that ballot counted. Thirteen bills would expand the availability of ballot drop boxes.<sup>¶36</sup> Twelve bills would extend the deadline for mail ballot receipt or postmark, giving voters more time to return their mail ballots.<sup>¶37</sup> Nine of the moving bills would either establish no-excuse mail voting or put forward state constitutional amendments to do so.<sup>¶38</sup> Nine of the moving bills would establish or expand notice and cure opportunities for mail voters.<sup>¶39</sup> In addition, other moving bills would allow voters to apply online for mail ballots, require that mail ballot return envelopes include prepaid postage, or remove a witness requirement for mail ballots, among other expansive measures.<sup>¶40</sup>

There are 32 bills moving in 16 states that would **expand voter registration opportunities**.<sup>¶41</sup> Ten bills would establish automatic voter registration (AVR) or extend AVR to additional agencies or schools.<sup>¶42</sup> Ten bills would establish or expand same-day or Election Day registration opportunities.<sup>¶43</sup> In addition, five bills would extend

<https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-may-2021>

6/13

6/21/2021

Voting Laws Roundup: May 2021 | Brennan Center for Justice

**BREAKDOWN FOR STATES**  
 voter registration deadlines.<sup>44</sup> Three bills would give 16- and 17-year-olds the opportunity to pre-register to vote.<sup>45</sup>

**APPENDIX A**

There are 25 bills moving in 11 states that would **establish or expand early voting**.<sup>46</sup> Some of these bills, including in Louisiana and Oklahoma, would increase the number of days, or increase the required hours per day, of early voting. In New York, three bills would require that counties provide a minimum number of early voting locations based on their populations, while another would require an early voting location (and an Election Day polling location) on any college or university campus with 300 or more registered, active voters.<sup>47</sup>

There are 10 bills moving in five states that would **restore voting rights** for those with past convictions.<sup>48</sup> Six bills would restore the right to vote upon release from incarceration, rather than upon completion of probation or parole.<sup>49</sup> There are also three bills that would restore the right to vote while incarcerated, with limited exceptions.<sup>50</sup> Additional bills would remove or ease requirements that formerly incarcerated individuals pay legal financial obligations before their right to vote is restored; others would remove a mandatory waiting period after completing a sentence before the right to vote can be restored.<sup>51</sup>

## Alarming Trends

In addition to new legislation that will make it harder for Americans to vote, state lawmakers have enacted several other policies that risk undermining the voting process.

For example, a previous Brennan Center analysis highlighted the nationwide effort to **expand the powers of poll watchers**, a move that invites the opportunity for increased voter intimidation and harassment at the polls. Already, three such bills have been enacted.<sup>52</sup> Georgia and Montana have expanded poll watcher access in voting or ballot-counting locations. The Georgia law also provides that a single person can challenge the eligibility of an unlimited number of voters, risking arbitrary, discriminatory, and disruptive challenges. The Iowa law makes it a criminal offense for an election official to obstruct a watcher's activities.

Three new state laws seek to **punish local election officials for technical mistakes**.<sup>53</sup> Iowa's SF 413 allows the state commissioner of elections to impose a fine on county election officials for technical infractions, including failure to purge voters. In Arkansas, SB 644 allows the State Board of Election Commissioners to decertify local election officials or even take over the administration of local elections based on any violation (even if inadvertent) of voter registration or election laws they deem severe enough. Similarly, Georgia's SB 202 allows local election officials to be suspended for violations of election-related rules and regulations, without a requirement that intent be established. Other bills would **impose criminal penalties on election officials**.<sup>54</sup> In Arizona, HB 2794 makes it a criminal offense for election officials to revise election-related deadlines without first obtaining a court order. If enacted, Texas HB 574, which has been passed by both chambers, would create criminal liability for knowingly counting invalid votes.

After governors, secretaries of state, and local officials took action in 2020 so that voters could safely cast their ballots during the pandemic, state legislators are advancing bills that **limit executive and local power**. Of those, five such bills have already been enacted.<sup>55</sup> One Montana law requires legislative consent to executive actions related to election law in an emergency. New laws in Kansas and Kentucky prohibit executive officials from suspending or modifying election law. The Kansas law goes further and prohibits the secretary of state from entering into a consent decree with a court regarding election procedures without first obtaining legislative

7/13

## 659

6/21/2021

Voting Laws Roundup: May 2021 | Brennan Center for Justice

### BREAKDOWN OF VOTER SUPPRESSION LAWS

#### APPENDIX A

approval. Arizona's HB 2794 prohibits state and local officials from revising election-related deadlines without first obtaining a court order. And Florida's omnibus voter suppression law, SB 90, limits the ability of state and county agencies to settle lawsuits related to elections without interference by the legislature and attorney general. Along the same lines, Georgia's omnibus voter suppression law, SB 202, limits the state's ability to settle lawsuits and adopt emergency rules or regulations related to elections without interference by the legislature

This session, five bills have been enacted that **restrict or prohibit the use of outside funding** for election administration expenses.<sup>156</sup> In 2020, nonpartisan philanthropic grants were essential to election officials' ability to conduct safe elections during the pandemic. Laws in Arizona, Florida, and Georgia prohibit election administrators from accepting private funding for election expenses, while the Kansas law creates a felony offense for election officials to accept or spend money on elections from private sources. Tennessee's law prohibits election officials from taking any private funding for conducting elections unless it is approved by the speaker of the Senate and the speaker of the House of Representatives.

In response to the momentum behind the *For the People Act*, four states have passed nonbinding resolutions **opposing the federal comprehensive democracy reform bill** and urging Congress to reject it.<sup>157</sup>

---

#### Endnotes

1. Provisions are categorized as restrictive if they would make it harder for Americans to register, stay on the rolls, and/or vote, as compared to existing state law.

2. This total includes bills that are introduced, prefiled, or carried over.

3. Provisions are categorized as expansive if they would make it easier for Americans to register, stay on the rolls, and/or vote, as compared to existing state law.

4. Many of these laws enact more than one mail voting restriction, as delineated in the paragraph that follows.

5. AL HB 538, AR SB 643, GA SB 202, IA SF 413, KY HB 574, OK HB 2663.

6. AZ SB 1485, FL SB 90, GA SB 202, IA SF 413, KS HB 2332.

7. AR HB 1715, AR SB 643, FL SB 90, GA SB 202, IA SF 413, IN SB 398, KS HB 2183, KY HB 574, MT SB 530.

8. AZ SB 1003, ID HB 290, KS HB 2183.

9. FL SB 90, GA SB 202, MT SB 169.

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

B R E N N A N  
C E N T E R  
F O R J U S T I C E

**Testimony of Wendy R. Weiser**  
**Brennan Center for Justice at NYU School of Law**

**Before the Senate Judiciary Committee**  
**Hearing on “From Selma to *Shelby County*: Working Together to**  
**Restore the Protections of the Voting Rights Act”**

**July 17, 2013**

On behalf of the Brennan Center for Justice, I thank the Senate Judiciary Committee for the opportunity to submit testimony in connection with this important hearing, “From Selma to *Shelby County*: Working Together to Restore the Protections of the Voting Rights Act.” The Brennan Center is a nonpartisan law and policy institute that focuses on issues of democracy and justice; among other things, we work to ensure fair and accurate voting procedures and systems, and that every eligible American, and only eligible Americans, can participate in elections.<sup>1</sup>

Because of the centrality of voting to our system of democracy, and because of the persistence of racial discrimination in the voting process, we urge Congress to work quickly, and in a bipartisan manner, to restore the protections of the Voting Rights Act that were rendered inoperative by the Supreme Court’s recent decision in *Shelby County v. Holder*. The purpose of my testimony is to bring to this Committee’s attention recent research by the Brennan Center that underscores the urgency of congressional action now. Specifically, in *If Section 5 Falls: New Voting Implications*, attached to this testimony, Myrna Perez and Vishal Agraharkar catalog, quantify, and describe some of the substantial number of discriminatory voting changes that officials in covered jurisdictions have previously sought to put in place and may now attempt to put in place in the wake of the Supreme Court’s decision in *Shelby County*.

**I. The Supreme Court’s Decision in *Shelby County***

The Supreme Court in *Shelby County* effectively eviscerated the core provision of the Voting Rights Act, leaving millions of voters without the protection of the most effective tool in American law to combat racial discrimination in voting. The Voting Rights Act is widely acknowledged as the most effective piece of civil rights legislation, a cornerstone of American

---

<sup>1</sup> The Brennan Center has done extensive work on a range of issues relating to voting rights, including work to modernize our voter registration system; remove unnecessary barriers to voter participation; make voting machines more secure and accessible; defend the federal Voting Rights Act; and expand access to the franchise. Our work on these topics has included the publication of studies and reports; assistance to federal and state administrative and legislative bodies with responsibility over elections; and, when necessary, litigation to compel states to comply with their obligations under federal and state law. This testimony is submitted on behalf of a Center affiliated with New York University School of Law, but does not purport to represent the school’s institutional views on this or any topic.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

law guaranteeing political equality. As political leaders on both sides of the aisle recognized when Congress overwhelmingly reauthorized the law just seven years ago, Section 5 is a critical and necessary element of that Act.<sup>2</sup>

A robust Voting Rights Act—with a reinvigorated Section 5 at its core—continues to be necessary to secure the equal voting rights promised to all citizens by the Constitution. “[N]o one doubts,” as Chief Justice Roberts declared, that the problem of “voting discrimination still exists” in America,<sup>3</sup> especially in places with a history of such discrimination. Congress made substantial findings on this point in 2006, and we expect the evidence before this Committee to further demonstrate the unfortunate persistence of racial discrimination in voting. Although the country has made substantial progress since 1965, the work of the Voting Rights Act is unfinished. Until last month, Section 5 was a critical engine for this progress and a critical deterrent for discriminatory voting practices. Existing laws are simply insufficient to fill the void left by the Supreme Court’s decision.

In *Shelby County*, the Supreme Court expressly left the door open for Congress to restore or replace Section 5.<sup>4</sup> Although the real-world effect of the Court’s decision was sweeping, the legal ruling was actually relatively narrow. The Court invalidated Section 4 of the Voting Rights Act, the coverage formula that determined which states were subject to the requirements of Section 5, on the basis of its finding that the formula was outdated and had not been tailored to “current conditions.”<sup>5</sup> The Court thus rendered Section 5 inoperative in practice, but, for the second time since 2006, it expressly declined to strike down Section 5. The Court expressly acknowledged that the problem of race discrimination in voting has not been eradicated and that Congress may act to remedy that problem.<sup>6</sup> Indeed, the decision in no way undermined Congress’s express powers, under both the Fourteenth and Fifteenth Amendments to the U.S. Constitution, to combat racial discrimination in voting through appropriate legislation. Moreover, in another case this Term, the Court reaffirmed Congress’s “broad” and “paramount” powers to regulate how federal elections are conducted.<sup>7</sup> Congress thus has an extremely strong basis to pursue much-needed legislative efforts to protect all Americans against the threat of discrimination in voting.

## **II. Implications of Loss of Section 5 Protections**

We commend this Committee for taking up this important issue at this time. We urge Congress to act expeditiously to restore or replace Section 5. As outlined in *If Section 5 Falls: New Voting Implications*,<sup>8</sup> a Brennan Center report released shortly before the decision in *Shelby*

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

County, there is a serious risk that, without the protections of Section 5, jurisdictions could now attempt immediately to put in place discriminatory voting changes by: re-enacting discriminatory changes that were blocked by Section 5; pursuing policies previously deterred by Section 5; implementing changes that were potentially discriminatory but had not yet been reviewed by the Department of Justice; passing new restrictive voting changes; or enforcing previously blocked changes that remain on the books.

The report makes clear that the magnitude of the problem is substantial. The immediate impact of the decision has been to enable jurisdictions to move forward with voting changes—including those that are potentially discriminatory—without Department of Justice or court review. According to news reports, at the time of the Court’s decision the Department of Justice had 276 submissions of voting changes awaiting its review under Section 5.<sup>9</sup> Those changes will now go forward without further review to determine if they are discriminatory.

Unless Congress acts, future discriminatory voting changes will also move forward without review. In the run-up to the 2012 elections, state legislatures passed scores of new laws that would have made it harder for eligible Americans to vote.<sup>10</sup> While most of the restrictive new voting laws were blocked, mitigated, or repealed before the elections, efforts to cut back on voting access continue.<sup>11</sup> In the most recent legislative session (as of April 29, 2013), 28 restrictive voting bills were introduced in states that were covered wholly or in part by Section 5, and 2 of those bills already passed.<sup>12</sup> To the extent that those bills are discriminatory, Section 5 can no longer function to deter their passage or prevent their implementation.

Another threat in the wake of *Shelby County* is that jurisdictions may seek to re-enact or implement voting changes that have previously been formally blocked by Section 5. Our report identified, among other things:

- thirty-one discriminatory election changes had been blocked by the Department of Justice since Congress reauthorized the Voting Rights Act in 2006;<sup>13</sup>
- three examples in the run up to the 2012 election where federal courts denied preclearance to proposed election changes;<sup>14</sup> and
- multiple cases where Section 5 blocked repeated attempts by a single jurisdiction to dilute minority voting strength.<sup>15</sup>

<sup>10</sup> IF SECTION 5 FALLS, *supra* note 8, at 7.

<sup>11</sup> See WENDY R. WEISER & DIANA KASDAN, VOTING LAW CHANGES: ELECTION UPDATE (2012), available at <http://www.brennancenter.org/publication/voting-law-changes-election-update>.

<sup>12</sup> IF SECTION 5 FALLS, *supra* note 8, at 8.

<sup>13</sup> This is the number of submissions of voting changes since July 2006 to which DOJ has interposed an objection. In some cases, objections by DOJ were later withdrawn, or were superseded by a declaratory judgment action for court preclearance in the U.S. District Court for the District of Columbia. See *Section 5 Objection Determinations*, U.S. DEP’T OF JUSTICE, [http://www.justice.gov/crt/about/vot/sec\\_5/obj\\_activ.php](http://www.justice.gov/crt/about/vot/sec_5/obj_activ.php) (last visited July 12, 2013) (listing 31 objections since July 2006); see also IF SECTION 5 FALLS, *supra* note 6, at 3.

<sup>14</sup> *Id.* at 3.

<sup>15</sup> For example, within the span of a few months in 2012, Section 5 prevented two separate discriminatory changes to the method of electing trustees of the Beaumont Independent School District in Beaumont, Texas. *Id.*

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

The report further found that some previously blocked voting changes remain on the books, leading to the possibility jurisdictions could begin enforcing them.<sup>16</sup> For example, the report identifies two discriminatory state laws blocked by Section 5 which remain on the books.<sup>17</sup>

Perhaps the largest impact of the *Shelby County* decision will be the loss of the powerful deterrent effect of Section 5 on discriminatory voting practices. To give a sense of the magnitude of this problem, the report pointed out that:

- 153 voting changes were abandoned between 1999 and 2005 after the Department of Justice requested more information about a jurisdiction's Section 5 submission;<sup>18</sup> and
- In several cases in the run up to the 2012 election, Section 5 deterred restrictive voting changes, either through more information requests by the Department of Justice, or when officials were first contemplating changes to their election procedures.<sup>19</sup>

These examples only graze the surface of the kinds of voting changes that have been deterred or prevented by Section 5 and that may now move forward more easily. Unless Congress acts, there is a real risk that a significant number of discriminatory voting changes could be put in effect in jurisdictions previously covered by Section 5.

\* \* \*

The Voting Rights Act was a remarkable accomplishment for the nation, ushering in the promise of real political equality after centuries of abuse. The Act has taken on an iconic role, reflecting the country's rejection of the brutality of Jim Crow and embrace of the core constitutional value of political equality. It has simultaneously played a hardworking role, protecting against ongoing discrimination in the voting process. The Supreme Court's decision in *Shelby County* gutted the core of the Voting Rights Act. In doing so, it left a gaping hole in American law and demands an immediate response. While Section 5 has been an enormously successful tool in the struggle to eradicate racial discrimination in voting, the struggle is not over. Strong legal protections are crucial to sustaining the core value of our democracy, reflected in the Declaration of Independence, that we all are created equal. We urge Congress to work together again to restore this critical law to ensure our elections remain free, fair, and accessible for all Americans.

Testimony of

**Wendy R. Weiser**  
Director, Democracy Program  
Brennan Center for Justice at NYU School of Law<sup>1</sup>

Hearing on H.R. 1, The For the People Act  
The Committee on House Administration, U.S. House of Representatives

February 14, 2019

Chairperson Lofgren, Ranking Member Davis, and members of the Committee:

Thank you for the opportunity to submit this statement in support of House Resolution 1, the *For the People Act* (“H.R. 1” or “the Act”), a sweeping set of much-needed reforms to revitalize and restore faith in American democracy.

The Brennan Center for Justice enthusiastically supports H.R. 1. It is historic legislation. We cherish our democracy, the world’s oldest. But for far too long, public trust has declined, as longstanding problems with our system of self-government have worsened. In this past election, we saw the result: some of the most brazen and widespread voter suppression in the modern era; super PACs and dark money groups spending well over \$1 billion, raised mostly from a tiny class of megadonors; the ongoing effects of extreme gerrymandering; large-scale purges of the voter rolls; and a foreign adversary exploiting at-risk election technology in an attempt to meddle with our elections.

---

<sup>1</sup> The Brennan Center for Justice at NYU Law is a nonpartisan public policy and law institute that works to reform, revitalize, and defend our country’s system of democracy and justice. I direct the Center’s Democracy Program, which focuses on voting rights and election administration, money in politics and ethics, redistricting, and fair courts. Over more than two decades, the Brennan Center has built up a large body of nationally-respected research and work on these issues. This work has been widely cited by legislators, government agencies, courts, academic journals, and the media. The Brennan Center’s experts have testified dozens of times before Congress and state legislatures around the country. Public officials across the political spectrum have relied on the Brennan Center’s research in crafting innovative policies. Indeed, a number of the Center’s signature policy proposals have been incorporated into the Act. I thank the staff of the Center’s Democracy Program, and especially Senior Counsel Daniel I. Weiner, for assistance with this testimony. Michael Waldman, Max Feldman, Sidni Frederick and Natalie Giotta also provided important assistance.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

BRENNAN CENTER FOR JUSTICE

But in 2018, we also saw citizens awaken to the urgent need for action. This Congress was elected with the highest voter turnout since 1914. Many of you took office with a pledge to reform democracy. And in states across the country, voters approved ballot measures aimed at unrigging the political process, tackling redistricting, voting, and money in politics, often by large bipartisan majorities.<sup>2</sup> Voters sent a clear message: the best way to respond to attacks on democracy is to strengthen it.

The public hunger for change demands a strong response. This legislation includes the key reforms to revitalize American democracy—including automatic voter registration, small donor public financing, redistricting reform, and a commitment to restore the Voting Rights Act. It is fitting that this bill is designated as the very first introduced in this Congress. Democracy reform must be a central project for our politics now and going forward.

This testimony focuses on what we view as the most critical provisions of H.R. 1. It is based on years of research and advocacy in states across the country. Every single major provision of this legislation draws on strong and successful models already in use. These carefully honed proposals meet a specific, urgent need. We commend the House for taking up the entire Act and look forward to working with members to ensure its passage.

**I. Voting Rights**

In the Federalist Papers, Alexander Hamilton and James Madison laid down a standard for our democracy: “Who are to be the electors of the federal representatives? Not the rich, more than the poor; not the learned, more than the ignorant; not the haughty heirs of distinguished names, more than the humble sons of obscurity and unpropitious fortune. The electors are to be the great body of the people of the United States.”<sup>3</sup> For over two centuries, we have worked, but not fully succeeded, to live up to that ideal. Many have struggled, and continue to struggle, for the franchise. The right to vote is at the heart of effective self-government.

**A. Voter Registration Modernization (Title I, Subtitle A, Parts 1, 2, and 3 & Title 2, Subtitle F)**

One of the most important parts of H.R. 1 is a package to modernize registration. The centerpiece of that proposal is a plan for automatic voter registration (AVR). This bold, paradigm-shifting approach would add tens of millions to the rolls, cost less, and bolster security and accuracy. It is now the law in fifteen states and the District of Columbia.<sup>4</sup> It should be the law of the land.

**Outdated Voter Registration Systems.** More than many realize, an outdated registration system poses an obstacle to free and fair elections. One in four eligible Americans is not

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

registered to vote.<sup>5</sup> This quiet disenfranchisement is partly due to an out-of-date, and in some places ramshackle, voter registration system. The United States is the only major democracy in the world that requires individual citizens to shoulder the onus of registering to vote (and re-registering when they move).<sup>6</sup> In much of the country, voter registration still largely relies on error-prone pen and paper. In 2012, the Pew Center on the States estimated that roughly one in eight registrations in America is invalid or significantly inaccurate.<sup>7</sup>

These problems contribute to low voter turnout.<sup>8</sup> Each Election Day, millions of Americans go to the polls only to have trouble voting because of registration flaws.<sup>9</sup> Some find their names wrongly deleted from the rolls.<sup>10</sup> Others fall out of the system when they move.<sup>11</sup> One-quarter of American voters wrongly believe their registration is updated when they change their address with the U.S. Postal Service.<sup>12</sup> Election Protection, the nonpartisan voter assistance hotline, reported that registration issues were the second most common problem voters faced in both the 2018 and 2016 elections.<sup>13</sup> Registration errors affect more than those voters who are not

<sup>5</sup> Pew Center on the States, *Inaccurate, Costly and Inefficient: Evidence that America's Voter Registration System Needs an Upgrade*, 2012, 1; see also U.S. Census Bureau, *Voting and Registration in the Election of 2016*, 2017, Tbl. 1, <https://www.census.gov/data/tables/time-series/demo/voting-and-registration/p20-580.html>.

<sup>7</sup> Pew Center on the States, *Inaccurate, Costly and Inefficient*, 2012.

<sup>8</sup> According to a 2001 commission chaired by former Presidents Ford and Carter, “[t]he registration laws in the United States are among the most demanding in the democratic world ... [and are] one reason why voter turnout in the United States is near the bottom of the developed world.” See Carter and Ford: National Commission on Election Reform, *Reports of the Task Force on the Federal Election System*, 2001, 1-3. In too many parts of America this is still true.

<sup>9</sup> A Caltech/MIT study found that in 2008, approximately 3 million people tried to vote but could not because of registration problems, and millions more were thwarted by other issues. See R. Michael Alvarez, Stephen Ansolabehere, et al., 2008 Survey of the Performance of American Elections, (2009), 59, [https://elections.delaware.gov/pdfs/SPAE\\_2008.pdf](https://elections.delaware.gov/pdfs/SPAE_2008.pdf); see also Stephen Ansolabehere, Testimony Before the U.S. Senate Rules Committee 19 (Mar 11, 2009); Data from 2012 similarly demonstrates that millions of voters experienced registration problems at the polls. Charles Stewart III, *2012 Survey of the Performance of American Elections: Final Report*, 2013, 70, <http://dyn.iq.harvard.edu/dyn/dv/measuringelections>.

<sup>10</sup> Approximately 2.5 million voters experienced voter registration problems at the polls in the 2012 election. Charles Stewart III, *2012 Survey of the Performance of American Elections: Final Report*, Harvard Dataverse, 2013, ii, <http://dyn.iq.harvard.edu/dyn/dv/measuringelections>; U.S. Election Assistance Commission, *2012 Election Administration and Voting Survey*, 2013, 8-10, <https://www.eac.gov/assets/1/6/2012ElectionAdministrationandVoterSurvey.pdf>. Stewart found 2.8% of 2012 voters experienced registration problems when they tried to vote. The Election Administration and Voting Survey found that 131,590,825 people voted in 2012 and that 65.5% percent voted in person on election day (56.5%) or early (9%). 65.5% of 131,590,825 voters, multiplied by the 2.8% figure from Stewart’s study, yields 2,413,375.73 voters with registration problems at the polls in the 2012 election.

APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

on the rolls. As the bipartisan Presidential Commission on Election Administration found in 2014, registration problems cause delays at the polls and are a principal cause of long lines.<sup>14</sup>

Outdated registration systems also undermine election integrity. Incomplete and error-laden voter lists create opportunities for malefactors to defraud the system or disenfranchise eligible citizens. And they are far more expensive to maintain than more modern systems. Arizona's Maricopa County, for example, found that processing a paper registration cost 83 cents, compared to 3 cents for applications processed electronically.<sup>15</sup>

**1. Automatic Voter Registration (Title I, Subtitle A, Part 2)**

Automatic voter registration ("AVR") is a simple but transformative policy that could bring millions into the electoral process and energize our democracy. Under AVR, every eligible citizen who interacts with designated government agencies is automatically registered to vote, unless they decline registration. If adopted nationwide, it could add as many as 50 million new eligible voters to the rolls.<sup>16</sup>

AVR shifts registration from an "opt-in" to an "opt-out" approach. When eligible citizens give information to the government—for example, to get a driver's license, receive Social Security benefits, apply for public services, register for classes at a public university, or become naturalized citizens—they are automatically signed up to vote unless they decline. This reflects how the human brain works; behavioral scientists have shown that we are hard-wired to choose the default option presented to us.<sup>17</sup>

The policy also requires that voter registration information be electronically transferred to election officials, rejecting paper forms and snail mail. This significantly increases the accuracy of the rolls and drives down the costs of maintaining them.<sup>18</sup>

AVR Works. Oregon and California became the first states to adopt AVR in 2015.<sup>19</sup> Since then, thirteen more states and the District of Columbia followed—many with strong

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

bipartisan support.<sup>20</sup> In Illinois, for example, the state legislature passed AVR unanimously, and a Republican Governor signed it into law.

The new system has proven extraordinarily successful. In nine states and the District of Columbia, AVR is already up and running. In Oregon, registration rates quadrupled at DMV offices.<sup>21</sup> In Vermont, registrations jumped 62 percent in the six months after AVR was put in place compared to the same period in the previous year.<sup>22</sup> One state, California, experienced minor glitches at first, because of a computer programming design flaw. But that error was quickly caught and contained, and according to the state's motor vehicle office has since been fixed.<sup>23</sup> California too has seen dramatic increases in voter registration. As the Brennan Center finds in a forthcoming report, AVR has dramatically increased registration rates in nearly every state.

There is strong reason to believe that the reform also boosts turnout.<sup>24</sup> Oregon saw the nation's largest turnout increase after it adopted AVR.<sup>25</sup> It had no competitive statewide races, and yet the state's turnout increased by 4 percent in 2016, which was 2.5 percentage points higher than the national average.<sup>26</sup> Other registration reforms have measurably improved turnout.<sup>27</sup> When voters are automatically registered, they not only are relieved of an obstacle to voting but also are exposed to direct outreach from election officials and others.<sup>28</sup> AVR sends a strong message that all eligible citizens are welcome and expected to participate in our democracy.

Election officials enthusiastically back AVR because it improves administration and saves money. Virtually every state to have transitioned to electronic transfer of registration information has reported substantial savings from reduced staff hours processing paper, and

**BRENNAN CENTER FOR JUSTICE**  
**APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

lower printing and mailing expenses.<sup>29</sup> Eliminating paper forms improves accuracy, reduces voter complaints about registration problems, and reduces the need for the use of provisional ballots.<sup>30</sup>

Voters strongly support the reform. According to recent polling, 65 percent of Americans favor it.<sup>31</sup> Michigan and Nevada adopted AVR this past election by popular referendum, with overwhelming support from voters, including Democrats, Republicans, and Independents.<sup>32</sup> Alaska voters passed AVR in 2016 with nearly 64 percent of the vote—at the same time they voted to put Donald Trump in the White House.

**AVR Should be the National Standard.** H.R. 1 sensibly makes AVR a national standard, building on past federal reforms to the voter registration system.<sup>33</sup> Critically, the Act requires states to put AVR in place at a wide variety of government agencies beyond state motor vehicle agencies, including those that administer Social Security or provide social services, as well as higher education institutions. It also requires a one-time “look back” at agency records to register individuals who have previously interacted with government agencies. And it protects voters’ sensitive information from public disclosure.

The Act includes multiple safeguards to ensure that ineligible voters are not registered. The government agencies designated for AVR regularly collect information about individuals’ citizenship and age, and they must obtain an additional affirmation of U.S. citizenship during the registration transaction. Before anyone is registered, agencies must inform individuals of eligibility requirements and the penalties for illegal registration and offer them the opportunity to opt out. Election officials too are required to send individuals a follow up notice by mail. In light of these checks, there is no basis for critics’ alarmist speculation that AVR would result in an increase in the registration of ineligible persons. Indeed, election officials report that AVR’s elimination of paper forms *enhances* the accuracy of the rolls. As a precaution, H.R.1 also includes protections in the unlikely event that an ineligible person is inadvertently registered, to ensure that they are not harmed as a result. We strongly urge Congress to pass AVR.

<sup>33</sup> The National Voter Registration Act of 1993 required states to offer voter registration at their motor vehicle, public assistance, and disabilities agencies, among other things. 52 U.S.C. §§ 20504-20506. H.R.1’s AVR provisions build on this by expanding the agencies that offer voter registration and by making the registration process paperless at those agencies. The Help America Vote Act of 2002 pushed states into the digital age, by requiring them to create a centralized, computerized voter registration list. 52 U.S.C. § 21083. H.R.1 extends the benefits of that legislation by seamlessly transmitting voter information between registration agencies and the election officials that control the computerized voter list.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

**2. Same-Day Registration (Title I, Subtitle A, Part 3)**

Same-day registration (SDR) allows eligible citizens to register and vote on the same day. It is a strong complement to AVR, available to those eligible voters who have not interacted with government agencies or whose information has changed since they did. Because it provides eligible Americans an opportunity to vote even if their names are not on the voter rolls, SDR safeguards against improper purges, registration system errors, and cybersecurity attacks.

SDR has been used successfully in several states since the 1970s. Today, seventeen states and the District of Columbia offer some form of same day registration, either on election day, during early voting, or both.<sup>34</sup> Studies indicate that SDR boosts voter turnout by 5 to 7 percent.<sup>35</sup> And it is highly popular with voters. This past November, supermajorities of voters in Michigan and Maryland passed ballot measures that, respectively, implemented and expanded same day registration. According to recent polls, more than 60 percent of Americans support SDR.<sup>36</sup> As part of the full package of reforms, SDR's use would be limited, since AVR would capture the vast majority of voters well before Election Day. Taken together, AVR and SDR would ensure that no eligible voter is left out.

**3. Online Registration (Title I, Subtitle A, Part 1)**

H.R.1 also requires states to offer secure and accessible online registration. At a time when many Americans do everything from banking to reviewing medical records online, voters want this convenient method of registration. The online registration provisions in H.R. 1 would let all voters register, update registration information, and check registrations online. They also would ensure that these benefits are available to citizens who do not have driver's licenses.

In addition to offering voter convenience, online registration saves money and improves voter roll accuracy. Washington State reported savings of 25 cents with each online registration (for a total of about \$176,000 in savings) in the first two years of the program, and its local officials save between 50 cents and two dollars per online transaction.<sup>37</sup> Election officials also

report that letting voters enter their own information significantly reduces the likelihood of incomplete applications and mistakes.<sup>38</sup>

It is not surprising, therefore, that online registration is incredibly popular and has spread rapidly. In 2010, only six states offered online voter registration. Now, thirty-eight states do.<sup>39</sup> It is time to bring the reform to the whole country.

**4. Voter Purge Protections (Title I, Subtitle A; Title II, Subtitle F)**

The Act curbs illegal efforts to purge eligible voters from the rolls, addressing one of the biggest problems we saw in the last election.

Voter purges—the large-scale deletion of voters’ names from the rolls—are on the rise.<sup>40</sup> The Brennan Center has calculated that almost 4 million more names were purged from the rolls between 2014 and 2016 than between 2006 and 2008.<sup>41</sup> Purge activity has increased at a substantially greater rate in states that were subject to federal oversight under the Voting Rights Act prior to the Supreme Court’s decision in *Shelby County v. Holder*.<sup>42</sup> Georgia, for example, purged 1.5 million voters between the 2012 and 2016 elections—double its rate between 2008 and 2012. Texas purged 363,000 more voters between 2012 and 2014 than it did between 2008 and 2010. We found that *2 million fewer voters* would have been purged between 2012 and 2016 if jurisdictions previously subject to pre-clearance had purged at the same rate as other jurisdictions.<sup>43</sup>

Purges that are implemented incorrectly disenfranchise legitimate voters and cause confusion and delay at the polls. Last month, for example, the Texas Secretary of State sent lists of approximately 95,000 alleged non-citizens to county officials for purging—but within days, the state was forced to retreat, once it became clear that the lists were rife with inaccuracies.<sup>44</sup> In 2016, New York election officials erroneously deleted hundreds of thousands from the voter rolls, with no public warning and little notice to those who had been purged.<sup>45</sup> The same year, thousands of Arkansas voters were purged because of supposed felony convictions—but the lists

<sup>45</sup> Brater et al., *Purges*, 5-6.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

BRENNAN CENTER FOR JUSTICE

that were used were highly inaccurate, and included many voters who had never committed a felony or had had their voting rights restored.<sup>46</sup>

Purge practices can be applied in a discriminatory manner that disproportionately affects minority voters.<sup>47</sup> In particular, matching voter lists with other government databases to ferret out ineligible voters can generate discriminatory results if the matching is done without adequate safeguards. African-American, Asian-American, and Latino voters are much more likely than Caucasians to have one of the most common 100 last names in the United States, resulting in a higher rate of false positives.<sup>48</sup>

The Act puts strong protections in place to prevent improper purges. First, it puts new guardrails on the use of inter-state databases that purport to identify voters that have re-registered in a new state, but that have been proven to produce deeply flawed data. Second, it prohibits election officials from relying on a citizen’s failure to vote in an election as evidence of ineligibility to vote. The Brennan Center supports these protections and urges states to provide additional notice to voters prior to purging them so eligible voters can intervene before they are removed from the rolls.

**B. Commitment to Restore the Voting Rights Act (Title II, Subtitle A)**

As recent experience makes clear, Congress must restore the full protections of the Voting Rights Act of 1965 (“VRA”), which the U.S. Supreme Court hobbled in 2013 in *Shelby County*.<sup>49</sup> Thanks in part to *Shelby County*, the recent midterm elections were marred by some of the worst voter suppression of the modern era,<sup>50</sup> including large-scale voter purges,<sup>51</sup> polling place and early voting site closures, especially in minority neighborhoods; burdensome voter ID requirements that excluded IDs possessed by minority citizens;<sup>52</sup> unnecessarily strict registration rules like Georgia’s “exact match” policy, under which 53,000 voter registrations—the overwhelming majority of which belonged to African-Americans, Latinos, and Asian-Americans—were put on hold;<sup>53</sup> and suspicious rejections of absentee ballots,<sup>54</sup> among other

things.<sup>55</sup> We are therefore pleased that H.R. 1 affirms a strong commitment to restore the full protections of the Voting Rights Act.

The VRA is widely regarded as the single most effective piece of civil rights legislation in our nation's history.<sup>56</sup> As recently as 2006 it won reauthorization with overwhelming bipartisan support.<sup>57</sup> For nearly five decades, the linchpin of the VRA's success was the Section 5 pre-clearance provision, which required certain states with a history of discriminatory voting practices to obtain approval from the federal government for any voting rules changes before putting them into effect. Section 5 deterred and prevented discriminatory changes to voting rules right up until the time the Supreme Court halted its operation. Between 1998 and 2013, Section 5 blocked 86 discriminatory changes (13 in the final 18 months before the *Shelby County* ruling), caused hundreds more to be withdrawn after Justice Department inquiry, and prevented still more from being put forward because policymakers knew they would not pass muster.<sup>58</sup>

*Shelby County* eviscerated Section 5 by striking down the "coverage formula" that determined which states were subject to pre-clearance. That resulted in a predictable flood of discriminatory voting rules, contributing to a now decade-long trend in the states of restrictive voting laws, which the Brennan Center has documented extensively.<sup>59</sup> Within hours of the Court's decision, Texas announced that it would implement what was then the nation's strictest voter identification law—a law that had previously been denied preclearance because of its discriminatory impact. Shortly afterward, Alabama, Arizona, Florida, Mississippi, North Carolina, and Virginia also moved ahead with restrictive voting laws or practices that previously would have been subject to pre-clearance.<sup>60</sup> In the years since, federal courts have repeatedly found that new laws passed after *Shelby* made it harder for minorities to vote, some intentionally so.<sup>61</sup> Our research regarding last year's election confirmed the persistence of voter suppression

and the willingness of too many state officials to continue developing new tactics to keep people from voting.<sup>62</sup>

Section 2 of the VRA—which prohibits discriminatory voting practices nationwide and permits private parties and the Justice Department to challenge those practices in court—remains an important bulwark against discrimination. But Section 2 lawsuits are not a substitute for pre-clearance. They are far more lengthy and expensive, and often do not yield remedies for impacted voters until after an election (or several) is over.<sup>63</sup> Our case against Texas’s 2011 voter ID law illustrates this point.<sup>64</sup> The law initially did not go into effect because a three-judge federal court refused to preclear it under Section 5. But that decision was vacated after *Shelby County*, spurring multi-year litigation under Section 2. Despite the fact that every court that has considered the law found it discriminatory (and a federal district court found it intentionally so), the law remained in effect until a temporary remedy was ordered for the November 2016 election. In the interim, Texans voted in 3 federal and 4 statewide elections and numerous local elections under discriminatory rules.

Congress has the power to address these problems, by updating the VRA’s coverage formula, examining its coverage, and restoring the VRA to its full power. As this Committee recognizes, any new coverage formula must be supported by a thorough legislative record. We commend the commitment to restoring the VRA reflected in H.R.1, and we urge Congress to make development of this record and passage of a renewed VRA a top priority.

**C. Nationwide Early Voting (Title I, Subtitle H)**

H.R.1 also provides all voters with the flexibility to vote early during the two weeks before Election Day, which will boost turnout and make it easier for hard-working Americans to vote.

Holding elections on a single workday in mid-November is a relic of the nineteenth century; it was done for the convenience of farmers who had to ride a horse and buggy to the county seat in order to cast a ballot.<sup>65</sup> This no longer works for many Americans, who must find time to cast a ballot between jobs, childcare, and the everyday obligations of modern life.

---

found that a 2013 voting law passed by North Carolina targeted African-American voters with “surgical precision.” N. Carolina State Conference of NAACP v. McCrory, 831 F.3d 204, 214 (4th Cir. 2016).

<sup>65</sup> Weiser and Bannon, *Democracy: An Election Agenda for Candidates, Activists, and Legislators*, 7.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

Early voting works well. Thirty-nine states offer some opportunity to vote in person before Election Day.<sup>66</sup> And more than a dozen of those states offer early voting for a period comparable to or greater than the two-week period leading to Election Day required by H.R. 1.<sup>67</sup>

Despite the popularity of early voting, the absence of a national standard means that some states have few or inconsistent early voting hours, and others have been able to engage in politicized cutbacks to early voting.<sup>68</sup> Over the past decade, multiple states have reduced early voting days or sites used disproportionately by African-American voters (such as the elimination of early voting on the Sunday before Election Day), and federal courts have struck down early voting cutbacks in North Carolina and Wisconsin because they were intentionally discriminatory.<sup>69</sup>

H.R. 1 will make voting more manageable by requiring that states provide two weeks of early voting and equitable geographic distribution of early voting sites. A guaranteed early voting period will reduce long lines at the polls and ease the pressure on election officials and poll workers on Election Day, by spreading out the days on which people cast their ballots. For this reason, it was one of the principal recommendations of the bipartisan Presidential Commission of Election Administration for reducing long lines.<sup>70</sup> It will also make it easier for election officials to spot and solve problems like registration errors or voting machine glitches before they impact most voters.<sup>71</sup> For these reasons, election officials report high satisfaction with early voting. The Brennan Center's research indicates that two weeks is an effective minimum time period for generating the benefits of early voting.<sup>72</sup>

Early voting is popular with voters too, with study after study showing a significant positive effect on voter satisfaction.<sup>73</sup> It is a critical element of a convenient and modern voting system.

**D. Voting Rights Restoration (Title I, Subtitle E)**

The Democracy Restoration Act in Title I, Subtitle E of H.R. 1 would restore federal voting rights to citizens with past criminal convictions living in our communities, strengthening those communities, offering a second chance to those who have paid their debts to society, and removing the stain of a policy born out of Jim Crow.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

**Harms of Current Disenfranchisement Laws.** A confusing patchwork of discriminatory disenfranchisement laws cause profound harm across the country. Nationally, state laws deny more than 4.7 million citizens the right to vote because of a criminal conviction.<sup>74</sup> 3.3 million of these citizens are no longer incarcerated; they live in our communities, work, pay taxes, and raise families.<sup>75</sup>

Disenfranchisement laws vary dramatically from state to state. They range from permanent disenfranchisement for everyone convicted of a felony in Iowa and Kentucky, to no disenfranchisement at all in Vermont and Maine. In between these extremes there are states that distinguish between different types of felonies, states that treat repeat offenders differently, and varying rules on what parts of a sentence must be completed before rights are restored.<sup>76</sup> Navigating this patchwork of state laws causes confusion for everyone—including election officials and prospective voters—about who is eligible to vote. The result is large-scale *de facto* disenfranchisement of voters who are eligible but do not know it.<sup>77</sup>

Regardless of these particulars, disenfranchisement laws are discriminatory and especially impact African Americans. In 2016, one in 13 voting-age Black citizens could not vote, a disenfranchisement rate more than 4 times that of all other Americans.<sup>78</sup> In three states the ratio was one in five.<sup>79</sup> This unequal impact is no accident—many states’ criminal disenfranchisement laws are rooted in nineteenth-century attempts to evade the Fifteenth Amendment’s mandate that Black men be given the right to vote.<sup>80</sup>

---

<sup>74</sup> Scholars previously estimated that about 6.1 million citizens were disenfranchised nationwide. See Christopher Uggen et al., *6 Million Lost Voters: State-Level Estimates of Felony Disenfranchisement*, The Sentencing Project, 2016, 4. Florida accounted for approximately 1.5 million of these because its constitution permanently disenfranchised everyone convicted of a felony. *See id.* Since then, in November 2018, Florida voters approved the Voting Restoration Amendment, which restores voting rights to anyone who has completed all terms of their sentence. *See Fl. Const. Art. VI, § 4 (2019).* Unless otherwise noted, all of the numbers cited in this testimony adjust for the estimated 1.4 million voters whose rights were or should be restored by that change. *See Lori Rozsa, “A Joyous Day” Ahead as 1.4 Million Florida Ex-Felons Have Voting Rights Restored,” Washington Post, Jan. 5, 2019, [https://www.washingtonpost.com/national/a-joyous-day-ahead-as-14-million-florida-ex-felons-have-voting-rights-restored/2019/01/05/58650ee2-106f-11e9-8938-5898adc28fa2\\_story.html?noredirect=on&utm\\_term=.b1dbaca9c4a0](https://www.washingtonpost.com/national/a-joyous-day-ahead-as-14-million-florida-ex-felons-have-voting-rights-restored/2019/01/05/58650ee2-106f-11e9-8938-5898adc28fa2_story.html?noredirect=on&utm_term=.b1dbaca9c4a0).*

<sup>77</sup> Erika Wood and Rachel Bloom, *De Facto Disenfranchisement*, American Civil Liberties Union and Brennan Center for Justice, 2008, [http://www.brennancenter.org/sites/default/files/legacy/publications/09\\_08\\_DeFacto\\_Disenfranchisement.pdf](http://www.brennancenter.org/sites/default/files/legacy/publications/09_08_DeFacto_Disenfranchisement.pdf). The ACLU found that many elections officials misunderstand their state’s felony disenfranchisement laws, meaning that “untold hundreds of thousands of eligible, would-be voters throughout the country” may be getting turned away by misinformation.

<sup>78</sup> Uggen et al., *6 Million Lost Voters*, 3. This number has not been adjusted for the passage of the Voting Restoration Amendment in Florida.

<sup>79</sup> *Id.* These states are Kentucky, Tennessee, and Virginia. The ratio in Florida was one in five as well but has likely improved as a result of the passage of the Voting Restoration Amendment.

APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

This disproportionate impact on people of color means that all too often entire communities are shut out of our democracy. Disenfranchisement laws have a negative ripple effect beyond those people within their direct reach. Research suggest that these laws may affect turnout in neighborhoods with high incarceration rates, even among citizens who are eligible to vote.<sup>81</sup> This is not surprising. Children learn civic engagement habits from their parents. Neighbors encourage each other's political participation. And when a significant portion of a community is disenfranchised, it sends a damaging message to others about the legitimacy of democracy and the respect given to their voices.

**The Promise of Voting Rights Restoration.** H.R. 1 adopts a simple and fair rule: if you are out of prison and living in the community, you get to vote in federal elections. It also requires states to provide written notice to individuals with criminal convictions when their voting rights are restored.

These changes would have a profoundly positive impact on affected citizens and society. We all benefit from the successful reentry of formerly incarcerated citizens into our communities. Restoring their voting rights sends the message that they are truly welcome to participate and are entitled to the respect, dignity and responsibility of full citizenship. That message pays concrete dividends. One study found “consistent differences between voters and non-voters in rates of subsequent arrests, incarceration, and self-reported criminal behavior.”<sup>82</sup> For this reason, criminal justice professionals support automatic restoration of voting rights upon release from prison.<sup>83</sup>

Voting rights restoration also benefits the electoral process, by reducing confusion and easing the burdens on elections officials to determine who is eligible to vote. If every citizen living in the community can vote, officials have a bright line rule to apply. This clear rule also eliminates one of the principal bases for erroneous purges of eligible citizens from the voting rolls.

For these reasons, rights restoration is immensely popular among Americans of all political stripes. This past November, 65 percent of Florida voters passed a ballot initiative restoring voting rights to 1.4 million of their fellow residents, with a massive groundswell of bipartisan support.<sup>84</sup> Governor Kim Reynolds, Republican of Iowa, recently endorsed a similar

constitutional amendment in her state.<sup>85</sup> And over the past two decades, fourteen states have restored voting rights to segments of the population.<sup>86</sup>

Congress has the authority to act. The Supreme Court has previously upheld congressional expansion of the pool of voters qualified for federal elections when Congress lowered the voting age to 18.<sup>87</sup> Here, there are three sources of congressional power: the Elections Clause of Article I, section 4, the Fourteenth Amendment, and the Fifteenth Amendment. As detailed below, Congress has very broad powers to regulate federal elections under the Elections Clause.<sup>88</sup> Because many state criminal disenfranchisement laws were enacted with a racially discriminatory intent and have a racially discriminatory impact, Congress can also act under its powers to enforce the Fourteenth and Fifteenth Amendments, which guarantee equal protection of the laws and prohibit denial of the right to vote on the basis of race, respectively. The Supreme Court has described this enforcement power as “a broad power indeed,” one that gives Congress a “wide berth” to devise appropriate remedial and preventative measures for discriminatory actions.<sup>89</sup>

**E. Prohibiting Deceptive Practices (Title I, Subtitle D)**

The Act increases protections against, and remedies for, efforts to use deception or intimidation to prevent people from voting or registering to vote. Unfortunately, attempts to suppress votes through deception and intimidation remain all too widespread. Every election cycle, journalists and non-partisan Election Protection volunteers document attempts at voter deception and intimidation.<sup>90</sup> This is not a new problem, but now social media platforms make the mass dissemination of misleading information easy and allow for perpetrators to target particular audiences with precision. In a recent analysis for the Brennan Center, for example, University of Wisconsin Professor Young Mie Kim documented hundreds of messages on Facebook and Twitter designed to discourage or prevent people from voting in the 2018 election.<sup>91</sup>

**BRENNAN CENTER FOR JUSTICE**  
**APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

While federal law already prohibits voter intimidation, fraud, and intentional efforts to deprive others of their right to vote,<sup>92</sup> existing laws have not been strong enough to deter misconduct. Moreover, no law specifically targets deceptive practices, nor is there any authority charged with investigating such practices and providing voters with corrected information.

H.R.1 protects voters from deception and intimidation in three ways. First, it increases criminal penalties for false and misleading statements and intimidation aimed at impeding or preventing a person from voting or registering to vote. Second, it empowers citizens to go to court to stop voter deception. Third, it blunts the effect of deceptive information by requiring designated government officials to disseminate accurate, corrective information to voters. These provisions will give federal law enforcement agencies and private citizens the opportunity to stop bad actors from undermining our elections. We encourage Congress to enact them.

## **II. Campaign Finance**

### **A. Small Donor Public Financing (Title V, Subtitles B and C)**

H.R.1 also dramatically overhauls federal campaign finance law. The centerpiece of these reforms is small-donor public financing, which has the potential to fundamentally transform political campaigns and counteract the worst effects of the Supreme Court's now-infamous decision in *Citizens United*.<sup>93</sup>

**Big Money Undermines American Democracy.** Thanks to *Citizens United* and related cases, a small class of wealthy donors has achieved unprecedented clout in American politics.<sup>94</sup> Super PACs, political committees that can raise and spend unlimited funds, poured more than \$3 billion into federal elections last year; of that total, roughly a third can come from a mere 11 donors.<sup>95</sup> Another \$1 billion has come from dark money groups that keep their donors secret, but which we know are funded by many of the same donors who back super PACs.<sup>96</sup> While all of these groups are supposed to operate independently of candidates and parties, many actually

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

have close ties to elected officials, to the point where they basically function as a campaign arm.<sup>97</sup> This creates an unacceptable risk of corruption and its appearance.

Recent election cycles have also seen a surge in giving by small donors (donors who give \$200 or less),<sup>98</sup> but they still account for less than a fifth of the total raised and spent on campaigns.<sup>99</sup> In the two most recent midterm election cycles, the top 100 super PAC donors gave almost as much as all the millions of small donors combined.<sup>100</sup> In 2018, the top five individuals or couples who gave to super PACs alone contributed almost \$350 million.<sup>101</sup>

The dominance of wealthy elites and special interests has a direct impact on policy. Studies have repeatedly shown that campaign donors have far more clout than voters,<sup>102</sup> which they often use to pursue objectives most Americans do not share.<sup>103</sup> The last Congress, for

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

**1. Small-Donor Matching for Congressional Races (Title V, Subtitle B, Part 2)**

The Government by the People Act of 2019 in Title V, Subtitle B, Part 2 of H.R.1 establishes a small donor matching system for congressional races. Small donor matching is a transformative solution to the problem of big money. While its potential may be profound, the basics of this system are simple. Candidates opt into the system by raising enough small start-up donations to qualify and accepting certain conditions such as lower contribution limits. Donors who give to participating candidates in small amounts will then see their contributions matched by public money.<sup>109</sup> The Act matches donations of \$1-\$200 to participating congressional candidates at a six-to-one ratio, the same ratio used until recently in New York City's highly successful program.<sup>110</sup>

**Small Donor Matching is a Tried and True Solution.** Small donor matching has a long and successful history in American elections. It was first proposed more than a century ago by President Theodore Roosevelt.<sup>111</sup> Congress incorporated a one-to-one small donor match for primaries into the presidential public financing system enacted in 1971. The vast majority of major party presidential candidates from 1976 to 2008 used matching funds in their primary campaigns.<sup>112</sup> Thanks to the presidential public financing system, Ronald Reagan was reelected by a landslide in 1984 without holding a single fundraiser.<sup>113</sup> Two years later, the bipartisan Commission on National Elections concluded that: "Public financing of presidential elections has clearly proved its worth in opening up the process, reducing the influence of individuals and groups, and virtually ending corruption in presidential election finance."<sup>114</sup>

Small donor matching has also found success at the state level, where it has been adopted in a wide variety of jurisdictions.<sup>115</sup> The system that has been studied the most is New York

<sup>109</sup> Brent Ferguson, *State Options for Reform*, Brennan Center for Justice, 2015, 1, available at [https://www.brennancenter.org/sites/default/files/publications/State\\_Options\\_for\\_Reform\\_FINAL.pdf](https://www.brennancenter.org/sites/default/files/publications/State_Options_for_Reform_FINAL.pdf).

<sup>110</sup> Last year the city voted overwhelmingly to raise the match to an 8-to-1 ratio.

<sup>115</sup> A number of states, including Florida, Michigan, and New Jersey, provide matching funds in governor races. See Juhem Navarro-Rivera, Emmanuel Caicedo, *Public Funding for Electoral Campaigns: How 27 States, Countries, and Municipalities Empower Small Donors and Curb the Power of Big Money in Politics*, Demos, 2017, available at [https://www.demos.org/sites/default/files/publications/Public\\_Financing\\_Factsheet\\_FAJ51.pdf](https://www.demos.org/sites/default/files/publications/Public_Financing_Factsheet_FAJ51.pdf). New York State is poised to pass small donor matching for all state races this year. Andrea Sears, "2019 Could Be the Year for NY Election Reform," *Public News Service*, Jan. 14, 2019, <https://www.publicnewsservice.org/2019-01-14/civic-engagement/2019-could-be-the-year-for-ny-election-reform/a05199-1>. Comprehensive matching already exists in many other large, diverse municipalities besides New York City, including Los Angeles, Tucson, Washington, D.C., Montgomery County, Maryland, Prince George's County, Maryland, and others. See Navarro-Rivera and Caicedo, *Public Funding for Electoral Campaigns*; Martin Austermuhle, "Bowser Signs Bill Creating Public Financing Program For Political Campaigns – And Will Fund It," *WAMU*, Mar. 13, 2018, <https://wamu.org/story/18/03/13/bowser-signs-bill-creating-public-financing-program-political-campaigns-will-fund/#.XFzEYmtzQaQ>; Rachel Chason, "Prince George's Approves Matching Funds for Local Candidates – Starting in 2026," *Washington Post*, Oct. 24, 2018, [https://www.washingtonpost.com/local-md-politics/prince-georges-approves-public-finance-system-for-local-candidates/2018/10/24/47f7b75a-d738-11e8-a10f-b51546b10756\\_story.html](https://www.washingtonpost.com/local-md-politics/prince-georges-approves-public-finance-system-for-local-candidates/2018/10/24/47f7b75a-d738-11e8-a10f-b51546b10756_story.html).

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

City's, which has existed since the 1980s and currently matches donations of up to \$175.<sup>116</sup> The vast majority of city candidates participate.<sup>117</sup> Studies of the 2009 and 2013 city elections found that participating candidates took in more than 60 percent of their funds from small donors and the public match.<sup>118</sup>

The central role small donors play in funding New York City campaigns has many benefits. Most notably, the system has increased the diversity of viewpoints influencing officeholders. Small donors are far more representative of the real makeup of New York than big donors in terms of race, income, education level, and where they live, and officeholders who court these campaign contributions spend more time talking to everyday New Yorkers.<sup>119</sup> The comparison to state races that do not have small donor matching is remarkable. One study the Brennan Center conducted found that participating city candidates raised money from 90 percent of the city's census blocs, as compared to roughly 30 percent for state assembly candidates (who do not receive public matching dollars) running in the same areas.<sup>120</sup> The city's system has also helped more diverse candidates run, including the city's first African-American mayor and New York State's first female and first African-American elected attorney general, who began her career on the city council.<sup>121</sup>

<sup>121</sup> As New York State Attorney General Letitia James put it after being elected New York City Public Advocate: "The public financing system in New York City gave me the opportunity to compete and succeed, allowing me to represent individuals whose voices are historically ignored." Getachew and Mehta, *Breaking Down Barriers*, 7.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

**Conserving Taxpayer Funds.** Small donor matching for congressional races would transform how they are funded in a cost-effective manner. While critics claim this reform will squeeze taxpayers,<sup>122</sup> the actual price tag is modest. A reasonable estimate for congressional races comes out to less than \$1 per citizen per year over a ten year period.<sup>123</sup> There are many ways to come up with this sum that do not necessitate an increased burden on taxpayers.<sup>124</sup> There are also numerous safeguards in the Act against waste or other misuse of taxpayer funds, including detailed reporting obligations, a requirement that candidates spend available privately-raised funds at the same rate as they spend public funds, and a requirement that candidates remit unused public funds to the program.<sup>125</sup>

Ultimately, *someone* pays for candidates to run for office. Whether those sponsors are a handful of wealthy special-interest donors or everyday Americans boosted by public dollars is up to Congress.<sup>126</sup> Small donor matching stands on firm constitutional ground.<sup>127</sup> No reform has the potential to be more transformative. The time to pass this system is now.

**2. My Voice Vouchers (Title V, Subtitle B, Part 1)**

H.R.1 also creates a pilot program to provide eligible donors with \$25 in “my voice vouchers” to give to congressional candidates of their choice in increments of \$5. While less common, vouchers are another promising type of small donor public financing, one that is

<sup>122</sup> Mitch McConnell, “Behold the Democrat Politician Protection Act,” *Washington Post*, Jan. 17, 2019, [https://www.washingtonpost.com/opinions/call-hr-1-what-it-is-the-democrat-politician-protection-act/2019/01/17/dcc957bc-19cb-11e9-9ebf-c5fed1b7a081\\_story.html](https://www.washingtonpost.com/opinions/call-hr-1-what-it-is-the-democrat-politician-protection-act/2019/01/17/dcc957bc-19cb-11e9-9ebf-c5fed1b7a081_story.html).

<sup>123</sup> Lee Drutman, “Democrats’ Small-Donor Campaign Finance Proposal Is a Great Deal for Taxpayers,” *Vox*, Jan. 14, 2019, <https://www.vox.com/polyarchy/2019/1/14/18182579/democrats-hrl1-donor-campaign-finance-proposal-taxpayers>.

<sup>124</sup> See Skaggs and Wertheimer, *Empowering Small Donors*, 23; see generally *Public Financing of Elections: Where to Get the Money?* Center for Governmental Studies, 2003, available at [www.policyarchive.org/handle/10207/bitstreams/232.pdf](http://www.policyarchive.org/handle/10207/bitstreams/232.pdf).

<sup>125</sup> One witness before a hearing conducted last week by the Committee on Oversight and Reform suggested that public financing programs “have a history of corrupt actors exploiting the system for personal gain” at taxpayers’ expense. Bradley A. Smith, *Testimony of Bradley A. Smith Before the U.S. House Oversight and Reform Committee: H.R. 1: Strengthening Ethics Rules of the Executive Branch*, Institute for Free Speech, Feb. 6, 2019, 11, available at <https://www.ifs.org/expert-analysis/testimony-of-bradley-a-smith-before-the-u-s-house-overight-and-reform-committee/> (“Smith Testimony”). This is simply false. In New York City, for example, most instances of “corruption” that critics have tried to link to the small donor matching system involved no misuse of public matching funds or an attempted violation that was caught. Lawrence Norden, Brennan Center for Justice, “New York Senate Committee Denies Testimony from Campaign Finance Experts,” May 7, 2013, <https://www.brennancenter.org/analysis/ny-senate-committee-denies-testimony-campaign-finance-experts>.

Ultimately, bad actors exist in every system. The key question is whether public financing program is well-run, with good enforcement mechanisms that will find and stop misuse of public funds. The Act contains extensive provisions to do exactly that.

<sup>126</sup> As one political scientist recently put it: “There are no free lunches. If the public doesn’t foot the cost of political campaigns, wealthy donors and lobbyists will. And they will get something in return. And it will be far more than what they paid in. That’s how the system works. If we enact public financing through a small-donor matching system, the public will also get something in return. And it will be far more than what they paid in. That’s how the system works.” Drutman, “Democrats’ Small-Donor Campaign Finance Proposal Is a Great Deal for Taxpayers.”

<sup>127</sup> As the Supreme Court observed in upholding the presidential system: “Public financing is an effort not to abridge, restrict, or censor speech, but rather to use public money to facilitate and enlarge public discussion and participation in the electoral process, goals vital to a self-governing people. Thus, [it] furthers, not abridges, pertinent constitutional values.” *Buckley v. Valeo*, 424 U.S. 1, 92-93 (1976).

**BRENNAN CENTER FOR JUSTICE**  
**APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

especially beneficial for less wealthy Americans who cannot afford to make even small donations. Voters in the city of Seattle overwhelmingly passed a voucher program in 2015. In the first election where they were used, 18,000 Seattle residents contributed nearly 70,000 vouchers—more than double the total number of contributors in the 2013 election. Most of these donors had not contributed to any candidate in the two previous election cycles.<sup>128</sup> Voucher donors were much more representative of the city’s population, including women, people of color, younger residents, and less affluent residents.<sup>129</sup> The Brennan Center strongly supports piloting vouchers for federal elections.

**3. Presidential Public Financing (Title V, Subtitle C)**

Finally, H.R. 1 revamps the presidential public financing system, which provides matching funds to primary candidates and block grants to general election nominees. Despite its success, that system ultimately failed because it did not afford candidates sufficient funds to compete in light of the dramatic growth in campaign costs.<sup>130</sup> The Act addresses this problem by increasing the primary match to a six-to-one ratio, increasing the block grant for nominees in the general election, and repealing burdensome limits on how much participating candidates can spend. The Brennan Center supports all of these changes.

**B. Improving Federal Disclosure Law (Title IV, Subtitles B and C)**

H.R. 1 also updates federal campaign disclosure rules, including by closing the main loopholes in federal disclosure law that have given rise to dark money and extending basic transparency requirements to online political ads.

**The Rise of Dark Money.** Over the last decade, the prevalence of secret money has become one of the biggest challenges for our campaign finance system. As recently as 2006, almost all federal campaign spending was transparent. But *Citizens United* made it possible for new types of entities to spend limitless funds on electoral advocacy—including 501(c)(4) and (c)(6) nonprofit corporations that are not required to make their sources of funding public.<sup>131</sup> These dark money groups have spent almost \$1 billion on federal elections since 2010.<sup>132</sup> And they have given millions more to super PACs, in a manner that allows those entities (which in theory do have to disclose their donors) to keep major underlying funders anonymous.<sup>133</sup> All of this secret spending tends to be concentrated in the closest races. One Brennan Center study of

APPENDIX B**

BRENNAN CENTER FOR JUSTICE

the 2014 midterms, for instance, showed that more than 90 percent of dark money spending in Senate contests was concentrated in the eleven most competitive contests.<sup>134</sup>

Dark money deprives voters of critical information needed to make informed decisions.<sup>135</sup> Voters are entitled to know who is trying influence them, and what those spenders want from the government. It is donor disclosure, as the *Citizens United* court itself pointed out, that allows voters to determine whether elected leaders “are in the pocket of so-called ‘moneyed interests.’”<sup>136</sup> Dark money also harms shareholders in many publicly-traded companies, which frequently use dark money groups as conduits for political spending.<sup>137</sup> Researchers have shown that the corporate managers who drive this giving sometimes do so for their own reasons, and not to maximize shareholder value.<sup>138</sup> Shareholders need transparency so they can monitor how their money is being spent.<sup>139</sup>

**The New Threat of Foreign Interference.** More recently, it has come to light that lack of transparency is also providing multiple avenues for foreign governments and nationals to meddle in the American political system. In 2016, for example, the Russian government donated millions to the National Rifle Association, a 501(c)(4) nonprofit that does not disclose its donors. This money was allegedly intended to influence the presidential race.<sup>140</sup>

Russia’s efforts to inject money into the 2016 election did not stop with dark money. Russian operatives also took advantage of weak disclosure rules for paid Internet ads. Overall, political advertisers spent \$1.4 billion online in the 2016 election, almost eight times what they spent in 2012.<sup>141</sup> Online ads are cheap to produce and disseminate instantly to vast potential audiences across great distances without regard for political boundaries.<sup>142</sup> Moreover, sophisticated micro-targeting tools have given rise to the “dark ad,” which is seen only by a narrowly targeted audience, threatening to remove much of the political debate around elections from public view.<sup>143</sup> Russian operatives exploited these capabilities to purchase millions of

BRENNAN CENTER FOR JUSTICE

targeted ads in an attempt to influence and foment discord around the 2016 election.<sup>144</sup> And Moscow's efforts in 2016 may serve as a blueprint for other malefactors. As former Homeland Security Secretary Jeh Johnson put it, "the Russians will be back, and possibly other state actors, and possibly other bad cyber actors."<sup>145</sup>

Common Sense Reforms. H.R. 1 takes several key steps to deal with these problems. The DISCLOSE Act in Title IV, Subtitle B closes legal loopholes that have allowed dark money groups to refrain from disclosing their donors.<sup>146</sup> The Honest Ads Act in Title IV, Subtitle C expands disclosure and disclaimer requirements for "electioneering communications"<sup>147</sup>—campaign ads that mention a candidate during the time leading up to an election—to include paid Internet or digital communications. And it requires the largest online platforms, with over 50 million unique visitors per month, to establish a public file of requests to purchase political ads akin to the file broadcasters have long been required to maintain.<sup>148</sup>

These changes will make U.S. campaigns significantly more transparent. But critics have charged they will require large numbers of Americans to disclose their political activities to the government.<sup>149</sup> That is not true. The Act places no additional requirements on individual contributors. Moreover, research has shown that dark money campaign spending is funded almost entirely by wealthy corporations and individuals; there is no evidence that large numbers of small donors will be impacted.<sup>150</sup>

The Act does require relatively modest purchases of paid Internet ads to be included in platforms' public files, which is necessary because such ads can have a wide impact at relatively low cost. Russia's 2016 ads reached tens of millions of people, at a cost of roughly \$400,000.<sup>151</sup> But these provisions are limited to those who purchase paid ads; the Act does not (as critics have wrongly implied)<sup>152</sup> cover unpaid postings to an individual's personal website, social media account, or email.

Disclosure continues to stand on firm constitutional ground, with the Supreme Court repeatedly affirming that robust transparency is a permissible—and often preferred—means to

<sup>144</sup> For a more complete discussion of Russia's use of Internet ads in 2016, see Ian Vandewalker, *Oversight of Federal Political Advertisement Laws and Regulations: Statement before the Committee on House Oversight and Government Reform, Subcommittee on Information Technology*, Brennan Center for Justice, Oct. 24, 2017, available at <https://www.brennancenter.org/analysis/oversight-federal-political-advertisement-laws-and-regulations>.

<sup>146</sup> The Act amends statutory text that had been interpreted to require dark money groups to disclose only those donors who earmark their contributions to pay for a specific ad, which virtually never happens. It also prevents donors from funneling contributions through front groups to hide their true origin.

prevent “abuse of the campaign finance system.”<sup>153</sup> And while transparency has become a subject of heated debate inside the Beltway, it remains overwhelmingly popular with the general public.<sup>154</sup> These are valuable reforms that, like small donor public financing, will help blunt the worst effects of *Citizens United*. Congress should pass these reforms without delay.

**C. FEC Overhaul (Title VI, Subtitle A)**

H.R. 1 also overhauls the dysfunctional Federal Election Commission, which has failed to meaningfully enforce existing rules and would almost certainly struggle to implement the other campaign finance reforms in the Act.

**A Deadlocked and Dysfunctional Commission.** The FEC’s mission is to interpret and enforce federal campaign finance laws.<sup>155</sup> No more than three of its six members can be affiliated with any one party, and at least four votes are required to enact regulations, issue guidance, or even investigate alleged violations of the law.<sup>156</sup> By longstanding tradition, each of the two major parties takes half the FEC’s seats.<sup>157</sup> This has resulted in pervasive gridlock. The Commission routinely deadlocks on whether to pursue significant campaign finance violations—often after sitting on allegations for years without even investigating them.<sup>158</sup> Its process for issuing new regulations has virtually ground to a halt.<sup>159</sup> Increasingly, commissioners cannot

<sup>158</sup> See *Dysfunction and Deadlock: The Enforcement Crisis at the Federal Election Commission Reveals the Unlikelihood of Draining the Swamp*, Office of FEC Commissioner Ann M. Ravel, 2017, 2, 4, available at [https://classic.fec.gov/members/ravel/report\\_feb2017.pdf](https://classic.fec.gov/members/ravel/report_feb2017.pdf). In one notorious case, in which a donor admitted that he had formed an LLC solely for the purpose of hiding a \$1 million contribution to a super PAC, the Commission delayed more than four years before deadlocking on whether to proceed, notwithstanding that all six commissioners appear to have agreed that the donor broke the law. See Certification (Feb. 23, 2016), MUR 6485 (W Spann LLC et al.), available at <https://www.fec.gov/files/legal/murs/6485/16044390516.pdf>; Statement of Reasons, Comm’rs. **BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

BRENNAN CENTER FOR JUSTICE

even agree on how to answer requests for interim guidance they receive through the Commission's advisory opinion process.<sup>160</sup>

The Commission is also beset with management problems. It has not had a permanent general counsel (its chief legal officer and one of the two most important staff members) in more than five years.<sup>161</sup> Morale among its rank-and-file staff consistently ranks nears the bottom of the federal government.<sup>162</sup>

FEC dysfunction has exacerbated many problems with our campaign finance system, including dark money,<sup>163</sup> rampant coordination between candidates and outside groups,<sup>164</sup> and vulnerability to foreign interference in our campaigns.<sup>165</sup> As a bipartisan group of lawmakers wrote President Trump last year, a dysfunctional FEC “hurts honest candidates who are trying to follow the letter of the law and robs the American people of an electoral process with integrity.”<sup>166</sup> If not addressed, the Commission’s problems could stymie implementation of the other ambitious reforms in the Act. Moreover, the agency’s inability to enforce campaign finance laws contributes to a broader culture of impunity at a time of eroding respect for the rule of law and democratic values more generally.<sup>167</sup>

A Necessary Overhaul. The Act addresses the FEC’s main flaws through several targeted changes. It curtails gridlock by reducing the number of commissioners from six to five, with no more than two affiliated with any party (effectively requiring one commissioner to be an independent). It creates clear lines of accountability for management issues by allowing the president to name a real chair<sup>168</sup> to serve as the FEC’s chief administrative officer, with responsibility for the agency’s day-to-day management. It helps ensure that commissioners will have the right temperament and qualifications by establishing a bipartisan blue ribbon advisory commission to publicly vet potential nominees. It ensures that the Commission will periodically

**BRENNAN CENTER FOR JUSTICE**

have fresh leadership by ending the practice of allowing commissioners to hold over in office indefinitely past the expiration of their terms.<sup>169</sup> And it helps streamline the enforcement process by giving the Commission’s nonpartisan staff authority to investigate alleged campaign finance violations and dismiss frivolous complaints—subject to overrule by a majority vote of commissioners.<sup>170</sup>

These changes would bring the FEC’s structure more in line with other independent agencies, but with significantly greater safeguards to prevent either party from weaponizing the agency against its opponents. Critics nevertheless charge that H.R. 1 would effectuate a partisan takeover of the FEC.<sup>171</sup> They argue that, although the president could only nominate two of five commissioners from their own party, the FEC’s new structure would allow presidents to install secret partisans in the third seat reserved for an independent.<sup>172</sup> But as a legal matter, the president already has constitutional authority to nominate whomever they want to serve on the FEC, provided no more than three of the nominees are affiliated with one party at the time they are nominated.<sup>173</sup> The tradition of deferring to party leaders has no force of law.<sup>174</sup> By providing for public bipartisan vetting of nominees, H.R. 1 actually establishes stronger safeguards than currently exist. In a similar vein, critics suggest that a presidentially-appointed FEC chair would be tantamount to an “election czar,” with vast power to persecute the president’s opponents.<sup>175</sup> But the role of chair envisioned by the Act is identical to that which exists at many other independent agencies, except without a working majority of commissioners from the chair’s own party.<sup>176</sup>

---

<sup>169</sup> All four of the current commissioners (there are two vacancies) have been in office since the George W. Bush administration, notwithstanding that they are theoretically limited to one six-year term. “All Commissioners,” Federal Election Commission, accessed Oct. 18, 2018, <https://www.fec.gov/about/leadership-and-structure/commissioners/>. Before 1997, commissioners could be re-appointed to new terms an unlimited number of times. Congress eliminated reappointment with the goal of ensuring that the agency would periodically have fresh leadership, and to reinforce commissioners’ independence in the face of congressional attempts to use the reappointment process as leverage to deter enforcement. Exec. Office Appropriations Act of 1998, 105 Pub. L. No. 61, 111 Stat. 1272 (Oct. 10, 1997). But allowing indefinite holdovers has created the worst of both worlds. There is still very little turnover, and commissioners whose terms have expired are even more beholden to the president and Congress, who can replace them at any time. Weiner, *How to Fix the FEC*.

<sup>170</sup> Under the Commission’s present structure, even those wrongfully accused of violations must sometimes wait years for their names to be cleared. See, e.g., Notification with Factual and Legal Analysis, MUR 6896 (Margie Wakefield for Kansas), available at <https://www.fec.gov/files/legal/murs/6896/15044385209.pdf>; Notification with General Counsel’s Report, MUR 6904 (Cat Ping for Congress), available at <https://www.fec.gov/files/legal/murs/6904/16044396706.pdf>.

<sup>171</sup> *Smith Testimony*, 2; McConnell, “Behold the Democrat Politician Protection Plan.”

<sup>172</sup> *Smith Testimony*, 2.

<sup>173</sup> *Buckley*, 424 U.S. at 140.

<sup>174</sup> Daniel I. Weiner, “FEC’s Status Quo is Hazardous—Proposed Legislation Would Help Fix It,” *The Hill*, February 10, 2019, <https://thehill.com/opinion/campaign/429294-fecs-status-quo-is-hazardous-proposed-legislature-would-help-fix-it>.

<sup>175</sup> *Smith Testimony*, 3.

<sup>176</sup> That being said, any concerns about partisan domination of a restructured FEC can easily be addressed through minor changes to Act. For example, the Act could specify that any nominee who has been affiliated with a party at any time in the last five years (including registering as a member of the party or working for or representing the party or its candidates or officeholders) will be deemed affiliated with the party for purposes of determining partisan balance on the Commission. Model language can be found in legislation proposed in the last Congress. See H.R. 3953, 115<sup>th</sup> Congress (2017).

**BRENNAN CENTER FOR JUSTICE**  
**APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

Ultimately, no government institution functions independently from background norms that restrain excessive partisanship and other abuses of power. To insist that any reforms eliminate such risks entirely is to set an impossible standard. The Act makes sensible changes to the FEC's structure that deserve immediate passage.

**D. Reforming Coordination Rules (Title V, Subtitle B)**

H.R. 1 also tightens restrictions on coordination between candidates and outside groups like super PACs that can raise unlimited funds, another important reform.

The Supreme Court has long held that outside campaign expenditures coordinated with a candidate can be “treated as contributions,” because “[t]he ultimate effect is the same as if the [spender] had contributed the dollar amount [of the expenditure] to the candidate.”<sup>177</sup> *Citizens United* did nothing to change that. When the Supreme Court struck down limits on how much outside groups could spend in federal elections, it did so on the assumption that these groups would operate independently of candidates. The Court reasoned that the absence of “prearrangement and coordination” would “undermine[] the value of the expenditure to the candidate” and alleviate the danger of quid pro quo corruption or its appearance.<sup>178</sup>

Whether or not that was a correct assumption,<sup>179</sup> in reality the independence of much outside spending is illusory. In 2016, most presidential candidates had personal super PACs run by top aides or other close associates, whose only purpose was to get the candidate elected and for which the candidate often personally raised funds or even appeared in ads.<sup>180</sup> These entities are also becoming increasingly common in Senate and House races.<sup>181</sup> Other forms of collaboration are also on the rise, such as the practice of super PACs and other outside groups republishing flattering b-roll footage that campaigns make available online.<sup>182</sup> Even blatant instances of cooperation, like super PAC ads in which a candidate appears, have been excluded from the definition of “coordinated communication” and thus deemed not to count as contributions under federal rules.<sup>183</sup> These developments make it easy to circumvent contribution limits, especially for the class of billionaire mega-donors who have gained unprecedented influence in our elections.

H.R. 1 shores up federal coordination rules in important respects. It specifies that if a candidate and any outside group or individual collaborate on a communication that promotes,

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

attacks, supports, or opposes that candidate (the so-called PASO standard), the communication will be deemed a contribution. It also clarifies that any reproduction of campaign footage or materials also constitutes a contribution. And it creates a new category of “coordinated spenders,” groups whose actual ties to a candidate are so close that it is simply not plausible to think that the group’s spending in support of the candidate is truly independent.

Critics have attacked the constitutionality of these provisions on a number of grounds that do not notwithstanding scrutiny.<sup>184</sup> Far from being unconstitutional, the Act’s strengthening of federal coordination rules is in line with regulatory trends in the states.<sup>185</sup> These changes are necessary to restore the integrity of campaign contribution limits and we strongly support their passage.

**E. Helping Diverse Candidates Run (Title V, Subtitle D)**

Finally, the Help America Run Act in Title V, Subtitle D of H.R.1 establishes an innovative reform to help middle- and working-class candidates run for office. Campaigning for federal office is a demanding job, one that can require successful candidates to take months or even years away from paid work or full-time care of loved ones. That is simply not an option for many middle- and working-class Americans.<sup>186</sup> FEC regulations allow non-incumbents to pay themselves a salary out of campaign funds, but doing so is relatively rare, and can open a candidate up to criticism.<sup>187</sup> The Act provides a new option for non-wealthy candidates who do

<sup>184</sup> For, example, the Supreme Court has never held that strong coordination rules may only be applied to political committees. See *Smith Testimony*, 5. Doing so would create an enormous loophole given how active non-PAC dark money groups are in federal races. See Part II(B). Equally unfounded are criticisms of the PASO (promote support attack oppose) standard the Act uses to determine which communications can be coordinated. See *Smith Testimony*, 5. As the Supreme Court noted when it upheld the standard in *McConnell v. FEC*, “[p]ublic communications” that promote or attack a candidate for federal office ... undoubtably have a dramatic effect on federal elections.” *McConnell v. FEC*, 540 U.S. 93, 169-70 (2003). The Court has repeatedly declined to revisit this aspect of *McConnell*, most recently in 2017. See *Republican Party of Louisiana v. FEC*, 137 S.Ct. 2178 (2017). In light of this benefit, when such communications are made in collaboration with a candidate it is entirely reasonable to treat them as contributions. Finally, designating certain groups as “coordinated spenders” does not impermissibly presume coordination based solely on a group’s identity, as the Supreme Court has disallowed. See *Smith Testimony*, 5; *Colorado Republican Federal Campaign Committee v. FEC*, 518 U.S. 604 (1996). The case cited by opponents of the Act rejected an absolute presumption of coordination for party communications based on the supposed nature of political parties. *Colorado Republican*, 518 U.S. at 621 (Breyer, J., lead op.). The Act, in contrast, provides that groups will be deemed “coordinated spenders” based on specific facts that make any assertion of independence implausible.

not want to pay themselves a salary, allowing them to instead use campaign funds to cover specific expenses like child, elder, or other dependent care, health insurance premiums, and professional dues. Giving non-wealthy candidates more ways to make ends meet so they can run for office is another step towards truly representative government, one that we strongly support.

**III. Redistricting Reform (Title II, Subtitle E)**

The Redistricting Reform Act of 2019 in Title II, Subtitle E of H.R. 1 would end extreme partisan gerrymandering by requiring states to use independent citizen commissions for congressional redistricting, in a way that respects the Voting Rights Act and preserves communities of interest.

The need for reform is urgent. Extreme gerrymandering has reached levels unseen in the last 50 years. As Brennan Center research has shown, this decade's skewed maps have consistently given Republicans 15-17 extra congressional seats over the course of the whole decade.<sup>188</sup> Shifts in political winds have virtually no electoral impact in gerrymandered states. In 2018, for example, a political tsunami year for Democrats, no districts changed parties in Ohio and North Carolina, two states with extremely biased maps. Despite the fact that Democrats earned nearly half the vote in both states, they won only a quarter of the seats. The overwhelming majority of the seats that did change parties in 2018—72 percent—were drawn by commissions and courts.<sup>189</sup>

To be clear, Republicans are not alone in rigging districts to their advantage. A Democratic gerrymander in Maryland was proven to be just as unbreakable in the Republican wave of 2014.<sup>190</sup> Both parties are more than capable and willing to draw districts that primarily serve their partisan ends if given the opportunity, and both have done so this decade with devastating consequences for American democracy.

Many of this decade's redistricting abuses have come at the expense of communities of color. When Republican-drawn maps in Virginia, North Carolina, and Texas were successfully challenged on the grounds that they discriminated against minority voters, the states defended the maps by arguing that politics, rather than race, had been the driving force behind their maps.<sup>191</sup> Democrats in Maryland, likewise, rejected a congressional map that would have given African-Americans additional electoral opportunities because that would have created an additional

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

Republican seat.<sup>192</sup> Without a rule that makes disadvantaging minority voters for partisan gain illegal, this type of discrimination will continue and grow.

Congressional action is necessary to stop partisan and racial gerrymandering. If not reined in, the problem will only get worse next cycle. Increasingly sophisticated technologies and voter data enable modern line-drawers to lock in a durable partisan advantage with shocking accuracy. And in light of the successful gerrymanders of this past decade, political operatives will have a strong incentive (and little disincentive) to manipulate these tools for their advantage.

The courts alone will not and cannot solve the problem. Even if the United States Supreme Court develops a manageable standard for partisan gerrymandering, judicial intervention would likely be limited to the most egregious cases. It will also require aggrieved voters to resort to expensive, time-consuming, and complicated litigation in order to obtain a remedy years later. Maps drawn in 2011 are still being challenged in nearly half a dozen states even though the next round of redistricting is only two years away. The burden that this places on communities that are the most affected by gerrymandering is unacceptable.

Congress has the authority to fix congressional redistricting.<sup>193</sup> As the Supreme Court has recognized, “the Framers provided a remedy” in the Constitution for redistricting abuses through the “power bestowed on Congress to regulate elections, and . . . to restrain the practice of political gerrymandering.”<sup>194</sup> Over the years, Congress has repeatedly exercised its power under article I, section 4 to do just that.<sup>195</sup> In 1967, for example, Congress required all states to use single member congressional districts to end the drawing of racially discriminatory multimember districts, a practice adopted to defy the call of the Voting Rights Act.<sup>196</sup>

**H.R. 1 Offers Bold Solutions for Congressional Redistricting.** These abuses require strong solutions. The Redistricting Reform Act would be the boldest and most comprehensive exercise of this congressional authority. It would require states to use independent redistricting commissions to draw congressional maps and impose a uniform set of rules for how districts should be drawn, prioritizing criteria like keeping communities together, and expressly ban partisan gerrymandering. It would also open the process to public oversight and participation.

The experience of states like California and Arizona show that independent commissions work. California went from having a congressional map that was one of the least responsive to electoral changes in the nation to one of the most.<sup>197</sup> California’s maps did not just improve

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

political fairness. They also kept communities of interest together, increased representation for communities of color, and enhanced the opportunity for competition.<sup>198</sup>

It is little wonder that independent commissions are popular among voters. Last year, a record five states passed redistricting reform for congressional and/or legislative districts. The Ohio proposal carried every single congressional district in the state by a supermajority.<sup>199</sup> Reforms in Colorado and Michigan also passed overwhelmingly, with more than 60 percent of the vote statewide.<sup>200</sup>

H.R. 1 builds on what has been proven to work. Commissions would contain equal numbers of Republican, Democratic, and unaffiliated commissioners, with voting rules that ensure that no one party would be able to dominate the redistricting process. Additionally, all potential commissioners would be screened for conflicts of interest to ensure that they do not have a personal stake in the outcome.

The Act's establishment of a clear set of mapdrawing rules, listed in the order in which they are to be applied,<sup>201</sup> is an important and ground-breaking change. Federal law currently has next to no rules governing how districts are to be drawn.<sup>202</sup> Likewise, most states, with a handful of exceptions, have few rules governing congressional redistricting. This has allowed abuses to run rampant. Left unchanged, this is a situation that will only get worse in coming years. The Act's ban on partisan gerrymandering and enhanced protections for communities of color and communities of interest would further stem the kinds of abuses we saw this decade.

Finally, the Act would transform what has historically been an opaque process into one that is transparent and participatory. Commission business would be done in open public meetings and subject to oversight. Data and other information would be made available and all official communications would be subject to disclosure. Community groups and members would get a say through testimony and other feedback mechanisms. Each commission would be required to show its work and assure fairness by issuing a detailed report before taking a final vote on a plan. In short, redistricting would no longer be done in backroom deals.

These changes would dramatically improve congressional representation for all Americans, combining best practices for assuring fair, effective, and accountable representation. We urge Congress to enact them.

<sup>202</sup> There are no federal redistricting-specific regulations beyond the requirement that districts be single member and equally populated. For racial and language minorities, there are also protections available under the Equal Protection Clause and the Voting Rights Act.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

**IV. Election Security**

The Elections Security Act, in Titles I and III of H.R. 1, would take critical steps to dramatically improve security and reliability of our election infrastructure.

In the last two years, we learned disturbing details about attacks against American election infrastructure. Foreign adversaries and cyber criminals are alleged to have successfully breached state voter registration systems<sup>203</sup> and election night results reporting websites.<sup>204</sup> Attacks against election systems across the globe give us reason to fear this could be the tip of the iceberg, and that we must guard against even more ambitious efforts in the future.<sup>205</sup> Our intelligence community continues to warn that “numerous actors are regularly targeting election infrastructure.”<sup>206</sup> Although we may have escaped a serious cyber breach in the 2018 midterms, as Christopher Krebs of the Department of Homeland Security put it, “the big game we think for the adversaries is probably 2020.”<sup>207</sup>

Despite these clear threats, thirteen states continue to use voting machines that have no paper backup (which security experts have consistently argued is a minimum defense necessary to detect and recover from cyberattacks),<sup>208</sup> few states regularly review their paper backups to audit their election results,<sup>209</sup> private voting system vendors are not required to report security breaches which often leaves our election administrators and the public in the dark;<sup>210</sup> and election officials across the country say they lack the resources to implement critical election

security measures.<sup>211</sup> Unfortunately, our election security is only as strong as our weakest link.

This Act would dramatically improve the security and resilience of our nation's election administration infrastructure by replacing paperless voting systems; promoting the use of risk-limiting audits; adding electronic poll books to the list of voting systems subject to security standards; regulating election system vendors; and ensuring a consistent stream of dedicated election security funding.

**A. Replacing Paperless Voting Systems (Title I, Subtitle F)**

First and foremost, the Act would mandate the replacement of all paperless electronic voting machines with machines that require an individual paper record of each vote. Top security experts—from the National Academies of Sciences, Engineering and Medicine, the national intelligence community, academia and industry—agree that replacing paperless voting systems is a top priority.<sup>212</sup> This step is critical to improving election security because, as the National Academies put it, “[p]aper ballots form a body of evidence that is not subject to manipulation by faulty software or hardware and ... can be used to audit and verify the results of an election.” Without that record and check, software manipulation or a bug could change an election result without detection. Further, as Virginia showed in 2017 when it was forced to replace paperless systems just months before a high-profile gubernatorial election after learning of serious security vulnerabilities in its systems, this transition can easily be accomplished in the timeframe provided in this Act.<sup>213</sup>

**B. Supporting Risk Limiting Audits (Title III, Part 2)**

The Act would also provide funds for states to implement risk-limiting audits of their elections. Risk-limiting audits are considered the “gold standard” of post-election audits because they efficiently provide a high level of statistical confidence in the reported election outcome.<sup>214</sup> While paper records will not prevent programming errors, software bugs, or the insertion of corrupt software into voting systems, risk-limiting audits use these paper records and are

APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

designed to detect and correct any election outcomes impacted by such abnormalities. They are quickly growing in popularity. Two states already mandate them for use in the 2020 election,<sup>215</sup> and election officials in over a dozen jurisdictions across the country have either piloted them in the last year or will do so in 2019.<sup>216</sup>

**C. Expanding Definition of Voting Systems to Include Electronic Poll Books  
(Title III, Part 3)**

Also important, the Act would expand the existing voting equipment testing and certification process to include electronic poll books. Although poll books handle some of our most sensitive information, they have not been subject to even voluntary federal certification standards. As multiple states with substantive election IT divisions already have state electronic pollbook certification standards,<sup>217</sup> a voluntary federal certification standard is sorely needed.

**D. Regulating Election System Vendors (Title III, Part 8)**

Currently, there is almost no federal oversight of private vendors that design and maintain the election systems that store our personal information, tabulate our votes, and communicate important election information to the public. The Brennan Center has documented numerous instances of voting system failures that could have been prevented had vendors notified their clients of previous failures in other jurisdictions using the same voting equipment.<sup>218</sup> Among other things, the Act would require that any vendors who receive payment from grants made under the Act (1) certify that the infrastructure they sell to local election jurisdictions is developed and maintained in accordance with cybersecurity best practices, (2) certify that their own information technology is maintained in accordance with cybersecurity best practices, and (3) promptly report any suspected cybersecurity incident directed against the goods and services they provide under these grants.

**E. Ensuring a Consistent Stream of Federal Funding to Secure our Election Infrastructure.**

The Act provides funds for critical security measures, both to secure our elections ahead of 2020, and also to cover maintenance and upgrades to voting systems for years to come. These resources are necessary since the race to secure our elections is one without a finish line, and our

APPENDIX B**

BRENNAN CENTER FOR JUSTICE

adversaries will undoubtedly change and advance their methods of attack. The responsibility for funding elections must be shared among local, state, and federal governments, and the Act ensures that the federal government pays its fair share of the ongoing cost of voting systems, with a consistent stream of federal funding for states to procure and maintain secure equipment and implement state-of-the-art security measures to ensure the integrity of our elections.

The election security measures in H.R. 1 would not only make our election infrastructure more secure, but it would also help reduce the unconscionably long lines that so many voters experience every election. That would go a long way toward restoring Americans' confidence in our elections. We look forward to continuing to work with Congress to ensure sufficient federal resources for state and local election officials and sufficient national standards to ensure that funding is spent effectively.

**V. Ethics (Titles VII-X)**

H.R. 1 would establish stronger ethics rules for all three branches of government. Its policies are essential first steps toward strengthening ethics and accountability. The values that undergird our system of representative government are being tested like never before. Ethical constraints on self-dealing at the highest levels of government are eroding.<sup>219</sup> To reverse this process, it is vital that Congress put forward bold reforms to help ensure that officials act for the public good rather than private gain.

As detailed in the testimony of Brennan Center Senior Counsel and Spitzer Fellow Rudy Mehrbani before the House Committee on Oversight and Reform, the Brennan Center strongly supports all the Act's ethics reforms, especially its measures to increase the independence and authority of the Office of Government Ethics, provide better transparency for top officials, and slow the "revolving door" between government and industry. These are especially valuable changes.<sup>220</sup> We also strongly support the Act's requirement that the Judicial Conference of the United States develop a code of conduct that includes Supreme Court justices, as explained in more detail in a letter my colleagues and I sent to the House Judiciary Committee on January 29, 2019.<sup>221</sup> We look forward to continuing to work with Congress on other much-needed reforms.<sup>222</sup>

**VI. Authority of Congress**

Finally, Congress unequivocally has the authority to enact all the democracy reforms set forth in Act, especially under Article I, Section 4 of Constitution—known as the Elections

BRENNAN CENTER FOR JUSTICE

Clause. The Elections Clause empowers Congress, “at any time,” to “make or alter” any regulations for federal elections.<sup>223</sup>

With the exception of a 1921 case that has since been overturned, the Supreme Court has consistently interpreted the Elections Clause to endow Congress with sweeping power to regulate the time, place, and manner of elections.<sup>224</sup> As recently as 2013, the Court said, in an opinion by Justice Scalia, that Congress’s power under the Elections Clause is so broad that it includes “authority to provide a complete code for congressional elections[.]”<sup>225</sup> Accordingly, the Supreme Court has found that the Elections Clause authorizes legislation related to voter registration,<sup>226</sup> redistricting,<sup>227</sup> campaign finance,<sup>228</sup> and corruption in presidential elections.<sup>229</sup>

---

<sup>223</sup> The Elections Clause provides: “The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof, but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing [sic] Senators.” U.S. Const. art. I, § 4, cl. 1.

<sup>224</sup> See, e.g., *Inter Tribal Council*, 570 U.S. at 9 (“The power of Congress over the ‘Times, Places and Manner’ of congressional elections ‘is paramount, and may be exercised at any time, and to any extent which it deems expedient; and so far as it is exercised, and no farther, the regulations effected supersede those of the State which are inconsistent therewith.’”) (quoting *Ex parte Siebold*, 100 U.S. 371, 392 (1879)); *Ex parte Yarbrough*, 110 U.S. 651, 661–62 (1884) (“it is not doubted” “that congress can, by law, protect the act of voting, the place where it is done, and the man who votes from personal violence or intimidation, and the election itself from corruption or fraud”); *United States v. Mosley*, 238 U.S. 383, 386 (1915) (“We regard it as . . . unquestionable that the right to have one’s vote counted is as open to protection by Congress as the right to put a ballot in a box.”); *Smiley v. Holm*, 285 U.S. 355, 366 (1932) (“It cannot be doubted that these comprehensive words embrace authority to provide a complete code for congressional elections, not only as to times and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns; in short, to enact the numerous requirements as to procedure and safeguards which experience shows are necessary in order to enforce the fundamental right involved.”); *United States v. Classic*, 313 U.S. 299, 319–20 (1941) (“Unless the constitutional protection of the integrity of ‘elections’ extends to primary elections, Congress is left powerless to effect the constitutional purpose. . . . Words, especially those of a constitution, are not to be read with such stultifying narrowness. The words of ss 2 and 4 of Article I, read in the sense which is plainly permissible and in the light of the constitutional purpose, require us to hold that a primary election which involves a necessary step in the choice of candidates for election as representatives in Congress, and which in the circumstances of this case controls that choice, is an election within the meaning of the constitutional provision and is subject to congressional regulation as to the manner of holding it.”); *Buckley*, 424 U.S. at 13 n.16 (recognizing that *Classic* overturned *Newberry v. United States*, 256 U.S. 232 (1921), which had held that the Elections Clause did not apply to primary elections); *Oregon v. Mitchell*, 400 U.S. 112, 121 (1970) (“The breadth of power granted to Congress to make or alter election regulations in national elections, including the qualifications of voters, is demonstrated by the fact that the Framers of the Constitution and the state legislatures which ratified it intended to grant to Congress the power to lay out or alter the boundaries of the congressional districts.”); *Foster v. Love*, 522 U.S. 67, 72 n.2 (1997) (“The [Elections] Clause gives Congress ‘comprehensive’ authority to regulate the details of elections, including the power to impose ‘the numerous requirements as to procedure and safeguards which experience shows are necessary in order to enforce the fundamental right involved.’”) (quoting *Smiley*, 285 U.S. at 366).

<sup>225</sup> *Inter Tribal Council*, 570 U.S. at 8–9 (quoting *Smiley*, 285 U.S. at 366).

<sup>226</sup> *Id.*

<sup>227</sup> *Vieth*, 541 U.S. at 275 (stating that the Elections Clause “permit[s] Congress to ‘make or alter’ the ‘districts for federal elections’”); *Wesberry v. Sanders*, 376 U.S. 1, 16 (1964) (“Speakers at the ratifying conventions emphasized that the House of Representatives was meant to be free of the malapportionment then existing in some of the State legislatures . . . and argued that the power given Congress in Art. I, s 4, was meant to be used to vindicate the people’s right to equality of representation in the House.”) (citations omitted).

<sup>228</sup> *Buckley*, 424 U.S. at 13 (“The constitutional power of Congress to regulate federal elections is well established and is not questioned by any of the parties in this case.”).

<sup>229</sup> *Id.* 132 (“This Court has also held that it has very broad authority to prevent corruption in national Presidential elections.”) (citing *Burroughs v. United States*, 290 U.S. 534 (1934)).

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**BRENNAN CENTER FOR JUSTICE**

There is thus no question that most of the Act’s provisions fall squarely within Congress’s authority over federal elections. Some, such as Congress’s power to strengthen the Voting Rights Act and to restore voting rights to individuals with past convictions under Title I, Subtitle E, are also rooted in authority granted to it under the Fourteenth and Fifteenth Amendments.<sup>230</sup>

In fact, the Act embodies the Framers’ central goal in establishing the Elections Clause—ensuring that Congress can override efforts by states to manipulate the federal voting process.<sup>231</sup> As they drafted the Constitution, the Framers were concerned that states, left to their own devices, would suppress or skew the vote. For example, at the Constitutional Convention, James Madison urged that, without the Elections Clause, “[w]henever the State Legislatures had a favorite measure to carry, they would take care so to mould their regulations as to favor the candidates they wished to succeed.”<sup>232</sup> The Framers therefore designed the Elections Clause to prevent states from manipulating election outcomes and to prevent the development of factions within states that might “entrench themselves or place their interests over those of the electorate.”<sup>233</sup> The Framers deliberately granted wide-ranging authority under the Elections Clause to ensure that Congress would be able to combat even those state abuses of power that were unforeseeable at the time.<sup>234</sup> Thus, as Justice Scalia recognized, the states’ power to regulate federal elections has always been subject to federal law.<sup>235</sup>

\* \* \*

Voters sent a clear message in 2018: they want to see Congress tackle these problems with bold solutions to ensure that all Americans can participate in the political process and have their voices heard in the halls of government. Now it is up to elected leaders to deliver. H.R. 1 is a down-payment on the promise of a democracy that works for everyone. We urge its prompt passage.

Thank you.

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

**BRENNAN  
CENTER  
FOR JUSTICE**

Testimony of

**Myrna Pérez**

Deputy Director, Democracy Program

Director, Voting Rights & Elections Project

Brennan Center for Justice at NYU School of Law

Hearing on Protecting the Right to Vote: Best and Worst Practices

The Committee on Oversight and Reform, U.S. House of Representatives

Subcommittee on Civil Rights and Civil Liberties

May 1, 2019

Chairman Raskin, Ranking Member Roy, and members of the Committee:

Thank you for the opportunity to submit this testimony. The Brennan Center for Justice strongly supports this Committee's examination of voter suppression in the states and encourages efforts to protect every eligible American's right to vote.<sup>1</sup>

State voter suppression is a real, persistent, and urgent threat to our democracy. Since 2010, at least half of the states in our nation have passed new policies that make it harder for people to register and vote. These practices include cutbacks to early voting, new obstacles to voter registration, and onerous voter identification requirements, among others.

Over the same period, we have seen some states implement new, innovative policies to expand access to the ballot. For example, in the past four years, 15 states and the District of Columbia have adopted automatic voter registration. Already this year, New York has passed reforms including early in-person voting, pre-registration for 16- and 17-year olds, and portability of voter registration records. New Mexico has passed same-day voter registration, Virginia has passed early in-person voting, and numerous other states are moving pro-voter reforms through their legislatures. In addition, earlier this year, the House passed the For the People Act (H.R. 1), which contains solutions to many of the ways in which voters are disenfranchised these days.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

In short, voter suppression in the states continue, but there are bright spots upon which much can be built. My testimony focuses on two perennial problems that voters face—outdated voter registration systems and voter roll purges—along with some of the efforts to restrict voting rights that state legislatures have advanced so far this year. I also briefly lay out some of the successes of automatic voter registration. I additionally submit some relevant testimonies, reports, and analyses performed by the Brennan Center to assist the Committee in its next steps.

**Outdated Voter Registration Systems and Automatic Voter Registration**

Outdated voter registration systems may not garner much public attention, but they present one of the most consequential obstacles to free and fair elections in our nation today. One in four eligible Americans is not registered to vote.<sup>2</sup> Millions of Americans who *are* registered have trouble voting on Election Day because of registration flaws.<sup>3</sup> In too much of the country, voter registration still largely relies on error-prone pen and paper—in 2012, the Pew Center on the States estimated that roughly one in eight registrations in America is invalid or significantly inaccurate.<sup>4</sup> These problems contribute to low voter turnout.<sup>5</sup>

Automatic voter registration (“AVR”—a policy first proposed by the Brennan Center more than a decade ago—addresses much of these problems, offering a streamlined, cost-effective, and more accurate approach to voter registration. In an AVR system, every eligible citizen who interacts with designated government agencies is automatically registered to vote, unless they decline registration.

AVR has two key components. First, voter information is transferred to election officials electronically, instead of using paper forms and snail mail. Second, AVR switches from “opt-in” registration, where applicants have to affirmatively request to register to vote, to “opt-out” registration, where eligible citizens who apply for services at designated government agencies are registered to vote, unless they decline registration. Everyone is offered a clear opportunity to decline, and no one is registered against their will.

---

<sup>2</sup> Pew Center on the States, *Inaccurate, Costly and Inefficient: Evidence that America’s Voter Registration System Needs an Upgrade*, 2012, 1, [https://www.pewtrusts.org/\\_/media/legacy/uploadedfiles/pcs\\_assets/2012/pewupgradingvoterregistrationpdf.pdf](https://www.pewtrusts.org/_/media/legacy/uploadedfiles/pcs_assets/2012/pewupgradingvoterregistrationpdf.pdf); see also U.S. Census Bureau, *Voting and Registration in the Election of 2016, 2017*, Tbl. 1, <https://www.census.gov/data/tables/time-series/demo/voting-and-registration/p20-580.html>.

<sup>3</sup> A Caltech/MIT study found that in 2008, approximately 3 million people tried to vote but could not because of registration problems, and millions more were thwarted by other issues. See R. Michael Alvarez et al., *2008 Survey of the Performance of American Elections*, (2009), 59, [https://elections.delaware.gov/pdfs/SPAE\\_2008.pdf](https://elections.delaware.gov/pdfs/SPAE_2008.pdf); see also Stephen Ansolabehere, Testimony Before the U.S. Senate Rules Committee 19 (Mar. 11, 2009); Data from 2012 similarly demonstrates that millions of voters experienced registration problems at the polls. Charles Stewart III, *2012 Survey of the Performance of American Elections: Final Report*, 2013, 70, <http://dvn.iq.harvard.edu/dvn/dv/measuringelections>.

<sup>4</sup> Pew Center on the States, *Inaccurate, Costly and Inefficient*, 2012.

<sup>5</sup> According to a 2001 commission chaired by former Presidents Ford and Carter, “[t]he registration laws in the United States are among the most demanding in the democratic world ... [and are] one reason why voter turnout in the United States is near the bottom of the developed world.” See Carter and Ford: National Commission on Election Reform, Reports of the Task Force on the Federal Election System, 2001, 1–3. In too many parts of America this is still true.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

AVR works. The Brennan Center, in a first-of-its-kind study, evaluated the impact of AVR on seven states (and Washington, D.C.) that have been operating the program long enough for meaningful results to be available.<sup>6</sup> The results are clear: AVR substantially increases registration rates, no matter the size of state, its political leanings, or the details of the policy's implementation. Among the states studied, AVR caused increases in the number of registrations ranging from nine to 94 percent.<sup>7</sup> If adopted fully nationwide, AVR could add millions of new eligible voters to the rolls.<sup>8</sup>

Lawmakers and voters are increasingly recognizing that AVR is a best practice in election administration. In just the last four years, 15 states and the District of Columbia have enacted AVR—many with strong bipartisan support. The House passed AVR as part of the H.R. 1 in March 2019.

Outdated registration systems represent a critical, but too often overlooked, obstacle to voting. We encourage this Committee to examine the status of state voter registration systems to facilitate achievable improvements for American voters. And we encourage the Committee to take all steps necessary to accomplish adoption of AVR nationwide.

**Improper Voter Purges**

Under federal law, every state is responsible for maintaining accurate statewide voter registration lists. This maintenance includes voter roll purges—the sometimes-flawed process by which election officials attempt to remove from voter registration lists the names of those ineligible to vote. When done correctly, purges ensure the voter rolls are accurate and up-to-date. When done incorrectly, purges disenfranchise legitimate voters—often when it is too close to an election to rectify the mistake—and cause confusion and delay at the polls.

Purges tend to be problematic for a few reasons. As an initial matter, they happen behind closed doors. As a result, voters often do not know they have been purged until they show up to cast a ballot on Election Day. Additionally, states often rely on faulty data and poor processes when determining who should be purged from the rolls.

Voter purges are on the rise. Between 2014 and 2016, states removed almost 16 million voters from the rolls—almost 4 million more than between 2006 and 2008.<sup>9</sup> This growth in the number of removed voters represented an increase of 33 percent—far outstripping growth in both total registered voters (18 percent) and total population (six percent). Brennan Center research suggests that the Supreme Court's 2013 decision in *Shelby County v. Holder* has had a

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

profound and negative impact: for the two election cycles between 2012 and 2016, jurisdictions no longer subject to federal preclearance had purge rates significantly higher than jurisdictions that were not subject to pre-clearance in 2013.<sup>10</sup> The Brennan Center calculated that 2 million fewer voters would have been purged over those four years if jurisdictions previously subject to federal preclearance had purged at the same rate as those jurisdictions not subject to that provision in 2013.<sup>11</sup>

Improper purges are regrettably common. Earlier this year, for example, a federal court halted Texas's recent attempt to purge approximately 95,000 alleged noncitizens from the rolls.<sup>12</sup> Texas's plan relied on stale data, weak comparisons between databases, and unfounded claims of voter fraud.<sup>13</sup> In 2016, New York election officials erroneously deleted more than 200,000 names from the voter rolls, with no public warning and little notice to those who had been purged.<sup>14</sup> The same year, the Arkansas Secretary of State sent the state's 75 county clerks more than 7,700 names to be removed because of supposed felony convictions. Yet the roster was highly inaccurate: it included people who had never been convicted of a felony as well as persons with past convictions whose voting rights had been restored.<sup>15</sup> In Virginia in 2013, nearly 39,000 voters were removed from the rolls when the state relied on a faulty database—the Interstate Voter Registration Crosscheck Program—to delete voters who allegedly moved out of the commonwealth. Error rates in some counties ran as high as 17 percent.<sup>16</sup>

These kinds of improper purges, while common, are not inevitable. List maintenance is an important part of election administration, but it must be done in a way that protects eligible voters. The Brennan Center encourages the Committee to study state and local purge practices, in order to identify and rectify the worst voter purge practices. And we applaud the House for passing H.R. 1, which would put some additional protective guardrails on purging.

**Bills Restricting Voting Access in 2019**

Thus far in 2019, there has been an uptick in state activity around measures to restrict voting access. These measures represent the continuation of a decade-long effort in some states that make it more difficult to vote.

<sup>16</sup> *Id.* at 8.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

This year, in particular, state legislatures have introduced and advanced an unusual number of bills that would restrict efforts by civic groups to assist voters, in registering, applying to vote absentee, or casting a ballot—potentially as a backlash to high voter turnout in the 2018 midterms.<sup>17</sup> The Tennessee legislature, for example, has passed wide-ranging new restrictions on assistance of voter registration, including new registration and training requirements on registration groups, and civil and criminal penalties for submitting too many “deficient” voter registration forms (HB 1079). Similarly, the Texas Senate has passed a bill that significantly increases penalties and risk of prosecution for election code violations by voters; permits poll watchers to inspect voter ID; and imposes new restrictions on people assisting voters with physical limitations or who cannot read the ballot, among other measures (SB 9).

In addition, Florida is poised to pass legislation (HB 7089 / SB 7086) that would cut back on the historic change that voters passed overwhelmingly in November to the state’s felony disenfranchisement law by ending permanent disenfranchisement.<sup>18</sup> Both the Florida House and Senate bills would disenfranchise otherwise eligible voters by preventing an individual’s rights from being restored until they paid off certain financial obligations. The House bill is even more draconian and would likely result in substantially more people being disenfranchised.

These are just a few examples of attempts by state legislatures to limit access to the ballot so far this year, and they underscore the continuing need for study, investigation, and review from this Committee.

In conclusion, it is precisely within the Committee’s purview to study and identify state policies and practices that impermissibly infringe on citizens’ right to vote in federal elections. It is well-established that this Committee has broad investigatory authority.<sup>19</sup> Additionally, Congress has robust authority to regulate the federal elections process pursuant to the Constitution’s Elections Clause.<sup>20</sup> We enthusiastically support this Committee examining state efforts to undermine voting rights, and the Brennan Center urges this Committee and the House to continue to exercise their powers to ensure that all Americans elections are free, fair, and accessible.

Testimony of

**Myrna Pérez**

Director, Voting Rights & Elections Program

Brennan Center for Justice at NYU School of Law<sup>1</sup>

Hearing on Current Conditions: Evidence of Continued Discrimination in Voting and the Need  
for Preclearance

The Committee on the Judiciary, U.S. House of Representatives

Subcommittee on the Constitution, Civil Rights and Civil Liberties

September 10, 2019

Thank you for the opportunity to submit this testimony in support of restoring the Voting Rights Act (“VRA” or “Act”), a law that has been an important guardian of American democracy. The Brennan Center for Justice at NYU School of Law strongly supports this Committee’s important efforts to restore and revitalize the Act. My oral testimony will focus on voter purges. In this written testimony, I also highlight additional problems caused by the Supreme Court’s *Shelby County v. Holder* decision<sup>2</sup> and the concomitant need for an updated VRA.

The VRA is considered the most effective civil rights legislation in the history of our country.<sup>3</sup> In June 2013, however, a 5-4 majority of the Supreme Court struck down a key provision of the VRA.<sup>4</sup> That provision—Section 4(b)—determined which jurisdictions were required to pre-clear any changes to their voting rules with the federal government prior to implementing them.<sup>5</sup> In his majority opinion, Chief Justice Roberts claimed that the coverage formula was no longer “grounded in current conditions” because the “country has changed” since the formula was first adopted.<sup>6</sup> By striking down Section 4, the Court effectively mothballed the pre-clearance regime.

The years that have followed provide ample evidence to justify congressional action. State and local jurisdictions have continued to implement discriminatory voting rules,

disenfranchising voters of color in election after election.<sup>7</sup> The Brennan Center has documented a particularly disturbing increase in the number of people purged from the voter rolls in states formerly subject to preclearance.<sup>8</sup> These ongoing problems demand a strong, but measured response. We urge the Committee to act expeditiously to restore the VRA to full strength.

**I. The VRA and *Shelby County***

The VRA is the engine of voting equality in our nation. Congress has repeatedly recognized its importance and effectiveness, as well the ongoing need for its protections. Since its initial passage in 1965, Congress has reauthorized, updated, and expanded the VRA four times.<sup>9</sup> As recently as 2006, Congress reauthorized the VRA with overwhelming bipartisan support and the reauthorization was signed into law by President George W. Bush.<sup>10</sup>

For almost half a century, the Section 5 pre-clearance provision was central to the VRA's success. That provision required certain jurisdictions with a history of voting discrimination to obtain approval from the federal government for any voting rules changes before putting them into effect. As the Supreme Court acknowledged in *Shelby County*, the VRA "proved immensely successful at redressing racial discrimination and integrating the voting process."<sup>11</sup> Indeed, Section 5 deterred discriminatory voting rules changes right up until the Court froze its operation. Between 1998 and 2013, Section 5 blocked 86 discriminatory changes (including 13 in the 18 months before *Shelby County* was handed down). It prompted hundreds more changes to be withdrawn, and it prevented even more of those changes from being offered in the first place because policymakers knew they would not get federal approval.<sup>12</sup>

*Shelby County* gutted Section 5 by invalidating the "coverage formula" that determined which jurisdictions were subject to pre-clearance. Predictably, a flood of discriminatory voting changes followed.

**II. Direct Burdens on Voting Since *Shelby County***

Over the course of the last decade, we have seen a surge in *direct* burdens on the right to vote (in addition to efforts to dilute minority voting power), which the Brennan Center has documented extensively.<sup>13</sup> The *Shelby County* decision gave the greenlight to states to continue to implement these voting restrictions.

a. Restrictive Voting Laws Implemented Immediately Following *Shelby County*

The damage caused by *Shelby County* started the same day the Supreme Court handed down its opinion, as states put in place voting rules that either were or likely would have been blocked by the federal government under Section 5.

- Within hours of the Court’s decision, Texas moved forward with implementing what was then the nation’s strictest voter identification law, which had been denied preclearance because of its discriminatory impact.<sup>14</sup> Years and years of expensive and burdensome litigation by many dozen lawyers resulted in the federal courts striking down the law as unlawfully discriminatory on two different occasions.<sup>15</sup> But even after all that expense and time, Texas passed a different photo ID law in 2017.<sup>16</sup>
- Mississippi also announced that it would move to implement its voter ID law the same day the Court’s decision was handed down.<sup>17</sup> The state had previously submitted the policy for preclearance but had not obtained approval to implement it.<sup>18</sup>
- The day after the *Shelby County* decision, Alabama moved forward with its strict voter ID law. The state passed the law in 2011 and would have been required to obtain preclearance, but state officials never submitted the bill for approval.<sup>19</sup> The law is subject to an ongoing lawsuit in the federal courts.<sup>20</sup>
- Within two months after *Shelby County*, North Carolina enacted a law that imposed a strict photo ID requirement, cut back on early voting, and reduced the window for voter

registration. Following the decision, a state senator told the press, “now we can go with the full bill,” rather than less a restrictive version.<sup>21</sup> As in Texas, extensive and protracted litigation resulted in a federal appeals court striking down the law, finding that it targeted African-Americans with “surgical precision.”<sup>22</sup>

b. Restrictive Voting Laws Passed in the Years After *Shelby County*

This burst of restrictive voting laws was not contained to the period immediately following *Shelby County*. In the six years since the decision, states have continued to enact burdensome voting laws, in some cases piling restriction on restriction. For example:

- Georgia has repeatedly implemented—and repeatedly been forced to alter—a requirement that voter registration forms match exactly with other state records in order for an individual to be registered.<sup>23</sup> In 2017, the state enacted a “no match, no vote” law, even though only months earlier, the secretary of state agreed in a court settlement to stop a similar procedure that had blocked tens of thousands of registration applications.<sup>24</sup> The new law drew a court challenge and a federal district court entered a preliminary injunction prior to the 2018 election, halting its effect with respect to certain impacted voters.<sup>25</sup> The state subsequently enacted a law that largely ended the policy.<sup>26</sup>
- Florida this year passed a law cutting back on the expansive changes made by Amendment 4—a constitutional amendment that restores voting rights to many Floridians with a felony conviction and that was passed overwhelmingly by Florida voters in November 2018. The new law is subject to a series of federal court challenges.<sup>27</sup>
- North Carolina lawmakers enacted a law in 2018, initially introduced in the middle of the night, cutting back early voting opportunities.<sup>28</sup> They also put a constitutional amendment enshrining a photo ID requirement for voting on the 2018 ballot, which subsequently passed, and then rushed to pass implementing legislation prior to a change

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

in the partisan composition of the state legislature.<sup>29</sup> The voter ID law has drawn a series of state and federal court challenges.<sup>30</sup>

- Texas, as described above, implemented its strict photo ID law in 2013. After it was repeatedly struck down, the state enacted a new law in 2017. While an improvement over the law that was implemented in 2013, the new law is still harsher than the temporary, court-ordered ID requirements that were in place for the 2016 election.<sup>31</sup> In addition, this year, the state enacted a new law restricting the use of mobile early voting units.<sup>32</sup>
- Virginia enacted a new photo ID law in 2013, which went into effect in 2014. The state also enacted new limits on third-party voter registration in 2013.<sup>33</sup>
- Arizona enacted a law in 2016 limiting collection of mail-in ballots and making it a felony to knowingly collect and turn in another voter's completed ballot, even with that voter's permission (with some exceptions).<sup>34</sup> This year, the state imposed new restrictions on access to emergency early and absentee voting and extended voter ID requirements to early voting.<sup>35</sup>

These are only some of the restrictive voting laws that states have enacted since *Shelby County*. Furthermore, many forms of voter suppression are implemented administratively or at the sub-state level. Our research regarding last year's election confirmed that state and local officials continue to develop new tactics to keep people from voting.<sup>36</sup>

c. Voter Purges After *Shelby County*

One significant, specific area of concern in the wake of *Shelby County* is voter purges—the sometimes-flawed process by which election officials attempt to remove from voter registration lists the names of those ineligible to vote.<sup>37</sup> When they are executed properly, purges

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

ensure that the voter rolls are accurate and up-to-date. When they are executed improperly, however, purges disenfranchise legitimate voters—often too close to an election to correct the error—and cause confusion and delay at the polls.

Prior to the *Shelby County* decision, covered jurisdictions were required to pre-clear changes to their purge practices before implementing them.<sup>38</sup> This requirement protected voters from ill-conceived purge practices. That protection is now gone. And voter purges are on the rise.

Between 2014 and 2016, states removed almost 16 million voters from the rolls—nearly 4 million more than they removed between 2006 and 2008.<sup>39</sup> This growth in the number of removed voters represented an increase of 33 percent, which far outstrips growth in both total registered voters (18 percent) and total population (six percent). Brennan Center research suggests that *Shelby County* has had a profound and negative impact: for the two election cycles between 2012 and 2016, jurisdictions that were previously subject to federal preclearance had purge rates significantly higher than other jurisdictions.<sup>40</sup> We calculated that 2 million fewer voters would have been purged in that period if previously covered jurisdictions had purged at the same rate as other jurisdictions.<sup>41</sup>

Improper purges, and attempts at improper purges, litter our recent history. These purges can have severe consequences for voters. For example:

- Earlier this year, a federal court stopped Texas’s attempt to purge approximately 95,000 purported non-citizens from the voter rolls. Texas relied on stale data and weak comparisons between databases to develop its purge plan. As a result of this attempted purge, Texas’ Secretary of State resigned.<sup>42</sup>
- In the leadup to the April 2016 primary election, New York election officials improperly removed more than 200,000 names from the voter rolls, giving little notice to those who had been purged.<sup>43</sup> During the September 2018 primary, some voters reported that they continued to encounter significant problems at the polls as a result of the purge.<sup>44</sup>
- In 2016, the Arkansas Secretary of State sent the state’s county clerks more than 7,700 names to be removed from the rolls due to felony convictions. The list, however, was

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

highly inaccurate. It included some people who had never been convicted of a felony and others with past convictions whose voting rights had been restored.<sup>45</sup>

- In 2013, in Virginia, nearly 39,000 voters were removed from the rolls after the state relied on a faulty database to delete voters who had allegedly moved out-of-state. In some counties, error rates ran as high as 17 percent.<sup>46</sup>
- The same year, Florida officials sought to purge thousands of purported non-citizens from the rolls, but ultimately suspended the purge. When the state tried the same thing in 2012, its purge list was reduced from 180,000 supposed non-citizens to approximately 2,700. Notably, that purge list contained a disproportionate number of Latino surnames.<sup>47</sup>

Purges tend to be problematic for at least two reasons. First, they happen behind closed doors. As a result, voters often only learn that they have been purged when they show up to the polls. Second, states sometimes rely on faulty data and fail to conduct sufficient research before concluding that a voter is ineligible to vote. Furthermore, improper matching of data between databases in order to identify voters for purging can lead to discriminatory results.<sup>48</sup> The last election provided a clear example of discriminatory outcomes resulting from improper data matching, albeit outside of the purge context. In the leadup to the 2018 election, approximately 80 percent of Georgia voters not registered because of the state's "no match, no vote" law were people of color.<sup>49</sup>

### III. Congress Should Act to Renew and Revitalize the VRA

It is undeniable that our nation has suffered from a long, sorry, and sometimes violent history of racialized voter suppression. The VRA was enacted to confront this suppression head on. Despite the VRA's substantial success over the past five decades, racial discrimination still infects our election system, as the preceding sections make clear. While the *Shelby County* Court was correct that the "country has changed," it has not changed enough to warrant halting preclearance.

Federal courts have repeatedly found that new laws passed after *Shelby County* made it harder for minorities to vote, some intentionally so.<sup>50</sup> These conclusions have been confirmed by academic studies finding that a state's racial makeup is related to its adoption of voting

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

restrictions.<sup>51</sup> At times they have been confirmed by the public comments of these restrictions' proponents themselves.<sup>52</sup>

To be clear, voting rights advocates are not going to stand on the sidelines when would-be suppressors act, notwithstanding a weakened VRA. Section 2 of the VRA, which allows private parties and the Justice Department to challenge discriminatory voting practices in court is being readily leaned on to fight racial discrimination in the post-*Shelby* world. In some circumstances, these Section 2 lawsuits have ultimately been successful. But they are not a substitute for pre-clearance. Litigating section 2 cases is far more lengthy and expensive than being involved in the pre-clearance process, and these cases often do not yield results for impacted voters until after an election is over.<sup>53</sup>

Our case against Texas's 2011 voter ID law illustrates this point.<sup>54</sup> After the state passed the law, a three-judge federal court prevented the state from implementing it, refusing to preclear the law under Section 5. That decision, however, was vacated after *Shelby County*, leading to years of litigation under Section 2. Even though every court that considered the law found it to be discriminatory (and a federal district court found that it was intentionally discriminatory), the law remained in effect until a temporary, court-ordered remedy was put in place for the November 2016 election. In the meantime, Texans were forced to vote in 3 federal and 4 statewide elections and numerous local elections under discriminatory voting rules. Moreover, litigating the case was extremely expensive. According to news reports, the state spent more than \$3.5 million defending the law through 2016—before the last round of appeals in the case concluded.<sup>55</sup> Plaintiffs in the case have filed attorneys' fees petitions totaling millions of dollars more.

The Texas case is consistent with other voting discrimination cases since *Shelby County*. For example, a challenge to Alabama's voter ID law was filed in December 15, 2015 and is still ongoing.<sup>56</sup>

Furthermore, courts have permitted potentially discriminatory laws to govern our elections, under the Supreme Court's *Purcell* doctrine, supposedly to avoid disrupting election administration.<sup>57</sup> Ironically, this approach may *compound* confusion at the polls, by constantly shifting the ground rules that govern elections in a state. Preclearance prepermits this disruption by forcing covered jurisdictions to establish that new voting rules are non-discriminatory prior to implementing them.

In short, the *Shelby County* Court has left us with a system that is both ineffective and inefficient. Congress can and should fix this problem. The Supreme Court has repeatedly

TESTIMONY OF

MICHAEL WALDMAN  
PRESIDENT, BRENNAN CENTER FOR JUSTICE AT NYU SCHOOL OF LAW<sup>1</sup>

HEARING ON VOTING RIGHTS AND ELECTION ADMINISTRATION IN AMERICA  
THE COMMITTEE ON HOUSE ADMINISTRATION  
U.S. HOUSE OF REPRESENTATIVES

SUBCOMMITTEE ON ELECTIONS

OCTOBER 17, 2019

One year before ballots are cast in November 2020, our election systems are under extraordinary stress. The research conducted by the Brennan Center, bolstered by our experience in the fight for voting rights in states across the country, confirms that there is strong reason for concern.

The right to vote is at the heart of democracy. Yet over the past decade, 25 states have put in place new laws making it harder to vote, for the first time since the Jim Crow era.<sup>2</sup> Many states continue to disenfranchise people living and working in our communities because they have a past felony conviction.<sup>3</sup> Voter roll purges have surged, particularly in states previously covered by the pre-clearance provisions of the Voting Rights Act.<sup>4</sup> All these obstacles to the ballot hit hardest communities of color, the poor, young, and elderly. Voter suppression remains a potent threat to American democracy, and a bitter challenge to the ideals of equality.

And there is a new and unnerving challenge: foreign interference threatens to disrupt and degrade the 2020 election. We all know that Russia intervened in 2016. Progress has been made since then. But next year, several states will still require voters to cast ballots on hackable

electronic voting machines that do not leave a paper trail. Others will conduct no post-election audits to verify an accurate vote count.<sup>5</sup>

How can we ensure that the 2020 election will be free, fair, and secure? And going forward, how can we modernize our elections so they fully and accurately reflect the voices of Americans? We believe strongly that the best response to attacks on our democracy is to strengthen our democracy.

So we strongly urge Congress to enact bold reform. Here, there is reason for optimism. Earlier this year, this House passed H.R. 1—the For the People Act of 2019. That legislation is the most sweeping democracy reform bill the Congress has taken up since 1965. We encourage the Senate to follow the House and pass this bill now. We also urge the House to pass a revitalized Voting Rights Act, as it committed to doing in H.R. 1. In addition, we urge the Senate to match this House’s proposed \$600 million appropriation to the states for election security.

Americans are hungry for positive solutions. Despite new barriers to participation, turnout surged from a 72-year low in 2014 to a hundred-year high in 2018.<sup>6</sup> Voters in states across the country passed ballot measures for voting rights and redistricting reform.<sup>7</sup> Citizens are energized and engaged, a true democracy movement. Congress should act with the same urgency as its constituents and undertake bold reform to revitalize our election systems.

**I. SIGNIFICANT THREATS TO ELECTION INTEGRITY IN 2020**

The Brennan Center monitors challenges to our elections nationwide. Our attorneys, social scientists, and researchers have worked with election officials and citizens in dozens of states.<sup>8</sup> Here are the principal areas of concern for the 2020 election.<sup>9</sup>

<sup>6</sup> Jose A. DelReal, *Voter Turnout in 2014 Was the Lowest Since WWII*, Washington Post, Nov. 10, 2014, <https://www.washingtonpost.com/news/post-politics/wp/2014/11/10/voter-turnout-in-2014-was-the-lowest-since-wwii/>; Ed Kilgore, *2018 Turnout Was the Highest of Any Midterm in More Than a Century*, New York Magazine, Nov. 13, 2018, <http://nymag.com/intelligencer/2018/11/2018-turnout-was-the-highest-of-any-midterm-since-1914.html>.

<sup>7</sup> See, e.g., Lee Drutman, “One Big Winner Last Night: Political Reform,” Vox, Nov. 7, 2018, <https://www.vox.com/polyarchy/2018/11/7/18072204/2018-midterms-political-reform-winner>.

<sup>8</sup> In the past year, for example, we have successfully sued Georgia over the security of its voter data, leading to the enactment of new state laws; successfully challenged purge practices in Indiana; and currently are suing to overturn the new Florida law that aims to roll back Amendment 4’s restoration of voting rights to as many as 1.4 million Floridians. We are engaged in advocacy in numerous state legislatures, especially in support of enactment of automatic voter registration, rights restoration for people with felony convictions in their past, election security upgrades, and redistricting reform. And we produce cutting-edge research that gives lawmakers and advocates the tools they need to make voting more accessible and secure.

<sup>9</sup> This analysis draws on testimony given by Wendy Weiser, *Hearing on H.R. 1, The For the People Act, Before the Comm. on House Administration*, 116th Cong. (Feb. 14, 2019); Myrna Pérez, *Hearing on Protecting the Right to Vote: Best and Worst Practices*, Before the Comm. on House Judiciary, 116th Cong. (Sept. 10, 2019); and Lawrence Norden, *Election Security Hearing*, Before the Comm. on House Administration, 116th Cong. (May 8, 2019).

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**a. VOTER PURGES AND VOTER LIST MANIPULATION**

Voter purges refer to the process when election officials attempt to remove from registration lists the names of those ineligible to vote. Done right, purges ensure that the rolls are accurate and up-to-date. When done improperly, however, they disenfranchise legitimate voters. Often, that happens too close to an election to correct the error. Bad purges cause confusion and delay at the polls.<sup>10</sup>

The Brennan Center has documented an alarming surge in voter purges—a surge that began after the U.S. Supreme Court gutted Section 5 of the Voting Rights Act in *Shelby County v. Holder*.<sup>11</sup>

Between 2016 and 2018, officials purged at least 17 million voters nationwide. The median purge rate was 40 percent higher, however, in jurisdictions previously covered by Section 5 of the Voting Rights Act than it was elsewhere. Had purge rates in those jurisdictions been consistent with those in the rest of the country, as many as 1.1 million fewer individuals would have been removed from the rolls.<sup>12</sup>

This continues the trend we documented in a major study last year. Between 2014 and 2016, states removed almost 16 million voters from the rolls—nearly 4 million more than they removed between 2006 and 2008.<sup>13</sup> This reflects a one third increase in the number of removed voters, far outstripping growth in registered voters (18 percent) or population (six percent). This increase was driven by states that had previously been covered by Section 5—that is, states with a history of voting discrimination. The Brennan Center has calculated that two million fewer voters would have been purged between 2012 and 2016 if previously covered jurisdictions had purged at the same rate as other jurisdictions.<sup>14</sup>

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

The apparent impact of *Shelby County* is evident in this chart:

Improper purges, and attempts at improper purges, litter our recent history. Earlier this year, for example, the Texas Secretary of State sent lists of approximately 95,000 alleged non-citizens to county officials for purging—but within days, the state was forced to retreat, once it became clear that the lists were rife with inaccuracies.<sup>15</sup> In 2016, New York officials erroneously deleted hundreds of thousands from the rolls, with no public warning and little notice to those who had been purged.<sup>16</sup> The same year, thousands of Arkansans were purged because of supposed felony convictions—but the lists used were highly inaccurate, and included many who had never committed a felony, or who had had their voting rights restored.<sup>17</sup>

In her dissent in *Shelby County*, Justice Ruth Bader Ginsburg warned that “throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet.”<sup>18</sup> As millions of purged voters can attest, her warning was all too prescient.

H.R. 1 contains new protections to prevent improper purges, including new guardrails on the use of inter-state databases that purport to identify voters that have re-registered in a new state, but that have been proven to produce deeply flawed data. It also includes provisions for automatic voter registration and same day registration—policies that ameliorate the impact of improper purges. We urge the Committee to continue to press for these important reforms.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**b. ELECTION SECURITY**

Foreign interference and inadequate election security represent a second significant threat in 2020. As the Mueller Report concluded, Russia waged a campaign to interfere in our election “in sweeping and systematic fashion.”<sup>19</sup> Moscow did more than hack DNC and campaign emails. In addition to a massive effort on social media, the Russians targeted state and local election officials, breached two state registration databases and extracted data from one, and used spear phishing attacks to gain access to and infect computers of a voting technology company and at least one Florida county.<sup>20</sup>

There is every reason to think these threats continue, especially now that the whole world knows how vulnerable we are. Before the midterm election the Director of National Intelligence testified that the “lights are blinking red.”<sup>21</sup> Robert Mueller, in his July congressional testimony, warned, “Many more countries are developing the capability to replicate what the Russians have done.” He added, the Russian effort “wasn’t a single attempt. They’re doing it as we sit here. And they expect to do it during the next campaign.”<sup>22</sup>

Indeed, the nation may face even more serious threats in 2020 and beyond. Russia seems to have started its attacks against our election infrastructure in June 2016, late in the day compared to other aspects of their campaign. By 2020, Russia will have had four years to leverage knowledge gained in 2016. Chris Krebs, head of the Cybersecurity and Infrastructure Security Agency at the Department of Homeland Security, has warned that the 2020 election is “the big game” for adversaries looking to attack American democracy.<sup>23</sup> More, we ought not assume we are at risk just from Russia. National security agencies have warned of potential attacks from China, North Korea, and Iran, as well as non-state actors.<sup>24</sup> (Since 2016, there have been reports of alleged Chinese election-related attacks against Indonesia’s voter database as well as against Australia’s major political parties.)<sup>25</sup>

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

The country undoubtedly has made progress in protecting our elections. In 2016, 20 percent of votes were cast on machines with no paper backup. By next year, we estimate that number will drop to 12 percent.<sup>26</sup> Several states are replacing outdated voting equipment. But major challenges remain.

At least 26 states, for example, totaling 243 electoral votes, are not currently on track to require post-election audits prior to certification of the election. Traditional post-election audits, which generally require manual inspection of paper ballots cast in randomly selected precincts or on randomly selected voting machines, can provide assurance that individual voting machines accurately tabulated votes.<sup>27</sup>

**c. DISENFRANCHISEMENT LAWS**

Disenfranchisement laws—a relic of the Jim Crow era that continues to haunt our elections—represent a third significant threat to voters in 2020. Across the country, state laws deny millions of citizens the right to vote because of a criminal conviction, including at least three million who are no longer incarcerated.

These laws vary dramatically from state to state. They range from permanent disenfranchisement for everyone convicted of a felony in Iowa and Kentucky, to no deprivation of voting rights at all in Vermont and Maine. Between these extremes, some states distinguish between different types of felonies, others treat repeat offenders differently, and some have varying rules on what parts of a sentence must be completed before rights are restored. Navigating this patchwork of laws can confuse election officials and prospective voters about who is eligible to participate. The result is large-scale *de facto* disenfranchisement of voters who are eligible but do not know it.<sup>28</sup>

A particularly important fight for fairness is unfolding in Florida right now. The state had the country's harshest law, permanently disenfranchising 1.4 million people. One in four black men in Florida was ineligible to vote. Last November, nearly 65 percent of voters approved Amendment 4, which automatically restored voting rights to Floridians who had completed the terms of their sentence. In the months that followed, Amendment 4 began to fulfil its promise—rapidly restoring voting rights to Floridians who had paid their debt to society. Our research found that nearly 100 times more formerly incarcerated Floridians registered in the first three months of 2019 than in previous comparable years. And more than 44 percent of the formerly incarcerated Floridians who registered to vote between January and March of 2019 identified themselves in their voter registration forms as Black (whereas Black voters comprise 13 percent of Florida's overall voter population).<sup>29</sup> The racial justice implications were profound.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Then, the Florida Legislature stepped in to roll back this important reform. In June, Governor DeSantis signed a law, which prohibits returning citizens from registering to vote unless they pay off all legal financial obligations (“LFOs”) imposed by a court pursuant to a felony conviction, even if they cannot afford to pay. That same day, several civil rights groups, including the Brennan Center, filed a federal lawsuit challenging the new law. A federal district court recently held a hearing on our motion to temporarily enjoin the law, pending a trial. If it is allowed to stand, this modern-day poll tax will have a severe impact.<sup>30</sup>

**d. ADDITIONAL CHALLENGES**

We face, of course, numerous other challenges to election integrity in 2020. For example, attempts to suppress votes through deception and intimidation remain all too widespread. This is not a new problem, but now social media platforms make the mass dissemination of misleading information easy and allow for perpetrators to target particular audiences with precision. In a recent analysis for the Brennan Center, University of Wisconsin Professor Young Mie Kim documented hundreds of messages on Facebook and Twitter designed to discourage or prevent people from voting in the 2018 election.<sup>31</sup>

Inadequate election day resources and long lines may also deter voters in 2020, particularly voters of color. A Brennan Center study found that, in the 2012 election, voters in precincts with more minorities experienced longer waits and tended to have fewer voting machines.<sup>32</sup> A more recent academic paper using cellphone data found that, in the 2016 election, voters in Black neighborhoods were significantly more likely to wait in long lines than voters in white neighborhoods.<sup>33</sup> The Brennan Center continues to research election resource allocation, and we plan to release a report on this issue early next year.

In addition, state legislatures continue to add new obstacles to the ballot box. This year, at least five states have enacted new laws restricting voting access.<sup>34</sup> These laws continue a decade-long turn toward placing direct burdens on people’s right to vote.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**II. BOLD REFORM IS NEEDED TO ADDRESS THESE THREATS**

Our elections face urgent threats, and we must respond with equal urgency. And we should take this moment of public engagement to press for long-needed changes to ensure free, fair, and accurate elections every year going forward. We encourage Congress to pass H.R. 1, to restore the Voting Rights Act, and to appropriate necessary funds for election security.

**a. H.R. 1—A BREAKTHROUGH FOR VOTING ACCESS**

H.R. 1 comprises reforms to revitalize every aspect of American democracy. Among the most important of H.R. 1's reforms is automatic voter registration ("AVR"). AVR is a simple but transformative policy that could bring millions into the electoral process. Under AVR, every eligible citizen who interacts with designated government agencies is automatically registered to vote, unless they decline registration. Fully implemented nationwide, it would add fifty million to the rolls, cost less, and improve accuracy and security.<sup>35</sup>

AVR shifts registration from an "opt-in" to an "opt-out" approach. When eligible citizens give information to the government—for example, to get a driver's license, receive Social Security benefits, apply for public services, register for classes at a public university, or become naturalized citizens—they are automatically signed up to vote unless they decline.<sup>36</sup> Registration information is electronically transferred to election officials, avoiding paper forms and snail mail. This significantly increases the accuracy of the rolls and drives down the costs of maintaining them.<sup>37</sup>

AVR works. In the past five years, 16 states and the District of Columbia have adopted AVR (though several are still implementing the policy). A Brennan Center study found that AVR dramatically boosted the number of registrants everywhere it has been implemented, with increases ranging from 9 to 94 percent.<sup>38</sup> FiveThirtyEight recently supplemented our findings. It reported that the eight jurisdictions that implemented AVR by the 2018 registration deadline automatically registered about 2.2 million new voters.<sup>39</sup>

H.R. 1 includes myriad other important measures to expand voting rights and strengthen democracy. Among these, it incorporates the Democracy Restoration Act, which would restore federal voting rights to citizens with past criminal convictions living in our communities.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**b. REVITALIZE THE VOTING RIGHTS ACT**

The Voting Rights Act of 1965 (“VRA”) was the nation’s most effective civil rights law. In 2013, however, the Supreme Court struck down the “coverage formula” that determined which jurisdictions were subject to pre-clearance.<sup>40</sup> This decision effectively blocked the pre-clearance system from operation. The years since have demonstrated the urgent need to revitalize the law. State and local jurisdictions have continued to implement discriminatory voting rules, disenfranchising voters of color in election after election.<sup>41</sup> Over the course of several months, this Committee has held a series of field hearings in states across the country, documenting serious challenges to voting accessibility and fair election administration.

These ongoing problems demand a strong, but thoughtful response. When the Supreme Court gutted preclearance, it stated explicitly that Congress could fix the VRA, using current data and taking a wider perspective.<sup>42</sup> Moreover, the VRA has long been a bipartisan congressional priority—the reauthorization in 2006 passed the House overwhelmingly and the Senate 98-0—and it should be once again.<sup>43</sup>

For its part, H.R. 1 also contains a strong commitment to revitalizing the VRA. The Voting Rights Advancement Act (H.R. 4), currently under consideration in this House, contains an updated coverage formula and other vital protections carefully tailored to current conditions. We encourage Congress to follow through on its commitment in H.R. 1 and to act expeditiously to restore the VRA to its full strength.

**c. STRENGTHEN ELECTION SECURITY**

First and foremost, election security in 2020 requires funding. The Brennan Center has long supported both a complete, nationwide transition to paper ballot voting machines and the implementation of risk limiting audits (“RLAs”), an effective check on election results, to ensure security and confidence in electoral results. But these and other critical reforms require money, and states are running out of time to put new machines and systems in place for 2020. We enthusiastically applaud the House for proposing to appropriate \$600 million for election

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

security in the appropriations bill voted on in June.<sup>44</sup> This represents a robust down payment on our overall election security needs—which the Brennan Center estimates will cost approximately \$2.2 billion over the next five years.<sup>45</sup> We are encouraged that the Senate has agreed to appropriate \$250 million for election security on a bipartisan basis.<sup>46</sup> But we believe it is critical that the final spending bill reflect the House’s proposed appropriation, as well as its provisions to ensure that the funds are used for election security rather than unrelated activities.

Funding is an important first step toward securing our elections, but Congress can and should do more. At present, for example, there is almost no federal oversight of the private vendors who design, build, and maintain our election systems. That should change. We recommend that Congress adopt a mandatory reporting system for all cyber security incidents for election vendors and consider additional reforms, such as vendor employee background checks. In addition, Congress should make permanent the Department of Homeland Security’s designation of elections systems as “critical infrastructure.”<sup>47</sup> A permanent designation will help to guarantee that states are provided with priority access to tools and resources available from DHS and greater access to information on cyber vulnerabilities on a voluntary basis.

**III. CONCLUSION**

Much work remains to be done to ensure that the 2020 election is free, fair, and secure. I thank this Committee for holding this important hearing and urge Congress to take quick and forceful action to reform our election systems.

APPENDIX B**

Testimony of

**Myrna Pérez**

Director, Voting Rights & Elections Program

Brennan Center for Justice at NYU School of Law<sup>1</sup>

Hearing on Protecting the Right to Vote During the COVID-19 Pandemic

The Committee on the Judiciary, U.S. House of Representatives

June 3, 2020

Thank you Chairman Nadler, Ranking Member Jordan, and members of the Committee for the opportunity to submit this testimony describing the steps that this country must take to protect our fundamental right to vote in the throes of a global pandemic. While not the subject of this hearing, I would note that many of these recommendations would also alleviate some of the stresses on election administration during a time of civil unrest – like what we are facing at the moment. The Brennan Center for Justice at NYU School of Law supports this Committee’s efforts to ensure that our elections are not only free, fair, and secure, but also accessible during the COVID-19 crisis.

In this written testimony, I outline the features that each state should have to ensure that no voter is left behind. I also provide in the appendix to this testimony a voluminous amount of resources on the topic. **But the single most important thing this Committee can do to ensure that our elections run smoothly in November is for each member of this Committee to play her or his part in getting election administrators at the state and local level additional financial resources.** While Congress has provided \$400 million to help states and localities make these changes, this is a mere fraction of what is needed. We urge Congress to provide additional support immediately. Election administrators need those resources now. *Please see Appendix A for additional related information.*

#### I. The Stresses COVID is Placing on Our Election Requires Ameliorative Action

More than 100,000 people across the country have died from COVID-19. Public health experts repeatedly urge physical distancing practicing and habits if we are to minimize transmission. There are certain steps states and localities must take if we want to ensure that no voter is left behind. *Please see Appendix B for additional related information.*

---

<sup>1</sup> The Brennan Center for Justice at New York University School of Law is a nonpartisan public policy and law institute that works to reform, revitalize, and defend our country’s system of democracy and justice. I am the Director of the Brennan Center’s Voting Rights and Elections Program. I have litigated voting rights cases across the country, and authored several nationally recognized reports and articles, including Purges: A Growing Threat to the Right to Vote (July 2018), Noncitizen Voting: The Missing Millions (May 2017), and Election Day Long Lines: Resource Allocation (Sept. 2014). My work has been featured in media outlets across the country, including The New York Times, The Wall Street Journal, MSNBC, and others. I have testified previously before Congress, as well as several state legislatures, on a variety of voting rights related issues. I teach election law at Columbia Law School and I have also served as an Adjunct Professor of Clinical Law at NYU School of Law. My testimony does not purport to convey the views, if any, of the New York University School of Law.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**(1) Expand Voter Registration Opportunities.** Pre-pandemic, about 1 out of every 5 eligible Americans were not registered to vote.<sup>2</sup> In the past, millions of Americans update their voter registration information or register to vote for the first time the months and weeks before every presidential election.<sup>3</sup> But now, states across the country have reported decreases in registration rates. According to news reports, the number of new registrations in Kentucky was at 7,000 in February and it dropped to just 500 in March.<sup>4</sup> This is no surprise. Government agencies that provide voter registration services are closed. Community groups that register voters are unable to do person-to-person outreach because of transmission risks and shelter-at-home instructions. Even if these community groups could venture out, large groups of Americans are not congregating in venues and public spaces that were once desirable spots to perform voter registration.

Our democracy works best when all of us participate. It is imperative that we undertake efforts to bring those eligible, but unregistered, Americans into our electorate. Online registration opportunities are an obvious part of the solution. Ten states do not currently have a way to register to vote online for November.<sup>5</sup> Those states should develop and implement those systems. Even states with existing registration systems can take steps to maximize their impact. States that limit online registration opportunities to people who have a state identification/driver's license should relax those requirements because motor vehicle offices are closed and people who do not have those IDs cannot get them.

Online registration systems should also be built to withstand increased use by more voters. These systems have crashed in the past at inopportune times.<sup>6</sup> And, of course, online registration systems need to be accessible for voters with disabilities and persons who prefer to conduct important business in another language.

While online registration systems need to be shored up, we must remember that the digital divide is real, and we must also take steps to ensure that unregistered, but eligible Americans

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

who cannot use online systems for whatever reason have a lower-tech way to get activated and registered.

**(2) Ensuring all eligible Americans have the option to vote by mail.** Every state in the country allows at least some of its citizens to vote by mail, and that option should be available to every eligible American so that no voter has to expose themselves or others to the Coronavirus. Currently, there are 15 states where an American who wants to vote by mail may not meet the criteria for doing so in November.<sup>7</sup> Notwithstanding existing restrictions, we are seeing a massive increase in demand to vote by mail. In Georgia, more than 1 million people have requested a mail ballot than in the 2016 presidential primary.<sup>8</sup> In Wisconsin, nearly 800 thousand more voters cast mail ballots in the 2020 presidential primary than the 2016 presidential primary.<sup>9</sup> That increase in mail balloting requires extra capacity in processing applications, counting returned ballots, and providing notice and cure opportunities to any voters whose returned ballots have issues. *Please see Appendix C for additional related information.*

While there is some incendiary and untrue rhetoric being lobbed around, vote by mail is a necessary, and sensible option—especially at the time we find ourselves in. Indeed, some states like Oregon, Colorado, and Washington have been conducting their elections almost entirely by mail for years. There has been no evidence of systematic or widespread abuse of the mail balloting process in those states. That is not surprising. There are numerous security measures at every step of the vote by mail pipeline. First, the ballot has to get mailed to an address, meaning that election administrators and law enforcement know exactly where to look if any investigation is warranted. And, mail ballots can be accompanied with Intelligent Mail Barcodes (or IMbs) that track where the ballot is at all time in the mail.<sup>10</sup> For ballots that are returned in person, the options are drop boxes that have their own security protections, election offices, or polling places that are secure enough to house voting machines. Before the ballot is actually counted, it is examined for a signature—that was made under oath, and in some states there are even more stringent measures like witness or notary requirements (which we do not believe are justified given the threat level).

**(3) Providing Safe in Person Voting Options.** While more voters are expected to be voting by mail this November, the country is still going to need an adequate number of safe polling places to ensure that no voters are left behind. Vote by mail will not work for every voter. There will be the inevitable glitches that are expected when undergoing such a massive scale up and polling places need to exist to function as a fail-safe. Additionally, there has historically been a racial and age disparity in the use of vote by mail. For some Americans, this preference for in-

---

<sup>7</sup> The following states require a voter to provide an excuse to vote by mail: Alabama, Arkansas, Connecticut, Delaware, Indiana, Kentucky, Louisiana, Massachusetts, Mississippi, Missouri, New York, South Carolina, Tennessee, Texas, and West Virginia. See Brennan Center for Justice, “Preparing Your State for an Election Under Pandemic Conditions,” May 29, 2020, <https://www.brennancenter.org/our-work/research-reports/preparing-your-state-election-under-pandemic-conditions#1/>.

<sup>10</sup> Wendy R. Weiser and Harold Ekeh, “The False Narrative of Vote-by-Mail Fraud,” Brennan Center for Justice, Apr. 10, 2020, <https://www.brennancenter.org/our-work/analysis-opinion/false-narrative-vote-mail-fraud>.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

person voting may be merely habit and custom, but for others, it is a deeply held value. Consistent with this, early examinations in certain counties still reveal a large racial disparity. For example, as of May 3, 26.6% of White registered voters in Georgia had requested mail ballots for the June 9 primary, while just 18.5% of Black voters and 12% of Latino voters had done so.<sup>11</sup> For other voters, for example voters with visual or physical impairments, or voters who need the language assistance provided at polling places, in-person voting may be a necessity. And finally, there are some voters who have unreliable mail service, and cannot trust the mail to deliver something as important as their ballot.

In order to ensure that these needed polling places are safe, states and localities should undertake a number of steps. First, there should be sufficient hours and days of early voting to smooth out congestion and minimize lines. Polling places should be sited in venues that can comply with physical distancing protocols. The setup of polls sites should minimize transmission risks by, for example, making sure that entrances and waiting spaces allow for enough distance between voters. Polling places should be equipped with cleansers, water, and drying materials for frequent cleaning of spaces, machines, and hands. Poll workers and voters should have PPE like masks and gloves, and the poll site should have disposable implements like pens to mark paper ballots or Q-tips to press buttons.

It is axiomatic that we need enough polling places to ensure equal access for all voters, including those in traditionally underserved communities. Indeed, in a recent report from the Brennan Center, we learned: Black and Latino Americans spend more time waiting in line to vote on Election Day than white voters – and even more seriously – they were more likely to report especially long wait times at the polls.<sup>12</sup> We also found that counties that became less white over the past decade had fewer electoral resources – namely polling places, voting machines, and poll workers – per voter in 2018 than counties that grew whiter.<sup>13</sup> Similarly, counties where incomes shrank over the past decade had fewer electoral resources per voter in 2018 than counties where incomes grew.<sup>14</sup>

As Covid-19 cases continue to rise, it is more important now to distribute critical electoral resources in an equitable manner to minimize voter wait times for all voters. The findings in our report suggest that allocating equal numbers of electoral resources among counties and precincts is not sufficient to produce equal wait times for all voters, particularly those of color and of lower incomes. Rather, election administrators must also focus special attention on those precincts and counties with a history of long wait times and allocate enough resources to these locations to equalize the wait times. *Please see Appendix D for additional related information.*

**(4) Educating Voters About Election Processes.** Voter education is always important, but given the uncertainty and disruption in American lives because of COVID-19, voter

<sup>14</sup> Ibid.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

education is more critical than ever. At least 13 states have changed their primary dates,<sup>15</sup> and at least two states have made it possible for any voter to request an absentee ballot this November.<sup>16</sup> There are dozens of lawsuits across the country whose outcome could change one or more significant voting rules. Any increased accessibility will be blunted, however, if voters are not aware of the new rules.

Moreover, amidst changes, Americans are vulnerable to misinformation and disinformation. Election officials may send out materials with a date from a prior election, as occurred in Washington D.C.<sup>17</sup> But, deliberate efforts to mislead voters have also been

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

documented, for example, on March 3, the Texas Secretary of State's office received reports of a robocall inaccurately informing voters that Democrats were supposed to vote the following day.<sup>18</sup> Likewise, Common Cause has identified "multiple examples of cyber suppression content — social media posts with disinformation or deceptive practices that could cause a voter to be disenfranchised," during the 2020 Primary Elections.<sup>19</sup>

Fortunately, robust voter education efforts from trusted sources can be immensely helpful for motivating and encouraging voters and combatting incorrect information. This education should be culturally competent, in language, and targeted to low information voters and work for voters who do not get their information online. Education methods should include mail, telephone, trusted community leaders, radio, and television.

**(5) Be Prepared for New Cybersecurity Threats.** Prior to COVID-19, there was high concern that foreign cybercriminals would interfere in our elections. In some ways, this concern should be greater. Resources that should have been available to secure election technology now have to be diverted to ensuring elections happen this November. Additionally, COVID-19 dramatically incentivizes the use of online systems for registration and mail ballot requests by voters, but the increased usage makes those online systems even more attractive targets than they would have been just a few months ago.

The importance of securing our elections against cyber-attack cannot fall off our agenda. We must continue to audit and test those systems. Additionally, we need postelection audits of receipts afterwards to make sure that we can trust the electronic tallies. *Please see Appendix E for additional related information.*

Fortunately, in many places, elected and election officials of both parties are working together to make needed changes. For example, in Kentucky, the Democratic Governor and Republican Secretary of State worked in partnership to expand absentee voting by mail and created a secure online absentee mail ballot application portal for the June 23, 2020 primary election.<sup>20</sup> Republican Secretary of State Pate of Iowa launched poll worker recruitment efforts to guard against these problems in the fall.<sup>21</sup> These leaders should be commended for their bipartisan action. Congress should take heed.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**II. More Resources are Needed**

In March, as part of the CARES Act, Congress gave states \$400 million to protect the upcoming presidential and federal elections from any COVID-19 related disruptions.<sup>22</sup> While this was an important start, it is insufficient, given the massive changes that are necessary to leave no voters behind.

The Brennan Center has estimated the national cost of implementing its full set of recommendations for running safe and secure elections in 2020 is approximately \$4 billion. Subsequent to release of our estimate, and working in conjunction with the R Street Institute, Alliance for Securing Democracy and the University of Pittsburgh Institute for Cyber Law, Policy and Security, separately interviewed election officials in five states – Georgia, Michigan, Missouri, Ohio and Pennsylvania – to determine the steps they were taking, and would like to take, to ensure free, fair and safe elections in 2020 during the COVID pandemic. It is patently clear that more resources are need.<sup>23</sup> Election officials agree, and multiple states associations, plus more than 150 individual local election officials from both parties have signed letters urging Congress to provide them with more resources to run safe and fair elections this fall. *Please see Appendix F for additional related information.*

\*\*\*

Ultimately, the smoothness of the November election will depend in large part on the commitment that elected officials, including Congressmembers, have in supporting our election administrators and their voters during this crisis. During this time of political unrest, we must also recognize the fundamental role voting plays within our democracy and do everything we can to ensure every eligible American is able to have their voice heard. I am hopeful that members of this Committee will model the leadership and commitment our country so desperately needs during this time.

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

**BRENNAN  
CENTER  
FOR JUSTICE**

TESTIMONY OF

**MICHAEL WALDMAN**  
PRESIDENT, BRENNAN CENTER FOR JUSTICE AT NYU SCHOOL OF LAW

**HEARING ON OVERSIGHT OF THE CIVIL RIGHTS DIVISION  
OF THE DEPARTMENT OF JUSTICE**

**UNITED STATES HOUSE OF REPRESENTATIVES  
COMMITTEE ON THE JUDICIARY,  
SUBCOMMITTEE ON THE CONSTITUTION, CIVIL RIGHTS, AND CIVIL LIBERTIES**

**SEPTEMBER 24, 2020**

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Mr. Chairman, Ranking Member, and members of the subcommittee:

Thank you for the opportunity to testify today on the performance and the future of the Civil Rights Division of the U.S. Department of Justice.<sup>1</sup> The Division has a storied past and should play a vital role in the great fight for American democracy. Its career attorneys and researchers continue to advance its mission. But in this administration, the Civil Rights Division has retreated from civil rights to pursue, instead, divisiveness. Going forward, we should all work to renew the Division so it once again can play its vital role.

This hearing takes place at a solemn moment in a painful year. In July, we lost Rep. John Lewis, whose bravery brought the Voting Rights Act into being in 1965. This past week, we lost Justice Ruth Bader Ginsburg, whose commitment to that very statute was the heart of her most powerful dissent. And it comes at a time of a nationwide reckoning with the reality and consequences of persistent systemic racism against Black Americans and other minorities – the very phenomenon the Civil Rights Division is charged with seeking to combat and eradicate. That embedded discrimination is the worst of America – and at its best, the Justice Department has been the best of America. It should be again.

The Justice Department and the Civil Rights Division work in myriad ways to advance equality and racial justice. On the burning issue of police misconduct, for example, the Department possesses broad authority, particularly through “pattern and practice” investigations of police departments and resulting consent decrees.<sup>2</sup> The Trump Administration abdicated that power in 2017, and has initiated only one such investigation in three years. As a result, key federal oversight powers have gone unused even as issues of policing and race convulsed the country.<sup>3</sup> On education, LGBTQ rights, gender equality, housing, and so many other issues, this Department should play a vital, central role – and must do better.

This testimony will focus on one of the issues the Brennan Center knows best: voting rights and the health of our democracy.

<sup>1</sup> The Brennan Center for Justice at NYU School of Law is a nonpartisan law and policy institute that works to reform, revitalize, and defend our country’s system of democracy and justice so they work for all. This year, the Brennan Center has litigated and lobbied in eighteen states for voting rights and strong election administration. I have led the Center since 2005. I have authored books on government, the presidency, and the law, including *The Fight to Vote* (Simon & Schuster, 2016), a history of the struggle for voting rights. I previously served as Director of Speechwriting for President Bill Clinton from 1995-99, and as Special Assistant to the President for Policy Coordination. I would like to thank Alan Beard, Harold Ekeh, Jeanine Chirlin, Sean Morales-Doyle, Max Feldman, Clio Morrison, Spencer LaFata, Izabela Tringali, Emily Eagleton, Myrna Perez, Wendy Weiser, Dan Weiner, Martha Kinsella, Maya Efratt, Kirstin Dunham, Larry Norden, Gowri Ramachandran, Brianna Cea, Taryn Merkl, Lauren-Brooke Eisen, Edgardo Cortes, Hannah Klain, and Liz Howard for research and assistance in drafting this testimony. My testimony does not purport to convey the views, if any, of the NYU School of Law.

<sup>2</sup> Civil Rights Division, U.S. Department of Justice, *The Civil Rights Division’s Pattern and Practice Police Reform Work: 1994-Present*, January 2017, <https://www.justice.gov/crt/file/922421/download>.

<sup>3</sup> For a general discussion of how the Justice Department should augment its work on policing, see *Written Testimony from the Brennan Center for Justice to the President’s Commission on Law Enforcement and the Administration of Justice*, (June 8, 2020,) (Statement of Lauren-Brooke Eisen, Director of Brennan Center Justice Program and Spencer Boyer, Director of Brennan Center Washington Office), <https://www.brennancenter.org/our-work/research-reports/testimony-brennan-center-presidents-commission-law-enforcement-and>.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**I. ABDICATION OF DUTY**

Under this administration, unfortunately, the Justice Department has retreated from its historic role as a protector of voting rights. Indeed, too often, it has ignored or even embraced voter suppression moves. It has also shifted resources to other areas and enforcement topics, draining focus on the Division's core voting rights work.

Some of the change, of course, is due to the U.S. Supreme Court's 2013 ruling in *Shelby County v. Holder*.<sup>4</sup> This stripped from the Department its most potent tool to prevent voting abuse: Section 5 of the Voting Rights Act (VRA) of 1965. For forty-eight years, the Civil Rights Division was charged with preclearance for changes to voting laws. It did so with minimal bureaucratic burden. From 1998 to 2013, the Division blocked 86 state and local submissions of election changes. These numbers underestimate the law's effectiveness. Preclearance deterred states and localities from enacting discriminatory voting changes in the first place. Between 1999 and 2005 alone, 153 voting changes were withdrawn and 109 were superseded by altered submissions after DOJ requested more information.<sup>5</sup>

As we all are reminded this week, during oral argument in *Shelby County*, Justice Scalia called the Voting Rights Act little more than a "racial entitlement." Chief Justice Roberts was more decorous. In the majority opinion, he wrote, in effect, that systemic racial discrimination was no longer part of "current conditions," and that states with long histories of discrimination should not be treated differently. In her dissent Justice Ginsburg famously wrote, "Throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet." Plainly, Justice Ginsburg's prediction was right.

In the seven years since *Shelby County*, a wave of disenfranchisement and suppression swept across states previously covered by the preclearance requirement.<sup>6</sup> Soon after the ruling, Texas, Mississippi, and Alabama began to implement and enforce photo ID laws previously barred by preclearance.<sup>7</sup> In states once covered by Section 5, voter purges soared, typically 40 percent higher than in the rest of the country.<sup>8</sup> Were preclearance still in effect, these changes would have been screened before they were enacted and before voters were hurt.<sup>9</sup>

Yet the Division's retreat from its core mission cannot solely be blamed on the Supreme Court. Too often, its officials have actively worked to curb voting rights.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

The Division has flinched in the most basic way: it simply brings no cases. This administration is the first, since the passage of the Voting Rights Act in 1965, to not bring a single enforcement action under the VRA. According to the Justice Department website, during the Obama administration, the Voting Section brought twelve VRA enforcement cases, and during the George W. Bush administration, it brought 46.<sup>10</sup> Even this does not even fully illustrate the abdication of duty. Since Trump was inaugurated on January 20, 2017, the Voting Section has filed claims in only three cases total under any of the statutes it has authority to enforce.<sup>11</sup> (In comparison, it filed claims in 32 cases during the Obama administration and in 69 cases under George W. Bush.<sup>12</sup>) True, in this administration the Voting Section has shown the most interest in enforcing the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), filing two enforcement cases. But it filed sixteen UOCAVA cases under President Obama.<sup>13</sup>

The Voting Section has failed to spend its resources protecting voting rights in other ways as well. In the Obama administration, the Section filed amicus briefs or statements of interest in 24 cases. Since Trump took office, it has filed only five.<sup>14</sup> Moreover, even when it weighs in, often it does not defend voting rights. In two of these five cases, the Voting Section filed a Statement of Interest defending state laws requiring voters to have a witness sign their absentee ballots.<sup>15</sup> (During the Covid-19 pandemic, when absentee voting is on the rise and hard for isolated voters, plaintiffs had sued to challenge these laws as an unlawful “voucher” requirement under the VRA.<sup>16</sup>) At a time of crisis, instead of advancing voting rights, the storied Civil Rights Division instead has defended states’ rights.

Indeed, in two key cases the Division switched sides. It lurched abruptly to support policies that just days before it had argued were racially discriminatory. Either the policies suddenly ceased to be discriminatory, or the Justice Department’s political overseers suddenly decided such conduct is acceptable. The latter analysis unfortunately is far more likely.

One case concerned the harsh voter ID law in Texas, implemented just hours after the Court announced its ruling in *Shelby County*.<sup>17</sup> (Under this law you could not use a University of Texas ID as a government ID, but could use a concealed carry gun permit.) A federal judge found that

<sup>10</sup> See Voting Section Litigation, <https://www.justice.gov/crt/voting-section-litigation>.

<sup>11</sup> These cases include two cases under the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) that were immediately settled, and an intervening complaint seeking to force Kentucky to remove inactive voters from the rolls. **BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

more than 600,000 registered voters lacked the required ID.<sup>18</sup> The Justice Department spent six years opposing Texas's law. Together with private litigants—including parties represented by the Brennan Center—it won federal court rulings that the law was discriminatory and unlawful. Then came Inauguration Day, 2017. The Department abruptly abandoned its longstanding position, and asked the Court of Appeals to allow Texas to enforce the law.<sup>19</sup>

In Ohio, a similar switch occurred.<sup>20</sup> During the Obama administration the Justice Department had successfully opposed the state's effort to purge thousands of voters from the rolls because they had not voted in recent elections. Again, the Justice Department abruptly reversed position, arguing before the Supreme Court that the state's actions were compliant with federal law.

The Civil Rights Division has actively worked, too, to politicize and undermine the Census. The Trump administration tried to add an untested, unprecedented citizenship question; named unqualified political appointees to ill-defined Census Bureau leadership positions late in the census cycle; and refused to comply with congressional subpoenas. The Justice Department actively participated in these moves. For instance, it helped concoct a rationale for adding a citizenship question. Then it defended that pretext in the courts as an authentic reason for the administration's actions. A 5-4 vote of the U.S Supreme Court stopped the scheme, a ruling which turned in part on the Justice Department's purported rationale being little more than a pretext.<sup>21</sup>

The Division also has sought to obscure its actions. In 2017, the head of the Voting Section sent a letter to most states, requesting detailed information on the policies, practices, and procedures related to voter list maintenance. Voting rights advocates feared it was a prelude to a broader effort to force states to aggressively purge voter rolls, and the Brennan Center filed a FOIA request seeking information.<sup>22</sup> Three years later, DOJ refuses to release thousands of pages of documents, asserting that releasing them would interfere with ongoing law enforcement proceedings.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

## **II. THE POLITICIZATION OF THE JUSTICE DEPARTMENT**

The Civil Rights Division is embedded within a cabinet agency distorted and politicized by its leadership. The Justice Department today is under greater improper political duress than at any point in the past half century. One must return to the days of Richard Nixon and John Mitchell to find anything close.

Attorney General William P. Barr has made clear as a matter of doctrine and brute political will that too often the professional judgments of the prosecutors and attorneys at the Department of Justice mean little. In a recent speech, he stated that non-political staff are not as “equipped [as political appointees] to make the complex judgment calls concerning how we should wield our prosecutorial power.”<sup>23</sup> He decried the “criminalization of politics” (even as he pursued former Obama officials seemingly at the behest of the president’s Twitter feed).<sup>24</sup> He appears to have intervened in ongoing prosecutions, over and over, to benefit the president’s personal and political interests.<sup>25</sup> President Trump’s operative Roger Stone had his sentence commuted; his former campaign manager Paul Manafort, jailed for tax evasion and bank fraud, was granted home confinement.<sup>26</sup> The Justice Department, having won a guilty plea from former National Security Advisor Michael Flynn for lying to the FBI about his conversation about sanctions with the Russian ambassador, now has moved to drop the case. The trial judge was so concerned about improper political motive that he has convened an extraordinary inquiry, over the objections of the Justice Department.<sup>27</sup> The president’s personal attorney, Michael Cohen, who credibly accused Trump of participation in a criminal campaign finance scheme, was sent back to prison after he was released during the pandemic because he was writing a book critical of the president.<sup>28</sup> Most recently, the Justice Department stepped in to defend Donald Trump in a personal lawsuit alleging sexual assault.<sup>29</sup> The president’s personal interest and the actions of the Justice Department appear to have fused. Donald Trump long reportedly has asked, “Where’s my

APPENDIX B**

Roy Cohn,” pining for the legendarily ruthless and corrupt attorney and fixer. Startlingly, he has managed to find “his Roy Cohn” in the Attorney General.

All this is in service of Trump’s yearning for an imperial presidency. Last July, Trump declared: “I have an Article II [of the Constitution], where I have to the right to do whatever I want as president.”<sup>30</sup> Attorney General Barr has given a pseudo-scholarly gloss to this misreading of the Constitution. Barr’s words articulating the “unitary executive” assert that the president has untrammeled control over the executive branch, that the attorney general has untrammeled control over the prosecutorial decisions of the Justice Department.<sup>31</sup> His actions assert with equal force that he sees no problem with wielding that absolute control to advance the personal and political interest of the president.

All this raises profoundly alarming questions about the role the Justice Department will play in the upcoming election. In recent months Attorney General Barr has joined in spreading misinformation and threatening misconduct.

- Barr has said that “elections that have been held with mail have found substantial fraud and coercion.”<sup>32</sup> This is false.
- Last month, Trump threatened to use law enforcement personnel on Election Day, claiming they were needed to quell “election night riots.” “We’re going to have sheriffs,” he explained, “and we’re going to have law enforcement, and we’re going to have, hopefully, U.S. attorneys.” He added, “We’ll put them down very quickly if they do that.”<sup>33</sup> Days later during an interview with CNN, Barr defended the president’s comments, saying it would be legal to send law enforcement to polling locations on Election day if it were in response to “a particular criminal threat.”<sup>34</sup>
- Barr has claimed that mail-in voting leads to substantial voter fraud based on a Texas case in which “we indicted someone in Texas – 1,700 ballots collected from people who could vote, he made them out and voted for the person he wanted to.” Barr’s description of the case does

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

not match the facts: only one ballot was fraudulent, the fraud was detected, and the perpetrator was punished accordingly.<sup>35</sup>

- Barr echoed Trump in claiming that vote by mail somehow opened the way for foreign governments to commit fraud. “I’m saying people are concerned about foreign influence, and if we use a ballot system with a system that some – that states are just now trying to adopt, it does leave open the possibility of counterfeiting, counterfeiting ballots either by someone here or someone overseas.”<sup>36</sup>
- Barr said the U.S. will go down a “socialist path” if Trump isn’t reelected, a frightening direct step into partisan politics.<sup>37</sup>

How could such power be misused in and around the election? Recently we have seen the executive branch stir division and challenge First Amendment-protected activity. In June, protestors responding to the killing of George Floyd gathered in Lafayette Square. It was the Attorney General who organized federal officials from DOJ and elsewhere – including Bureau of Prisons riot policemen – to blast through the square, using flash grenades and gas, so the President could hold a photo opportunity. In July, the federal government (in this case, the Department of Homeland Security) sent forces into Portland, Oregon, provoking street battles that stirred fear and dominated the news.

Typically the Justice Department under both parties has carefully avoided actions that could affect an election. In 2000, for example, despite the topsy-turvy Florida recount, the Justice Department under Attorney General Janet Reno did not intervene in the counting – let alone on behalf of her own political party. FBI Director James Comey’s disruptive public statements about Hillary Clinton in 2016 stood out for that very reason.

But Congress has ample reason for concern, given the recent record of this Attorney General – and should make clear it would be a gross abuse of power for the Justice Department to take partisan actions around the election. One hesitates to enumerate them: Could the Department send federal law enforcement into what President Trump calls “Democrat cities” supposedly to protect federal facilities – but in fact, to suppress the vote in a racially discriminatory manner? Could it seize ballots as they are legitimately counted in service of the President’s fevered insistence that ballots cast by mail (other than his) are improper? And so on. We should not risk normalizing such actions by speculating. They would be a breach of our democratic order.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**III. RENEWING THE CIVIL RIGHTS DIVISION**

The task for the Justice Department goes beyond a duty not to abuse power. We should expect more than mere restoration of the Civil Rights Division to its previous work and role. Rather, the deep problems in our electoral system exposed by the pandemic compel us to think anew, and to ask what changes could improve and modernize the Division and its work.

**A. Restore the Voting Rights Act**

The most important legislative task is to restore the strength of the Voting Rights Act of 1965, the nation's most effective civil rights law.

Congress should promptly pass the John R. Lewis Voting Rights Advancement Act (VRAA), which passed the House of Representatives last year as H.R. 4. When the Supreme Court gutted preclearance, it stated explicitly that Congress could fix the VRA, using current data and taking a wider perspective than the last time it reauthorized the law.<sup>38</sup> Congress has engaged in extensive fact-finding and built a strong record.

The John Lewis Act would update the coverage formula that the Supreme Court struck down in *Shelby County*, renewing the Civil Rights Division's authority to block discriminatory voting rules in states with a recent history of voting rights violations.<sup>39</sup> The Justice Department would once again review proposed changes, before they are implemented, to ensure that they do not make it more difficult for racial and language group minorities to cast a ballot.

The VRAA would also give the Department stronger tools to combat discrimination. It would require preclearance of certain known, discriminatory voting practices nationwide, increase transparency by requiring reasonable public notice for voting law changes, and reinforce the Attorney General's authority to send observers to polling places.<sup>40</sup>

**B. Focus On Today's Threats to the Vote**

A renewed Civil Rights Division should be an active force that takes on the myriad urgent threats to the vote nationwide.

*Abusive voter purges.* Rather than pressuring states to ever-more-frenetically purge voters, the Division should refocus its list maintenance enforcement efforts around protecting voters from improper purges. Another example: in 2018, voters of color experienced longer wait times at the polls than their white counterparts and were more likely to wait in the longest lines.<sup>41</sup> The Division should investigate and remedy these inequities.

*Pay-to-vote schemes.* The Division should also step up enforcement of rights guaranteed by the U.S. Constitution. A prime example: in 2018, 64 percent of Florida voters endorsed ending the state's policy of lifetime felony disenfranchisement, a Jim Crow remnant that affected 1.4

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

million people. But last year, Gov. Ron DeSantis signed into law a requirement that denies people the right to vote unless they pay fees and costs whose primary purpose is to raise revenue for the state. Former Civil Rights Division officials filed an amicus brief decrying the law as a blatant violation of the Twenty-Fourth Amendment, which prohibits making voting rights contingent on the payment of taxes.<sup>42</sup> But the current Department itself sat idly by while a federal appeals court ruled that it was constitutional to deny voting rights to hundreds of thousands of Floridians simply because they were not wealthy enough to pay their fees and fines.

*Deceptive practices.* American elections are awash in misinformation. These lies and threats, magnified exponentially by social media, are the most effective way to deter Americans from exercising their core right to vote. We may see increasing evidence of this as the November ballot approaches.

The Justice Department should be given stronger authority to police and punish those who deter voting through false information about eligibility or the “time, place and manner” of an election, or who hinder voters through intimidation. The For the People Act (H.R. 1), sweeping democracy reform passed by the House of Representatives last year, includes these and other measures to strengthen the Division’s power to address voter suppression through misinformation. It also charges the Department with publicizing corrective information when misinformation is disseminated.

### C. Protect Election Security

Cyberattacks put American democracy at risk. They pose real, not imaginary, challenges to Americans’ right to vote. The Civil Rights Division could do more to help bolster the nation’s defenses.

The Help America Vote Act (HAVA) was passed in 2002 after the Florida recount. It aimed to modernize the nation’s election systems. The Justice Department has authority to enforce many of its provisions, authority it has not used during the Trump administration. HAVA enforcement would particularly help effort improve election infrastructure security. For instance, the law requires that when a voter’s eligibility is questioned, provisional ballots should be available as a failsafe at polling places.<sup>43</sup> That is important not only for individuals; it is a key resiliency mechanism should registration or pollbook data be corrupted. Some states always offer these ballots,<sup>44</sup> but others do not do so consistently.<sup>45</sup> Indeed, a recent Georgia State Board of

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Elections hearing revealed that during the June primary, multiple polling locations ran out of envelopes and could not offer voters this option.<sup>46</sup> Yet the Department of Justice has not issued clarifying guidance on maintaining the supplies needed to effectuate this right.

In another important provision, HAVA requires that voting systems used in federal elections provide an auditable paper trail, and that voters can change their selections before that permanent paper record is produced.<sup>47</sup> These requirements should prohibit Direct Record Electronic (DRE) devices that lack a paper record in federal elections, as well as any online voting systems in which voters return their ballots through email or over the internet, a method that is not secure. Yet even as some jurisdictions in eight states continue to employ the use of DREs without a paper record,<sup>48</sup> and as jurisdictions have become tempted to permit online ballot return,<sup>49</sup> no clarification or enforcement action has been taken to protect the security of those ballots. Justice Department action matters greatly because the existence of a private right of action to enforce some sections of HAVA is sometimes contested.<sup>50</sup>

Particularly important after the foreign attacks on registration databases in 2016: HAVA's mandate that computerized registration lists be protected by "adequate technological security measures."<sup>51</sup> Russian hackers were able to exfiltrate data from at least one registration database in 2016.<sup>52</sup> We know that Russia is at it again, potentially along with other malevolent foreign governments or groups. Even subtle manipulation of databases can wreak havoc on Election Day and undermine public confidence. It is therefore vital that officials and vendors meet HAVA's requirement for basic cybersecurity standards.

**D. Restore the Independence of the Justice Department**

A final recommendation goes to a fundamental challenge for American governance: the politicization of law enforcement. Donald Trump is hardly the first president to seek to influence the Justice Department. Nor is William Barr the first Attorney General to oblige. But as discussed above, their misconduct has wrenched the Department, sparking a crisis of confidence within its ranks and with the public.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

The Brennan Center has done a substantial amount of work on partisan abuses at the Department of Justice. Our bipartisan National Task Force on the Rule of Law and Democracy, comprised of former senior political officials who have served in both Republican and Democratic administrations, created a legislative agenda to strengthen guardrails against abuse of power in the executive branch.<sup>53</sup> The Brennan Center has also published a set of proposals for executive actions that the next president can take to rebuild unwritten rules of governance that safeguard our democracy.<sup>54</sup> Additionally, we have a tracker of the Trump administration’s abuses of power throughout its response to the Covid-19 pandemic, including those occurring at the Department of Justice.<sup>55</sup>

Undue political interference gravely threatens the work of the Civil Rights Division, and the Department of Justice in general, a threat that has recurred during the past several administrations. For instance, under the George W. Bush presidency, the Department’s inspector general and Office of Professional Responsibility found that the political official overseeing the Civil Rights Division “considered political and ideological affiliations in hiring career attorneys and in other personnel actions affecting career attorneys” there.<sup>56</sup> Indeed, when political officials pressured prosecutors to bring voter fraud charges against innocent people, some of the prosecutors refused and were fired. The resulting scandal led to the resignation of Attorney General Alberto Gonzales.

Political interference at the Department of Justice has again reached a crisis point during the current administration. As described above, repeatedly the Department has made prosecution and sentencing decisions about the President’s political associates. And the president has meddled in politically sensitive prosecutions, including by firing the U.S. attorney for the Southern District of New York, whose office is investigating matters involving the president and his close associates.<sup>57</sup>

Senior political officials also pressured department attorneys to conduct an antitrust investigation of automakers that attempted to lower their emissions and to cut Trump ally Roger Stone “a break” in sentencing. Kyle Cheney and Leah Nylen, “Prosecutor Says He Was Pressured to Cut Roger Stone ‘a Break’ Because of His Ties to Trump,” *Politico*, June 23, 2020, <https://www.politico.com/news/2020/06/23/prosecutor-says-he-was-pressured-to-cut-roger-stone-a-break-because-of-his-ties-to-trump-336075>.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

This abuse must stop. The Brennan Center has crafted a series of solutions — building on longstanding practices — that would safeguard against undue political interference at the Department of Justice. Among these solutions is a proposal to strengthen the policy of limiting contacts between the White House and the Department.<sup>58</sup> Our Task Force has also proposed expanding the jurisdiction of agency inspectors general to include investigations into improper interference in law enforcement matters.<sup>59</sup> It also makes sense to strengthen safeguards at other agencies that interact with the Justice Department. For example, the Census Bureau and the Commerce Department could be required to maintain publicly accessible logs of the communications that senior officials have with personnel from other federal agencies, such as the Department of Justice.

Congress is already moving to address these issues. Seven committee chairs, including Chairman Nadler, this week introduced groundbreaking legislation that would, among other things, codify new safeguards to prevent improper political interference with the Department of Justice.<sup>60</sup> This proposal is similar to a separate bill introduced by Rep. Jeffries.<sup>61</sup> Another bill sponsored by Rep. Richmond, which passed the House of Representatives, would expand the jurisdiction of the inspector general for the Department of Justice to include allegations relating to a Department attorney's authority to investigate, litigate, or provide legal advice.<sup>62</sup>

There is reason to hope that in a new Congress, such legislation could attract bipartisan support.

\* \* \*

The Civil Rights Division has a storied history. It must play a vital role in the defense of our democracy. At a time of extraordinary stress on our political institutions, it can once again step forward to advance the voting rights of millions of Americans. It must be renewed and revitalized. That will require determination, a resistance to inappropriate political interference, and a commitment to following the law.

**TESTIMONY OF  
MICHAEL WALDMAN**

**PRESIDENT  
BRENNAN CENTER FOR JUSTICE AT NYU SCHOOL OF LAW**

**HEARING ON S. 1, THE FOR THE PEOPLE ACT**

**THE COMMITTEE ON RULES & ADMINISTRATION  
U.S. SENATE**

**March 24, 2021**

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Chairwoman Klobuchar, Ranking Member Blunt, and members of the Committee:

Thank you for the opportunity to testify in strong support of the For the People Act (S. 1).<sup>1</sup> This landmark legislation would repair and revitalize our democracy. It would be the most significant democracy reform in at least a half century. It would powerfully restore trust in government. It is the next great civil rights bill, a critical response to the call for racial justice. It should become law.

The For the People Act would markedly improve the workings of American democracy, modernizing it, opening access, and restoring public trust. The legislation:

- sets national standards to ensure that all eligible citizens can cast a ballot—guaranteeing access to vote by mail and early voting, and extending automatic voter registration nationwide;
- bans partisan gerrymandering and sets clear rules for the drawing of congressional districts;
- curbs the corrosive role of big money in politics, requiring disclosure and enforcement, and enacting a system of voluntary small donor matching funds;
- strengthens rules to ensure ethical conduct by executive and judicial branch officials; and
- restores the right to vote for people with past criminal convictions, and commits to strengthening the Voting Rights Act.

Each of these bold reforms meets an urgent need. Each has been found to work at the national, state, or local level. They work together to advance our system of self-government.

The Senate considers S. 1 at a time of crisis for our democracy. Legislatures across the country are moving to enact curbs on voting, an assault on voting rights that targets people of color. This legislation would stop the new wave of voter suppression, cold.<sup>2</sup> Congress has the power to do so—legally and constitutionally. We urge the Senate to meet this moment and act.

#### **I. THE STAKES FOR DEMOCRACY**

In 2020, despite the pandemic, voter suppression, and lies about the election, our nation saw the highest voter turnout since 1900.<sup>3</sup> Fully 101 million people voted early or by mail. The federal government’s experts confirmed it was the most secure election in history. We should celebrate this achievement.

---

<sup>1</sup> The Brennan Center for Justice at NYU Law is a nonpartisan law and policy institute that works to strengthen the systems of democracy and justice so they work for all Americans. Michael Waldman, president of the Center since 2005, is the author of *The Fight to Vote* (Simon & Schuster: 2016). Brennan Center experts and staff contributed to the preparation of this written testimony: Wendy Weiser, Daniel Weiner, Martha Kinsella, Kirstin Dunham, Gareth Fowler, Julia Boland, Katherine Scotnicki, Michael Li, Lawrence Norden, William Wilder, Eliza Sweren-Becker, Derck Tisler, Gowri Ramachandran, Dominique Erney, Harold Ekeh, and Alan Beard. Thank you also to Taylor Larson, Khrystan Policarpio, and Jenna Pearson for their drafting assistance.

<sup>2</sup> See Gareth Fowler et al., “Congress Could Change Everything,” Brennan Center for Justice, March 16, 2021, <https://www.brennancenter.org/our-work/research-reports/congress-could-change-everything>.

<sup>3</sup> Kevin Schaul, Kate Rabinowitz, and Ted Melnik, “2020 Turnout Is the Highest in over a Century,” *Washington Post*, November 5, 2020, <https://www.washingtonpost.com/graphics/2020/elections/voter-turnout/>.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Instead, our nation endured months of the Big Lie pushed by the defeated president who insisted that the election was stolen and our democracy illegitimate. These relentless attacks culminated in the violent January 6 insurrection at the Capitol, a sobering low point in our nation's history.

Now, in the first weeks of 2021, we see a new and fierce assault on the vote. Legislators are rushing to enact a wave of voting restrictions, in what would be the most significant cutback since the Jim Crow era. As of our February 19 count, 253 proposed laws in 43 states would curb the vote, seven times more than just two years ago.<sup>4</sup> The number is now well over 300. They amount to a real time attack on our democracy.

Consider the measures before the legislature in Georgia. Some proposals would have effectively ended no-excuse vote by mail, but preserved it for older voters, who tend to be white and Republican. Another proposal would have repealed automatic voter registration, which had been put in place by the Republican governor. Another proposal would have ended early voting on the Sunday before Election Day—the day used by Black churches for “souls to the polls.” And now the legislature is still considering proposals allowing for mass challenges and making it a crime to give a bottle of water to someone waiting on line to vote. After a sustained public outcry, in recent days, sponsors have begun to make changes, but egregious proposals continue to move through the legislature.

Georgia is not an anomaly. In Arizona, lawmakers pre-emptively proposed banning automatic and Election Day voter registration (they do not have either now), and are actively trying to: make it harder to vote by mail, push for aggressive purges of voters off of the vote-by-mail list, and require new onerous ID requirements for when voting by mail. In Texas, legislators have proposed requiring voters to prove their citizenship status if it can't be verified by the secretary of state, and prohibiting voters from submitting absentee ballots in person. The governor of Iowa already signed into law a bill cutting back on early voting.

These proposals all disproportionately affect, and often target, voters of color.<sup>5</sup> If enacted, they would result in large-scale disenfranchisement of eligible voters. As more and more people are admitting, that is precisely their purpose. Recently an Arizona legislator, defending that state's proposed voter suppression laws, explained that while some wanted to make sure that everyone could vote, “everybody shouldn't be voting.” He added: “Quantity is important, but we have to look at the quality of votes, as well.”<sup>6</sup> That ugly sentiment animates too many of these proposed state laws.

Congress can—and must—stop this legislative campaign across the country to suppress the vote. The Brennan Center has analyzed each of the restrictive voting bills pending in the

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

states and concludes that The For the People Act would thwart virtually every one. A chart attached to this testimony as an appendix spells out how its provisions would block or override these egregious proposals ([Attachment](#)).<sup>7</sup> Some proposed laws would cut back who can vote by mail; S. 1 would require no-excuse absentee balloting. Some proposals would restrict the use of secure drop-boxes, frequently used to vote absentee; S. 1 would ensure that voters can vote securely and conveniently. Some proposals would eliminate same day or automatic registration; S. 1 would protect them. Some proposals would end early voting on Sundays; S. 1 would require 14 days of consecutive early voting.

Within months, too, the redistricting process to draw congressional district lines will begin. Unchecked state legislative majorities will likely use the opportunity to gerrymander, to discriminate, to deny communities a voice and voters meaningful choice. The states with the fastest growing populations—growth that came overwhelmingly from people of color—face the highest risk of racial and partisan gerrymandering that would deny those emerging communities representation. This will be the first redistricting cycle in a half century without the full protections of the Voting Rights Act, which the U.S. Supreme Court gravely weakened in the *Shelby County v. Holder* decision in 2013.<sup>8</sup>

This legislation comes, as well, one decade after *Citizens United* ushered in a new era of big money domination of American politics—a role for big donors not seen since the Gilded Age a century ago. Fully \$14.4 billion was spent on the 2020 election, roughly double the amount just four years before. And even with a historic level of participation by small donors—in excess of 20 million during the last election cycle—the power of big donors continues unabated.<sup>9</sup> Indeed, the amount spent by the top 100 individual donors last cycle rivalled the amount spent by more than 20 million small donors combined.<sup>10</sup> Effectively, money in politics has been largely deregulated. Super PACs, dark money, and a frenetic chase for funds have come to dominate.

It comes after four years in which President Trump smashed through ethical norms and longstanding practices designed to prevent abuse of power.

These converging crises demand a full response to the challenges facing American democracy. A key strength of this legislation, in contrast to earlier and narrower reform proposals, is that it links voting and redistricting and campaign finance and ethics. All are essential to the strength of American democracy. All are at or near a crisis point. All combine to

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

dampen the voices of millions of Americans—working people, people of color, women, young people, and people with disabilities.

S. 1 emphatically reflects the Constitution’s vision of the appropriate role for the federal government. The Constitution’s Elections Clause, in particular, gives Congress authority to set the “times, places and manner” of federal elections.<sup>11</sup> At the Constitutional Convention, James Madison insisted on the provision because of the risk that state legislatures would enact manipulative election laws. “It was impossible to foresee all the abuses that might be made of the discretionary power,” Madison warned. He sketched out an array of ways to manipulate voting rules: “Whenever the State Legislatures had a favorite measure to carry, they would take care so to mold their regulations as to favor the candidates they wished to succeed.”<sup>12</sup> The Supreme Court repeatedly has reaffirmed Congress’s power to enact national laws to govern federal elections. Indeed, in 2019, an opinion written by Chief Justice John Roberts pointed to this very legislation as proof that “the Framers gave Congress the power to do something about partisan gerrymandering in the Elections Clause.”<sup>13</sup>

Throughout, this legislation would set a national standard. Access to our electoral system should be the same regardless of where a citizen lives. Of note, every measure in this bill has been drawn from successful policies at the national, state, and local level. Every one has been honed by election officials over the years. Every one has been supported or used by both parties. They are widely popular with the public, and with voters of all political persuasions.

While Congress sets national standards, states could still innovate and to innovate beyond them. Where states have already met the legislation’s goals (such as by implementing automatic voter registration), in many cases they would be exempt from its provisions.

Taken together, the reforms in the For the People Act represent a powerful response to the demand for racial justice heard so passionately throughout the country. Our voting system, politically manipulated gerrymandering, and a dollar-driven campaign finance system all combine to stifle the voices of communities of color. Recent proposed electoral changes in the states would markedly shrink the electorate, again in a manner that would hit those voters hardest. If we are to build a thriving multiracial democracy that reflects a changing country, we have no choice but to modernize our electoral systems and prevent abuse.

Finally, this legislation emphatically repudiates the Big Lie put forward by President Trump and his supporters: that American elections are riddled with misconduct. Voter fraud in the United States is vanishingly rare. You are more likely to be struck by lightning than to commit voter fraud.<sup>14</sup> In 2016, in an election he won, Trump insisted there were three to five million illegal votes. He established a commission to prove his claim. It collapsed without

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

finding any evidence. In 2020, the election was confirmed to be smoothly run and extraordinarily secure. The Department of Homeland Security declared that the 2020 election was the “most secure in history.”<sup>15</sup> (Trump responded by firing the country’s key official who protected elections from cyber threats.<sup>16</sup>) In the frenzy of lawsuits brought to overturn the election, 60 courts considered claims, and rejected them. Trump’s attorneys, under oath, were forced to confess repeatedly they could press no charges of fraud. Federal Judge Stephen Bilbas, appointed by President Trump, ruled definitively on behalf of a three-judge appeals court panel: “Charges of unfairness are serious. But calling an election unfair does not make it so. Charges require specific allegations and then proof. We have neither here.”<sup>17</sup> Attorney General William Barr confirmed that there was no widespread election fraud.<sup>18</sup> Privately to the president, he used a more colorful barnyard epithet.<sup>19</sup>

Trump relied on these debunked claims to justify bid to cut out, in effect, the votes of cities variously including Atlanta, Philadelphia, Detroit, and Milwaukee. The ugly racial subtext is barely disguised. Unfortunately, the Big Lie has been embraced by millions of Americans. This legislation can help to push back against it by focusing on the true threats to election integrity—which include cybersecurity risks and foreign interference. (Indeed, last week the intelligence community released its report alleging that Russia and Iran sought to interfere in last year’s election, albeit backing different candidates.<sup>20</sup>)

Were it to become law, the For the People Act would mark a major and hopeful turn in the American story. Our history has been marked over two centuries by the drive toward the democratic ideal. At the start, we were anything but what we would regard today as a democracy. Only white men who owned property could vote. Even so, James Madison set out an aspiration for our Constitution in *Federalist 57*. He asked: “Who are to be the electors of the federal representatives?”

*Not the rich, more than the poor; not the learned, more than the ignorant; not the haughty heirs of distinguished names, more than the humble sons of obscurity and*

APPENDIX B**

*unpropitious fortune. The electors are to be the great body of the people of the United States.*<sup>21</sup>

This legislation reflects that drive toward the most basic of American ideals. In the following sections, this testimony describes its provisions in greater detail.

## **II. VOTING RIGHTS**

The right to vote is at the heart of effective self-government. It is, as the Supreme Court has noted, “preservative of all other rights.”<sup>22</sup> Over two centuries and more, we have worked toward that ideal. Many Americans gave their lives for it. S. 1 would expand and protect this most fundamental right and bring voting into the 21st century.

### **A. Voter Registration Modernization (Title I, Subtitle A, Parts 1, 2, and 3 & Title 2, Subtitle F)**

One of the most important parts of S. 1 is a package to modernize voter registration. The centerpiece of that proposal is a plan for automatic voter registration (AVR). This bold, paradigm-shifting approach would add tens of millions to the rolls, cost less, and bolster security and accuracy. It is now the law in 19 states and the District of Columbia.<sup>23</sup> It should be the law of the land.

**Outdated Voter Registration Systems.** More than many realize, an outdated registration system poses an obstacle to free and fair elections. One in five eligible Americans is not registered to vote.<sup>24</sup> This quiet disenfranchisement is partly due to an out-of-date, and in some places ramshackle, voter registration system. The United States is the only major democracy that requires individual citizens to shoulder the onus of registering to vote (and re-registering when they move).<sup>25</sup> In much of the country, voter registration still largely relies on error-prone pen and paper. In 2012, the Pew Center on the States estimated that roughly one in eight registrations in America is invalid or significantly inaccurate.<sup>26</sup>

These problems have long contributed to low voter turnout.<sup>27</sup> Each Election Day,

<sup>27</sup> According to a 2001 commission chaired by former Presidents Ford and Carter, “[t]he registration laws in the United States are among the most demanding in the democratic world . . . [and are] one reason why voter turnout in

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

millions of Americans go to the polls only to have trouble voting because of registration flaws.<sup>28</sup> Some find their names wrongly deleted from the rolls.<sup>29</sup> Others fall out of the system when they move.<sup>30</sup> One-quarter of American voters wrongly believe their registration is updated when they change their address with the U.S. Postal Service.<sup>31</sup> Election Protection, the nonpartisan voter assistance hotline, reported that registration issues were the second most common problem voters faced in both the 2018 and 2016 elections.<sup>32</sup> Registration errors affect more than those voters who are not on the rolls. As the bipartisan Presidential Commission on Election Administration found in 2014, registration problems cause delays at the polls and are a principal cause of long lines.<sup>33</sup>

Outdated registration systems also undermine election integrity. Incomplete and error-laden voter lists create opportunities for malefactors to defraud the system or disenfranchise eligible citizens. And they are far more expensive to maintain than more modern systems. Officials with partisan motives can remove voters from the rolls because of minor discrepancies, such as spelling mistakes, incomplete addresses, or other missing information. These systems are also far more expensive to maintain than more modern systems. Arizona's Maricopa County, for

the United States is near the bottom of the developed world." See Jimmy Carter, Gerald Ford, et al., *Reports of the Task Force on the Federal Election System*, National Commission on Election Reform, 2001, 1–3, [http://web1.millercenter.org/commissions/comm\\_2001\\_taskforce.pdf](http://web1.millercenter.org/commissions/comm_2001_taskforce.pdf). In too many parts of America, this is still true.

<sup>28</sup> A Caltech/MIT study found that in 2008, approximately 3 million people tried to vote but could not because of registration problems, and millions more were thwarted by other issues. See R. Michael Alvarez, Stephen Ansolabehere, et al., *2008 Survey of the Performance of American Elections*, 2009, 59, [https://elections.delaware.gov/pdfs/SPAE\\_2008.pdf](https://elections.delaware.gov/pdfs/SPAE_2008.pdf); see also Stephen Ansolabehere, *Testimony before the U.S. Senate Rules Committee*, 19, March 11, 2009. Data from 2012 similarly demonstrates that millions of voters experienced registration problems at the polls. Charles Stewart III, *2012 Survey of the Performance of American Elections: Final Report*, 2013, 70, <http://dyn.iq.harvard.edu/dyn/dv/measuringelections>.

<sup>29</sup> Approximately 2.5 million voters experienced voter registration problems at the polls in the 2012 election. Stewart III, *2012 Survey of the Performance of American Elections*, ii; and U.S. Election Assistance Commission, *2012 Election Administration and Voting Survey*, 2013, 8–10, <https://www.eac.gov/assets/1/6/2012ElectionAdministrationandVoterSurvey.pdf>. Stewart found 2.8 percent of 2012 voters experienced registration problems when they tried to vote. The Election Administration and Voting Survey found that 131,590,825 people voted in 2012 and that 65.5 percent voted in person on Election Day (56.5 percent) or early (9 percent). 65.5 percent of 131,590,825 voters multiplied by the 2.8 percent figure from Stewart's study, yields 2,413,375.73 voters with registration problems at the polls in the 2012 election.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

example, found that processing a paper registration cost 83 cents, compared to 3 cents for applications processed electronically.<sup>34</sup>

The Covid-19 pandemic put outdated registration systems under even greater stress. Quarantines, illnesses, and social distancing reduced access to government offices, voter registration drives were curbed, and the post service was disrupted in the lead-up to the election. The result was a dramatic reduction in voter registration rates in many states.<sup>35</sup>

**1. Automatic Voter Registration (Title I, Subtitle A, Part 2)**

Under AVR, every eligible citizen who interacts with designated government agencies is automatically registered to vote, unless they decline registration. As noted above, 19 states and the District of Columbia have AVR.<sup>36</sup> If adopted nationwide, it could add as many as 50 million new eligible voters to the rolls.<sup>37</sup>

AVR shifts registration from an “opt-in” to an “opt-out” approach. When eligible citizens give information to the government—for example, to get a driver’s license, receive Social Security benefits, apply for public services, register for classes at a public university, or become naturalized citizens—they are automatically signed up to vote unless they decline. This reflects how the human brain works; behavioral scientists have shown that we are hard-wired to choose the default option presented to us.<sup>38</sup>

The policy also requires that voter registration information be electronically transferred to election officials, rejecting paper forms and snail mail. This significantly increases the accuracy of the rolls and drives down the costs of maintaining them.<sup>39</sup>

<sup>39</sup> Brennan Center for Justice, *Case for Automatic Voter Registration*, 11.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

AVR Works. Oregon and California became the first states to adopt AVR in 2015.<sup>40</sup> Since then, 17 more states and the District of Columbia have followed—many with strong bipartisan support.<sup>41</sup> In Illinois, for example, the state legislature passed AVR unanimously, and a Republican governor signed it into law.

The new system has increased registration rates in nearly every state where it has been implemented. In Vermont, for example, DMV registrations went up by 60 percent after it adopted AVR, and in Georgia, they increased 94 percent.<sup>42</sup> In eight jurisdictions that implemented AVR for the 2018 election, 2.2 million people were registered to vote through AVR, and up to 6 million people had their registration information updated.<sup>43</sup>

There is strong reason to believe that the reform also boosts turnout.<sup>44</sup> When citizens are automatically registered, they are relieved of an obstacle to voting, thus increasing the likelihood they will cast a ballot. Automatic registration also exposes more voters to direct outreach from election officials, political parties, candidates, and others.<sup>45</sup> Indeed, Oregon saw the nation’s largest turnout increase in the 2016 election after it adopted AVR in 2015. It had no competitive statewide races, yet the state’s turnout increased by 4 percent in 2016—2.5 percentage points higher than the national average.<sup>46</sup> According to a 2018 analysis of registration and turnout statistics in eight jurisdictions by the website FiveThirtyEight, AVR resulted in hundreds of thousands of new voters at the polls.<sup>47</sup> Other reforms that make it easier to register have also increased turnout, such as permitting registrants who move anywhere within a state to transfer their registration and vote on Election Day at their new polling place.<sup>48</sup> These measures send a

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

strong message that all eligible citizens are welcome and encouraged to participate in our democracy.

Many election officials support AVR because it improves administration and saves money. Virtually every state to have transitioned to electronic transfer of registration information has reported substantial savings from reduced staff hours processing paper, and lower printing and mailing expenses.<sup>49</sup> Eliminating paper forms improves accuracy, reduces voter complaints about registration problems, and reduces the need for the use of provisional ballots.<sup>50</sup>

Voters strongly support the reform. According to recent polling, 69 percent of Americans favor it.<sup>51</sup> Michigan and Nevada adopted AVR in 2018 by popular referendum, with overwhelming support from voters, including Democrats, Republicans, and Independents.<sup>52</sup> Alaska voters passed AVR in 2016 with nearly 64 percent of the vote.<sup>53</sup>

AVR Should be the National Standard. S. 1 sensibly makes AVR a national standard, building on past federal reforms to the voter registration system.<sup>54</sup> Critically, the Act requires states to put AVR in place at a wide variety of government agencies beyond state motor vehicle agencies, including those that administer Social Security or provide social services, as well as higher education institutions. It also requires a one-time “look back” at agency records to register individuals who have previously interacted with government agencies while protecting voters’ sensitive information from public disclosure.

AVR also includes multiple safeguards to ensure that ineligible voters are not registered and to prevent people from being punished for innocent mistakes. The government agencies designated for AVR regularly collect information about individuals’ citizenship status and age, and they are already required to obtain an affirmation of U.S. citizenship during the registration transaction. Before anyone is registered, agencies must inform individuals of eligibility

<sup>53</sup> New York Times, “Alaska Ballot Measure 1—Allow Qualified Individuals to Register to Vote When Applying for a Permanent Fund Dividend—Results: Approved,” last modified August 1, 2017, <https://www.nytimes.com/elections/2016/results/alaska-ballot-measure-1-pfd-application-voter-reg>.

<sup>54</sup> The National Voter Registration Act of 1993 required states to offer voter registration at their motor vehicle, public assistance, and disabilities agencies, among other things. 52. U.S.C. §§ 20504–20506. S. 1’s AVR provisions build on this by expanding the agencies that offer voter registration and by making the registration process paperless at those agencies. The Help America Vote Act of 2002 pushed states into the digital age, by requiring them to create a centralized, computerized voter registration list. 52 U.S.C. § 21083. S. 1 extends the benefits of that legislation by seamlessly transmitting voter information between registration agencies and the election officials that control the computerized voter list.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

requirements, the penalties for illegal registration, and offer them the opportunity to opt out of registration. Election officials too are required to send individuals a follow up notice by mail. In light of these checks, there is no basis for critics' alarmist speculation that AVR would result in an increase in the registration of ineligible persons. Indeed, election officials report that AVR's elimination of paper forms *enhances* the accuracy of the rolls.<sup>55</sup> As a precaution, S. 1 also includes protections in the unlikely event that an ineligible person is inadvertently registered, to ensure that they are not harmed as a result.

**2. Same-Day Registration (Title I, Subtitle A, Part 3)**

S. 1 would boost voter participation further by establishing same-day registration (SDR), which allows eligible citizens to register and vote on the same day. It is a strong complement to AVR, available to those eligible voters who have not interacted with government agencies or whose information has changed since they did. Because it provides eligible Americans an opportunity to vote even if their names are not on the voter rolls, SDR safeguards against improper purges, registration system errors, and cybersecurity attacks.

SDR has been used successfully in several states since the 1970s. Today, 21 states and the District of Columbia offer some form of same-day registration, either on Election Day, during early voting, or both.<sup>56</sup> At least 18 additional states had introduced bills to implement same-day registration during the current legislative session.<sup>57</sup> Studies indicate that SDR boosts voter turnout by 5 to 7 percent.<sup>58</sup> And it is highly popular. In 2018, supermajorities of voters in Michigan and Maryland passed ballot measures that, respectively, implemented and expanded same-day registration. According to recent polls, more than 60 percent of Americans support SDR.<sup>59</sup> As part of the full package of reforms, SDR's use would be limited, since AVR would capture the vast majority of voters well before Election Day. Taken together, AVR and SDR would ensure that no eligible voter is left out.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**3. Online Registration (Title I, Subtitle A, Part 1)**

Online registration also increases voter participation by eliminating cumbersome paperwork and waiting periods. S. 1 requires states to offer secure and accessible online registration. At a time when many Americans do everything from banking to reviewing medical records online, voters want this convenient method of registration. The online registration provisions in S. 1 would let all voters register, update registration information, and check registrations online. This option has been especially critical during the Covid-19 pandemic, when voters were prevented from registering by other means. The Act would also ensure that these benefits are available to citizens who do not have driver's licenses.

In addition to convenience and safety, online registration saves money and improves voter roll accuracy. Processing electronic applications is a fraction of the cost of processing paper applications. Washington State reported savings of 25 cents with each online registration (for a total of about \$176,000 in savings) in the first two years of the program, and its local officials save between 50 cents and two dollars per online transaction.<sup>60</sup> Election officials also report that letting voters enter their own information significantly reduces the likelihood of incomplete applications and mistakes.<sup>61</sup>

It is not surprising, therefore, that online registration is incredibly popular and has spread rapidly. In 2010, only six states offered online voter registration. Now, 40 states and the District of Columbia do.<sup>62</sup> Taken together, AVR, SDR, and online registration would ensure that no eligible voter is left out of our democratic process.

**4. Voter Purge Protections (Title I, Subtitle A; Title II, Subtitle F)**

Modernizing our system means not only registering all eligible voters, but also making sure they stay on the rolls. Voter purges—the large-scale deletion of voters' names from the rolls, often using flawed data—are on the rise.<sup>63</sup> In 2018, they were a key form of vote suppression used by election officials around the country.<sup>64</sup> In 2020, as the Covid-19 pandemic created new voting challenges, improper purges made it difficult for states such as Iowa to

**BRENNAN CENTER FOR JUSTICE**  
**APPENDIX B**

distribute mail ballot request forms to many eligible voters.<sup>65</sup> In the aftermath of the 2020 election, bills have been introduced in 17 states that would expand voter roll purges or adopt flawed practices that would create a risk of improper purges.<sup>66</sup> S. 1 addresses this growing threat by curbing improper efforts to remove eligible voters.

Purges soared in those states with a history of discrimination in voting that once had been subject to federal oversight under the Voting Rights Act before *Shelby County*.<sup>67</sup> The Brennan Center has calculated that more than 17 million voters were purged from the rolls nationwide between 2016 and 2018.<sup>68</sup> Over the same period, the median purge rate in jurisdictions previously covered by the VRA was 40 percent higher than the purge rate elsewhere.<sup>69</sup> Georgia, for example, purged twice as many voters—1.5 million voters—between the 2012 and 2016 elections as it did between 2008 and 2012. The state also saw most of its counties purge *more than 10 percent* of their voters between 2016 and 2018.<sup>70</sup> Texas purged 363,000 more voters between 2012 and 2014 than it did between 2008 and 2010.<sup>71</sup> We ultimately found that *2 million fewer voters* would have been purged between 2012 and 2016, and 1.1 million fewer between 2016 and 2018, if jurisdictions previously subject to preclearance had purged at the same rate as other jurisdictions.<sup>72</sup>

Incorrect purges disenfranchise legitimate voters and cause confusion and delay at the polls. In 2019, for example, the Texas secretary of state sent lists of approximately 95,000 alleged non-citizens to county officials for purging, but within days, it became clear the tallies were rife with inaccuracies.<sup>73</sup> In 2016, New York election officials erroneously deleted hundreds of thousands from the rolls, with no public warning and little notice to those who had been purged.<sup>74</sup> The same year, thousands of Arkansas voters were purged because of supposed felony convictions—but the lists that were used were highly inaccurate and included many voters who had never committed a felony or had had their voting rights restored.<sup>75</sup>

<sup>75</sup> Brater et al., *Purges: A Growing Threat*, 5.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Purges can be carried out in discriminatory ways that disproportionately affect minority voters.<sup>76</sup> In particular, when voter lists are matched with other government databases to ferret out ineligible people, it can generate discriminatory results if done without adequate safeguards. Black, Asian American, and Latino voters are much more likely than white voters to have one of the most common 100 last names in the United States, resulting in a higher rate of false positives.<sup>77</sup>

S. 1 puts strong protections in place to prevent improper purges. It puts new guardrails on the use of inter-state databases (such as the now defunct and much maligned Crosscheck system) that purport to identify voters that have re-registered in a new state, but that have been proven to produce deeply flawed data. It prohibits election officials from relying on a citizen's failure to vote in an election as a reason to remove them from the rolls. And it requires election officials to provide timely notice to removed voters, as well as an opportunity to remedy their registration before an election.

**B. Commitment to Restore the Voting Rights Act (Title II, Subtitle A)**

As recent experiences with purges and other vote suppression tactics make clear, Congress must restore the full protections of the Voting Rights Act, which the U.S. Supreme Court hobbled in 2013 in *Shelby County*. While the Act's affirmative voting standards would negate many of the abusive proposals now being advanced in states,<sup>78</sup> a fully functional VRA is also a check against future discriminatory efforts to restrict voting.

The VRA is widely regarded as the single most effective piece of civil rights legislation in our nation's history.<sup>79</sup> As recently as 2006 it won reauthorization with overwhelming bipartisan support.<sup>80</sup> For nearly five decades, the linchpin of the VRA's success was the Section 5 preclearance provision, which required certain states with a history of discriminatory voting practices to obtain advance approval from the federal government for voting rules changes. Section 5 deterred and prevented discriminatory changes to voting rules right up until the time the Supreme Court halted its operation. Between 1998 and 2013, Section 5 blocked 86 discriminatory changes (13 in the final 18 months before the *Shelby County* ruling), caused

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

hundreds more to be withdrawn after a Justice Department inquiry, and prevented still more from being put forward because policymakers knew they would not pass muster.<sup>81</sup>

*Shelby County* eviscerated Section 5 by striking down the “coverage formula” that determined which states were subject to preclearance. That resulted in a predictable flood of discriminatory voting rules, contributing to a now decade-long trend in the states of restrictive voting laws, which the Brennan Center has documented extensively.<sup>82</sup> Within hours of the Court’s decision, Texas announced that it would implement what was then the nation’s strictest voter identification law—a law that had previously been denied preclearance because of its discriminatory impact. Ultimately a federal court found, after an extensive trial, that more than 608,000 Texas voters lacked the necessary ID.<sup>83</sup> Shortly afterward, Alabama, Arizona, Florida, Mississippi, North Carolina, and Virginia also moved ahead with restrictive voting laws or practices that previously would have been subject to preclearance.<sup>84</sup> In the years since, federal courts have repeatedly found that new laws passed after *Shelby* made it harder for minorities to vote, some intentionally so.<sup>85</sup> Our research regarding last year’s election confirmed the persistence of voter suppression and the willingness of too many state officials to continue developing new tactics to keep people from voting.<sup>86</sup>

Section 2 of the VRA—which prohibits discriminatory voting practices nationwide and permits private parties and the Justice Department to challenge those practices in court—remains an important bulwark against discrimination. But Section 2 lawsuits are not a substitute for preclearance. They are far more lengthy and expensive, and often do not yield remedies for impacted voters until after an election (or several) is over.<sup>87</sup> Our case against Texas’s 2011 voter ID law illustrates this point.<sup>88</sup> The law initially did not go into effect because a three-judge

federal court refused to preclear it under Section 5. But that decision was vacated after *Shelby County*, spurring multi-year litigation under Section 2. Despite the fact that every court that has considered the law found it discriminatory (and a federal district court found it intentionally so), the law remained in effect until a temporary remedy was ordered for the November 2016 election. In the interim, Texans voted in 3 federal and 4 statewide elections and numerous local elections under discriminatory rules.

Congress has the power to address these problems, by updating the VRA's coverage formula, examining its coverage, and restoring the VRA to its full power. As this Committee recognizes, any new coverage formula must be supported by a thorough legislative record. We commend the commitment to restoring the VRA reflected in S. 1. VRA restoration is accomplished through separate legislation, the John Lewis Voting Rights Advancement Act, which passed the last Congress as H.R. 4.<sup>89</sup> The bill, which will soon be reintroduced, updates the VRA's coverage formula to restore the act's full force. It will be backed by a thorough legislative record documenting the recent history of voter suppression in U.S. elections. This crucial legislation must become law in order to fortify the right to vote and the integrity of our elections. We urge Congress to make passage of a renewed VRA a top priority.

**C. Nationwide Early Voting (Title I, Subtitle H)**

S. 1 also provides all voters with the flexibility to vote early during the two weeks before Election Day, which will boost turnout and make it easier for hard-working Americans to vote.

Holding elections on a single workday in early November is a relic of the nineteenth century; it was done for the convenience of farmers who had to ride a horse and buggy to the county seat in order to cast a ballot.<sup>90</sup> This no longer works for many Americans, who must find time to cast a ballot between jobs, childcare, and the everyday obligations of modern life. Sometimes, even after making the time and the journey, long lines cause them to turn away.

Early voting works well. Forty-five states and the District of Columbia offered some opportunity to vote in person before Election Day in 2020, which was crucial during the pandemic.<sup>91</sup> More than a dozen of those states offer early voting for a period comparable to or

APPENDIX B**

greater than the two-week period leading to Election Day required by S. 1.<sup>92</sup> It was widely used where available even before the 2020 election. In 2016, 24 million Americans cast their ballot via in-person early voting.<sup>93</sup>

Despite the popularity of early voting, the absence of a national standard means that some states have few or inconsistent early voting hours, and others have been able to engage in politicized cutbacks to early voting.<sup>94</sup> Over the past decade, multiple states have reduced early voting days or sites used disproportionately by Black voters (such as the elimination of early voting on the Sunday before Election Day), and federal courts have struck down early voting cutbacks in North Carolina and Wisconsin because they were intentionally discriminatory.<sup>95</sup> As of February 19, 2021, 15 bills restricting early voting had been introduced in state legislatures during the current legislative session.<sup>96</sup> At least some of these bills would have a racially disparate impact on voters, such as a bill in Georgia that would tightly restrict early voting on Sundays, which have historically been important turnout days for Black Americans.<sup>97</sup>

S. 1 will make voting more manageable by requiring that states provide two weeks of early voting and equitable geographic distribution of early voting sites. A guaranteed early voting period will reduce long lines at the polls<sup>98</sup> and ease the pressure on election officials and poll workers on Election Day, by spreading out the days on which people cast their ballots. For this reason, it was one of the principal recommendations of the bipartisan Presidential Commission of Election Administration for reducing long lines.<sup>99</sup> It will also make it easier for election officials to spot and solve problems like registration errors or voting machine glitches before they impact most voters.<sup>100</sup> For these reasons, election officials report high satisfaction with early voting. The Brennan Center's research indicates that two weeks is an effective minimum time period for generating the benefits of early voting.<sup>101</sup>

Early voting is popular with voters, too, with study after study showing a significant positive effect on voter satisfaction.<sup>102</sup> It is a critical element of a convenient and modern voting system. A national standard is long overdue.

**D. Voting Rights Restoration (Title I, Subtitle E)**

S. 1 would restore federal voting rights to citizens with past criminal convictions living in our communities, strengthening those communities, offering a second chance to those who have paid their debts to society, and removing the stain of a policy born out of Jim Crow.

**Harms of Current Disenfranchisement Laws.** A confusing patchwork of discriminatory disenfranchisement laws causes profound harm across the country. Nationally, state laws deny more than 4.5 million citizens the right to vote because of a criminal conviction<sup>103</sup>—3.2 million of whom are no longer incarcerated and live in our communities, work, pay taxes, and raise families.<sup>104</sup>

Disenfranchisement laws vary dramatically from state to state. In states like Vermont and Maine, there is no disenfranchisement—people currently in prison are allowed to vote. Other states distinguish between different types of felonies, while others treat repeat offenders differently. Jurisdictions also have varying rules on what parts of a sentence must be completed before rights are restored, such as paying off debt or other legal financial obligations.<sup>105</sup> Navigating this patchwork of state laws causes confusion for everyone—including election officials and prospective voters—about who is eligible to vote. The real-world result is large-

---

<sup>102</sup> Kasdan, *Early Voting*, 7–8.

<sup>103</sup> Scholars previously estimated that about 6.1 million citizens were disenfranchised nationwide. See Christopher Uggen et al., *6 Million Lost Voters: State-level Estimates of Felony Disenfranchisement*, The Sentencing Project, 2016. 4. Florida accounted for approximately 1.5 million of these because its constitution permanently disenfranchised everyone convicted of a felony. See Uggen et al., *6 Million Lost Voters*, 4. Since then, in November 2018, Florida voters approved the Voting Restoration Amendment, which restores voting rights to anyone who has completed all terms of their sentence. See FL Const. Art. VI, § 4 (2019). And Kentucky, New Jersey, Iowa, and Virginia have restored rights to various groups of formerly incarcerated people. Michael Wines, “Kentucky Gives Voting Rights to Some 140,000 Former Felons,” *New York Times*, December 12, 2019, <https://www.nytimes.com/2019/12/12/us/kentucky-felons-voting-rights.html>; Vanessa Romo, “New Jersey Governor Signs Bills Restoring Voting Rights to More Than 80,000 People,” *NPR*, December 18, 2019, <https://www.npr.org/2019/12/18/789538148/new-jersey-governor-signs-bills-restoring-voting-rights-to-more-than-80-000-peop>; Katarina Sostaric, “Governor Acts to Restore Voting Rights to Iowans with Felony Convictions,” *NPR*, August 5, 2020, <https://www.npr.org/2020/08/05/899284703/governor-acts-to-restore-voting-rights-to-iowans-with-past-felony-convictions>; and Gregory S. Schneider, “Northam Restores Voting Rights for 69,000 with Felony Convictions,” *Washington Post*, March 16, 2021, [https://www.washingtonpost.com/local/virginia-politics/virginia-voting-felons-northam/2021/03/16/b171271e-868d-11eb-82bc-e58213caa38c\\_story.html](https://www.washingtonpost.com/local/virginia-politics/virginia-voting-felons-northam/2021/03/16/b171271e-868d-11eb-82bc-e58213caa38c_story.html). **BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

scale disenfranchisement not only of ineligible persons, but also of potential voters who are eligible to register but wrongly believe they are barred from doing so by a prior conviction.<sup>106</sup>

Regardless of these particulars, disenfranchisement laws are discriminatory and especially impact Black voters. In 2016, one in 13 voting-age Black citizens could not vote, a disenfranchisement rate more than 4 times that of all other Americans.<sup>107</sup> In three states, the ratio was one in five.<sup>108</sup> This unequal impact is no accident—many states’ criminal disenfranchisement laws are rooted in nineteenth-century attempts to evade the Fifteenth Amendment’s mandate that Black men be given the right to vote.<sup>109</sup>

This disproportionate impact on people of color means that all too often entire communities are shut out of our democracy. Disenfranchisement laws have a negative ripple effect beyond those people within their direct reach. Research suggest that these laws may affect turnout in neighborhoods with high incarceration rates, even among citizens who are eligible to vote.<sup>110</sup> This is not surprising. Children learn civic engagement habits from their parents. Neighbors encourage each other’s political participation. And when a significant portion of a community is disenfranchised, it sends a damaging message to others about the legitimacy of democracy and the respect given to their voices.

**The Promise of Voting Rights Restoration.** S. 1 adopts a simple and fair rule: if you are out of prison and living in the community, you get to vote in federal elections. It also requires states to provide written notice to individuals with criminal convictions when their voting rights are restored.

These changes would have a profoundly positive impact on affected citizens and society. We all benefit from the successful reentry of formerly incarcerated citizens into our communities. Restoring their voting rights sends the message that they are truly welcome to participate and are entitled to the respect, dignity and responsibility of full citizenship. That

APPENDIX B**

message pays concrete dividends. One study found “consistent differences between voters and non-voters in rates of subsequent arrests, incarceration, and self-reported criminal behavior.”<sup>111</sup> For this reason, criminal justice professionals support automatic restoration of voting rights upon release from prison.<sup>112</sup>

Voting rights restoration also benefits the electoral process, by reducing confusion and easing the burdens on elections officials to determine who is eligible to vote. If every citizen living in the community can vote, officials have a bright line rule to apply. This clear rule also eliminates one of the principal bases for erroneous purges of eligible citizens from the voting rolls.<sup>113</sup> In past elections, states have botched attempts to remove Americans with past criminal convictions from the rolls, improperly removing many eligible citizens. For example, in 2016 thousands of Arkansans were purged because of supposed felony convictions—but the lists used were highly inaccurate, and included many who had never committed a felony, or who had had their voting rights restored.<sup>114</sup>

For these reasons, rights restoration is immensely popular among Americans of all political stripes. In November 2018, for example, 65 percent of Florida voters passed a ballot initiative restoring voting rights to 1.4 million of their fellow residents, with massive groundswell of bipartisan support.<sup>115</sup> Unfortunately, the state legislature significantly undercut the will of the people by conditioning rights restoration on the payment of criminal justice fees and fines, a move that was later upheld by a federal court of appeals—demonstrating why congressional action is necessary.

Since Florida’s historic vote, other states have followed. Louisiana, through bipartisan legislation, restored voting rights to nearly 36,000 people convicted of felonies. In December of 2019, newly elected Governor Andy Beshear signed an executive order restoring the vote to some 140,000 Kentuckians. Shortly after, the New Jersey legislature restored voting rights to

80,000 people on parole or probation. Governor Kim Reynolds, Republican of Iowa, recently signed an executive order that restores voting rights to Iowans who have completed their sentences, and has supported a constitutional amendment to codify the process,<sup>116</sup> and Governor Ralph Northam of Virginia recently restored voting rights to an estimated 69,000 people on probation or parole via executive order.<sup>117</sup> The Washington State House recently approved a bill that would automatically restore voting rights to more than 20,000 individuals who are on parole and probation in the state.<sup>118</sup> New York's legislature is poised to codify and improve a 2018 executive action to restore voting rights to New Yorkers on parole by passing S.830B.<sup>119</sup> Overall in the past two decades, 18 states have restored voting rights to segments of the population.<sup>120</sup>

Congress has the authority to act. The Supreme Court has previously upheld congressional expansion of the pool of voters qualified for federal elections when Congress lowered the voting age to 18.<sup>121</sup> Here, there are three sources of congressional power: the Elections Clause of Article I, section 4, the Fourteenth Amendment, and the Fifteenth Amendment. As detailed below, Congress has very broad powers to regulate federal elections under the Elections Clause.<sup>122</sup> Because many state criminal disenfranchisement laws were enacted with a racially discriminatory intent and have a racially discriminatory impact, Congress can also act under its powers to enforce the Fourteenth and Fifteenth Amendments, which guarantee equal protection of the laws and prohibit denial of the right to vote on the basis of race, respectively. The Supreme Court has described this enforcement power as "a broad power indeed," one that gives Congress a "wide berth" to devise appropriate remedial and preventative measures for discriminatory actions.<sup>123</sup>

APPENDIX B**

**E. Voting by Mail (Title I, Subtitle I)**

S. 1 would create a baseline standard for access to mail voting in federal elections. The 2020 election season, which took place during a global pandemic, made clear that Americans need different options for how to vote to accommodate the needs of a diverse electorate. More than 65 million Americans successfully and securely voted by mail,<sup>124</sup> contributing to the surge in participation in the 2020 elections, which reached 66.7 percent of the voting-eligible population (over 159 million people), the highest rate in over a century.<sup>125</sup> Even before the pandemic, mail voting was popular with voters. Roughly one-quarter of American voters cast mail ballots in the 2014, 2016, and 2018 presidential elections.<sup>126</sup> Additionally, mail voting lightens the administrative burden on our in-person voting systems.<sup>127</sup> Election officials and experts also agree that mail voting is highly secure. All mail ballots are marked by hand, which means there is a paper trail to enable effective post-election audits.<sup>128</sup>

This surge in mail voting was enabled by significant expansions of access to mail voting in many states. These reforms included broadening the scope of who could vote by mail; automatically mailing ballot applications or ballots to eligible voters; implementing better processes for voters to receive notice of and cure defective mail ballots; and extending ballot return deadlines, among other critical reforms.<sup>129</sup>

Unfortunately, although the 2020 election demonstrated the value of mail voting, it also exposed the deficiencies and inequities of mail voting systems in many states. First, many of the changes that increased access to mail voting were made through temporary legislation or timebound executive orders that expired after the 2020 general election. Second, even in the face of the pandemic, a number of states continued to place unreasonable restrictions on the ability to vote by mail. For example, five states continued to require voters to provide an excuse for not

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

voting in person. That was down from 17 states the previous election cycle, but only 1 of the states that eliminated excuse requirements passed legislation to do so permanently.<sup>130</sup>

In addition, eight states still required voters to obtain a witness signature or notary to cast a mail ballot. And in 28 states, ballots could still be rejected for technical defects unrelated to voter eligibility, without any notice or opportunity to correct the issue after Election Day.<sup>131</sup> Three closely contested states—Iowa, Ohio, and Texas—also limited the use of secure ballot drop boxes for voters to submit their absentee ballots. Similarly, Pennsylvania tossed thousands of votes from eligible voters who did not place their absentee ballots in a so-called “privacy sleeve” (an extra envelope that encases a ballot within a mailing envelope).<sup>132</sup> Barriers to mail voting had disproportionately negative impact on voters of color.<sup>133</sup> And they would have likely disenfranchised far more people had voter mobilization not been so high.

In the first few months of 2021 alone, at least 125 bills to limit mail voting have been introduced in state legislatures across the country.<sup>134</sup> Fourteen bills in nine states would make the “excuse” requirement for mail voting more stringent for absentee voting or eliminate “no excuse” mail voting.<sup>135</sup> Bills have been introduced across the country that would make it harder to obtain ballots, create barriers to completing mail ballots, and place limits on ballot counting, such as stricter ballot receipt deadlines.<sup>136</sup> As with other recently-introduced voting restrictions, at least some of these new mail voting restrictions would have a racially disparate impact. For instance, the Georgia Senate recently voted to end no-excuse absentee voting for people under 65. While a majority of Georgia voters over the age of 65 who cast mail ballots in 2020 were white, less than half of those younger than 65 who voted by mail that same year were white.<sup>137</sup>

In the face of ongoing efforts to unreasonably limit mail voting options, S. 1 would guarantee all voters reasonable, secure access to this method for casting a ballot. To start, the Act

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

requires states to give every voter the option to vote by mail and specifies that state or local election officials must transmit mail-in ballot applications to all registered voters at least 60 days before Election Day. It also removes key barriers to accessing mail voting by prohibiting notary, witness, and documentary ID requirements and requiring prepaid postage for all election materials, including registration forms and ballot applications. In addition to making it easier to request a mail ballot, the Act simplifies the process of returning ballots by requiring states to provide drop boxes for federal races, as well as by clarifying that all voted mail ballots should be carried free of postage.<sup>138</sup> It does not, it is worth noting, mail a ballot to any voter unless it has been requested.

S. 1 would also require states to provide voters with a way to track their mail ballot and confirm its receipt. The ability to track a ballot is important for election security, as election officials can locate lost ballots. Likewise, it empowers voters to confirm the arrival of their ballot.<sup>139</sup> S. 1 lets states access funds allocated in the Help America Vote Act to develop such a program.

Finally, S. 1 would require states to begin processing and scanning ballots cast by mail and during early voting for tabulation at least 14 days prior to the date of the election, which would help prevent delays in the certification of election results.<sup>140</sup>

**F. Preventing Unreasonable Wait Times at the Polls (Title I, Subtitle N, Part 1)**

S. 1 will require states to make voting more accessible by cutting down on long wait times at the polls.

Far too often, voters arrive at their precincts only to find out that they must wait in unreasonably long lines in order to cast a ballot. In the 2020 primary elections, for example, voters in metropolitan areas across the country—from Atlanta to Philadelphia to Milwaukee—were forced to wait in hours-long lines at the polls.<sup>141</sup> A Brennan Center study of the 2018

---

<sup>138</sup> In states where most or all voters vote by mail, easy access to drop boxes is considered a best practice, as drop boxes are secure and convenient, enabling a speedier ballot delivery than the postal service. In 2016, a majority of voters in Colorado (73 percent), Oregon (59 percent), and Washington (65 percent)—all “vote at home” states—chose to return their ballots to a physical location rather than send them via mail. **BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

midterm elections estimated that 3 million voters waited longer than half an hour to vote (and many waited much longer).<sup>142</sup> The unconscionably (but all-too-familiar) long lines in the 2012 election prompted President Obama to institute a bipartisan commission to develop recommendations to reduce wait times.<sup>143</sup> Long lines are inconvenient for all voters, but they are an especially heavy burden for voters with disabilities, those who may be missing work to vote, and those with caregiving responsibilities. For too many, a long line can mean a lost vote.

Long lines do not affect all equally. A growing body of research shows that they disproportionately plague Black and Latino voters.<sup>144</sup> A Brennan Center study of the 2018 midterm elections found that Black and Latino voters waited on average 45 and 46 percent longer than white voters, respectively.<sup>145</sup> These racial disparities persisted in the 2020 primary elections, in which the longest wait times were seen in jurisdictions with the largest concentrations of nonwhite voters.<sup>146</sup>

Excessive wait times are an avoidable problem. S. 1 sets a legal standard that no individual shall be required to wait longer than 30 minutes to cast a ballot. (This was the standard recommended by the bipartisan Presidential Commission on Election Administration in 2013.) Additionally, it directs states to equitably allocate voting systems, poll workers, and other election resources to ensure fair and equitable wait times for all voters. And it directs the Election Assistance Commission and the comptroller general to study the places that have struggled the most with long lines to ensure that the most effective practices can be put in place.

**G. Prohibiting Deceptive Practices (Title I, Subtitle D)**

S. 1 increases protections against, and remedies for, efforts to use deception or intimidation to prevent people from voting or registering to vote. Unfortunately, attempts to suppress votes through deception and intimidation remain all too widespread. Every election cycle, journalists and non-partisan Election Protection volunteers document attempts at voter

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

deception and intimidation.<sup>147</sup> This is not a new problem, but now social media platforms make the mass dissemination of misleading information easy and allow for perpetrators to target particular audiences with precision. In an analysis for the Brennan Center, for example, University of Wisconsin professor Young Mie Kim documented hundreds of messages on Facebook and Twitter designed to discourage or prevent people from voting in the 2018 election.<sup>148</sup> In 2016, these false statements were extremely prevalent, and not just on the part of domestic actors. Russian operatives also engaged in a concerted disinformation and propaganda campaign over the internet that aimed, in part, to suppress voter turnout, especially among Black voters.<sup>149</sup> These efforts by the Russian government continued, and in many ways became more brazen, in the 2020 election cycle.<sup>150</sup> Congress should increase protections against such efforts.

While federal law already prohibits voter intimidation, fraud, and intentional efforts to deprive others of their right to vote,<sup>151</sup> existing laws have not been strong enough to deter misconduct. Moreover, no law specifically targets deceptive practices, nor is there any authority charged with investigating such practices and providing voters with corrected information.

S. 1 protects voters from deception and intimidation in three ways. First, it increases criminal penalties for false and misleading statements and intimidation aimed at impeding or preventing a person from voting or registering to vote. Second, it empowers citizens to go to court to stop voter deception. Third, it blunts the effect of deceptive information by requiring designated government officials to disseminate accurate, corrective information to voters. These

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

provisions will give federal law enforcement agencies and private citizens the opportunity to stop bad actors from undermining our elections. We encourage Congress to enact them.

### **III. CAMPAIGN FINANCE**

#### **A. Small Donor Public Financing (Title V, Subtitles B and C)**

S. 1 also significantly overhauls federal campaign finance law. The centerpieces of these reforms are a voluntary small-donor matching program for Senate elections (the counterpart to the program for congressional elections passed by the House) and an overhaul of the presidential public financing system, which also includes expanded small donor matching. These changes will give ordinary citizens a louder voice, even in the face of Super PACs and dark money. They are the single best means to counteract the worst effects of the Supreme Court's decision in *Citizens United* and other misguided cases.

Of note, the reform in S. 1 does not impose minute detailed regulations on campaign contributions or spending. It does not seek to end private money in campaigns. Rather, it would boost the most encouraging trend in campaign fundraising, the rise of small donors.

**Big Money Undermines American Democracy.** Thanks to *Citizens United* and related cases, a small class of wealthy donors has gained vast new clout in American politics, an imbalance not seen since the Gilded Age<sup>152</sup> That distorts our democracy and undermines the will of American voters. Super PACs, political committees that can raise and spend unlimited funds, have raised more than \$8 billion to spend on influencing elections.<sup>153</sup> As of 2018, roughly \$1 billion had come from just 11 people.<sup>154</sup> Another \$1.2 billion in campaign ads has come from dark money groups that keep all their donors secret (these groups also give hundreds of millions more to other groups to spend on electoral advocacy).<sup>155</sup> While dark money donors are hidden

from public scrutiny, we know that these groups are often funded by many of the same donors who back super PACs.<sup>156</sup> All of these groups are supposed to operate independently of candidates and parties, but many actually have close ties to elected officials, to the point where they basically function as a campaign arm.<sup>157</sup>

Recent elections saw a surge in giving by small donors (donors who give \$200 or less),<sup>158</sup> but these funds still account for well under a quarter of the total raised and spent on campaigns.<sup>159</sup> Despite record small donor participation in 2018, the top 100 super PAC donors in that cycle gave almost as much as all the millions of small donors combined, as also happened in 2014.<sup>160</sup> The roughly 3,500 donors who contributed at least \$100,000 in 2018 easily outspent all individual small donors, who numbered at least seven million.<sup>161</sup> Even in 2020, which featured

<sup>159</sup> The 2020 elections cost a record \$14 billion, of which only about 22 percent came from individual small donors. Center for Responsive Politics, “2020 Election to Cost \$14 billion, Blowing Away Spending Records,” October 28, 2020, <https://www.opensecrets.org/news/2020/10/cost-of-2020-election-14billion-update/>. That 22 percent figure was nonetheless much higher than for other recent elections, as discussed below.

<sup>160</sup> Center for Responsive Politics, “Super PACs: How Many Donors Give,” accessed March 16, 2021, <https://www.opensecrets.org/outside-spending/donor-stats?cycle=2018&type=B>. The 2018 midterms were also notable for how many wealthy self-funders won office. Center for Responsive Politics, “Most Expensive Midterm Ever: Cost of 2018 Election Surpasses \$5.7 billion,” February 6, 2019, <https://www.opensecrets.org/news/2019/02/cost-of-2018-election-5pt7bil/>.

<sup>161</sup> Ian Vandewalker, “The 2018 Small Donor Boom Was Drowned Out by Big Donors, Thanks to Citizens United,” Brennan Center for Justice, January 10, 2020, <https://www.brennancenter.org/our-work/analysis-opinion/2018-small-donor-boom-was-drowned-out-big-donors-thanks-citizens-united>.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

truly unprecedented voter engagement, small donors accounted for barely 20 percent of total donations.<sup>162</sup>

The dominance of wealthy donors and special interests directly affects policy. Studies have repeatedly shown that campaign donors wield outsized clout – far more than voters<sup>163</sup> – which they often use to pursue objectives most Americans do not share.<sup>164</sup> One recent example was the successful push in 2017 for a \$1.5 trillion corporate tax overhaul, an avowedly donor-driven initiative that was consistently unpopular with the general public.<sup>165</sup>

The dominance of private big money also tilts the political terrain against broadly popular legislation. For example, although almost 80 percent of Americans support raising the minimum wage to make it a living wage, there is far less support for doing so among those who fund campaigns.<sup>166</sup> Paid sick leave for workers is another overwhelmingly popular policy, with more than 85 percent support according to one survey.<sup>167</sup> Political spending helps to explain why the United States is virtually the only developed country not to guarantee this basic protection, with powerful groups repeatedly killing proposals that have come before Congress.<sup>168</sup>

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

The disconnect between elite priorities and those of everyday Americans has profoundly undermined faith in our democracy. Overwhelming majorities across the political spectrum feel that corruption is widespread in the federal government, that people who give large amounts of money to elected officials have more influence than others, that money has too much influence in political campaigns, and that money in politics and wealthy donors are responsible dysfunction in the U.S. political system.<sup>169</sup>

The central focus on large campaign donors also forces candidates to spend an inordinate amount of time fundraising. One party fundraising presentation suggested that new representatives spend four hours a day soliciting large contributions.<sup>170</sup> In 2014—when elections were much cheaper than they are now—Republican leadership told sitting House members they needed to raise as much as \$18,000 per day.<sup>171</sup>

The outsized role of private wealth in our campaigns especially harms communities of color, helping to perpetuate longstanding racial wealth disparities and allowing those who have benefited the most from systemic inequality to translate their affluence into political power. Large donors are overwhelmingly white — white Americans gave 90 percent of reported federal campaign contributions between 1980 and 2012.<sup>172</sup> Major corporate and individual donors have

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**1. Small-Donor Matching for Senate Races (Title V, Subtitle B, Part 2)**

Title V, Subtitle B, Part 2 of S. 1 establishes a small donor matching system for Senate races. Small donor matching is a transformative solution to the challenge posed by big money politics. The basics of this system are simple. Candidates opt into the system by raising enough small start-up donations to qualify and accepting certain conditions such as lower contribution limits. Donors who give to participating candidates in small amounts will then see their contributions matched.<sup>176</sup> The Act matches donations of \$1-\$200 to participating Senate candidates at a six-to-one ratio.

**Small Donor Matching Works.** Public financing has a long and successful history in American elections. It was first proposed more than a century ago by President Theodore Roosevelt.<sup>177</sup> Congress incorporated a one-to-one small donor match for primaries into the presidential public financing system enacted in 1971. The vast majority of major party presidential candidates from 1976 to 2008 used matching funds in their primary campaigns.<sup>178</sup> This was coupled with a grant that paid for the general election campaign of major party candidates.

After Watergate, the public financing system produced presidential campaigns that were far less corrupt and more competitive than before. (In the first five publicly financed presidential elections, challengers defeated incumbents three times.) Thanks to the presidential public financing system, Ronald Reagan was reelected by a landslide in 1984 without holding a single fundraiser.<sup>179</sup> Two years later, the bipartisan Commission on National Elections concluded that: “Public financing of presidential elections has clearly proved its worth in opening up the process, reducing the influence of individuals and groups, and virtually ending corruption in presidential election finance.”<sup>180</sup>

Small donor matching has also found success at the state level, where it has been adopted in a wide variety of jurisdictions—including most recently in New York State.<sup>181</sup> The system

<sup>176</sup> Brennan Center for Justice, “Annotated Guide to the For the People Act of 2021,” last modified March 18, 2021, <https://www.brennancenter.org/our-work/policy-solutions/annotated-guide-people-act-2021>.

<sup>181</sup> See Brennan Center for Justice, “Guide: New York State’s Small Donor Public Financing System,” December 18, 2020, <https://www.brennancenter.org/our-work/research-reports/guide-new-york-states-small-donor-public-financing-system>. A number of other states, including Florida, Michigan, and New Jersey, provide matching funds in governor races. See Juhem Navarro-Rivera and Emmanuel Caicedo, *Public Funding for Electoral Campaigns: How 27 States, Counties, and Municipalities Empower Small Donors and Curb the Power of Big Money in Politics*, Demos, 2017, <https://www.demos.org/research/public-funding-electoral-campaigns-how-27-states-counties-and-municipalities-empower-small>. Comprehensive matching also exists in many other large, diverse municipalities

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

that has been studied the most is New York City's, which has existed since the 1980s and currently matches donations of up to \$175.<sup>182</sup> The vast majority of city candidates participate.<sup>183</sup> Studies of the 2009 and 2013 city elections found that participating candidates took in more than 60 percent of their funds from small donors and the public match.<sup>184</sup>

New York City's system has improved its politics. Most notably, it has increased the diversity of viewpoints influencing officeholders. Small donors far better reflect city residents than big donors in terms of race, income, education level, and where they live, and officeholders who court these campaign contributions spend more time talking to everyday New Yorkers.<sup>185</sup> The comparison to state races, which do not have small donor matching, is remarkable. A Brennan Center study found that participating city candidates raised money from 90 percent of the city's census blocs, as compared to roughly 30 percent for state assembly candidates running

Candidates who did not participate in the public financing system raised most of their money from donors of \$1,000 or more. Michael J. Malbin, Peter W. Brusoc, and Brendan Glavin, *What Is and What Could Be: The Potential Impact of Small-Donor Matching Funds in New York State Elections*, Campaign Finance Institute, 2013, 3, [http://www.cfinst.org/pdf/state/NY/CFI\\_Impact-Matching-on-NYS.pdf](http://www.cfinst.org/pdf/state/NY/CFI_Impact-Matching-on-NYS.pdf).

<sup>185</sup> As New York State Senator (and former City Council Member) Jose Serrano explained: "Imagine if you could spend a little less time [making fundraising calls], and a little more time in someone's living room, listening to conversations that they have, hearing the ideas that they may have. You can become a much more engaged and responsive candidate and hopefully elected official." DeNora Getachew and Ava Mehta, *Breaking Down Barriers: The Faces of Small Donor Public Financing*, Brennan Center for Justice, 2016, 29, [https://www.brennancenter.org/sites/default/files/publications/Faces\\_of\\_Public\\_Financing.pdf](https://www.brennancenter.org/sites/default/files/publications/Faces_of_Public_Financing.pdf). Councilmember Eric Ulrich, a Queens Republican, makes a similar point: "[T]he matching funds program has allowed for the voice of small donors and regular people to have a greater say in outcomes . . . That has helped us transform how we serve our constituents. I have no choice but to listen to and engage the [constituents] in an overall discussion about what direction the city should go." Getachew and Mehta, *Breaking Down Barriers*, 34.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

in the same areas.<sup>186</sup> A similar analysis of the 2017 city elections found that participating candidates raised a nine times greater share of their money from small donors than did non-participating candidates, and a 12 times greater share from small donor constituents.<sup>187</sup> The city's system has also helped a more diverse array of candidates run, including the city's first Black mayor and New York State's first female and first Black elected attorney general, who began her career on the city council.<sup>188</sup> Candidates in other jurisdictions with small donor public financing systems report similar benefits.<sup>189</sup>

S. 1's small donor matching provisions would allow all candidates to power their campaign with small donations from ordinary Americans. Recent Brennan Center studies of congressional fundraising found that almost all congressional candidates would be able to raise as much or more as they do under the current system, and that the greatest benefits would go to female candidates of color.<sup>190</sup> Based on our experience and past research, we would anticipate a similar result for Senate candidates.

Campaign funds from citizens are a vital counterweight to the often polarizing influence of big money and secretive donors.<sup>191</sup> Incumbents know well that today it is often the biggest donors, who can threaten a sudden spending spree in a primary, who exercise the most significant pull to the extremes. Indeed, research shows that states with higher individual

Malbin, Sundeep Iyer, and Brendan Glavin, *Donor Diversity Through Public Matching Funds*, Brennan Center for Justice and Campaign Finance Institute, 2012, 4, [www.brennancenter.org/sites/default/files/legacy/publications/DonorDiversityReport\\_WEB.PDF](http://www.brennancenter.org/sites/default/files/legacy/publications/DonorDiversityReport_WEB.PDF).

<sup>187</sup> Nirali Vyas, Chisun Lee, and Joanna Zdanys, *The Constituent-Engagement Effect of Small Donor Public Financing*, Brennan Center for Justice, 2019, 7, [https://www.brennancenter.org/sites/default/files/2019-09/Report\\_Constituent-Engagement%20Effect\\_.pdf](https://www.brennancenter.org/sites/default/files/2019-09/Report_Constituent-Engagement%20Effect_.pdf).

<sup>188</sup> As New York State Attorney General Letitia James put it: "I wouldn't be where I am today if not for public financing... The public financing system in New York City gave me the opportunity to compete and succeed, allowing me to represent individuals whose voices have been historically ignored and who wanted a representative who looked like them, who understood their values, and recognized their struggles." Brennan Center for Justice, "Faces of Small Donor Public Financing 2021," March 11, 2021, <https://www.brennancenter.org/our-work/research-reports/faces-small-donor-public-financing-2021>.

<sup>189</sup> Montgomery County Councilmember Evan Glass noted "The public financing system encourages small intimate gatherings, and it is so refreshing to have one-on-one time with a voter rather than trying to raise money in a back room or a boardroom. It's a better way to campaign and it's a better way to govern. ... In order to successfully participate in public financing, you need solid roots in the community because that's the only way you're going to tap into the large network that you need to be successful." Arizona State Senator Victoria Steele reflected "As a Native American woman—I am Seneca and Mingo—public financing gave me an advantage. It's really hard for anybody to raise money to run for office, but women are generally more disadvantaged in raising money for races. A lot of us are not at the table where the big money is." Brennan Center for Justice, "Faces of Public Financing."

<sup>190</sup> Ian Vandewalker and Kevin Morris, "The Reform Law Needed to Counter Citizens United: H.R. 1," Brennan Center for Justice, January 21, 2020, <https://www.brennancenter.org/our-work/analysis-opinion/reform-law-needed-counter-citizens-united-hr-1>; Nirali Vyas et al., *Public Financing Could Advance Race and Gender Equity*.

Although there is currently a dearth of public research, it likely that most Senate candidates would also fare as well or better under the act's small donor matching system as they do now.

<sup>191</sup> Ian Vandewalker, "How to Change Incentives for both Politicians and Donors," Brennan Center for Justice, February 4, 2021, <https://www.brennancenter.org/our-work/analysis-opinion/how-change-incentives-both-politicians-and-donors>.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

contribution limits have more ideologically extreme legislators.<sup>192</sup> By contrast, many federal lawmakers who raise the most funds from small dollar contributions tend to be moderates, and success at raising campaign funds from small donors is due to factors such as prominence in the news cycle and the competitiveness of a race.<sup>193</sup>

**Conserving Taxpayer Funds.** It is important to note that all of these changes will be accomplished at no cost to taxpayers. The public match will instead be funded by a small surcharge on criminal and civil penalties against corporate wrongdoers, with an explicit bar on the use of taxpayer funds.<sup>194</sup>

Ultimately, political campaigns cost money, which must come from somewhere. Whether the source is a handful of wealthy special-interest donors or millions of everyday Americans is up to Congress.<sup>195</sup> Small donor matching stands on firm constitutional ground.<sup>196</sup> No reform has the potential to be more transformative. The time to pass this system is now.

## 2. Presidential Public Financing (Title V, Subtitle C)

S. 1 also revamps the presidential public financing system, which currently provides matching funds to primary candidates and block grants to general election nominees. Despite its success, that system ultimately failed because it did not afford candidates sufficient funds to compete in light of the dramatic growth in campaign costs.<sup>197</sup> The Act addresses this problem by increasing the primary match to a six-to-one ratio, providing matching funds to party nominees in the general election, and repealing burdensome limits on how much participating candidates can spend. The Brennan Center supports all of these changes.

<sup>195</sup> As one political scientist put it: “There are no free lunches. If the public doesn’t foot the cost of political campaigns, wealthy donors and lobbyists will. And they will get something in return. And it will be far more than what they paid in. That’s how the system works. If we enact public financing through a small-donor matching system, the public will also get something in return. And it will be far more than what they paid in. That’s how the system works.” Lee Drutman, “Democrats’ Small-Donor Campaign Finance Proposal Is a Great Deal for Taxpayers,” *Vox*, January 14, 2019, <https://www.vox.com/polyarchy/2019/1/14/18182579/democrats-hr1-donor-campaign-finance-proposal-taxpayers>.

<sup>196</sup> As the Supreme Court observed in upholding the presidential system: “Public financing is an effort not to abridge, restrict, or censor speech, but rather to use public money to facilitate and enlarge public discussion and participation in the electoral process, goals vital to a self-governing people. Thus, [it] furthers, not abridges, pertinent constitutional values.” *Buckley v. Valeo*, 424 U.S. 1, 92–93 (1976).

<sup>197</sup> Skaggs and Wertheimer, *Empowering Small Donors*, 11.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**B. Improving Federal Disclosure Law (Title IV, Subtitles B and C)**

S. 1 also updates federal campaign disclosure rules, including by closing the main loopholes in federal disclosure law that have given rise to dark money and extending basic transparency requirements to online political ads.

**The Rise of Dark Money.** Over the last decade, secret money has become one of the biggest challenges for the campaign finance system. As recently as 2006, almost all federal campaign spending was transparent. But *Citizens United* made it possible for new types of entities to spend limitless funds on electoral advocacy—including 501(c)(4) and (c)(6) nonprofit corporations that are not required to make their sources of funding public.<sup>198</sup> These dark money groups have spent about \$1.2 billion on federal elections since 2010.<sup>199</sup> They have given millions more to super PACs, in a manner that allows those entities (which in theory must disclose their donors) to keep major underlying funders anonymous.<sup>200</sup> In total, only about 26 percent of outside spending in the 2020 election was fully disclosed.<sup>201</sup> Secret spending tends to be concentrated in the closest races. One Brennan Center study of the 2014 midterms, for instance, showed that more than 90 percent of dark money spending in Senate contests was concentrated in the eleven most competitive contests.<sup>202</sup>

Dark money deprives voters of critical information needed to make informed decisions.<sup>203</sup> Citizens are entitled to know who is trying influence their votes and what those spenders want from the government. It is donor disclosure, as the *Citizens United* Court itself pointed out, that allows voters to determine whether elected leaders “are in the pocket of so-called ‘moneyed interests.’”<sup>204</sup> Dark money also harms shareholders in many publicly-traded companies, which frequently use dark money groups as conduits for political spending.<sup>205</sup> Research shows that the corporate managers who drive this giving sometimes do so for their own

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

reasons, and not to maximize shareholder value.<sup>206</sup> Shareholders need transparency so they can monitor how their money is being spent.<sup>207</sup>

**The Threat of Foreign Interference.** More recently, it has come to light that gaps in disclosure rules provide multiple avenues for foreign governments and other entities to manipulate the U.S. electorate. As President Biden wrote in 2018, “The lack of transparency in our campaign finance system combined with extensive foreign money laundering creates a significant vulnerability for our democracy.”<sup>208</sup>

Foreign-backed disinformation and election interference campaigns have been a feature of the last three election cycles.<sup>209</sup> The problem goes well beyond traditional dark money spending. During the 2020 Democratic primary, Russian state media and government-backed social media trolls impersonated candidates, promoted division, and spread false allegations of voter fraud and election rigging.<sup>210</sup> In 2016, Kremlin operatives also took advantage of weak disclosure rules for paid Internet ads, whose prevalence in U.S. political campaigns increased almost eight-fold between 2012 and 2016.<sup>211</sup>

Online ads are cheap to produce and disseminate instantly to vast potential audiences across great distances without regard for political boundaries.<sup>212</sup> Moreover, sophisticated micro-targeting tools have given rise to the “dark ad,” which is seen only by a narrow audience,

threatening to remove much of the political debate around elections from public view.<sup>213</sup> Russian operatives exploited these capabilities to purchase millions of targeted ads in an attempt to influence and foment discord around the 2016 election.<sup>214</sup> Moscow's efforts in 2016 served as a blueprint for its own future campaigns and those of other hostile actors.<sup>215</sup>

**Common Sense Reforms.** S. 1 takes several key steps to deal with these problems. It closes legal loopholes that have allowed dark money groups to refrain from disclosing their donors.<sup>216</sup> It also expands disclosure and disclaimer requirements for “electioneering communications”<sup>217</sup>—campaign ads that mention a candidate during the time leading up to an election—to include paid Internet or digital communications. And it requires the largest online platforms, with over 50 million unique visitors per month, to establish a public file of requests to purchase political ads akin to the file broadcasters have long been required to maintain.<sup>218</sup> These changes will make U.S. campaigns significantly more transparent.<sup>219</sup>

<sup>213</sup> Christopher S. Elmendorf, Ann Ravel and Abby Wood, “Open Up the Black Box of Political Advertising,” *San Francisco Chronicle*, September 23, 2017, <http://www.sfgate.com/opinion/openforum/article/Open-up-the-black-box-of-political-advertising-12221372.php>. Some platforms, such as Google, have elected to limit the targeting of political ads, but such steps are voluntary and could be reversed at any time. Daisuke Wakabayashi and Shane Goldmacher, “Google Policy Change Upends Online Plans for 2020 Campaigns,” *New York Times*, November 20, 2019, <https://www.nytimes.com/2019/11/20/technology/google-political-ads-targeting.html>.

<sup>214</sup> For a more complete discussion of Russia’s use of Internet ads in 2016, see Ian Vandewalker, *Oversight of Federal Political Advertisement Laws and Regulations: Statement before the Committee on House Oversight and Government Reform, Subcommittee on Information Technology*, Brennan Center for Justice, October 24, 2017, <https://www.brennancenter.org/analysis/oversight-federal-political-advertisement-laws-and-regulations>; see also Brennan Center for Justice, *The Mueller Report Exposed Weaknesses*.

<sup>215</sup> Mark Scott, “Russia Is Back, Wilier Than Ever—And It’s Not Alone,” *Politico*, September 14, 2020, <https://www.politico.com/news/2020/09/14/russia-cyberattacks-election-413757>. As recently publicized by the National Intelligence Council, Putin and a range of Russian government organizations conducted continued influence organizations aimed at denigrating President Biden’s campaign and the Democratic Party in 2020, as well as seeking to undermine public confidence in the election, while the Iranian government sought to undercut former President Trump and sow societal divisions. National Intelligence Council, *Foreign Threats*, i.

<sup>216</sup> The Act amends statutory text that had been interpreted to require dark money groups to disclose only those donors who earmark their contributions to pay for a specific ad, which virtually never happens. It also prevents donors from funneling contributions through front groups to hide their true origin.

<sup>217</sup> 52 U.S.C. § 30104(f)(3).

<sup>218</sup> 47 C.F.R. 73.3526(e)(6), 73.3527(e)(5).

<sup>219</sup> Critics have suggested that these provisions will chill Americans’ freedom of speech and association. John York, “The ‘For the People Act’ Demonstrates the Flaws of Progressive Campaign Finance Reform,” Heritage Foundation, December 4, 2020, <https://www.heritage.org/progressivism/report/the-the-people-act-demonstrates-the-flaws-progressive-campaign-finance-reform>. But there is little basis for these charges. Disclosure requirements “impose no ceiling on campaign-related activities and do not prevent anyone from speaking.” *Citizens United*, 558 U.S. at 366 (internal quotation marks and citations omitted). Moreover, the vast majority of new transparency rules would apply to the wealthy corporations and individuals who give to dark money groups; there is no evidence that large numbers of ordinary Americans will be impacted. See Derek Willis, “Shedding Some Light on Dark Money Political Donors,” *ProPublica*, September 12, 2018, <https://www.propublica.org/nerds/shedding-some-light-on-dark-money-political-donors>. The Act does require relatively modest purchases of paid Internet ads to be included in platforms’ public files, which is necessary because such ads can have a wide impact at relatively low cost. Russia’s 2016 ads reached tens of millions of people, at a cost of roughly \$400,000. Ian Vandewalker and Lawrence Norden, *Getting Foreign Funds Out of America’s Elections*, Brennan Center for Justice, 2018, 7.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Disclosure continues to stand on firm constitutional ground, with the Supreme Court repeatedly affirming that robust transparency is a permissible—and often preferred—means to prevent “abuse of the campaign finance system.”<sup>220</sup> And transparency remains overwhelmingly popular with the general public.<sup>221</sup> These are valuable reforms that, like small donor public financing, will help blunt the worst effects of *Citizens United*. Congress should pass them without delay.

**C. FEC Overhaul (Title VI, Subtitle A)**

S. 1 also overhauls the dysfunctional Federal Election Commission, which has failed to meaningfully enforce existing rules and would almost certainly struggle to implement the other ambitious campaign finance reforms in the Act.

**A Deadlocked and Dysfunctional Commission.** The FEC’s mission is to interpret and enforce federal campaign finance laws.<sup>222</sup> Its structure, which dates back to the 1970s, was designed to prevent the agency from taking any decisive action without bipartisan agreement among its commissioners. No more than three of its six members can be affiliated with any one party at the time they are nominated, and at least four votes are required to enact regulations, issue guidance, or even investigate alleged violations of the law.<sup>223</sup> By longstanding tradition (though not pursuant to any legal requirement), each of the two major parties takes half the FEC’s seats.<sup>224</sup> For much of 2019 and 2020, the Commission did not even have a quorum of commissioners, because only 3 of its 6 seats were occupied.<sup>225</sup>

The FEC’s design dates back to a time when disagreements over the government’s role in regulating money in politics did not necessarily overlap with party affiliation. Today, while ordinary Americans of all political stripes still overwhelmingly support strong campaign finance laws, party elites are sharply divided, which has left the Commission gridlocked.<sup>226</sup> Even when it has a quorum, the Commission routinely deadlocks on whether to pursue significant campaign

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

finance violations—often after sitting on allegations for years without even investigating them.<sup>227</sup> Its process for issuing new regulations has virtually ground to a halt.<sup>228</sup> Increasingly, commissioners cannot even agree on how to answer requests for interim guidance they receive through the Commission’s advisory opinion process, leaving candidates, parties, and others to decipher the law for themselves.<sup>229</sup>

The Commission is also beset with management problems. It has not had a permanent general counsel (its chief legal officer and one of the two most important staff members) since 2013.<sup>230</sup> Morale among its rank-and-file staff consistently ranks nears the bottom of the federal government.<sup>231</sup>

FEC dysfunction has exacerbated many problems with our campaign finance system, including dark money,<sup>232</sup> rampant coordination between candidates and supposedly independent

---

<sup>227</sup> See Office of FEC Commissioner Ann M. Ravel, *Dysfunction and Deadlock: The Enforcement Crisis at the Federal Election Commission Reveals the Unlikelihood of Draining the Swamp*, 2017, 2, 4, <https://shpr.legislature.ca.gov/sites/shpr.legislature.ca.gov/files/Ravel%20-%20FEC%20Dysfunction.pdf>. In one notorious case, in which a donor admitted that he had formed an LLC solely for the purpose of hiding a \$1 million contribution to a super PAC, the Commission delayed more than four years before deadlocking on whether to proceed, notwithstanding that all six commissioners appear to have agreed that the donor broke the law. See Certification (February 23, 2016), MUR 6485 (W Spann LLC et al.), <https://www.fec.gov/files/legal/murs/6485/16044390516.pdf>; Statement of Reasons, Commissioners Walther, Ravel & Weintraub, MUR 6485 (W Spann LLC et al.), <https://www.fec.gov/files/legal/murs/6485/16044391123.pdf>; and Statement of Reasons, Commissioners Petersen, Hunter & Lee, MUR 6485 (W Spann LLC et al.), <http://eqs.fec.gov/eqsdocs/MUR/16044393039.pdf>.

<sup>228</sup> Among other things, the Commission has repeatedly deadlocked on proposals for a comprehensive rulemaking to address the effects of *Citizens United*. **BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

outside groups,<sup>233</sup> and vulnerability to foreign interference in our campaigns.<sup>234</sup> As a bipartisan group of lawmakers wrote in 2018, a dysfunctional FEC “hurts honest candidates who are trying to follow the letter of the law and robs the American people of an electoral process with integrity.”<sup>235</sup> If not addressed, the Commission’s problems could stymie implementation of the other ambitious reforms in the Act. Moreover, the agency’s inability to enforce campaign finance laws contributes to a broader culture of impunity at a time of eroding respect for the rule of law and democratic values more generally.<sup>236</sup>

**A Necessary Overhaul.** S. 1 addresses the FEC’s main flaws through several targeted changes. It curtails gridlock by reducing the number of commissioners from six to five, with no more than two affiliated with any party (effectively requiring one commissioner to be an independent). It creates clear lines of accountability for management issues by allowing the president to name a real chair to serve as the FEC’s chief administrative officer, with responsibility for the agency’s day-to-day management.<sup>237</sup> It helps ensure that commissioners will have the right temperament and qualifications by establishing a bipartisan blue ribbon advisory commission to publicly vet potential nominees. It ensures that the Commission will periodically have fresh leadership by ending the practice of allowing commissioners to hold over in office indefinitely past the expiration of their terms (which has likely contributed to the agency’s loss of quorum in recent years).<sup>238</sup> And it helps streamline the enforcement process by giving the Commission’s nonpartisan staff authority to investigate alleged campaign finance

<sup>236</sup> Preet Bharara, Christine Todd Whitman, et al., *Proposals for Reform*, National Task Force on Rule of Law & Democracy, 2018, 16, [https://www.brennancenter.org/sites/default/files/publications/TaskForceReport\\_2018\\_09\\_.pdf](https://www.brennancenter.org/sites/default/files/publications/TaskForceReport_2018_09_.pdf).

<sup>237</sup> Currently the office rotates annually and is largely symbolic. See 52 U.S.C. § 30106(a)(5).

<sup>238</sup> Before 1997, commissioners could be re-appointed to new terms an unlimited number of times. Congress eliminated reappointment with the goal of ensuring that the agency would periodically have fresh leadership, and to reinforce commissioners’ independence in the face of congressional attempts to use the reappointment process as leverage to deter enforcement. Exec. Office Appropriations Act of 1998, 105 Pub. L. No. 61, 111 Stat. 1272 (October 10, 1997). But allowing indefinite holdovers has created the worst of both worlds. There is still very little turnover, and commissioners whose terms have expired are even more beholden to the president and Congress, who can theoretically replace them at any time. Weiner, *Fixing the FEC*, 7. At the start of President Trump’s tenure, four of the commissioners had been in office since the George W. Bush administration, notwithstanding that they are theoretically limited to one six-year term. Federal Election Commission “All Commissioners,” accessed March 3, 2021, <https://www.fec.gov/about/leadership-and-structure/commissioners/>. The departures of two of these commissioners following other resignations caused the Commission to be without a quorum for most of the period between September 2019 and December 2020. Daniel I. Weiner, “FEC Dormant Heading into 2020 Election,” Brennan Center for Justice, July 29, 2020, <https://www.brennancenter.org/our-work/analysis-opinion/fec-dormant-heading-2020-election>; and Naylor, “Federal Election Commission Can Finally Meet Again.”

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

violations and dismiss frivolous complaints—subject to overrule by a majority vote of commissioners.<sup>239</sup>

These changes are similar to those in a bipartisan bill that has been introduced in the last three Congresses.<sup>240</sup> They would bring the FEC’s structure more in line with other independent agencies, but with significantly greater safeguards to prevent either party from weaponizing the agency against its opponents. For instance, S. 1 seeks to ensure partisan balance on the new FEC by providing that nominees to seats on the commission are considered affiliated with a party if they have had any connection to the party—including as a registered voter, employee, consultant, or attorney—within the previous five years. That will minimize the risk of the Senate confirming someone who has disguised their true partisan leanings.<sup>241</sup> It also creates a new, bipartisan vetting process for nominees. And it provides for more robust judicial oversight of the enforcement process. Ending the ability of commissioners to remain indefinitely past the expiration of their terms will also be a safeguard against excessive partisanship, since holdover commissioners are more subject to pressure from the president and Congress, who have the power to replace them at any time.<sup>242</sup>

These measures provide significantly more formal protection than exists under current law. They are part of an overall package of sensible reforms that would help ensure that the campaign finance laws we have on the books will be fairly and effectively enforced.

---

<sup>239</sup> Under the Commission’s present structure, even those wrongfully accused of violations must sometimes wait years for their names to be cleared. See, e.g., Notification with Factual and Legal Analysis, MUR 6896 (Margie Wakefield for Kansas), <https://www.fec.gov/files/legal/murs/6896/15044385209.pdf>; and Notification with General Counsel’s Report, MUR 6904 (Cat Ping for Congress), <https://www.fec.gov/files/legal/murs/6904/16044396706.pdf>.

<sup>240</sup> To amend the Federal Election Campaign Act of 1971 to reduce the number of members of the Federal Election Commission from 6 to 5, to revise the method of selection and terms of service of members of the Commission, to distribute the powers of the Commission between the Chair and the remaining members, and for other purposes. H.R. 1414, 117th Cong. (2021); Restoring Integrity to America’s Election Act, H.R. 1272, 116th Cong. (2019); and Restoring Integrity to America’s Election Act, H.R. 2034, 115th Cong. (2017).

<sup>241</sup> See Daniel Weiner, “FEC’s Status Quo is Hazardous—Proposed Legislation Would Help Fix It,” *The Hill*, February 10, 2019, <https://thehill.com/opinion/campaign/429294-fecs-status-quo-is-hazardous-proposed-legislation-would-help-fix-it>.

<sup>242</sup> Weiner, *Fixing the FEC*, 7. Thus, charges from critics that S. 1 would effectuate a partisan takeover of the FEC are completely unfounded. See, e.g., Heritage Foundation, “The Facts about H.R. 1: The ‘For the People Act of 2021,’” February 21, 2021, <https://www.heritage.org/election-integrity/report/the-facts-about-hr-1-the-the-people-act-2021>. As a legal matter, the president already has constitutional authority to nominate whomever they want to serve on the FEC, provided no more than three of the nominees are affiliated with one party at the time they are nominated. *Buckley*, 424 U.S. at 140. The tradition of deferring to party leaders has no force of law. By providing for public bipartisan vetting of nominees, S. 1 actually establishes stronger safeguards than currently exist. Weiner, “FEC’s Status Quo.” The charge by some critics that a presidentially appointed FEC chair would be tantamount to an “election czar,” with vast power to persecute the president’s opponents, is similarly baseless. See, e.g., Eric Wang, “Analysis of H.R. 1 (Part One),” Institute for Free Speech, February 22, 2021, <https://www.ifs.org/expert-analysis/analysis-hr1-2021-disclose-honest-ads-disclaimers/>. The role of chair envisioned by the Act is identical to that which exists at many other independent agencies, except without a working majority of commissioners from the chair’s own party.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

**D. Reforming Coordination Rules (Title V, Subtitle B)**

S. 1 also tightens restrictions on coordination between candidates and outside groups like super PACs that can raise unlimited funds, another important reform.

The Supreme Court has long held that outside campaign expenditures coordinated with a candidate can be “treated as contributions,” because “[t]he ultimate effect is the same as if the [spender] had contributed the dollar amount [of the expenditure] to the candidate.”<sup>243</sup> *Citizens United* did nothing to change that. When the Supreme Court struck down limits on how much outside groups could spend in federal elections, it did so on the assumption that these groups would operate independently of candidates. The Court reasoned that the absence of “prearrangement and coordination” would “undermine[] the value of the expenditure to the candidate” and alleviate the danger of quid pro quo corruption or its appearance.<sup>244</sup>

Whether or not that was a correct assumption,<sup>245</sup> in reality, the independence of much outside spending is illusory. In 2016, most presidential candidates had personal super PACs run by top aides or other close associates, whose only purpose was to get the candidate elected and for which the candidate often personally raised funds or even appeared in ads.<sup>246</sup> The trend continued in the 2020 election.<sup>247</sup> These entities are also becoming increasingly common in Senate and House races, as well.<sup>248</sup> Other forms of collaboration are also on the rise, such as the practice of super PACs and other outside groups republishing flattering b-roll footage that campaigns make available online, sharing vendors or staffers with campaigns, and coordinating

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

advertisements or fundraising.<sup>249</sup> Even blatant instances of cooperation, like super PAC ads in which a candidate appears, have been excluded from the definition of “coordinated communication” and thus deemed not to count as contributions under federal rules.<sup>250</sup> These developments make it easy to circumvent contribution limits, especially for the class of billionaire mega-donors who have gained unprecedented influence in our elections.

S. 1 shores up federal coordination rules in important respects. It specifies that if a candidate and any outside group or individual collaborate on a communication that promotes, attacks, supports, or opposes that candidate (the so-called PASO standard), the communication will be deemed a contribution. It also clarifies that any reproduction of campaign footage or materials also constitutes a contribution. And it creates a new category of “coordinated spenders,” groups whose actual ties to a candidate are so close that it is simply not plausible to think that the group’s spending in support of the candidate is truly independent.

These changes are plainly constitutional, and in line with regulatory trends in the states.<sup>251</sup> They are necessary to restore the integrity of campaign contribution limits and we strongly support their passage.

**IV. REDISTRICTING REFORM**

S. 1 packages together a powerful set of reforms that collectively would be the biggest attack on gerrymandering in the country’s history.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Key among S. 1’s reforms is a prohibition on extreme partisan gerrymandering in congressional redistricting, which has reached levels unseen in the last 50 years.<sup>252</sup> Any map that has the intent or effect of unduly favoring or disfavoring a political party on a statewide basis would be required to be redrawn. To help courts measure effect, the Act sets out an easy-to-apply two-part statistical test that will let courts quickly block maps that are skewed in favor of one party or the other. S. 1 would also standardize rules for drawing congressional districts, strengthen existing protections for communities of color, and require preserving, where possible, towns, neighborhoods, and other communities of interest, where people have shared identities or interests.<sup>253</sup> It also adds enhanced judicial remedies to ensure that discriminatory maps can quickly be challenged in court and fixed and would open the process to public oversight and participation. Finally, it would transfer congressional map drawing authority to independent commissions, starting in 2021 if there is enough time.

The need for reform is urgent. As Brennan Center research has shown, this decade’s skewed maps have consistently given one party (Republicans) 15-17 extra congressional seats over the course of the whole decade.<sup>254</sup> Shifts in political winds have virtually no electoral impact in the most heavily gerrymandered states. For example, in 2018—a political tsunami year for Democrats—no districts changed parties in Ohio and North Carolina, two states with extremely biased maps. Despite the fact that Democrats earned nearly half the vote in both states, they won only a quarter of the seats. The overwhelming majority of the seats that did change parties in 2018—72 percent—were drawn by commissions and courts instead of partisan legislatures.<sup>255</sup>

To be clear, Republicans are not alone in rigging districts to their advantage. A Democratic gerrymander in Maryland was proven to be just as unbreakable in the Republican wave of 2014.<sup>256</sup> Redistricting abuse is a bipartisan problem—both parties will draw districts that serve their partisan ends if given the opportunity.

Too often, communities of color bear the brunt of these efforts. When Republican-drawn maps in Virginia, North Carolina, and Texas were successfully challenged on the grounds that they discriminated against minority voters, Republicans defended the maps by arguing that politics, rather than race, had been the driving force behind their maps. Likewise, Democrats in Maryland rejected a congressional map that would have given Black voters additional electoral

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

opportunities because that would have created an additional Republican seat.<sup>257</sup> Without a rule that makes disadvantaging minority voters for partisan gain illegal, this type of discrimination will persist and grow, particularly as the U.S. population continues to become more racially and ethnically diverse.

Congressional action is necessary to stop partisan gerrymandering and discriminatory line drawing. If not reined in, the problem will only get worse during future cycles. New map drawing tools and ever more powerful data and analytics about voters enable modern line drawers to lock in a durable partisan advantage with shocking accuracy.

The courts alone will not and cannot solve the problem. In 2019, the Supreme Court's opinion in *Rucho v. Common Cause* held that although partisan gerrymandering is harmful and anti-democratic, it is a political issue that federal courts lack the authority to address.<sup>258</sup> When considered alongside the 2013 elimination of Section 5 preclearance requirements for maps drawn by states with a history of racial discrimination in *Shelby County v. Holder*, this means that the legal landscape for challenging unfair maps will become more ominous starting with the current redistricting cycle.<sup>259</sup> And even when voters have succeeded in court, they have had to resort to expensive, time-consuming, and complicated litigation in order to obtain a remedy years later. The burden that this places on communities that are the most affected by gerrymandering is unacceptable.

Congress has the authority to fix congressional redistricting.<sup>260</sup> As the Supreme Court has recognized, “the Framers provided a remedy” in the Constitution for redistricting abuses through the “power bestowed on Congress to regulate elections, and . . . to restrain the practice of political gerrymandering.”<sup>261</sup> Over the years, Congress has repeatedly exercised its power under article I, section 4 to do just that.<sup>262</sup>

These reforms are also popular among voters. In 2018, a record-high number of states passed redistricting reform for congressional and/or legislative districts. In Ohio, one proposal

<sup>260</sup> *Arizona v. Inter Tribal Council of Arizona, Inc.*, 570 U.S. 1 (2013).

<sup>261</sup> Vieth v. Jubelirer, 541 U.S. 267 (2004).

<sup>262</sup> 55 Stat. 761 (1941), 2 U.S.C. §2a (Supp. 1950); 54 Stat. 162 (1940); 46 Stat. 21 (1929); 37 Stat. 13 (1911); 31 Stat. 733 (1901); 26 Stat. 735 (1891); 22 Stat. 5 (1882); 17 Stat. 28 (1872); 12 Stat. 353 (1862); 10 Stat. 25 (1852); 9 Stat. 432 (1850); 5 Stat. 491 (1842); 4 Stat. 516 (1832); 3 Stat. 651 (1822); 2 Stat. 669 (1811); 2 Stat. 128 (1802); 1 Stat. 253 (1792). In 1967, for example, Congress required all states to use single member congressional districts to end the drawing of racially discriminatory multimember districts, a practice adopted to defy the call of the Voting Rights Act. See 2 U.S.C. § 2c.

**BRENNAN CENTER FOR JUSTICE**  
**APPENDIX B**

carried every single congressional district in the state by a supermajority.<sup>263</sup> Reforms in Colorado and Michigan also passed overwhelmingly, with more than 60 percent of the vote statewide.<sup>264</sup>

S. 1 builds on what has been proven to work. Commissions would contain equal numbers of Republican, Democratic, and unaffiliated and third-party commissioners, with voting rules that ensure that no one group would be able to dominate or hijack the redistricting process. Additionally, all potential commissioners would be subject to a thorough vetting process to ensure that they have the requisite qualifications and community knowledge and are free from conflicts of interest. The experience of states like California and Arizona shows that reforms work. California went from having a congressional map that was one of the least responsive to shifts in voter opinion to one of the most.<sup>265</sup> And California's maps did not just improve political fairness—they also kept communities of interest together, increased representation for communities of color, and expanded opportunities for competition.<sup>266</sup> Indeed, nearly a quarter of the congressional seats picked up by Republicans in the 2020 election were commission-drawn seats in California. In short, fair maps aren't just good for Democrats, they are good for Republicans—and good for democracy.

S. 1's establishment of a clear set of map drawing rules, listed in the order in which they are to be applied, is another important and ground-breaking change.<sup>267</sup> Federal law currently has next to no rules governing how districts are to be drawn.<sup>268</sup> Likewise, most states (with a handful of exceptions) have few laws governing congressional redistricting. This has allowed abuses to run rampant. Left unchanged, this is a situation that will only get worse in coming years. The Act's ban on partisan gerrymandering and enhanced protections for communities of color and communities of interest directly address the most egregious abuses of the past decade, like the intentional dilution of political power of communities of color mentioned earlier.

Finally, S. 1 transforms what has historically been an opaque process into one that is transparent and participatory. The business of map drawing would be conducted in open public meetings and subject to oversight. Data would be made available, and all official communications would be subject to disclosure. Community groups and everyday citizens would get a chance to review and comment on proposed maps and submit their own alternatives. States

<sup>267</sup> The criteria are based on best practices as developed by a number of civil rights and good government groups that study redistricting. See "Redistricting Principles for a More Perfect Union," Common Cause, accessed March 10, 2021, <https://www.commoncause.org/redistricting-principles-for-a-more-perfect-union/#>.

<sup>268</sup> There are no federal redistricting-specific regulations beyond the requirement that districts be single member and equally populated. For racial and language minorities, there are also protections available under the Equal Protection Clause and the Voting Rights Act.

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

would be required to show their work and issue a detailed report before taking a final vote on a plan. In short, redistricting would no longer be done through backroom deals.

These changes would transform congressional representation for all Americans, combining best practices for assuring fair, effective, and accountable representation. Congress plainly has the power to enact these changes and should do so without delay.

Depending on when S. 1 is enacted into law, there may or may not be sufficient time to implement independent commissions for the 2021-22 cycle of redistricting. But there is no reason that S. 1's uniform map drawing rules, ban on partisan gerrymandering, strengthened protections for communities of color, and enhanced judicial remedies could not be made immediately applicable to states regardless of what entity draws this cycle's maps.

**V. ELECTION SECURITY**

S. 1 would take critical steps to dramatically improve security and reliability of our election infrastructure.

The 2016 election put a spotlight on election infrastructure security, after foreign adversaries and cyber criminals successfully breached state voter registration systems<sup>269</sup> and election night results reporting websites.<sup>270</sup> Foreign adversaries continue to demonstrate an interest in election interference<sup>271</sup>—including the recent revelation that the Russian government sought to undermine confidence in the electoral process and influence the outcome of the election<sup>272</sup>—and recent hacks into software used throughout the federal government show that such attacks have grown increasingly sophisticated.<sup>273</sup>

Despite these clear threats, seven states continue to use voting machines that have no paper backup (which security experts have consistently argued is a minimum defense necessary

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

to detect and recover from cyberattacks).<sup>274</sup> Of the states that do use paper ballots, too few conduct sufficient reviews of their paper backups to audit their election results; private voting system vendors are not required to report security breaches which often leaves our election administrators and the public in the dark; and election officials across the country say they lack the resources to implement critical election security measures.<sup>275</sup> Unfortunately, our election security is only as strong as our weakest link.

S. 1 would significantly bolster the security and resilience of our nation's election administration infrastructure. Among the most critical reforms, it requires states to replace unsecure paperless voting systems, promotes robust audits of machine-tabulated election results, and ensures that federal funds may only be used to purchase systems or services from private election system vendors who meet minimum security standards.

**A. Replacing Paperless Voting Systems (Title I, Subtitle F)**

First and foremost, S. 1 would mandate the replacement of all paperless electronic voting machines with machines that require an individual paper record of each vote. Top security experts—from the National Academies of Sciences, Engineering and Medicine, the national intelligence community, academia, and industry—agree that replacing paperless voting systems is a top priority. This step is critical to improving election security because, as the National Academies put it, paper ballots form “a body of evidence that is not subject to manipulation by faulty hardware or software” and can be used to audit and verify the results of an

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

election.<sup>276</sup> Without that record and check, software manipulation or a bug could change an election result without detection. Further, as Virginia showed in 2017 when it was forced to replace paperless systems just months before a high-profile gubernatorial election after learning of serious security vulnerabilities in its systems, this transition can easily be accomplished in the timeframe provided in this Act.<sup>277</sup> S. 1 provides funding to help facilitate the transition for the remaining states.

**B. Promoting Robust Audits of Election Results (Title III, Subtitle A, Part 2)**

S. 1 provides funds for states to implement robust audits of election results using statistical models to ensure that a sufficient number of paper ballots are checked to corroborate the tallied outcomes (known as “risk-limiting audits”).<sup>278</sup> While paper records alone will not prevent programming errors, software bugs, or the insertion of corrupt software into voting systems, risk-limiting audits use these paper records and are designed to detect and correct any election outcomes impacted by such abnormalities. These audits are quickly growing in popularity. Twelve states now require risk-limiting audits, use risk-limiting audits optionally, or piloted the use of these audits in the 2020 election.<sup>279</sup>

**C. Expanding Definition of Voting Systems to Include Electronic Poll Books (Title III, Subtitle A, Part 3)**

Also important, S. 1 would expand the existing voting equipment testing and certification process to include electronic poll books, which are growing in popularity because they are useful for the provision of expanded early voting, vote centers, and pre-Election Day absentee ballot processing.<sup>280</sup> Although poll books handle some of our most sensitive information, they have not been subject to even voluntary federal certification standards, and technical failures have been a

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

cause of significant lines and delays in elections over the past few years.<sup>281</sup> While some states have tried setting up their own electronic pollbook standards, others may lack the resources and expertise to do so.<sup>282</sup> Moreover, a patchwork of state standards cannot effectively guarantee that these systems meet security best practices. The federal government is far better positioned to oversee this increasingly important technology.

**D. Increasing Security at Election System Vendors (Title III, Subtitle A, Part 8)**

S. 1 provides for greater federal oversight of the private vendors who design and maintain the election systems that store our personal information, tabulate our votes, and communicate important election information to the public. The Brennan Center has documented numerous instances of voting system failures that could have been prevented had vendors notified their clients of previous failures in other jurisdictions using the same voting equipment.<sup>283</sup> Among other things, the Act would require that any vendors who receive payment from grants made under the Act: (1) certify that the infrastructure they sell to local election jurisdictions is developed and maintained in accordance with cybersecurity best practices; (2) certify that their own information technology is maintained in accordance with cybersecurity best practices; (3) ensure that they have personnel policies and practices in place that are consistent with personnel best practices, including cybersecurity training and background checks; and (4) promptly report any suspected cybersecurity incident directed against the goods and services they provide under these grants.

**E. Ensuring a Consistent Stream of Federal Funding to Secure our Election Infrastructure (Title III, Subtitle A)**

S. 1 provides funds for critical security measures and to cover maintenance and upgrades to voting systems for years to come. These resources are necessary since the race to secure our elections is one without a finish line, and our adversaries will undoubtedly change and advance their methods of attack. The responsibility for funding elections must be shared among local, state, and federal governments, and the Act ensures that the federal government pays its fair share of the ongoing cost of voting systems, with a consistent stream of federal funding for states to procure and maintain secure equipment and implement state-of-the-art security measures to ensure the integrity of our elections.

The election security measures in S. 1 would not only make our election infrastructure more secure but also help reduce the unconscionably long lines that so many voters experience

APPENDIX B**

every election. That would go a long way toward restoring Americans' confidence in our elections. We look forward to continuing to work with Congress to ensure sufficient federal resources for state and local election officials and sufficient national standards to ensure that funding is spent effectively.

**VI. STRENGTHENING GOVERNMENT ETHICS**

S. 1 would establish stronger ethics rules for all three branches of government. It is a strong first step toward strengthening ethics and accountability. The Brennan Center strongly supports all of S. 1's ethics reforms.

The last four years witnessed an increasingly rapid erosion of the ethical guardrails that have in the past prevented self-dealing by public officials.<sup>284</sup> Recent transgressions range from senior officials utilizing their official positions for their own personal financial benefit<sup>285</sup> to selective or lax enforcement of ethics rules when senior or well-connected officials run afoul of them.<sup>286</sup> There have also been many examples of political appointees working on regulatory matters on which they previously lobbied the government for industry.<sup>287</sup> Among the most troubling examples, conflicts of interest and other ethics lapses marred the federal government's initial response to the Covid-19 pandemic, hampering its ability to address the crisis effectively.<sup>288</sup>

A poll published in the fall of 2020 showed only 20 percent of Americans trust their government to "do the right thing" just about always or most of the time.<sup>289</sup> In the lead-up to the

APPENDIX B**

2020 election, political corruption ranked second on the list of voters' top concerns, above the Covid-19 pandemic.<sup>290</sup> These statistics show that we are facing a crisis of confidence in American democracy. That is why Congress must help ensure that officials act for the public good rather than private gain.

There is longstanding bipartisan support for ethics reforms. Prohibitions on conflicts of interest by government employees have been in place for more than a century.<sup>291</sup> In the wake of Watergate, Congress strengthened existing conflict of interest laws by passing the Ethics in Government Act of 1978 (EGA), which mandated a public financial disclosure requirement, the establishment of the Office of Government Ethics to promote and lead the administration of an ethics program in the executive branch, and prohibitions to slow the "revolving door" between public service and private business.<sup>292</sup> In 1989, President George H. W. Bush signed into law amendments to strengthen key provisions of the EGA.<sup>293</sup> In 1995, Congress passed the Lobbying Disclosure Act to prevent undue private sector influence over governmental activities, strengthening disclosure requirements and transparency for lobbyists and lobbying firms.<sup>294</sup> S. 1 contains the next wave of much-needed ethical reforms, including the following:

**A. Supreme Court Ethics (Title VII, Subtitle A)**

S. 1 would require a code of ethics for the United States Supreme Court. The Court's nine justices are the only U.S. judges—state or federal—not bound by a written code of ethical conduct.<sup>295</sup> All other federal judges are subject to the official Code of Conduct for United States Judges, which requires them to uphold the integrity and independence of the judiciary and governs matters like recusal, financial disclosure, outside employment, partisan political engagement, and gifts. S. 1 would require the Judicial Conference of the United States to issue a code of ethics for the entire federal judiciary, including the justices of the Supreme Court, within one year of enactment.

**B. Presidential and Vice Presidential Tax Transparency (Title X)**

S. 1 would require sitting presidents, vice presidents, and major-party candidates for those offices to disclose their tax returns. While tax returns do not reveal everything about a

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

candidate or officeholder's personal finances, they can shed light on potential conflicts of interest and confirm that the individual is paying their fair share.<sup>296</sup>

After President Richard Nixon released his personal tax returns in 1973,<sup>297</sup> all major party presidential nominees voluntarily disclosed their returns to the public until 2016,<sup>298</sup> when President Trump refused to disclose personal tax information, a practice he continued once elected.<sup>299</sup> This raised doubts about his financial ties and whether he was paying his fair share.<sup>300</sup> The Act would restore the longstanding norm of tax return disclosure by, among other things, requiring disclosure of personal income tax returns and the returns of any businesses of which the filer is the sole or principal owner, going back ten years.

**C. Executive Branch Conflicts of Interest (Title VIII, Subtitle A)**

S. 1 would take important steps to address conflicts of interest in the executive branch. It is common for high-level officials to move back and forth between government and the private sector. Ethics rules do not prevent senior government officials from overseeing matters likely to be of interest to past or future employers, leaving government to lobby their former colleagues (following a brief one-year cooling-off period), or even selling goods and services to the government. S. 1 tightens ethics standards by requiring officials to recuse from matters in which they know or should have known that a former employer or client had a financial interest,<sup>301</sup> imposing restrictions to slow the revolving door, and restricting federal funds from being spent at businesses owned or controlled by the president, vice president, cabinet members, or any of their families.

**D. Presidential Conflicts of Interest (Title VIII, Subtitle B)**

S. 1 would codify the practice of presidents and vice presidents of complying with conflict of interest law, from which they are exempt. Going back to the 1960s, presidents limited

APPENDIX B**

their personal holdings to assets like cash and treasury bonds, or used a blind trust,<sup>302</sup> reinforcing the view that our most senior leaders should only take official action in the public's best interest, without consideration of their own personal financial interest.

President Trump broke with this tradition, maintaining effective ownership and control of his many businesses.<sup>303</sup> According to ethics experts, this created at least an appearance of numerous conflicts of interest, making it hard to discern where the public's interests end and the former president's self-interest began.<sup>304</sup> This underscores why Congress must require the president and vice president to divest from any personal financial holdings that could pose a conflict of interest with their official duties.

**E. Executive Branch Ethics Enforcement (Title VIII, Subtitle D)**

S. 1 would increase the independence and authority of the Office of Government Ethics (OGE), which is responsible for administering executive branch ethics rules, so it is better positioned to prevent ethics violations, investigate allegations, and hold violators accountable.<sup>305</sup>

Currently, OGE can promulgate regulations, but it has limited investigative and enforcement power, and Trump administration officials questioned whether the agency's rules applied to White House staff.<sup>306</sup> OGE also exercises little direct control over agency ethics officials, who typically report to political appointees. And the agency lacks many of the hallmarks of a truly independent watchdog.<sup>307</sup> This subtitle would bring OGE more in line with other independent watchdog agencies by: limiting the president's authority to remove OGE's director;<sup>308</sup> empowering the director to submit their own budget proposals to Congress;

<sup>307</sup> Bharara, Whitman, et al., *Proposals for Reform*, 16.

<sup>308</sup> Congress and the courts have recognized the need for the leaders of watchdog agencies to be insulated from political pressure. See *Free Enterprise Fund v. Public Co. Accounting Oversight Bd.*, 561 U.S. 477, 487 (2010); and *Federal Election Commission v. NRA Political Victory Fund*, 6 F.3d 821, 826 (DC Cir. 1993). A recent Supreme

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

clarifying that OGE ethics regulations and other guidance are binding on all federal employees, including White House staff, and vesting OGE with new authority to, among other things, conduct formal investigations of suspected ethics violations—including through the issuance of subpoenas—and to review and approve conflict of interest and similar determinations by agency ethics officials, as well as waivers of conflict of interest rules.

These are only a few of the critical ethics reforms in S. 1. Collectively, they would help restore the ideal of public service as a public trust and ensure that leaders put the interests of the interests of the American people first. We urge Congress to pass these critical reforms.

#### **VII. CONGRESS'S AUTHORITY TO ACT**

Finally, Congress unequivocally has the authority to enact all the democracy reforms set forth in S. 1, especially under Article I, Section 4 of Constitution—known as the Elections Clause. The Elections Clause empowers Congress, “at any time,” to “make or alter” any regulations for federal elections.<sup>309</sup> It is one of the most explicit grants of power to override the states anywhere in the Constitution.<sup>310</sup>

The Supreme Court has consistently interpreted the Elections Clause to endow Congress with sweeping power to regulate the time, place, and manner of elections.<sup>311</sup> (The only exception

---

Court decision struck down the single-director model for the Consumer Financial Protection Bureau, while recognizing the constitutionality of other for-cause removal protections. *Seila Law LLC v. Consumer Financial Protection Bureau*, 140 S. Ct. 2183 (2020).

<sup>309</sup> The Elections Clause provides: “The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing [sic] Senators.” U.S. Const. art. I, § 4, cl. 1.

<sup>310</sup> For a history of the drafting of the Elections Clause and the debate over it during ratification, see Michael Waldman, *The Fight to Vote* (New York: Simon & Schuster, 2016), 25–28.

<sup>311</sup> See, e.g., *Inter Tribal Council*, 570 U.S. at 9 (“The power of Congress over the ‘Times, Places and Manner’ of congressional elections ‘is paramount, and may be exercised at any time, and to any extent which it deems expedient; and so far as it is exercised, and no farther, the regulations effected supersede those of the State which are inconsistent therewith.’”) (quoting *Ex parte Siebold*, 100 U.S. 371, 392 (1879)); *Ex parte Yarbrough*, 110 U.S. 651, 661–62 (1884) (“it is not doubted” “that congress can, by law, protect the act of voting, the place where it is done, and the man who votes from personal violence or intimidation, and the election itself from corruption or fraud”); *United States v. Mosley*, 238 U.S. 383, 386 (1915) (“We regard it as . . . unquestionable that the right to have one’s vote counted is as open to protection by Congress as the right to put a ballot in a box.”); *Smiley v. Holm*, 285 U.S. 355, 366 (1932) (“It cannot be doubted that these comprehensive words embrace authority to provide a complete code for congressional elections, not only as to times and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns; in short, to enact the numerous requirements as to procedure and safeguards which experience shows are necessary in order to enforce the fundamental right involved.”); *United States v. Classic*, 313 U.S. 299, 319–20 (1941) (“Unless the constitutional protection of the integrity of ‘elections’ extends to primary elections, Congress is left powerless to effect the constitutional purpose. . . . Words, especially those of a constitution, are not to be read with such stultifying narrowness. The words of ss 2 and 4 of Article I, read in the sense which is plainly permissible and in the light of the constitutional purpose, require us to hold that a primary election which involves a necessary step in the choice of candidates for election as representatives in Congress, and which in the circumstances of this case controls that choice, is an election within

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

is a 1921 case that has since been overturned.) As recently as 2013, the Court said, in an opinion by Justice Scalia, that Congress’s power under the Elections Clause is so broad that it includes “authority to provide a complete code for congressional elections[.]”<sup>312</sup> Accordingly, the Supreme Court has found that the Elections Clause authorizes legislation related to voter registration,<sup>313</sup> redistricting,<sup>314</sup> campaign finance,<sup>315</sup> and corruption in presidential elections.<sup>316</sup>

In the last two years, several members of the Court have gone out of their way to reaffirm Congress’s broad authority under the Elections Clause. In 2019, for instance, Chief Justice Roberts, writing for the Court, recognized that “the Framers gave Congress the power to do something about partisan gerrymandering in the Elections Clause[.]”<sup>317</sup> and pointed to the 116<sup>th</sup> Congress’s version of the For the People Act, H.R. 1, as example of the exercise of that power.<sup>318</sup> The Chief Justice likewise acknowledged Congress’s wide-ranging and longstanding power under the Elections Clause, noting that Congress had used that power to enact, among other things, a “comprehensive federal statute dealing with elections as a way enforce the Fifteenth Amendment” in 1870 and “a series of laws to protect the right to vote” beginning in the 1950s.<sup>319</sup> Similarly, Justices Gorsuch and Kavanaugh noted last year that under the Elections Clause, “[i]f state rules need revision, Congress is free to alter them.”<sup>320</sup>

There is thus no question that the Act’s provisions fall squarely within Congress’s authority over federal elections. Some, such as Congress’s power to strengthen the Voting Rights Act and to restore voting rights to individuals with past convictions under Title I, Subtitle E, are also rooted in authority granted to it under the Fourteenth and Fifteenth Amendments.<sup>320</sup>

---

the meaning of the constitutional provision and is subject to congressional regulation as to the manner of holding it.”). *Buckley*, 424 U.S. at 13 n.16 (recognizing that *Classic* overturned *Newberry v. United States*, 256 U.S. 232 (1921), which had held that the Elections Clause did not apply to primary elections); *Oregon v. Mitchell*, 400 U.S. 112, 121 (1970) (“The breadth of power granted to Congress to make or alter election regulations in national elections, including the qualifications of voters, is demonstrated by the fact that the Framers of the Constitution and the state legislatures which ratified it intended to grant to Congress the power to lay out or alter the boundaries of the congressional districts.”); and *Foster v. Love*, 522 U.S. 67, 72 n.2 (1997) (“The [Elections] Clause gives Congress ‘comprehensive’ authority to regulate the details of elections, including the power to impose ‘the numerous requirements as to procedure and safeguards which experience shows are necessary in order to enforce the fundamental right involved.’”) (quoting *Smiley*, 285 U.S. at 366).

<sup>312</sup> *Inter Tribal Council*, 570 U.S. at 8–9 (quoting *Smiley*, 285 U.S. at 366).

<sup>313</sup> *Inter Tribal Council*, 570 U.S. at 8–9.

<sup>314</sup> *Vieth*, 541 U.S. at 275 (stating that the Elections Clause “permits Congress to ‘make or alter’ the ‘districts for federal elections’”); and *Wesberry v. Sanders*, 376 U.S. 1, 16 (1964) (“Speakers at the ratifying conventions emphasized that the House of Representatives was meant to be free of the malapportionment then existing in some of the State legislatures . . . and argued that the power given Congress in Art. I, s 4, was meant to be used to vindicate the people’s right to equality of representation in the House.”) (citations omitted).

<sup>315</sup> *Buckley*, 424 U.S. at 13 (“The constitutional power of Congress to regulate federal elections is well established and is not questioned by any of the parties in this case.”).

<sup>316</sup> *Buckley*, 424 U.S. at 132 (“This Court has also held that it has very broad authority to prevent corruption in national Presidential elections.”) (citing *Burroughs v. United States*, 290 U.S. 534 (1934)).

<sup>317</sup> *Ruchio*, 139 S. Ct. at 2508.

<sup>318</sup> *Ruchio*, 139 S. Ct. at 2495.

<sup>319</sup> *DNC v. Wisconsin State Legislature*, 592 U.S. \_\_\_\_ (2020) (Gorsuch, J., concurring).

<sup>320</sup> *Kusper v. Pontikes*, 414 U.S. 51, 57 n.11 (1973); and *Mitchell*, 400 U.S. at 121, 124 (1970).

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

In fact, the Act embodies the Framers' central goal in establishing the Elections Clause—ensuring that Congress can override efforts by states to manipulate the federal voting process.<sup>321</sup> As they drafted the Constitution, the Framers were concerned that states, left to their own devices, would suppress or skew the vote. Delegates from South Carolina, which was notoriously malapportioned, sought to strike the Clause. Madison insisted that it remain. Without it, he said, “[w]henever the State Legislatures had a favorite measure to carry, they would take care so to mould their regulations as to favor the candidates they wished to succeed.”<sup>322</sup> The Framers therefore designed the Elections Clause to prevent states from manipulating election outcomes and to prevent the development of factions within states that might “entrench themselves or place their interests over those of the electorate.”<sup>323</sup> As was well understood and reflected at the founding, during state ratification of the Constitution, and throughout decades of congressional debate, Congress's power to regulate federal elections is comprehensive. The Framers deliberately granted wide-ranging authority under the Elections Clause to ensure that Congress would be able to combat even those state abuses of power that were unforeseeable at the time.<sup>324</sup> Thus, as Justice Scalia recognized, the states' power to regulate federal elections has always been subject to federal law.<sup>325</sup>

<sup>321</sup> Avalon Project: Documents in Law, History and Diplomacy, “Federalist No. 59,” accessed March 11, 2021, [http://avalon.law.yale.edu/18th\\_century/fed57.asp](http://avalon.law.yale.edu/18th_century/fed57.asp).

<sup>322</sup> Farrand, ed., *Records of the Federal Convention*, vol. 2, 241.

<sup>323</sup> Arizona State Legislature v. Arizona Indep. Redistricting Comm'n, 576 U.S. 787, 815 (2015). During the state debates over the ratification of Constitution, ratification supporters and opponents both emphasized the importance of the overriding power that the Clause gives to Congress. (Federalists were pleased; Anti-Federalists aghast.) For example, Theophilus Parsons, later a Massachusetts chief justice, explained that the “controlling [sic] power” of Congress would “preserve and restore to the people their equal and sacred rights of election.” *The Documentary History of the Ratification of the Constitution* (hereinafter “DHRC”), vol. VI, Ratification by the States: Massachusetts, No. 3, 1218 (January 16, 1788). Thomas McKean (Pennsylvania's Chief Justice) likewise noted that it was Congress's duty to ensure that its members were “fairly chosen” and to do so, “it is proper they should have it in their power to provide that the times, places, and manner of election should be such as to insure free and fair elections.” DHRC, vol. II, Ratification by the States: Pennsylvania, 537 (December 10, 1787).

Six states proposed amendments to the Constitution to narrow Congress's power under the Elections Clause, reflecting that even opponents to the Clause understood it to confer broad authority. Those efforts failed. See Jonathan Elliot, ed., *The Debates in the Several State Conventions on the Adoption of the Federal Constitution* (2d ed. 1836) (hereinafter “Elliot's Debates”), vol. 1, 322 (February 7, 1788, Massachusetts), 325 (May 25, 1788, South Carolina), 326 (June 21, 1788, New Hampshire), 329–30 (July 26, 1788, New York); Elliot's Debates, vol. 4, 246 (August 1, 1788, North Carolina); DHRC, Vol. XXVI: Rhode Island, No. 3 at 999–1000 (May 29, 1790) (Rhode Island Form of Ratification and Amendments); see also Elliot's Debates, vol. 2, 545 (September 3, 1788, Meeting at Harrisburg, after Pennsylvania had ratified the Constitution). Similarly, in 1789, the First Congress rejected a constitutional amendment that would have let Congress “alter, modify, or interfere in the times, places, or manner of congressional elections only “when any State shall refuse or neglect, or be unable, by invasion or rebellion, to make such election.” *Annals of Congress*, vol. 1, 767–74 (1789).

<sup>324</sup> At the Constitutional Convention, James Madison explained that the Elections Clause uses “words of great latitude” because “it was impossible to foresee all the abuses that might be made of the [states'] discretionary power.” Farrand, *Records of the Federal Convention*, vol. 2, 240.

<sup>325</sup> *Inter Tribal Council*, 570 U.S. at 14–15 (quoting *Buckman Co. v. Plaintiffs' Legal Committee*, 531 U.S. 341, 347 (2001)).

**BRENNAN CENTER FOR JUSTICE  
APPENDIX B**

Since the initial passage of the For the People Act by the House in 2019, the need for this legislation has only become more apparent, as underscored by the pandemic, the Big Lie that fueled the January 6 insurrection at the Capitol, and the spate of bills to restrict voting rights at the state level. Now it is up to elected leaders to deliver. S. 1 is a down-payment on the promise of a democracy that works for everyone. We urge its prompt passage.

Thank you.

**BRENNAN  
CENTER

Testimony of

**Wendy Weiser**

Vice President for Democracy at the  
Brennan Center for Justice at NYU School of Law<sup>1</sup>

Hearing on Oversight of the Voting Rights Act: A Continuing Record of Discrimination

Before the Committee on the Judiciary,  
Subcommittee on the Constitution, Civil Rights and Civil Liberties  
In the United States House of Representatives

May 27, 2021

Thank you for the opportunity to testify in support of strengthening the Voting Rights Act (“VRA”), a law that has played a critical role in safeguarding American democracy against pernicious, persistent threats of discrimination in the election system. The Brennan Center for Justice at NYU School of Law strongly supports this Committee’s efforts to restore and revitalize the VRA, through the John Lewis Voting Rights Advancement Act (“VRAA”).

The VRA is widely considered the most effective civil rights legislation in our nation’s history.<sup>2</sup> Not only did it dismantle discriminatory voting practices prevalent during the Jim Crow era, but it also served as a bulwark against new discriminatory voting measures in the decades that followed. Unfortunately, in its 2013 decision in *Shelby County v. Holder*,<sup>3</sup> the Supreme Court neutered the VRA’s most powerful provisions. Since then, voters in many of the jurisdictions that had previously been protected by the law’s preclearance regime have been battered by a barrage of new voting laws and practices that target and disproportionately harm voters of color, and these pernicious practices have spread elsewhere.<sup>4</sup>

<sup>1</sup> The Brennan Center for Justice at New York University School of Law is a nonpartisan public policy and law institute that works to reform, revitalize, and defend our country’s system of democracy and justice. I am the Vice President for Democracy and Director of the Brennan Center’s Democracy Program. I have authored numerous nationally recognized reports and articles on voting rights and elections. My work has been featured in numerous media outlets across the country, including the *New York Times*, the *Washington Post*, the *Los Angeles Times*, the *Boston Globe*, *USA Today*, and *Politico*. I have served as counsel in numerous voting rights lawsuits, including a number of the lawsuits referenced in this testimony. I have testified previously before Congress, and before several state legislatures, on a variety of issues relating to voting rights and elections. My testimony does not purport to convey the views, if any, of the New York University School of Law.

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

I submit this testimony to present and highlight evidence of widespread discrimination in the voting process in recent years—evidence that warrants a swift and powerful congressional response. As we previously testified in the 116th Congress, state and local jurisdictions have implemented a staggering number of discriminatory voting practices over the past decade, including targeted purges of the voter rolls, biased redistricting schemes, and laws restricting access to voting. Sadly, without strong national legal protections, the problem is only getting worse.

This year, in states across the country, we see a fierce new assault on the right to vote fueled by the “Big Lie” about widespread voter fraud. Legislators are rushing to enact yet another wave of discriminatory voting restrictions, in what would be the most significant cutback of the right to vote since the Jim Crow era. As in the Jim Crow era, laws that may look neutral on their face are too often designed and applied to target voters of color.<sup>5</sup> As of the Brennan Center’s March 31, 2021 count, state lawmakers had introduced more than 360 bills in 47 states to curb the vote.<sup>6</sup> That number is still growing, according to our soon-to-be-published new count,<sup>7</sup> and is more than four times the number of restrictive bills introduced just two years ago. Already, at least 14 states have enacted new laws with provisions that restrict access to voting.<sup>8</sup> This amounts to a real time attack on our democracy. Additional threats loom, as states prepare to start their once-in-a-decade redistricting processes for the first time in over a half a century without the full protections of the Voting Rights Act.<sup>9</sup>

These forceful threats to the franchise demand an equally forceful response. Congress has the power to stop this attack on right to vote and protect Americans against further attacks. The Constitution’s Fourteenth and Fifteenth Amendments give Congress the power to remedy and deter discrimination in the voting process. The extraordinary amount of evidence of voting discrimination in recent years, which I highlight below, is more than enough to justify strong congressional action pursuant to this power, including passage of the VRAA. Moreover, the Congress has extremely strong powers under the Elections Clause to set the “times, places and manner” of federal elections—powers the Supreme Court has said include “authority to provide a complete code for congressional elections.”<sup>10</sup> That power should also be used to stop vote suppression and strengthen voting access.

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

The 2020 presidential contest featured historic levels of voter turnout — the highest in over a century, even in the face of a deadly pandemic.<sup>11</sup> But there were also unprecedented efforts to thwart the electoral process and disenfranchise voters, primarily in Black, Latino, and Asian communities, efforts that, as discussed, continue today through an aggressive push to enact restrictive voting laws across the country. The VRAA is a critical tool in combatting this discrimination. We urge the Committee to act expeditiously to pass the VRAA, along with the For the People Act, to root out this discrimination and to protect every American's freedom to vote.

### I. Evidence of Discrimination in Restrictive Voting Policies and Practices

Over the last decade, states have enacted and implemented voting restrictions that target and disproportionately harm racial and ethnic minorities and undermine our democracy. Often legislators have piled restriction on restriction in a manner that maximizes their suppressive impact. A growing body of research shows that many of these restrictions measurably reduce access and participation, especially among voters of color. This section presents and reviews evidence of discriminatory practices and the ways in which they both target and impact voters of color. The Brennan Center has extensively documented new, direct burdens on the right to vote over the past decade.<sup>12</sup> (I attach as Appendix B prior testimony the Brennan Center submitted to Congress on this topic. A compendium of our documentation can be found in Appendices A and C).

#### A. Voter Purges

First, there is strong evidence of discrimination in state and local practices for purging the voter rolls since the *Shelby County* decision.

Voter purges are the often error-laden process by which election officials try to clean voter rolls by removing the names of people who are not eligible to vote.<sup>13</sup> Prior to the Supreme Court's decision in *Shelby County*, jurisdictions that were covered by the VRA's preclearance provisions were required to get federal approval for changes to their purge practices before

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

implementing them.<sup>14</sup> This requirement protected voters from ill-conceived, discriminatory purges. That protection is now gone, and voter purges are on the rise. The Brennan Center's research suggests that race has played a critical role in increased purge rates.

A peer-reviewed study the Brennan Center conducted in 2018, using data from the federal Election Assistance Commission ("EAC"), found that for the two election cycles between 2012 and 2016, jurisdictions that were previously subject to preclearance under the VRA because of their racially discriminatory voting practices had purge rates that were significantly higher than those in other jurisdictions.<sup>15</sup> In other words, the *Shelby County* decision has had a direct, negative impact on purges in precisely the parts of the country with the worst records on voting discrimination against racial and ethnic minorities. Overall, our study found that, between 2014 and 2016, states removed almost 16 million voters from the rolls—nearly 4 million more than they removed between 2006 and 2008.<sup>16</sup> This 33 percent growth far outstripped the growth in the voter population.<sup>17</sup> If those counties had purged at the same rate as other counties, as many as 1.1 million fewer individuals would have been removed from rolls between 2016 and 2018, and 2 million fewer between 2014 and 2016.<sup>18</sup> (I attach a copy of this study in Appendix C.)

The Brennan Center conducted a subsequent analysis in 2019 showing that this elevated purge rate in formerly covered jurisdictions continued through the 2018 election cycle.<sup>19</sup> Assessing 2019 EAC data, we found that between 2016 and 2018 the median purge rates in counties that were previously covered by the VRA was 40 percent higher than in other counties.<sup>20</sup> Nationwide at least 17 million voters were purged between 2016 and 2018, a number that is considerably higher than past purge rates. (I attach a copy of this analysis in Appendix C.)

A chart from this 2019 study, previously submitted before the Committee on House Administration, vividly illustrates the apparent impact of the *Shelby County* decision on purge rates in jurisdictions that were formerly covered by Section 5 of the VRA:

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

As the chart makes clear, despite the fact that formerly covered jurisdictions had comparable purge rates with the rest of the country prior to *Shelby County*, once the preclearance condition was lifted, purge rates in these jurisdictions surged relative to the rest of the country. Comparable data for the 2020 election cycle is not yet available.

Data from Georgia, Texas, Florida, and North Carolina during this period provide further evidence of this troublesome phenomenon. Our research found that Texas purged 363,000 more voters between 2012 and 2014 than it did between 2008 and 2010, while Georgia purged twice as many voters — 1.5 million voters — between the 2012 and 2016 elections as it did between 2008 and 2012.<sup>21</sup>

According to another Brennan Center analysis, the state also saw most of its counties purge more than 10 percent of their voters between 2016 and 2018.<sup>22</sup> Between December 2016 and September 2018, Florida purged more than 7 percent of its voters. And between September of 2016 and May 2018, North Carolina purged 11.7 percent of its voter rolls. A disproportionate impact was on voters of color: in 90 out of 100 counties in North Carolina, voters of color were over-represented among the purged group.<sup>23</sup> (I attach a copy of this analysis in Appendix C.)

#### B. Wait Times to Vote

There is ample evidence that voters of color face significantly longer wait times at the polls than white voters and that discriminatory state and local practices are at least partially responsible for these disparities.

<sup>21</sup> Brater et al., *Purges*.

<sup>22</sup> Kevin Morris & Myrna Pérez, *Florida, Georgia, North Carolina Still Purging Voters at High Rates*, Brennan Center for Justice (Oct. 1, 2018), <https://www.brennancenter.org/our-work/analysis-opinion/florida-georgia-north-carolina-still-purging-voters-high-rates>.

<sup>23</sup> Morris & Pérez, "Florida, Georgia, North Carolina Still Purging Voters."

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

A Brennan Center study of wait times during the 2018 midterm elections found that Latino voters waited on average 46 percent longer, and Black voters 45 percent longer, than white voters to cast their ballots.<sup>24</sup> Moreover, Latino and Black voters were more likely than white voters to wait in the longest of lines on Election Day: some 6.6 percent of Latino voters and 7.0 percent of Black voters reported waiting 30 minutes or longer to vote, surpassing the acceptable threshold for wait times set by the Presidential Commission on Election Administration, compared with only 4.1 percent of white voters.<sup>25</sup> Multiple additional studies have found similar and persistent racial disparities in wait times over the past decade.<sup>26</sup>

Some of these disparities can be explained by polling place closures in jurisdictions with high minority populations. A study by the Leadership Conference on Civil and Human Rights uncovered nearly 1,700 polling place closures in jurisdictions formerly covered by Section 5 of the VRA, despite a significant increase in voter turnout in those jurisdictions during the same period.<sup>27</sup> A survey of Native Americans in South Dakota by the Native American Voting Rights Coalition found that 32 percent of respondents said that the distance needed to travel to the polls affected their decision to cast a ballot.<sup>28</sup>

Polling place closures often disproportionately harm voters of color. During the 2020 presidential primary election in Wisconsin, for example, Milwaukee closed all but five of its 182 polling places. A peer-reviewed academic journal article by the Brennan Center's Kevin Morris and Peter Miller found that this closure depressed turnout by more than 8 percentage points overall—and by about 10 percentage points among Black voters.<sup>29</sup> This corroborates other academic research showing that polling place closures decrease turnout, and that these effects can fall disproportionately on voters of color.<sup>30</sup>

<sup>24</sup> Hannah Klain et al., *Waiting to Vote: Racial Disparities in Election Day Experiences*, Brennan Center for Justice (2020), [https://www.brennancenter.org/sites/default/files/2020-06/6\\_02\\_WaitingtoVote\\_FINAL.pdf](https://www.brennancenter.org/sites/default/files/2020-06/6_02_WaitingtoVote_FINAL.pdf).

Keith Chen et al., *Racial Disparities in Voting Wait Times: Evidence from Smartphone Data*, Rev. of Econ. & Stat. (2020); David Cottrell et al., *Voting Lines, Equal Treatment, and Early Voting Check-In Times in Florida*, State Pol. & Pol'y Q. (2020).

<sup>27</sup> *Democracy Diverted: Polling Place Closures and the Right to Vote*, The Leadership Conference Education Fund (Sept. 2019), <http://civilrightsdocs.info/pdf/reports/Democracy-Diverted.pdf>. Another example of discriminatory polling place closures can be seen in Georgia's new prohibition on mobile voting sites. Mobile voting (polling sites on wheels that travel to different set locations) — a practice that has only been used in Fulton County, which has the largest Black population in the state — was outlawed by the Georgia legislature this year. See Michael Waldman, *Georgia's Voter Suppression Law*, Brennan Center for Justice (Mar. 31, 2021), <https://www.brennancenter.org/our-work/analysis-opinion/georgias-voter-suppression-law>.

(Apr. 2021); Kevin Morris, *Did Consolidating Polling Places in Milwaukee Depress Turnout?*, Brennan Center for Justice (June 24, 2020), <https://www.brennancenter.org/our-work/research-reports/did-consolidating-polling-places-milwaukee-depress-turnout>.

<sup>30</sup> See, e.g., Enrico Cantoni, *A Precinct Too Far: Turnout and Voting Costs*, 12 Am. Econ. J.: Appl. Econ. 61 (2020); Henry E. Brady & John E. McNulty, *Turning Out to Vote: The Costs of Finding and Getting to the Polling Place*, 105 Am. Pol. Sci. Rev. 115 (2011).

A number of recently passed voting laws and pending bills are likely to exacerbate these disparities. The recently passed Georgia law notoriously makes it a crime to provide food or water to voters waiting in line to vote (though it allows election workers to provide self-service water).<sup>31</sup> Reporting from last year indicated that Black Georgians faced far longer waits than white Georgians in the June primary,<sup>32</sup> and a report from ProPublica and Georgia Public Broadcasting indicated that this was largely due to closed polling places.<sup>33</sup> A new law in Florida may similarly restrict the ability to provide snacks and water.<sup>34</sup> According to our recently published Voting Laws Roundup, new laws in Iowa and Montana reduce polling place availability: the Iowa law requires polls to close earlier on Election Day, while the Montana law allows more polling places to qualify for reduced hours.<sup>35</sup> A bill pending in Michigan, which has already passed in one chamber, would almost double the number of voters that can be assigned to one precinct, likely meaning much longer lines to vote on Election Day.<sup>36</sup> This will likely be felt most acutely in minority-rich cities, which experienced especially long lines last year.<sup>37</sup> Bills advancing in Nevada, Texas, South Carolina could likewise result in polling place closures.<sup>38</sup>

### C. New Voting Restrictions Before This Year

Shortly before the *Shelby County* decision, the Brennan Center documented a new trend of state legislation seeking to make it harder to vote in advance of the 2012 election.<sup>39</sup> Fortunately, many of the restrictive voting laws passed at that time never went into effect because they were blocked by Section 5 of the VRA; many others were repealed, invalidated or blunted

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

by courts.<sup>40</sup> After the *Shelby County* decision, we documented a new spike in voting restrictions, as multiple previously covered states seized upon the lack of federal oversight to put in place discriminatory laws and policies.<sup>41</sup> This push to pass restrictive voting laws has continued unabated ever since.<sup>42</sup> Many of these new laws have targeted and disproportionately impacted voters of color, as we have continuously documented.<sup>43</sup> The problem goes beyond legislation; we have also documented a range of other new discriminatory voting practices in recent years.<sup>44</sup>

The number of discriminatory voting practices over the past decade is too voluminous to detail in this testimony. Instead, I highlight a few recent examples:

**a. Strict Voter ID Laws**

New strict voter ID laws implemented over the last decade have further targeted voters of color and restricted their ability to exercise their right to vote. Federal courts in at least four states have found that strict voter ID laws were racially discriminatory, and in some cases, that such laws were intentionally discriminatory.

In 2011, bills were introduced in 34 states to implement stricter voter ID requirements; nine of those passed, but most were blocked by Section 5 or judicial decisions.<sup>45</sup> Pennsylvania enacted a

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

strict photo ID law in 2012, only to have it struck down as unconstitutional by a state court in 2014.<sup>46</sup>

Efforts to tighten voter ID requirements rose after the *Shelby County* decision and have continued since.<sup>47</sup> In 2013, at least five states—Alabama, Mississippi, North Carolina, North Dakota, Virginia and Texas—implemented or began to enforce strict photo ID laws, most of which had previously been blocked by the Department of Justice due to their discriminatory impact. The Texas and North Carolina laws were both struck down by federal courts as discriminatory. The Fourth Circuit Court of Appeals famously said that North Carolina’s voter ID law disenfranchised Black voters “with almost surgical precision.”<sup>48</sup>

The Texas’ law disenfranchised all voters who lacked one of scant few forms of ID—notably including firearms permits, which are disproportionately held by white Texans, while excluding student IDs and IDs issued by state agencies. A federal district court found that more than 600,000 registered Texas voters—and many more unregistered but eligible voters—lacked an accepted form of ID, and that “a disproportionate number of African-Americans and Hispanics populate that group of potentially disenfranchised voters.”<sup>49</sup> The court further held that, not only did the law have the effect of discriminating against African-American and Hispanic voters, but it was intentionally enacted for that very purpose. The Fifth Circuit Court of Appeals *en banc* ultimately affirmed that the law had the result of discriminating on the basis of race.<sup>50</sup>

North Dakota has passed new voter ID restrictions three times in the past eight years. In 2013, the state strictly limited voters to one of four acceptable forms of ID, all of which were required to contain the voter’s street address, notwithstanding that 19 percent of Native Americans—many of whom lived on reservations without street addresses—lacked qualifying IDs.<sup>51</sup> The law was amended in 2015 to exclude college identification certificates that had long been used by student voters. In 2016, finding that the law discriminated against Native American voters, a federal district court enjoined the law, requiring North Dakota to provide a “fail safe” alternative for voters who could not obtain a qualifying ID without reasonable effort.<sup>52</sup> In 2017, North Dakota again amended its law, but retained the residential address requirement. A federal court enjoined the new law in 2018, concluding that it had a “discriminatory and burdensome impact on Native Americans,”<sup>53</sup> although the injunction was stayed on appeal.<sup>54</sup> Finally, in 2020, the parties to the litigation reached a settlement allowing Native American voters who do not have a residential street address to vote.<sup>55</sup>

Wisconsin’s strict photo ID law, passed in 2011, has been repeatedly blocked as

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

discriminatory and reinstated by both state and federal courts over an 8-year period. Likewise, a voter ID law passed in North Carolina after the prior version was struck down in 2016 was initially blocked as racially discriminatory by both state and federal courts, though the Fourth Circuit Court of Appeals vacated the injunction shortly after the November 2020 election.<sup>56</sup>

Efforts to suppress the vote through strict voter ID laws continue unabated to the present day. As of April 1, 2020, new voter ID requirements accounted for nearly a quarter of the 361 restrictive voting bills proposed by state legislatures in 2021. There is little question why state legislatures have so doggedly focused on imposing and tightening voter ID requirements: research has shown time and again that such laws operate to disproportionately exclude voters of color.<sup>57</sup> For instance, a recent study conducted at the University of California San Diego concluded that voter ID laws “disproportionately reduce voter turnout in more racially diverse areas.”<sup>58</sup>

**b. Restrictions on Voter Registration**

In 2017, Georgia enacted an “exact match” law mandating that voters’ names on registration records must perfectly match their names on approved forms of identification.<sup>59</sup> The state enacted the law, even though only months earlier, the Secretary of State agreed in a court settlement to stop a similar procedure, which had blocked tens of thousands of registration applications.<sup>60</sup> A Brennan Center analysis of the policy found that, in the months leading up to the 2018 election, roughly 70 percent of Georgia voters whose registrations were blocked by the policy were people of color.<sup>61</sup> The state subsequently enacted a law that largely ended the policy because of litigation challenging the matching program.<sup>62</sup>

In recent years, some states have imposed new restrictions on the voter registration process which take aim at organizing efforts to boost participation by voters of color and low-income voters. After the Tennessee Black Voter Project collected more than 90,000 new voter registration forms in the leadup to the 2018 election, Tennessee enacted a law inflicting civil penalties on groups that employed paid canvassers if they submitted incomplete or inaccurate voter registration forms.<sup>63</sup>

**c. Cutbacks to Early Voting**

Over the past decade, multiple states have reduced early voting days or sites used disproportionately by voters of color. In Ohio and Florida, for example, legislatures eliminated early voting on the Sundays leading up to Election Day after African American and Latino voters conducted successful “souls to the polls” voter turnout drives on those days.<sup>64</sup> Federal courts have struck down early voting cutbacks in North Carolina, Florida, and Wisconsin because they were intentionally discriminatory.<sup>65</sup> In Florida, after a federal court mitigated but did not fully block a law rolling back early voting days, voters of color experienced disproportionate harms.<sup>66</sup> A study by Professors Daniel Smith and Michael Herron found that voters who had previously cast their ballot on the Sunday before Election Day in 2008—a day that Black voters relied on at three times the rate as white voters—were disproportionately less likely to cast a valid ballot on any day in the 2012 general election, when voting was no longer available on that day.<sup>67</sup> Similar efforts continue today.

**d. Disenfranchisement of Individuals With Past Criminal Convictions in Florida**

In 2019, Florida lawmakers passed a bill that made the right to vote for people with felony convictions contingent on the repayment of all legal financial obligations, including fines, fees, and restitution.<sup>68</sup> The bill was a clear attempt to undermine a constitutional amendment passed by voters in 2018 that finally put an end to a 150-year-old policy of permanent disenfranchisement initially intended to evade mandate of the Fifteenth Amendment.<sup>69</sup> Given the systemic racial inequality built into Florida’s criminal justice system, as well as the racial wealth and wage gaps in the state, it was plain that the bill would produce discriminatory results.

These results were made clear in litigation challenging the law. Expert testimony demonstrated that a staggering 774,000 Floridians were disenfranchised by the pay-to-vote

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

requirement, but that Black Floridians were both more likely to owe money and more likely to owe more money than their white counterparts.<sup>70</sup> In fact, more than 334,000 of those disenfranchised—or roughly 43 percent—were Black,<sup>71</sup> even though less than 17 percent of all Floridians are Black.<sup>72</sup> Despite these plainly discriminatory results, a federal court ultimately held that the plaintiffs had not met the high burden of proving that the law was enacted with a racially discriminatory purpose, but said “the issue [was] close and could reasonably be decided either way.”<sup>73</sup>

While a number of courts have held that felony disenfranchisement laws cannot be challenged under the Voting Rights Act because Congress did not intend to reach these laws,<sup>74</sup> this latest example of the race discrimination produced by Florida’s disenfranchisement law shows why Congress should take them into account this time. Many criminal disenfranchisement laws, including Florida’s, are rooted in deeply prejudiced 19th-century efforts to prevent the Fifteenth Amendment from taking full effect.<sup>75</sup> These laws also continue to disproportionately harm voters of color: According to data from the Sentencing Project, African Americans are disenfranchised at 3.7 times the rate of the rest of the population.<sup>76</sup>

#### D. Restrictive Voting Laws Enacted This Year

As the Brennan Center has documented extensively, state legislators across the country have recently escalated efforts to enact new voting restrictions.<sup>77</sup> In many cases, the racially discriminatory causes and effects of seemingly race-neutral laws are hard to miss.

<sup>77</sup> *Voting Laws Roundup: January 2021*, Brennan Center for Justice (Jan. 26, 2021), <https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-january-2021>; *Voting Laws Roundup: February 2021*, Brennan Center for Justice (Feb. 8, 2021), <https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-february-2021>; *Voting Laws Roundup: March 2021*, Brennan Center for Justice (Apr. 1, 2021), <https://www.brennancenter.org/our-work/research-reports/voting-laws-roundup-march-2021>.

For example, Georgia recently passed legislation that restricts voting access in multiple ways, including by reducing access to mail voting.<sup>78</sup> According to a recent Brennan Center analysis, this law was put in effect immediately after Black voters dramatically increased their use of mail voting and it will disproportionately harm Black voters.<sup>79</sup> Specifically, our study found that, although white voters still made up most of all mail voters in 2020, their share of the vote-by-mail electorate dropped from 67 percent in 2016 to 54 percent in 2020; the Black share, meanwhile, surged from 23 percent to 31 percent.<sup>80</sup> Nearly 30 percent of Georgia's Black voters cast their ballot by mail in 2020, but just 24 percent of white voters did so.<sup>81</sup> In other words, Georgia's new law reducing absentee voting access appears to be tied to Black voters' increased use of absentee voting. Measures making it harder to vote by mail have similarly been enacted in thirteen other states, including Florida and Iowa, and are moving through legislatures in at least 18 other states.<sup>82</sup>

Even when voters of color can equally access and cast absentee ballots, states like Arizona, Georgia, Florida, Idaho, Kansas, and Montana have enacted policies that mean their votes are less likely to be counted—such as signature matching requirements, vote-by-mail ID mandates, and postage costs.<sup>83</sup> Several studies have found that absentee ballots cast by voters of color have in recent years been rejected at much higher rates than those cast by their white counterparts.<sup>84</sup> One study, published in the Election Law Journal (a leading legal resource on election issues), found that in Florida, in both the 2018 and 2016 federal elections, absentee ballots returned by African American and Latino voters were twice as likely to be rejected as those cast by white voters.<sup>85</sup> A similar phenomenon has been documented in a study of Florida's 2020 presidential primary conducted by the ACLU of Florida,<sup>86</sup> and in a Brennan Center study of Georgia's 2020 primaries.<sup>87</sup>

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

A report, based on data collected by Professor Michael Bitzer, of absentee ballots cast in the North Carolina 2020 primary found that ballots cast by Black voters were rejected at three times the rate as those cast by white voters.<sup>88</sup>

Georgia's new law, Senate Bill 202, also prohibits voters from casting a ballot at the wrong precinct — including votes for the contests that the voter is actually eligible to participate in — unless it is after 5:00 p.m., thus barring out-of-precinct voting for most of Election Day.<sup>89</sup> A Brennan Center analysis of the legislation found that the proposed policy change would disproportionately affect minority voters, where residents tend to move more frequently.<sup>90</sup> The case of Fulton County in 2020 illustrates this: Fulton County's population is 44% Black and roughly 67% of provisional ballots cast in Fulton County were cast out of precinct. By contrast, Georgia's population as a whole is 31% Black, and statewide just 44% of provisional ballots were cast out of precinct. Because Black voters live in neighborhoods with much higher rates of in-county moves, they are likely to be hit especially hard by the near-total elimination of out-of-precinct voting. This policy change could impact thousands of voters across the state.<sup>91</sup>

\* \* \*

Lawmakers have typically justified new voting restrictions by the purported need to safeguard against voter fraud. But occasionally politicians reveal more troubling—and discriminatory—motives. At a May 2016 trial on Wisconsin's voting restrictions, for example, former Republican legislative staffer Todd Allbaugh testified that some Wisconsin legislative leaders were “giddy” that the state’s new strict voter ID law could keep minority and young voters from the polls. Similarly, in 2012, in response to a state-level battle over early voting hours, Doug Preisse, chairman of Franklin County, Ohio’s Republican Party, told the Columbus Dispatch, “I guess I really actually feel we shouldn’t contort the voting process to accommodate the urban — read African-American — voter turnout machine.”

Those pushing these discriminatory vote suppression measures are increasingly saying the quiet part out loud, openly acknowledging that the goal of the measures is to subtract voters — particularly voters of color — from the electorate. In one instance a few months ago, an Arizona legislator made headlines when he said that he did not think everyone should vote.<sup>92</sup> “Quantity is important but we have to look at quality as well,” said Rep. John Kavanaugh.<sup>93</sup> Meanwhile, Texas bill SB7 (poised to pass in the coming days) originally included language that it was meant to

protect the “purity of the ballot box,” a phrase from the state’s constitution used to justify all-white primaries in the Jim Crow era. It was removed only after it was called out during a contentious March 9 hearing on the bill.<sup>94</sup>

#### E. Racial Discrimination in Redistricting

Racial discrimination in redistricting is widespread and well-documented. During the 2010 redistricting cycle, discriminatory conduct occurred not only in 2011–2012, when most states and localities drew their new districts, but also after the *Shelby County* decision.

##### a. Statewide Redistricting

Early in the decade, a three-judge federal court denied preclearance of Texas’ congressional redistricting plan after finding not only that the plan resulted in “retrogression,” making it demonstrably harder for minority voters to effectively participate in elections, but also that the record contained “more evidence of discriminatory intent than we have space, or need, to address.”<sup>95</sup> For example, in one district, lawmakers “consciously replaced many of the district’s active Hispanic voters with low-turnout Hispanic voters in an effort to strengthen the voting power of [the district’s] Anglo citizens.”<sup>96</sup>

In a number of other states, maps were passed after *Shelby County* only later to be invalidated as discriminatory racial gerrymanders. Specifically, over the past five years, federal courts found that Alabama,<sup>97</sup> Virginia,<sup>98</sup> North Carolina,<sup>99</sup> and Texas<sup>100</sup> had engaged in illegal racial gerrymandering in violation of the Fourteenth Amendment in congressional or legislative redistricting. In North Carolina, for example, a federal court found that the redrawing of the state’s congressional map in 2011 was “a textbook example of racial predominance” that resulted in the

<sup>95</sup> *Texas v. United States*, 887 F. Supp. 2d 133, 161 n.32 (D.D.C. 2012) (denying preclearance of both Texas’ 2011 state house and congressional plans under Section 5).

<sup>96</sup> *Id.* at 155. Because Texas did not obtain preclearance in time for the 2012 elections, a federal court in San Antonio ordered changes to Texas’ congressional plan that included creation of an additional minority coalition district in the Dallas–Fort Worth region and changes to other districts to address the deliberate retrogression of the electoral power of communities of color. *Perez v. Abbott*, 253 F. Supp. 3d 864 (W.D. Tex. 2017).

<sup>97</sup> *Alabama Legis. Black Caucus v. Alabama*, 231 F. Supp. 3d 1026 (M.D. Ala. 2017) (finding that the use of race predominated in the drawing of 12 state legislative districts without sufficient justification).

<sup>98</sup> *Bethune-Hill v. Va. State Bd. of Elections*, 326 F. Supp. 3d 128, 180 (E.D. Va. 2018) (finding that the legislature failed to satisfy its burden to prove that the “predominant use of race was narrowly tailored to achieve a compelling state interest” in drawing 11 legislative districts); *Page v. Virginia State Bd. of Elections*, No. 13cv678, 2015 WL 3604029, at \*16 (E.D. Virginia 2015) (finding that defendants failed to show that the congressional plan was narrowly tailored to further Virginia’s interest in complying with the Voting Rights Act).

<sup>99</sup> *Covington v. North Carolina*, 316 F.R.D. 117, 165, 176 (M.D.N.C. 2016) *aff’d*, 137 S. Ct. 2211 (2017) (finding that “race was the predominant factor motivating the drawing of all challenged districts”); *Harris v. McRory*, 159 F. Supp. 3d 600, 627 (M.D.N.C. 2016) *aff’d sub nom. Cooper v. Harris*, 137 S. Ct. 1455 (2017) (finding that “race predominated in CD 1 and CD 12” and “defendants have failed to establish that this race-based redistricting satisfies strict scrutiny”).

<sup>100</sup> *Abbott v. Perez*, 138 S. Ct. 2305, 2335 (2018) (holding that “HD90 is an impermissible racial gerrymander”).

unconstitutional packing of Black voters into two districts.<sup>101</sup>

This discrimination has often been difficult to root out. In North Carolina, for example, a Brennan Center study found that the new congressional plan adopted by the state after the district court's racial gerrymandering ruling had virtually the same electoral effects as the original map.<sup>102</sup>

In several of the above-referenced states, racial discrimination in redistricting was also used by states as a tool for partisan gerrymandering. For instance, one Brennan Center study showed that North Carolina and Virginia's schemes to pack Black voters into congressional districts, which were later found to be racial gerrymanders, also functioned to maximize overall Republican seats.<sup>103</sup> Another Brennan Center study found that Texas's enacted 2011 congressional map would have given Republicans a four-seat advantage in the state's congressional delegation by failing to create any new electoral opportunities for fast-growing communities of color who had accounted for 90 percent of Texas' population gain between 2000 and 2010.<sup>104</sup>

The targeting of communities of color for partisan advantage is nothing new. Historically, both Democrats and Republicans have minimized the electoral power of communities of color in order to gain partisan advantages in map-drawing, particularly in the South, where there is continued residential segregation and a high correlation between race and political preference.<sup>105</sup> This discriminatory targeting is likely to continue—and be exacerbated—in the upcoming redistricting cycle in light of the Supreme Court's 2019 ruling that partisan gerrymandering claims are non-justiciable in federal court.<sup>106</sup>

#### **b. Local redistricting**

Racial discrimination in redistricting is also well-documented at the local level, both as it relates to the drawing of district lines as well as in the use of at-large elections. Since *Shelby County* was decided, courts have found numerous instances where Section 2 of the Voting Rights Act was violated in connection with county and municipal redistricting—including in Kern County,

<sup>105</sup> Michael Li & Laura Royden, *Minority Representation: No Conflict with Fair Maps*, Brennan Center for Justice, 3 (2017), [https://www.brennancenter.org/sites/default/files/2019-09/Minority-Representation-Analysis\\_0.pdf](https://www.brennancenter.org/sites/default/files/2019-09/Minority-Representation-Analysis_0.pdf). Prior to the 1990s, Democrats in the South strategically divided Black communities among districts in order to protect white Democratic incumbents and prevent election of Republicans. *Id.*

<sup>106</sup> *Rucho v. Common Cause*, 139 S. Ct. 2484 (2019).

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

California;<sup>107</sup> Virginia Beach, Virginia;<sup>108</sup> East Ramapo Central School District, New York;<sup>109</sup> Sumter County, Georgia;<sup>110</sup> Ferguson-Florissant School District, Missouri;<sup>111</sup> Albany County, New York;<sup>112</sup> and Yakima, Washington.<sup>113</sup>

Similarly, a review by the Brennan Center of preclearance letters issued by the Department of Justice from 2010 onward identified at least 13 instances where the Department denied preclearance to a proposed redistricting plan at the county or municipal level.<sup>114</sup> For example, Green County, Georgia enacted a redistricting plan for its Board of Commissioners and Board of Education that eliminated both of the county’s Black ability-to-elect districts, which the Department of Justice concluded was “unnecessary and avoidable.”<sup>115</sup>

More recently, in the aftermath of *Shelby County*, both Galveston County, Texas and Pasadena, Texas revived redistricting plans that had previously been blocked by the Department of Justice.<sup>116</sup> In Pasadena, a federal court later found that the adoption of this plan, which changed how members of the city council were elected, had been motivated by discriminatory animus.<sup>117</sup>

**c. Attempts to Manipulate Who Counts in Redistricting**

In recent years, there has also been a concerted effort, led by prominent conservative activists and donors, to persuade states and local governments to exclude children and non-citizens from the population base used to draw electoral districts, drawing on a 2016 Supreme Court decision that left open the question of whether drawing districts based on something other than total population would be constitutionally permitted.<sup>118</sup> There is strong evidence that the goals of this effort are explicitly discriminatory. Thomas Hofeller, a leading Republican redistricting strategist who helped draw maps after the 2010 census in Alabama, Florida, North Carolina, and Texas that were later struck down by courts as discriminatory, wrote in a memo made public after his death

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

that drawing districts on the basis of adult citizens would be “advantageous to Republicans and non-Hispanic Whites [sic].”<sup>119</sup>

The most advanced of these efforts to change the population basis used to draw districts has been in Missouri. Lawmakers behind a recently adopted constitutional amendment contend that the amendment would allow the state to draw legislative districts based only on the adult citizen population.<sup>120</sup> Lawmakers and political consultants in Texas, Arizona, Florida, and Tennessee have also reportedly explored drawing legislative districts on the basis of adult citizens in the upcoming redistricting cycle.<sup>121</sup>

Even if the Supreme Court holds that drawing districts based on a subset of the population rather than total population is permitted under the U.S. Constitution, courts have long recognized that these alternative schemes often have an impermissible discriminatory impact on communities of color.<sup>122</sup> What was true in the 1970s and 1980s is only truer now as the country has become more diverse, with a majority of children under 1 years old now non-white.<sup>123</sup>

Indeed, a recent Brennan Center study found that communities of color would bear the brunt of a change in Missouri, if effectuated.<sup>124</sup> Our analysis found that 28 percent of Missouri’s Black population, 54 percent of its Asian population, and 54 percent of its Latino population would go uncounted if only adult citizens were considered in redistricting. This is in comparison to only 21 percent of Missouri’s white population that would be excluded. The result would be that whiter, rural areas would gain representation, while districts with large Black and sizeable Latino population in the Kansas City and St. Louis areas would need to be significantly reconfigured. Specifically, three of the four majority-Black senate districts in Missouri would be underpopulated under adult citizen apportionment.<sup>125</sup> The impact in other more diverse and demographically younger states, like Texas, would be even more extreme.

## II. The Need for a New Voting Rights Act

The passage of the VRA in 1965 was a major step in addressing and remedying our country’s long history of racialized vote suppression. It delivered on the promise made at the

passage of the 15th Amendment that Americans should be free from racial discrimination when voting. It provided safeguards to block new and mutating forms of vote suppression and the teeth to enforce those protections. Without these mechanisms over the last 8 years, discriminatory voting laws have proliferated. The VRAA would restore and modernize the protections against race discrimination that existed pre-*Shelby*, and move us closer to voting equality.

#### A. Preclearance Was an Effective Tool Against Discrimination in the Voting Process

The VRA's pre-*Shelby* preclearance requirement was highly successful in stopping voting discrimination in covered jurisdictions. It prevented discriminatory laws and practices from going into effect and deterred states from adopting new ones. Between 1998 and 2013, Section 5 blocked 86 discriminatory changes, including 13 in the 18 months before *Shelby County*.<sup>126</sup> It prompted jurisdictions to withdraw hundreds of potential discriminatory changes, and it dissuaded them from offering even more such changes in the first place.<sup>127</sup> The Supreme Court acknowledged in *Shelby County* that the VRA, when fully in force between 1965 and 2006, "proved immensely successful at redressing racial discrimination and integrating the voting process."<sup>128</sup>

Without Section 5 preclearance, there is no longer an adequate check against discriminatory laws and practices. The policies implemented in the immediate aftermath of the *Shelby County* decision make clear that Section 5 was holding back discriminatory measures. Within hours of the Court's decision, Texas moved forward with implementing what was then the nation's strictest voter identification law, a law that had been previously denied preclearance because of its discriminatory impact.<sup>129</sup> Mississippi announced that it would move to implement its voter ID law—which had been held up in preclearance review—the same day the Court's decision was handed down.<sup>130</sup> The state had also previously submitted the policy for preclearance but had not obtained approval to implement it.<sup>131</sup> The day after the *Shelby County* decision, Alabama moved forward with its strict voter ID law, after having postponed submitting it for preclearance for almost two years.<sup>132</sup> And within two months after *Shelby County*, North Carolina enacted a law that imposed a strict photo ID requirement, cut back on early voting, and reduced the window for voter registration. The state legislature had initially been considering a narrower voter ID bill, but after the decision, a state senator admitted publicly, "now we can go with the full bill," rather than less a restrictive version.<sup>133</sup>

<sup>131</sup> Tomas Lopez, '*Shelby County*: One Year Later', Brennan Center for Justice (June 24, 2014), <https://www.brennancenter.org/our-work/research-reports/shelby-county-one-year-later>.

<sup>132</sup> *Id.*

<sup>133</sup> *Id.*

The experience of Pasadena, Texas, where the Latino population increased from 19 percent in 1990 to more than 48 percent in 2010, is illustrative. Prior to *Shelby County*, the City of Pasadena had an eight-member city council, all elected from single-member districts.<sup>134</sup> Only days after *Shelby County*, the City began a process to change the composition of the council so that two members would be elected from at large districts. When asked why he was pushing the change, the City's mayor told reporters "because the Justice Department can no longer tell us what to do."<sup>135</sup> A federal judge later found that adoption of the arrangement had been motivated by discriminatory animus toward the city's fast-growing and increasingly politically effective Latino community.<sup>136</sup>

The implication is clear: Section 5 shielded voters from retrogressive laws designed to limit voting rights. Since *Shelby County*, voters of color have disproportionately suffered under the laws implemented. With discriminatory voting practices proliferating in many states, this strong tool is again needed.

#### **B. Preclearance Is a More Effective Tool Than After-the-Fact Litigation**

Section 2 of the VRA, which allows private parties and the Justice Department to challenge discriminatory voting practices in court, remains in effect after *Shelby*, but it is no substitute for preclearance.

First, litigation is a far lengthier and more expensive process than preclearance, and lawsuits often do not yield results for voters until after an election is over.<sup>137</sup> Too often, this means that elections are conducted under a discriminatory law. The votes lost in those tainted elections cannot be reclaimed.

Our longstanding lawsuit against Texas' voter ID law, discussed above, illustrates this point.<sup>138</sup> After the state passed the law, the Department of Justice objected to it,<sup>139</sup> and a three-judge federal court prevented the state from implementing it.<sup>140</sup> That decision, however, was vacated after *Shelby County*, leading to years of litigation. Every court that considered the law found it to be discriminatory<sup>141</sup> (and a federal district court found that it was intentionally discriminatory),<sup>142</sup> but the law remained in effect until a temporary remedy was put in place for the

<sup>142</sup> *Veasey v. Perry*, 71 F. Supp. 3d 627, 698-704 (S.D. Tex. 2014). The Court determined that the law had a discriminatory purpose under Section 2 of the VRA and the 14<sup>th</sup> and 15<sup>th</sup> Amendments because "racial discrimination was a motivating factor" in its passage. It reached this determination by looking at several factors. First, in six years of debate, no impact study or analysis was conducted to determine whether it would impair minority voting rights, despite legislative opponents' demands for one. Second, proponents of the law also departed from normal legislative procedure

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

November 2016 election.<sup>143</sup> In the meantime, Texans were forced to vote in several hundred federal, statewide, and local elections under discriminatory voting rules.<sup>144</sup> There are other examples of litigation victories well after voters suffered injury; for example, a challenge to the Alabama voter ID law mentioned above was filed on December 15, 2015.<sup>145</sup> The law was upheld by the Eleventh Circuit, which granted summary judgement to the state of Alabama, in July 2021.<sup>146</sup>

Litigation is also inferior to preclearance because courts have used the Supreme Court's so-called *Purcell* doctrine to deny relief when it is most needed—right before an election.<sup>147</sup> The *Purcell* doctrine provides that courts should avoid changing election rules in the period right before an election because of the possibility of voter confusion and administrative difficulty. Under the doctrine, dozens of court rulings that removed barriers to voting during the pandemic were reversed in 2020, creating a perverse incentive for wrongdoers to adopt discriminatory changes close to an election to avoid judicial oversight. Preclearance would negate the opportunity to abuse this doctrine.

Moreover, the effectiveness of voting rights litigation can be seriously undermined in the future because of new and growing efforts within states to make it harder to challenge discriminatory voting laws in courts. A recent Brennan Center study found that state lawmakers in 26 states have introduced legislation targeting courts and threatening judicial independence; in 8 of those states, legislators have specifically targeted election cases.<sup>148</sup>

### C. The VRAA Will Thwart or Mitigate Future Discriminatory Voting Laws, Policies and Practices

The VRAA is designed to respond to the discriminatory practices I have described today, in a way that is responsive to the Supreme Court's concerns. Notably, through its “geographic coverage” provisions, it modernizes the formula used to determine which jurisdictions will be subject to preclearance, drawing on a recent history of discrimination in voting. This updated formula targets discrimination as it exists in 2021.

---

to pass it, instead saying there was an “emergency” that required immediate resolution. Third, the law did not actually directly address the problems it claimed to address. For example, to fight non-citizen voting, the law approved the use of a small number of IDs, including some legally issued to non-citizens. Fourth and fifth, legislative history and contemporaneous statements showed that the bill’s proponents understood the impact the law would have on minority voters. Additionally, the Court found that the law produced a discriminatory result in violation of Section 2 of the VRA and constituted an unconstitutional poll tax.

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

In addition, the VRAA introduces limits on measures that have historically been used to discriminate against voters of color.<sup>149</sup> This “known practices” provision uses the wealth of evidence accrued since passage of the original VRA to identify categories of changes that will be always subject to preclearance when made in jurisdictions that meet minority population thresholds. A report by the Mexican American Legal Defense and Educational Fund, Asian Americans Advancing Justice, and NALEO Educational Fund found that nearly two-thirds of preclearance denials between 1990 and 2013 related to changes in methods of election, redistricting, annexations, polling place relocations, and interference with language assistance.<sup>150</sup> Each of these types of laws, and several others, would be covered under the VRAA.

The VRAA also provides for notice to be given to the public when certain election changes are made in close proximity to federal elections, restores the federal observer program, and makes it easier for those challenging discriminatory voting laws in court to obtain relief.

These provisions are more than justified and well-tailored to the record of discrimination before Congress. In requiring preclearance in the places with greatest record of discrimination and for the measures most likely to be discriminatory, the VRAA “link[s] coverage to the devices used to effectuate discrimination and to the resulting disenfranchisement,” as the Supreme Court in *Shelby County* said the Voting Rights Act must.<sup>151</sup> The bill is well equipped to attack the kinds of discriminatory practices we have seen implemented over the last few years.

For more than fifty years, the VRA has been a principal engine of voting equality in our country. Congress has repeatedly recognized its importance and effectiveness, as well the ongoing need for its protections. Since its initial passage in 1965, Congress reauthorized, updated, and expanded the VRA four times.<sup>152</sup> The law has always enjoyed broad bipartisan support. In 2006, Congress reauthorized the law’s preclearance provisions with unanimous support in the Senate and overwhelming bipartisan support in the House.<sup>153</sup> It should do so again. The American public, across all demographic groups, strongly supports the VRA; according to a 2014 poll, 81 percent of voters support the Act, and 69 percent support restoring it.<sup>154</sup> The VRAA is the best vehicle for accomplishing this.

#### D. Nationwide Preclearance Is Not a Viable Approach

Some have suggested that the VRAA should be replaced with a bill that institutes

<sup>149</sup> Voting Rights Advancement Act, H.R. 4, 116<sup>th</sup> Cong. §4(b) (2019).

<sup>154</sup> Press Release, Leadership Conf. on Civ. and Hum. Rts., *New Voting Rights Act Polling Shows Strong Bipartisan Support Nationwide* (Sept. 30, 2014), <https://civilrights.org/2014/09/30/new-voting-rights-act-polling-shows-strong-bipartisan-support-nationwide/>.

nationwide preclearance for all voting changes. That novel proposal contemplates a powerful tool against voting discrimination across the country; unfortunately, it is not viable. The current approach—a modern geographic coverage formula for preclearance coupled with coverage of designated practices known to be discriminatory—is better tailored to address modern threats to voting, consistent with the Supreme Court’s guidance. Any gaps can and should be addressed through other legislative tools.

First, as discussed above, the current approach in the VRAA has been carefully designed to meet the conditions the Supreme Court articulated for congressional legislation enforcing the 14<sup>th</sup> and 15<sup>th</sup> Amendments. It is closely tailored to a wealth of evidence of modern discrimination in the voting process—including evidence presented before this Committee. As a result, I am confident that it is an appropriate exercise of Congress’s enforcement clause powers and will survive constitutional attacks.

There is strong reason to fear, on the other hand, that a nationwide preclearance approach would not survive a constitutional challenge before the current Supreme Court. Although the 14<sup>th</sup> and 15<sup>th</sup> Amendments were intended to give Congress broad powers to craft legislation to remedy and prevent discrimination in the voting process, the Supreme Court has interpreted that power more narrowly with respect to preclearance. Specifically, it has made clear that there needs to be a strong justification for Congress either to require states to submit proposed legislation for preclearance, or to treat states differently from one another.<sup>155</sup> To justify preclearance, the Court has further required Congress to develop a detailed record that provides strong evidence that the requirement targets real and current threats of unconstitutional discrimination in the voting process. Congress has done so with respect to jurisdictions and practices with a recent history of discrimination. Unfortunately, it would be extremely difficult for Congress to make a similar showing with respect to every voting jurisdiction and every voting practice nationwide. As Harvard Law School Professors Guy Uriel Charles and Lawrence Lessig wrote in a recent essay, a nationwide preclearance approach would therefore “certainly fail the Supreme Court’s test,” at least under the current Court.<sup>156</sup>

Second, it would be difficult to administer a nationwide preclearance program, at least without a substantial expansion of capacity in the Department of Justice and the federal courts. What is more, the VRAA already includes new provisions that apply nationwide: the “known practices” provisions that require all jurisdictions that meet certain population thresholds to submit for preclearance any voting changes that fall within a list of practices Congress determined to be discriminatory. This provision has been closely tailored to address the strong evidence of discrimination before Congress.

To be clear, even if it were feasible, nationwide preclearance would not obviate the need for further congressional legislation to combat recent attacks on Americans’ freedom to vote. As explained below, the preclearance requirement is extremely powerful, but standing alone, it will not address the full range of the vote suppression problem facing the country. More would still be needed.

### III. The VRAA and the For the People Act

Although passing the VRAA is critical to protecting American voters, it is not enough. To fully protect voters and stop the current wave of voter suppression in the states, Congress must also pass and send to President Biden for his signature the For the People Act, comprehensive democracy reform legislation designated as H.R. 1 in the House and S. 1 in the Senate.

Division A of the For the People Act—which derives from the federal Voter Empowerment Act written and long championed by Rep. John Lewis<sup>157</sup>—would set a basic federal foundation for voting access to fill critical gaps the VRAA cannot fully address. It would require states to modernize voter registration, including instituting same-day and automatic voter registration, along with strong protections to keep eligible voters from being purged from the rolls. It would also require states to allow two weeks of early voting (including on weekends) and no excuse voting by mail. And it would restore voting rights to formerly incarcerated citizens once they complete their sentences, increase legal protections against voter intimidation and deceptive practices intended to suppress the vote, and take a variety of other steps to protect the freedom to vote. Finally, it would ban partisan gerrymandering and take other steps to protect racial and language minorities in the congressional redistricting process. All of these provisions and many others are summarized in the Brennan Center’s online annotated guide to the bill.<sup>158</sup> (Divisions B and C of the For the People Act contain much needed campaign finance and ethics reforms, which the Brennan Center also strongly supports.<sup>159</sup>)

The VRAA and the For the People Act address different facets of the problem of voter suppression. The VRAA focuses on race discrimination in voting and would restore and update the federal preclearance process. Its protections are largely prospective; they mostly cover *changes* in voting rules. Thus, a restrictive bill passed before the VRAA’s enactment would not be covered. The For the People Act would, on the other hand, override previously-enacted state laws and previously-adopted practices to the extent that they conflict with its provisions.

Moreover, the VRAA’s preclearance process is by its nature targeted, and it would not apply to every voting change in every jurisdiction. Its geographic coverage depends on statutory triggers that turn on the existence of documentary evidence of voting discrimination, such as successful lawsuits or consent decrees.<sup>160</sup> This means that places without a significant recent history of trying to restrict access to the ballot will not be covered until the violations add up.<sup>161</sup>

<sup>161</sup> For instance, in Iowa and Montana, both states that have long sought to making voting accessible, legislators have

BRENNAN CENTER FOR JUSTICE  
APPENDIX B

Some jurisdictions that have in recent years restricted access to voting, like Wisconsin and Ohio, have never previously been subject to preclearance.<sup>162</sup> Unfortunately, attacks on voting rights are becoming increasingly common even in places that do not have a history of discrimination. The For the People Act fills those gaps since all of its provisions apply nationwide.

Finally, preclearance does not cover all discriminatory practices—including those that discriminate on bases other than race, such as laws targeting student voters. It also has not been effective at combatting increasingly common partisan and racial gerrymandering that targets communities of color based on their real or perceived voting patterns, at least when those gerrymanders did not reduce the number of districts where communities of color could elect their preferred candidates.<sup>163</sup> By banning partisan gerrymandering by statute, the For the People Act would help ensure that communities of color are not used as a tool for partisan advantage. Preclearance also depends on the willingness and ability of the Department of Justice to fully enforce the Voting Rights Act. While that has historically been a priority in both Democratic and Republican administrations, there have been instances where even blatantly discriminatory laws were precleared.<sup>164</sup>

The For the People Act’s safeguards provide another critical backstop against vote suppression. According to the Brennan Center’s analysis, it would preempt many of the worst restrictive voting bills being proposed and enacted in states across the country this year.<sup>165</sup> Its protections would make it easier for everyone to vote, and virtually all of them address barriers that disproportionately affect Black, Latino, and Asian voters.

---

recently enacted a number of new restrictions, including tighter identification requirements in both states, limits on early voting in Iowa, and elimination of same-day voter registration in Montana. <sup>163</sup> See *Annotated Guide to the For the People Act of 2021*, Tit. II, subtit. E, Brennan Center for Justice (Mar. 18, 2021), <https://www.brennancenter.org/our-work/policy-solutions/annotated-guide-people-act-2021>.

<sup>164</sup> For instance, in 2005 political appointees at the Justice Department overruled career staff in the Civil Rights Division and precleared Georgia’s new voter identification requirements, despite abundant evidence that they would disproportionately harm voters of color. See Dan Eggen, *Criticism of Voting Law Was Overruled*, Washington Post (Nov. 17, 2005) [https://www.washingtonpost.com/wp-dyn/content/article/2005/11/16/AR2005111602504\\_pf.html](https://www.washingtonpost.com/wp-dyn/content/article/2005/11/16/AR2005111602504_pf.html).

<sup>165</sup> Gareth Fowler et al., *Congress Could Change Everything*, Brennan Center for Justice (Apr. 1, 2021), <https://www.brennancenter.org/our-work/research-reports/congress-could-change-everything>.

None of this is to deny the critical importance of the Voting Rights Act—a necessary and proven tool to combat persistent discrimination in voting. (The For the People Act itself contains findings reaffirming Congress’s commitment to restore the Voting Rights Act by passing the VRAA.<sup>166</sup>) Indeed, no single bill—not even a bill as comprehensive as the For the People Act—could envision and preempt every discriminatory voting restriction a state or locality might seek to pass. The VRAA ensures that Americans will still be protected from discriminatory voting changes that Congress did not foresee or include in the For the People Act. Both laws are necessary to guarantee all Americans a baseline level of voting access, free from discriminatory efforts to block their path to the voting booth or dilute or nullify their votes.

#### IV. Conclusion

Recent federal elections make clear that discriminatory voter suppression is an ongoing problem—a problem that will not subside without congressional action. The John Lewis Voting Rights Advancement Act will provide a powerful tool to combat discriminatory measures that inhibit voting rights for individuals across the country. And the For the People Act will establish baseline national rules for voting access for all Americans—rules that cannot be manipulated for discriminatory reasons or partisan gain. We urge Congress to act quickly and enact these historic pieces of legislation.

BRENNAN  
CENTER  
FOR JUSTICE

VOTER PURGES

Myrna Pérez

## **ABOUT THE BRENNAN CENTER FOR JUSTICE**

The Brennan Center for Justice at New York University School of Law is a non-partisan public policy and law institute that focuses on fundamental issues of democracy and justice. Our work ranges from voting rights to redistricting reform, from access to the courts to presidential power in the fight against terrorism. A singular institution – part think tank, part public interest law firm, part advocacy group – the Brennan Center combines scholarship, legislative and legal advocacy, and communications to win meaningful, measurable change in the public sector.

## **ABOUT THE BRENNAN CENTER'S VOTING RIGHTS AND ELECTIONS PROJECT**

The Voting Rights and Elections Project works to expand the franchise, to ensure that every eligible American can vote, and to ensure that every vote cast is accurately recorded and counted. The Center's staff provides top-flight legal and policy assistance on a broad range of election administration issues, including voter registration systems, voting technology, voter identification, statewide voter registration list maintenance, and provisional ballots.

© 2008. This paper is covered by the Creative Commons "Attribution-No Derivs-NonCommercial" license (see <http://creativecommons.org>). It may be reproduced in its entirety as long as the Brennan Center for Justice is credited, a link to the Center's web page is provided, and no change is imposed. The paper may not be reproduced in part or altered in form, or if a fee is charged, without the Center's permission. Please let the Brennan Center for Justice know if you reprint.

**ABOUT THE AUTHOR**

Myrna Pérez is counsel for the Democracy Program at the Brennan Center for Justice, focusing on a variety of voting rights and election administration issues including the Brennan Center's efforts to restore the vote to people with felony convictions. Prior to joining the Center, Ms. Pérez was the Civil Rights Fellow at Relman & Dane, a civil rights law firm in Washington, D.C. A graduate of Columbia Law School and the Harvard Kennedy School of Government, Ms. Pérez clerked for the Honorable Anita B. Brody of the United States District Court for the Eastern District of Pennsylvania and for the Honorable Julio M. Fuentes of the United States Court of Appeals for the Third Circuit.

**ACKNOWLEDGMENTS**

The author would like to thank the Brennan Center's Wendy Weiser, Michael Waldman, Fritz Schwarz, Erika Wood, Adam Skaggs, Jennifer Rosenberg, Liz Budnitz, Justin Levitt, Susan Lehman, Maggie Barron, Thaddeus Kromelis, Margaret Chen, Jonathan Blitzer, Jafreen Uddin, Monique Chase, and Laura Seago, as well as Carla Small, Arielle Saposh, Andrew Allison, David Wake, Amalea Smirneopolis, and Kathleen Wells for their helpful assistance. The Brennan Center for Justice sincerely appreciates the assistance and cooperation of the election officials and advocates who allowed themselves to be interviewed for this report, and gratefully extends our thanks.

The Center thanks the Bullitt Foundation, the Carnegie Corporation, the Charles H. Revson Foundation, the Educational Foundation of America, the Ford Foundation, the Irving Harris Foundation, the JEHT Foundation, the Joyce Foundation, the Mitchell Kapor Foundation, the Open Society Institute, the Rockefeller Family Fund, the Tides Foundation, and the Wallace Global Fund for the generous support that made this paper possible. The statements made and the views expressed in this paper are solely the responsibility of the Brennan Center.

## EXECUTIVE SUMMARY

Voter registration lists, also called voter rolls, are the gateway to voting. A citizen typically cannot cast a vote that will count unless her name appears on the voter registration rolls. Yet state and local officials regularly remove — or “purge” — citizens from voter rolls. In fact, thirty-nine states and the District of Columbia reported purging more than 13 million voters from registration rolls between 2004 and 2006.<sup>1</sup> Purges, if done properly, are an important way to ensure that voter rolls are dependable, accurate, and up-to-date. Precise and carefully conducted purges can remove duplicate names, and people who have moved, died, or are otherwise ineligible.

Far too frequently, however, eligible, registered citizens show up to vote and discover their names have been removed from the voter lists. States maintain voter rolls in an inconsistent and unaccountable manner. Officials strike voters from the rolls through a process that is shrouded in secrecy, prone to error, and vulnerable to manipulation.

While the lack of transparency in purge practices precludes a precise figure of the number of those erroneously purged, we do know that purges have been conducted improperly before. Over the past several years, every single purge list the Brennan Center has reviewed has been flawed. In 2004, for example, Florida planned to remove 48,000 “suspected felons” from its voter rolls. Many of those identified were in fact eligible to vote.<sup>2</sup> The flawed process generated a list of 22,000 African Americans to be purged, but only 61 voters with Hispanic surnames, notwithstanding Florida’s sizable Hispanic population. To compound the problem, the purge list over-represented African Americans and mistakenly included thousands who had had their voting rights restored under Florida law.<sup>3</sup> Under pressure from voting rights groups, Florida ordered officials to stop using the purge list.<sup>4</sup> To compound the problem, the purge list over-represented African Americans and mistakenly included thousands who had had their voting rights restored under Florida law.

In New Jersey in 2005, the Brennan Center worked with a political science professor to analyze a purge list prepared by a political party using “matching” techniques. We found that the list was compiled using a number of faulty assumptions and that it would have harmed eligible voters if used as the basis for a purge. In 2006, the Secretary of State of Kentucky attempted to purge the state’s rolls based on a flawed attempt to identify voters who had moved from Kentucky to neighboring South Carolina and Tennessee. A resulting lawsuit uncovered the fact that eligible voters who had not, in fact, moved out of the state of Kentucky were caught up in the purge; a state court ordered the state to reverse the purge.

The purges reviewed for this report give no greater grounds for comfort. While the reasons vary from state to state, no state reviewed in this report uses purge practices or procedures that are free from risk of error or manipulation, that have sufficient voter protections, or that have adequate procedures to catch and correct errors.

**APPENDIX C**

The secret and inconsistent manner in which purges are conducted make it difficult, if not impossible, to know exactly how many voters are stricken from voting lists erroneously. And when purges are made public, they often reveal serious problems. Here are a few examples recent examples:

- In Mississippi earlier this year, a local election official discovered that another official had wrongly purged 10,000 voters from her home computer just a week before the presidential primary.
- In Muscogee, Georgia this year, a county official purged 700 people from the voter lists, supposedly because they were ineligible to vote due to criminal convictions. The list included people who had never even received a parking ticket.
- In Louisiana, including areas hit hard by hurricanes, officials purged approximately 21,000 voters, ostensibly for registering to vote in another state. A voter could avoid removal if she provided proof that the registration was cancelled in the other state, documentation not available to voters who never actually registered anywhere else.

**FINDINGS**

This report provides one of the first systematic examinations of the chaotic and largely unseen world of voter purges. In a detailed study focusing on twelve states, we identified four problematic practices with voter purges across the country:

**Purges rely on error-ridden lists.** States regularly attempt to purge voter lists of ineligible voters or duplicate registration records, but the lists that states use as the basis for purging are often riddled with errors. For example, some states purge their voter lists based on the Social Security Administration's Death Master File, a database that even the Social Security Administration admits includes people who are still alive.<sup>5</sup> Even though Hilde Stafford, a Wappingers Falls, NY resident, was still alive and voted, the master death index lists her date of death as June 15, 1997.<sup>6</sup> As another example, when a member of a household files a change of address for herself in the United States Postal Service's National Change of Address database, it sometimes has the effect of changing the addresses of all members of that household. Voters who are eligible to vote are wrongly stricken from the rolls because of problems with underlying source lists.

**Voters are purged secretly and without notice.** None of the states investigated in this report statutorily require election officials to provide public notice of a systematic purge or even individual notice to those voters whose names are removed from the rolls as part of the purge. Additionally, with the exception of registrants believed to have changed addresses, many states do not notify individual voters before purging them. In large part, states that do provide individualized notice do not provide such notice for all classes of purge candidates. For example, our research revealed that it is rare for states to provide notice when a registrant is believed to be deceased. Without proper notice to affected individuals, an erroneously purged voter will likely not be able to correct the error

before Election Day. Without public notice of an impending purge, the public will not be able to detect improper purges or to hold their election officials accountable for more accurate voter list maintenance.

**Bad “matching” criteria leaves voters vulnerable to manipulated purges.** Many voter purges are conducted with problematic techniques that leave ample room for abuse and manipulation. State statutes rely on the discretion of election officials to identify registrants for removal. Far too often, election officials believe they have “matched” two voters, when they are actually looking at the records of two distinct individuals with similar identifying information. These cases of mistaken identity cause eligible voters to be wrongly removed from the rolls. The infamous Florida purge of 2000 — conservative estimates place the number of wrongfully purged voters close to 12,000 — was generated in part by bad matching criteria.<sup>7</sup> Florida registrants were purged from the rolls

in part if 80 percent of the letters of their last names were the same as those of persons with criminal convictions.<sup>8</sup> Those wrongly purged included Reverend Willie D. Whiting Jr., who, under the matching criteria, was considered the same person as Willie J. Whiting.<sup>9</sup> Without specific guidelines for or limitations on the authority of election officials conducting purges, eligible voters are regularly made unnecessarily vulnerable.

---

NO EFFECTIVE NATIONAL STANDARD  
GOVERNS VOTER PURGES. THIS MAKES THE  
RISK OF BEING PURGED UNPREDICTABLE  
AND DIFFICULT TO GUARD AGAINST.

---

**Insufficient oversight leaves voters vulnerable to manipulated purges.** Insufficient oversight permeates the purge process beyond just the issue of matching. For example, state statutes often rely on the discretion of election officials to identify registrants for removal and to initiate removal procedures. In Washington, the failure to deliver a number of delineated mailings, including precinct reassignment notices, ballot applications, and registration acknowledgment notices, triggers the mailing of address confirmation notices,<sup>10</sup> which then sets in motion the process for removal on account of change of address. Two Washington counties and the Secretary of State, however, reported that address confirmation notices were sent when any mail was returned as undeliverable, not just those delineated in state statute. Since these statutes rarely tend to specify limitations on the authority of election officials to purge registrants, insufficient oversight leaves room for election officials to deviate from what the state law provides and may make voters vulnerable to poor, lax, or irresponsible decision-making.

**POLICY RECOMMENDATIONS**

No effective national standard governs voter purges; in fact, methods vary from state to state and even from county to county. A voter's risk of being purged depends in part on where in the state he or she lives. The lack of consistent rules and procedures means that this risk is unpredictable and difficult to guard against. While some variation is inevitable, every American should benefit from basic protections against erroneous purges.

Based on our review of purge practices and statutes in a number of jurisdictions, we make the following policy recommendations to reduce the occurrence of erroneous purges and protect eligible voters from erroneous purges.

*A. Transparency and Accountability for Purges*

States should:

- **Develop and publish uniform, non-discriminatory rules for purges.**
- **Provide public notice of an impending purge.** Two weeks before any county-wide or state-wide purge, states should announce the purge and explain how it is to be conducted. Individual voters must be notified and given the opportunity to correct any errors or omissions, or demonstrate eligibility before they are stricken from the rolls.
- **Develop and publish rules for an individual to prevent or remedy her erroneous inclusion in an impending purge.** Eligible citizens should have a clear way to restore their names to voter rolls.
- **Stop using failure to vote as a trigger for a purge.** States should send address confirmation notices only when they believe a voter has moved.
- **Develop directives and criteria with respect to the authority to purge voters.** The removal of any record should require authorization by at least two officials.
- **Preserve purged voter registration records.**
- **Make purge lists publicly available.**
- **Make purge lists available at polling places.** Purge lists should be brought to the polls on Election Day so that errors can be identified and pollworkers can find the names of erroneously purged voters and allow them to vote regular ballots.

**APPENDIX C***B. Strict Criteria for the Development of Purge Lists*

States should:

- **Ensure a high degree of certainty that names on a purge list belong there.** Purge lists should be reviewed multiple times to ensure that only ineligible voters are included.
- **Establish strict criteria for matching voter lists with other sources.**
- **Audit purge source lists.** If purge lists are developed by matching names on the voter registration list to names from other sources like criminal conviction lists, the quality and accuracy of the information in these lists should be routinely “audited” or checked.
- **Monitor duplicate removal procedures.** States should implement uniform rules and procedures for eliminating duplicate registrations.

*C. “Fail-Safe” Provisions to Protect Voters*

States should ensure that:

- **No voter is turned away from the polls because her name is not found on the voter rolls.** Instead, would-be voters should be given provisional ballots, to which they are entitled under the law.
- **Election workers are given clear instructions and adequate training as to HAVA’s provisional balloting requirements.**

*D. Universal Voter Registration*

States should:

- **Take the affirmative responsibility to build clean voter rolls consisting of all eligible citizens.** Building on other government lists or using other innovative methods, states can make sure that all eligible citizens, and only eligible citizens, are on the voter rolls.
- **Ensure that voters stay on the voter rolls when they move within the state.**
- **Provide a fail-safe mechanism of Election Day registration for those individuals who are missed or whose names are erroneously purged from the voter rolls.**

## I. INTRODUCTION

In 1959, the local Citizens Council, a white supremacist group with an organizational mission of maintaining racial segregation, together with a local election official removed 85% of the African American voters from the registration rolls of Washington Parish, Louisiana, under the guise of removing from the rolls all persons illegally registered.<sup>11</sup>

In 2007, almost 50 years after a court found that the Washington Parish purge was unconstitutional both in purpose and effect, election officials in Louisiana removed more than 21,000 people from the voter registration rolls, the majority from areas most devastated by Hurricane Katrina a year earlier.<sup>12</sup> Almost a third of those removed were from Orleans Parish,<sup>13</sup> which has a majority African American population.<sup>14</sup> A voter could avoid removal if she provided proof that the registration was cancelled in the other state, documentation not available to voters who never actually registered anywhere else.<sup>15</sup>

While we may be past the days in which election officials are complicit with those who intentionally seek to target persons of color for removal from the voter rolls, the way in which voter registration lists are maintained in this country may sometimes have a similar effect.<sup>16</sup>

Voter registration lists are the gateway to voting. In most instances,<sup>17</sup> a citizen can only vote and have her vote count if her name appears on the registration rolls. Yet officials regularly remove, or “purge,” citizens each day from voter registration lists.

In fact, at least 13 million people were purged from voter rolls between the close of registration for the 2004 federal general election and the close of registration for the 2006 federal general election. A voter has been “purged” if her registration status has changed such that she is no longer listed on the registration list as a person who is able to cast a regular ballot or a ballot that will be counted.

Dependable, accurate, and up-to-date voter registration lists increase the integrity of our elections in many ways. They let candidates and get-out-the-vote groups work more efficiently. Dependable lists also reduce confusion at the polls, make turnout numbers more precise and election misconduct easier to detect and deter. To the extent that they help insure that registration lists correctly reflect eligible registrants, precise, carefully conducted purges are important.

Unfortunately, many of the voter purges in this country are performed in a slipshod manner and leave ample room for abuse and manipulation. When purges go wrong, eligible voters are removed from the rolls, frequently with no notice or knowledge until they show up at the polls to vote.

---

WHEN PURGES GO WRONG, ELIGIBLE  
VOTERS OFTEN DISCOVER THEY HAVE  
BEEN KNOCKED OFF VOTER ROLLS  
ONLY WHEN THEY SHOW UP AT THE  
POLL TO VOTE—AND CAN’T.

---

This report examines what goes wrong with those purges, how voter purges are conducted, and how to minimize the risk that eligible voters will be incorrectly purged across the country. Our analysis is based on a review and examination of state statutes, regulatory materials, and news reports in the following twelve states, representing a cross-section of regions, election systems, and purge practices: Florida, Kentucky, Indiana, Michigan, Missouri, Nevada, New York, Ohio, Oregon, Pennsylvania, Washington, and Wisconsin. In five states — Kentucky, Missouri, Nevada, Ohio, and Washington — we also conducted extensive interviews with state and local election officials charged with the maintenance of voter registration lists.

Due to the secret nature of purges, it is difficult to know the full extent of the problem, or the exact number of people who have been wrongfully kept from voting. What we do know is that in the states studied, purge practices are unnecessarily secretive and in need of improvement. When purges are made public, they reveal serious problems. Given the margins by which elections are won, these purges matter greatly, and there is reason to believe that the number of people wrongfully purged makes a difference. There is no reason for purges to be kept secret — they undermine confidence in elections, and cast doubt on our concept of fairness.

The Brennan Center is dedicated to investigating the precise nature of these purges conducted behind closed doors. We encourage election officials, legislators, advocates and concerned members of the public to use this report to improve voter purge practices and ensure that the rights of eligible voters are not jeopardized.

## II. TYPES OF VOTER PURGES

Purges occur as part of a process of “list maintenance” that states and localities use to update and clean their voter registration lists. Depending on the state, purges are conducted by local officials, state officials, or both. Voters are generally purged on one of the following grounds: (1) changes of address, (2) death, (3) disenfranchising criminal conviction, (4) duplication of other records, (5) inactivity or failure to vote, and (6) mental incapacitation.

Three statutes provide the bulk of the few existing federal requirements and voter protections for conducting purges — the National Voter Registration Act of 1993 (“NVRA”), the Help America Vote Act of 2002 (“HAVA”), and the Voting Rights Act of 1965. Under the NVRA, any state purge practice must be “uniform, non-discriminatory, and in compliance with the Voting Rights Act of 1965.”<sup>18</sup> The NVRA also imposes certain limitations on election officials as to when and how registrants can be removed from the voter rolls on account of change of address,<sup>19</sup> which afford some protections against one type of purge. HAVA emphasizes that voter purges must be done in accordance with the NVRA,<sup>20</sup> and requires that the process for maintaining statewide computerized voter registration databases, which HAVA requires, include minimum standards of accuracy to ensure that registration records are accurate and regularly updated.<sup>21</sup>

**APPENDIX C**

Purges can be “systematic,” meaning that they are large-scale and done in an organized and pre-planned fashion, or they can be “routine,” meaning that they affect an individual voter and are based on individualized information. A systematic purge is one in which all people believed to be deceased are removed from the registration rolls; a routine purge is one in which a son brings his mother’s death certificate to the local registrar and asks that she be removed from the rolls. Routine purges can have serious consequences for individual voters, but given the sheer number of persons affected, it is especially important to ensure that systematic purges are done well, with adequate protections for affected voters.

This section examines the statutes, policies, and procedures employed by states and localities for purging voters, and explains the policy choices that may affect the ability of voters to cast ballots which count. The particulars of how purges are conducted reveal how purge practices vary dramatically from jurisdiction to jurisdiction, how there is also a lack of consistent protections for voters, and how there are opportunities for mischief in the purge process.

**A. CHANGE OF ADDRESS**

Twenty-nine million voting-age Americans move each year.<sup>22</sup> Accordingly, it is no surprise that changes of name and address accounted for 43% of all voter registration transactions for the time period between the close of the 1996 elections to right after the close of the 1998 elections.<sup>23</sup> From the close of the 2004 elections to the close of the 2006 elections, changes of name, address, and political party accounted for more than 30% of all voter registration transactions.<sup>24</sup>

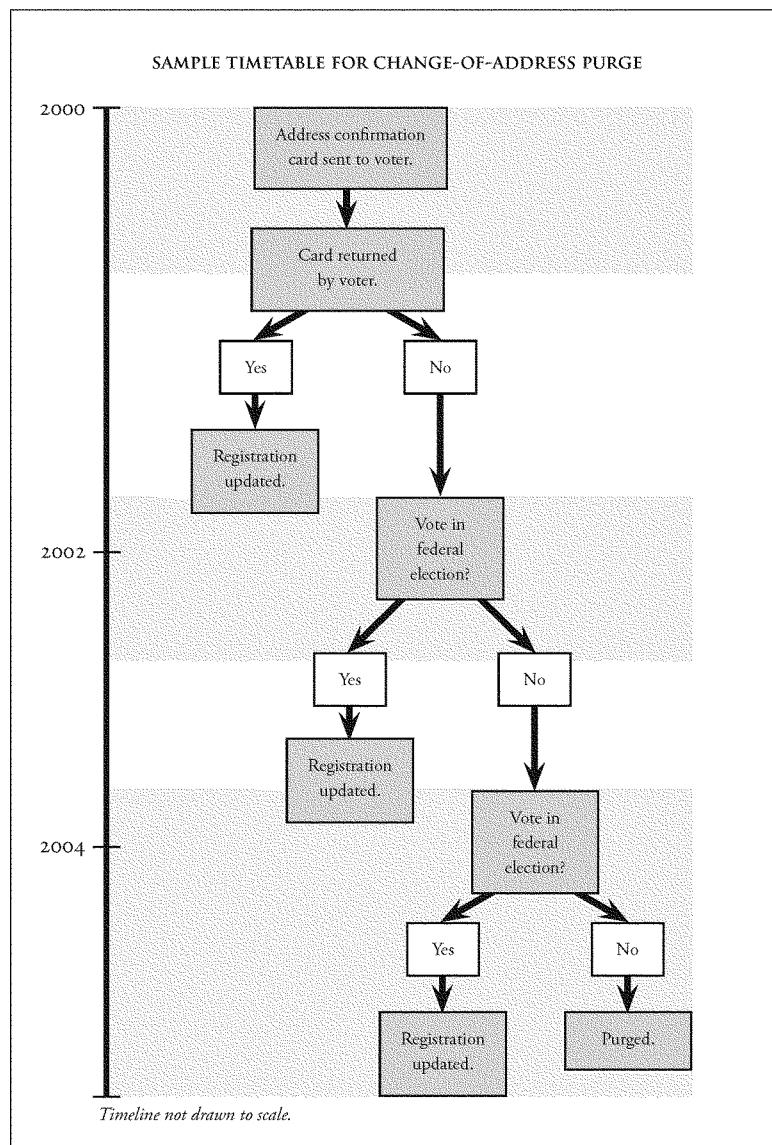

Election officials we interviewed reported that changes of address are the most difficult aspect of list maintenance.<sup>25</sup> A number of election officials believe that changes of address account for the bulk of duplicate registrations on the voter rolls<sup>26</sup> because people who have moved often re-register at their new places of residency without notifying election officials in their former places of residence of the address change.<sup>27</sup>

---

IF A JURISDICTION USES  
UNDELIVERABLE MAIL  
FROM A MASS MAILING  
AS THE SOLE BASIS FOR  
PURGING A VOTER, IT  
BREAKS FEDERAL LAW.

---

Under federal law, election officials may purge a registrant believed to no longer be a resident of the election jurisdiction if two conditions are satisfied. First, the registrant must fail to respond to an address confirmation notice from the relevant election office in the time period designated under state law. The notice must be sent by forwardable mail and include a postage prepaid, pre-addressed response card. Second, the registrant must fail to vote in two federal general elections following the mailing of the address confirmation notice.<sup>28</sup> The sending of these notices starts the running of the clock for the time period in which a person must vote in two subsequent federal general elections or be removed from the rolls in those states that conduct purges.<sup>29</sup>

In spite of this federal mandate, there are great discrepancies in the methods states and localities use to implement purges based on changes of address, including: differences in which events trigger the mailing of a notice seeking address confirmation; which information sources are used to identify registrants who have moved; how registrants' addresses are verified; and how officials proceed when a person does not respond to an address confirmation notices.

*1. Post Card Purges and other Triggers for Address Confirmation Notices*

The most common triggers causing a local election official to send an address confirmation notice include: the return of a mailing sent to the person from the election office; an acceptable source provides information suggesting that the person has moved; or the election office undertakes a program to verify addresses and finds an address that appears questionable.

In several states, officials are given the authority to send an address confirmation notice to a registrant if other undeliverable mail is returned to the election office in certain circumstances.<sup>30</sup> States, and even counties within states, vary in the type of mail that can trigger the mailing of a confirmation notice. Some states or counties will send an address confirmation notice based on the return of a mailing sent to all registered voters designed to ferret out bad addresses. This is sometimes referred to as a "canvass." In other jurisdictions, a wider array of undeliverable election mail may trigger the mailing of an address confirmation notice, such as absentee ballots, registration acknowledgement notices, and precinct reassignment notices.<sup>31</sup>

If a purge arises from a mass mailing, typically a non-forwardable postcard, it is referred to as a "post-card purge."<sup>32</sup> In some cases, a postcard mailing is part of a jurisdiction's canvassing efforts. When postcards are returned as undeliverable, the jurisdiction usually sends an address confirmation notice to the voter. If the voter does not respond to the notice and fails to vote in two subsequent federal elections, the voter can be lawfully purged from the voter registration list, provided that the removal does not take place within 90 days of a federal election. If a jurisdiction uses undeliverable mail from a mass mailing as the sole basis for purging a voter, it breaks federal law. A Michigan law is legally vulnerable on this ground because if the original "voter identification" card — the card sent to new registrants — is returned as undeliverable to the local clerk, the clerk cancels the registration.<sup>33</sup>

Although returned postcards from mass mailings probably form the most common basis for supposed changes of address, this kind of returned mail is not a reliable indicator that a person has moved for the reasons set forth below. Several of the factors that make this method unreliable affect voters in poor and minority communities more than those in other communities. Before presuming that returned mail means a person has moved, states and localities should consider the following sources of error:

**a. Voter registration lists suffer from typos and other clerical errors**

Mail sent to a listed registration address may be returned as undeliverable because of a typo or other data entry errors on the voter rolls. Large government databases are notoriously vulnerable to

such flaws.<sup>34</sup> One study found that as many as 26% of records in a Florida social service database included city names that were spelled differently from the same names on a master list, including more than 40 spelling variations of Fort Lauderdale, one of the largest cities in the state.<sup>35</sup> Address numbers and names may be mistyped or transposed. Portions of addresses apartment numbers or house numbers or directional indicators (e.g., S. Main St. or N. Main St.) may be dropped. Addresses may be entered incorrectly (e.g., 211-2 Main St. becomes 21 Main St.).

**b. A voter may not be listed on the mailbox of her residential voting address**

Mail sent to a listed registration address may be returned as undeliverable because the United States Postal Service does not know that the voter actually lives at the address listed. Couples, roommates, or family members may list only one or two members of the residential unit on the mailbox. Particularly when the unlisted members of the unit do not share the same surname as the listed member, the postal delivery person may simply presume that the individual in question does not live at the listed address.

**c. A voter may live at a non-traditional residence**

Mail sent to a listed registration address may be returned as undeliverable because the voter does not live at a traditional address. Homeless individuals, who have the right to register and vote in every state, are a prime example of this problem.<sup>36</sup> Depending on the law of the state, these citizens may list a homeless shelter or government building as their legal voting residence, even if the institution listed will not accept their mail.

**d. A voter may be temporarily away from her permanent residence**

Mail sent to a listed registration address may be returned as undeliverable because the voter is temporarily away from her permanent residence, and does not receive mail there. For example, an active duty member of the military may have difficulty receiving mail. In one notorious Louisiana case, a member of Congress who received her mail in Washington D.C. rather than at her home address in her district was challenged after a letter to her home was returned as undeliverable.<sup>37</sup>

**e. A voter's permanent mailing address may differ from her residential voting address**

Mail sent to a listed registration address may be returned as undeliverable because the voter receives mail elsewhere — at a post office box, for example. When individuals register to vote, they list their physical residences, but not all Americans receive mail at their residential addresses.

**f. Mail may not be properly delivered**

Sometimes, of course, mail sent to a listed registration address is returned as undeliverable because it was not delivered properly, through no fault of the voter.<sup>38</sup> Mail can be lost or misrouted, causing

it to be returned to the sender. Erratic mail problems can be quite significant. In the 1990 census, for example, the *New York Times* reported that “[a]lthough at least 4.8 million [census] forms were found to be undeliverable by the Postal Service, 1.8 million of those were later delivered by hand.”<sup>39</sup> Moreover, ineffective mail delivery is more common in poor and minority communities.<sup>40</sup>

**g. A voter’s street name may have changed**

Mail sent to a listed registration address may be undeliverable because the street name may have changed since the voter registered, even though the voter remains in the same residence. In Milwaukee in 2006, for example, when street addresses were checked against a postal service address program, city officials reviewing the list of discrepancies found that some addresses were flagged because of changes to the street names themselves.<sup>41</sup>

**h. A voter may refuse to accept certain mail**

Mail sent to a listed registration address may be undeliverable because the voter refuses to accept the piece of mail in question. There is no requirement that an individual accept a piece of mail offered for delivery, rather than sending it back with the delivery person. Catherine Herold of Ohio, for example, reported that she refused to accept delivery of a partisan mailing — which was returned undelivered and then used as purported evidence of her allegedly invalid registration.<sup>42</sup>

**i. A voter may have moved permanently, but nevertheless remains eligible to vote**

State rules differ as to when a voter who has moved must inform election officials of her new address. At a minimum, however, federal law provides that if a voter has moved within the same area covered by a given polling place — if, for example, a voter moves from one apartment to another within the same apartment complex — she may legitimately vote at that polling place even if she has not yet notified a registrar of her move.<sup>43</sup>

Federal law prohibits systematic purges within 90 days of an election.<sup>44</sup> Voter advocacy groups have criticized jurisdictions which have sent or have contemplated sending a mass mailing as the first step to confirm addresses when the initial mailing has taken place within 90 days of an election.<sup>45</sup> Mass mailings of this kind are inadvisable not only because undelivered mail is an unreliable indicator that a person has moved (as explained above), but also because of timing. Election officials are busiest in the 90 days preceding an election: they must process new registrations, update registration records, identify polling locations, prepare voting materials, and more. Without the time to exercise due care, data entry and other mistakes are more likely, subjecting eligible voters to the risk of a purge.

*2. Information Sources Used to Identify Registrants Who Have Moved*

Often voters do not tell election officials they have moved out of a jurisdiction, and so it is hard for officials to identify invalid records on voter registration lists. States, therefore, turn elsewhere to

identify voters who have moved. Given the NVRA's explicit authorization to do so, it is no surprise that states often rely heavily on information provided by the United States Postal Service, its licensees, and the USPS's National Change of Address database.<sup>46</sup> This method, though, has its own problems, including inaccuracies in postal service data and cost to election officials.<sup>47</sup> Some states use information gained in connection with jury notices and information from other departments, such as the bureau of motor vehicles to identify address changes.<sup>48</sup> For example, in Kentucky, one election official used information on changes of address for updating driver's licenses to update addresses in the voter registration list.<sup>49</sup>

In some states, individuals can provide information about someone else's change of address that is then acted upon by election officials. In Nevada, county clerks can send an address confirmation notice based on information gained from another voter or other "reliable person" who submits an affidavit stating that a particular voter has moved outside the county with the intent to abandon her residence.<sup>50</sup>

### *3. Address Verification Procedures*

Some state statutes permit broad canvasses to confirm voters' addresses. For example, some states allow local election officials to conduct door-to-door canvasses to find voters.<sup>51</sup> In actuality, however, a local election official we interviewed reported that this was not a widespread practice.<sup>52</sup>

Some state statutes permit localities to initiate their own efforts to identify registrants who have moved. In some cases, the acceptable methods are unspecified or unlimited. Missouri law grants election officials broad authority and wide latitude to verify a person's address. The statute reads, in relevant part: "[t]he election authority may investigate the residence or other qualifications of any voter at any time it deems necessary. The election authority shall investigate material affecting any voter's qualifications brought to its attention from any source, and such investigations shall be conducted in the manner it directs."<sup>53</sup>

### *4. Voter Classification After an Address Confirmation Notice is Sent*

While the details of the process differ, after sending address confirmation notices states tend to follow one of two schemes: states designate any voter who is sent an address confirmation notice as "inactive,"<sup>54</sup> while others do not designate a voter as "inactive" until after the voter fails to respond to the address confirmation notice in a timely matter.<sup>55</sup> This distinction is relevant because in some states, the voting experience of someone designated "inactive" may be different from, and more difficult than, that of an "active" voter. In Massachusetts, for example, inactive voters shoulder additional identification burdens when they show up to vote.<sup>56</sup> In Oregon, where all elections in the state are allowed to be conducted by mail, inactive voters are not statutorily required to be given ballots by mail.<sup>57</sup> Additionally, some polling stations are reported to have a list of inactive voters that is separate and apart from the active voter list. There is at least some anecdotal evidence that sometimes the lists of inactive voters are not available at the polling stations, putting inactive voters at a disadvantage when attempting to vote.

**APPENDIX C****B. DEATH**

Both HAVA and the NVRA address the removal of deceased voters from the voter rolls. Under the NVRA, states must make a “reasonable effort” to remove those who have died from the registration rolls.<sup>58</sup> HAVA directs each state to coordinate its voter registration database with state death records for the purposes of removing names of deceased persons from the voter rolls.<sup>59</sup>

Different agencies in different states maintain records of deaths, and so election officials get information about deceased registrants from varying sources. In some states, the department of health sends a list to election officials.<sup>60</sup> Elsewhere, local and state registrars or departments of vital statistics send a list of deceased persons to voting officials.<sup>61</sup> Still other states do not designate which agency is charged with providing information on decedents.<sup>62</sup>

Some states permit election officials to consider sources other than data from state agencies in gathering information on decedents. In some states, for example, election officials are permitted to use newspaper obituaries to identify deceased registrants.<sup>63</sup> In Washington State, a registrant may be removed from the registration rolls if another registered voter signs a statement of personal knowledge or belief that the registrant is deceased.<sup>64</sup> Elsewhere, state law authorizes the use of other sources, without specifying what sources may be considered.<sup>65</sup>

**C. DISENFRANCHISING CRIMINAL CONVICTIONS<sup>66</sup>**

State have a blizzard of varying laws regarding the voting rights of people with criminal convictions. Kentucky and Virginia permanently disenfranchise all people with felony convictions unless their rights are specifically restored by the government, while in Maine and Vermont, people with criminal convictions do not lose their voting rights at all — even prisoners are permitted to vote. Most state laws, however, fall somewhere in between those two positions.

Thirteen states and the District of Columbia automatically restore voting rights to formerly incarcerated persons upon their release from prison.<sup>67</sup> In contrast, eight states permanently disenfranchise citizens convicted of certain crimes unless the government approves individual rights restoration.<sup>68</sup> Five states allow probationers to vote and automatically restore the voting rights of persons with criminal convictions after release from prison and discharge from parole.<sup>69</sup> It is most common for a state to restore an individual's voting rights upon completion of his sentence, including prison, parole, and probation.<sup>70</sup>

Federal law provides little guidance or voter protections in this area. The NVRA permits states to purge people with felony convictions from the voter rolls consistent with state law.<sup>71</sup> HAVA requires states to “coordinate the computerized list with State agency records on felony status” to remove registrants made ineligible by criminal convictions.<sup>72</sup> As with other types of purges addressed in this report, state purge practices for people ineligible because of felony convictions are varied in numerous ways.

**APPENDIX C***1. Authority and Responsibility*

The responsibility for purging people with disenfranchising convictions differs from state to state. In some states, like Kentucky, the statutory responsibility rests with state election officials.<sup>73</sup> In other states, like Nevada, local officials are responsible.<sup>74</sup> There are also hybrid systems for removing people with disenfranchising convictions: in Washington, for example, local officials remove some people convicted of felonies while state officials remove others.<sup>75</sup> In Florida, local officials are required to conduct removals, but do so in accordance with information provided by state officials.<sup>76</sup> In other cases, state election law does not clearly delineate which officials are responsible for removing ineligible persons with felony convictions.<sup>77</sup>

*2. Sources of Information*

Under federal law, United States Attorneys are required to notify states' chief election officials of felony convictions in federal court.<sup>78</sup> State election officials, then, in turn notify relevant local election officials. In addition to the provision of information by U.S. Attorneys, some state statutes provide that election officials are to obtain information on people with disenfranchising convictions from a number of other sources.<sup>79</sup> State statutes, however, do not always provide clear guidance as to what sources election officials can rely on in gathering information about registrants rendered ineligible by criminal convictions.<sup>80</sup> Consequently, sources vary on a county-by-county basis.<sup>81</sup>

**D. DUPLICATE RECORDS**

Often when voters move within a state, they register to vote in a new neighborhood without canceling their registration in the old one. Or, accidentally, a voter can register from the same address multiple times. Federal law says that state systematic purge programs should screen for and eliminate duplicate names from the centralized state voter registration list. But the federal law gives no specific guidance on how states should identify such duplicate records, or what processes should be followed.<sup>82</sup> As a result, from state to state and county to county, officials remove duplicates in an inconsistent and confusing manner. There is not even any uniformity as to how duplicate registration records should be resolved once they are detected. For example, while a number of officials, when encountering what they presume to be duplicate registrations for the same person, presume that the more recent registration is the accurate one,<sup>83</sup> one election official in Michigan reported a practice of removing the newer registration when confronted with a duplicate.<sup>84</sup>

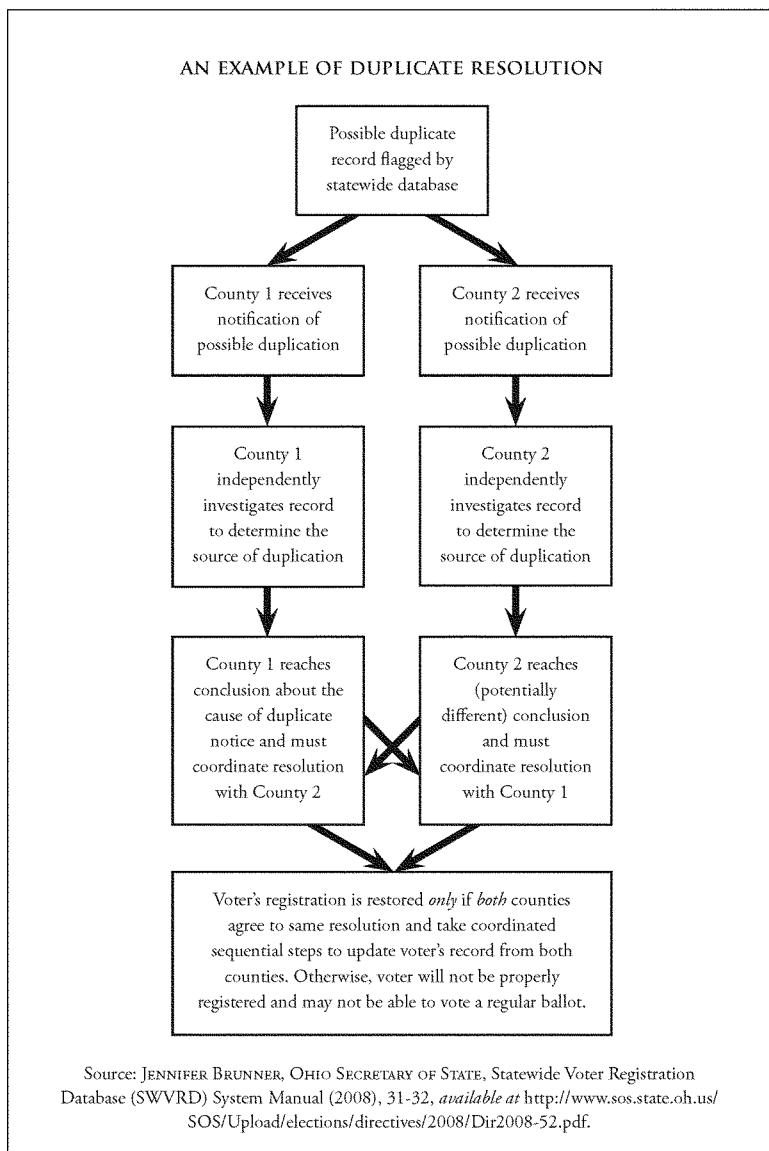

Given the errors and inconsistencies in the records on state voter rolls, it may be impossible to tell with certainty whether two records indeed refer to the same person and therefore are duplicates — unless the affected individuals are contacted and can confirm the duplication. States and localities therefore typically rely to some extent on approximation and assumptions, which may not be accurate in some circumstances.

Some statewide list maintenance programs identify potential duplicate records automatically, but rely on local election officials to sort through the flagged records. These registrars are supposed to

purge only actual duplicates, while leaving untouched any records falsely flagged as duplicates.<sup>85</sup> The process is often confusing and time-consuming. For example, Missouri law gives local election officials explicit authority to identify and remove duplicate records, but it does not specify how duplicates should be identified or what evidence is enough to remove a voter.<sup>86</sup> As a result, different county election officials in Missouri follow very different procedures for identifying duplicate records. In one county, election officials request confirmation from voters for possible duplicate records, and the duplicate record is purged if the voter does not respond or appear to vote in the following election.<sup>87</sup> In a different county, election officials simply flag possible duplicates and monitor for voting fraud but take no further action.

Most state statutes, in fact, offer very little guidance to local election officials and do not specify what identifying characteristics should be verified, or what degree of approximation is permitted.<sup>88</sup> One election official in Ohio stated that their ability to identify duplicates is further complicated by, among other things, name changes after marriage and poorly programmed registration software that slows down the process.<sup>89</sup> When local election offices become busy with processing large numbers of new registrations prior to elections, they tend to relax the level of scrutiny they pay to checking the accuracy of duplicate matches.<sup>90</sup>

Despite vague laws and scarce resources, local election officials reported increased pressure from state officials to “clean” the voter registration list of duplicate records.<sup>91</sup> Such pressure, in the absence of counterbalancing restrictions or guidelines, is likely in the future to result in larger numbers of improperly purged registrants.

**E. INACTIVITY/FAILURE TO VOTE**

Federal law explicitly states that a person cannot be purged merely for a failure to vote — a basic protection for registered voters who may only vote sporadically.<sup>92</sup> This protection ensures that a voter does not lose her right to vote simply because she chooses not to exercise that right in a particular election. Accordingly, federal law prevents election officials from relying on the fact that a voter has not voted for some time to conclude that she moved, died, or otherwise becomes ineligible and then to cancel her registration based on that conclusion.

Election officials are, however, permitted to remove voters pursuant to the NVRA's change of address process. Under the NVRA, states must send forwardable address confirmation notices to voters believed to have moved with a postage prepaid and pre-addressed response card to either confirm a continuing address or update the state with a new address. If the card is not returned, the state cannot remove the voter unless the voter not only does not return the card confirming her address, but also does not vote in at least one of the two general federal elections following the notice's mailing.<sup>93</sup>

*1. Inadequate Guidance*

Voters who have not voted for a designated period of time, or have not responded to an address confirmation notice, nor presented themselves to vote in the subsequent elections are often referred to as "inactive voters."<sup>94</sup> Most of the state statutes surveyed for this report fail to provide clear guidance on how to meet the NVRA's requirements relating to "inactive voters."

The Kentucky statute, for example, reiterates the NVRA requirement outlined above, but does not provide any guidance on how an inactive voter should be allowed to vote (for example, by signing a written affidavit confirming her address). As a result, local election officials impose inconsistent requirements for inactive voters who turn up at the polls on Election Day. One Kentucky county requires inactive voters to sign an affidavit before being allowed to vote, whereas another county requires an election officer at the polling place to call a central election office to confirm the registration before allowing inactive voters to receive a ballot.

The inconsistent requirements at different polling places can lead to the de facto disenfranchisement of inactive voters who should, instead, be protected by the NVRA. For example, in locations where telephone confirmations are required before inactive voters are allowed to vote, the polling places are sometimes not equipped with sufficient telephone lines to keep up with the high volume of voters in heavy turnout precincts, effectively forcing precincts to turn away inactive voters rather than allowing them to vote.<sup>95</sup> Thus, voters who would otherwise have been classified as active again could instead find themselves purged for failure to vote, despite attempting to do so. This problem reportedly occurred to inactive voters in St. Louis County in 2006.<sup>96</sup>

*2. Programs Targeting Voters who Failed to Vote*

Some jurisdictions' policies stretch compliance with the NVRA's prohibition against purging a

**APPENDIX C**

voter merely for failure to vote. For example, in Ohio, though not required to do so by law,<sup>97</sup> many jurisdictions send address confirmation cards exclusively to registered voters who did not vote in the most recent election, rather than to all registered voters, as many other states do.<sup>98</sup> Ninety days following each general election in Wisconsin, state election officials are required to identify persons who have not voted within the previous four years and mail them a notice that informs the addressees that their registration will be “suspended” unless they apply to continue their registration.<sup>99</sup> Thus, the simple failure to vote in these jurisdictions is sufficient to trigger a process that could ultimately result in being purged from the voter registration list.

**F. INCAPACITATION<sup>100</sup>**

Federal law offers even fewer guidelines for removing voters from the registration rolls because of mental incapacitation. In contrast to its references to purges based on felony convictions or death, HAVA does not mention the removal of persons adjudged incapacitated. The NVRA simply provides that states must comply with state law in removing names from the registration list of voters because of mental incapacity.<sup>101</sup>

*1. Varying Rights*

State laws vary with respect to the voting rights of persons who are mentally incapacitated. Pennsylvania, Michigan and Indiana, for example, do not by statute disenfranchise persons who are adjudged mentally incapacitated. In fact, Pennsylvania’s statute goes as far as specifying the means for determining the residency of individuals who live at institutions for mentally ill patients expressly for the purpose of voter registration.<sup>102</sup> Indiana’s law specifies that the “[d]etention or commitment of an individual...does not deprive the individual of . . . [t]he right to . . . [v]ote.”<sup>103</sup> Like Pennsylvania, Indiana law specifies the residency of persons who are committed so that they may be able to vote.<sup>104</sup> In contrast, the Oregon Constitution contains a disenfranchising provision that renders ineligible those specifically adjudicated incompetent to vote.<sup>105</sup>

The statutory practices for purging voters for mental incapacitation similarly vary. States like Missouri and New York provide only the most general standards for disenfranchising persons on account of mental incapacitation, providing that persons who are declared incapacitated may be removed from the rolls.<sup>106</sup> Similarly, Nevada requires cancellation of a registration when “the insanity or mental incompetence of the person registered is legally established.”<sup>107</sup> By contrast, states like Florida indicate that the declaration of mental incapacitation must be specifically with respect to voting before a person can be removed from the voter rolls.<sup>108</sup>

The experience of election officials suggests that the public is not always informed as to the state voting protections for persons perceived to be mentally incapacitated. For example, local officials in Nevada and Ohio reported that they have had removal requests made by individuals relating to another voter on the grounds of mental incapacitation even when there was no court adjudication.<sup>109</sup>

*2. Sources for Identifying Individuals*

In a number of states, like Kentucky,<sup>110</sup> election officials are supposed to receive, pursuant to statute, lists indicating the names of persons who may no longer be eligible to vote on account of mental incapacity from state circuit or probate courts, district courts, or in the case of some states, for example, Washington<sup>111</sup> and New York,<sup>112</sup> the office of the court administrator. These practices are consistent with the policy of not depriving a person of the franchise absent court adjudication. In practice, however, the lists of those ineligible to vote on account of mental incapacitation do not always come from the court system. At least one locality in Missouri claims to receive incapacitation lists from the state Department of Health and Human Services. One county election official in Ohio reported that local board of elections staff, sent to nursing facilities to help the elderly vote, sometimes determine that a particular person is incapable of voting.

### III. PROBLEMS WITH PURGES

Our review of state purge practices reveals a number of shortcomings. Across the country, problems occur because the lists used to identify people to be purged are unreliable, purges are done in secret, election officials use bad matching criteria, and purges are conducted with insufficient oversight.

#### A. SOURCE LISTS ARE RIDDLED WITH ERRORS

States regularly purge their voter registration lists of ineligible voters or duplicate registration records, but the lists states use as the basis for purging voters are often riddled with errors, which result in the removal of many eligible voters. For example, some states purge voter registration rolls of individuals based on the Social Security Administration's Death Master File,<sup>113</sup> a database of 77 million deaths, dating back to 1937.<sup>114</sup> Unfortunately, even the Social Security Administration admits there are people in its master death index who are not actually dead.<sup>115</sup> The master death index lists the date of death of Hilde Stafford, a Wappingers Falls, NY resident, as June 15, 1997. The 85-year-old's response: "I'm still alive," Stafford said, "I still vote."<sup>116</sup> Indeed, from January 2004 to September 2005, the Social Security Administration had to "resurrect" the records of 23,366 people wrongly added to its Death Master File, meaning that the Administration was presented with irrefutable evidence that it had incorrectly listed 1,100 people a month, or more than 35 a day, as deceased.<sup>117</sup>

---

EVEN THE SOCIAL SECURITY  
ADMINISTRATION ADMITS THERE ARE  
PEOPLE IN ITS MASTER DEATH INDEX  
WHO ARE NOT ACTUALLY DEAD.

---

Lists can be inaccurate because they are overbroad, lack specificity, or simply contain errors. For example, when a member of a household files a change of address for herself in the United States Postal

Service's National Change of Address database, the filing sometimes has the incorrect effect of changing the address of all members of that household.<sup>118</sup> Lists may also fail to contain sufficiently specific identifying information, for example, only names and ages.<sup>119</sup>

Indeed, Florida's infamous purge of people presumed to have felony convictions in 2000 is a prime example of a bad purge based on unreliable underlying lists. The purge list wrongly included some, such as Reverend Willie Dixon, because the list contained inaccurate information — Reverend Dixon had been pardoned of a crime he committed in his youth and had his voting rights restored.<sup>120</sup> In other cases, the list reflected a misunderstanding of what types of crimes resulted in permanent disenfranchisement. Floridian Wallace McDonald was purged from the voter rolls for committing a misdemeanor, even though misdemeanors do not affect one's voting rights.<sup>121</sup> Additionally, the purge wrongly included more than 300 individuals who had conviction dates in the future.<sup>122</sup> Other problems with this purge are addressed below.

#### B. PURGES ARE CONDUCTED IN SECRET, WITHOUT NOTICE TO VOTERS

Approximately one week before the Mississippi's March 2008 presidential primary election, the circuit clerk of Madison County, Mississippi discovered that a local election commissioner had purged more than 10,000 residents from the voter registration rolls. County Election Commissioner Sue Sautermeister reportedly accessed the voter registration list from her home computer and purged the voters, including a Republican congressional candidate, his wife and daughter, and some people who had voted as recently as the November 2007 elections.<sup>123</sup> Fortunately, the Secretary of State's office and others recognized that Sautermeister's actions violated the NVRA, and worked to restore the purged voters in time for the March election.<sup>124</sup>

The public — voters, advocates, and others — rarely, if ever, receive meaningful notice of systematic purges. In fact, none of the states we studied have statutes requiring election officials to notify the public in advance of systematic purges. The statutes themselves generally do not provide notice by specifying when systematic purges will or should occur — a typical indication would be that such a purge must take place at least 90 days before an election,<sup>125</sup> but offering no further specificity. Adequate advance notice is essential to prevent erroneous purges. When registrants are properly informed of pending purges, they can act to correct or clarify a situation. Conversely, registrants may be denied due process of law if they are disenfranchised without notice and without a meaningful opportunity to challenge the purge. An Election Day discovery that a purge has taken place is generally too late for the affected voter to cast a ballot that is counted.

Except for registrants believed to have changed addresses, many states do not notify individual registrants believed to be candidates for purges either. When states do give individual notice, they rarely do so for all types of purges. For example, states rarely require notice when a voter is believed to have died. Florida and New York, for instance, statutorily require the provision of notice prior to removal in other circumstances, but appear to omit the notice requirement when the person is believed to be dead.<sup>126</sup> Without such notice, it is far harder to correct errors when the voter has been confused with an unfortunate decedent, or is, in any case, very much alive.

In certain circumstances in some states, officials are statutorily required to notify registrants after they are removed.<sup>127</sup> While that is better than no notice at all, notice after the fact could preclude an erroneously purged voter from being reinstated in time for an upcoming election.

Some state laws require officials to tell registrants with disqualifying convictions before they are purged; indeed, in some states these voters may have more protections than those affected by other types of purges. In Florida and Washington, election officials must give advance warning to voters with disqualifying convictions, and give them an opportunity to respond prior to removal.<sup>128</sup> Indiana law requires election officials to send a notice to the last known address of all people who are disenfranchised because they are imprisoned no later than the day after the registration has been canceled from the rolls.<sup>129</sup>

With notice provided neither to the public nor to the affected voter, election officials can conduct purges with little outside scrutiny or oversight. The lack of transparency makes voters vulnerable to manipulated or haphazard purges.

#### C. BAD “MATCHING” CRITERIA LEAVES VOTERS VULNERABLE TO PURGES

In 2008, the Elections Director for Muscogee County, Georgia, sent out 700 letters to local residents informing them that they were ineligible to vote because they were convicted felons. More than one-third of the voters called to report that there had been a mistake. The purged voters included an octogenarian who insisted she had never even received a parking ticket. According to media reports, the list that went to Muscogee County was generated by a new computer program, and included voters whose names, but not necessarily other information, corresponded or “matched” the names of those with felony convictions.<sup>130</sup>

Largely because of HAVA, states now have computerized statewide voter registration databases. These digital lists have improved the registration process substantially. But they can also boost the danger of wrongful purging since large numbers of people can now be purged at one time. The inadequacies of existing purge protections are apparent in the use of bad “matching” criteria.

Computerized database “interoperability” allows for election officials to purge registrants because of an apparent “match” of identifying information in a voter registration record to records found in lists of people ineligible to vote for various reasons. However, far too often what appears to be a “match” will actually be the records of two distinct registrants with similar identifying information. States have failed to implement protections to ensure that eligible voters are not erroneously purged.

There are many reasons states have trouble with matching requirements. Often, state statutes do not often specify what information — what fields and how many — must match to warrant removal of a registrant from the voter registration list.<sup>131</sup> This means that local purging officials use their own, often varied and insufficient, matching standards. For example, two Nevada county election officials reported different match standards for the removal of deceased registrants. One reported that if a person’s name and address or age on the report provided by the Department of Vital Statistics matches

the record of a registrant, the official would remove that registrant from the rolls. Another reported that she removed registrants when the date of birth, social security number, and first and last names of deceased people provided by the state's Department of Vital Statistics matched a registrant's record.

States that do set forth requirements for the kind of identifying information elections officials should use frequently require too little information — for example name and date of birth — to be confident that a particular registered voter is the same person listed on a list subject to purging.<sup>132</sup>

Elementary statistics preclude reaching such a conclusion on such little information. In a group of 23 people, it is more likely than not that two will share the same day and month of birth; in a group of 180, it is more likely than not that two will share the same birth date, including year of birth.

Also, in any group of significant size, statistics teaches us that there will be many with the same first and last names — and it is likely that at least two such individuals will be born on the same day.<sup>133</sup> Certain names are more popular in certain years. For example, it would be unsurprising to find two Jessica Smiths born on the same day in 1985, or Lisa Smiths in 1965, or Mildred Smiths in 1925. Likewise, the prevalence of surnames will fluctuate with the immigration patterns of particular ethnicities, which vary from decade to decade.

Purging officials who ignore prefixes or suffixes can increase the likelihood of erroneous matches. A 2005 attempt to identify double voters and duplicate registrations on the New Jersey voter

rolls was flawed in this respect: in seeking duplicates, it ignored middle names and suffixes, alleging that the voter records of distinct registrants J.T. Kearns Jr. and J.T. Kearns Sr. belonged to the same individual.<sup>134</sup>

---

IN A LARGE GROUP, STATISTICS  
TEACHES US THAT THERE WILL  
BE MANY WITH THE SAME FIRST  
AND LAST NAMES — AND IT  
IS LIKELY THAT AT LEAST TWO  
SUCH INDIVIDUALS WILL  
BE BORN ON THE SAME DAY.

---

Another problem arises when states do not specify how exacting purging officials must be when comparing fields. For example, in Missouri, where exact matches are not required, one election official reportedly deemed an approximate date of birth (e.g., a difference by one month or one day) as sufficient to establish a match.

In Florida, lists of ineligible people provided to election officials must contain certain identifying information, but the Florida statutes does not establish how or to what extent the information must exactly match that of a registrant before the registrant can be removed.<sup>135</sup> The Florida purge of 2000 discussed above — conservative estimates place the number of wrongfully purged voters close to 12,000 — was generated in part by bad matching criteria. Florida registrants were purged from the rolls if, in part, 80 percent of the letters of their last names were the same as those of known felons.<sup>136</sup>

## APPENDIX C

HOW BAD MATCHING CRITERIA CAN RESULT IN DISENFRANCHISEMENT				
Field	>> FN	>> MN	>> LN	>> D.O.B.
>> Name 1:	>> John	>> Fitzgerald	>> George	>> 11/20/1976
>> Name 2:	>> Johnny	>> Fred	>> Georges	>> 11/22/1976
<pre>&gt;&gt; Number First Name matching letters = 04 &gt;&gt; &gt;&gt; Percentage of Last Name = 85.7% &gt;&gt; &gt;&gt; Result = MATCH &gt;&gt;</pre>				
Source: Gregory Palast, <i>The Wrong Way to Fix the Vote</i> , WASH. Post, June 10, 2001, at B01.				

Those wrongly purged included Reverend Willie D. Whiting Jr., who under the matching criteria, was considered to be the same person as Willie J. Whiting.<sup>137</sup> These purges were wildly inaccurate. In Miami-Dade County, for example, over half of the African American registrants who appealed their placement on the felon exclusion list were found to be eligible voters.<sup>138</sup>

The matching criteria some states use, however, may not differ greatly from the criteria responsible for the erroneous purge in Florida. To identify possible duplicates, New York requires only that the first three letters of the first name, the first five letters of the last name, and date of birth match, although it will consider other information if it is available.<sup>139</sup>

#### D. PURGES ARE CONDUCTED WITH INSUFFICIENT OVERSIGHT

Insufficient oversight permeates the purge process beyond just the issue of matching. For example, state statutes often rely on the discretion of election officials to identify registrants for removal and to initiate removal procedures. Since these statutes rarely tend to specify limitations on the authority of election officials to purge registrants, eligible registrants may be unnecessarily made vulnerable to poor, lax, or irresponsible decision-making.<sup>140</sup>

Insufficient oversight also leaves room for election officials to deviate from what the state law provides. In Washington, the failure to deliver a number of delineated mailings, including precinct reassignment notices, ballot applications, and registration acknowledgment notices, triggers the mailing of address confirmation notices,<sup>141</sup> which then sets in motion the process for removal on account of change of address. Two Washington counties and the Secretary of State, however, reported that address confirmation notices were sent when any mail was returned as undeliverable, not just those delineated in state statute. Although Ohio's election law expressly provides that information regarding the deaths of persons over age 18 must come directly from government health agencies, one local official reported using obituaries as a source to identify deceased registrants, and another official reported a practice of sending inquiries to local funeral homes, a practice also not condoned by statute.<sup>142</sup> An election official in Missouri reported relying on both personal knowledge and obituaries, even though the state election code does not provide for the use of those sources.

The state statutes examined are generally more specific with respect to the amount of discretion election officials have to remove registrants for mental incapacitation than they are with respect to other grounds for removal. In a number of states we examined, a determination to purge someone because of mental incapacitation occurs only if individuals meet certain legal criteria, for example, if they are declared mentally incapacitated with respect to voting.<sup>143</sup> However, elections officials interviewed for this report indicated that in spite of these statutory strictures, they sometimes make their own determinations that particular residents are incapable of voting and deny ballots according to that determination.<sup>144</sup>

#### IV. POLICY RECOMMENDATIONS

While much of election administration is governed by state law, the NVRA and HAVA provide guidance, and in some cases, explicit requirements, for how voters' rights to register and participate in the political process should be protected. Through the NVRA,<sup>145</sup> Congress minimized the states' historical ability to function as a gatekeeper

for registration in many ways by requiring states to use and accept the Federal Mail Voter Registration Application.<sup>146</sup> It also made it easier to get on the voter rolls by requiring states to: distribute the Federal Mail Voter Registration Application to public and private entities and voter registration organizations;<sup>147</sup> permit a person to register to vote at the same time as applying for or renewing a driver's license;<sup>148</sup> and provide voter registration services at designated public agencies.<sup>149</sup>

---

WHEN THERE IS A QUESTION,  
FEDERAL LAW CLEARLY FAVORS  
THE INCLUSION OF ALL ELIGIBLE  
REGISTRANTS RATHER THAN  
THE REMOVAL OF EACH AND  
EVERY INELIGIBLE REGISTRANT.

---

HAVA facilitates voter registration by requiring states to create and maintain a single statewide computerized database of its registered voters, and to coordinate that database with other state databases, including state agency records on felony status<sup>150</sup> and state agency records on death.<sup>151</sup>

The text of these two laws clearly prioritizes the inclusion of all eligible registrants over the removal of each and every ineligible registrant when there is a question. The relevant section in the NVRA begins with "each State shall ensure that any eligible applicant is registered to vote in an election."<sup>152</sup> While the NVRA also requires states to

undertake a program to conduct list maintenance, they must only conduct a “reasonable” effort to purge the names of registrants who are ineligible because they have died or, in certain circumstances, have changed their addresses.”<sup>153</sup> The NVRA permits, but does not require, a state to remove a registrant from the official list of eligible voters when a registrant has requested removal or when the law of the state disenfranchises persons on account of criminal conviction or mental incapacity.<sup>154</sup>

HAVA requires that states perform regular “list maintenance” and make “reasonable effort[s]” to ensure that ineligible voters and duplicate records are removed from the voter rolls.<sup>155</sup> Before addressing purges, HAVA expressly requires states to “ensure that each registered voter appears in the computerized list” and that “only voters who are not registered or who are not eligible to vote are removed from the computerized list.”<sup>156</sup>

The existing federal requirements and voter protections do not go far enough, however, to protect voters. Indeed, the NVRA and HAVA do not specifically address most aspects of purge practices. Given the problems identified in our review of state purge practices and statutes, we recommend that states take action to reduce the occurrence of erroneous purges. Below are some recommendations of best practices based on our research.

#### A. TRANSPARENCY AND ACCOUNTABILITY FOR PURGES

Purges of voter registration lists should be conducted in a transparent and uniform manner. Any rules or procedures developed with respect to purges should establish accountability at all stages of a purge.

##### *1. Develop and publish uniform, non-discriminatory rules for purges.*

State election officials should publicly post consistent and fair rules that describe when, why, how, and by whom a voter registration record can be purged from the voter rolls. States should clearly identify appropriate sources of information on ineligible people and ensure that all localities are conforming to the same standards when relevant. State election officials should work with local election officials to ensure that state protocols are understood and being followed.

While the state of Ohio is not without its troubles in election administration, it can be commended for publicly posting all directives, advisories, and memoranda related to elections on the Secretary of State’s website. Not only does this practice allow local election officials easy access to the documents, it also gives members of the public the opportunity to be informed and educated as to election-related policies. Armed with this knowledge, watchdogs and individuals can help encourage compliance and hold localities accountable for any lapses. Irrespective of the nature of the rules, their transparency is necessary to ensure that they are fair and effective protocols.

##### *2. Provide public notice of an impending purge.*

States should provide public notification of any organized county-wide or state-wide purge at least two weeks prior to the purge, and provide a detailed explanation of how that purge is to be conducted.

Before a voter is removed from the voter registration list for any reason, she should be individually notified and given the opportunity to correct any errors or omissions, or demonstrate eligibility.

For most types of purge candidates, New York notifies registrants at risk of being purged 14 days in advance of the purge.<sup>157</sup> Best practices would extend this protection to all individuals who are candidates for purges and give each 30 days to respond before purging them from the voter rolls.

*3. Develop and publish rules to remedy erroneous inclusion in an impending purge.*

The rules and procedures for curing erroneous inclusion in an impending purge should be publicly posted and widely available. Additionally, for registrants who have been purged from the voter registration list, states should explicitly set out means by which they may be restored easily to the voter registration list, without regard to the voter registration deadline.

Pennsylvania, by statute, provides certain registrants both notice of an impending purge and a process for responding to any erroneous purge. Pennsylvania is required to send written notice to each individual whose registration is canceled.<sup>158</sup> Pennsylvania law also offer an additional protection: its statutes specifically contemplate the possibility that a registrant can be incorrectly reported as dead or incorrectly removed on the grounds of death and sets forth a process for addressing these instances.<sup>159</sup> States could and should apply this protection to all classes of purges.

*4. Do not use failure to vote as a trigger for a purge.*

States should ensure that registrants are sent address confirmation notices only in response to an indication that the registrant has moved — not when a registrant has not voted for some time. All voters who have been inactive should be allowed to vote by regular ballot up until they are purged. If an inactive registrant votes during any of the two federal election cycles, they should remain on the voter registration list.

*5. Develop directives and criteria with respect to who has the authority to purge voters.*

No one person, acting alone, should be able to remove names from the list. The removal of any record should require authorization by at least two officials. Good directives for purge authorization minimize opportunities for mischief in the process.

Although majority support from the local election commission is required in Mississippi prior to the removal of any voter from the voter registration list, Madison County election commissioner Sue Sautermeister managed to purge more than 10,000 names from the list, alone, reportedly from her home computer.<sup>160</sup> This example highlights the importance of purge protocols which preclude non-compliance, for example, by designing the database so two people must enter an authorization code before voters can be removed.

*6. Preserve purged voter registration records.*

Statewide voter registration databases should have the design capacity to keep the records of names removed from the voter registration list, including who authorized the removal and on what grounds. Maintenance of this information ensures that the removal of any registrants is properly documented, allows for easier restoration to the list, and assigns accountability for the purge.

All media reports suggest that the Mississippi Secretary of State was successfully able to reinstate the voters purged by the Madison County commissioner.<sup>161</sup> Officials from the Secretary of State's office indicated that the database is designed such that voting records are retained, even when the voter status changes.<sup>162</sup> This design feature of the database makes for easier restoration than when the record is erased.

*7. Make purge lists publicly available.*

The records of voters purged from the list and the reason for removal should be made available for public inspection and copy. If any code is used to identify the reason for removal, a key defining each code symbol shall be made accessible to the public. These lists should also be brought to the polls on Election Day. This allows the public to verify that purged records were removed for fair reasons.

For example, Washington requires the Secretary of State and each county auditor to compile lists of everyone who is removed from the voting rolls and the reason for their removal; these lists must be preserved and kept available for public inspection for at least two years.<sup>163</sup> Additionally, some states allow voters to check their registration status electronically via voter portal functions on their websites that allow voters to check the status of their registration by entering their name and/or other personal information.<sup>164</sup>

While these portals are a useful resource, there are some limits to their helpfulness. For example, not all interfaces inform the voter when the system was last updated. This is problematic because a voter unable to find her registration record might, instead of waiting for the system to be updated, send in an additional form out of desire to ensure that her name make it onto the rolls. Additional registration forms for the same individual increase administrative burdens for the registrar and the likelihood that there are errors in the registration. This problem can be ameliorated simply by noting when the interface was last updated. Another problem with portals is that not everyone will search for their record using the information as exactly listed on their registration application, or an inputting error will prevent a voter from being able to find her registration record. This problem can be corrected by designing the interface such that when a registration record is not found, more information is solicited and then the interface displays to the seeker similar names affiliated with the information provided. Individuals who suspect that they have found their record, but that the record contains misspellings or other errors, can then call the registrar's office and correct the problem.

Notwithstanding the usefulness of portals, they are an inferior substitute to purge lists because portals confine the information provided to a unique voter and do not allow voters and their advocates to observe trends.

*8. Make purge lists available at polling places.*

The records of voters purged from the list over the past two federal election cycles should be made available at the polls so that individuals erroneously purged can be identified and allowed to vote by regular ballot.

**B. STRICT CRITERIA FOR THE DEVELOPMENT OF PURGE LISTS**

To ensure a high degree of accuracy, states should use strict criteria for the development of purge lists. States should establish measures to protect eligible people from erroneous removal from the voter registration list.

*1. Ensure a high degree of certainty that names on a purge list belong there.*

Before purging any name from the voter registration list, authorized officials should have a high degree of certainty that a name belongs to an ineligible person or a duplicate record. Purge lists should be reviewed multiple times to ensure that only ineligible people are included.

*2. Establish strict criteria for matching.*

If purge lists are developed by matching names on the voter registration list to names from other sources, states should specify the information sufficient for attaining a high degree of certainty, including, at a minimum, last name, first name, middle name, prefix, suffix, date of birth, and address or driver's license number. Exact matches of a large number of fields substantially reduce the risk that such purges will erroneously remove eligible people.

As discussed throughout the report, the Florida purge in 2000 underscores the need for strict matching criteria. When records were deemed a match because 80% of the last name was the same, approximately 12,000 people were misidentified as disenfranchised felons.

*3. Audit purge source lists.*

If purge lists are developed by matching names on the voter registration list to names from other sources (for example, criminal conviction lists) the quality and accuracy of the information in these lists should be routinely "audited" or checked. Errors in source lists may lead to the erroneous removal of eligible people. Accordingly, election officials should calibrate reliance based on the known accuracy of the source list.

**APPENDIX C***4. Monitor duplicate removal procedures.*

States should implement uniform rules and procedures for eliminating duplicate registrations in accordance with HAVA. States should provide clear guidance to election officials with respect to when to flag a possible duplicate registration, how to verify that the registration is in fact duplicative, and when to remove that registration from the voter registration list.

**C. "FAIL-SAFE" PROVISIONS TO PROTECT VOTERS**

While inaccurate purges will be mitigated with the implementation of the previously mentioned recommendations, there must still be mechanisms in place to protect voters in the event that a person is incorrectly removed from the voter registration list.

*1. No voter should be turned away from the polls because her name is not found on the voter registration list.*

Instead, she should be provided a provisional ballot which will be counted upon determination by election officials that she is eligible to vote. In many states, however, voters have not been given the provisional ballots to which they are entitled.<sup>165</sup>

*2. Election workers should be given clear instructions and adequate training as to HAVA's provisional balloting requirements.*

HAVA sets forth a number of requirements with respect to the use of provisional ballots as a fail-safe in the event that a voter's name does not appear on the registration list. Election workers should clearly understand that: no voter should be denied a provisional ballot; all voters must be given the opportunity to substantiate their eligibility to vote; all voters must be informed as to how they can substantiate their eligibility and how they can determine whether a ballot was counted; and the ballots must be counted when a voter confirms that she is eligible and registered to vote.

**D. UNIVERSAL VOTER REGISTRATION**

The purge systems currently in place are rife with error and vulnerable to manipulation. Even the best processes for culling the voter rolls will inevitably be imperfect and will erroneously lead to purges of at least some eligible voters. No eligible citizen should be deprived of the right to vote or put through an obstacle course because of these system malfunctions. Currently, eight states have a backup system in place that will protect the votes of those American caught up in a faulty purge — a system of Election Day registration which enables eligible citizens to register and vote on Election Day (or other days on which voting takes place). Some fear that Election Day registration may overwhelm election officials with a swarm of new and unexpected voters. Although those fears are baseless, they can be completely eliminated if Election Day registration is embedded within a system of universal voter registration in which the government takes the

affirmative responsibility of adding all eligible citizens in its records to the voter lists. Under such a system, there would be far fewer unregistered voters who show up at the polls on Election Day since virtually all eligible citizens would be registered. In addition to providing a fail-safe for those voters wrongly purged, universal voter registration would increase confidence in the accuracy of voter registration lists since they would have been assembled by election officials rather than by voters.

Universal voter registration has other benefits as well: it would add up to 50 million unregistered Americans to the voter rolls; eliminate the opportunity for partisan or other gamesmanship with voter registration rules and procedures; reduce fears of potential voter fraud, as those derive largely from the potential for fraudulent registrations; and reduce burdens on election officials, who currently devote substantial resources to processing voter registration forms in the months and days leading up to an election. The elements of a system of universal registration are as follows:

- The government takes affirmative responsibility to build clean voter lists consisting of all eligible citizens.
- Each eligible citizen only has to register once within a state; the government ensures that voters stay on the lists when they move within state.
- Election Day registration is available as a fail-safe for those eligible citizens whose names are erroneously not added to or erroneously purged from the voter rolls.

## V. EMERGING ISSUES WITH RESPECT TO PURGES

There are numerous blemishes in our country's voting history. Since the end of Reconstruction in the late nineteenth century, the voting rights of poor and minority citizens have been restricted through a complex system of laws enacted by state legislatures and intended to limit or ignore the commands of the 14th and 15th Amendments. In the immediate aftermath of the Civil War and the Reconstruction Amendments, voting among African American men briefly soared in the former slave states.<sup>166</sup> In Louisiana in 1867, for example, approximately 90% of the eligible black male population had registered to vote.<sup>167</sup> However, by the end of the Reconstruction era in 1877, most Southern states had erected significant new barriers to minority voting that re-established control by the white Democratic Party, eliminating these hard-won rights from the vast majority of non-white voters.<sup>168</sup> At first glance, these new voting laws appeared race-neutral, so as not to violate the 14th and 15th Amendments, but in effect they purposely excluded many African Americans from the polls. Poll taxes, literacy tests, and grandfather clauses, for example, proved to be effective barriers to African American voting. Though these new restrictions did not, on face, target one group of voters over another, they were discriminatorily applied to African American voters.<sup>169</sup>

Some commentators argue that voter purges are simply a variation of older, more overt methods of disenfranchisement intended to reduce minority participation.<sup>170</sup> Courts have agreed: one court overturned the aforementioned Louisiana purge, finding it "massively discriminatory in

purpose and effect,”<sup>171</sup> and another referred to a Texas statute requiring yearly re-registration as a “direct descendant of the poll tax” that unconstitutionally disenfranchised voters.<sup>172</sup> Although other courts differ on the motivations of purges, they do not deny that their effect can be discriminatory.<sup>173</sup>

Irrespective of whether purging officials act with racial animus, if done without adequate protections, voter purges can have the same disenfranchising effect as the overt voter restrictions used in earlier decades. While new nuances to problematic purges are always emerging, there are at least two relatively new issues for which problems are predictable.

#### A. VOTER CAGING

In the later half of the twentieth century, a category of voter purges known as “voter caging” arose as a new tactic to generate lists of voters to be purged from voter registration lists or challenged at the polls. Adapted from a direct mail marketing practice of sorting mailing addresses,<sup>174</sup> voter caging is a controversial method of targeting voters in which non-forwardable mail is sent to registered voters at their voter registration address.

Some percentage of that mail is returned to the sender as undeliverable for a variety of reasons, many unrelated to the recipient’s status as a voter.<sup>175</sup> On this basis alone, the sender (typically a political operative) uses the list of returned mail to either request election officials to purge the names from the registration list or later challenge the validity of the voter’s registration at the polls on Election Day, or both.

---

COMPUTERIZED VOTER  
REGISTRATION LISTS NOW MAKE  
IT POSSIBLE FOR THOUSANDS OF  
VOTERS TO BE DISENFRANCHISED  
WITH A SINGLE KEYSTROKE.

---

Voter caging has been demonstrated to produce grossly inaccurate results and has threatened to disenfranchise thousands of legitimately registered voters.<sup>176</sup> The history of voter caging is littered with examples of political operatives targeting poor and minority neighborhoods where mail delivery might be less reliable or where voters are believed to be threatening to certain political interests. First uncovered in 1958, the practice has frequently been used to generate purges of thousands of voters. In 1986, for example, the Republican National Committee (“RNC”) hired a vendor to conduct a voter caging effort in at least three states, intending to purge voters residing in primarily African American neighborhoods.<sup>177</sup> Unearthed in subsequent litigation, an RNC internal memorandum discussing the targeting of Louisiana voters stated the goal of the voter caging program:

I would guess that this program will eliminate at least 60-80,000 folks from the rolls . . . If it’s a close race, which I’m assuming it is, this could really keep the black vote down considerably.<sup>178</sup>

In more modern times, reports of intended voter caging efforts have surfaced in Ohio, Michigan, and Virginia.<sup>179</sup> Because voters who are victims of caging cannot cast a regular ballot, purges of this kind pose a significant threat to the completeness of voter registration lists, and ultimately, to the legitimacy of our nation's elections.

#### B. COMPARING DATABASES WITHIN AND ACROSS STATE LINES

HAVA's requirement of centralized computer voter registration databases has allowed election officials to maintain their voter lists with greater ease as states move away from many separate voter lists, but it also significantly amplifies the potential for large-scale disenfranchisement.<sup>180</sup> Indeed, computerized voter registration lists now make it possible for thousands of voters to be disenfranchised with a single keystroke.

Officials have increasingly focused attention on ways of making state databases "interoperable" with other databases that may contain relevant information on registered voters. "Interoperability" is generally defined as a method of connecting or integrating multiple databases so that changes in one database can be recognized and mirrored in a second database automatically. Seizing on language in HAVA which requires or recommends states to "coordinate" voter registration databases with felony conviction databases, death records, and records of voter moves through state DMV databases,<sup>181</sup> several groups of states have started to compare voter registration lists among each other and initiate voter purges based on matches between records on different states' lists, presuming that individuals who have moved from one state to another have neglected to notify the original state before registering to vote in the new state.<sup>182</sup>

The problem is that there are not always sufficient protections to ensure that the same individuals are identified as opposed to two different individuals with similar identifying information. In 2006, for example, the Kentucky State Board of Elections attempted to match names on its registration database against lists of voters in Tennessee and South Carolina, and purged 8,000 voters as a result of the match — without notifying the voters, and in violation of specific provisions of federal law.

Interoperability technology grants many opportunities to improve election administration and the maintenance of voter registration databases. Yet because of the speed and scale at which information can be shared, interoperability in many ways poses a greater threat to the right to vote than traditional methods of record coordination. State and local officials should strive to use existing computer and electronic technology in a way that enhances the experiences of voters and minimizes disenfranchising errors during the voter registration processes.

#### VI. CONCLUSION

Purges should be a carefully calibrated process designed to account for the complications that invariably arise. Without adequate safeguards, voters experience an unreasonable risk of disenfranchisement, and purges are vulnerable to manipulation. The above recommendations will go far in minimizing unnecessary risks to voters and should be implemented without delay.

- 24 U.S. Election Assistance Commission, *The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office 2005-2006: A Report to the 110<sup>th</sup> Congress* 10 (June 2007), available at [http://www.eac.gov/program-areas/research-resources-and-reports/copy\\_of\\_docs/the-impact-of-the-national-voter-registration-act-on-federal-elections-2005-2006/attachment\\_download/file](http://www.eac.gov/program-areas/research-resources-and-reports/copy_of_docs/the-impact-of-the-national-voter-registration-act-on-federal-elections-2005-2006/attachment_download/file).
- 25 Confirmed by interviews with local boards of election officials in Missouri and Washington conducted in 2007. All interviews are on file at the Brennan Center.
- 26 Confirmed by interviews with local boards of election officials in Kentucky, Missouri, and Washington conducted in 2007. All interviews are on file at the Brennan Center.
- 27 While the NVRA does not specifically raise the issue of duplicates, and instead clarifies that the limitations imposed by the NVRA are not interpretable as precluding “correction of registration records,” 42 U.S.C. § 1973gg-6(c)(2)(B)(ii), (2008) HAVA instructs states to conduct list maintenance “in a manner that ensures that . . . duplicate names are eliminated from the computerized list,” 42 U.S.C. § 15483(a)(2)(B)(iii). Some states, like Washington, WASH. REV. CODE ANN. § 29A.08.610 (2008) and Florida, FLA. STAT. ANN. §§ 98.075, 98.073 (2008), have codified some guidance for addressing the problem of duplicate registrations, albeit with varying degrees of helpfulness. Election statutes in other states, for example, Ohio, and Wisconsin, however, remain silent on the topic of duplicate registration. A number of local officials indicated that duplicates are generally the result of change of addresses, and as such, their processes for responding to duplicates are essentially the purge practices with respect to change of addresses.
- 28 The NVRA makes clear that no person is to be removed from the statewide registration list solely on account of failure to vote. 42 U.S.C. § 1973gg-6(b)(2). The NVRA does permit, however, the removal of a name from the registration list if a person does not respond to an address confirmation notice AND does not vote in the subsequent two federal elections. *Id.*
- 29 A problem occurred in Travis County, Texas whereby individuals believed to have moved because of returned mail were purged despite having voted in at least one of the two subsequent federal elections after the mail was returned. Any update or information needed by election officials should have occurred while the person was at the polls voting. But for reasons not entirely clear, these voters were purged despite their having voted. See Marty Toohey, *Glen Maxey TV Ads Allege Voter Disenfranchisement*, AUSTIN AMERICAN-STATESMAN, Feb. 3, 2008.
- 30 Arkansas, Florida, Maine and Oklahoma all permit the mailing of address confirmation notices in such circumstances. See ARK. CONST. amend. 51, § 7 (2008); FLA. STAT. § 98.065(4) (2008); ME. REV. STAT. ANN. tit. 21-A, § 162-A (2008); OKLA. STAT. ANN. tit. 26, § 4-120.2 (2008).

## APPENDIX C

SEC'y OF STATE OF MO., MANDATE FOR REFORM: ELECTION TURMOIL IN ST. LOUIS, NOVEMBER 7, 2000 27 (2001), available at <http://bond.senate.gov/mandate.pdf>.
- 37 Jon Margolis, *GOP Sued Over Voters Tactic*, CHI. TRIBUNE, Oct. 8, 1986, at C9. There are many other examples of voters who are temporarily away from their permanent residences. A college student may legally reside at her parents' home address and register to vote there while she is away at school, even though she does not receive mail at her parents' house. A voter may be on an extended vacation and have canceled or transferred mail service, or may have done the same for a temporary job transfer. See Steve Suo, *Some Inactive Voters Aren't*, THE OREGONIAN, Aug. 27, 2000, at C1. A citizen living overseas, but registered to vote at her last domestic residence, might also receive no mail at her registered address; for example, mail sent to one such voter in New Hampshire was returned undelivered despite the fact that the voter was eligible to vote. Memorandum from Bud Fitch, Deputy Atty Gen., N.H. Dep't of Justice, to Robert Boyce, Chairman, N.H. Sen. Internal Aff. Comm., et al. 3 (Apr. 6, 2006), available at [http://doj.nh.gov/publications/nreleases/pdf/040606wrongful\\_voting.pdf](http://doj.nh.gov/publications/nreleases/pdf/040606wrongful_voting.pdf). Similarly, a member of the armed forces, stationed away from his voting residence, could illegitimately get caught up in the purge process.

SENTINEL, June 8, 2004 at B5. The same apparently happened to some challenged voters in Louisiana in 1986. See Thomas M. Burton, *Democrats Sue Over GOP Bid to Mail Down the Vote*, CHI. TRIBUNE, Sept. 25, 1986, at C1.
- 42 John Riley, *Complications, Challenges Abound*, NEWSDAY, Oct. 31, 2004, at A37; see also, Sandy Theis, *Fraud-busters Busted*, CLEVELAND PLAIN DEALER, Oct. 31, 2004, at H1.

**APPENDIX C**

- 43 42 U.S.C. § 1973gg-6(e)(1)(2008). Similarly, a voter who has moved within the same registrar's jurisdiction and congressional district may return to vote at her former polling place without re-registering. 42 U.S.C. § 1973gg-6(e)(2)(A)(i)(2008). Especially in urban areas where there is high mobility within a particular neighborhood, undeliverable mail may simply reflect the recent move of a voter who remains fully eligible to vote.
- 44 42 U.S.C. § 1973gg-6(2)(A).
- 45 See also Kandiss Crone, *Hosemann: Voter Purge Violated Federal Law*, WLBT News 3, Mar. 5, 2008, <http://www.wlbt.com/Global/story.asp?s=7973229>; Joint Press Release, Advancement Project, MERA, Michigan NAACP and ACORN, Voting Groups Caution Michigan Election Officials on Eve of National Secretary of State Conference (July 24, 2008), available at [http://www.democraticunderground.com/discuss/duboard.php?az=view\\_all&address=159x12543](http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=159x12543).
- 46 42 U.S.C. § 1973gg-6(c)(2008).
- 47 For example, one Kentucky election official reported that the information compiled by the Postal Service does not match the criteria his county uses to identify voters.
- 48 Indiana and Florida are examples of states that use jury notices and information from other government agencies to identify people who may have moved. IND. CODE ANN. § 3-7-38.2-2(c) (2), (4) (2008) (permitting the use of information from a court regarding jury notices and from the bureau of motor vehicles regarding the surrender of a person's Indiana license for the operation of a motor vehicle to another jurisdiction); FLA. STAT. ANN. § 98.065(4) (2008) (permitting the use of information regarding jury notices signed by a voter and returned to the courts and information from the Department of Highway Safety and Motor Vehicles indicating that the legal address of a registered voter might have changed).
- 49 Unless another authority is otherwise cited, information in this report about Kentucky was derived from interviews with county clerks conducted in April 2007 and an interview with an official from the State Board of Election conducted in September 2008. All interviews are on file at the Brennan Center.
- 50 NEV. REV. STAT. ANN. § 293.535 (2008).
- 51 MICH. COMP. LAWS SERV. § 168.509dd(3)(a) (2008) (permitting house-to-house canvasses as part of a program to remove the names of unqualified voters from the voter registration list); WIS. STAT. ANN. § 6.40(2)(b) (2007) (permitting municipal clerks to conduct door-to-door canvasses to identify voters who no longer reside at their registered addresses); 25 PA. CONS. STAT. ANN. § 1901(b)(2) (2008) (allowing election officials to visit registered addresses to supplement other list maintenance activities); NEV. REV. STAT. ANN. § 293.530(2) (2008) (permitting county clerks to conduct house-to-house canvasses to investigate registrations). New York's statute provides a variation whereby New York Board of Elections employees are required to conduct a canvass upon written request of any Board of Elections member. N.Y. ELEC. LAW § 5-710 (Consol. 2008).
- 52 This was reported to us by an interviewee from Nevada in March 2007. Unless another authority is cited, information in this report about Nevada was derived from interviews conducted with county clerks and registrars in March, 2007.
- 53 Mo. Rev. Stat. § 115.191 (2008).
- 54 WASH. REV. CODE ANN. § 29A.08.620(1) (2008) (designating voters as inactive if certain pieces of mail are returned to sender as undeliverable); N.Y. ELEC. LAW § 5-712(5) (Consol. 2008) (designating all voters who are sent an address confirmation notice as inactive); OR. REV. STAT. § 247.563(3) (2007) (designating the registration of voters sent address confirmation notices as inactive until further determination).
- 55 FLA. STAT. ANN. § 98.065 (4)(c) (2008) (designating as inactive all voters who have been sent an address confirmation notice and who have not returned the postage prepaid, preaddressed return form

**APPENDIX C**

within 30 days or for which an address confirmation notice has been returned as undeliverable.); Mo. Rev. Stat. § 115.193(5) (2008) (designating any voter as an inactive voter if . . . the voter fails to respond to the notice . . . within thirty days after the election authority sends such notice).

56 See 950 MASS. CODE REGS. 54.04(6) (2008).

57 Cf. OR. REV. STAT. § 254.470(2)(a) (2007) (directing that ballots be sent “to each *active elector*”) (emphasis added).

58 42 U.S.C. § 1973gg-6(a)(4)(A) (2008).

59 42 U.S.C. § 15483(a)(2)(A)(ii)(II) (2008).

60 See e.g. FLA. STAT. ANN. § 98.093(2)(a) (2008) (requiring the Department of Health to furnish monthly to the department a list containing the name, address, date of birth, date of death, social security number, race, and sex of each deceased person 17 years of age or older.); IND. CODE ANN. § 3-7-45-2.1(b)(1) (2008) (stating that the state department of health provides election officials with information on decedents); N.Y. ELEC. LAW § 5-708(1) (Consol. 2008) (stating that state health department must deliver to the state board of elections monthly records of the names of all persons of voting age for whom death certificates were issued); OHIO REV. CODE ANN. § 3503.18 (2008) (directing the chief health officer and director of health to file list of decedents with board of elections); 4 PA. CODE § 183.6(d)(1) (2008) (stating that death notices are received from the department of health for the purposes of removing records).

61 See e.g., MO. REV. STAT. § 115.195(1) (2008) (state or local registrar of vital statistics provides election officials with a list of decedents); WASH. REV. CODE ANN. § 29A.08.510(1) (2008) (state department of vital statistics provides the list to the Secretary of State).

62 Nevada statute does not specify what state agency provides the names of Nevada residents who have died. In fact, the statute permits local officials to cancel the registration of a voter only if the county clerk “has personal knowledge of the death of the person registered, or if an authenticated certificate of the death of any elector is filed in his office.” NEV. REV. STAT. § 293.540(1) (2008).

63 WASH. REV. CODE ANN. § 29A.08.510(2) (2008) (permitting county auditors to use newspaper obituary articles to cancel a voter’s registration). Election officials in three Washington counties confirmed the use of this practice.

64 WASH. REV. CODE ANN. § 29A.08.510(3) (2008).

65 Kentucky permits the removal of a deceased registrant based on the notification of “other reliable sources.” KY. REV. STAT. ANN. § 116.113(1) (2008). Similarly, Florida law suggests that the state permits removal of deceased registrants based on information from “other sources.” FLA. STAT. ANN. § 98.093(3) (2008).

66 For more information on the voting rights of persons with criminal convictions, please visit the Brennan Center’s website at: [http://www.brennancenter.org/content/section/category/voting\\_after\\_criminal\\_conviction/](http://www.brennancenter.org/content/section/category/voting_after_criminal_conviction/). See also ERIKA WOOD, RESTORING THE RIGHT TO VOTE (Brennan Center for Justice ed., 2008) available at [http://www.brennancenter.org/content/resource/restoring\\_the\\_right\\_to\\_vote/](http://www.brennancenter.org/content/resource/restoring_the_right_to_vote/) for a discussion of why voting rights should be restored to persons with criminal convictions upon release from prison.

67 The thirteen states are Hawaii, Illinois, Indiana, Massachusetts, Michigan, Montana, New Hampshire, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, and Utah.

68 Those eight states are Alabama, Arizona, Delaware, Florida, Mississippi, Nevada, Tennessee, and Wyoming.

**APPENDIX C**

- 69 The five states are California, Colorado, Connecticut, New York, and South Dakota.
- 70 These twenty states are Alaska, Arkansas, Georgia, Idaho, Indiana, Kansas, Louisiana, Maryland, Minnesota, Missouri, Nebraska, New Jersey, New Mexico, North Carolina, Oklahoma, South Carolina, Texas, Washington, West Virginia, Wisconsin. (Nebraska imposes a two-year waiting period after completion of sentence.)
- 71 42 U.S.C. § 1973gg-6(a)(3)(b) (2008).
- 72 42 U.S.C. § 15483(a)(2)(A)(ii)(I) (2008).
- 73 *See* Ky. Rev. Stat. Ann. § 116.113 (2008).
- 74 *See* Nev. Rev. Stat. Ann. § 293.540(3) (2008) (vesting county clerks with the task of canceling the voter registrations of persons convicted of felonies).
- 75 Unless otherwise cited, information pertaining to Washington was derived from interviews with four county board of elections officials as well as with staff from the Secretary of State's office conducted during February-April, 2007. All interviews are on file with the Brennan Center.
- 76 Fla. Stat. Ann. § 98.075(5) (2008).
- 77 For example, the Missouri statute specifically requires the county's election authority, which is generally the county auditor, to *remove* registrants reported dead or adjudged incapacitated, but with respect to those with criminal convictions, the statute only directs that the election authority to determine the voting qualifications of those reported convicted or pardoned. Mo. Rev. Stat. § 115.199 (2008). Some local officials in Missouri indicated that it is not their practice to purge persons convicted of disenfranchising crimes from the rolls. Instead, the registrant is placed in a particular status indicating current ineligibility. When the registrant's sentence has been completed, the person's eligibility is reactivated upon a showing of the appropriate documentation. *See* interviews with officials from city boards of election in Missouri conducted in 2007. Also, Pennsylvania, which automatically restores voting rights upon release from prison, does not indicate in its election statutes that individuals are removed because of incarceration — instead, the statute specifies that incarcerated persons are not eligible for absentee ballots. *See* 25 Pa. Cons. Stat. Ann. § 2602(w) (2008).
- 78 42 U.S.C. §§ 1973gg-6(g)(1), (g)(5) (2008).
- 79 Fla. Stat. Ann. § 98.093(2)(c)-(f) (2008) (stating that the department of law enforcement, board of executive clemency, and department of corrections, in addition to the U.S. Attorney, will provide information about people with criminal convictions to election officials); Ind. Code Ann. §§ 3-7-46-1, 3-7-46-6 (2008) (stating that department of correction and county sheriffs will provide information about people with criminal convictions).
- 80 For example, in Nevada, the state statute does not specify where the purging officials are to receive information on who has been convicted of disqualifying convictions. Nev. Rev. Stat. Ann. § 293.540(3) (2008). Note, however that Nevada statutes do require the Director of the Department of Corrections to submit monthly to each county clerk in this state a list which provides the name of each persons released from prison by expiration of term of imprisonment during the previous month or who was discharged from parole during the previous month. *See* Nev. Rev. Stat. Ann. § 209.134 (2008).
- 81 In Nevada, local election officials reported varying practices with respect to the removal of individuals with criminal convictions. One local official reported a practice of obtaining information on disqualifying convictions from jury questionnaires. Another stated that he receives such information from the state Department of Corrections. A third reported finding information on disqualifying convictions by reviewing courts' judgments.
- 82 42 U.S.C. § 15483(a)(2)(B)(iii) (2008).

**APPENDIX C**

- 83 Nevada officials offered examples of this assumption.
- 84 Interview with a county election official in Michigan conducted in September 2008 is on file at the Brennan Center. A county official in Washington similarly reported that the newer registration record is removed when faced with a known duplicate.
- 85 *E.g.*, Missouri's statewide voter registration database creates a duplicate list on a monthly basis, and local election officials are responsible for working through the list. (Confirmed by a Missouri county board of election official.) Washington's statewide voter registration list produces a potential duplicate report that local election officials check daily. (Confirmed by a Washington county board of elections official.) The Ohio Secretary of State's office creates a daily duplicate list that is accessed by county elections officials. (Confirmed by a Ohio county board of elections officials.)
- 86 Mo. ANN. STAT. § 115.165(4) (2008).
- 87 Unless another authority is otherwise cited, information in this report about Missouri was derived from interviews with staff from the Secretary of State's office, officials from city boards of election, a county election official, and voter protection advocates conducted in 2007. All interviews are on file with the Brennan Center.
- 88 See, e.g., NEV. REV. STAT. ANN. § 293.540(9) (2008) (authorizing removal of duplicate records, but providing no criteria for identifying matching records). But see WASH. REV. CODE ANN. § 29A.08.610 (2008) (providing required criteria of identical date of birth, similar names and compared signatures; the only statute of those surveyed to provide such detailed criteria).
- 89 Unless another otherwise cited, information in this report about Ohio was derived from interviews with county board of elections officials conducted during February-March, 2007. All interviews are on file with the Brennan Center.
- 90 A Missouri board of election official attested to the consequences of these periods of heightened activity.
- 91 This has been the case, for instance, in Missouri and Ohio according to local elections officials there.
- 92 See 42 U.S.C. § 1973gg-6(b)(2) (2008).
- 93 42 U.S.C. § 1973gg-6(d)(2) (2008).
- 94 See, e.g., U.S. Election Assistance Commission, *The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office 2005-2006* 97 (2007), available at [http://www.eac.gov/clearinghouse/docs/the-impact-of-the-national-voter-registration-act-on-federal-elections-2005-2006/attachment\\_download/file](http://www.eac.gov/clearinghouse/docs/the-impact-of-the-national-voter-registration-act-on-federal-elections-2005-2006/attachment_download/file).
- 95 This scenario reportedly occurred in both 2000 and 2006 in precincts in St. Louis, Missouri according to voter protection advocates working in the state.
- 96 Interviews with voter protection advocates in Missouri conducted in 2007.
- 97 OHIO REV. CODE ANN. § 3503.21(B) (2008).
- 98 Ohio boards of election officials confirmed this practice.
- 99 Wis. STAT. ANN. § 6.50(1)-(3) (2007). Note that Wisconsin, a state with Election Day registration, is exempt from the NVRA.
- 100 While the NVRA and some state laws contemplate the removal of persons from voter registration rolls for the reason of mental incapacitation in accordance with state law, our interviews with local officials indicate that very few registrants are purged from voter rolls on this basis.

**APPENDIX C**

101 42 U.S.C. § 1973gg-6(a)(3)(b) (2008).

102 25 PA. CONS. STAT. § 1302(a)(4) (2008).

103 IND. CODE ANN. § 12-26-2-8(1)(F) (2008).

104 See *Id.* § 3-5-5-17 (2008) (specifying that individuals who are committed to institutions for the mentally ill do not gain residency in the precinct of the institution).

105 OR. CONST. art. 2, § 3 (2007).

106 MO. REV. STAT. §§ 115.199, 115.133 (2) (2008); N.Y. ELEC. LAW § 5-400(1)(c) (Consol. 2008) (canceling a voter's registration, including the registration of a voter in inactive status, if he has been adjudicated incompetent).

107 NEV. REV. STAT. ANN. § 293.540(2) (2008).

108 FLA. STAT. ANN. § 98.075(4) (2008). Washington and Ohio similarly indicate that the declaration of mental incapacitation must be specifically with respect to voting to warrant removal from the rolls. WASH. REV. CODE ANN. § 29A.08.515 (2008) (canceling the voter registration for one who has been appointed a guardian and adjudicated incompetent with respect to voting); OHIO REV. CODE ANN. § 3503.21(4) (2008) (canceling a registration based upon adjudication of incompetency of the registered elector for the purpose of voting).

109 Confirmed by interviews with local boards of election officials in Kentucky, Nevada, and Ohio conducted in 2007. All interviews are on file at the Brennan Center.

110 KY. REV. STAT. § 116.113(2) (2008) (circuit court). In Florida, Missouri, Nevada, and Ohio, election officials also receive lists of individuals ineligible to vote due to adjudication of mental incapacity from state courts. FLA. STAT. ANN. § 98.093(2)(b) (2008) (circuit court); MO. REV. STAT. § 115.195(3) (2008) (probate division of the circuit court); NEV. REV. STAT. ANN. § 293.542 (2008) (district court); OHIO REV. STAT. § 3503.18 (2008) (probate judge).

111 Washington's statutes strongly suggest as much. The text of the statute indicates that the computerized statewide voter registration list must be coordinated with other agency databases within the state, including the office of the administrator for the courts. See WASH. REV. CODE ANN. § 29A.08.651(5) (2008). However, the statute is not more explicit than the county auditor will receive official notice that a court has imposed a guardianship for an incapacitated person and has determined that the person is incompetent for the purpose of rationally exercising the right to vote. See *Id.* § 29A.08.515.

112 See N.Y. ELEC. LAW §§ 5-614(5), 5-106(6) (Consol. 2008). Note that lists can be also be supplied by any court with jurisdiction over such matters. *Id.* § 5-708(3).

113 This was confirmed by county boards of election officials in Washington; Press Release, Wash. Sec'y of State, State's First Consolidated List of Registered Voters Combats Voter Fraud (Feb. 20, 2007), available at [http://www.secstate.wa.gov/office/osos\\_news.aspx?i=FenKyLcm7pnRO0P0kcR9kA%3d%3d](http://www.secstate.wa.gov/office/osos_news.aspx?i=FenKyLcm7pnRO0P0kcR9kA%3d%3d).

114 John Ferro, *Deceased Residents on Statewide Voter List*, POUGHKEEPSIE JOURNAL, Oct. 29, 2006.

115 *Id.*

116 *Id.*

117 Office of the Inspector General, Social Security Administration, *Audit Report 2* (Sept. 2006), available at <http://www.ssa.gov/oig/ADOBEPDF/A-06-06-26020.pdf>.

118 An Ohio election official reported that entire households were removed when an address appeared in the national change of address list on account of one individual associated with that address moving. A

**APPENDIX C**

Kentucky county official similarly reported that the National Change of Address database is unreliable and that the postal service is incapable of differentiating which person in a household has moved.

119 An Ohio county official reported that the list he received with the names of deceased residents sometimes contained records without dates of birth, making it hard to use to guide the removal of deceased registrants. A Nevada official opined that the lists from the Department of Vital Statistics were of an adequate quality, but sometimes hard to use because they provided a decedent's age instead of providing the decedent's date of birth.

123 Kandiss Crone, *Hosemann: Voter Purge Violated Federal Law*, WLBT News 3, Mar. 5, 2008, <http://www.wlbt.com/Global/story.asp?s=7973229>; Lucy Weber, *Purged Voting Rolls to be Fixed*, CLARION LEDGER, Mar. 6, 2008, at 1A; Lucy Weber, *Thousands of Names Removed From Madison County Voter Rolls*, CLARION LEDGER, Mar. 5 2008, at 1; Lucy Weber, *Resignation, Investigation Urged in Madison Co. After Vote-Roll Purge*, CLARION LEDGER, Mar. 7, 2007, at 1A; Cheryl Lasseter, *Landrum Asking for Voter-Roll Investigation*, WLBT News 3, Mar. 6, 2008, <http://www.wlbt.com/Global/story.asp?s=7977823>.

124 Andrew Ujifusa, *Change to Voter Rolls Called Into Question*, MADISON COUNTY HERALD J., Mar. 13, 2008, at 1; Kandiss Crone, *Hosemann: Voter Purge Violated Federal Law*, WLBT News 3, Mar. 5, 2008, <http://www.wlbt.com/Global/story.asp?s=7973229>; Lucy Weber, *Purged Voting Rolls to be Fixed*, CLARION LEDGER, Mar. 6, 2008, at 1A; Lucy Weber, *Thousands of Names Removed From Madison County Voter Rolls*, CLARION LEDGER, Mar. 5 2008, at 1; Lucy Weber, *Resignation, Investigation Urged in Madison Co. After Vote-Roll Purge*, CLARION LEDGER, Mar. 7, 2007, at 1A; Cheryl Lasseter, *Landrum Asking for Voter-Roll Investigation*, WLBT News 3, Mar. 6, 2008, <http://www.wlbt.com/Global/story.asp?s=7977823>.

125 See generally WASH. REV. CODE ANN. § 29A.08.605 (2008); Ky. Rev. Stat. ANN. § 116.112(6) (2008).

126 See FLA. STAT. ANN. § 98.075(3) (2008); N.Y. ELEC. LAW § 5-402(2) (Consol. 2008). Interestingly, Florida's decision to exempt persons presumed deceased from notice requirements is in contrast to its statute squarely requiring that a registrant be given notice and the opportunity to respond to the charge of ineligibility on account of mental incapacitation prior to removal from the registration rolls, FLA. STAT. ANN. § 98.075(4), (7) (2008), protections for which Florida is unique among the states studied in expressly providing.

127 IND. CODE ANN. § 3-7-46-9 (2008) (requiring notification after removal from the registration list, specifically sent to the last known address of all people disenfranchised on account of imprisonment not later than the day following the day that the registration has been canceled from the rolls).

128 FLA. STAT. ANN. § 98.075(7) (2008); WASH. REV. CODE ANN. § 29A.08.520(1) (2008) (requiring that if a registrant is found on a list of felons, the canceling authority must send a notice of the proposed cancellation and an explanation of the requirements for restoring the right to vote once all terms of sentencing have been completed; if the person fails to respond within thirty days, the registration is to be canceled).

129 IND. CODE ANN. § 3-7-46-9 (2008).

## Voter Suppression Incidents 2008

A list of voter suppression incidents from the 2008 election.

Wendy R. Weiser

Margaret Chen

PUBLISHED: November 3, 2008

With less than two weeks before Election Day, substantial barriers remain that will continue making it difficult – and occasionally impossible – for some eligible voters to vote, and to be certain that their votes will count. The past year has seen a spike in challenges facing voters – from no match-no vote policies, to partisan challenges to voter eligibility, voter purges, misguided voter matching policies, and voter intimidation. Additionally, other systemic problems, including problems with ballots and voting technology, continue to plague the elections process. In light of this developing story, the Brennan Center has compiled a comprehensive synopsis of current voter suppression incidents around the country. The stories are categorized by theme, and this document will be continually updated in the days prior to the election. Download PDF [here](#).

*The Brennan Center will be updating and re-posting this document regularly until Election Day.*

### No Match, No Vote

*Some states will not register voters or will purge them from the voter rolls if election officials cannot match their voter registration information against information in other government databases. The problem is the computer match processes states use are inherently unreliable. Between 15% and 30% of all match attempts fail because of typos, other administrative errors, and minor discrepancies between database records, such as a maiden name in one record and a married name in another or a hyphen in one record and not another. No match, no vote policies can block hundreds of thousands of voters through no fault of their own. More information on no match, no vote policies is available [here](#). This year, no match, no vote efforts across the country, if successful, could have a significant impact on the election, affecting tens of thousands of new voters.*

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

Ohio. On September 26, 2008, the Ohio Republican Party asked a federal court to issue an emergency ruling requiring the state to generate a list of more than 200,000 new voters whose information did not match other state records, presumably so those voters could be purged from the rolls right before the election, forced to vote provisional ballots, or challenged at the polls. They asked the court before the absentee ballots cast by new registrants were opened and counted. A federal court granted the temporary restraining order, and after a three-judge panel on the U.S. Court of Appeals for the Sixth Circuit stayed that order, the full appeals court, sitting *en banc*, reinstated it. On emergency review, the U.S. Supreme Court vacated the TRO on October 17, 2008, preventing chaos in the election in Ohio and protecting hundreds of thousands of Ohio citizens from disenfranchisement-by-typo. That same day, one of the plaintiffs in the federal lawsuit filed a virtually identical suit with the Ohio Supreme Court, seeking essentially the same relief they lost in the federal courts. He also asked the court to prevent the counting of absentee ballots cast by unmatched voters unless or until the mismatches are cleared. The plaintiff voluntarily dismissed the lawsuit on October 21, 2008, and on October 22, 2008, the Secretary of State issued two directives, which ensure that (1) voter may be challenged at the polls solely on the basis of a mis-match; and (2) no absentee ballot may be rejected (or not counted) solely on the basis of a mis-match. Despite these directives and the failure of the efforts in court, Representative John Boehner of Ohio wrote to President Bush asking him to pressure the Department of Justice to weigh in on the issue. President Bush forwarded the request to Attorney General Mukasey, but press reports have indicated that the Attorney General will refrain from getting involved.

Florida. On September 8, 2008, the Florida Secretary of State instructed election officials to reject voter registration applications that do not pass an error-prone computer match process. In the first three weeks of the policy, 15% of registrations were initially bounced because of failed computer matches; election officials were able to catch and correct obvious typos in about ¾ of these cases, but to date, more than 12,000 voters are being kept off the rolls. An analysis of the list reveals that African Americans make up 39% of blocked voters, and Latinos make up 34% of blocked voters whose race is known. There will likely be not enough time for election officials to correct the errors in the tens of thousands of registrations that came in right, but there is some reason for optimism. On October 21, 2008, legal counsel for the Florida Association of Supervisors of Elections issued a legal opinion stating that election officials could implement an Election Day solution in which un-matched voters could resolve matching problems at the polls, ensuring that their votes will count. The Brennan Center and other groups have called upon the supervisors to adopt a polling-place solution. Even Secretary of State Kurt Browning, who initially took the position that county election officials were prohibited from developing an Election Day fix, has acknowledged in recent public statements that they are authorized to do so. More information about "no match, no vote" in Florida, including the pending lawsuit filed by the Brennan Center in 2007, is available here.

Wisconsin. After the Wisconsin Government Accountability Board (the state's election board) rejected a proposal in July to retroactively implement a no "match, no vote" policy for all voters who registered since 2006, on September 10, the Attorney General sued the board seeking to force such a policy right before the election. The Board conducted an audit of its voter rolls and found a 22% match failure rate, including for 4 of the 6 members of the board. On October 23, 2008, the court dismissed the Attorney General's lawsuit, after concluding he lacked standing to bring the case; HAVA did not require the Government Accountability Board to link voters' eligibility to a successful match; and that doing so would violate the materiality provision of the Voting Rights Act. More information can be found here.

Other states. No match, no vote policies are in place also in Louisiana, Iowa, and South Dakota pursuant to policies adopted well before the 2008 elections. Tens of thousands of voters have been denied registration in

**C054**

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

those states. Evidence suggests that Colorado also may be treating some voter registrations that fail to match as incomplete.

**APPENDIX C****Voter Purges**

*Election officials across the country routinely purge millions of names from the voter rolls. Although purging is necessary to keep the voter rolls up to date and accurate, a recent Brennan Center study demonstrates that the processes states use for purging are prone to error and vulnerable to manipulation. Purges are typically done without notice to affected voters or the public, and without any public scrutiny whatsoever. As a result, thousands of registered voters show up at the polls each election year only to find that they are not on the rolls and cannot cast a ballot that will be counted. This year, unreliable and possibly illegal purges could keep thousands of votes from being counted.*

**Possible Illegal Purges Reported by New York Times.** According to a recent front-page article by the New York Times, several states have been illegally purging their voter rolls this year, including Colorado, Georgia, Indiana, Louisiana, Michigan, Ohio, and Nevada. (The Brennan Center has not independently verified all these purges.)

**Michigan.** Michigan illegally purged its voter rolls this year within 90 days of an election and using non-forwardable mailings to recently registered voters, according to a recent federal court ruling. The court ordered the restoration of about 1,400 voters who had been removed because their voter identification cards were returned as undelivered.

**Colorado.** In response to a New York Times article, the Colorado Secretary of State admitted that at least 2,454 voters were purged illegally within 90 days of a federal election. Several thousand additional records were purged as potential "duplicates" within 90 days of the election, also in violation of federal law. Another several thousand were illegally purged based on non-forwardable mailings to newly registered voters. Voting rights groups filed a lawsuit in federal court on October 24, 2008, alleging that the Colorado Secretary of State's recent purges violate federal law. On October 30, 2008, the parties entered into a court-approved agreement ensuring that the ballots of any wrongfully purged voter will be counted. The following day, after the Secretary of State told reporters that he was continuing to purge the voter rolls, Judge Kane ordered him to cease all efforts to remove names from the voter rolls before the election.

**Georgia naturalized citizens.** Georgia recently began using an unreliable matching process to purge the voter rolls of alleged non-citizens. The process they use misses naturalized citizens because it only checks the citizenship documents used to obtain driver's licenses, no matter how long ago, and those records are not updated when legal residents become naturalized. According to a State attorney, 4,538 voters, 3,821 of them newly registered, have been flagged as non-citizens. A federal court refused to block this practice in a recent lawsuit filed by the Mexican American Legal Defense and Education Fund and the Lawyers' Committee for Civil Rights Under Law. The United States has also intervened and said that the practice should have been pre-cleared. On October 27, 2008, a three-judge panel ruled that the State must allow voters whose names were flagged because of an attempted purge of alleged non-citizens to cast a ballot on Election Day.

**Muscogee County, Georgia.** Earlier this year, a county election administrator in Muscogee County, Georgia purged 700 people who were supposedly ineligible because of criminal convictions. The purge was highly

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

inaccurate and included people who never received even a parking ticket.

**APPENDIX C**

**Madison County, Mississippi.** About a week before the Mississippi primary, an election administrator in Madison County, Mississippi improperly purged **approximately 10,000** voters, reportedly from her home computer. Reportedly, the purge was detected when it was discovered that a local candidate was removed from the voter rolls. By all accounts, the Secretary of State's staff successfully reinstated the erroneously purged voters in time for the primary.

**Voter Challenges**

*Political operatives sometimes challenge voters' eligibility either before Election Day or at the polls, based on names culled from unreliable caging lists or other lists they develop. While the rules and procedures for voter challenges vary from state to state, these challenges can lead to voter intimidation, long lines at the polls, and disenfranchisement of eligible voters. Historically and in recent years, caging and challenge operations have targeted minority communities, students, and homeless citizens. Widespread challenges are expected across the country on Election Day. Recent incidents include:*

**Montana.** The Republican Party of Montana challenged the registrations of over 6,000 voters in 7 counties based on change of address information. Many were service members and students eligible to vote in Montana but who had their mail forwarded to where they were serving or going to school. Under Montana's challenge rules, these voters would have had to answer the challenges to the satisfaction of election officials before being allowed to vote. After a public outcry—including criticism by the Republican Lieutenant Governor—the party abandoned the challenges. For more information, click [here](#). In a resulting lawsuit brought by the Montana Democratic Party, on October 10, 2008, a federal judge found that the challenges were frivolous and that it would violate federal law for state election officials to deny anyone the ability to vote based on these challenges.

**No home, no vote.** The Chairman of the Republican Party of Macomb County, Michigan reportedly told an online publication that the party planned to mount challenges to voters whose names appeared on foreclosure lists. After public criticism and instructions by the Michigan Director of Elections that these challenges are insufficient under Michigan law, the Chairman denied that there were such plans (and even sued the publication for libel). There have been fears and reports that similar challenges will be mounted in other states, particularly battleground states such as Ohio where **more than 5%** of homes are currently in the foreclosure process. Similar challenges are possible across the country on Election Day unless election officials take immediate steps to ensure that those in danger of losing their homes do not also lose their vote. On October 20, 2008, the Democratic and Republican parties agreed that appearance on a foreclosure list is not a reasonable basis to challenge a voter and that no voter will be challenged on that basis. On October 24, 2008, an Indiana state court ruled that the appearance of a name on a foreclosure or eviction list is not a sufficient basis for a challenge or for a ballot not to be counted.

**Ohio mailer.** Ohio election officials sent a non-forwardable mailer to voters on the rolls, and over 600,000 were returned as undeliverable. The list was provided to the political parties, and there were fears that this list would be the basis of challenges. After concerns were raised, the Ohio Secretary of State issued a directive explaining that returned mail alone is not a sufficient basis to cancel a voter's registration or to sustain a pre-Election Day

**C056**

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

challenge. More information on why returned mail is an unreliable indicator of residence or eligibility can be found [here](#).

**Ashland County, Ohio.** A man filed challenges to the registrations of 21 young people currently incarcerated at a juvenile correctional facility arguing that they should have registered using their original home addresses, not the address of the correctional facility. There is no allegation and no reason to question that these individuals are not eligible to vote in Ohio. The Board of Elections upheld the challenges.

**Lake County, Illinois.** On October 28, 2008, the Illinois Republican Party filed a lawsuit seeking to segregate the ballots cast by Lake County voters who registered to vote through a particular voter registration group and to treat those ballots as provisional ballots instead of regular ballots. If the lawsuit succeeds, hundreds, perhaps thousands, of voters could face hurdles to having their votes counted.

**Indiana.** The Indiana Secretary of State stated that voters whose voter registration acknowledgment cards were returned to election officials as undeliverable may be challenged on Election Day. Thousands of voters could be affected. As noted above and [here](#), there are a number of reasons why undeliverable mail is an unreliable indicator of voter eligibility.

**Technical Barriers to Voter Registration and Voting**

*In the Jim Crow era, technical barriers to voter registration and voting were common. In the 1960s, Congress tried to put an end to these types of barriers, prohibiting officials from denying the right to vote based on any immaterial "error or omission" on voting-related paperwork or records. In this election cycle, there has been a resurgence of technical barriers based on the failure to check unnecessary boxes on forms.*

**Colorado registrations.** Colorado is treating applications missing unnecessary checkmarks to indicate that the registrant lacks a driver's license as incomplete. Thousands of recent registrations are already affected, and there will likely be more as counties process new forms. Two counties, Larimer and Jefferson, processed applications with missing checkmarks, prompting the Colorado Secretary of State to ask the state Attorney General for an informal opinion on the issue. The opinion, dated October 24, 2008, supports the Secretary of State's position, stating that applications with missing checkmarks are incomplete and should not be processed. On October 29, 2008, the Denver Elections Division announced that it would allow the remaining Denver voters whose applications are missing checkmarks to fix the problem and vote a regular ballot at the polls on Election Day.

**Florida registrations.** Florida still rejects voter registration forms submitted without checkmarks in check boxes that are duplicative of other information on the forms. Thousands of votes were lost in prior federal elections because of this practice.

**Ohio absentee ballots.** In September 2008, the Ohio Secretary of State announced the election officials must reject absentee ballot requests made by voters whose eligibility was not in serious doubt because of their failure to check an unnecessary check box. A federal court ordered the Secretary of State to process those ballot requests.

C057

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

Nevada voter registration corrections. On October 20, 2008, the Nevada Republican Party wrote to the Secretary of State asking him to stop county officials from allowing voters who registered before the voter registration deadline but whose applications were incomplete to vote after correcting their applications. Nevada law allows voters to correct their applications within fifteen days after receiving notice from the state. On October 22, 2008, the Nevada Secretary of State rejected this request and ruled that applications corrected after the voter registration deadline but within 15 days after the county clerk sends notice are timely.

Voter errors on absentee ballots. In Cuyahoga County, Ohio, 2,700 absentee ballots have been rejected and may not be counted because voters did not sign or seal their ballots properly. In Palm Beach County, Florida, election officials rejected hundreds of absentee ballots because voters did not sign their ballot envelopes or signed in the wrong place.

New Mexico hand-tallied ballots. The New Mexico Secretary of State, on the advice of the Attorney General, planned to reject hand-tallied paper ballots that voters failed to mark properly. The state Supreme Court ruled that votes must be counted if election judges unanimously agree on the voter's intent in marking the ballot. Improper marks on ballots may be an indication of poor ballot design and instructions.

**Student Voting Barriers**

*Students who attend school away from their homes often fulfill residency and other requirements to be able to register and vote in the communities in which they attend school, but there are obstacles and efforts to discourage them to register and vote. Across the country, there have been reports of widespread misinformation about student voting rights, misleading and intimidating statements, and registration and residency barriers unique to students. The fact that students are readily identifiable at their college community polling stations also makes them easy targets for partisan challengers or voter intimidation efforts. The result is a disproportionate number of student voters being challenged at the polls, discouraged from voting, or prematurely told to cast a provisional ballot.*

Dorm room addresses. Local registrars in several states, including in Virginia, were denying registration to students who provided dorm room addresses even though those are valid registration addresses.

Misleading and intimidating information. A registrar in Montgomery County, Virginia, affecting Virginia Tech University, issued a memo giving incorrect and intimidating information to students about the consequences of registering to vote, including possible loss of financial aid and tax dependence status. Similarly, a county clerk in Colorado Springs, Colorado incorrectly told students at Colorado College that they could not vote at school if their parents claimed them as dependents on their federal tax returns. The websites of the Virginia and Indiana Secretary of States still contain misleading information that could dissuade eligible student voters.

Prairie View, Texas. On October 10, 2008, the registrar of Waller County, Texas entered into a consent decree with the U.S. Department of Justice to stop imposing unfair and illegal barriers to student voting.

Restrictive residency rules. Several states make it very difficult for students to establish residency for voting purposes. In Idaho and Tennessee, for example, students cannot establish voting residency unless they have

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

affirmative plans to remain in the state after graduation. Virginia and Indiana also make it difficult for students to establish residency.

**Restrictive absentee voting.** Michigan and Tennessee require all first-time voters who registered by mail to vote in person; they cannot vote absentee. This makes it nearly impossible for college students (a great percentage of whom are young, first-time voters) to vote in their hometowns. 66 of the Michigan's 83 county clerks have partnered to verify students' identities where they attend school to allow these first-time voters to cast absentee ballots instead of crossing the state to vote in their hometowns. A state legislator has asked the Attorney General to block the practice.

**Intimidation aimed at students.** A flier recently disseminated on the campus of Drexel University in Philadelphia warned that undercover officers would be present at the polls, looking for voters with outstanding warrants or parking violations.

**Voter Registration Access**

*According to the U.S. Census Bureau, 30% of Americans were not registered to vote in 2006. A range of barriers to voter registration access could affect registration rates in certain communities. Several states have enacted laws that impose unnecessary burdens on organized efforts to register voters, which target communities that have the greatest barriers to registration. Threats of criminal penalties and crippling civil fines for failure to comply with requirements have forced community groups to stop or substantially cut down on registering voters. A policy brief on restrictions to voter registration drives can be found here.*

**Veterans.** The Department of Veterans' Affairs denied voter registration access to residents and patients of its facilities, refusing to allow election officials or nonpartisan groups to offer voter registration services, and failing to provide such services itself. A last-minute change in policy offered only a partial fix to this problem. More information is available [here](#).

**Voter registration drive restrictions.** Several states, including New Mexico and Florida, have enacted restrictive laws that interfere with the ability of groups to do voter registration drives. The Florida law was tied up in litigation filed by the Brennan Center and so has not been in effect for this election season. A court refused to block the New Mexico law, and a number of community groups, especially those that work with volunteers, have not been able to register new voters.

**Noncompliance with federal voter registration law.** A number of states have not been providing voter registration services at social service agencies, as required by the federal Motor Voter law. Recent lawsuits filed by Project Vote and Demos seek to enforce states' compliance with the implementation of the NVRA. On October 28, 2008, a federal appeals court ruled that Ohio state officials violated federal law by failing to provide voter registration services at public assistance offices.

**Voter Intimidation and Deceptive Practices**

C059

<https://www.brennancenter.org/our-work/research-reports/voter-suppression-incidents-2008>

7/10

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

*In recent elections, robo-phone calls and misleading flyers, often targeting minority and low-income communities, have spread false information regarding elections and voting qualifications. For examples of such documents, click here.*

**New Mexico.** Two families reported visits by a private investigator inquiring about relatives that the state Republican Party alleges voted fraudulently in the June primary. The private investigator requested identification for relatives in question as proof of their eligibility, potentially in violation of federal law. The Bernalillo County Clerk confirmed both individuals' legitimate registrations. On October 27, 2008, the Mexican American Legal Defense and Education Fund filed a lawsuit seeking an injunction to stop further intimidation.

**Virginia.** A phony State Board of Elections flier was posted around the Hampton Roads area, stating that Republicans vote on Tuesday, November 4th, and Democrats vote on Wednesday, November 5th. The Virginia State Police determined that flier was an "office joke" and not intended to deceive voters.

**Philadelphia fliers.** Deceptive fliers about the consequences of voting were distributed in a predominantly African American neighborhood in Philadelphia.

**Greene County, Ohio.** A law enforcement officer in Greene County, Ohio sought the names of 300 voters who registered and voted at the beginning of Ohio's early voting period in a town made up largely of students. The effort, which was later withdrawn, was criticized as an effort to intimidate student voters and deter others from voting.

**Hamilton County, Ohio.** In a move that could intimidate and deter voters, Hamilton County Prosecutor Joe Deters recently requested, via subpoena, personal information for 40% of the voters who registered and immediately cast a ballot during the weeklong period in which Ohio allows same-day registration and voting.

**California.** Dozens of voters reported that a firm hired by the California Republican Party tricked them into registering with the GOP when signing a petition they believed to toughen penalties against child molesters. The Los Angeles County Registrar-Recorder is reviewing 9,000 registration affidavits submitted by the firm to determine if any of the party affiliation changes were involuntary.

**Travis County, Texas.** County officials are looking for a man who may be providing misleading information regarding the state's straight-party voting option, telling voters that in addition to a straight-party vote, they must also select the name of the candidate they would like vote for president. In actuality, doing this would deselect the mark automatically made by the straight-party vote.

**Madison County, North Carolina.** Residents have complained of misleading calls that provide inaccurate information regarding absentee ballot deadlines. The State Board of Elections is investigating.

**Kern County, California.** A radio host announced that Republicans are being urged to vote on November 4 and Democrats on November 5. Although the host has said he meant it as a joke, the county elections chief has asked the radio station to stop providing misleading information.

**Baltimore City, Maryland.** In Maryland, people with felony convictions can register to vote when they have completed the terms of their sentence, including probation and parole. The Baltimore city elections board sent

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

letters to 422 people with felony convictions who registered to vote asking them to verify that they had completed their sentence, but the letter did not provide any information on what proof these voters must provide, who to contact, or a deadline for response. Although the state Attorney General has said it would attempt to contact these individuals, it is unclear if they will be added to the rolls for the November election.

**Texas.** In early October, an email widely circulated **falsely warned** voters that a straight-party vote would not register a vote for president. In fact, if a voter using Texas ballots separately records a vote for president after voting straight-party, the vote for president will be deselected and will not count.

**Florida.** The St. Petersburg Times reported that the Republican National Committee **sent** non-forwardable mailings to older Democratic voters, falsely stating that recipients are registered as Republicans and suggested that undeliverable mailings could be used to compile challenge lists. The RNC claimed that the controversial mailing was just a fundraising piece.

**Wisconsin.** The Wisconsin Attorney General announced that he will deploy more than 50 assistant attorney generals and state agents on Election Day to polling places around the state to guard against voter fraud. This is expected to intimidate voters.

**Minnesota.** The non-profit group Minnesota Majority, pretending to be from the Secretary of State's office, made calls to voters questioning their registrations in a supposed attempt to uncover voting irregularities.

**Poor Ballot Design**

Poorly designed ballots—remember the butterfly ballot?—can lead to the loss of thousands of votes. A recent Brennan Center report demonstrates that ballot design problems are still widespread and have caused thousands of lost votes in recent elections. Already, there have been problems relating to November's election:

**Mississippi Senate race.** Mississippi election officials were sharply criticized, in a New York Times editorial and in a letter sent by the Brennan Center, for their decision to place the Wicker-Musgrove U.S. Senate race at the bottom of Mississippi's ballot. This "ballot trick" placed the Senate race far below the other federal races listed in the 2008 election, creating a confusing layout for the ballot, one that could potentially mislead and disenfranchise hundreds of thousands of Mississippi voters in that race, particularly low-income and minority voters. More information can be found [here](#).

**Twelve Ohio counties.** Twelve Ohio counties released sample paper ballots that split the presidential contest over two columns for this November's election. As the Brennan Center's **study** found, this particular layout often confuses voters and causes them to double-vote, an action which ultimately results in an uncounted ballot. On September 17, 2008, the Brennan Center sent a **letter** to the board of elections in all Ohio counties, urging them to reconsider their ballot layout and place the presidential contest in a single column on the paper ballot. The Ohio Secretary of State forwarded the letter to all county board of elections as well. Further details can be found [here](#).

5/25/2021

Voter Suppression Incidents 2008 | Brennan Center for Justice

**APPENDIX C**

North Carolina straight-party voting. As a result of a **ballot design problem** in North Carolina, votes for president may have already been lost in the early voting period. The ballot is **designed**, counter-intuitively, so that a straight-party vote *does not* include a vote for president; voters must separately mark their presidential contest choice. In previous federal elections, between 2.5% and 3.2% of ballots in North Carolina did not include a vote for president. A Brennan Center **study** found that if more than 1% of voters fail to cast a vote for president, it is typically an indication of a ballot design flaw or other problem.

**Election Day Preparedness**

*Inadequate staffing, poor resource allocation, ballot shortages, and machine malfunctions can lead to long lines at the polls, or worse, discourage people from voting at all. These problems have already been reported from across the country in early voting. The Brennan Center, Common Cause, and Verified Voting recently released a 50-state study of states' contingency plans and vote counting procedures, finding that many states need improvement. A report released by the Advancement Project finds that several battleground states are not prepared for unprecedented voter turnout in November, and that resources are inequitably allocated. This document is not tracking the incidence of these problems.*

10/10

### **Shelby County: One Year Later**

By Tomas Lopez

One year ago, the U.S. Supreme Court gutted the most powerful provision in the Voting Rights Act of 1965 — a law widely regarded as the most effective piece of civil rights legislation in American history. Specifically, in *Shelby County v. Holder*, the Court invalidated the formula that determined which states and localities, because of a history of discrimination, had to seek federal “preclearance,” or approval, from either the Department of Justice or a federal court before implementing any changes to their voting laws and procedures. For nearly 50 years, preclearance (set forth in Section 5 of the Voting Rights Act) assured that voting changes were transparent, vetted, and fair to all voters.

Before the *Shelby County* decision, the Brennan Center examined the potential consequences of a ruling against the preclearance process in *If Section 5 Falls: New Voting Implications*. In just the year since *Shelby County*, most of the feared consequences have come to pass — including attempts to: revive voting changes that were blocked as discriminatory, move forward with voting changes previously deterred, and implement new discriminatory voting restrictions.

The decision has had three major impacts:

- Section 5 no longer blocks or deters discriminatory voting changes, as it did for decades and right up until the Court’s decision.
- Challenging discriminatory laws and practices is now more difficult, expensive, and time-consuming.
- The public now lacks critical information about new voting laws that Section 5 once mandated be disclosed prior to implementation.

This paper summarizes some of the stories behind these facts, and tracks the voting changes that have been implemented in the states and other jurisdictions formerly covered by Section 5: Alabama, Alaska, Arizona, Georgia, Louisiana, Mississippi, South Carolina, Texas, and Virginia in their entirety; and parts of California, Florida, Michigan, New York, North Carolina, and South Dakota.

## I. The Loss of Section 5 Has Removed an Effective Deterrent Against Harmful Election Law Changes

Section 5 was a uniquely effective law that blocked or otherwise prevented scores of discriminatory voting changes from being implemented. While the *Shelby County* decision argued that the law was effectively obsolete, Section 5 remained a powerful tool through June 2013. In the 15 years before its operation was halted, Section 5 blocked 86 laws through its administrative process<sup>1</sup> and several more through litigation.<sup>2</sup> At least 13 of these laws were blocked in just the final 18 months before the *Shelby* Court's ruling.<sup>3</sup>

Its effectiveness went beyond the laws it blocked. In one recent six-year period, 262 voting changes were withdrawn or altered after the Department of Justice (DOJ) asked the jurisdictions for more information to assess whether they were discriminatory under the Voting Rights Act (VRA).<sup>4</sup> That figure does not include the hundreds of voting changes that were deterred because jurisdictions knew they would not withstand VRA review.

### A. *Statewide Voting Changes That Were or Would Likely Have Been Blocked*

Immediately after *Shelby County*, one state moved forward with implementing laws that were previously blocked, two states moved forward with passed laws that may have been blocked, and one state passed new restrictive legislation:

- **Texas:** On the very day of the *Shelby County* ruling, Texas officials announced<sup>5</sup> they would implement the state's strict photo ID law, which was previously blocked by Section 5 because of its racial impact. “[U]ndisputed... evidence demonstrates that racial minorities in Texas are disproportionately likely to live in poverty, and [that the ID law] will weigh more heavily on the poor,” a federal court held.<sup>6</sup> Early assessments indicated that between 600,000 and 800,000 registered voters in Texas lacked photo ID, over 300,000 of them Latino.<sup>7</sup> Voter advocates, including the Brennan Center and the DOJ, have now sued the state of Texas over this law under Section 2 of the Voting Rights Act, among other claims.
- **North Carolina:** Also shortly after the *Shelby County* decision, the state legislature passed a law that imposed a strict photo ID requirement, significantly cut back on early voting, and reduced the window for voter registration. This law is widely regarded as the most restrictive piece of voting legislation passed in recent years. Lawmakers waited until after preclearance was gone to move forward with the legislation, with a State Senate committee chair telling the press after the Court's decision, “now we can go with the full bill,” rather than a pared down, less restrictive version.<sup>8</sup> Prior to *Shelby County*, the legislation, which is currently being challenged under Section 2 of the VRA, among other claims, would have required preclearance review before going into effect. Data shows the law will disproportionately affect minorities. In North Carolina, the State Board of Elections identified more than 300,000 registered voters who lack a DMV-issued ID, the most common form of ID accepted under the state's strict law.<sup>9</sup> One-third of these voters are African American.<sup>10</sup> And 7 in 10 African Americans who cast ballots

in 2008 used the early voting period (23 percent of whom did so during the week that was cut by the law).<sup>11</sup>

- **Alabama:** After the *Shelby County* decision, the state moved ahead with its law requiring strict photo ID to vote. This law passed in 2011 and would have required preclearance. However, state officials never submitted the bill for preclearance<sup>12</sup> and did not announce plans for implementation until after the Supreme Court's ruling.<sup>13</sup> More than 30 percent of Alabama's voting-age citizens live more than 10 miles from the nearest state-ID issuing office.<sup>14</sup> According to a Brennan Center study, in 2012, 11 counties with substantial black populations had state driver's licenses offices that were open only once or twice per week.<sup>15</sup> Even those looking to register to vote in Alabama will experience challenges — legislators also passed a law requiring individuals to provide documentary proof of citizenship when registering to vote.<sup>16</sup> This measure is not currently in effect.
- **Mississippi:** Shortly following the Supreme Court's ruling, state officials moved to enforce its photo ID law, which the state submitted for preclearance but was never allowed to implement.<sup>17</sup> Nearly 35 percent of the state's voting-age population lives more than 10 miles from the nearest office that will issue ID and,<sup>18</sup> in 2012, 13 contiguous counties with sizable African-American populations lacked a single full-time driver's license office.<sup>19</sup>

These laws exist alongside other attempted or proposed statewide policy measures that can restrict the ability to vote through design and/or poor implementation:

- In 2013, Florida officials attempted to purge thousands of people from the state's voter's rolls because of suspicions they were non-citizens.<sup>20</sup> The state ultimately suspended these efforts.<sup>21</sup> When it tried the same thing in 2012, its purge list began with 180,000 suspected non-citizens on the voter rolls and was reduced to approximately 2,700.<sup>22</sup> That purge list contained a disproportionately high number of Latino surnames. While Latinos compose 13 percent of Florida's registered voters, an analysis found they made up 58 percent of that group of approximately 2,700.<sup>23</sup> From the 180,000 to fewer than 3,000,<sup>24</sup> Florida eventually found fewer than 40 non-citizens suspected of voting illegally.<sup>24</sup>
- Also in 2013, Virginia officials sought to purge the names of tens of thousands of voters from the state's rolls. While a federal court allowed the purge to proceed,<sup>25</sup> the state's efforts were error-prone and taken unnecessarily close to that year's elections.<sup>26</sup> One month before the election, one county registrar found that of a list of 1,000 names he was told to purge, more than 170 were in error.<sup>27</sup>
- Arizona officials have proposed implementing separate voter registration systems for federal and state elections. The U.S. Supreme Court ruled last year that Arizona cannot ask for documentary proof of citizenship when voters sign up using the federal registration form.<sup>28</sup> State officials then devised a two-tiered system that would allow the state to require proof of citizenship documents for anyone registering to vote in a state election.<sup>29</sup> The Department of Justice has previously used Section 5 to block such dual registration systems.<sup>30</sup>

*B. Local Voting Changes That Were or Would Likely Have Been Blocked*

Section 5's loss will perhaps be felt most acutely at the local level. The great majority of voting law changes that were blocked as discriminatory under the Voting Rights Act were local: counties, municipalities, and other places that operate below the state level.<sup>31</sup> In the past year, the following changes and attempted changes have already taken place in jurisdictions previously covered in whole or in part by preclearance:

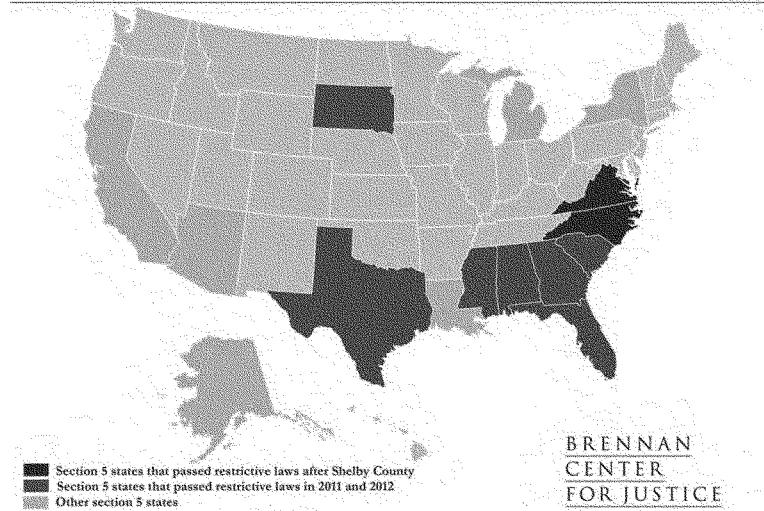

- In 2013, Galveston County, Texas, revived a redistricting plan for electing justices of the peace that was previously blocked by the DOJ because it discriminated against minority voters. The new map diminished minority voting strength by reducing the number districts where minority voters would have a fair and effective voice.<sup>32</sup> The Justice Department blocked a similar proposal under Section 5 only two years ago out of concern that "minority voters possess the ability to elect candidates of choice."<sup>33</sup> Now, without Section 5's protections, the districts are slated to be implemented in 2015,<sup>34</sup> but are being challenged in an ongoing case in federal court in the Southern District of Texas. The case went to trial this spring and is awaiting a decision.<sup>35</sup>
- The city of Pasadena, Texas, is redrawing its city council districts in a way that is expected to diminish the influence of its Latino voters in municipal government.<sup>36</sup> A functioning Section 5 would have blocked any new redistricting plan that would have made it harder for Latinos to elect their candidates of choice.
- After *Shelby County*, Georgia officials moved the dates of municipal elections in two counties with substantial African American populations from the traditional November date to another date. This may reduce black voter participation in local elections because the municipal elections are not occurring when citizens are voting in state and federal general elections. The DOJ blocked a similar proposal under Section 5 in 2012 because turnout is lower outside of November elections, and the drop in turnout is "significantly greater" for black voters than white voters.<sup>37</sup> After a federal court dismissed a challenge to the new date for one of the counties, municipal elections took place in May 2014.<sup>38</sup> Data as to minority participation is not yet available for that election, but overall turnout in that county was down nearly 20 percent (30.02 percent in 2014)<sup>39</sup> from the previous mayoral election (49.54 percent turnout in 2010).<sup>40</sup>

BRENNAN CENTER FOR JUSTICE

*C. Restrictive Voting Legislation in States Previously Covered by Section 5*

In 2013 and 2014, at least 10 of the 15 states that had been covered in whole or in part by Section 5 introduced new restrictive legislation that would make it harder for minority voters to cast a ballot. These have passed in two states: Virginia (stricter photo ID requirement and increased restrictions on third-party voter registration) and North Carolina (the above-discussed omnibus bill, which included the ID requirement, early voting cutbacks, and the elimination of same-day voter registration). Further, seven other formerly covered states also passed restrictive legislation in 2011 and 2012, prior to the *Shelby County* decision.

Voting Restrictions in Section 5 Covered States

## II. **Challenging Discriminatory Voting Laws is Now More Difficult, Expensive, and Time Consuming**

As described above, under Section 5, discriminatory voting laws could not go into effect unless they were vetted through the preclearance process, which consisted of either an effective administrative process or through litigation before a federal court. The jurisdiction had the choice of which preclearance route to take, and the vast majority of preclearance actions were done through the administrative process because it was cheaper, faster, and easier than preclearance litigation.

Consider Texas, where state lawmakers passed one of the country's most restrictive photo ID laws. That law did not and could not go into effect unless and until it was precleared by the DOJ or a three-judge federal court. In this instance, Texas first sought preclearance from the DOJ, but then eventually elected to litigate the matter before a federal court. Both the DOJ and the court denied preclearance, finding the restrictive photo ID requirement violated Section 5.

After the *Shelby County* decision, Texas put the previously blocked law into effect, and it remains so until voters can win a new lawsuit under another provision of the VRA, Section 2, making a similar showing, albeit under a different legal standard.<sup>41</sup> The photo ID law has been in place for local elections and the March 2014 primaries. The case is currently scheduled to go to trial before the 2014 election.

Challenging restrictive laws one by one under Section 2 or some other law is considerably more expensive than the administrative preclearance process these individual challenges now have to replace. The active Texas photo ID suit, which is a number of consolidated lawsuits, now lists more than 50 counsel of record on all sides.<sup>42</sup> In the months since that litigation began, the parties have produced more than 300 court filings, including motions, notices, and briefs, large and small. The consolidated North Carolina lawsuits include 40 counsel of record and have filed more than 120 documents.<sup>43</sup> The total cost of these lawsuits will be substantial. As a point of reference, three lawyers who participated in the Texas photo ID preclearance case in 2012 sought more than \$350,000 in attorneys' fees to cover their expenses.<sup>44</sup> The expenses for the active Texas photo ID litigation can expect to run into the millions.

### III. Without Section 5, Thousands of Voting Law Changes Lack Accountability

Section 5 used to cover more than 8,000 state and local jurisdictions. That is gone now, and it is a large loss. In 2012, the final full calendar year before the *Shelby County* decision, the Justice Department received 18,146 election law and procedure changes from Section 5 jurisdictions.<sup>45</sup> From 2009 to 2013, the DOJ received 58,692 such changes.<sup>46</sup>

One of the statute's most important functions was to impose transparency on these many thousands of election law changes. For example, the preclearance process included the possibility of input from the public, who could consult with the DOJ during its review or weigh in during any preclearance litigation before a court. Because covered jurisdictions had to provide notice to the DOJ whenever they made a change to their voting systems, there was also a centralized method to monitor those changes before they were implemented. The public benefited from that accountability. Without Section 5, thousands of changes to voting procedures may go unnoticed.

While advocates and community leaders remain vigilant and are working to build monitoring systems, Section 5's mandate to centralize information for thousands upon thousands of voting law changes will be very difficult to replicate. Public notice by election officials and constant awareness by community members may well keep the public informed to a certain extent, but no *ad hoc* method of learning about incidents will adequately replace a tool with considerable coverage.

**IV. Conclusion**

Section 5 protected voting rights by regulating, deterring, and blocking harmful voting law changes for nearly 50 years. The above information speaks to the fact that it remained active well after its enactment in 1965, and the continued existence of harmful, discriminatory voting laws rebuts the Supreme Court's claim that progress has made the statute obsolete.

For all the real progress Section 5 facilitated, the nation and its voters now lack a critical tool to protect those earned advances. Bad laws with lasting, harmful consequences now lack a review mechanism, the method of fighting these laws is now limited to costly and time-intensive litigation, and the public has lost the one centralized means to track the thousands of changes annually that affect Americans' right to vote.

The year since *Shelby County* tells only the beginning of a story, but even that beginning points to the tools and accountability that have been lost, and the necessity that our lawmakers recover them.

**Endnotes**

<sup>1</sup> This is the number of submissions of voting changes from the beginning of 1998 to which DOJ has interposed an objection. Some objections were later withdrawn or were superseded by a declaratory judgment action for court preclearance in the U.S. District Court for the District of Columbia. 6 Million Lost Voters: State-Level Estimates of Felony Disenfranchisement, 2016 1

**912**

**APPENDIX C**

**C077**

2 The Sentencing Project

## OVERVIEW

The United States remains one of the world's strictest nations when it comes to denying the right to vote to citizens convicted of crimes. An estimated 6.1 million Americans are forbidden to vote because of "felony disenfranchisement," or laws restricting voting rights for those convicted of felony-level crimes.

In this election year, the question of voting restrictions is once again receiving great public attention. This report is intended to update and expand our previous work on the scope and distribution of felony disenfranchisement in the United States (see Uggen, Shannon, and Manza 2012; Uggen and Manza 2002; Manza and Uggen 2006). The numbers presented here represent our best assessment of the state of felony disenfranchisement as of the November 2016 election.

Our key findings include the following:

- As of 2016, an estimated 6.1 million people are disenfranchised due to a felony conviction, a figure that has escalated dramatically in recent decades as the population under criminal justice supervision has increased. There were an estimated 1.17 million people disenfranchised in 1976, 3.34 million in 1996, and 5.85 million in 2010.
- Approximately 2.5 percent of the total U.S. voting age population – 1 of every 40 adults – is disenfranchised due to a current or previous felony conviction.
- Individuals who have completed their sentences in the twelve states that disenfranchise people post-sentence make up over 50 percent of the entire disenfranchised population, totaling almost 3.1 million people.
- Rates of disenfranchisement vary dramatically by state due to broad variations in voting prohibitions. In six states – Alabama, Florida, Kentucky, Mississippi, Tennessee, and Virginia – more than 7 percent of the adult population is disenfranchised.
- The state of Florida alone accounts for more than a quarter (27 percent) of the disenfranchised population nationally, and its nearly 1.5 million individuals disenfranchised post-sentence account for nearly half (48 percent) of the national total.
- One in 13 African Americans of voting age is disenfranchised, a rate more than four times greater than that of non-African Americans. Over 7.4 percent of the adult African American population is disenfranchised compared to 1.8 percent of the non-African American population.
- African American disenfranchisement rates also vary significantly by state. In four states – Florida (21 percent), Kentucky (26 percent), Tennessee (21 percent), and Virginia (22 percent) – more than one in five African Americans is disenfranchised.

### STATE DISENFRANCHISEMENT LAW

To compile estimates of disenfranchised populations, we take into account new U.S. Census data on voting age populations and recent changes in state-level disenfranchisement policies, including those reported in *Expanding the Vote: State Felony Disenfranchisement Reform, 1997-2010* (Porter 2010). For example, in 2007, Maryland repealed its lifetime voting ban that had applied to some individuals post-sentence, and in 2016 eliminated the voting ban for persons on probation or parole.

### APPENDIX C

Other states have revised their waiting periods and streamlined the process for regaining civil rights. As shown in the following table, Maine and Vermont remain the only states that allow persons in prison to vote. Thirty U.S. states deny voting rights to felony probationers, and thirty-four states disenfranchise parolees. In the most extreme cases, twelve states continue to deny voting rights to some or all of the individuals who have successfully fulfilled their prison, parole, or probation sentences (for details, see notes to Table 1).

Table 1. Summary of State Felony Disenfranchisement Restrictions in 2016

No restriction (2)	Prison only (14)	Prison & parole (4)	Prison, parole, & probation (18)	Prison, parole, probation, & post-sentence (12)
Maine	Hawaii	California <sup>3</sup>	Alaska	Alabama <sup>1</sup>
Vermont	Illinois <sup>2</sup>	Colorado	Arkansas	Arizona <sup>4</sup>
	Indiana	Connecticut	Georgia	Delaware <sup>4</sup>
	Massachusetts	New York	Idaho	Florida
	Maryland <sup>5</sup>		Kansas	Iowa <sup>6</sup>
	Michigan		Louisiana	Kentucky
	Montana		Minnesota	Mississippi
	New Hampshire		Missouri	Nebraska <sup>7</sup>
	North Dakota		New Jersey	Nevada <sup>8</sup>
	Ohio		New Mexico	Tennessee <sup>9</sup>
	Oregon		North Carolina	Virginia <sup>12</sup>
	Pennsylvania		Oklahoma	Wyoming <sup>13</sup>
	Rhode Island <sup>10</sup>		South Carolina	
	Utah		South Dakota <sup>11</sup>	
			Texas	
			Washington	
			West Virginia	
			Wisconsin	

Notes:

1. Alabama - In 2016, legislation eased the rights restoration process after completion of sentence for persons not convicted of a crime of "moral turpitude."
2. Arizona - Permanently disenfranchises persons with two or more felony convictions.
3. California - In 2016, legislation restored voting rights to people convicted of a felony offense housed in jail, but not in prison.
4. Delaware - The 2013 Hazel D. Plant Voter Restoration Act removed the five-year waiting period. People convicted of a felony, with some exceptions, are now eligible to vote upon completion of sentence and supervision. People who are convicted of certain disqualifying felonies - including murder, bribery, and sexual offenses - are permanently disenfranchised.
5. Iowa - Governor Tom Vilsack restored voting rights to individuals who had completed their sentences via executive order on July 4, 2005. Governor Terry Branstad reversed this executive order on January 14, 2011 returning to permanent disenfranchisement for persons released from supervision after that date.
6. Maryland - Eliminated the ban on voting for persons on probation or parole supervision in 2016.
7. Nebraska - Reduced its indefinite ban on post-sentence voting to a two-year waiting period in 2005.
8. Nevada - Disenfranchises people convicted of one or more violent felonies and people convicted of two or more felonies of any type.
9. Tennessee - Disenfranchises those convicted of certain felonies since 1981, in addition to those convicted of select crimes prior to 1973. Others must apply to Board of Probation and Parole for restoration.
10. Rhode Island - A 2006 ballot referendum eliminated the ban on voting for persons on probation or parole supervision.
11. South Dakota - State began disenfranchising people on felony probation in 2012.
12. Virginia - When the Virginia Supreme Court overturned Governor Terry McAuliffe's blanket restoration of voting rights for people who had completed their sentences, he individually approved voting rights for 12,832 individuals in August, 2016.
13. Wyoming - Voting rights restored after five years to people who complete sentences for first-time, non-violent felony convictions in 2016 or after.

4 The Sentencing Project

## METHODOLOGY

We estimated the number of people released from prison and those who have completed their terms of parole or probation based on demographic life tables for each state, as described in Uggen, Manza, and Thompson (2006) and Shannon et al. (2011). We modeled each state's disenfranchisement rate in accordance with its distinctive felony voting policies, as described in Table 1. For example, some states impose disenfranchisement for five years after release from supervision, some states only disenfranchise those convicted of multiple felonies, and some only disenfranchise those convicted of violent offenses.<sup>1</sup>

In brief, we compiled demographic life tables for the period 1948-2016 to determine the number of released individuals lost to recidivism (and therefore already included in our annual head counts) and to mortality each year. This allows us to estimate the number of individuals who have completed their sentences in a given state and year who are no longer under correctional supervision yet remain disenfranchised. Because data on correctional populations are currently available only through year-end

## APPENDIX C

2014, we extended state-specific trends from 2013-2014 to obtain estimates for 2016. Our duration-specific recidivism rate estimates are derived from large-scale national studies of recidivism for prison releases and probationers. Based on these studies, our models assume that most released individuals will be re-incarcerated (66 percent) and a smaller percentage of those on probation or in jail (57 percent) will cycle back through the criminal justice system. We also assume a substantially higher mortality rate for people convicted of felony offenses relative to the rest of the population. Both recidivists and deaths are removed from the post-sentence pool to avoid overestimating the number of individuals in the population who have completed their sentences. Each release cohort is thus reduced each successive year – at a level commensurate with the age-adjusted hazard rate for mortality and duration-adjusted hazard rate for recidivism – and added to each new cohort of releases. Overall, we produced more than 200 spreadsheets covering 68 years of data.<sup>2</sup> These provide the figures needed to compile disenfranchisement rate estimates that are keyed to the appropriate correctional populations for each state and year.

<sup>1</sup> In Florida, some can avoid a formal felony conviction by successfully completing a period of probation. According to the Florida Department of Law Enforcement, as much as 40 percent of the total probation population holds this "adjudication withheld" status. According to reports by the Bureau of Justice Statistics, only about 50 percent of Florida probationers successfully complete probation. In light of this, we reduce the annual current disenfranchised felony probation numbers by 40 percent and individuals disenfranchised post-sentence by 20 percent (.4\*.5=.20) in each year in the life tables.

<sup>2</sup> Our data sources include numerous United States Department of Justice (DOJ) publications, including the annual *Sourcebook of Criminal Justice Statistics*, *Probation and Parole in the United States*, as well as the *Prisoners and Jail Inmates at Midyear series*. Where available, we used data from state departments of corrections rather than national sources, as in the case of Minnesota. For early years, we also referenced *National Prisoner Statistics*, and *Race of Prisoners Admitted to State and Federal Institutions, 1926-1986*. We determined the median age of released prisoners based on annual data from the National Corrections Reporting Program. The recidivism rate we use to decrease the releasee population each year is based upon the Bureau of Justice Statistics (1989) "Recidivism of Prisoners Released in 1983" study and "Recidivism of Felons on Probation 1986-1989." For those in prison or on parole, we use a reincarceration rate of 18.6% at one year, 32.8% at two years, 41.4% at 3 years. Although rearrest rates have increased since 1983, the overall reconviction and reincarceration rates used for this study are much more stable (Langan and Levin 2002, p. 11). For those on probation or in jail, the corresponding three-year failure rate is 36%, meaning that individuals are in prison or jail and therefore counted in a different population. To extend the analysis to subsequent years, we calculated a trend line using the ratio of increases provided by Hoffman and Stone-Mershoefer (1980) on federal prisoners. By year 10, we estimate a 59.4% recidivism rate among released prisoners and parolees, which increases to 65.9% by year 62 (the longest observation period in this analysis). Because these estimates are higher than most long-term recidivism studies, they are likely to yield conservative estimates of the ex-felon population. We apply the same trend line to the 3-year probation and jail recidivism rate of 36%; by year 62, the recidivism rate is 57.3%. 1948 is the earliest year for which detailed data are available on releases from supervision.

## DISENFRANCHISEMENT IN 2016

Figure 1 shows the distribution of the 6.1 million disenfranchised individuals across correctional populations. People currently in prison and jail now represent less than one-fourth (23 percent) of those disenfranchised. The majority (77 percent) are living in their communities, having fully completed their sentences or remaining supervised while on probation or parole.

### VARIATION ACROSS STATES

Due to differences in state laws and rates of criminal punishment, states vary widely in the practice of disen-

Figure 1. Disenfranchisement Distribution Across Correctional Populations, 2016

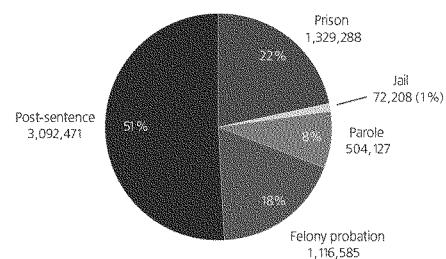

Figure 2. Total Felony Disenfranchisement Rates, 2016

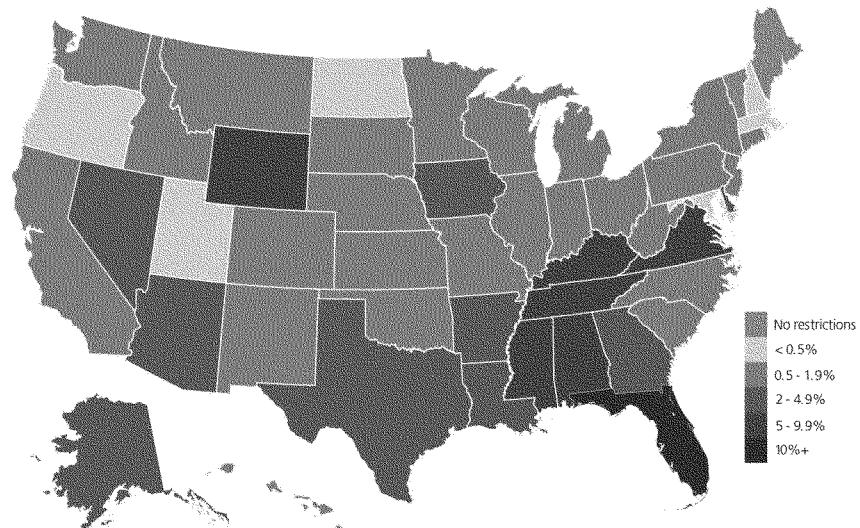

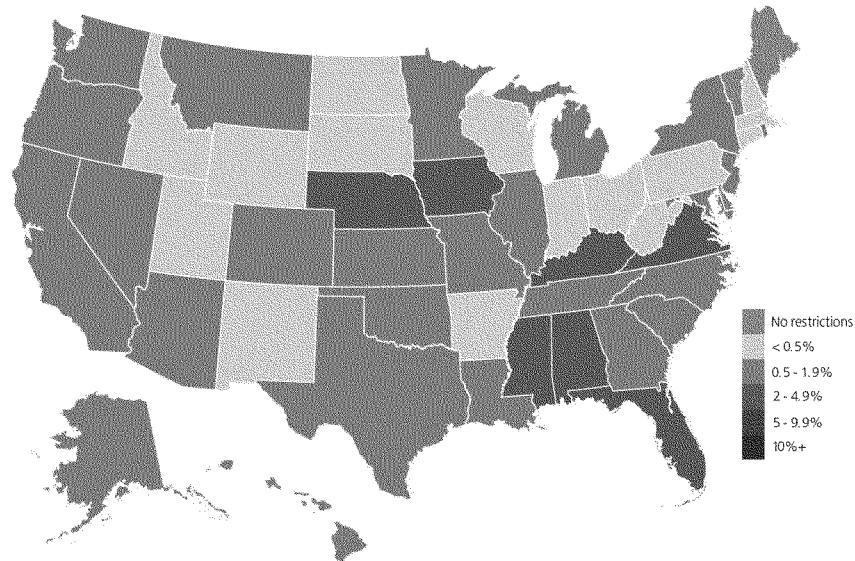

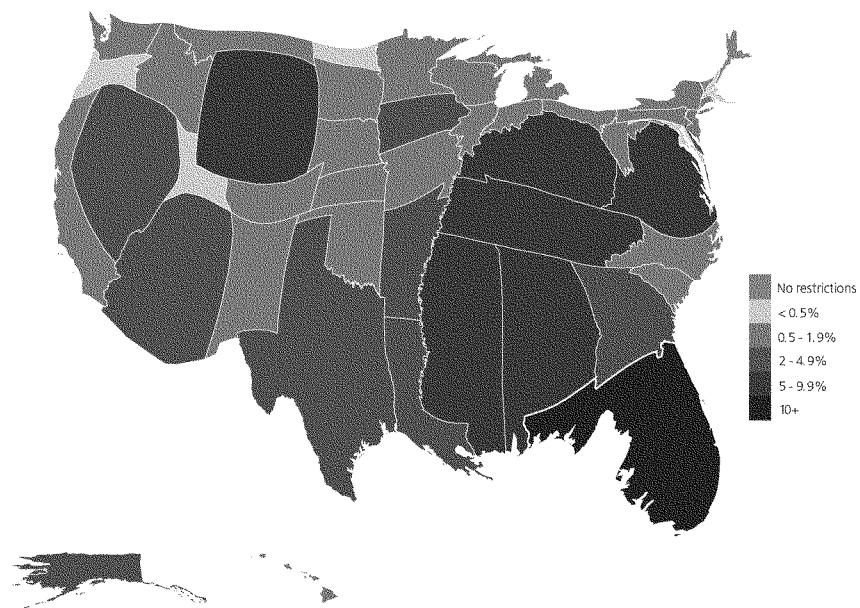

Figure 3. Total Felony Disenfranchisement Rates, 1980

franchise. These maps and tables represent the disenfranchised population as a percentage of the adult voting age population in each state. As noted, we estimate that 6.1 million Americans are currently ineligible to vote by state law. As Figure 2 and the statistics in Table 3 show, state-level disenfranchisement rates in 2016 varied from less than .5 percent in Massachusetts, Maryland, New Hampshire, North Dakota, Oregon, Rhode Island, and Utah (and zero in Maine and Vermont) to more than 7 percent in Alabama, Florida, Kentucky, Mississippi, Tennessee, and Virginia.

These figures show significant growth in recent decades, even as many states began to dismantle voting restrictions for formerly disenfranchised populations. Figure 3 displays disenfranchisement rates in 1980, retaining the same scale as in Figure 2. At that time, far more of the nation had disenfranchisement rates below .5 percent and no state disenfranchised more than 5 percent of its adult citizens.

Figure 4. Cartogram of Total Disenfranchisement Rates by State, 2016

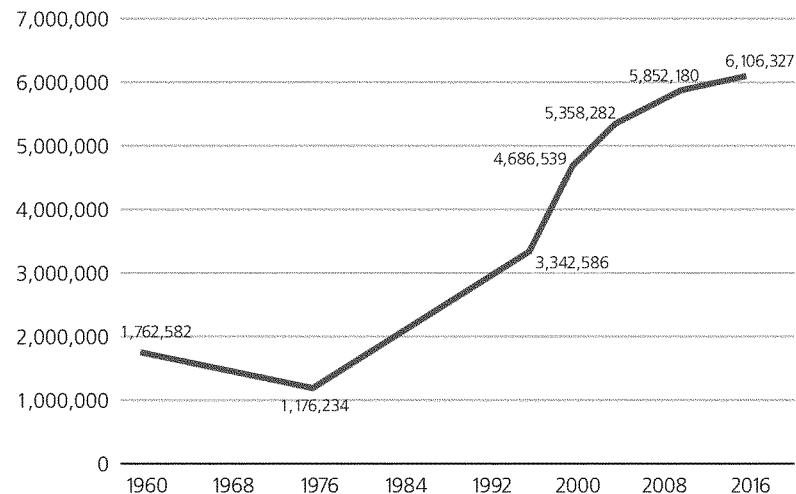

The cartogram in Figure 4 provides another way to visualize the current state of American disenfranchisement, highlighting the large regional differences in felony disenfranchisement laws and criminal punishment. Cartograms distort the land area on the map according to an alternative statistic, in this case the total felony disenfranchisement rate. Southeastern states that disenfranchise hundreds of thousands of people who have completed their sentences, such as Florida, Kentucky, and Virginia, appear bloated in the cartogram. In contrast, the many Northeastern and Midwestern states that only disenfranchise individuals currently in prison shrivel in size. This distorted map thus provides a clear visual representation of the great range of differences in the scope and impact of felony disenfranchisement across the 50 states.

### TRENDS OVER TIME

Figure 5 illustrates the historical trend in U.S. disenfranchisement, showing growth in the disenfranchised population for selected years from 1960 to 2016. The number disenfranchised dropped from approximately 1.8 million to 1.2 million between 1960 and 1976, as states expanded voting rights in the civil rights era. Many states have continued to pare back their disenfranchise provisions since the 1970s (see Behrens, Uggen, and Manza, 2003; Manza and Uggen 2006). Nevertheless, the total number banned from voting continued to rise with the expansion in U.S. correctional populations. The total disenfranchised population rose from 3.3 million in 1996 to 4.7 million in 2000, to 5.4 million in 2004, to 5.9 million in 2010. Today, we estimate that 6.1 million Americans are disenfranchised by virtue of a felony conviction.

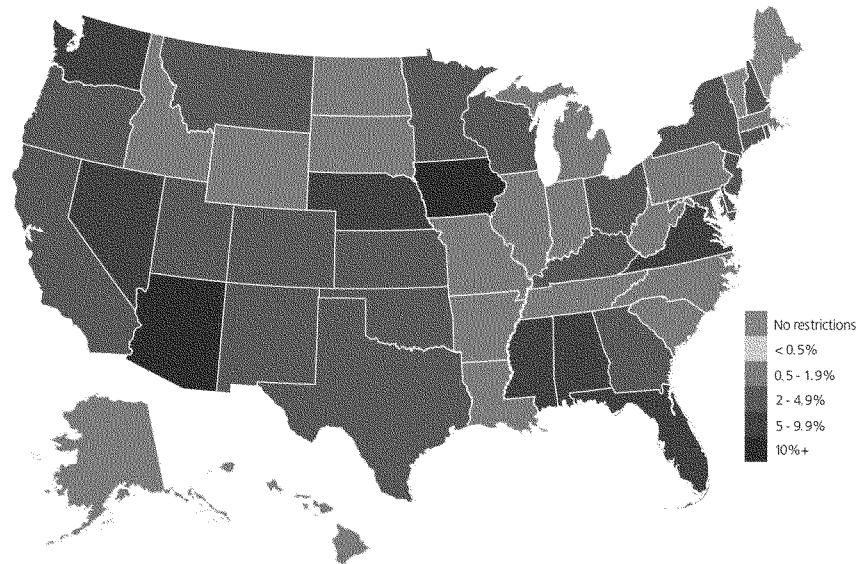

Figure 5. Number Disenfranchised for Selected Years, 1960-2016

C084

6 Million Lost Voters: State-Level Estimates of Felony Disenfranchisement, 2016 9

Figure 6. African American Felony Disenfranchisement Rates, 1980

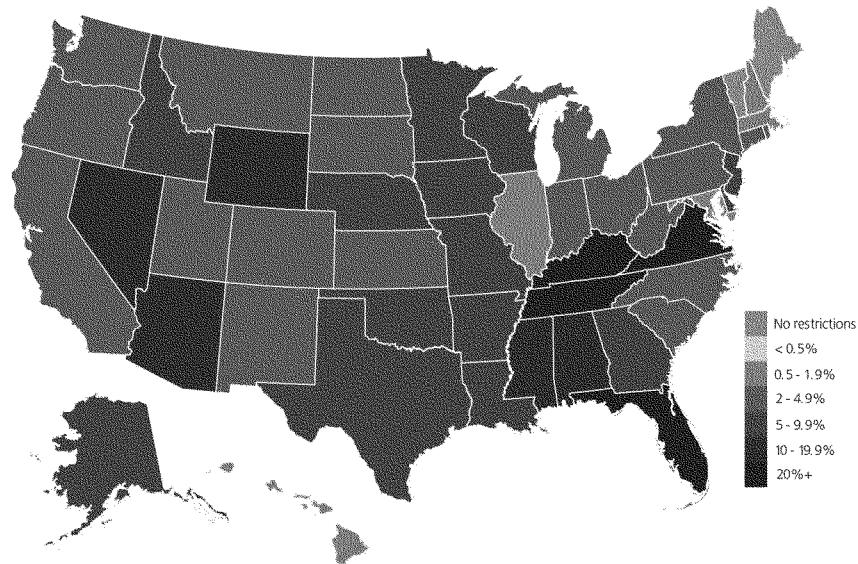

#### VARIATION BY RACE

Disenfranchisement rates vary tremendously across racial and ethnic groups, such that felony disenfranchisement provisions have an outsized impact on communities of color. Race and ethnicity have not been consistently collected or reported in the data sources used to compile our estimates, so our ability to construct race-specific estimates is limited. This is especially problematic for Latinos, who now constitute a significant portion

of criminal justice populations. Nevertheless, we used the most recent data available from the Bureau of Justice Statistics to develop a complete set of state-specific disenfranchisement estimates for the African American voting age population, as shown in Figures 6 and 7. We first show a map of the African American disenfranchisement rate for 1980, and then show how the picture looks today. By 1980, the African American disenfranchisement rate already exceeded 10 percent of the adult population in states such as Arizona and Iowa, as shown in Figure 6. The figure also

Figure 7. African American Felony Disenfranchisement Rates, 2016

indicates that several Southeastern states disenfranchised more than 5 percent of their adult African American populations at that time.

Figure 7 shows the corresponding rates for 2016, again retaining a common scale and shading to keep the map consistent with the 1980 map in Figure 6. African American disenfranchisement rates in Kentucky, Tennessee, and Virginia now exceed 20 percent of the adult voting age population. Whereas only 9 states disenfranchised at least 5 percent of their African American adult citizens in 1980, 23 states do so today.

## RECENT CHANGES

The rate of total individuals disenfranchised in 2016 (2.47 percent) is quite similar to the 2010 figures reported by Uggen et al. for 2012 (2.50 percent) and Manza and Uggen in 2006 (2.42 percent), despite state changes in disenfranchisement policy and population growth. Our estimates for African American disenfranchisement in 2016, however, are slightly lower than those for 2010 – 7.44 percent versus 7.66 percent, and for 2004, 8.25 percent. For these estimates, we used the most inclusive denominator for the African American voting age population available from the U.S. Census to ensure that we do not overestimate the disenfranchisement rate for this population. While growth in the baseline population for African Americans contributes to the decline in the disenfranchisement rate from previous estimates, the lion's share of the difference is due to an important refinement in our estimation procedures. For 2016 and for 2010, we used race-specific recidivism rates (resulting in a higher rate for African Americans) that more accurately reflect current scholarship on recidivism. This results in a higher rate of attrition in our life tables, but produces a more conservative and, we believe, more accurate portrait of the number of disenfranchised African Americans. Though lower than in 2004, the 7.44 percent rate of disenfranchisement for African Americans remains four times greater than the non-African American rate of 1.78 percent.

Given the size of Florida's disenfranchised population, we also note our estimation procedure for this state. Based on a state-specific recidivism report in 1999, our 2004 estimates included much higher recidivism rates for African Americans in Florida (up to 88% lifetime). A 2010 report from the Florida Department of Corrections shows that rates of recidivism for African Americans are now more closely in line with the national rates we apply to other states. In light of this more recent evidence, we begin applying our national rate of recidivism for African Americans (up to 73% lifetime) to Florida's African American population with prior felony convictions from 2005 onward.

In 2016, more people were disenfranchised in Florida than in any other state and Florida's disenfranchisement rate remains highest among the 50 states.

As Table 1 noted, there have been several significant changes in state disenfranchisement policies over the past decade. Most notably, Delaware removed its five-year waiting period for most offenses in 2013 and South Dakota began disenfranchising felony probationers in 2012. Governor Tom Vilsack of Iowa re-enfranchised all state residents who had completed their sentences by executive order on July 4, 2005 – though that order was then reversed by his successor, Governor Terry Branstad, in January 2011. In 2016 the Alabama legislature eased the rights restoration process after completion of sentence for persons not convicted of a crime of "moral turpitude." Other states have also reduced disenfranchisement through streamlining restoration of rights or re-enfranchising certain groups of individuals with felony convictions. For example, both Rhode Island and Maryland now restrict voting rights only for those in prison as opposed to all individuals currently serving a felony sentence, including those on probation and parole. And in 2016, California restored voting rights to people convicted of a felony offense housed in jail, but not in prison.

Our intent here is to provide a portrait of disenfranchisement that would be accurate as of the 2016 November election, though we stress that all data reported here are estimates rather than head counts.

## DISENFRANCHISEMENT AND RESTORATION OF CIVIL RIGHTS

States typically provide some limited mechanism for disenfranchised persons to restore their right to vote. These vary greatly in scope, eligibility requirements, and reporting practices. It is thus difficult to obtain consistent information about the rate and number of disenfranchised Americans whose rights are restored through these procedures. Nevertheless, we contacted each of the appropriate state agencies by email and phone and compiled the information they made available to us in Table 2. This provides some basic information about the frequency of state restoration of rights in those 12 states that disenfranchise beyond sentence completion. The table shows how many people were disenfranchised and the number of restorations reported by state officials in a given reporting period.

While we were unable to obtain complete data from all states, we subtracted all known restorations of civil rights (including full pardons) from each state's total disenfranchised post-sentence figure. Even accounting for these restorations, it is clear that the vast majority of such individuals in these states remain disenfranchised. Indeed, some states have significantly curtailed restoration efforts since 2010, including Iowa and Florida.

**Table 2. Restoration of Voting Rights in States that Disenfranchise Residents Post-Sentence**

State	Restorations	Period of Restoration Estimates
Alabama	16,022	2004-2015
Arizona	31	2010-2015
Delaware	2,285	1988-2015
Florida	271,982	1990-2015
Iowa	115,325	2005-2015
Kentucky	10,479	2008-2015
Mississippi	335	2000-2015
Nebraska	N/A	
Nevada	281	1990-2011
Tennessee	11,581	1990-2015
Virginia	21,664	2002-2016
Wyoming	107	2003-2015

## SUMMARY

This report provides new state-level estimates on felony disenfranchisement for 2016 in the United States to update those provided by Uggen, Shannon, and Manza (2012) for previous years. In Tables 3 and 4, we provide state-specific point estimates of the disenfranchised population and African American disenfranchised population, subject to the caveats described below.

Despite significant legal changes in recent decades, over 6.1 million Americans remained disenfranchised in 2016. When we break these figures down by race, it is clear that disparities in the criminal justice system are linked to disparities in political representation. The distribution of disenfranchised individuals shown in Figure 1 also bears repeating: less than one-fourth of this population is currently incarcerated, meaning that about 4.7 million adults who live, work, and pay taxes in their communities are banned from voting. Of this total, over one million are African Americans who have completed their sentences. Public opinion research shows that a significant majority of Americans favor voting rights for people on probation or parole who are currently supervised in their communities, as well as for individuals who have completed their sentences (Manza, Brooks, and Uggen 2004). How much difference would it make if state laws were changed to reflect the principles most Americans endorse? The answer is straightforward: Voting rights would be restored to 77 percent of the 6.1 million people currently disenfranchised.

### CAVEATS

We have taken care to produce estimates of current populations and "post-sentence" populations that are reliable and valid by social science standards. Nevertheless, readers should bear in mind that our state-specific figures for the 12 states that bar individuals from voting after they have completed their sentences remain point estimates rather than actual head counts. In addition, the prison, probation, parole, and jail populations we report for 2016 are also estimated, based on the recent state-specific trends in each state. In other work, we have presented figures that adjust or "bound" these estimates by assuming different levels of recidivism, inter-state mobility, and state-specific variation. With these caveats in mind, the results reported here present our best account of the prevalence of U.S. disenfranchisement in 2016. These estimates will be adjusted if and when we discover errors or omissions in the data compiled from individual states, U.S. Census and Bureau of Justice Statistics sources, or in our own spreadsheets and estimation procedures.

## APPENDIX C

Table 3. Estimates of Disenfranchised Individuals with Felony Convictions, 2016

State	Prison	Parole	Felony probation	Jail	Post-sentence	Total	VAP	% Disenfranchised
Alabama	30,585	6,580	15,626	1,578	231,896	286,266	3,755,483	7.62%
Alaska	5,497	2,035	6,900	7		14,439	552,166	2.61%
Arizona	44,509	7,241	51,362	1,341	116,717	221,170	5,205,215	4.25%
Arkansas	19,224	21,811	24,695	975		66,705	2,272,904	2.93%
California	136,302	86,264				222,557	30,023,902	0.74%
Colorado	21,207	8,673		1,066		30,946	4,199,509	0.74%
Connecticut	14,926	2,419				17,345	2,826,827	0.61%
Delaware	6,688	716	4,074		4,067	15,716	741,548	2.12%
Florida	102,555	42,08	86,886	4,822	1,487,847	1,686,318	16,166,143	10.43%
Georgia	50,900	29,545	170,194	4,112		248,751	7,710,688	3.23%
Hawaii	6,364					6,364	1,120,770	0.57%
Idaho	7,873	5,057	9,863	314		23,106	1,222,098	1.89%

BRENNAN  
CENTER  
FOR JUSTICE  
TWENTY  
YEARS

MINORITY REPRESENTATION:  
NO CONFLICT WITH FAIR MAPS

Michael Li and Laura Royden

Brennan Center for Justice at New York University School of Law

### **ABOUT THE BRENNAN CENTER FOR JUSTICE**

The Brennan Center for Justice at NYU School of Law is a nonpartisan law and policy institute that seeks to improve our systems of democracy and justice. We work to hold our political institutions and laws accountable to the twin American ideals of democracy and equal justice for all. The Center's work ranges from voting rights to campaign finance reform, from ending mass incarceration to preserving Constitutional protection in the fight against terrorism. Part think tank, part advocacy group, part cutting-edge communications hub, we start with rigorous research. We craft innovative policies. And we fight for them — in Congress and the states, the courts, and in the court of public opinion.

### **ABOUT THE BRENNAN CENTER'S DEMOCRACY PROGRAM**

The Brennan Center's Democracy Program works to repair the broken systems of American democracy. We encourage broad citizen participation by promoting voting and campaign finance reform. We work to secure fair courts and to advance a First Amendment jurisprudence that puts the rights of citizens — not special interests — at the center of our democracy. We collaborate with grassroots groups, advocacy organizations, and government officials to eliminate the obstacles to an effective democracy.

### **ABOUT THE BRENNAN CENTER'S PUBLICATIONS**

**Red cover** | Research reports offer in-depth empirical findings.

**Blue cover** | Policy proposals offer innovative, concrete reform solutions.

**White cover** | White papers offer a compelling analysis of a pressing legal or policy issue.

### **Introduction**

#### *The Conventional Narrative About Majority-Minority Districts and Partisan Bias*

The Voting Rights Act requires states, under some situations, to create legislative and congressional districts where minorities are a majority of the district's population.<sup>1</sup> Majority-minority districts are intended to remedy vote dilution and ensure minorities have a fair chance to participate in the political process.<sup>2</sup> This prescription worked: beginning in the 1990s majority-minority districts are credited with increasing minority representation in legislatures and Congress.<sup>3</sup>

Yet from the start, some conventional wisdom took hold about how majority-minority districts resulted in unfair maps. The widespread belief became that majority-minority districts, particularly in the South, gave Republicans a big and unfair advantage.<sup>4</sup> According to this narrative, heavily concentrating reliably Democratic voters in majority-minority districts "bleached" the surrounding districts. These bleached districts, which had a history of electing white Democrats, then flipped and began electing Republicans. Some political commentators have even argued that majority-minority districts were a significant factor in the 54-seat swing in House seats in the 1994 election, giving the GOP control of the chamber for the first time in 42 years.<sup>5</sup>

Insofar as it goes, there is some truth in the narrative. The lack of minority-majority districts before 1990 had preserved the incumbency of many white Democrats even as southern white voters were shifting en masse towards the Republican Party. Ben Ginsberg, general counsel to the Republican National Committee in 1990 and one of the principal architects of the GOP strategy to urge creation of majority-minority districts, recalled, "We began looking at the data, and we saw that white Southern Democrats had dominated the redistricting process literally since the Civil War, and that had created underrepresentation for two groups—Republicans and minority voters."<sup>6</sup>

Rep. Bobby Scott, an African-American Democrat first elected to Congress after Virginia's 3rd Congressional district was redrawn as a majority-minority district, told *The New Yorker*'s Jeffrey Toobin in 1993 that before the 1990s the strategy for preserving artificially large Democratic majorities was "to keep African-American percentages at around thirty-five or forty per cent. That was enough for the white Democrats to keep winning these districts, but not enough to elect any black Democrats. The white Democrats called these 'influence districts.'"<sup>7</sup>

But while Republicans derived some level of benefit from rapid growth in majority-minority districts after 1990 in the South, the question is whether that advantage means that creating majority-minority districts to comply with the Voting Rights Act is inherently at odds with the goal of partisan fairness. Some have argued that is the case. For example, the Republican National Congressional Committee has argued in recent court filings that "a [proposed] test for partisan gerrymandering creates conflicts between districting and Section 2 of the Voting Rights Act."<sup>8</sup> In other words, you can have one or the other but not both.

With the Supreme Court set to take up the constitutionality of partisan gerrymandering, it is an apt time to test the thesis of inherent tension.<sup>9</sup>

It turns out the answer is an emphatic no. The authors reviewed three decades of redistricting in twenty states with majority-minority districts and found that the creation of these districts did not result in biased maps. In fact, if anything, majority-minority districts tended to reduce overall partisan bias.

*Methodology and Key Findings*

This study considered election results from the last three decades, the 1990s, 2000s, and 2010s. Only states with six or more congressional districts in at least one of these decades were included. The authors assessed “partisan bias,” or whether one party had an advantage in turning converting its vote totals into seats. In total, this data set included election results from twenty states. We also used statewide election results to examine how proposed but un-adopted maps in Texas that would have further increased minority representation fare in terms of partisan bias.

What we found was that the assumed “tension” between Voting Rights Act compliance and maps with low partisan bias does not bear up on closer examination. To the contrary:

- The empirical evidence shows that majority-minority districts do not result in maps that unfairly favor either party.
- Majority-minority districts increased nationwide by nearly 60 percent in the 1990s. Despite this growth, states that maintained or created majority-minority districts had low, and in most cases negligible, rates of partisan bias. The one exception is Texas, where congressional maps exhibit durably high rates of bias in favor of Democrats. This result was due to successful efforts to pack white Republicans into districts and spread out both white and non-white Democrats out to maximize Democratic seat share.
- The first decades of this century also show no correlation between minority-majority districts consistently high rates of partisan bias. In fact, in several states partisan bias actually declined.
- On the other hand, there is evidence from this decade that creating new majority-minority districts could, in fact, help reduce the high partisan bias in some of this decade’s maps, particularly in states with racially polarized voting. Similarly, there is evidence from at least one state this decade and several states in earlier decades that undoing racial gerrymandering can materially improve partisan fairness levels.

#### A. Backgrounder: Understanding the Problem of Partisan Bias

As a starting point, it is useful to understand the redistricting abuse measured by partisan bias.

Redistricting abuses run the gamut from allegations about incumbent protection to the failure to keep communities together. Here, we focus on one of the most egregious and sinister of these abuses: the manipulation of district lines to give the party drawing the map a share of seats grossly at odds with statewide election results, thus ensuring that one party is overrepresented and the other underrepresented in a delegation.

In measuring the fairness of a map, then, the question is not whether any particular district favors one party or the other, nor is it about the geographic shape of any single district. Instead, the question is whether any political party is receiving – and more importantly locking in – a disproportionate and unfair share of seats overall across a map. This systematic advantage that one party receives over another in turning votes into seats from a map is known as “partisan bias” and used in this report to examine the fairness of maps.

Take North Carolina, for example. North Carolina routinely is a battleground state when it comes to statewide elections. In 2016, Donald Trump won the state’s electoral votes at the same time that Democrat Roy Cooper narrowly won the governorship. But since 2016, Republicans have had a secure lock on 10 out of 13 congressional seats in the state. In fact, since 2012, exactly one seat has changed hands, and most races have not been remotely close.<sup>10</sup> Such an extreme disparity between statewide and congressional level results suggests a problem caused by high partisan bias in the congressional map.

To assess whether the advantage such as the sizeable pro-GOP one seen in North Carolina’s map is problematic, political and social scientists have developed various tests to gauge whether the outcome is statistically likely to be random. The three we use in this study are:

- **The efficiency gap** looks at the number of “wasted votes” in a state’s elections. In any election, nearly 50 percent of votes are wasted: all votes cast for a losing candidate, and any votes cast for a winning candidate beyond the threshold needed to win (50 percent of the total + 1 vote). In a hypothetical map with perfect partisan symmetry, both parties would waste the same number of votes. A large difference between the parties’ wasted votes suggests gerrymandering could be at play, giving one party an advantage by disproportionately wasting the other’s votes. The efficiency gap was brought to prominence by Nicholas Stephanopoulos and Eric McGhee in *Partisan Gerrymandering and the Efficiency Gap*<sup>11</sup> and was subsequently referenced in a lawsuit called *Whitford v. Gill*, where a three-judge panel ruled that Wisconsin’s state assembly map was an unconstitutional partisan gerrymander.<sup>12</sup> The case has been appealed to the Supreme Court, which will hear arguments in the case on October 3, 2017.
- **The seats-to-votes curve** compares the share of seats won by a party to historical averages based on that party’s statewide vote share. Using results from the past four decades of congressional elections, the relationship between a party’s average share of the statewide vote and the share of seats in a statewide congressional delegation can be modeled by fitting a curve to the plotted data. Statewide vote shares from recent elections can then be placed on this curve to find the “expected” seat share, and comparing the expected seat share to the actual seat share reveals the degree to which current maps deviate from historical norms. As with the efficiency gap, large discrepancies between actual seat share and expected seat share illustrates partisan bias in a plan. Seats-to-votes curves have been used for decades by prominent political scientists such as Gary

**APPENDIX C**

King and Edward Tufte, and recently by Bernie Grofman and Nicholas Goedert.<sup>13</sup>

- **The mean-median district vote share difference** compares a party's mean district vote share to its median vote share. The difference between the mean and median is a common analysis long used by statisticians to measure skew in many academic fields; here, a state's mean and median district vote shares are used to examine whether states have skewed election results that were unlikely to have arisen by chance in the absence of gerrymandering. This approach was proposed by Michael D. McDonald and Robin Best in *Unfair Partisan Gerrymanders in Politics and Law: A Diagnostic Applied to Six Cases*<sup>14</sup> and further quantified by Sam Wang in *Three Tests for Practical Evaluation of Partisan Gerrymandering*.<sup>15</sup>

## B. Majority-Minority Districts and Partisan Bias: The Historical Evidence

### 1. The 1990s

The 1990s are a particularly robust period for testing the thesis that creation of majority-minority districts contributes to high pro-Republican bias, as the decade's redistricting saw majority-minority congressional districts increase sizably from 32 to 51. This rapid growth was driven not only by demographic change but by an interpretation of the Voting Rights Act that decade, later curtailed by the Supreme Court, that led mapdrawers to believe that they needed to maximize the number of majority-minority districts.<sup>16</sup>

All told in the redistricting cycle of the 1990s, twenty states adopted congressional plans (or had a court-adopted plan) that contained at least one majority-minority district. These include five states where majority-minority districts were created for the first time and eight states where the number of majority-minority districts increased as a result of redistricting.<sup>17</sup> Fourteen of nineteen of the new majority-minority districts were in the South.<sup>18</sup>

<i>State</i>	<i>Majority-minority districts in 1990</i>	<i>Majority-minority districts immediately post-redistricting</i>	<i>Majority-minority districts as percentage of total</i>

\* Map redrawn at least in part later in the decade as a result of litigation.

Despite this rapid growth, states with majority-minority districts in the 1990s exhibit almost non-existent partisan bias. Indeed, only Texas has high partisan bias under multiple measures for each election of the decade.<sup>19</sup> And, in the case of Texas, the bias ran in favor of Democrats, not Republicans – counter to what the “bleaching” thesis would predict. Rather, the plan’s massive pro-Democratic advantage came through “creatively drawn lines in unlikely places . . . [in] which white urban Democrats, long dependent on black

votes, were given districts where Democratic rural counties were substituted for urban black neighborhoods.”<sup>20</sup>

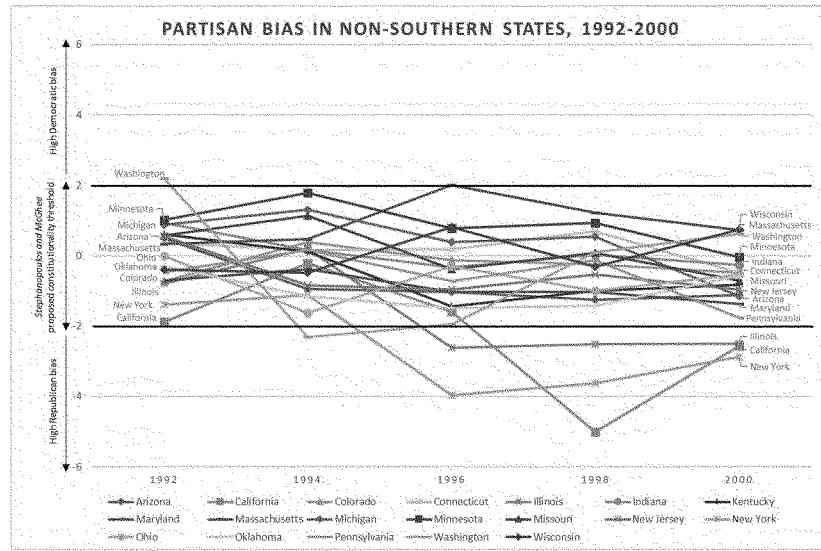

In fact, despite seeing a greater increase in majority-minority congressional districts than any other part of the country, southern states had an average net efficiency gap of just 0.01 Democratic seats per election and an average absolute efficiency gap of 1.19 seats over the course of the decade. Southern states had equally low levels of partisan bias under the seats-to-votes and mean-median tests. See Appendices.

**Figure 1**

Of southern states, only Florida had a significant pro-Republican high efficiency gap for any part of the 1990s. However, the emergence of this gap after 1996 does not appear easily connected with the existence of majority-minority districts. The state’s two Latino majority districts, for instance, were heavily Cuban-American and elected Republicans rather than Democrats throughout this period – if anything suggesting that those districts might generate pro-Democratic rather than pro-Republican bias if the conventional narrative is correct.<sup>21</sup> Moreover, the gap emerges only after one of Florida’s three majority African-American districts was redrawn in 1996, as a result of litigation, in a way that *decreased* its African-American percentage from 51 percent to 40 percent.<sup>22</sup>

Non-southern states that maintained or expanded the number of majority-minority districts in the 1990s also experienced low levels of partisan bias.<sup>23</sup> (Figure 2) Notably, no non-southern state had a persistently high efficiency gap in favor of a single party in each of the decade’s elections. A number of the maps, in fact, exhibit significant electoral volatility over the course of their lifecycle, going from having somewhat of a Democratic skew to having somewhat of a Republican skew (or vice versa) over the course of the decade. As with southern states, non-southern states with majority-minority districts also had low rates of partisan bias under the seats-to-votes and mean-median measures. See Appendices.

**Figure 2**

Only three maps (those of California, Illinois, and New York) eventually developed a significant skew in favor of one party or the other. But, in all three cases, the larger Republican skews come late in the decade when all three states' voters became significantly more Democratic but Republicans nevertheless managed to hold onto a high percentage of their seats.

However, it is hard to find a connection between majority-minority districts and the emergence of that bias. In all three states, majority-minority congressional districts with one exception, were located in heavily Democratic urban areas (New York City, Chicago, and Los Angeles) where neighboring districts remained reliably Democratic.<sup>24</sup> Unlike in the South, there was no realignment of white voters. The only majority-minority district not in these regions was California's 20th Congressional District in the state's Central Valley, but it too was surrounded mostly by districts that continued to elect Democrats.<sup>25</sup> Notably, in the case of New York, the increased pro-Republican bias observed later in the decade coincides with a court ordered redrawing of a Latino majority district that decreased Latino percentages "from about 57% to about 45%, altering five adjoining districts which became even more Democratic."<sup>26</sup>

Rather, the emergence of high levels of bias in California, New York, and Illinois appears to be mainly the product of Republicans to hold onto a number of white majority districts elsewhere in the states (e.g., upstate New York or downstate Illinois) despite improved Democratic performance. For example, in 1998, Republicans won five congressional districts in California with less than 52 percent or less of the vote and many Republican won seats in New York had no Democratic candidate despite strong Democratic performance in the district overall.<sup>27</sup>

2. The 2000s

i. *A slowdown in new majority-minority districts*

In contrast to the 1990s, the redistricting cycle of the 2000s saw almost no growth in the number of majority-minority congressional districts. In fact, several districts that once were majority-minority in both southern and non-southern states were allowed to fall below 50 percent, although they continued to perform in electing minority-preferred candidates.

Three factors helped contribute to this slowdown. The first was concerns about running afoul of the Supreme Court's racial gerrymandering decisions, which struck down districts if they were drawn "predominately" on the basis of race and otherwise unjustified.<sup>28</sup> This put practical limits on the ability of mapdrawers to creatively join far-flung minority communities to create a majority district. But the bigger limitation was likely practical – in many, though not all, states the growth of majority-minority districts in the 1990s had been so thorough that most politically feasible majority-minority congressional districts had already been created. Likewise, for African Americans, improved voter turnout and political effectiveness in many states meant that African Americans increasingly could elect their community's preferred candidates in districts that were less than majority African American.

The only places where new majority-minority districts were created in the redistricting cycle of the 2000s were California, Arizona, and Florida where new congressional maps each included one additional performing Latino majority district.<sup>29</sup> No state that did not already have a majority-minority district created one for the first time in the decade of the 2000s.<sup>30</sup>

ii. *Continued low levels of partisan bias in the twenty states with majority-minority congressional districts*

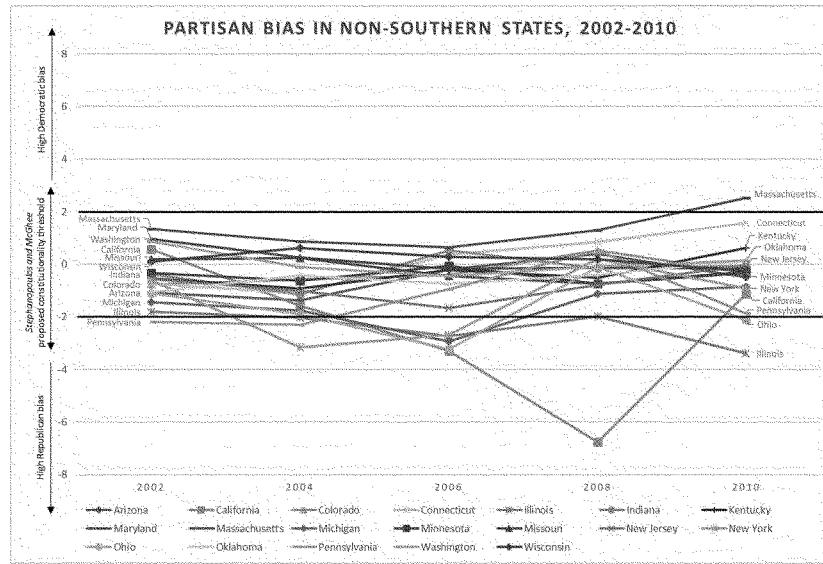

As with the maps of the 1990s, there is no apparent linkage between the creation or maintenance of majority-minority congressional districts and a persistent rate of high partisan bias.

No non-southern state, for example, had a durably high efficiency gap in favor of either party, and many maps show significant electoral volatility. ([Figure 3](#))

Among non-southern states, Illinois had the highest levels of bias, skewing in favor of Republicans at a significant level in three out of five elections. Yet this was due not to majority-minority districts – which did not change appreciably – but to an incumbent protection plan negotiated between Democratic and Republican leaders that resulted in a high number of non-compact and uncompetitive districts in suburban and rural Illinois.<sup>31</sup>

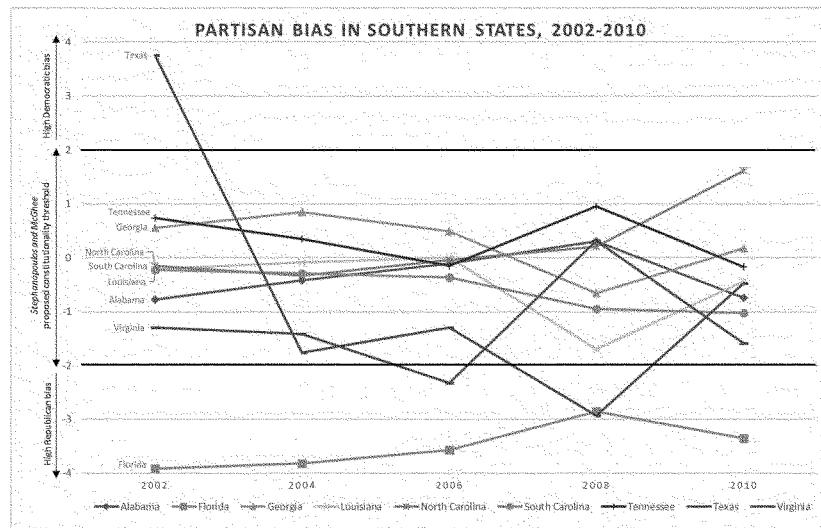

Incumbent protection also appears responsible for the high Republican bias that California experienced in 2006 and 2008 – both Democratic wave years.<sup>32</sup>

**Figure 3**

Southern states, similarly, continued to exhibit low rates of partisan bias despite a high percentage of majority-minority districts and an increase in racially polarized voting as the southern realignment reached its fruition.

As shown in Figure 4, elections in most states in the region, in fact, continued to produce skews that moved from one party to the other over the course of the decade.

**Figure 4**

The one exception among southern states is Florida, which had a significant pro-Republican bias in all five elections of the decade, under a map drawn for the first time since Reconstruction under sole Republican control.

But the bias observed in Florida in the 2000s does not fit in neatly with the conventional narrative, given that the congressional map adopted that decade made only modest changes to the configurations of the three African-American majority districts (and, in fact, decreased the African-American percentage in one district), while the state's three Latino majority districts continued to overwhelmingly elect Republicans rather than Democrats.<sup>33</sup> Rather, as in Illinois and California, bias in favor of Republicans was largely the product of the way that white majority districts were redrawn.

3. The 2010s

i. *Slow growth in majority-minority congressional districts continues*

The 2010s, like the 2000s, saw no significant growth in the number of majority-minority congressional districts.

By the start of the decade, a number of historically African-American districts had fallen below 50 percent – in some cases substantially – as a result of Latino and Asian population growth and gentrification. Outside the South, most of these districts simply were redrawn with African-American citizen voting age percentages less than 50 percent and have continued to perform as African-American districts.

In the South, however, Republican mapdrawers intentionally decided to push African-American percentages above 50 percent wherever possible – diluting African-American political effectiveness and leading to allegations of racial gerrymandering in congressional maps of North Carolina, Virginia, and Texas.<sup>34</sup>

The growth of Latino majority districts in the 2010s also was modest. Only California saw a net increase in the number of performing Latino majority congressional districts from seven to eight, though Texas added a court-ordered coalition district that could emerge as a Latino opportunity district in the future.<sup>35</sup>

As in the 2000s, no state that did not already have a majority-minority congressional district created one for the first time.

ii. *Continued low rates of partisan bias in the twenty states with majority-minority congressional districts*

Thirteen of the twenty states with majority-minority congressional districts – including California, where the number of majority-minority districts increased slightly – continue to experience low to negligible levels of durable partisan bias this decade. California, where maps were drawn for the first time by an independent redistricting commission, even shows signs of a declining level of partisan bias from prior decades despite adding a Latino majority congressional district.

However, seven states with majority-minority congressional districts did see a statistically significant increase in partisan bias this decade, reversing the low rates of bias that these states had all experienced in earlier decades. In all seven instances, the bias ran in favor of Republicans.

However, there does not seem to be a clear or obvious connection between majority-minority districts and this increase in partisan bias. None of these states increased the number of majority-minority districts this decade and, of the seven, only Texas had an increase in coalition districts. Moreover, in non-southern states like Pennsylvania and Michigan, majority-minority districts are located in heavily Democratic areas where the surrounding districts continue to be reliably Democratic. Instead, the high partisan bias this decade in Pennsylvania, Michigan, and Ohio appears to be driven by ruthless packing and cracking of white Democrats in places like the suburbs of Philadelphia.<sup>36</sup>

Majority-minority districts in Virginia and North Carolina this decade do, by contrast, appear partially related to sudden emergence of high levels of bias: the aggressive overpacking of African-American districts, subsequently found to be racial gerrymanders, contributed to the pro-Republican bias throughout the states.<sup>37</sup> This included transforming a non-majority African-American district that had historically and

consistently elected African-American preferred candidates into a majority black district – despite protests that it was not necessary to do so and would dilute African-American political power statewide. Similarly, as shown in Part C, high levels of partisan bias in Texas in favor of Republicans this decade seem to stem both from the packing of African-American districts and, more crucially, the failure of the state to create additional Latino majority districts.

### C. The Counterfactual Evidence: The Failure to Create Minority Districts in Texas as the Driver of Partisan Bias

If, in the 1990s, the creation of majority-minority districts in the South helped create fairer representation of both minorities and Republicans by reducing high levels of pro-Democratic partisan bias, there is evidence today that creating more minority electoral opportunities would similarly reduce the high pro-Republican bias that has emerged this decade in southern states like Texas.

With the growth of racially polarized voting, minorities today are often the only large and geographically concentrated blocks of reliable Democrats in southern states. As a practical matter, a would-be gerrymanderer would find it hard to engineer a large and durable pro-Republican advantage without either packing or cracking minorities.

Conversely undoing the packing and cracking of minority communities by increasing minority electoral opportunities – whether through majority-minority districts or through coalition districts – would be expected to reduce high pro-Republican bias, not unlike the reduction of pro-Democratic bias in the 1990s.

Texas this decade provides a robust testing ground for both theses because its legislature enacted a highly aggressive congressional plan in 2011 that created no additional minority opportunity districts, despite Latinos and African Americans collectively comprising nearly 90 percent of the state's population gain between 2000 and 2010. By comparing the partisan bias of this plan, the subsequent court-modified plan, and plans offered by minority advocates, we can assess the relationship between fairness for minority communities and partisan fairness.

For this analysis, we looked at four congressional plans:

- **Plan C185** – the plan originally adopted by the Texas Legislature in 2011 but never used because of court-ordered modifications to address vote dilution and Voting Rights Act problems.
- **Plan C235** – the 2012 court-drawn interim plan which was adopted by the Texas Legislature in 2013 on a permanent basis without any changes. Plan C235 created an African-American and Latino coalition district in the Dallas-Fort Worth area and made adjustments to TX-23 along the border to improve its performance as a Latino district. It did not, however, make changes to other parts of the map.
- **Plan C213** – a plan proposed by the Texas Latino Redistricting Task Force.
- **Plan C286** - a demonstration plan offered by some of the Latino and African-American plaintiffs in litigation over the Texas congressional plan.

Under the four plans, the number of performing majority-minority, coalition, and crossover districts range from 10 to 13 out of Texas' 36 congressional districts.<sup>38</sup>

**APPENDIX C**

<i>Plan</i>	<i>African-American majority</i>	<i>African-American plurality</i>	<i>Latino majority – (performing)</i>	<i>Coalition</i>	<i>Total (%)</i>
C185 (state original)	1	2	7	0	10 (27.8%)
C235 (court modified plan)	1	2	7	1	11 (30.6%)
C213 (Latino Task Force)	0	3	8	2	13 (36.1%)
C286 (Rodriguez plaintiffs plan)	1	2	8	2	13 (36.1%)

By calculating the partisan bias scores for actual plans with plans proposed by minority groups, we were able to measure the effect that increasing minority representation would have on partisan bias. What we found bears out the thesis that disadvantaging minority voters was central to enabling the Texas Legislature to draw a map with a significant advantage in favor of Republicans (just as disadvantaging minorities previously was central to drawing maps that favored Democrats). As the number of minority opportunity districts increases in the various plans, levels of partisan bias decrease. The plans with a greater number of minority electoral opportunities were, in short, also the fairest plans from a partisan perspective.

Under the efficiency gap, the state's original plan (Plan C185) gave Republicans a significantly high share of seats in all three elections since 2012. The court-modified plan (Plan C235), which increased the total number of minority seats by one, reduced the rate of pro-Republican bias, but still had a bias of nearly three seats in both 2012 and 2016. By contrast, the two plans offered by minority groups – which each would have added two additional minority seats to the court-drawn plan – would have had negligible partisan bias.

<i>Plan</i>	<i>2012</i>	<i>2014</i>	<i>2016</i>
C185 (state original)	3.72 extra R	2.07 extra R	3.64 extra R
C235 (court modified)	2.98 extra R	1.35 extra R	2.96 extra R
C213 (minority proposal)	0.19 extra D	0.93 extra D	0.22 extra D
C286 (minority proposal)	0.08 extra R	0.59 extra D	0.08 extra R

In short, the maps with the highest levels of minority representation were also the maps with the lowest partisan bias. In other words, increasing minority representation in Texas is consistent with reducing partisan unfairness.

**Appendix 1: Partisan Bias in States with Six or More Congressional Districts (1992-2000)**

**Efficiency Gap: 1990s**

Efficiency gap results displayed below include both the magnitude of the seat gap and the party advantaged by the gap. States with persistent results above the threshold of two seats that Stephanopoulos and McGhee propose for presumptive unconstitutionality are displayed in bold.

**ANALYSIS**

**VOTER PURGES: THE RISKS IN 2018**

by Jonathan Brater<sup>‡</sup>

**Introduction**

Voter purges — the often controversial practice of removing voters from registration lists in order to keep them up to date — are poised to be one of the biggest threats to the ballot in 2018. Activist groups and some state officials have mounted alarming campaigns to purge voters without adequate safeguards. If successful, these efforts could lead to a massive number of eligible, registered voters losing their right to cast a ballot this fall.

Properly done, efforts to clean up voter rolls are important for election integrity and efficiency. Done carelessly or hastily, such efforts are prone to error, the effects of which are borne by voters who may show up to vote only to find their names missing from the list.

Many of the voter purge efforts examined by the Brennan Center for Justice here not only risk disenfranchisement, but also run afoul of federal legal requirements. These efforts point to a decentralized, hard-to-trace mode of voter suppression — one that is perhaps less sweeping than voter ID, proof-of-citizenship, and similar legislation enacted by 23 states over the last decade. But the effect of voter purges can be equally devastating.

One example? In 2016, Arkansas' secretary of

state sent county clerks the names of more than 50,000 people who were supposedly ineligible to vote because of felony convictions. Those county clerks began to remove voters without any notice. The state later discovered the purge list was riddled with errors: It included at least 4,000 people who did not have felony convictions.<sup>1</sup> And among those on the list who once had a disqualifying conviction, up to 60 percent of those individuals were Americans who were eligible to vote because they had their voting rights restored back to them.<sup>2</sup>

The Arkansas incident also illustrates the confusion arising from many state laws that disenfranchise persons with past criminal convictions. Nationally, more than 6 million Americans cannot vote because of a past felony conviction. Up to 4.7 million of them have been released from incarceration and are living and working in their communities. In Arkansas, voting rights are not restored until the terms of the sentence are complete, including prison, parole, and probation. In this case, it appears that thousands of individuals who had met those conditions and had their rights restored were still removed.

Counties scrambled to fix the mistakes right before a school board race and weeks before the presidential election, but clerks admitted they

would have a hard time restoring all the voters to the rolls in time. “There’s an old saying that you can’t unring a bell, and that’s where we are,” said one official, Pulaski County Clerk Larry Crane.<sup>3</sup>

In 2014 and 2015, the Brooklyn Board of Elections purged more than 110,000 voters who had not voted since 2008, and another 100,000 who had supposedly changed their addresses. There was no public announcement that this would be done. Some of those voters were given a paltry three weeks’ notice before removal,<sup>4</sup> and thousands of voters showed up at the 2016 primary elections and discovered that their names were missing from the rolls. After a lawsuit, the Board of Elections restored registration records — but by that point, the voters had missed their opportunity to cast a ballot in the primary.

A decade ago, the Brennan Center published the first comprehensive examination of voter purges.<sup>5</sup> We found a patchwork of inconsistent, error-prone practices for removing voters from the rolls. These problematic purges have occurred for a variety of reasons. Election officials depend on unreliable sources to determine that individuals are no longer eligible to vote, use poor methodology to compare the voter registration list with sources of potentially ineligible individuals, conduct voter removal without notice, or fail to provide appropriate protections to voters before removing them.

There is reason to believe problems will be especially acute and widespread in 2018. Here are four voter purge vulnerabilities to watch out for this year.

#### **1. “Challenge Purges” and Other Misuse of Challenger Laws**

Most states have “challenger” laws allowing officials, or even private parties, to question voters’ eligibility at the polls on Election Day.<sup>6</sup> These

laws are designed to apply to a different set of circumstances than the laws governing purges, but are sometimes being used in their stead.

Under federal law, states may not conduct large-scale, systematic purges of the voter rolls within 90 days of a federal election.<sup>7</sup> This buffer, Congress found, is needed to detect and correct the inevitable errors that arise from mass purges.

Challenger laws, on the other hand, operate much closer to elections without this safeguard. Traditionally, they have been used to target voters *individually* as they seek to vote rather than to delete large numbers of voter registrations at the same time.

Recently, election officials and outside agitators have attempted to blur these lines by issuing batch challenges to a large pool of voters all at once. They have been helped by laws in at least fifteen states that allow challenges not only to *voting*, but also to *registration*, before the election even occurs.<sup>8</sup> Challenger laws were already troublesome to those voters who were challenged individually, but now they’re being exploited to conduct what is, in effect, a mass purge.

A purge of this variety can both be an end-run around federal protections against wrongful removals and, like with most purges, be difficult to detect until it is too late. This risk is not hypothetical: High-profile attempts to use challenger laws to accomplish “challenge purges” have been exposed before each of the last few elections.

Just before the 2012 election, former Colorado Secretary of State Scott Gessler tried to use challenge procedures to remove alleged non-citizens from the voter rolls.<sup>9</sup> A large-scale removal would have violated the federal 90-day buffer.<sup>10</sup> Instead, Gessler sent letters to 4,000 voters (most of whom turned out to be citizens) threatening to challenge their registrations. Under Colorado law, challenges can be issued up

to 60 days before an election, and a hearing can occur 30 days after that.<sup>11</sup> Effectively, then, Gessler was trying to systematically purge voters from the rolls as close as 30 days before the election. Gessler, after much public criticism, retreated from these efforts.<sup>12</sup>

Former Iowa Secretary of State Matt Schultz tried a similar tactic until he was blocked by a state court.<sup>13</sup> In 2013, a judge rebuffed his first try to purge suspected noncitizens using federal immigration data (again, most turned out to be citizens).<sup>14</sup> Schultz then attempted to send the names of suspected noncitizens to county officials so they could challenge the voters' qualifications themselves. Voters identified as noncitizens, based on unreliable information, would be forced to "show their papers" or else be challenged by election officials, with no restriction on removals within 90 days of an election. In March 2014, less than three months before the primary election, a court blocked Schultz's challenge scheme. The court found Schultz did not have authority to create a new voter removal program simply by calling it a challenge.<sup>15</sup>

In other states, officials have used challenges on an ad hoc basis, but in large numbers. For example, prior to a 2015 state election, Hancock County, Georgia challenged 174 of the city of Sparta's 988 voters. Almost all the challenged voters were African Americans, alleged court filings.<sup>16</sup> The county eventually settled a lawsuit over their actions, agreeing they had failed to consider federal law.<sup>17</sup>

The 2016 election brought an even more brazen "challenge purge." In North Carolina, individuals used challenge laws to try to knock large groups of voters off registration lists under the guise of promoting "election integrity." In a technique similar to voter caging, these individuals claimed that they had sent mail to voters, and were challenging the eligibility of those whose

mailing was returned as undeliverable. This was the only evidence they used to make their case. But, instead of questioning voters at the polls on Election Day, these individuals went a step further and challenged the voters' registrations, trying to remove the identified voters from the rolls. The challengers were temporarily successful: only weeks before the 2016 election, they got 6,700 voters purged from the rolls — including a disproportionately high number of African Americans.<sup>18</sup> A federal court ultimately reversed the removals,<sup>19</sup> but the statutory provision<sup>20</sup> that was used to purge voters still remains on the books to this day, even though the judge in the case called it "insane."<sup>21</sup>

*In the past, activists and political operatives have taken advantage of challenger laws to conduct "voter caging." The term refers to mail cages at post offices: caging involves sending mass mailers out to registered voters, and challenging voters at the polls if mail sent to their address was returned as undeliverable. Caging operations have intimidated voters and led to chaos at the polls. Operations to challenge registrations, however, present the additional danger that voters will show up to the polls not to find their vote challenged, but instead to find out that they cannot vote because they have been deleted from the rolls altogether.*

## 2. New Potential for "Noncitizen" Voter Purges

There is a substantial threat that some election officials will initiate purges of suspected noncitizens this year. Without any evidence of a problem, the president<sup>22</sup> and like-minded allies have raised the specter of noncitizen voting since the 2016 election. This creates a political incentive to hunt for noncitizen voters on the rolls. In the past, these types of efforts have threatened to disenfranchise many eligible voters.

One notorious example was Florida's 2012

purge. The secretary of state initially reported that a cross-reference of the voter rolls with driver's license data showed up to 180,000 noncitizens were registered in the state. State officials then compiled a list of more than 2,600 voters for counties to purge, right before the federal election that year. The program was ultimately blocked by a federal court.<sup>23</sup> As it turned out, upon further examination only 85 individuals were found appropriate for removal on the grounds that they were noncitizens<sup>24</sup> (and only one was actually charged for voting<sup>25</sup>).

Florida's experience is illustrative of a broader problem with noncitizen voter purges. The state relied on its driver's license database to create a purge list, but DMV records are unreliable for this purpose. A noncitizen could get a driver's license in 2014, become a U.S. citizen in 2015, and register to vote in 2016 — not at all an unusual occurrence given that state driver's licenses last many years without requiring renewal.<sup>26</sup>

In almost all instances, initial estimates of noncitizens on voter registration rolls based on DMV lists prove vastly inflated. In Colorado, the secretary of state claimed he had a list of 3,900 noncitizens that he later ended up dropping to 141.<sup>27</sup> In Iowa, 3,500 supposed noncitizens, who Secretary of State Matt Schultz also wanted to challenge, became 248,<sup>28</sup> and in Michigan, 4,000 individuals became 600.<sup>29</sup>

This year, though, could present a unique problem: DHS Secretary Kirstjen Nielsen has made clear that the agency will help states "concerned that those who are not [eligible] from an immigration perspective" to check those records, although she has not offered specifics.<sup>30</sup>

In the past, states' access to federal immigration information has been limited to use of the Systematic Alien Verification for Entitlements (SAVE) program. SAVE works as follows: The user submits a name and an Alien Registrat-

tion Number (for example, for someone who showed a Green Card when getting a driver's license). SAVE then attempts to verify the person's current immigration status by checking that record against multiple federal immigration lists. When using SAVE, there are mandatory subsequent steps to verify the information.<sup>31</sup>

Of course, SAVE can sometimes actually be helpful in proving individual voters are eligible. For example, when Colorado ran suspected noncitizens' names through SAVE, 88 percent were found to be citizens.<sup>32</sup>

Experience has shown, however, that the required subsequent verification steps are important in avoiding error when using SAVE. For one, the SAVE database is incomplete because native-born citizens (and undocumented noncitizens) are not in SAVE. Also, using SAVE is vulnerable to the same problems that plague other large-scale database matching attempts, like out-of-date source lists and poor matching criteria.

The worry is that Secretary Nielsen's comments, which provided no bounds or limits on data access, are an indicator that states will have the ability in the future to directly access the DHS lists outside of SAVE. This would have all the problems of the initial cross-reference attempts using SAVE, but without the subsequent verification steps that are required when using SAVE.

### **3. Interstate Crosschecking is Posing New Threats**

This year, there are new reasons for concern over efforts to purge the voter rolls using the Interstate Voter Registration Crosscheck ("Crosscheck") program. Crosscheck contains records for 26 states and nearly 100 million voters.<sup>33</sup>

Sharing voter data across state lines is not new, but there are problems with Crosscheck that

should cause concern. First, Crosscheck data is inaccurate. It is supposed to tell election officials when someone moved *from* their state, but sometimes does the opposite. More than 2,500 voters whom Crosscheck said left Iowa prior to 2012 voted in the state that year.<sup>34</sup> One voter purged from Virginia's rolls because Crosscheck said he moved to South Carolina had actually moved *from* South Carolina *to* Virginia.<sup>35</sup>

Under Crosscheck, it's easy to confuse two different individuals as the same person. Crosscheck can create a match if only the first name, last name, and date of birth are the same. Shared names and birthdates are extremely common, making this an insufficient and imprecise method of identifying potentially ineligible voters. In a group of more than 180 people, it is more likely than not that two people will have the exact same date, month, and year of birth.<sup>36</sup> In the past, the Crosscheck system has even listed men with different middle initials — “Robert Wendell Brown” and “Robert B. Brown” — as the same person.<sup>37</sup>

A recent study estimated that only 0.5 to 2.7 percent of nearly 800,000 Crosscheck double-vote “matches” represented actual double votes.<sup>38</sup> A review of 1,483 pairings in Iowa with the same name and birthdate found that 99.5 percent had *different* social security numbers, so they clearly were not the same person.<sup>39</sup> In 2017, Virginia found that more than 250,000 out of 350,000 Crosscheck “potential matches” were inaccurate after checking more data.<sup>40</sup> Crosscheck confused an Idaho voter for another man in Arizona, even though he had never set foot in the state.<sup>41</sup> The list goes on.

To top it off, Crosscheck data is not secure. Indivisible Chicago, an advocacy group, discovered that program administrators sent Crosscheck passwords in unsecured emails to more than 80 recipients.<sup>42</sup> The passwords are simple

and infrequently changed.<sup>43</sup> This risks access to or even manipulation of data for nearly 100 million registered voters at a time when foreign actors are actively seeking this information.<sup>44</sup> Florida just announced that it accidentally disclosed nearly 1,000 voters' partial social security numbers that had previously been provided to Crosscheck.<sup>45</sup> Inspiring even less confidence, Kansas, which administers the Crosscheck program, disclosed personal data for thousands of state employees.<sup>46</sup>

Unsurprisingly, many states are re-evaluating their use of the program. Illinois has announced<sup>47</sup> it will delay sending data to Crosscheck and is considering leaving the program altogether, joining a number of states that have already done so. Oregon left “because the data ... was unreliable”<sup>48</sup> and officials elsewhere have voiced similar concerns.

Nonetheless, new states are joining the program. Alabama first sent data to Crosscheck in 2016,<sup>49</sup> and New Hampshire joined the next year.<sup>50</sup> This is a concern because significant Crosscheck problems have occurred when states receive Crosscheck data for the first time. When state or local officials first get the data, they may not understand that it is unreliable or that further checks are needed before removing voters. In 2013 state elections, Virginia found error rates as high at 17 percent when it removed 40,000 voters during its initial use of the program.<sup>51</sup> The next year, Ada County, Idaho, used the pro-

gram for the first time and removed 765 people without prior notice. Many voters pointed out errors, and counties scrambled to restore registrations.<sup>52</sup>

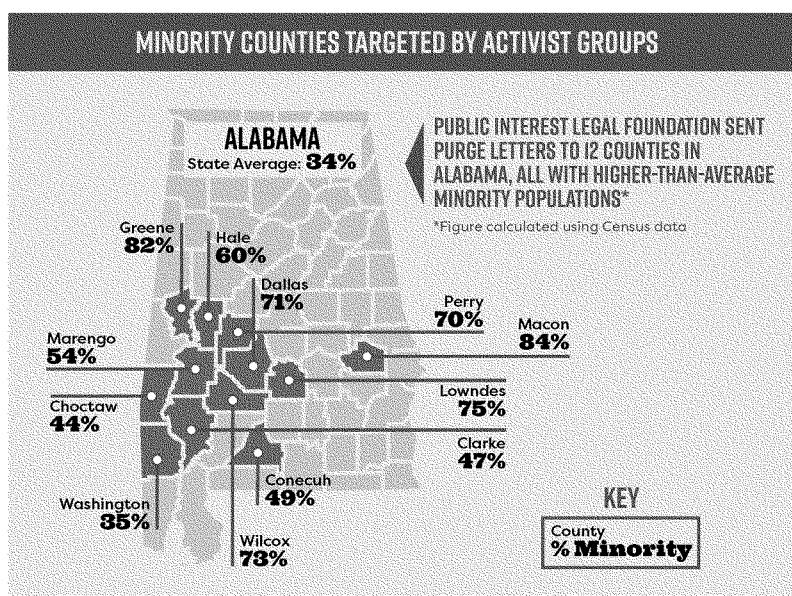

In other states, 2018 could mark the first time that voters who were flagged by Crosscheck several years ago will actually be removed. Federal law allows states to begin a multi-year removal process for voters flagged as potentially ineligible.<sup>53</sup> States first send voters a notification in the mail. If the voter does not respond, and does not vote in the next two federal elections, the voter can be removed. So, the effects of problematic matches that occurred four or five years ago could first materialize this election — in 2013 and 2014, six states joined Crosscheck.<sup>54</sup>

Meanwhile, Indiana passed a law in 2017 that allows voters to be removed *immediately* based

on a Crosscheck match. Previously, the state removed voters only after notice, then waiting two even-year elections, as required by federal law.<sup>55</sup> This illustrates the danger posed by the program. If Crosscheck erroneously lists an Indiana voter as having registered in another state, that voter could be purged right away.

#### 4. “Voter Fraud Vigilantes” and the Trump Administration are Pressuring States

Voter fraud alarmists are increasingly focusing their efforts on the registration rolls. In recent years, organizations such as the American Civil Rights Union (ACRU), Judicial Watch, Public Interest Legal Foundation (PILF), and True the Vote have both threatened and filed lawsuits seeking to institute more aggressive purge practices.

These groups have targeted more than 250 jurisdictions in 2017 alone, and more than 400 jurisdictions across the country since 2014.<sup>56</sup> The most strident attempts to force purges often focus on minority counties.<sup>57</sup> Some of the counties contacted have limited resources to defend themselves.<sup>58</sup>

In some cases, these groups have convinced or forced jurisdictions to implement voter removal practices that are problematic. In one high-profile example, Judicial Watch sued Ohio for not purging aggressively enough, and the parties eventually agreed to expand a purge of voters who did not vote or otherwise respond to an election mailing in three federal elections. Under the settlement, Ohio agreed to send a letter initiating the purge on an annual basis. Previously, Ohio had sent the mailing every other year. The Supreme Court is currently weighing whether this new policy of Ohio's, which has purged hundreds of thousands from the rolls, is lawful.<sup>59</sup>

Two counties in Texas agreed to a similar purge practice after being sued by ACRU. Those jurisdictions said they would initiate removals for voters who had not cast ballots in the last two elections. They also agreed to obtain lists of persons with felony convictions and purge them from the voter rolls no more than five days before elections. The specific requirement that voters be removed so close to an election is problematic because it would leave little or no time to correct errors.<sup>60</sup>

These groups frequently have dubious bases for their legal claims. They justify targeting jurisdictions by making a rudimentary comparison between census data and voter lists. When scrutinized, the groups' conclusions usually do not hold up.<sup>61</sup> Moreover, in at least two cases, the groups were rebuked by courts for misrepresenting laws or purge practices.<sup>62</sup>

Another threat looms as well. In June 2017, the Department of Justice quietly demanded that 44 states provide detailed information on how they maintain voter registration lists.<sup>63</sup> Observers noted that this could be a prelude to legal action to force states to conduct purges. A former head of the DOJ's Civil Rights Division called the mass request for information "virtually unprecedented."<sup>64</sup> DOJ could be actively pressuring more states to purge the rolls.

The letter is concerning, and hearkens back to a troubling effort from the Bush Administration in the mid-2000's when DOJ pressured U.S. Attorneys to sue states over failing to purge their voter rolls aggressively enough.<sup>65</sup> The Department used their power to put eligible voters at risk, rather than protect voters against disenfranchisement as the federal voting laws they invoked were originally designed to do.

Although many problems that have persisted with purges for more than a decade remain the same, new threats are emerging in 2018. Those wishing to purge the rolls, whether they be elected officials or private parties, are finding increasingly inventive ways to do so, such as abuse of challenger laws. The politicization of noncitizen voting and immigration in general provides an incentive to hunt for noncitizens on the rolls in a dangerous way, possibly with an assist from DHS. In some states, Crosscheck errors could present themselves for the first time this year, and all across the country, there is increased pressure on states and localities to purge the rolls, whether brought by individual fraud vigilantes or the Trump Administration itself. Voters, civic groups, and election officials must remain alert and guard against these threats in 2018.

## EXTREME GERRYMANDERING & THE 2018 MIDTERM

*by Laura Royden, Michael Li, and Yurij Rudensky*

## ABOUT THE BRENNAN CENTER FOR JUSTICE

The Brennan Center for Justice at NYU School of Law is a nonpartisan law and policy institute that works to reform, revitalize — and when necessary defend — our country's systems of democracy and justice.

At this critical moment, the Brennan Center is dedicated to protecting the rule of law and the values of Constitutional democracy. We focus on voting rights, campaign finance reform, ending mass incarceration, and preserving our liberties while also maintaining our national security. Part think tank, part advocacy group, part cutting-edge communications hub, we start with rigorous research. We craft innovative policies. And we fight for them — in Congress and the states, the courts, and in the court of public opinion.

## ABOUT THE CENTER'S DEMOCRACY PROGRAM

The Brennan Center's Democracy Program works to repair the broken systems of American democracy. We encourage broad citizen participation by promoting voting and campaign finance reform. We work to secure fair courts and to advance a First Amendment jurisprudence that puts the rights of citizens — not special interests — at the center of our democracy. We collaborate with grassroots groups, advocacy organizations, and government officials to eliminate the obstacles to an effective democracy.

## ABOUT THE BRENNAN CENTER'S PUBLICATIONS

**Red cover** | Research reports offer in-depth empirical findings.

**Blue cover** | Policy proposals offer innovative, concrete reform solutions.

**White cover** | White papers offer a compelling analysis of a pressing legal or policy issue.

## ABOUT THE AUTHORS

**Laura Royden** is a redistricting researcher in the Democracy Program. She focuses on quantitative approaches to studying and analyzing redistricting. Before joining the Brennan Center, she was a research assistant at the Harvard Kennedy School's Ash Center for Democratic Governance and Innovation. Royden holds an S.B. in urban studies & planning and a minor in political science from the Massachusetts Institute of Technology. Her prior Brennan Center work includes *Extreme Maps*, a widely cited study of partisan bias in the congressional maps drawn after the 2010 Census.

**Michael Li** serves as senior counsel for the Brennan Center's Democracy Program, where he heads the Center's work on redistricting. He is a regular writer and commentator on redistricting and election law issues, appearing frequently in national and regional outlets. His work at the Brennan Center includes empirical research into redistricting practices as well as participation in major redistricting cases around the country. Before joining the Brennan Center, Li practiced law at a major law firm in Dallas, Texas for over ten years and previously served as executive director of a donor alliance that oversaw strategic and targeted investments in non-profit organizations working to increase voter participation and engagement in historically disadvantaged African-American and Hispanic communities in Texas. Li received his J.D., with honors, from Tulane University School of Law and his undergraduate degree in history from the University of Texas at Austin.

**Yuri Rudensky** serves as counsel for the Brennan Center's Democracy Program, where he works on redistricting policy reform and litigation. Prior to joining the Brennan Center, Rudensky practiced law at a non-profit social justice firm in Seattle, Washington focusing on issues of voting rights, housing, and homelessness. Rudensky received his J.D. from the University of Washington School of Law, where he was a William H. Gates Public Service Law Scholarship recipient, and his undergraduate degree in literature from Yale University.

## ACKNOWLEDGEMENTS

The Brennan Center gratefully acknowledges the Bushnell-Kessel Charitable Fund, a Giving Fund, Carnegie Corporation of New York, Change Happens Foundation, Democracy Alliance Partners, Ford Foundation, Gutttag Family Foundation, The Charles Evans Hughes Memorial Foundation, The Joyce Foundation, The JPB Foundation, The Kohlberg Foundation, Nancy and Edwin Marks Family Foundation, Katie McGrath & J.J. Abrams Family Foundation, Open Society Foundations, Rockefeller Brothers Fund, Schwab Charitable Fund made possible by the generosity of the Present Progressive Fund, and Jon and Mary Shirley Foundation for their generous support of our redistricting work.

The authors also thank Nicholas Warren, Thomas Wolf, and Wendy Weiser for their invaluable guidance and input throughout the drafting of this report; Yuliya Bas, Naren Daniel, Alexis Farmer, Stephen Fee, and Jim Lyons for critical feedback and assistance; and Michael Waldman for his insight in shaping the final product.

## EXECUTIVE SUMMARY

The 2018 elections will test the grip of modern gerrymandering. Voters appear poised to speak loudly. Early indications point to an exceptional wave election. But will that voice translate into electoral results?

While Americans have had wave elections before, one complicating new factor this decade is the pervasiveness of extreme gerrymandering in the drawing of congressional maps. Both parties gerrymander when they can but the practice has been worsened by increasingly sophisticated data and map-drawing techniques. The U.S. Supreme Court considers two partisan gerrymandering cases this year, but rulings will come too late to likely affect the 2018 elections. Instead, Americans in key states will vote again under gerrymandered maps that thus far have proven highly resistant to change.

This comprehensive study poses a stark warning to both courts and the public. What looks to be one of the most important recent midterm elections may turn out, in fact, to show how effectively extreme gerrymandering distorts American democracy and blunts the public's voice.

Because of maps designed to favor Republicans, Democrats would need to win by a nearly unprecedented nationwide margin in 2018 to gain control of the House of Representatives. To attain a bare majority, Democrats would likely have to win the national popular vote by nearly 11 points. Neither Democrats nor Republicans have won by such an overwhelming margin in decades. Even a strong blue wave would crash against a wall of gerrymandered maps.

This high barrier to a Democratic majority is at odds with early polls showing Democrats with a significant advantage in the generic congressional ballot. As of mid-March, Democrats held an average lead of nearly eight percentage points, 48-40.<sup>1</sup> Based on historical election results, a lead of this magnitude should net Democrats around 30 additional seats — comfortably more than the 24 they need to retake control of the U.S. House of Representatives.<sup>2</sup> Because of gerrymandering, however, that is no longer the case.<sup>3</sup> Even the court-ordered redrawing of Pennsylvania's congressional map will only improve Democrats' chances slightly.<sup>4</sup>

As the table on the next page shows, the disparities are sobering. This decade, gerrymandering has helped Republicans. In the future, it may help Democrats. Although this report focuses on Democrats, its warnings apply with equal force to Republicans.

## Projected Democratic Seat Gain in U.S. House

+14	42	41
+16	46	56

\* Projected four-seat Democratic majority

\*\* Projected five-seat Democratic majority

To be sure, Democrats might carry some districts they are not projected to win. The March 13, 2018 special election in PA-18 is a recent example. But surprise results under remarkable political circumstances should not obscure the more fundamental lesson of this decade's maps — gerrymandering matters and it matters a lot. Even if 2018 proves to be an unusual year in a greater than normal number of districts, and produces a surprise surplus of Democratic wins, the effects of gerrymandering will return with a vengeance if 2020 looks more like 2012, 2014, or 2016.

Individual states paint an even clearer picture. As gerrymanders become ever more sophisticated, generic ballot leads no longer effectively predict how many seats a party might pick up. Some state maps are carefully designed to withstand significant electoral swings while others respond more nimbly to shifting political preferences. Thus, even if 2018 sees a fairly consistent — and even sizable — national shift in favor of Democrats that is replicated in the states, the party's seat yield is likely to vary significantly between gerrymandered and non-gerrymandered states. While seat turnover in non-gerrymandered states might be close to the number predicted by historic data, gerrymandered states will see lower rates of change or, perhaps, even no change at all.

Political scientists call the relationship between the votes a party gets in a state and how many seats it picks up “responsiveness.” In a highly responsive map, a party steadily increases its seats as it increases

its share of the vote. That is how most assume a democracy should function. A non-responsive map would be the reverse: one in which a party can increase its vote share by 10 or even 20 percent without gaining a single extra seat. A handful of states have non-responsive maps that are especially stark:

- In **Michigan**, even if Democrats win five seats with 38.38 percent of the statewide vote, they are not projected to compete for a sixth seat until their statewide vote share reaches 54.89 percent, an increase of 16.51 percentage points.
- In **North Carolina**, even if Democrats win three seats with 29.66 percent of the statewide vote, they are not projected to compete for a fourth seat until their statewide vote share reaches 52.78 percent, an increase of 23.12 percentage points.
- In **Ohio**, even if Democrats win four seats with around 26.07 percent of the statewide vote, they are not projected to compete for a fifth seat until their statewide vote share reaches 54.71 percent, an increase of 28.64 percentage points.
- In **Texas**, even if Democrats win 11 seats with around 31.92 percent of the statewide vote, and because of court-made modifications to the map, compete for a twelfth seat at around 41.07 percent of the vote, they will not compete for a thirteenth seat until their statewide vote share reaches 51.15 percent, an increase of 10.08 percentage points.

The disparity is even greater when looking at the vote share needed to win a bare majority of the congressional delegations of highly gerrymandered states.

This study is the first to gauge the magnitude of change necessary on a state-by-state basis to flip seats under current congressional maps and the first to visualize the responsiveness of maps, highlighting the stark differences between gerrymandered and non-gerrymandered states.

It also illustrates the need for clear legal boundaries in the age of computerized gerrymandering. Although gerrymandering has long been a feature of American political life, this decade's maps durably lock in advantages for both parties with unprecedented precision. Even when an election sees massive changes in the votes a party receives, there can be zero change in the number of seats that party can expect to win. An effectively gerrymandered state's congressional delegation can remain completely static unless confronted with a true tsunami in favor of one party.

This state of affairs turns on its head the Framers' notion that frequent elections would ensure Congress was a "miniature, an exact portrait" of the people as a whole. While much of the focus in partisan gerrymandering litigation has been on measuring the degree of bias, even more troubling is the lack of responsiveness in this decade's maps. Regardless of the 2018 midterms' outcome, this report's findings serve as a wake-up call: Courts must act to rein in extreme partisan gerrymandering or 2021's redistricting will see even more unresponsive, durable, and undemocratic congressional maps.

#### Key Findings:

- Gerrymandering will materially hamper the Democrats' efforts in the mid-terms. Their average generic ballot lead, as of March 20, 2018, was 9.4 points. But while a roughly 5.4-point lead in 2006 netted Democrats a total of 31 new seats, a comparably sized lead today is projected to give them only 12 seats. This is barely half the number of seats that Democrats need to retake a majority in 2018.
- The lack of responsiveness to electoral shifts is driven in substantial part by a handful of large

## APPENDIX C

states where maps were drawn under single-party control. In the battleground states of **Michigan** and **Ohio**, for example, even if Democrats match their exceptional performance in 2006 and 2008 — the best Democratic years in two decades in both those states — they are not projected to win a single additional seat under the current maps.

Other states with high rates of partisan bias (**North Carolina** and **Texas**) have equally unresponsive maps. Putting even a few seats in play would require Democrats to win a larger share of the vote than they have all decade.

### Projected Democratic Seat Gain in Highly Gerrymandered States

State Delegation Split After 2016 Election	2016 Democratic Vote Share	Extra GOP Seats Attributable to Partisan Bias <sup>1</sup>	Projected Statewide Popular Vote for Democrats to Put One Additional Seat in Play (Royden)	Projected Statewide Popular Vote for Democrats to Have Chance of Winning Majority of Seats (Royden)
Michigan 9R   5D	49.44%	2-3	54.89% (+5.45 points)	57.60% (+8.16 points)
North Carolina 10R   3D	46.68%	3	52.78% (+5.1 points)	55.08% (+7.4 points)
Ohio 12R   4D	41.83%	2-4	54.71% (+12.88 points)	56.53% (+14.7 points)
Texas 25R   11D	42.29%	1-2	41.07% (- points)	53.62% (+11.33 points)

The situation would have been even worse for Democrats had the congressional map in **Pennsylvania** not been redrawn in early 2018 by the Pennsylvania Supreme Court. Under the state's 2011 congressional map, Democrats would not have been projected to win 6 of 13 seats unless they matched their 2008 performance level and would not be projected to win a majority of seats unless they won 57.07 percent of the statewide vote (a 14-point statewide margin).

- Democratic gerrymanders in states like **Maryland** are equally durable. In the past decade, Republicans have won between 31.25 percent (2008) and 41.86 percent (2014) of the statewide vote. But, as a result of an aggressive redraw of Maryland's congressional map after the 2010 Census, they will win only 1 out of 8 congressional districts at those rates of performance. Only when Republicans win 45 percent of the vote do they win a third of congressional districts.
- By contrast, maps drawn by independent commissions, courts, and split-control legislatures not only had lower levels of partisan bias but are significantly more responsive to electoral swings (i.e., have a high number of seats that could change parties). **California**'s commission-drawn congressional map and **New York**'s special-master drawn congressional map are among the most responsive in the country.
- Maps in many states show signs of “faux competitiveness.” While seats on these maps might look relatively competitive on paper, in reality, they are positioned outside of a state's historic election outcome range. Flipping these seats would require extraordinary circumstances, such as an unprecedented, large wave election.

**APPENDIX C**

- In many states, lack of responsiveness to statewide electoral swings appears to be driven at least in part, and often in significant part, by adverse treatment of communities of color.
  - In **Texas**, for example, the fracturing (cracking) of sizeable Latino, African-American, and Asian-American communities in the Dallas-Fort Worth and Houston regions accounts for a large portion of the non-responsiveness in both the state's 2011 legislatively drawn plan and its 2013 court-modified plan.
  - Likewise, the concentration (packing) of African-American voters in **Virginia** into just two congressional districts enabled map-drawers to create additional safe Republican districts. When a special master redrew the map to undo the packing of African-American voters, it also significantly improved responsiveness.

## ANALYSIS

### I. OVERVIEW: MEASURING RESPONSIVENESS

In *Extreme Maps* — a report the Brennan Center published in 2017 — we examined how skewed this decade's congressional maps were in terms of favoring one party over the other.<sup>5</sup> We found that a handful of states, where Republicans had sole control of the map-drawing process, were responsible for giving Republicans an advantage of 16-17 seats, on average, in the U.S. House.<sup>6</sup> We also found evidence of Democratic gerrymandering in states like Maryland — though the levels of Democratic gerrymandering were much lower, in part, because Democrats controlled redistricting in fewer states. By contrast, our study shows much lower and often negligible rates of bias in congressional maps drawn by commissions (regardless of the type of commission) and courts, as well as those drawn under split political control.<sup>7</sup>

In this report, we test the durability of the partisan bias that we identified in *Extreme Maps* — and gauge just how much vote share Democrats would have to win to pick up additional seats in each state. While *Extreme Maps* looked at the partisan bias of each state's congressional map, this report looks at how "locked in" that bias is — in political science terms, how responsive each state's map is to electoral shifts.

Examining U.S. House elections on a state-level for electoral responsiveness helps provide a more nuanced look at likely electoral outcomes given gerrymandering. The charts in the report and Appendix 1 illustrate in a vivid and easily discernible manner how gerrymandering and redistricting choices contribute to, and exacerbate, partisan over- and underperformance.

#### A. Responsive Maps: How Fair Maps Reflect Shifts in Voter Preference

In political science terms, a responsive map is one that allows a political party to win more seats as it wins more votes. If a map is perfectly responsive, a party progressively wins more seats as it wins a progressively larger share of the statewide vote. This allows changes in voter preference at the polls (e.g., voter input) to lead to changes in a legislature's composition (e.g., electoral outcome).

As political scientists have long observed, American congressional maps — at least in the absence of manipulation — have a high, and predictably constant, degree of responsiveness.<sup>8</sup> For each percentage point increase in a party's vote share, a party should, under normal circumstances, expect to gain around two seats at a national level. Thus, a two-point increase in vote share should yield a gain of four seats, and a three-point increase in vote share should increase a party's seat share by around six.

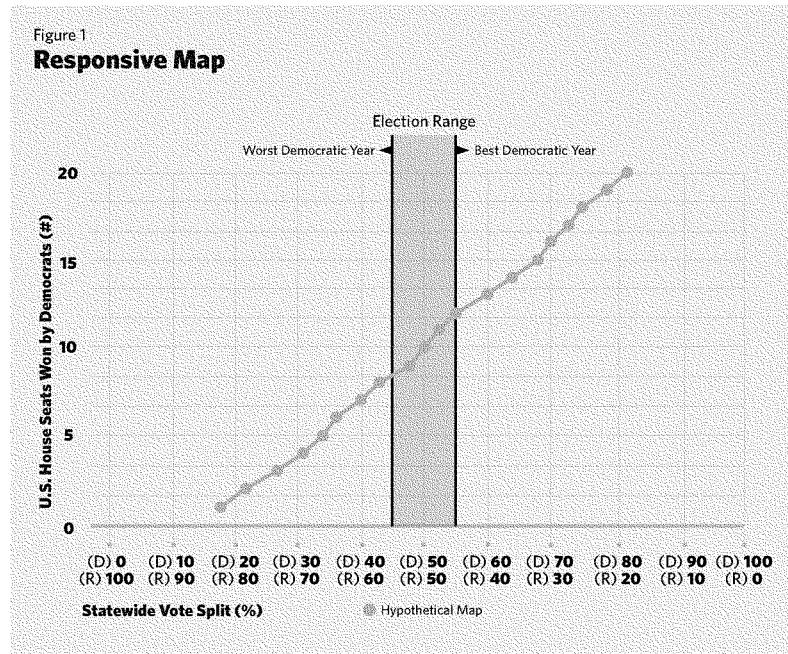

In reality, responsiveness varies greatly by state. One way to test the responsiveness of a map is to look at a map's seats-to-votes curve, plotting out the points at which a party is expected to win an additional seat.

This can be done because of another long-observed facet of American elections: that state-level vote share and district-level vote share move reliably in tandem in the majority of districts.<sup>9</sup> Thus, if, in the last election, a party won 52 percent of the statewide vote and 47 percent of the vote in District A and the party's statewide vote share in the next election increases by 3 points, we can predict that the party's vote share in District A also will increase by around 3 points. This consistent relationship between statewide and district-level vote share allows us to calculate what the statewide vote share would likely need to be in order for a party to win any district that it does not currently control. In

## APPENDIX C

turn, because we know what each party's statewide vote share was for past elections, we can make assessments of how easy or difficult it will be for a party to win additional seats under different election scenarios. To be sure, factors like the quality of candidates and campaigns, the advantage of incumbency, and other district-specific factors can impact results in any given race, particularly in races just on the border of the model's projections. In an extreme case, a party might even win a district well outside the bounds of what the model projects, especially if enthusiasm among one party's voters, donors, and volunteers collapses drastically while rising dramatically among the opposing party's supporters. But in the vast majority of contests, as gerrymanderers know well and count on in constructing gerrymandered maps, how a party does will be driven by things that are not district specific. In short, the national and state level political environment typically matter much more.

Based on political scientists' observation of American elections since the late 1940s, a responsive map in the United States would be expected to yield a fairly steady, smooth, often S-shaped curve that approximately follows a 2:1 seats-to-votes ratio.<sup>10</sup>

To illustrate, the graph above (Figure 1) shows a hypothetical state with 20 house districts and a highly responsive map. As the statewide Democratic vote share increases along the x-axis, the expected number of seats won by Democrats, as represented by the points, increases as well. The curve is smooth and the slope is relatively constant, meaning there is a fair partisan alignment of voters in each district. No districts are clumped at either extreme of the chart. Reading from left-to-right,

Democrats win their first district at roughly 20 percent of the overall vote share. Reading from right-to-left, the Republicans would likewise win their first seat with approximately 20-percent of the vote share. If the curve is extended to (0 percent, 0 seats) and (100 percent, 20 seats), the S-shape becomes visible. The same is true, of course, in inverse, for Republicans. As Republicans win more votes, they also win more seats.

#### **B. Non-Responsive Maps: How Gerrymandering Alters the Expected Distribution of Seats**

By contrast, a non-responsive map is one where an increasing level of support for a party does not result in a regular, corresponding increase in the number of seats won.

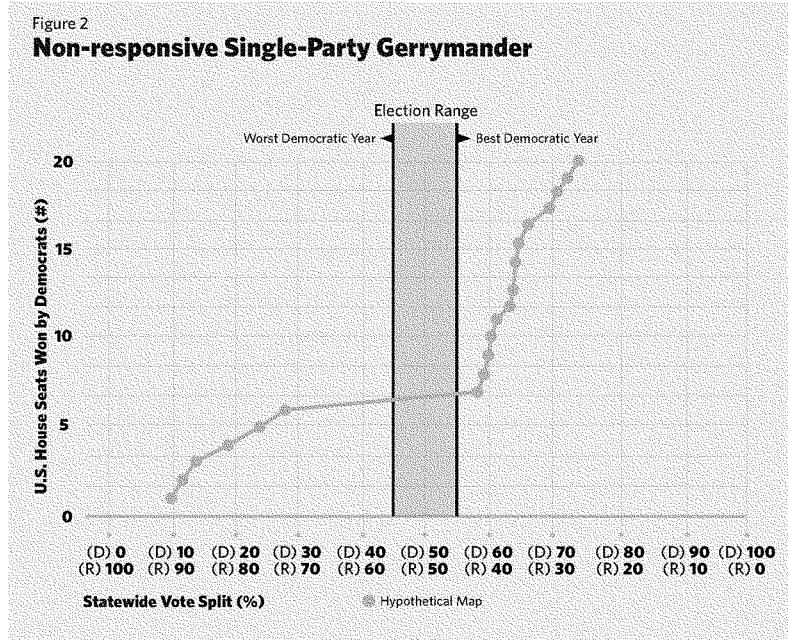

Generally, an unresponsive map allows a party (or, in certain cases, both parties) to gain a handful of seats with very little statewide vote share but makes it exceedingly difficult for them to gain additional seats unless the party wins a historically unprecedented share of the vote.

There are many reasons why a map might be non-responsive. In a small number of cases, a lack of responsiveness is attributable to adherence to neutral and legitimate redistricting criteria, such as keeping communities of interest together or following naturally occurring or political boundaries. However, in the overwhelming number of cases, non-responsiveness is driven by map-drawers' desire to secure a partisan gain or protect incumbents.

By limiting seat gains within certain commonly occurring vote share bands (i.e., the actual range of election outcomes), gerrymanders destroy the expected responsiveness of a map by making it harder for the opposing party to win seats, resulting in an observable and often vividly noticeable effect on the normal seats-to-votes distribution.

As the illustrative examples on the following pages show, the result is deeply undemocratic — and visibly so.

### 1. Gerrymandering Favoring a Single Party

The chart above (Figure 2) shows the distribution of seats in a hypothetical state where there has been an extreme partisan gerrymander. On the left side, Democrats pick up six seats before reaching 30 percent of the statewide vote share. These six districts have been packed overwhelmingly full of Democratic supporters and there is a notable absence of equally concentrated Republican districts on the other side of the chart. To pick up additional seats under this map, Democrats must increase their vote share to more than 57 percent statewide. The noticeable gap in the curve represents a severe stagnation in the composition of the congressional delegation: Democrats win the same number of seats at a 27 percent vote share as they do at a 55 percent vote share. On the other hand, in a super-wave year, a significant number of districts would go Democratic with comparatively modest gains beyond the 60 percent threshold: Democrats would pick up the remaining 14 districts by increasing their vote share from 60 to 75 percent.

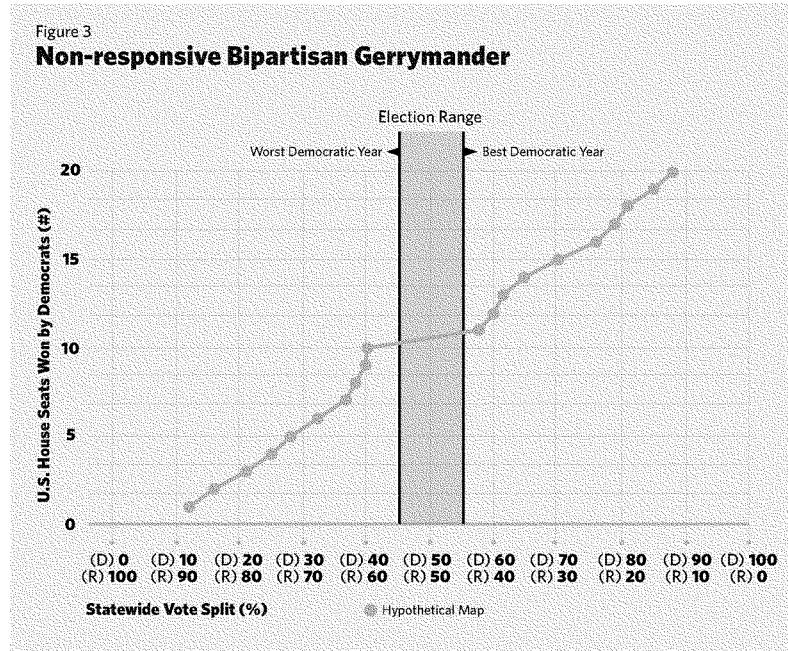

Figure 2 illustrates both tools of extreme partisan gerrymanders — packing, which overwhelmingly concentrates the opposing party's voters into a handful of districts (seen on the left side of the chart), and cracking (seen on the right side of the chart), which wastes an opposing party's votes by dividing its voters across the remaining districts in a way that makes it near impossible for them to constitute a majority. Cracking, in particular, can lead to "faux competition" — districts that may seem close and competitive from election results, but have been designed to be reliable, narrow wins for the gerrymandering party.

The increased use of data technology in the redistricting process allows gerrymanderers to deploy these tools with increasing precision, efficiently allocating voters among districts to craft maps with surgically cracked districts clustered just out of reach of the opposing party. That is precisely why there are two clumps of districts. It is also why with an even split of the statewide vote share, Republicans enjoy a 14 to 6 advantage.

Of course, if an electoral wave is large enough, the gerrymander seawall can be breached. That is precisely what happens in the hypothetical scenario above should Democrats cross 60 percent of the statewide vote threshold. Whether a gerrymander can be overwhelmed, however, should not be a barometer for a map's responsiveness or the effect of a gerrymander — the unresponsiveness is still plainly visible and undesirable.

## 2. Bipartisan (or Incumbent Protection) Gerrymanders

Not all gerrymanders advantage just one party. Bipartisan or incumbent protection gerrymanders look slightly different, but still contain a plateau in responsiveness that generally covers the state's historic and projected partisan vote split.

The chart above (Figure 3) shows the distribution of seats in a hypothetical state where there has been a bipartisan gerrymander designed to protect incumbents of each party. There is a large gap in the

middle, but unlike the extreme partisan gerrymander, the two halves of the curve have relatively similar shapes. Both sides are smooth and steady curves similar to the responsive map, but they appear to have been pushed towards the ends of the chart creating safe districts for both parties, leaving a gap in the middle.

The difference in shape can be explained by analyzing the purpose of a bipartisan gerrymander. These gerrymanders protect both parties' incumbents from electoral waves, but do not award a party with a disproportionate share of seats.

Cracking and packing may still be used in a bipartisan gerrymander but are not as pronounced — the districts just need to be uncompetitive enough for the incumbent party to be reasonably protected from shifts in the electorate. While these charts may appear responsive at the extremes, the range of expected and historical two-party vote shares is typically firmly inside the plateau where there is no change to any seats thus yielding very little responsiveness.

### C. Notes on Reading the Charts and Some Caveats

To examine the current level of responsiveness in this decade's congressional maps, we used election results from 2012, 2014, and 2016 to generate seats-to-votes curves for all states with more than six congressional seats.<sup>11</sup> This allowed us to conduct a uniform vote swing analysis to gauge the level of statewide support Democrats would have to win to pick up seats in each state given district boundaries and past electoral outcomes. As importantly, these seats-to-votes curves also allowed us to visualize the distribution of seats in each state and to flag tell-tale indicators of likely gerrymandering. Indeed, in Appendix 1, it is remarkably easy to spot states with high rates of bias. Not only is it difficult for a party (in this decade usually Democrats) to win additional seats, but it is easy to tell why — districts were carefully placed just outside the opposing party's reasonably anticipated vote share.

We focus on Democrats in this report for two reasons. First, Republicans controlled far more states than Democrats in the round of redistricting that took place after the 2010 Census and are accused of having been particularly aggressive in attempting to lock in an advantage through gerrymandering. Second, 2018 appears, at least at the time of writing, as if it will be an extraordinarily good year for Democrats electorally. Looking at how hard (or easy) it will be for Democrats to win the 24 seats they need to regain the U.S. House offers a chance to probe the extent of gerrymandering and its durability. Similar charts could be easily constructed, however, to gauge how easy or hard it is for Republicans to win seats absent a super wave.

There are a few final caveats. This study uses a state-level view to specifically examine the role of gerrymandering in widening the gap between mathematically expected seat-share and actual seat-share. But at this relatively early stage in the 2018 general election cycle, it does not attempt to factor qualitative, district-specific factors, such as incumbency, the presence of third-party or independent candidates, shifting demographics, differing levels of movement toward (or against) the parties in sub-groups of voters (e.g., white college educated women versus non-college educated women), turnout, or scandalous behavior by one or more candidates. All of these could have an impact on the actual number of seats each party wins. This year, a large and growing number of retirements, in particular, could make it somewhat easier for Democrats to win a majority than the model predicts. An especially strong wave, likewise, could produce "winner's bonus" by depressing turnout, volunteering, and fundraising among Republicans while increasing it among Democrats, enabling Democrats to pick up seats normally out of reach. For that reason, this model can and should be supplemented with additional information from other sources and models as they become available.

**APPENDIX C**

For the reasons above, the model also should not be used to predict which exact districts Democrats will win. While the data points in each curve represent individual districts, this study aims to assess the impact of map-drawing on responsiveness broadly in states. It is possible that Democrats win districts that the model projects they are unlikely to win and, conversely, they could lose races in districts that the model suggests that they should easily win.

However, while district-specific dynamics could, and likely will, have an impact in individual races, it remains true that it will be significantly harder for Democrats, in the aggregate, to win a majority than at any point in modern American history.

## II. CASE STUDIES: RESPONSIVENESS IN THE CONGRESSIONAL MAPS OF 2010 REDISTRICTING CYCLE

This report provides short case studies, looking at the seats-to-votes curves for Pennsylvania, Maryland, California, New York, Texas, Virginia, and North Carolina. These states were chosen for specific reasons. Pennsylvania is a notable Republican gerrymander. Maryland is a notable Democratic gerrymander. California is a notable example of an incumbent protection gerrymander that was remedied by an independent redistricting commission. New York is a notably responsive map drawn by a court in a state where non-responsiveness in past maps had been previously justified by political geography (e.g., the heavy concentration of Democrats in New York City). Texas, Virginia, and North Carolina are notable examples of how race factors into gerrymandering — and, conversely, how improving minority representation results in maps that are also far more responsive to electoral swings.

Each state's curve was analyzed for the responsiveness characteristics discussed in this section. Specifically, we looked at whether there is a single, consistent rate of change along the curve; whether the curve includes a significant plateau; whether there is an equal distribution of homogenous (or extreme) Democratic and Republican districts; and whether an even split in vote share results in a relatively even allocation of congressional seats. We then augmented these descriptive observations with state-specific demographic and other narrative elements to complete the analysis.

Appendix 1 contains a responsiveness analysis for each of the 26 states with six or more congressional districts, which collectively account for 85 percent of congressional seats in the current U.S. House.

Appendix 2 looks at how many congressional seats could be in play in each state under different election scenarios ranging from a modestly improved year for Democrats to a Democratic tsunami.

### Maps Drawn Under Single-Party Control

Maps produced under sole Democratic and Republican party control are markedly less responsive to electoral swings than maps drawn using more neutral processes and often show tell-tale evidence of manipulation.

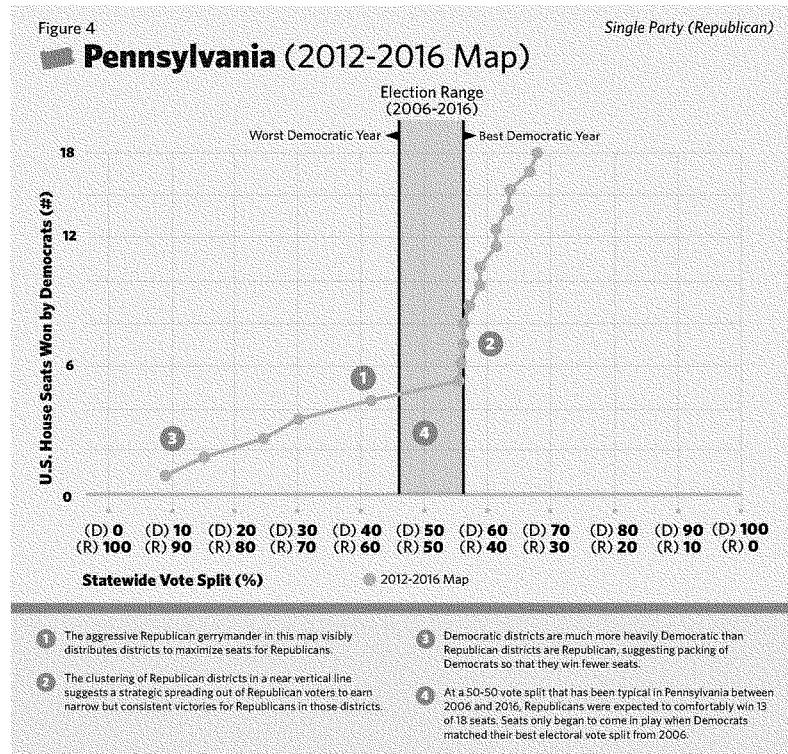

#### Case Study: Pennsylvania

With majorities in both houses of the Pennsylvania General Assembly and control of the governor's office, Republicans had unilateral control over the 2010 congressional redistricting.<sup>12</sup> The resulting map, which the Pennsylvania Supreme Court recently deemed to be an unconstitutional partisan gerrymander, provided Republicans with a secure 13 to 5 advantage in the state's congressional delegation over the first three elections of the decade. It is also decidedly not responsive, with Democrats needing to win a historically large share of the vote to gain any additional seats.

This skewed result is at odds with Pennsylvania's status as one of the most competitive states in the nation. Indeed, in statewide races, Democrats and Republicans have jockeyed for favor without any decisive advantage in recent decades. Since 1994, there have been three Democratic and three Republican governors. Over that span, Pennsylvania voters have tended to favor Republican candidates for the United States Senate, who have won six out of eight elections, and Democratic candidates for president, who have won five out of six contests.

This competitiveness also is reflected in the party's vote share in congressional races. In recent years,

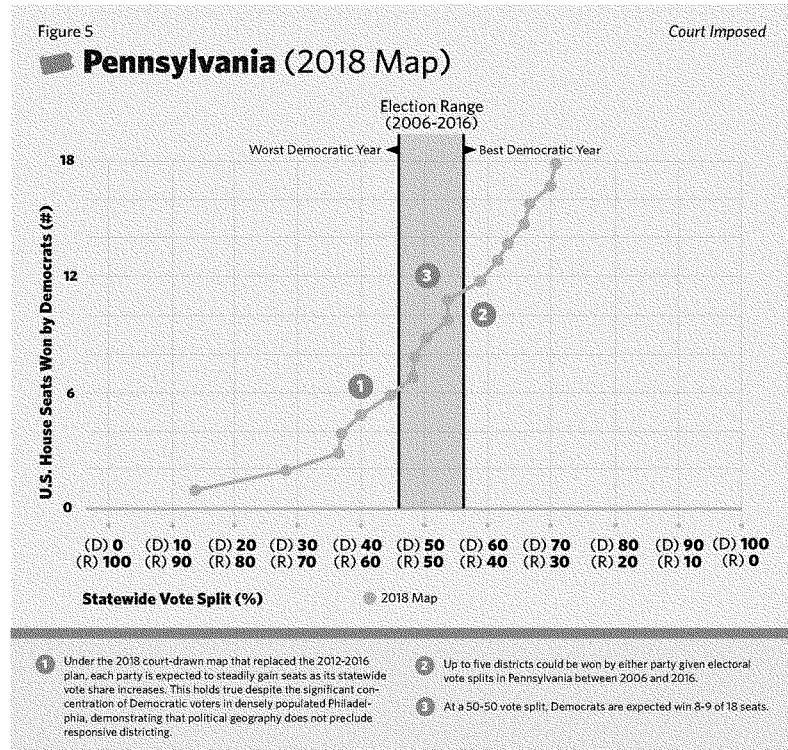

Democrats have won somewhere between 48 and 56 percent of the statewide congressional vote share. But these significant electoral swings had little impact on the outcome under the congressional map drawn by Pennsylvania Republicans in 2011. Indeed, unless Democrats reach 2006 levels of support — when they won 56.13 percent of the congressional vote — they were not projected to garner any additional seats under the now invalidated map.

The distribution of seats under the struck down map (Figure 4) bears many of the hallmarks of a particularly aggressive seat-maximizing gerrymander. No fewer than seven of the districts won by Republicans from 2012 to 2016 cluster between 55 and 59 percent of the Democratic vote share. This is highly indicative of an artful spreading out of Republican voters to win as many seats as possible — particularly given that Democratic vote share in more recent elections has been consistently lower and has only exceeded 56 percent in the 2006 Democratic wave election. Indeed, in the more recent elections between 2010 and 2016, Democratic vote share in Pennsylvania has been between 46.60 and 50.76 percent, making all of the districts in that range safely Republican.

While Republican voters were tactfully spread to maximize their voting strength, the congressional map does the opposite with their Democratic counterparts. Two of the districts expected to be won by Democrats are won with just 9.02 and 15.15 percent of the statewide vote. These are among the most Democratic districts in the country. As a comparison, in California, Democrats are not expected to win any seats unless they secure 22 percent of the statewide vote. In Pennsylvania, they are projected to win three with just over 24 percent.<sup>13</sup> This dense packing of Pennsylvania Democrats into a few districts, without similarly packed Republican districts, leaves fewer Democratic voters to be split among the other, more competitive districts.

The result, of course, is a remarkably unresponsive map. Democrats are projected to win their first four districts with just 30 percent of the statewide vote. At 41 percent, they are expected to win their fifth. It takes more than 55 percent of the statewide total to project Democrats winning six congressional seats or one third of the Pennsylvania delegation. In other words, the composition of Pennsylvania's congressional delegation remains static even with a 14-point swing in favor of Democrats.

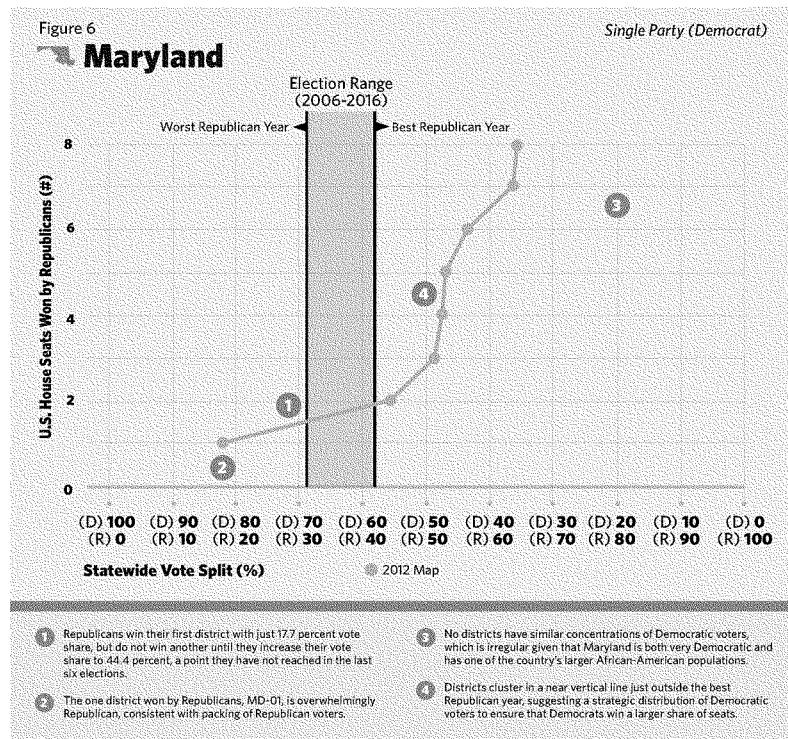

These manipulations allow a state that regularly returns even splits for Democrats and Republicans to send a delegation that is over 70 percent Republican to Congress. By contrast, the replacement map drawn with guidance from a special master and ordered into effect for the 2018 election (Figure 5) is much more responsive.<sup>14</sup> As a party wins more votes, it wins more seats. At least five seats are located in the band representing Pennsylvania's recent vote share splits.

#### Case Study: Maryland

If Pennsylvania is an example of an aggressive Republican gerrymander, Maryland's 2011 congressional map is its Democratic counterpart.

In Maryland, Democrats had supermajorities in both houses of the legislature, plus held the governor's office, during the 2010 congressional redistricting.<sup>15</sup> This allowed Maryland Democrats to follow a similar playbook to that of Pennsylvania Republicans. The resulting map all but guarantees Democrats seven out of eight districts (up from six before redrawing of the maps) even during strong Republican years like the wave election of 2014. It is also the subject of a partisan gerrymandering

lawsuit that reached the Supreme Court.<sup>16</sup>

Overall, Maryland is a decisively Democratic state. Maryland's residents are among the best educated in the nation and have among the highest median incomes.<sup>17</sup> The population is largely clustered in dense metropolitan areas around Baltimore and greater-Washington, D.C. Maryland also has a very large African-American population, comprising more than 30 percent of residents.<sup>18</sup>

Given this demographic profile, it is no surprise that Democrats, who have historically won between 58 and 69 percent of the statewide congressional vote, hold a significant partisan advantage. Nonetheless, the Maryland map's lack of responsiveness indicates that this electoral dominance comes, in part, from a concerted effort to keep certain districts well beyond the reach of Republicans.

Like the gerrymander in Pennsylvania, Maryland's map does not respond to the usual shifts in partisan preference (Figure 6). There are no competitive seats, even during wave election years. And, under a hypothetical scenario where Democrats and Republicans evenly split the statewide vote, Democrats are still expected to win six contests and the Republicans two. Such outcomes are possible thanks to the efficient distribution of Democratic voters among seven districts and the efficient packing of Republican voters into one.

Under this map, Democrats must receive over 35 percent of the statewide vote to be expected to win a single seat, while Republicans need less than 20 percent. Put differently, the most Republican district — Maryland's 1st Congressional District — is more densely Republican than the most Democratic district is Democratic. This is highly suspect considering the overwhelming statewide partisan advantage held by Democrats, the state's large African-American population, and the presence of urban centers with dense concentrations of Democratic voters. Such a result, as it turns out, is only possible because of surgical line drawing to place the heavily Republican suburbs of Harford and Baltimore into the district.<sup>19</sup>

### Maps Drawn by Independent Redistricting Commissions

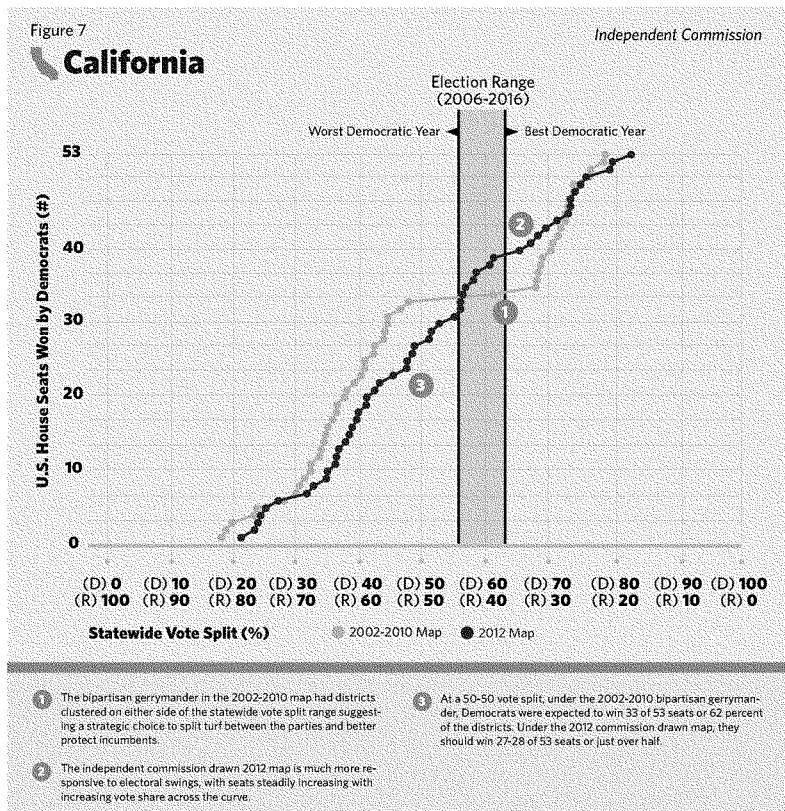

The two congressional maps drawn this decade by independent commissions — in California and Arizona — are considerably more responsive than those drawn under single party control, even in the instance where the commission was forbidden from considering political outcomes.

#### Case Study: California

In 2008, California voters approved Proposition 11, a constitutional amendment that dramatically changed the state's map-drawing process. Instead of the legislature drawing maps, voters created a 14-member independent commission to draw California's districts starting with the 2010 cycle. The result was a much more responsive map.

The chart on the next page (Figure 7) compares California's current congressional plan (in effect 2012 to present) with the plan from the previous decade (used from 2002 to 2010). The 2012 plan (districts plotted in dark blue) was drawn by a citizen commission with support from Republican, Democratic, and independent members. The 2002 plan (plotted in light blue) was an infamous bipartisan gerrymander drawn by the legislature to protect incumbents.<sup>20</sup>

Because the 2002 plan was designed to have safe districts for both parties, almost all districts are clustered at either end of the statewide vote share spectrum — either strongly Democratic (the left-

most 33 districts) or strongly Republican (the right-most 18 districts). This plan is not responsive to changes in voters' preferences. While Democrats are expected to win 33 of the 53 seats with just 47 percent of the statewide vote, they must win 66 percent of the statewide vote to add two seats.

Conversely, under the 2002 plan, Republicans were expected to win 18 seats when they received 34 percent of the statewide vote. But, to add an additional district to that projection, they had to increase the vote share to 40 percent. To get to 20 expected seats, the Republican vote share had to top 53 percent statewide. Under this legislatively drawn plan, only one seat fell within the historic range of statewide election results so that it would be competitive. This district was originally drawn to be a safe Republican seat but unexpectedly changed hands halfway through the decade due to shifting politics. Every other district was safe — a prototypical example of a bipartisan, incumbent-protecting gerrymander. Republicans and Democrats in the legislatures settled on turf and carved up the state accordingly.

This is in sharp contrast to this decade's commission-drawn plan. The districts under the 2012 plan spread evenly from the most Democratic to most Republican. When Democrats win half of the statewide vote, they are projected to win about half of the seats, either 27 or 28 out of 53. Eight districts fall within the range of historic competitive elections. Most notably, an increase in statewide vote share for either party results in a corresponding increase in the number of districts won.

Of course, there are numerous Republican and Democratic seats that are not competitive. These are a function of California's political geography, which includes heavily Republican areas, such as the rural Central Valley, and heavily Democratic areas, such as central Los Angeles and San Francisco. It is virtually impossible to draw competitive districts in these areas without running afoul of other legitimate redistricting criteria. But the map as a whole is responsive to voter preference. This is why the responsiveness analysis, rather than one focusing on competitiveness alone, provides a better gauge of fairness. Under this measure, the independent redistricting commission's map is significantly fairer than the legislatively created effort it replaced.

### Maps Drawn by Courts

Court-drawn maps this decade are markedly more responsive than maps drawn under single-party control. The responsiveness in court-drawn maps exists even in states like New York where a high percentage of the state's Democrats are densely concentrated in New York City.

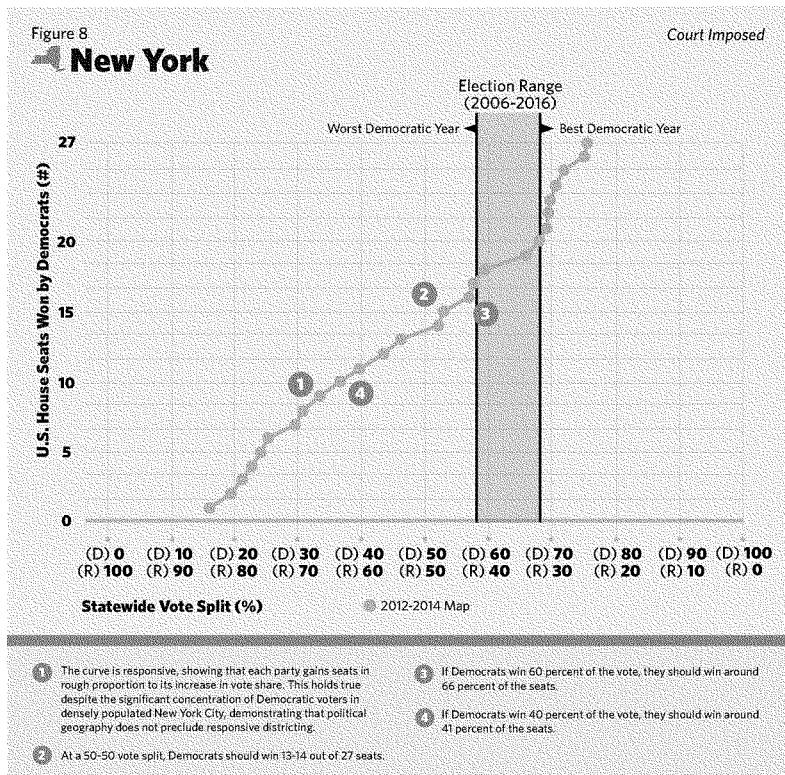

#### Case Study: New York

As a result of reapportionment after the 2010 census, New York lost two congressional seats, reducing its representation in the House from 29 to 27.

In 2012, New York Democrats, who controlled the governor's mansion and state assembly, and Republicans, who controlled the state senate, were unable to agree on a congressional redistricting plan in time. As a result, a federal district court appointed a special master to draw a new map.<sup>21</sup>

The court required that the map produced by the special master comply with "traditional principles" of compactness, contiguity, and respect for political subdivisions and to the extent possible preserve communities of interest.<sup>22</sup> However, the court rejected recommendations of legislative leaders and did not require that the map preserve the cores of existing districts or protect incumbents.<sup>23</sup>

The resulting map — drawn using the relatively strict criteria set by the court — is one of the most responsive of the decade (Figure 8), with Democrats and Republicans each steadily gaining seat share as their vote share increases (and vice versa).

Overall, the responsiveness of the New York map compares favorably to California's commission-drawn map and contradicts the arguments that the large and dense concentration of Democrats in urban centers like New York City (or Philadelphia) makes it difficult to draw balanced maps. New York City is both overwhelmingly Democratic and represents almost half the state's population. Yet the map is highly responsive to electoral swings. New York Republicans may not have much of a chance to win districts in New York City, but there are plenty of other places on the map where they can, and do, compete.

The New York map, indeed, has had a high number of competitive districts in each of the four elections since 2012, including 2018, where more than a quarter of New York congressional races were rated as competitive as of the end of February 2018.<sup>24</sup> Notably, this competitiveness exists despite the fact that 13 of 27 districts retained 70 percent or more of their population from the prior decade's incumbent protection map.<sup>25</sup> It is possible that if more aggressive changes had been made to the 2002 map, the map could have been even more responsive.

### III. HOW TREATMENT OF MINORITY COMMUNITIES AFFECTS RESPONSIVENESS

Congressional maps from Texas, Virginia, and North Carolina offer a vivid illustration of how weakening the political power of minority communities can be a key, and often essential, ingredient in gerrymandering — enabling map-drawers to easily and efficiently entrench an advantage for the political party in control of redistricting.

Conversely, maps drawn to end the adverse treatment of minority communities offer important lessons about how greater minority representation can move hand in hand with creating more responsive maps, even if the latter was not a goal. Maps in Virginia and Texas that unwound the adverse treatment of minority communities not only increased minority electoral opportunities — as expected — but also resulted in maps that are substantially more responsive to electoral swings — a benefit for all voters.

This stands in contrast to the experience of North Carolina, where a court threw out the state's congressional map for racial gerrymandering. Ordered to redraw the map, the state's Republican legislature publicly stated their intent to simply replace the racially gerrymandered map with "a political gerrymander."<sup>26</sup> The result was a map that became only nominally more responsive to electoral swings and, at the same time, essentially locked in the discriminatory effect experienced by African-Americans under the old map.

#### Case Study: Texas

Between 2000 and 2010, Texas grew faster than any state in the country, adding nearly 4.3 million people and gaining four congressional seats as a result.<sup>27</sup> Minorities accounted for the overwhelming share of that population gain — with Latinos and African-Americans collectively making up 89 percent of the growth and Latinos themselves accounting for nearly two-thirds.<sup>28</sup>

In Texas, minority groups challenged the congressional map drawn by the Texas legislature, contending that, despite the rapid growth in Texas' minority populations, the state had failed to create any additional districts where minorities could elect candidates of choice. The groups argued that Texas achieved this result by dividing Latino communities among a large number of districts, often joining urban Latino neighborhoods with larger suburban communities where white voters were an overwhelming majority with distinct, if not conflicting, political interests.<sup>29</sup>

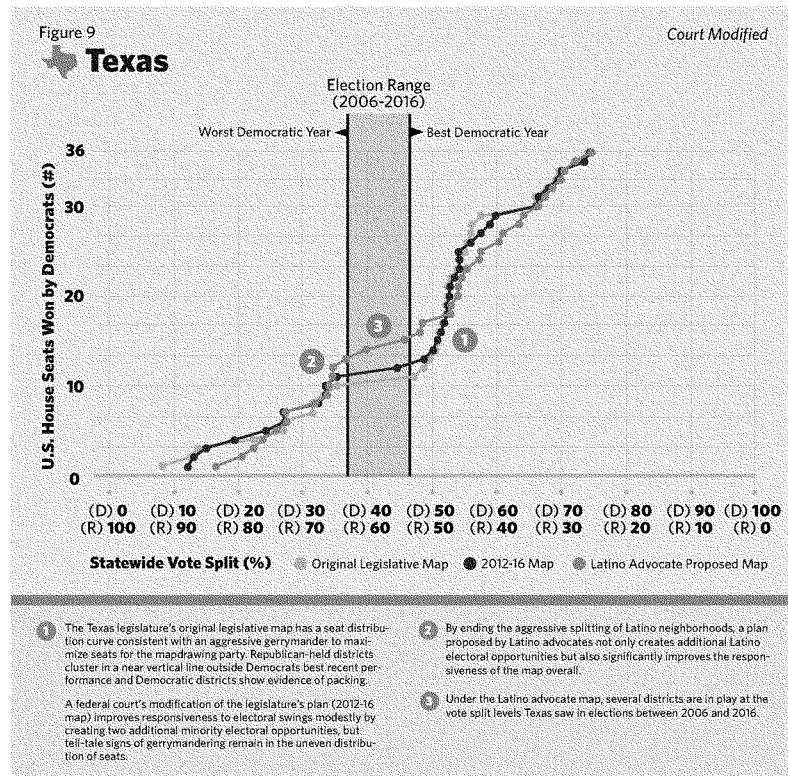

When the legislature adopted the map in 2011, Section 5 of the Voting Rights Act required Texas's plan to win approval from a federal court or the Department of Justice. Because Texas failed to do so in time for the 2012 election, a federal court partially redrew the map to remedy what it considered some of the more blatantly discriminatory features of the map. The most significant change was the creation of a new district in the Dallas-Fort Worth region that partially reunited Latino communities that had been divided among eight districts in the legislature's plan. The court's map also made modifications to a Latino-majority district in West Texas, that Latino groups contend the state had made significantly less likely to elect a Latino-preferred candidate.

Despite these judicially imposed changes, minority groups continued their challenges, contending that the court-drawn map (which the Texas legislature made permanent in 2013) did not go far enough in remedying discrimination against Latinos and African-Americans.

## APPENDIX C

drawn map in creating additional electoral opportunities for Latinos and African-Americans. A plan proposed by Latino plaintiffs, for example, would have more aggressively reunited minority communities in the Dallas-Fort Worth region by adding a Latino majority district and as well as an African-American plurality district to give the region three rather than two minority-controlled seats.<sup>30</sup> The plan also would have unwound the fracturing of minority communities in Houston and in South Texas.

From a responsiveness standpoint (Figure 9), the plan originally adopted by the Texas legislature bears many of the hallmarks of a seat-maximizing gerrymander drawn to favor one party. The map's Republican-controlled districts are won by relatively narrow margins, but nevertheless cluster safely beyond the band representing Democrats' best year in recent history, which was 2008. For Democrats to win more than one-third of seats under the 2011 Texas map, they would need to win close to half the vote.

By contrast, court-ordered modifications to the map — which reunited minority communities in Dallas and Fort Worth and improved the performance of a Latino district in West Texas — produced a map with greater responsiveness despite the fact that the changes were relatively modest.

Had courts (or Texas) been more aggressive in undoing the fragmenting of urban Latinos and the packing of African-Americans, the improvements in responsiveness would have been even greater — coming close to an ideal distribution. Indeed, the Latino plaintiffs' plan, by reuniting minority communities separated in both legislative and court-drawn maps, is highly responsive to electoral swings with the number of seats a party can expect to win being closely correlated to its vote share.

#### Case Study: Virginia and North Carolina

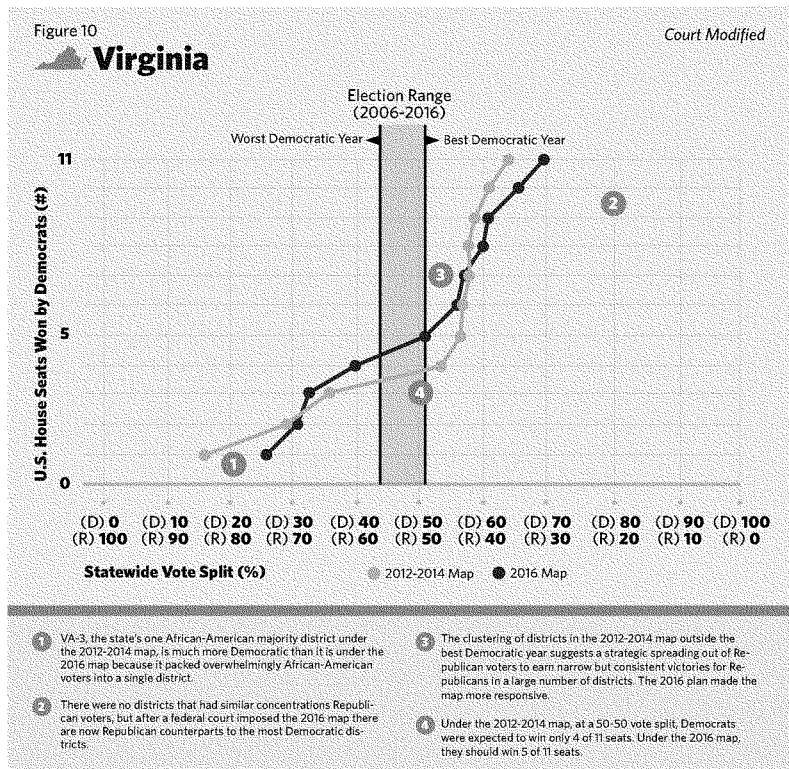

In contrast to Texas, where minorities were disadvantaged primarily through the strategic splitting apart of minority communities, in Virginia and North Carolina, minority voters were disadvantaged by packing them in only a few districts.

In both states, African-American voters challenged the congressional maps as racial gerrymanders, contending that lawmakers joined together disparate communities solely on the basis of race. And in both states, courts struck down the maps and ordered them redrawn for the 2016 election.

The remedial process in the two states diverged, however.

In Virginia, the Republican-controlled legislature and Democratic governor were unable to agree on a new map, and a court-appointed special master re-drew it.<sup>31</sup> The special master's map undid the aggressive packing of African-Americans into a single district — placing African-Americans in central Virginia and African-Americans in coastal tidewater Virginia in separate districts.<sup>32</sup> The result created two electoral opportunities for African-Americans where there had previously been one.

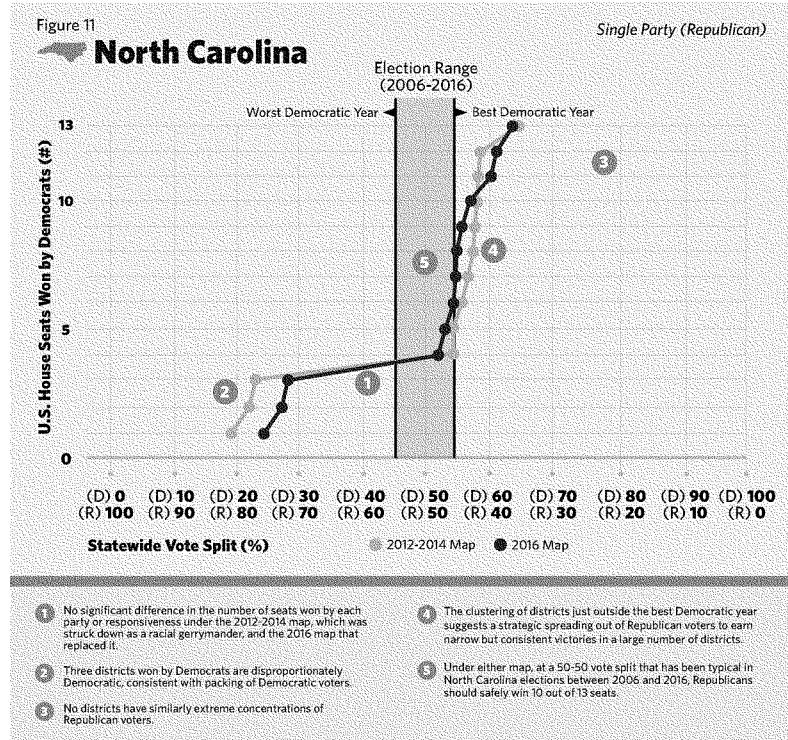

The unpacking of African-Americans in the new map significantly improved electoral responsiveness (Figure 10), giving Democrats a reasonable opportunity to win 5 out of 12 seats. Despite being significantly more responsive than the old map, the new map is not, however, as responsive as maps in California and New York. The continued clustering of a large number of seats outside the zone of competitiveness suggests uncured gerrymandering and that the packing of African-Americans was only one of the techniques used to maximize Republican seat share.

In contrast to Virginia, the North Carolina governor lacks the power to veto a redistricting bill.<sup>35</sup> As a result, when a court struck down the state's 2011 congressional map as a racial gerrymander, the leaders of North Carolina's Republican-controlled legislature announced that they would simply redraw the map as "a political gerrymander."<sup>36</sup> Republican lawmakers, in fact, went so far as to adopt written rules requiring that any map considered by the legislature contain at least 10 safe Republican districts out of 13.<sup>37</sup>

After the legislature passed their "political gerrymander" map in a party-line vote in early 2016, the African-American plaintiffs in the racial gerrymandering case filed objections and asked that the trial court block the new map on the grounds that the legislature had not only failed to adequately undo racial gerrymandering in the old map, it had also created an unconstitutional partisan gerrymander.<sup>38</sup> The trial court, however, allowed the map to go into effect, overruling the racial gerrymandering objections and holding that it did not have sufficient information to decide the partisan gerrymandering claims.<sup>39</sup>

From a responsiveness perspective (Figure 11), there is little difference between the North Carolina congressional map struck down as a racial gerrymander and its replacement.

Under the 2016 map, the two African-American controlled districts became slightly less Democratic as did the state's one non-minority controlled Democratic district — indicating that Democrats had been less ruthlessly packed. However, the new map, like the original, has notable signs of gerrymandering, with a significant number of Republican-won districts clustering just outside the 2006-2016 electoral boundary.

The degree to which both maps entrench Republicans is remarkable. Democrats do not gain a fourth seat until their vote share exceeds 52 percent, something that has happened in only one election out of the last six — the exceptional Obama wave election of 2008. While another wave election like 2008 might result in one or two competitive seats, in every other election of the past decade, Republicans could safely count on winning a 10 to 3 advantage in the state's congressional delegation under both the 2011 and 2016 maps. And, in order for more than two Republican seats to be at risk, an electoral wave unlike anything North Carolina has seen in recent history would be required.

## METHODOLOGY

### A. Data Sources

We obtained district-level election results compiled by Dave Wasserman at Cook Political Report in his National House Popular Vote Trackers.<sup>38</sup>

For districts without both a Democrat and Republican running in the general election, we estimated the vote share both parties would have received in a contested two-party election based on the prior election's House results, the most recent district-level presidential results using totals calculated and compiled by Daily Kos Elections for both 2012 and 2016, and the winning candidate's incumbency status.<sup>39</sup>

### B. Calculations

All calculations were done using two-party vote shares and excluded third-party and independent candidate results.

We assessed responsiveness by conducting a uniform vote swing analysis — making the key assumption that individual district vote shares change in direct proportion with the statewide vote share — to derive the expected seats-to-votes curve for all possible statewide vote shares. Using algebra, we determined how much more or less Democratic each district is than the overall state, and the statewide vote share needed for each district to flip (assuming, for these purposes, that a district flips at 50 percent).

Charting these values gives us the shape of the curve. A maximally responsive map would yield a fairly steady, smooth curve — as Democrats gradually win a larger share of the statewide vote, they should likewise win gradually more seats. We expect gerrymandered curves to appear more piecewise, with large gaps and sudden steep increases where districts are clustered together in the chart. This indicates intentional cracking and packing, and helps visualize how gerrymanders can be designed to avoid responsiveness and entrench power.

### C. Hypothetical Example

To illustrate, consider a hypothetical state with five districts, each with 20 voters.

District	Democratic Votes	Republican Votes	Democratic Vote Share
1	10	10	50%
2	15	5	75%
3	7	13	35%
4	12	8	60%
5	6	14	30%
Total	50	50	50%

Using a uniform vote swing analysis, we assume that the statewide vote changes in direct proportion

with district vote shares. So, in our hypothetical state, an extra 1 percent shift in favor of Democrats would lead to a statewide vote share of 51 percent and district-level vote shares of 51 percent, 76 percent, 36 percent, 61 percent, and 31 percent.

District	Democratic Vote Share	District Difference from Statewide (Statewide – District)	Statewide Vote Share Needed for District to Flip (50% – Difference)
1	50%	EVEN	50%
2	75%	25%	25%
3	35%	-15%	65%
4	60%	10%	40%
5	30%	-20%	70%
<i>Total</i>	50%		

The results in the last column tell us the statewide vote shares at which Democrats should be expected to win individual districts in our hypothetical state. In this case, we expect Democrats to win one district when they win 25 percent of the statewide vote, another when they win 40 percent, a third when they win 50 percent, a fourth when they win 65 percent, and a fifth when they win 70 percent of the overall statewide vote.

#### D. Caveats on Uniform Vote Swing

This study uses a uniform vote swing to examine responsiveness. This assumes that the statewide vote share moves in tandem with the vote share of all individual districts — as one increases, the others increase the same amount as well. This assumption is well-documented and defended in political science to predict broad electoral outcomes, as national factors strongly influence district-level results.<sup>40</sup> In the redistricting field, it is commonly used to test the sensitivity of proposed redistricting plans, and likely by map-drawers and gerrymanderers to assess the outcomes of potential plans.<sup>41</sup>

However, we caution against using the model to predict any individual race, as it does not take into account incumbency, candidate quality, local issues, electoral population shifts, scandals, or any other district-level factors. As a result, some districts — particularly those on the edge of predicted vote shares — are likely to be toss ups, and Democrats are likely to have an easier time winning some than others due to these aforementioned factors. The high number of retirements, in particular, makes it likely that Democrats could win slightly more districts than we predict, as more Democratic challengers will be facing fresh Republican candidates as well. A lack of Republican enthusiasm in a given district could, likewise, impact fundraising, volunteering, and turnout, possibly putting unexpected districts in play. These uncertainties are not reflected in our model, as we approach this issue from the perspective of map-drawers concerned about broad outcomes rather than that of election forecasters.

Finally, a uniform vote swing is less observable in heavily Republican or Democratic districts. A district that votes 95 percent Democratic in a state that is only 50 percent Democratic overall is unlikely to swing completely to 100 percent Democratic if the overall statewide vote share shifts to 55 percent. However, these districts are so far away from both the historical and potential two-party vote share range that the variation in swing for these districts has little to no impact on the model.

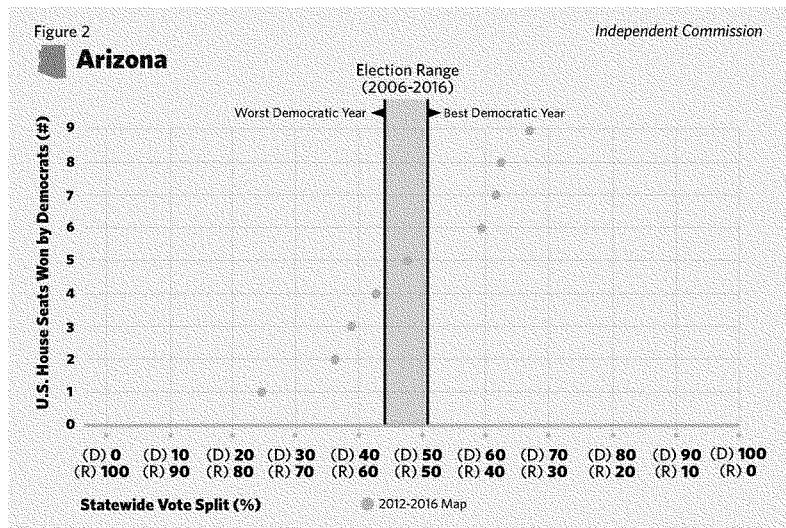

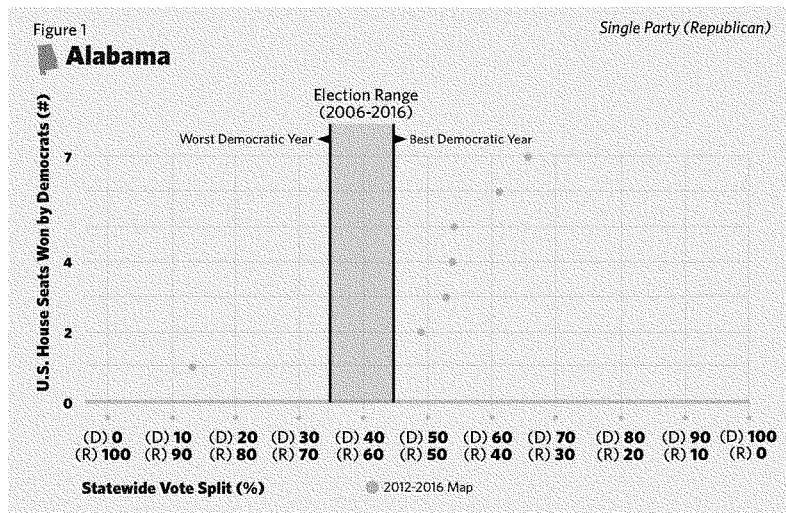

**APPENDIX C****E. Note on Categorization of States**

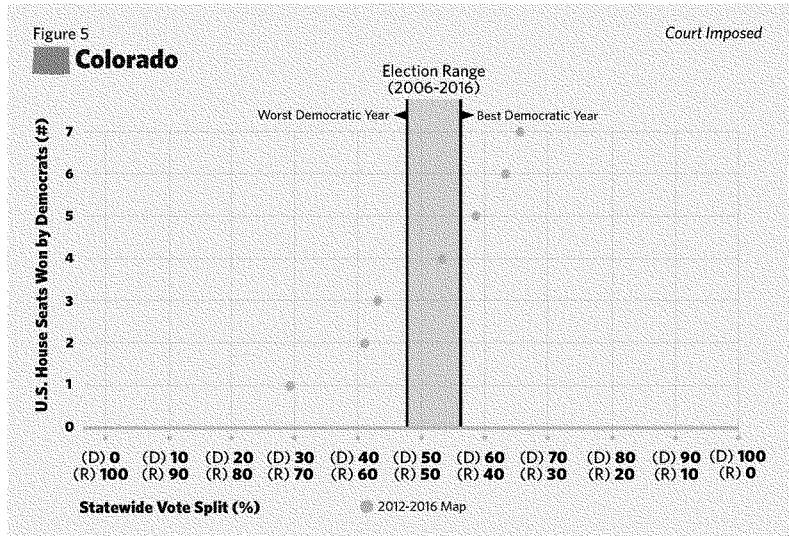

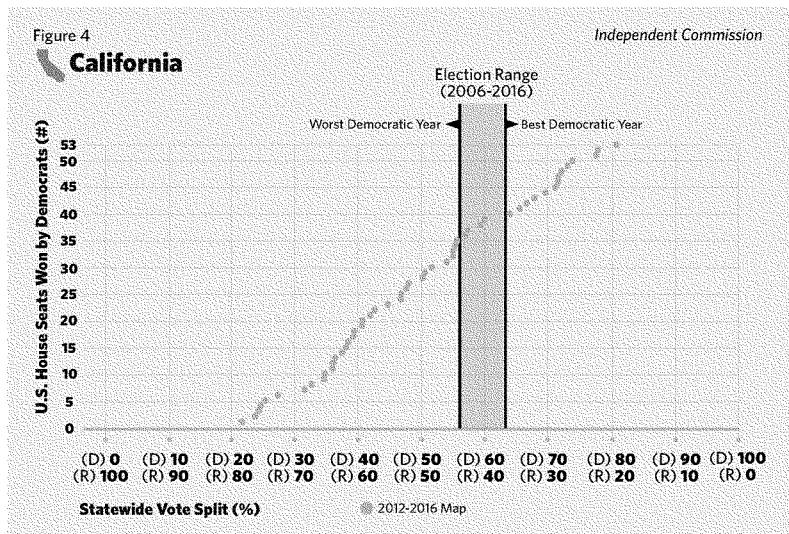

For purposes of this report, we placed states in one of the following categories based on their map-drawing process:

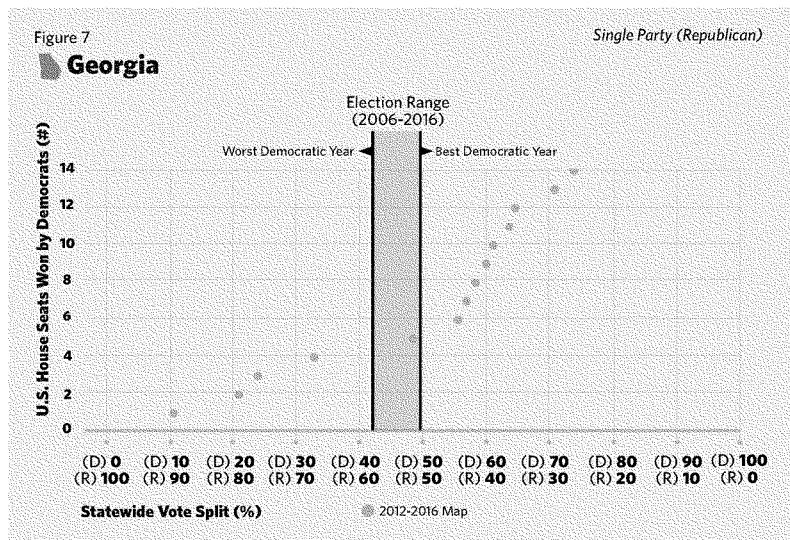

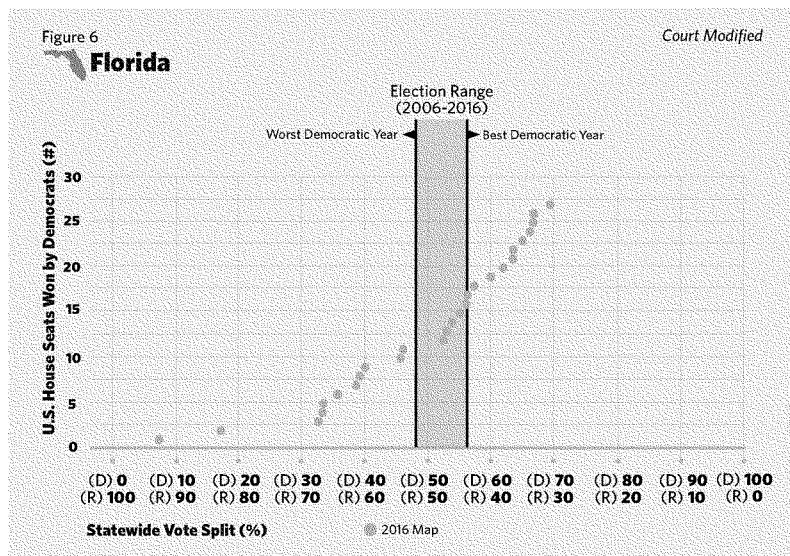

1. States whose maps were drawn under sole **Republican control**. These are mostly states where Republicans controlled both the state legislature and governorship and could pass a redistricting plan without any Democratic votes. States with Democratic governors are also included in this category if the Republican-controlled legislature had a veto-proof majority, as are states with a Republican-controlled legislature where the governor did not have veto power. These states are Alabama, Florida (2012, 2014), Georgia, Indiana, Louisiana, Michigan, North Carolina, Ohio, South Carolina, Tennessee, Virginia (2012, 2014), and Wisconsin. We also analyzed Pennsylvania as a map drawn under Republican control since that map was the one used in the 2012, 2014, and 2016 elections.
2. States whose maps were drawn under sole **Democratic control**. Democrats controlled both the state legislature and governorship and could pass a redistricting plan without any Democratic votes. These states are Illinois, Maryland, and Massachusetts.
3. States whose maps were drawn under **split control**, where the governor and legislatures were not all held by the same party. These states are Kentucky and Missouri.
4. States whose maps were drawn by an **independent commission**. These states are Arizona and California.
5. States whose maps were drawn by a **political appointee commission**. These commissions are separated from independent commissions because of the stronger partisan ties and roles of their members. These states are New Jersey and Washington.
6. States whose maps were **court-imposed**, which typically happens because of a legislative deadlock. This category includes states whose maps were chosen by a court or drawn by a court (or a court-appointed panel or special masters). These states are Colorado, Minnesota, and New York. For purposes of the election scenarios in Appendix 2, we also included Pennsylvania as a court-drawn map since the Pennsylvania Supreme Court has put a new map in place for the 2018 elections to replace the legislatively drawn map that it struck down as a partisan gerrymander.
7. States whose maps were **court-modified**, which typically results from a court decision overturning or changing part of a map but leaving the bulk of the map intact. These states are Florida (2016), Texas (2012, 2014, 2016), and Virginia (2016).

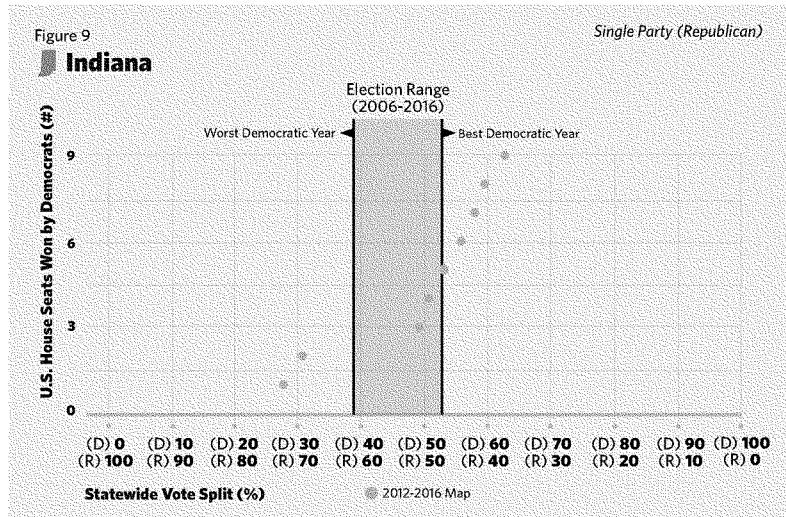

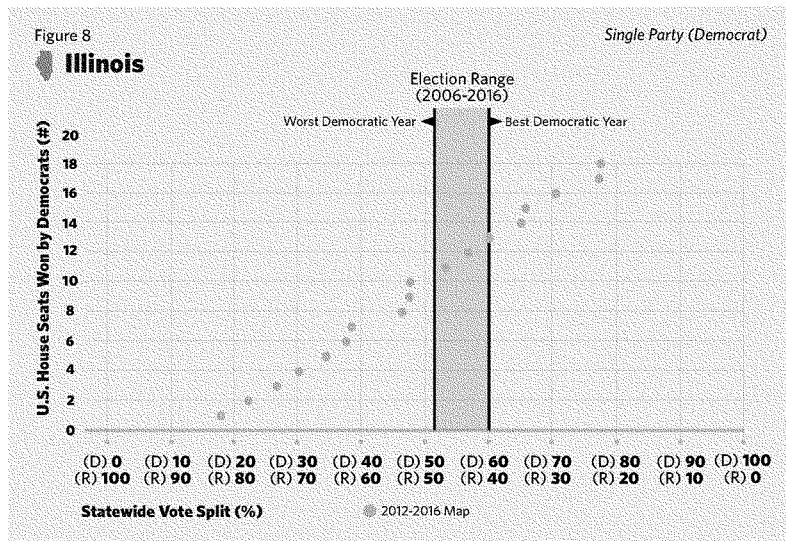

**APPENDIX 1****A State-by-State Look at Electoral Responsiveness****Key to Charts: Democratic Vote Share**

	<b>2006</b>	<b>2008</b>	<b>2010</b>	<b>2012</b>	<b>2014</b>	<b>2016</b>
Alabama	39.95%	44.57%	37.13%	39.45%	34.95%	36.75%
Arizona	48.83%	50.81%	44.15%	45.80%	44.57%	45.98%

## APPENDIX C

## APPENDIX 2

### Seats in Play Under Different 2018 Election Scenarios

#### Four 2018 Election Scenarios

- **Modest Democratic Year.** This scenario assumes that statewide Democratic vote share in 2018 increases by 2 percentage points over 2016.

In some states, like California, 2016 was a strong year for Democrats and a two-point increase in vote share would represent an all-time high for Democrats. In other states, particularly in the Midwest, 2016 was a much weaker Democratic year and a two-point increase would still result in a fairly, and in some cases significantly, Republican-leaning year.

- **Strong Democratic Year.** This scenario assumes that statewide Democratic vote share in 2018 increases by four percentage points over 2016. Although increasing vote share by four points would be difficult in heavily Democratic states, it would be a reasonable reversion to the historic mean in states like Ohio and could be in reach of Democrats in certain other states.
- **Democratic Wave.** This scenario assumes that statewide Democratic vote share in 2018 increases by 7 percentage points over 2016.
- **Democratic Tsunami.** This scenario assumes that statewide Democratic vote share in 2018 increases by 10 percentage points over 2016.

An 11-point win for Democrats in the national popular vote is consistent with:

- a wave election in Alabama, Indiana, Kentucky, Louisiana, Michigan, Minnesota, North Carolina, Ohio, South Carolina, Tennessee, Texas, and Wisconsin,
- a strong to wave election in Arizona, Colorado, Florida, Georgia, Missouri, New York, Pennsylvania, Virginia, and Washington,
- a strong election in Maryland, Massachusetts, and New Jersey, and
- a modest to strong election in California and Illinois.

If states' 2018 elections align with these election scenarios, around 28.5 seats not currently held by Democrats are projected to be in play in these states in this year's mid-terms in an 11-point national win scenario.

For purposes of this appendix, we included a seat as being in play if it is not currently held by Democrats and is located on the seats to votes curve for that state no more than one percentage point higher than the projected statewide vote under a scenario. For example, if the statewide vote share under the Strong Democratic Gain scenario is 52.48 percent, we counted a seat located on the curve at 52.98 percent as being in play. Statewide vote share figures represent Democrats' share of the two-party congressional vote.

## APPENDIX C

**Single Party (Republican)**

State* Democratic Share of Vote in 2016	Congressional Seats and Split After 2016 Election	Modest Democratic Year Seats in Play if Ds Increase Vote by 2 points	Strong Democratic Year Seats in Play if Ds Increase Vote by 4 points	Democratic Wave — Seats in Play if Ds Increase Vote by 7 points	Democratic Tsunami Seats in Play if Ds Increase Vote by 10 points

\* We include Pennsylvania in this appendix as a court-imposed map because its 2011 congressional map, drawn under sole Republican control, has since been invalidated by the Pennsylvania Supreme Court and replaced by a map drawn by the court that substantially reconfigures most of the districts in the 2011 map.

## ENDNOTES

Abramowitz, "Generic Ballot Model Gives Democrats Early Advantage in Battle for Control of the House," *Larry Sabato's Crystal Ball*, July 6, 2017, <http://www.centerforpolitics.org/crystalball/articles/generic-ballot-model-gives-democrats-early-advantage-in-battle-for-control-of-house/>.
- 3 For purposes of our analysis, we count MI-13 as a Democratic district even though it is currently vacant due to the resignation of Rep. John Conyers. Because the district is heavily Democratic, we assume that it will continue to be held by Democrats. We similarly treat AZ-8 and OH-12 as Republican districts despite vacancies on the assumption that Republicans win special elections in April and August respectively. We also do not factor in the Democratic special election win in PA-18 since the November elections will take place using a wholly different map. See endnote 4.
- 4 The Pennsylvania Supreme Court struck down the state's 2011 congressional map as a partisan gerrymander on January 22, 2018 and ordered the map redrawn. When the legislature and governor could not agree on a new plan, the court adopted its own replacement plan and ordered it to be used for the 2018 election.

- 9 The correlation between statewide and district specific vote share becomes less constant in districts that overwhelmingly favor one party or the other. But since those districts are unlikely to "flip" even in a tsunami-like wave election, we are less concerned with them. For example, in NY-15, Democrats have won between 93.8 and 96.7 percent of the presidential vote in recent years. Imagining a scenario where Republicans win the district at a congressional level is virtually impossible or at least would require imagining a very different kind of political universe.

### **About the Brennan Center for Justice**

The Brennan Center for Justice at NYU School of Law is a nonpartisan law and policy institute that works to reform, revitalize — and when necessary defend — our country's systems of democracy and justice. At this critical moment, the Brennan Center is dedicated to protecting the rule of law and the values of constitutional democracy. We focus on voting rights, campaign finance reform, ending mass incarceration, and preserving our liberties while also maintaining our national security. Part think tank, part advocacy group, part cutting-edge communications hub, we start with rigorous research. We craft innovative policies. And we fight for them — in Congress and the states, in the courts, and in the court of public opinion.

### **About the Brennan Center's Democracy Program**

The Brennan Center's Democracy Program works to repair the broken systems of American democracy. We encourage broad citizen participation by promoting voting and campaign finance reform. We work to secure fair courts and to advance a First Amendment jurisprudence that puts the rights of citizens — not special interests — at the center of our democracy. We collaborate with grassroots groups, advocacy organizations, and government officials to eliminate the obstacles to an effective democracy.

### **About the Brennan Center's Publications**

**Red cover** | Research reports offer in-depth empirical findings.

**Blue cover** | Policy proposals offer innovative, concrete reform solutions.

**White cover** | White papers offer a compelling analysis of a pressing legal or policy issue.

The authors would like to thank the numerous Brennan Center colleagues without whose help the publication of this report would not have been possible. Brennan Center President Michael Waldman and Democracy Program Director Wendy Weiser provided valuable strategic and drafting guidance for this report. Research and Program Associate Phoenix Rice-Johnson made substantial research contributions throughout the project. Isabella Aguilar, Jaya Aiyer, Faith Barksdale, Max Feldman, Sean Morales-Doyle, Michael Pelle, Wendy Serra, Ani Torossian, and Makeda Yohannes also provided valuable research and editing assistance. The editorial and design assistance of Yuliya Bas, Lisa Benenson, Stephen Fee, Theresa Raffaele Jefferson, Jim Lyons, Zachary Roth, and Jennifer Woodhouse allowed this report to reach publication.

The authors are grateful to Dr. Terry-Ann Craigie for her peer-review of the econometrics presented in this report.

The authors sincerely appreciate the assistance and cooperation of the election officials and advocates who took time out of their busy schedules and allowed themselves to be interviewed for this report, and the Brennan Center gratefully extends our thanks to them for doing so.

### About the Authors

**Jonathan Brater** is counsel for the Democracy Program at the Brennan Center, focusing on voting rights and elections. In this capacity, he has worked on litigation to block enforcement of restrictive voting laws and policies in state and federal court. An expert on voter registration law and policy, he has drafted legislation and published analysis on automatic voter registration and has testified before state and national bodies including the Presidential Commission on Election Administration. His work focuses on registration list maintenance and the prevention of harmful voter purges. His work also includes extensive analysis of state legislation affecting voting access. He graduated *cum laude* from Michigan Law School, where he served as Executive Editor of the *Michigan Law Review*. He received a bachelor's degree from Columbia. Prior to law school, he was a legislative analyst for the House Committee on Energy and Commerce.

**Kevin Morris** is a quantitative researcher with the Democracy Program, focusing on voting rights and elections. His research focuses on the impact of laws and policies on access to the polls, with a particular focus on rights restoration and voter list maintenance. Prior to joining the Brennan Center, he worked as an economic researcher focusing on housing at the Federal Reserve Bank of New York and an economist at the Port Authority of New York and New Jersey. He received a bachelor's degree from Boston College and is currently pursuing a master's degree in Urban Planning at NYU's Wagner School, with an emphasis in Quantitative Methods and Evaluation.

**Myrna Pérez** is deputy director of the Democracy Program, where she leads the Voting Rights and Elections project. She has authored several nationally recognized reports and articles related to voting rights. Prior to joining the Brennan Center, she was the civil rights fellow at Relman & Dane. She graduated from Columbia Law School, where she was a Lowenstein public interest fellow. Following law school, she clerked for Judge Anita B. Brody of the U.S. District Court for the Eastern District of Pennsylvania and for Judge Julio M. Fuentes of the U.S. Court of Appeals for the Third Circuit. Her undergraduate degree is from Yale University, and she received a master's degree in Public Policy from Harvard University's Kennedy School of Government, where she was the recipient of the Robert F. Kennedy Award for Excellence in Public Service. She is currently an adjunct professor at Columbia Law School.

**Christopher Deluzio** is counsel for the Democracy Program, where he focuses on voting rights and elections. Prior to joining the Brennan Center, he was a litigation associate in private practice with Wachtell, Lipton, Rosen & Katz. He served as a law clerk to Judge Richard J. Sullivan of the U.S. District Court for the Southern District of New York. He graduated *magna cum laude* from Georgetown Law, where he was elected to the Order of the Coif, served as an executive articles editor of the *Georgetown Law Journal*, and was selected as the top oralist in the Robert J. Beaudry Moot Court Competition and the Thurgood A. Marshall Memorial Moot Court Competition. He received a bachelor's degree from the U.S. Naval Academy and, following graduation, served as an active-duty naval officer.

## Introduction

**O**n April 19, 2016, thousands of eligible Brooklyn voters dutifully showed up to cast their ballots in the presidential primary, only to find their names missing from the voter lists. An investigation by the New York state attorney general found that New York City's Board of Elections had improperly deleted more than 200,000 names from the voter rolls.

In June 2016, the Arkansas secretary of state provided a list to the state's 75 county clerks suggesting that more than 7,700 names be removed from the rolls because of supposed felony convictions. That roster was highly inaccurate; it included people who had never been convicted of a felony, as well as persons with past convictions whose voting rights had been restored.

And in Virginia in 2013, nearly 39,000 voters were removed from the rolls when the state relied on a faulty database to delete voters who allegedly had moved out of the commonwealth. Error rates in some counties ran as high as 17 percent.

These voters were victims of purges — the sometimes-flawed process by which election officials attempt to remove ineligible names from voter registration lists. When done correctly, purges ensure the voter rolls are accurate and up-to-date. When done incorrectly, purges disenfranchise legitimate voters (often when it is too close to an election to rectify the mistake), causing confusion and delay at the polls.

Ahead of upcoming midterm elections, a new Brennan Center investigation has examined data for more than 6,600 jurisdictions that report purge rates to the Election Assistance Commission and calculated purge rates for 49 states.<sup>1</sup>

We found that between 2014 and 2016, states removed almost 16 million voters from the rolls, and every state in the country can and should do more to protect voters from improper purges.<sup>2</sup>

Almost 4 million more names were purged from the rolls between 2014 and 2016 than between 2006 and 2008.<sup>3</sup> This growth in the number of removed voters represented an increase of 33 percent — far outstripping growth in both total registered voters (18 percent) and total population (6 percent).

Most disturbingly, our research suggests great cause for concern that the Supreme Court's 2013 decision in *Shelby*

*County v. Holder* (which ended federal "preclearance," a Voting Rights Act provision that was enacted to apply extra scrutiny to jurisdictions with a history of racial discrimination) has had a profound and negative impact:

For the two election cycles between 2012 and 2016, jurisdictions no longer subject to federal preclearance had purge rates significantly higher than jurisdictions that did not have it in 2013. The Brennan Center calculates that *2 million fewer voters* would have been purged over those four years if jurisdictions previously subject to federal preclearance had purged at the same rate as those jurisdictions not subject to that provision in 2013.<sup>4</sup>

In Texas, for example, one of the states previously subject to federal preclearance, approximately 363,000 more voters were erased from the rolls in the first election cycle after *Shelby County* than in the comparable midterm election cycle immediately preceding it.<sup>5</sup> And Georgia purged twice as many voters — 1.5 million — between the 2012 and 2016 elections as it did between 2008 and 2012.

Meanwhile, the Justice Department has abdicated its assigned role in preventing overly aggressive purges. In fact, the Justice Department has sent letters to election officials inquiring about their purging practices — a move seen by many as laying the groundwork for claims that some jurisdictions are not sufficiently aggressive in clearing names off the rolls.

This new report follows an extensive analysis of this issue in a 2008 Brennan Center report entitled *Voter Purges*.<sup>6</sup> In that report, we uncovered evidence that election administrators were purging people based on error-ridden practices, that voters were purged secretly and without notice, and that there were limited protections against purges. In this year's report, we discovered that little about purge practices has improved and that a number of things have, in fact, gotten worse.

This study also found:

- In the past five years, four states have engaged in illegal purges, and another four states have implemented unlawful purge rules. Federal standards for purges were set in the 1993 National Voter Registration Act (NVRA). Since 2013, Florida, New York, North Carolina, and Virginia have conducted illegal purges. Moreover, Brennan Center research has uncovered that four states (Alabama, Arizona, Indiana, and Maine) have written policies that by their terms violate the NVRA and provide for illegal purges. Alabama, Indiana, and Maine have policies for using data from a database called the Interstate Voter

Registration Crosscheck Program (Crosscheck) to immediately purge voters without providing the notice and waiting period required by federal law (Indiana's practice has been put on hold by a federal court). Arizona regulations permit Crosscheck purges during the 90 days prior to an election, a period during which federal law prohibits large-scale purges. These eight states are home to more than a quarter of registered voters across the nation.

- **States use inaccurate information.** Although states have improved the way in which they use data to purge the voter rolls in some respects, several jurisdictions rely on faulty data to flag potentially ineligible voters. And some of the new sources of information that have come into widespread use since our 2008 report, such as Crosscheck, are especially problematic.

- **A new coterie of activist groups is pressing for aggressive purges.**

Most purging litigation brought by private litigants before 2008 contended that voter removal efforts were overly aggressive. Today, a different group of plaintiffs is hauling election officials into court, claiming that purging practices in their jurisdictions are not sufficiently zealous.

This report makes the following recommendations:

- **Enforce the NVRA's protections.**

The NVRA, one of the major federal laws governing how states and localities can conduct purges, permits voters and civic groups to sue election officials if they violate the law's provisions. Monitoring jurisdictions to ensure they are complying with the NVRA — and bringing litigation when necessary — is especially important in an era when election officials are under pressure to mount aggressive purges.

- **States should set purging standards that provide even more protections than the NVRA.**

The NVRA sets out federal standards for purges and requires that voters removed from the rolls for certain reasons be given notification. But these are minimum guidelines. States can and should do more to protect against disenfranchisement caused by improper purges — for example, providing public and individual notice before purging names from the rolls.

- **Pass automatic voter registration.**

Automatic voter registration is a popular reform that minimizes registration errors and allows for easy updates, making rolls more accurate and current.

## Methodology

We analyzed purge statutes, regulations, and other guidance in 49 states.<sup>7</sup> We interviewed 21 state or local election administrators in 18 states and reviewed documents from 20 states in response to public records requests.<sup>8</sup>

We also calculated state and county purge rates using voter registration data from the Election Administration and Voting Survey (EAVS), which is administered biennially by the U.S. Election Assistance Commission.<sup>9</sup> Our analysis used EAVS data from the 2008, 2010, 2012, 2014, and 2016 reports. In each two-year period, we calculated a jurisdiction's voter removal rate by dividing the number of *removed voters* by the sum of *registered voters* (i.e., both active and inactive registered voters) and *removed voters*.<sup>10</sup>

## The 2018 Purge Landscape

Between the 2014 and 2016 elections, roughly 16 million names nationwide were removed from voter rolls.<sup>11</sup> The federal law governing purges<sup>12</sup> allows a voter's name to be purged from the voter rolls on the following grounds: (1) disenfranchising criminal conviction; (2) mental incapacity; (3) death; and (4) change in residence. In addition to these criteria, individuals who were never eligible in the first place, such as someone under 18 or a noncitizen, may be removed. Voters may be removed at their own request (even if they remain eligible). While all 49 states with voter registration lists have affirmative policies to remove names from the rolls (typically for several or all of the four delineated categories), states vary in the manner in and frequency with which they conduct voter purges.<sup>13</sup>

### ▪ Disenfranchising Conviction

Except in Maine and Vermont, states disenfranchise at least some voters convicted of a crime for some period of time, which means that there are states that purge voters because of a criminal conviction. States have different policies about what causes a voter to become ineligible and different procedures for removing those who have been disenfranchised.<sup>14</sup> They also draw upon different lists to identify individuals with felony convictions, which may in turn be maintained with different levels of regularity and precision by courts or law-enforcement officials at the state or federal levels.

### ▪ Mental Incapacity

Though less ubiquitous than some other bases of removal, 28 states have specific rules requiring removal from the rolls of a person determined not to have mental capacity to vote.<sup>15</sup> Definitions vary, and reform attempts have had

**APPENDIX C**

some success limiting the instances in which those with alleged mental incapacity lose their right to vote.<sup>16</sup>

**\* Death**

Federal law mandates that states take steps to remove the deceased from the rolls. Yet there is no uniform standard among the various state laws detailing the sources of information to be consulted to determine which voters are deceased. Some jurisdictions use information from state agencies, some review obituaries, and some rely on the Social Security Administration's Death Master File.<sup>17</sup>

**\* Residency Changes**

States vary in how they perform list maintenance for changes of address. Some of that variation is in timing. Montana, for example, conducts address removals every odd-numbered year,<sup>18</sup> and Connecticut conducts address removals annually.<sup>19</sup> There is also variation in which source of information is used. Two common sources are drivers' license updates and the postal service's National Change of Address (NCOA) database, but states also utilize other sources, such as interstate databases, returned mailings, or voter inactivity.

**\* Noncitizenship**

While election officials generally remove names of persons when it is made known to them that a noncitizen has gotten on the rolls, at least six states also have laws that require state officials to use jury declinations, drivers' license information, and/or federal databases to actively identify noncitizens on the voter rolls, to remove names of noncitizens so identified, or both.<sup>20</sup>

## CURRENT FINDINGS

### Purge Rates Are Higher Than a Decade Ago

In the two-year period ending in 2008, the median jurisdiction purged 6.2 percent of its voters.<sup>21</sup> At one end of the spectrum in 2008, Salt Lake County, Utah, purged less than 0.1 percent of its voters, and at the other end of the spectrum, Milwaukee County, Wisconsin, purged more than 34 percent of its voters. Of the 2,534 counties that reported purge rates to the Election Assistance Commission in 2008, only 97 had purged more than 15 percent of its registered voters in a two-year period.

Between the federal elections of 2014 and 2016, almost 4 million more names were purged from the rolls than in 2006-08. In this same period, more than twice the number of counties — 205 — had purged more than 15 percent of their voters than between 2006 and 2008.

Although a higher removal rate is not inherently bad, more purging means increased potential for eligible voters

to be removed, especially given that we identified no state with the desired level of voter protections against purges.

### Purge Rates Increased More in Jurisdictions Previously Subject to Federal Preclearance

Prior to 2013, the Voting Rights Act required certain jurisdictions with a history of discriminatory election practices to obtain federal certification that any intended election change, including voter purge practices, would not harm minority voters and was not enacted with discriminatory intent. This monitoring process was known as "preclearance."<sup>22</sup> In 2013, however, the Supreme Court concluded in *Shelby County v. Holder*<sup>23</sup> that Congress had inappropriately determined which jurisdictions should be subject to preclearance. As a result, jurisdictions subject to (or "covered" by) preclearance requirements were freed from making the case that minority voters would not be harmed by a proposed election change.

Across the board, formerly covered jurisdictions increased their purge rates after 2012 more than noncovered jurisdictions. Before *Shelby County*, jurisdictions that were subject to preclearance requirements ("covered jurisdictions") had removal rates equal to other jurisdictions ("noncovered jurisdictions").<sup>24</sup> After 2013, the two groups

### FALLOUT FROM SHELBY COUNTY

Increases in purge rates in previously covered jurisdictions weren't the only changes after *Shelby County*.<sup>1</sup> Following the decision, many states and jurisdictions proceeded to enact or implement laws that would have been subject to preclearance. In fact, states formerly under preclearance requirements were more likely to pass legislation restricting their voting and election practices than the nation as a whole. Of the nine states once fully covered by the Voting Rights Act, seven have passed restrictive legislation since 2010. Of the 41 states not fully covered, only 18 passed restrictive laws over the same period. Two of these states (Florida and North Carolina) each had several counties subject to the Voting Rights Act.<sup>2</sup>

<sup>1</sup> *Shelby County v. Holder*, 570 U.S. 2 (2013).

<sup>2</sup> See Brennan Center for Justice, *New Voting Restrictions in America*, May 2017, [https://www.brennancenter.org/sites/default/files/analysis/New\\_Voting\\_Restrictions.pdf](https://www.brennancenter.org/sites/default/files/analysis/New_Voting_Restrictions.pdf). We include in this count legislation that was enacted and subsequently struck down by courts. See, e.g., *Applewhite v. Pennsylvania*, No. 330 M.D. 2012, 2014 WL 184988 (Pa. Commw. Ct. Jan. 17, 2014) (striking down Pennsylvania voter ID law).

sharply diverged. For the 2012-14 and 2014-16 two-year election cycles, the removal rate for noncovered jurisdictions did not budge. The story was entirely different for covered jurisdictions, whose median removal rate was 2 percentage points higher after the *Shelby County* decision than the noncovered jurisdictions.<sup>23</sup> Though 2 percentage points may seem like a small number, more than 2 million fewer voters would have been removed if these counties had removal rates comparable to the rest of the country. Previously covered jurisdictions ended up removing more than 9 million voters between the presidential elections of 2012 and 2016. These increases were not concentrated in just a few small counties: 67 percent of residents in previously covered jurisdictions lived in areas where the removal rate increased, compared to just 46 percent of residents in non-covered jurisdictions. These calculations are restricted to jurisdictions that reported their data each year, but there is evidence that the same trend happened in counties that did not report each year, as our Texas analysis below shows.

The increase in removal rates in counties previously covered by the preclearance provision is not attributable to geographical or partisan factors (see footnote 25 for more information). We also conducted a difference-in-differences regression analysis<sup>26</sup> to see if population, minority presence, income, or other factors could explain the increase in removal rates in these counties. Even after controlling for these factors, a jurisdiction's former status under the Voting Rights Act was strongly associated with higher voter removal rates. Although this effect was larger in the two-year period coinciding with the lifting of the preclearance requirement, it continued even into the two-year period ending with the presidential election of 2016.

To be absolutely clear, our analysis cannot establish what percentage, if any, of these post-*Shelby County* purges were done erroneously. What we do know is that provisional ballots, which are given to voters who are missing from the voter rolls, had a statistically significant relationship to purge rates in previously covered jurisdictions.<sup>27</sup> This means that as the purge rates increased, so did the number of people who showed up to vote but were unable to do so, either because their names were not on the rolls or for some other reason.

Another factor is that between the presidential elections of 2012 and 2016, a handful of states implemented strict voter ID laws that required voters to cast provisional ballots if they did not have one of the limited number of accepted identifications. The implementation of these laws could, of course, have led to an increase in provisional ballot rates. (To isolate the impact of increased purge rates on provisional ballot rates, we performed a regression

analysis in which we controlled for the implementation of strict voter ID laws and other sociodemographic factors. The regression specification and a closer look at a few counties with big increases in purge rates and provisional ballots can be found in Appendix C.)

The changes were particularly notable in three states: Georgia, Texas, and Virginia.

In **Georgia**, 750,000 more names were purged between 2012 and 2016 than between 2008 and 2012. Although Georgia did not report provisional ballot rates in 2012, their provisional ballot rates in the federal elections of 2010 and 2014 correspondingly increased as the removal rates increased. Of the state's 159 counties, 156 reported increases in removal rates post-*Shelby County*. This included the state's 86 most populous counties. The increased purge rate occurred during a period when Georgia was criticized for several controversial voter registration practices. For example, Georgia was sued for blocking registration applications between 2013 and 2016 because information (including hyphens in names) did not match state databases precisely. Georgia agreed to cease the matching rule as a result of the lawsuit but then enacted legislation reinstating a very similar practice the next year.<sup>28</sup>

**Texas** did not report removal rates for the two years ending in 2012 and is thus excluded from our high-level analysis of the previously covered jurisdictions. Nonetheless, the state exhibited a substantial increase in removal rates when we compare the two-year periods ending with the federal elections of 2010 and 2014. Between 2012 and 2014, approximately 363,000 more voters were removed than in 2008-10.<sup>29</sup> Unsurprisingly, the provisional ballot rate also increased between the midterm elections of 2010 and 2014. Consistent with the broader trend, these increases were not driven only by small counties: Fourteen of the 20 most populous counties increased their removal rates. Of the 183 Texas counties that reported their removal rates in both periods, 121 saw an increase after the *Shelby County* decision. Among the Texas counties that consistently reported their data and increased their removal rate after the *Shelby County* decision, the median increase was 3.5 percent. This increased purge rate did not occur in isolation but was joined by restrictive voting legislation. In 2014, a federal district court ruled that the strict photo ID law that Texas passed in 2011 was motivated in part by a discriminatory purpose of reducing minority political participation.<sup>30</sup> The Court of Appeals of the 5th Circuit did not decide whether the law was motivated by discriminatory animus but did conclude it had a discriminatory effect.<sup>31</sup> In 2017, Texas passed a new voter ID law. Litigation regarding the new law is ongoing.

In **Virginia**, previously covered counties removed 379,019 more voters between 2012 and 2016 than between 2008 and 2012. Once again, the increase in purge rates in these counties was not driven by small counties purging more voters. All the previously covered counties except one increased removal rates after *Shelby County*. The one previously covered county that showed a decrease — Highland County — is the least populous county in the state, home to just 2,230 people. More than 99 percent of Virginia's voters live in counties that increased their removal rates after *Shelby County*. As later discussed in more detail, a contributing factor may have been a highly problematic purge process that Virginia mounted in 2013.

#### States Continue to Conduct Flawed Purges

Broadly speaking, purges go wrong for one of two basic reasons: bad information about who should be removed from the rolls or a bad method for removing them. There are tools to catch and correct these mistakes, some of which are legally mandated. For example, federal law sets forth some important and relevant safeguards, such as requiring that systematic purges — those in which voter rolls are compared with lists of potentially ineligible individuals to remove groups of voters at the same time — occur well in advance of an election. Another is making sure certain categories of voters get a notice and waiting period before removal.<sup>32</sup> Yet as both a legal and practical matter, many states lack sufficient safeguards to detect and correct problems so that any harm can be repaired in advance of an election.

Two states' recent experiences illustrate the basic reasons purges go wrong — Arkansas used bad information, while Texas used a bad method.

In June 2016, the Arkansas secretary of state sent county officials a list of more than 7,700 records from the Arkansas Crime Information Center (ACIC) of persons who were supposedly ineligible to vote and should be removed from the rolls.<sup>33</sup> (Those convicted of felonies in Arkansas lose their right to vote until their sentence is complete or they are pardoned.<sup>34</sup>) But the list included a high percentage of voters who were indeed eligible,<sup>35</sup> yet appeared on the list because they had had some involvement with the court system, such as a misdemeanor conviction or a divorce.<sup>36</sup> Also included were names of those whose voting rights had been restored.<sup>37</sup> The error became public in July 2016, and despite the public outcry, the records of fewer than 5,000 of the more than 7,700 erroneously listed voters had been corrected by September 2016.<sup>38</sup> Pulaski County, the largest county in the state, explained that the problem was flagged by the counties, not the state, and not all counties were able to correct errors.

Previously, the secretary of state had not been providing counties with regular updates of conviction data and, in the past, had been using the wrong source list for data on felony convictions. Once Arkansas switched to the list required by law, the secretary did an overly broad match and provided counties with inflated lists with bad matches. Pulaski County flagged the errors and was able to investigate the list, but some counties with insufficient resources simply sent purge notices to everyone on the list.<sup>39</sup>

Texas is an example of a bad purge caused by flawed data matching. In 2012, Texas officials conducted a purge of voters presumed to be dead. According to a representative from the Texas secretary of state's office, the purge was driven by a comparison of Texas voters' information to the Social Security Administration's Death Master File — the first time Texas had conducted such an exercise.<sup>40</sup> Matching to the Death Master File was required under a then-new Texas law (H.B. 174) mandating election officials to obtain such information about potentially deceased voters quarterly.<sup>41</sup>

While the 2008 Brennan Center report on voter purges showed that the Death Master File can contain errors,<sup>42</sup> the problem in Texas occurred because the state used what are called "weak" matches (meaning that the chances that the person identified was actually deceased were too low to be trusted) to target voters without conducting any further investigation.<sup>43</sup> For example, a voter whose date of birth and last four digits of their Social Security number matches a dead person's record would be a "weak" match.<sup>44</sup> On these grounds, a living Texas voter (and Air Force veteran) named James Harris, Jr., was flagged for removal because he shared information with an Arkansan, "James Harris," who had died in 1996.<sup>45</sup> According to one analysis, more than 68,000 of the 80,000 voters identified as possibly dead were weak matches.<sup>46</sup> This policy of flagging voters based on a weak match without further investigation was eventually changed when Texas settled litigation that had arisen on account of the bad purge.<sup>47</sup>

States south of the Mason-Dixon Line do not have a monopoly on bad purges. Before the April 2016 primary election, the New York City Board of Elections purged more than 200,000 voters, the majority of whom lived in Brooklyn. In 2014 and 2015, the Brooklyn Borough Office of the Board of Elections targeted for removal people who had not voted since the 2008 election.<sup>48</sup> New York City officials complied with the portion of federal law requiring them to send notice to affected voters but not with the part that required them to wait two federal elections before purging those who did not respond. Instead, the Board of Elections gave voters 14 days to respond, then

purged voters immediately. In the end, nearly 118,000 registrations were canceled when voters did not respond to these notices.<sup>59</sup> And through another process, an additional 100,000 voters were removed (also without the required waiting period) because New York City Board of Elections officials believed they had moved.<sup>60</sup> On Election Day, thousands of voters showed up at the polls only to learn their registrations had been erased. Moreover, these problems were not evenly distributed. One report found that 14 percent of voters in Hispanic-majority election districts were purged compared to 9 percent of voters in other districts.<sup>61</sup>

#### Federal Role in Voter Protection Diminished

The increased purge rates are a cause for concern because there are fewer federal protections against improper purges. The *Shelby County* decision has halted the preclearance provision, which had previously blocked election changes in certain jurisdictions unless it could be shown that the change would not make minority voters worse off and was not enacted with discriminatory intent.

And at least for now, voters have lost another important protector against improper purges: the Justice Department. Since 1993, the Justice Department has been charged with enforcing the National Voter Registration Act, the primary source of federal protection against inaccurate or overly broad purges.<sup>62</sup> While the Justice Department's purge history is mixed,<sup>63</sup> it brought voter NVRA lawsuits during the Obama administration. Enforcement actions for violating the NVRA were undertaken against at least six states. In Florida and New York, the DOJ successfully challenged state purge practices.<sup>64</sup> In Florida, the Justice Department joined civic groups who successfully challenged the state's practice of conducting systematic purges just 90 days before an election.<sup>65</sup>

But the Trump administration has reversed course. For instance, in *Husted v. A. Philip Randolph Institute*, the Obama administration filed a brief in support of plaintiffs challenging an Ohio purging practice in which individuals who failed to vote in a single election received purge notices and were ultimately purged if they did not respond and did not vote in the next two federal elections. Failure to vote in a single election is poor evidence of ineligibility because not voting is common; for example, in the last midterm election, nearly 60 percent of Ohioans did not vote.<sup>66</sup> But when the case was pending before the U.S. Supreme Court in the summer of 2017, the Justice Department switched sides and supported Ohio.<sup>67</sup> On June 11, 2018, the Supreme Court ruled in favor of Ohio and the Justice Department's new position.<sup>68</sup>

Last summer, the Trump Justice Department also sent letters to 44 states demanding information about their voter purge practices.<sup>69</sup> Although the Justice Department has not taken further action so far, the suspicion is that the inquiries could be a precursor to enforcement actions to force states to purge more aggressively.<sup>70</sup>

#### New Flaws in Voter Purges

Three new risks have emerged in voter purges in recent years. One is the growth of interstate databases that purport to identify voters who have moved to a new state and are registered in both their current and former state. The two databases primarily used are the Interstate Voter Registration Crosscheck program (Crosscheck) and Electronic Registration Information Center (ERIC).

Launched in 2005 by the Kansas secretary of state, Crosscheck purports to identify voters who may have cast ballots in two different states in the same election. In 2017, 28 states participated in Crosscheck by sharing voter data with the system,<sup>71</sup> but not all of those states actively used, or use, Crosscheck to remove voters. The number of participating states in 2018 is still to be determined because a number of states are assessing their participation.

Another data-matching initiative, ERIC, began with assistance from the Pew Charitable Trusts in 2012. Twenty-four states and the District of Columbia are or will soon be members of ERIC.<sup>72</sup>

The second risky development is the increasing number of states scouring their rolls to identify alleged noncitizens registered to vote: The number of states with statutes specifically mandating searching for and removing noncitizens from the rolls has increased from two to six since 2008. Of course, noncitizens are not permitted to vote in federal and state elections, but the sources states rely upon to determine voter citizenship, such as driver's license lists, are not highly accurate. Moreover, the primary policy justification for aggressive purges aimed at removing noncitizens from the rolls — supposed widespread noncitizen voting — is not supported by the facts, a Brennan Center study of the 2016 election found. The study looked at 42 jurisdictions in 12 states, including eight of the 10 jurisdictions with the nation's largest noncitizen populations. Out of the 23.5 million votes cast in these jurisdictions, election officials referred only 30 instances of suspected noncitizen voting, or .0001 percent of the total.<sup>73</sup>

Finally, several conservative activist groups have sued state and local jurisdictions in recent years seeking to force them to purge their rolls more aggressively. For instance,

last September the Public Interest Legal Foundation noted that it had brought nine suits in six states in the past two years alleging lax vigilance of voter rolls. That tally was included in a press release announcing that the group had put 248 counties in 24 states “on notice” that they were risking litigation if they could not demonstrate “effective voter roll maintenance.”<sup>64</sup>

#### Interstate Voter Registration Crosscheck Program (Crosscheck)

Purges based on a change of address have long been complicated and error prone. When the Brennan Center looked at purges a decade ago, it found that states primarily used the National Change of Address database compiled by the U.S. Postal Service to identify movers

(as well as driver’s license information).<sup>65</sup> But states have begun using other databases that go beyond the traditional sources of change-of-address information. Our research shows these new interstate databases have serious weaknesses that can lead to widespread and inaccurate purges.

When it began in 2005, the Kansas-based Crosscheck program had only four members.<sup>66</sup> In 2017, the most recent year data was shared, 28 states submitted data to the program.<sup>67</sup> Crosscheck’s purpose is to identify possible “double voters”—an imprecise term that could be used to refer to people who have registrations in two states or who actually *voted* in an election in multiple states. While it is not uncommon for those who have recently moved to be registered in multiple places, actual double voting is rare. In 2017, Crosscheck examined the records of 98 million

#### CROSSCHECK IN THE CROSSHAIRS

Crosscheck’s flaws put approximately 100 million voters in its database at potential risk, but some individuals are more vulnerable than others. Because of the loose matching criteria used by the program, parents and children with the same name are at greater risk of being confused with each other. Voters with common names are also more likely to match with different individuals for obvious reasons, but a less-obvious concern is the disproportionate effect this has on minority voters. African-American, Asian-American, and Latino voters are much more likely than Caucasians to have one of the most common 100 last names in the United States.<sup>1</sup>

Crosscheck creates matches based on first name, last name, and birthdate. Shared names and birthdates

are fairly common. In fact, if you were to gather 23 or more people in the same place, there is a greater than 50 percent chance that two people would share a birthday (day and month).<sup>2</sup> Even adding in the year doesn’t make an enormous difference: In a group of 180 people, it’s more likely than not that two people will have been born on the exact same day.<sup>3</sup>

Of course, adding in first and last names substantially decreases the rate at which people look the same on paper. It doesn’t, however, lower that rate sufficiently to make Crosscheck anywhere near accurate. When looking at records of millions of people, matching birthdates and names can still return thousands of inaccurate matches. This is true not only because of the so-called birthday problem but also because

of the variation in the popularity of names. Jennifer, for instance, was the most common name for women born in the 1970s<sup>4</sup> but was the 191st most common name for women born between 2010 and 2017.<sup>5</sup> On average, 160 Jennifers were born every single day in the U.S. between 1970 and 1979. Among these, there were doubtless many who shared surnames common among Americans.

The program also hurts frequent movers such as college students and military personnel, who are more likely to be wrongly flagged by the database following a recent move. Because Crosscheck’s date of registration data is unreliable, those who move more frequently are more likely to be wrongly identified as having moved out of the state that purges them.<sup>6</sup>

1 Non-white people are more likely to have common shared names. For instance, 16.3 percent of Hispanic people and 13 percent of black people have one of the 10 most common surnames, compared to 4.5 percent of white people. Joshua Comenetz, “Frequently Occurring Surnames in the 2010 Census,” U.S. Census Bureau, October 2016, available at <https://www2.census.gov/topics/genealogy/2010/surnames/surnames.pdf>.

**APPENDIX C**

voters<sup>68</sup> and produced 7.2 million “matches” representing 3.6 million voters supposedly registered in two states.<sup>69</sup>

Crosscheck compares the voter registration list of each participating state against the voter registration lists of the other participating states and flags all records that have the same first name, last name, and date of birth.<sup>70</sup> But in groups as large as statewide (or multistate) voter registration lists, the statistical odds of two registrants having the same name and birth date is sufficiently high as to be problematic.<sup>71</sup> A 2017 study led by Stanford professor Sharad Goel found that if applied nationwide, Crosscheck would “impede 300 legal votes for every double vote prevented.”<sup>72</sup> Moreover, the study found that “there is almost no chance that double votes could affect the outcome of a national election.”<sup>73</sup> One of Crosscheck’s problems is that it does not have reliable registration dates, which means that an election official cannot competently determine which of the two places a voter is registered is more recent and therefore which state should remove the voter.

Virginia had a major problem with Crosscheck five years ago when it tried to purge nearly 39,000 voters. Crosscheck relies on little information before concluding that registration records in different states belong to the same person. Virginia sent counties the roster of voters for removal without checking its accuracy, and counties were not furnished with any guidance about the data or sufficient time to conduct a thorough review.<sup>74</sup> Eligible voters were wrongly flagged as having moved from Virginia to another state when they had in fact moved from another state to Virginia.<sup>75</sup> Error rates in some counties ran as high as 17 percent.<sup>76</sup> Counties did not begin spotting errors until some had begun removing voters. At the urging of civic groups, the state issued new guidance on the use of Crosscheck data but not until thousands of voters had been purged right before a statewide election.<sup>77</sup>

Especially troubling is that at least four states have policies or regulations on the books providing for the use of Crosscheck in an illegal manner. Alabama,<sup>78</sup> Indiana,<sup>79</sup> and Maine<sup>80</sup> regulations allow counties to use Crosscheck to immediately purge voters from the rolls, without providing these voters notice and a two-election waiting period before deleting them as required by the NVRA.<sup>81</sup> And Arizona regulations permit removing voters based on Crosscheck in some instances within 90 days of a federal election,<sup>82</sup> which is not allowed under the NVRA for systematic purges such as those using Crosscheck.

Not all participating states are actively using Crosscheck data to identify and remove potentially ineligible voters.

In recent years, at least eight states have left the program altogether and no longer share data with or receive data from Crosscheck.<sup>83</sup> Additionally, seven other states have curtailed their use of Crosscheck data by not using it for the purposes of voter-list maintenance.<sup>84</sup> Instead, these states either do nothing with the data they receive or use it solely to identify people who appear to have voted (not merely registered) in multiple states.

In the midst of publicity around lax security protocols with Crosscheck<sup>85</sup> and news earlier this year that Crosscheck would review its security protocols and postpone uploading data,<sup>86</sup> Illinois announced that it would no longer transmit data to Crosscheck.<sup>87</sup> A state official was quoted as saying, “we will transmit no data to Crosscheck until security issues are addressed to our satisfaction.”<sup>88</sup> A South Carolina official expressed a similar sentiment, explaining that the state stopped using data “due to issues with verification and concerns about cybersecurity.”<sup>89</sup> According to an attorney representing the state of Indiana in litigation related to the state’s use of Crosscheck, as of May 2 of this year, Crosscheck was not accepting data from participating states while a review of security processes remained in progress.<sup>90</sup>

#### Electronic Registration Information Center (ERIC)

The Electronic Registration Information Center is a program that uses voter registration data, motor vehicle licensing information, Social Security Administration data, and National Change of Address information to identify voters who may have moved. Begun six years ago, 24 states plus the District of Columbia are enrolled in the program (or soon will be).<sup>91</sup> To participate in ERIC, states must submit extensive voter data, including full address, driver’s license or state ID number, last four digits of social security number, date of birth, voter registration activity dates, current record status, eligibility documentation, phone number, and email address.<sup>92</sup> Election officials in ERIC-participating states told us they provide notice and a two-election waiting period before removing voters.<sup>93</sup>

Election officials reported that ERIC also helps them identify potential voters who have moved into their jurisdictions but have not registered.<sup>94</sup> And one analysis of ERIC’s first year of operation showed increases in registrations in ERIC states relative to non-ERIC states.<sup>95</sup>

Although most of the election administrators that we interviewed reported positive experiences with ERIC, the new data source has its limits. Administrators from Maryland and Illinois, for example, reported that it could be difficult to determine a voter’s most recent address, which is a problem for frequent movers.<sup>96</sup> This absence of precise

**APPENDIX C**

information means that, even though ERIC is generally processed at the state level, it is local officials who must identify errors and determine which registration is more current — the one in the relevant jurisdiction or a registration in another state.<sup>97</sup> Wisconsin meanwhile, reported that although ERIC was helpful in updating more than 25,000 registration addresses in 2017 and 2018, it also resulted in more than 1,300 voters signing “supplemental poll lists” at a spring 2018 election, indicating that they had not in fact moved and were wrongly flagged.<sup>98</sup>

#### **Efforts to Purge Noncitizens Are More Frequent and Often Rely on Flawed Data**

The Brennan Center’s 2008 study found that attempts to purge noncitizens were rare. Back then only two states, Texas and Virginia, had laws mandating specific procedures for identifying noncitizens.<sup>99</sup> In the last decade, four more states — Georgia, Iowa, Minnesota, and Tennessee — have passed laws requiring removal of noncitizens.<sup>100</sup> More states are likely to pass such laws because of pressure to aggressively search for and delete noncitizen registrations.

As is true with other purges, the information relied upon to purge alleged noncitizens can be inaccurate. For example, at least 14 states have sought access to the federal Systematic Alien Verification for Entitlements (SAVE) program,<sup>101</sup> which checks several databases to ascertain the residence or citizenship status of people who have contacted benefit-granting agencies.<sup>102</sup> Some states, such as Virginia, were granted access. However, states found the database is useful only if an election administrator has someone’s alien identification number, information election officials typically do not possess.<sup>103</sup>

Some states use driver’s license data to purge noncitizens. Minnesota, Tennessee, and Virginia have statutes mandating this approach. Generally, driver’s license data is deployed in one of two ways.<sup>104</sup> One involves review of documents the registrant provided to the driver’s license office when obtaining a license. If a person showed a Permanent Resident Card, the presumption is that the registrant is a noncitizen and should be removed from the rolls. The problem, however, is that a person can lawfully not update their driver’s license information for many years, in which time they may have become a citizen.<sup>105</sup>

States may also scour their voter lists for those who did not check the box indicating that they were a citizen on their driver’s license application or renewal. Virginia has a specific statutory provision requiring this; Maryland does not but still engages in the practice.<sup>106</sup> Not surprisingly, election officials told us that sometimes citizens fail to check the citizenship box.<sup>107</sup>

In addition, at least three states (Georgia, Louisiana, and Texas) remove voters if they decline jury service on the grounds of noncitizenship.<sup>108</sup> But election officials told the Brennan Center in a 2017 report on noncitizen voting that eligible voters have been known to assert they are noncitizens solely for the purpose of evading jury duty. While illegal, these declarations are not necessarily indicative that a noncitizen has been registered to vote.<sup>109</sup>

#### **Activist Groups Pressing for More Aggressive Purges**

Another new dynamic is activist groups agitating for election officials to purge the rolls more aggressively. In the past, litigation was often used by groups seeking to protect voters *against* bad voter purges. For example, civic groups prevented voters from being illegally purged in Michigan in 2008,<sup>110</sup> Colorado in 2010,<sup>111</sup> and Florida in 2012.<sup>112</sup>

From 1998 through 2007, most of the litigation seeking purges was brought by the Justice Department — which made voter purges a priority in the midst of a failed nationwide voter fraud hunt<sup>113</sup> — whereas private plaintiffs typically brought suits because they were worried eligible people would be improperly purged. From 2008 to the present however, more than half of the 32 federal purge-related lawsuits brought by private parties have been filed by plaintiffs who believed that jurisdictions are not purging enough names from the rolls.<sup>114</sup>

In nine cases brought by private parties since 2012, election officials agreed to undertake more aggressive list maintenance.<sup>115</sup> One of the defendants in these cases was Noxubee County, a poor, rural, majority-Black county in eastern Mississippi that was sued by the American Civil Rights Union (ACRU, not to be confused with the American Civil Liberties Union).

“They went after minority counties who didn’t have the financial resources to push back,” said Willie M. Miller, the Election Commissioner for Noxubee County’s fourth district.<sup>116</sup> As of this writing, the ACRU is suing Starr County and the State of Texas<sup>117</sup> for failing to purge aggressively enough, and the like-minded Judicial Watch has brought litigation in California.<sup>118</sup>

Unfortunately, this litigation has consequences. The ACRU lawsuit against Noxubee County resulted in about 1,500 (more than 12 percent) of its 9,000 voters being made inactive.<sup>119</sup> Being designated as inactive is the first stage of the removal process. The waiting period of two federal elections has yet to expire, so it’s unclear at this juncture how many voters will ultimately be removed.<sup>120</sup> Similarly, Judicial Watch’s 2012 suit against Indiana<sup>121</sup>

## APPENDIX C

arguably led to the state undertaking more aggressive list maintenance. Before the suit was dismissed, Indiana announced that it had sent an “address confirmation mailing to all voters” and undertook other purging initiatives that led to more than 480,000 canceled registrations after the 2016 election.<sup>122</sup> Judicial Watch boasted that their lawsuit “forced” Indiana to undertake additional purge practices;<sup>123</sup> Indiana first sent out the required federal notices in 2014, then purged voters who did not respond and did not vote in 2014 or 2016.

Litigation is but one element of a broader strategy by these groups to force purges. In 2016, the Public Interest Legal Foundation published a report entitled “Alien Invasion

in Virginia,” complete with a flying saucer on the cover. Extrapolating from a small sample, the missive misleadingly suggested thousands of votes had been cast by noncitizens,<sup>124</sup> a claim election officials dispute.<sup>125</sup> The Foundation’s pressure may have had an impact: Six hundred ninety-three alleged noncitizens were purged in the 2016 reporting period, but that number more than doubled to 1,686 in the 2017 period.<sup>126</sup> The purge has spawned yet more litigation, with several voters complaining that they were wrongly deleted, and the Public Interest Legal Foundation has been sued for defamation and illegal voter intimidation.<sup>127</sup> Election fraud vigilantes have also brought mass challenges to voters’ registrations, including in North Carolina, where a judge blocked the practice.<sup>128</sup>

## CHALLENGES CONTINUE

In at least 15 states, “challenge” laws permit challenges to the validity of a voter’s registration prior to Election Day (additional states allow challenges to eligibility at the time of voting only).<sup>1</sup> These challenge laws, which are designed to allow for questioning the eligibility of registered voters on a case-by-case basis, have been used recently in several states to try to systematically remove voters from the rolls, functioning effectively as a purge that can operate outside the NVRA’s protections. The use of challenge laws as back doors for purging is legally dubious and increases the risk of wrongful removals; precisely what has happened in some states.

Colorado’s former secretary of state, Scott Gessler, matched the voter rolls against driver’s license lists to produce a large (and inflated) list of potential noncitizens. He then attempted to use his state’s challenger

laws to remove voters en masse. After much public criticism, Gessler abandoned the effort.<sup>2</sup>

In Hancock County, Georgia, the majority-white Board of Elections used challenge procedures in the weeks leading up to a 2015 municipal election to challenge 174 voters – nearly 20 percent of the town of Sparta’s electorate. The majority of the challenged voters were Black. Some of the challenges were based on as little evidence as a discrepancy between a voter registration address and an address record in a flawed driver’s license database. Other challenges were based on second-hand claims that a voter had moved out of the county.<sup>3</sup> After being sued, the county agreed to reinstate wrongfully challenged voters who had been removed from registration lists.<sup>4</sup>

Iowa’s former secretary of state, Matt Schultz, tried to use challenges

to remove suspected noncitizens from the rolls, but he was blocked by a court.<sup>5</sup>

And in North Carolina, a federal court ruled in 2016 that local boards of elections likely violated the NVRA (52 U.S.C. § 20507(c)(2)(A)) when they systematically purged hundreds of voters through citizen-initiated challenge procedures fewer than 90 days before the general election. The judge based her ruling on the systematic purge occurring within the prohibited window, but she also remarked that the challenge process, which allows voters to be removed if they do not show up at a hearing upon being challenged based on second-hand evidence of a move, seemed “insane.”<sup>6</sup> Nevertheless, state lawmakers expressly rejected legislation that would have made it more difficult to sustain a voter challenge on this basis.<sup>7</sup>

## Solutions

While no one disputes the rolls should be accurate, voters should be protected from wrongful purges. There are several ways to safeguard voters from overly aggressive list maintenance:

- **Enforce the National Voting Registration Act's Protections.**  
The NVRA permits an aggrieved voter to sue if a jurisdiction has been informed of a possible violation and does not correct it in a set period of time. Litigation to enforce the NVRA is especially crucial in a time when the Justice Department is unlikely to enforce voter protections and outside groups are agitating for more aggressive purges. Of course, most voters do not have the expertise or resources to bring such litigation. Therefore it is critically important that civil rights and other pro-voter organizations rigorously monitor purge activity and have the wherewithal to sue when necessary.
- **States Should Enact Laws That Provide Even More Protections than the National Voter Registration Act.**  
While the NVRA includes critical voter protections, states should do more. For example, the NVRA requires that voters suspected of moving from the jurisdiction receive notice of their possible removal. Not surprisingly, most states do not provide notice beyond what is federally required. For example, most states do not provide notice to voters purged based on death or a disenfranchising conviction, and many of those states that do provide notice in these circumstances do so only after the fact. States should surpass these minimal standards. No matter the reason, all voters should be informed in advance of their possible deletion and should be provided easy mechanisms for correcting errors on or before Election Day.
- **Enact Automatic Voter Registration.**  
Automatic voter registration is a popular reform that minimizes errors, saves money, and increases registration of eligible citizens. Automatic voter registration has two key features: (1) eligible citizens are registered unless they affirmatively decline; and (2) voter registration information is electronically transferred from a government office to election officials instead of relying on pen and paper. Currently, 12 states plus the District of Columbia have approved automatic voter registration.<sup>129</sup> In addition to adding more voters to the rolls, automatic voter registration also catches more address updates, reducing the need for change-of-address voter purges.

---

## Endnotes

- 1 In the two-year election cycle ending in 2008, the Brennan Center found the median jurisdiction purged 6.2 percent of voters. For the two years ending in 2016, this study finds that the purge rate of the median jurisdiction had increased to 7.8 percent. We examined 49 states because North Dakota has no advance voter registration requirement and thus does not have required voter registration lists to purge. The state does keep records of individuals who vote, but it is not necessary to be on any registration list at the time of voting to cast ballots. Although there are other impediments to voting in North Dakota, including a strict photo ID law, voters do not face barriers related to voter registration in the state.
- 2 We assessed 49 states on the following criteria: First, whether the state used the Interstate Voter Registration Cross-check program in a way that is problematic or not compliant with the NVRA. We found five states deficient in this category. Second, whether the state makes readily available lists of purged voters. We found 49 states deficient in this category (at least 10 states have statutory requirements for making some names of purged voters available, but all fail to do so in practice). Third, whether states provide prior notice to all voters purged on the basis of death, felony conviction, or noncitizenship. We found 49 states deficient in this category (21 states have statutory requirements whereby voters purged on the basis of death or felony conviction receive notice before or after the purge, but no state requires prior notice to voters purged for both categories). For additional recommendations to guard against unlawful or problematic voter purges and why they are important, see Myrna Pérez, *Voter Purges* (New York: Brennan Center for Justice, September 2008), 25–31, <https://www.brennancenter.org/sites/default/files/legacy/publications/Voter.Purges.f.pdf>.
- 3 Calculated from total numbers reported to the Elections Assistance Commission in 2008 and 2016. Compare U.S. Election Assistance Commission, 2008 Election Administration and Voting Survey, <https://www.eac.gov/research-and-data/2008-election-administration-voting-survey/>, and U.S. Election Assistance Commission, 2016 Election Administration and Voting Survey, <https://www.eac.gov/research-and-data/2016-election-administration-voting-survey/>.
- 4 These previously covered areas had median purge rates of 9.5 percent, while noncovered jurisdictions had median purge rates of 7.5 percent.
- 5 The median county purge rate in the 2008–10 election cycle was 8.4 percent. But in the election cycle including the *Shelby County* decision, 2012–14, the purge rate jumped 26 percent to a median county purge rate of 10.6 percent.
- 6 Myrna Pérez, *Voter Purges* (New York: Brennan Center for Justice, September 2008), <https://www.brennancenter.org/sites/default/files/legacy/publications/Voter.Purges.f.pdf>.
- 7 Omitting North Dakota, as explained above.
- 8 We served public records requests on election officials and their offices at the state and local levels in 22 states and sought interviews with election officials in 45. The numbers referenced in the text refer to respondents.
- 9 U.S. Election Assistance Commission, *2016 Election Administration & Voting Survey*, June 2017, <https://www.eac.gov/research-and-data/election-administration-voting-survey/>.
- 10 Not all jurisdictions report their data consistently. Whenever we make comparisons across time periods, we restrict our sample to the counties reporting consistently. For instance, 2,394 jurisdictions report removal data for each of the two-year periods ending in 2010, 2012, 2014, and 2016. Our analysis exploring the impact of the end of the preclearance condition of the Voting Rights Act looks only at these counties to ensure an apples-to-apples comparison.
- 11 U.S. Election Assistance Commission, *2016 Election Administration & Voting Survey*, June 2017, <https://www.eac.gov/research-and-data/election-administration-voting-survey/>. Sixteen million is in fact a conservative estimate because it includes only voters removed from jurisdictions who reported their data to the EAC in 2016. It therefore does not include voters removed during some problematic purges such as that in Kings County (Brooklyn), NY (discussed above).
- 12 National Voter Registration Act of 1993, H.R. 2, 103<sup>rd</sup> Cong. (1993), 52 U.S.C. § 20507, is the main source of

**APPENDIX C**

federal requirements. For more information on federal law around purges, see Appendix A.

- 13 Some states are not required to follow the National Voter Registration Act. The NVRA exempts the following states from its purge protocols because those states had Election-Day registration or lacked voter-registration requirements on or after August 1, 1994: Idaho, Minnesota, New Hampshire, North Dakota, Wisconsin, and Wyoming. National Voter Registration Act of 1993, H.R. 2, 103<sup>rd</sup> Cong. (1993) 52 U.S.C. § 20504(b). This reflects Congress's assessment that purge consequences are much less grave in a state that permits anyone eligible who is not on the registration rolls to register and vote on Election Day.

Ann. § 16-165(C) (requiring removal "[w]hen proceedings...result in a person being declared incapable of taking care of himself and managing his property, and for whom a guardian of the person and estate is appointed, result in such person being committed as an insane person"); Del. Code Ann. tit. 15, §§ 1701(a), 1702 (requiring removal of "person adjudged mentally incompetent...[which] refers to a specific finding in a judicial guardianship or equivalent proceeding, based on clear and convincing evidence that the individual has a severe cognitive impairment which precludes exercise of basic voting judgment"); Fla. Stat. Ann. § 98.075(4) (requiring removal for "registered voters who have been adjudicated mentally incapacitated with respect to voting and who have not had their voting rights restored"); Ga. Code Ann. § 21-2-231(b) (requiring removal "[of those] who were declared mentally incompetent during the preceding calendar month in the county and whose voting rights were removed"); Haw. Rev. Stat. Ann. § 11-23(a) (requiring removal "[of person] adjudicate[ed] as an incapacitated person under the provisions of chapter 560...[if] after the investigation the clerk finds that the person...lacks sufficient understanding or capacity to make or communicate responsible decisions concerning voting"); Iowa Code Ann. § 48A.30(1)(e) (requiring removal "[if] [t]he clerk of the district court or the state registrar sends notice that the registered voter has been declared a person who is incompetent to vote under state law"); Ky. Rev. Stat. Ann. § 116.113(2) (requiring removal "[u]pon receipt of notification from the circuit clerk that a person has been declared incompetent"); La. Stat. Ann. § 18:172 (requiring removal "[after] judgment of full interdiction or a limited interdiction for mental incompetence which specifically suspends the right to register and vote and which has become definitive"); Code Me. R. tit. 29-250 Ch. 505, § 1(B) (requiring removal "[if] the municipality receives notice indicating that a registrant has been placed under guardianship due to mental illness"); Md. Code Ann., Elec. Law §§ 3-102(b)(2), 3-501 (requiring removal "[if person] is under guardianship for mental disability and a court of competent jurisdiction has specifically found by clear and convincing evidence that the individual cannot communicate, with or without accommodations, a desire to participate in the voting process"); Minn. Stat. Ann. § 201.145 (requiring removal "[of persons] under a guardianship in which a court order revokes the ward's right to vote or where the court has found the individual to be legally incompetent to vote"); Miss. Code. Ann. § 23-15-153(I) (requiring removal "[of voters who have] received an adjudication of non compos mentis"); Mo. Ann. Stat. § 115.199 (requiring removal "of voters...adjudged incapacitated"); Mont. Code Ann. § 13-2-402(3) (requiring removal "[if] the elector is of unsound mind as established by a court"); Neb. Rev. Stat. Ann. §§ 32-313(1), 32-326 (requiring removal "[of person] who is non compos mentis"); Nev. Rev. Stat. Ann. § 293.540(2)(b) (requiring removal "[if] the county clerk is provided a certified copy of a court order stating that the court specifically finds by clear and convincing evidence that the person lacks the mental capacity to vote because he or she cannot communicate, with or without accommodations, a specific desire to participate in the voting process"); N.M. Stat. Ann. § 1-4-26 (requiring removal "[w]hen in proceedings held pursuant to law, the district court determines that a mentally ill individual is insane as that term is used in the constitution of New Mexico"); N.Y. Elec. Law § 5-400(1) (c) (requiring removal "[of voter who] has been adjudicated an incompetent"); Ohio Rev. Code Ann. § 3503.18(B) (requiring removal of persons "who have been adjudicated incompetent for the purpose of voting, as provided in section 5122.301 of the Revised Code"); Okla. Stat. Ann. tit. 26, § 4-120.5 (requiring removal "of all persons who have been adjudged incapacitated"); S.C. Code Ann. § 7-5-340(1)(b) (requiring removal "if the elector is adjudicated mentally incompetent by a court of competent jurisdiction"); S.D. Codified Laws § 12-4-18 (requiring removal "of persons declared mentally incompetent"); Tex. Elec. Code Ann. § 16.031(a)(3) (requiring removal "on receipt of...an abstract of a final judgment of the voter's total mental incapacity, partial mental incapacity without the right to vote...or disqualification under Section 16.002"); Wash. Rev. Code Ann. § 29A.08.515 (requiring removal "[u]pon receiving official notice that a court has imposed a guardianship for an incapacitated person and has

**APPENDIX C**

determined that the person is incompetent for the purpose of rationally exercising the right to vote, under chapter 11.88 RCW"); W.Va. Code, § 3-2-23(3) (requiring removal "[u]pon receipt of a notice from the appropriate court of competent jurisdiction of a determination of a voter's mental incompetence"); Wis. Stat. Ann. §§ 6.03, 6.48, 6.935 (requiring removal "[through challenge] [o]f any person who is incapable of understanding the objective of the elective process or who is under guardianship, unless the court has determined that the person is competent to exercise the right to vote"); W.S.1977 §§ 22-3-102(a)(iv), 22-3-115(a)(iv) (requiring removal "[o]f person] currently adjudicated mentally incompetent"). Additional states provide for loss of eligibility on these grounds but do not specifically describe the manner of removal. See Michelle Bishop, "Disability Is No Reason to Strip a Person's Voting Rights," *HuffPost*, May 12, 2018, [https://www.huffingtonpost.com/entry/opinion-bishop-disability-voters\\_us\\_5af5b085c4b0e57cd9f9042f](https://www.huffingtonpost.com/entry/opinion-bishop-disability-voters_us_5af5b085c4b0e57cd9f9042f).

- 18 Montana Code Ann. § 13-2-220.
- 19 Conn. Gen. Stat. § 9-32.
- 20 Ga. Code Ann. §§ 21-1-231(a.1)(b) (requiring clerk of superior court to forward noncitizen jury declinations and requiring election officials to remove names from voter list, La. Stat. Ann. § 18:178 (requiring clerk of the court to provide names of individuals who respond to jury notices saying they are noncitizens to Department of State); Minn. Stat. Ann. § 201.145 (requiring county auditor to send to county attorney list of names of individuals who are registered to vote and not citizens); Tenn. Code Ann. § 2-2-141 (requiring coordinator of elections to compare registration list with Department of Safety database to ensure non-United States citizens are not registered to vote); Tex. Elec. Code Ann. § 16.0332 (requiring registrar to initiate voter removal process for voters for whom the registrar receives a notice of disqualification or excusal from jury service because of citizenship status); Va. Code Ann. § 24.2-404(A)(4) (requiring registrar to delete record of registered voters known not to be a citizen from reports of Department of Motor Vehicles or Systematic Alien Verification for Entitlements Program).
- 21 Throughout this document we report median removal rates. The median is the appropriate measure of central tendency because of how the removal rate data are distributed. Because some jurisdictions have very high removal rates, while most are clustered close to the lower bound of zero, using the mean would artificially bias reported numbers upward.
- 22 "About Section 5 of the Voting Rights Act," The United States Department of Justice, accessed May 24, 2018, <https://www.justice.gov/crt/about-section-5-voting-rights-act>.
- 23 Shelby County v. Holder, 570 U.S. 2 (2013).
- 24 Between the presidential elections of 2008 and 2012, the median two-year removal rate for both previously covered and noncovered jurisdictions was 7.5 percent. Throughout this section, we limit our analysis to jurisdictions that reported removal rates for each of the two-year periods ending 2010, 2012, 2014, and 2016. Kings County, New York, for instance, did not report removal rates for the two years ending 2016 and thus is excluded from the entire pre/post *Shelby* analysis. It is important to note that this does not meaningfully impact our analysis: The median removal rate in 2016 for counties that reported their data each year was 7.9 percent compared to 7.6 percent for jurisdictions that reported their data in 2016 but also failed to do so in at least one other year. To maintain consistency with discussions of two-year removal rates elsewhere in this report, we continue to use two-year removal rates here. For instance, Escambia County, Florida, removed 0.42 percent of its voters between 2008 and 2010, and 0.42 percent again between 2010 and 2012. Here we call their median *two-year* removal rate 0.42 percent. Their four-year removal rate would, of course, be higher. We group the data into four-year buckets because of the natural variation in removal rates between presidential and nonpresidential election cycles.

**APPENDIX C**

- 25 Formerly covered jurisdictions are disproportionately located in the southeastern part of the country. We considered the possibility that the increased purge rate is attributable to some regional factor or factors aside from the lifting of the preclearance requirements. To control for this, we repeated the above analysis but restricted our sample to just those states in the Southeast (AL, FL, GA, KY, MS, NC, SC, TN, VA, and WV). Among jurisdictions in the Southeast that consistently reported their data, 461 counties were covered under the Voting Rights Act and 388 were not. We found that even within the Southeast, formerly covered jurisdictions increased their purge rates more than their noncovered peers. In fact, noncovered jurisdictions in the Southeast did not increase their removal rates between the two periods. The increase in removal rates in previously covered jurisdictions in this region mirrored those of the group of covered jurisdictions as a whole:

	Federal Election 2008-12	Federal Election 2012-16
Previously Covered	7.2%	9.7%
Not Covered	6.6%	6.6%

Nor can the difference in purge rate be explained by differences in partisan tendency. Formerly covered counties are more Republican-leaning than the nation as a whole. Within counties that reported data consistently to the EAC, President Donald Trump received 51 percent of the ballots cast in counties that required pre-clearance prior to Shelby, but just 46 percent of the ballots cast in non-covered jurisdictions. To test the possibility that Republican-leaning counties were more likely to increase their removal rates regardless of their status under the Voting Rights Act, we compared the 409 previously covered jurisdictions that Trump received more votes than Hillary Clinton to the 1,594 non-covered jurisdictions in which he did so.

	Federal Election 2008-12	Federal Election 2012-16
Previously Covered	7.3%	9.4%
Not Covered	7.5%	7.4%

Removal rates in non-covered jurisdictions that Trump won did not increase their removal rates at all. Trump-supporting jurisdictions that were previously covered, however, increased their removal rates substantially. Clearly, the increase in removal rates among the jurisdictions that were covered under the VRA was not a function of an electorate likely to support Donald Trump. Sources: *Townhall.com*, <https://townhall.com/election/2016/president>; and *SouthEastern Division of the Association of American Geographers*, <http://scdaag.org>.

- 26 See Appendix B.
- 27 See Appendix C. While not a perfect predictor because there are many reasons why a voter might cast a provisional ballot, our finding that high provisional ballot numbers are probative as to the existence of a purge are corroborated by other experts in the field. See, for example, U.S. Commission on Civil Rights, *Briefing Report: Department of Justice Voting Rights Enforcement for the 2008 U.S. Presidential Election* (Washington: July 2009) (summarizing testimony of Dan Tokaji), <http://www.usccr.gov/pubs/DOJ/VotingRights2008PresidentialElection.pdf>.
- 28 Tim Reid and Grant Smith, "Missing Hyphens Will Make It Hard for Some People to Vote in U.S. Election," *Reuters*, April 11, 2018, <https://www.reuters.com/article/us-usa-election-laws/missing-hyphens-will-make-it-hard-for-some-people-to-vote-in-u-s-election-idUSKBN1H1IPX>. Georgia's practice of purging voters on the basis of not voting was also challenged. See *Georgia State Conf. of the NAACP v. Kemp*, No. 2:16-cv-219, filed Sept. 14, 2016 (N.D. Ga.); *Common Cause v. Kemp*, No. 1:16-cv-00452, filed Feb. 10, 2016 (N.D. Ga.). See also Tony Pugh, "Georgia Secretary of State Fighting Accusations of Disenfranchising Minority Voters," *McClatchy*, October 7, 2016, <http://www.mcclatchydc.com/news/politics-government/article106692837.html>; Regina Willis, "More Than 380,000 Georgia Voters Receive 'Purge Notice,'" *Rewire.News*, July 21, 2017, <https://rewire.news/article/2017/07/21/more-380000-georgia-voters-received-purge-notice/>.
- 29 Overall, 54% of voters lived in counties in which the removal rate increased. Numbers are drawn from counties that reported data in both 2010 and 2014, a set representing 94% of total Texas voters.

**APPENDIX C**

- 76 Ibid.
- 77 See Matthew Barakat, "Va. Removes 40K From Voter Rolls Over Democrats' Objections," *Richmond Times-Dispatch*, October 17, 2013, [http://www.richmond.com/news/state-regional/va-removes-k-from-voter-rolls-over-democrats-objections/article\\_2d111de4-49de-523b-bd9c-5d93b7c0a00c.html](http://www.richmond.com/news/state-regional/va-removes-k-from-voter-rolls-over-democrats-objections/article_2d111de4-49de-523b-bd9c-5d93b7c0a00c.html). Virginia subsequently began to release reports explaining, among other things, the way Crosscheck data was used. They found that only 10 percent of Crosscheck matches were usable for list maintenance. Virginia Department of Elections, *Annual List Maintenance Report*, 2017, 5, <https://www.elections.virginia.gov/Files/maintenance-reports/2017SBEListMaintenanceReport.pdf>.
- 78 Alabama law exempts county boards from the requirement that they contact voters to verify suspected address changes when another state provides notice that "the elector registered to vote in another jurisdiction, within or without the State of Alabama, at a date subsequent to the date the elector registered to vote in the jurisdiction of the county board of registrars." *Ibid.* at § 17-4-38.1(c). An Election Handbook provided by the Alabama Secretary of State's office indicates that such notice is sufficient to disqualify and remove the voter when a "registration official from another state notifies registrars in writing that the voter has registered elsewhere." Alabama Law Institute, Alabama Election Handbook: Eighteenth Edition (2017), 262. But in a December 1, 2016 email obtained through a public records request, the Secretary of State's Supervisor of Voter Registration provided county registrars a list of voters that Crosscheck suggested had "registered to vote in another state more recently" than in Alabama and directed the registrars to review the list and "take the action you would normally take as if you received notice directly from another state." Clay Helms (Supervisor of Voter Registration, Office of Alabama Secretary of State), email to local registrars, December 1, 2016, on file with authors. In an interview, Alabama confirmed that the state has considered Crosscheck data as information provided directly from another state; although the state does filter the data to rule out some mismatches, it does not require a notice and waiting-period process. Alabama, which uses ERIC, has not determined whether it will use Crosscheck in future years. John Bennett (Deputy Chief of Staff/Communications Director, Alabama Secretary of State's Office), interview by Brennan Center for Justice, June 15, 2018.
- 79 Indiana Code § 3-7-38.2-5(d). The Brennan Center is suing Indiana over this matter. Indiana NAACP & League of Women Voters of Indiana v. Lawson, No. 1:17-cv-2897 (S.D. Ind.). Indiana's law does not provide notice as required by the NVRA. See Indiana Code § 3-7-38.2-5(d). On June 8, 2018, a federal judge issued a preliminary injunction against the law, meaning it is temporarily blocked. Order Granting Plaintiffs' Motion for Preliminary Injunction, Indiana NAACP & League of Women Voters of Indiana v. Lawson, No. 1:17-cv-2897 (S.D. Ind.). Available at [https://www.brennancenter.org/sites/default/files/legal-work/2018-06-18\\_Order\\_Granting\\_Plaintiffs%27\\_Motion\\_for\\_Preliminary\\_Injunction.PDF](https://www.brennancenter.org/sites/default/files/legal-work/2018-06-18_Order_Granting_Plaintiffs%27_Motion_for_Preliminary_Injunction.PDF).
- 80 "2017 Maine Crosscheck Data Review Plan" (providing, "If the matched data shows that the Maine voter record is older than the other state's voting record, then the Maine record will be cancelled. No notice to the voter is required"). Document produced in response to public records request issued by Brennan Center for Justice and on file with authors.
- 81 Idaho also removes voters immediately, but its practice permitting immediate removal of individuals flagged by Crosscheck without notice or a waiting period does not violate federal law because Idaho is exempt from the NVRA, and therefore does not have to abide by the NVRA notice and waiting period requirements.
- 82 State of Arizona, *Elections Procedures Manual*, 2018 Edition, 104, <http://live-az-sos.pantheonsite.io/sites/default/files/2018%200330%20State%20of%20Arizona%20Elections%20Procedures%20Manual.pdf> (allowing removal within 90 days in the case of a "true match," which could, but need not, involve direct confirmation from the voter). Arizona declined to be interviewed for this report but informed the Brennan Center that it no longer participates in Crosscheck. Eric Spencer (State Election Director), email to Brennan Center for Justice, June 14, 2018, on file with the Brennan Center. The state did participate in the last Crosscheck match in 2017, and its 2018 election manual provides for removal through Crosscheck.
- 83 These states are Alaska, Florida, Kentucky, Massachusetts, New York, Oregon, Pennsylvania, and Washington. See Jonathan Brater, Brennan Center for Justice, "The Purge: Ten Years Later?", June 30, 2017, <https://www.brennan-center.org/blog/purge-ten-years-later>. In addition to those states, Arizona informed the Brennan Center that it is no longer participating in Crosscheck. Eric Spencer (State Election Director, Arizona), email to Brennan Center for Justice, June 14, 2018, on file with the Brennan Center.
- 84 According to the Center for Investigative Reporting, those 7 states are: Colorado, Georgia, Louisiana, Nevada,

**APPENDIX C**

North Carolina, South Carolina, and West Virginia. See Aaron Sankin, "Crosscheck is ineffective and insecure. But states aren't withdrawing," *Reveal*, March 26, 2018, <https://www.revealnews.org/blog/crosscheck-is-ineffective-and-insecure-but-states-arent-withdrawing/>.

ter by Wisconsin Elections Commission (on file with Brennan Center). Wisconsin implemented the supplemental poll lists after some voters experienced problems at a February 2018 election. Through the use of the supplemental poll lists, these voters were able to reactivate their registrations at the polls and vote, rather than having to re-register. Sarah Whitt (WisVote Functional Lead, Wisconsin Elections Commission), interview by Brennan Center for Justice, June 4, 2018.

- 99 Act of May 18, 2006, 2006 Va. Laws Ch. 940 (S.B. 313), § 1 (codified as amended at Va. Code Ann. §§ 24.2-404 & 24.2-427); Act of June 11, 1997 Tex. Sess. Law Serv. Ch. 640 (H.B. 1645), § 1 (codified as amended at Tex. Elec. Code Ann. § 16.0332).
- 100 Act of Apr. 30, 2009, 2009 Georgia Laws Act 86 (H.B. 549), § 1 (amending Ga. Code Ann. § 21-2-231, to require removal of registration of every person that declined jury duty based on noncitizenship); Act of May 5, 2017, Act 2017 (87 G.A.) ch. 110, H.F. 516, § 4 (amending Iowa Code Ann. § 48A.30 to require cancellation of voter registration of every person that submits documentation to prove noncitizenship for purpose of disqualifying themselves from jury duty); Act of Apr. 1, 2010, 2010 Minn. Sess. Law Serv. Ch. 201 (H.F. 3108), § 12 (adding Minn. Stat. Ann. § 201.158, which requires county auditors to challenge the registration of every registered voter who is identified as a noncitizen by the commissioner of public safety) (later repealed and re-codified as amended at Minn. Stat. Ann. § 201.145); Act of May 23, 2011, 2011 Tennessee Laws Pub. Ch. 235 (S.B. 352), § 1 (adding Tenn. Code. Ann. § 2-2-141, requiring coordinator of elections to begin removal proceedings for registered voters identified as noncitizens in the Department of Safety database).

## Appendix A: Federal Statutory Regulation of Voter Purge Practices

Purge practices are regulated by a combination of federal and state law. Below is a summary of federal statutes:

### VOTING RIGHTS ACT

As a general matter, the Voting Rights Act (VRA), 52 U.S.C. § 10301 et seq., prohibits discrimination in voting. The Supreme Court has held that this prohibition applies to purges.<sup>1</sup> Prior to 2013, certain jurisdictions were required to seek federal preclearance of purge practices before they were implemented.<sup>2</sup> However, the formula by which these jurisdictions were covered was invalidated in *Shelby County v. Holder*,<sup>3</sup> effectively ending preclearance until Congress issues a new formula. Purge practices must still comply with Section 2 of the VRA, which bans discriminatory voting practices.<sup>4</sup>

### NATIONAL VOTER REGISTRATION ACT

The National Voter Registration Act (NVRA) is the most comprehensive federal law regulating voter purges and applies to 44 states. Six states (Idaho, Minnesota, New Hampshire, North Dakota, Wisconsin, and Wyoming) are exempt because they had election day registration or no voter registration as of the date provided by the NVRA. These exemptions make sense because purge consequences are much less grave in a state that permits anyone eligible who is not on the registration rolls to register and to vote on Election Day (or does not require them to register in order to vote).

The law discusses five categories of removal from voter rolls: (1) request of the registrant; (2) disenfranchising criminal conviction; (3) mental incapacity; (4) death; and (5) change in residence.<sup>5</sup> The NVRA sets forth a series of specific requirements that apply to purges of registrants believed to have changed residence.<sup>6</sup>

The law also contains a series of additional proscriptions on state practices. For example, it provides that list maintenance must be uniform, nondiscriminatory, and in accordance with the Voting Rights Act.<sup>7</sup> It also prohibits systematic voter purges (those programs that remove groups of voters at once) within 90 days of a federal election.<sup>8</sup> The Act also has provisions that apply on Election Day if a voter has changed address. Voters who have moved within a jurisdiction are permitted to vote at either their new or old polling place (states get to choose), while purged voters — mistakenly believed to have moved — who show up on Election Day have the right to correct the error and cast a ballot that will count.<sup>9</sup>

### HELP AMERICA VOTE ACT

The Help America Vote Act of 2002 (HAVA) reaffirms the requirements of the NVRA and contains additional regulations for voter list maintenance.<sup>10</sup> For example, HAVA requires states to create statewide voter registration databases with unique identifiers for registered voters.<sup>11</sup> The law also requires states to attempt to verify the validity of information submitted by voter registration applicants.<sup>12</sup> HAVA also ensures that certain voters, including those who do not appear on poll books, are permitted to vote provisional ballots at minimum.<sup>13</sup>

<sup>1</sup> *Young v. Ferrice*, 520 U.S. 273 (1997).

<sup>2</sup> 52 U.S.C. § 10304.

<sup>3</sup> 52 U.S.C. § 10901.

<sup>4</sup> 52 U.S.C. § 10901(a).

<sup>5</sup> 52 U.S.C. § 20507(a).

<sup>6</sup> See 52 U.S.C. § 20507(d)(1).

<sup>7</sup> 52 U.S.C. § 20507(b)(1).

<sup>8</sup> 52 U.S.C. § 20507(c)(2)(A).

<sup>9</sup> 52 U.S.C. § 20507(e).

<sup>10</sup> 52 U.S.C. § 21083(a).

<sup>11</sup> 52 U.S.C. § 21083(a)(5)(A).

<sup>12</sup> 52 U.S.C. § 21083(a)(5)(B).

<sup>13</sup> 52 U.S.C. § 21082.

Constant	-0.0185*** (0.00523)
Observations	1,854
R-squared	0.741
Robust standard errors in parentheses, clustered by county. Year and state-level dummies not shown. *** p<0.01, ** p<0.05, * p<0.1 Notes: Data are from the 2010, 2012, 2014, and 2016 reporting periods. Includes jurisdictions covered under Section V of the Voting Rights Act at the time of the <i>Shelby County</i> decision in 2013 that reported in each time period. Sources: U.S. Election Assistance Commission, U.S. Census Bureau: American Community Survey 5-Year Estimates, National Conference of State Legislatures.	

Regression analysis shows that the higher a covered county's purge rate the higher their provisional ballot rate. Each 1 percent increase in removal rates was associated with an additional 1.8 provisional ballots for every 10,000 ballots cast. Although this number is small, the median for these jurisdictions in the 2012 presidential election was fewer than 1 provisional ballot per 10,000 cast. Importantly, this statistically significant relationship holds even after controlling for other sociodemographic factors such as population, turnout rate, racial composition, political orientation, and implementation of strict voter ID requirements.

As with any statistical study of this sort, it is impossible to determine whether the increase in purge rates in any particular county is responsible for an increase in provisional ballots. However, a closer look at the numbers in a few jurisdictions suggests how this relationship might work.

**Shelby County**, Alabama, the jurisdiction at issue in *Shelby County v. Holder*, is illustrative. After preclearance ended in 2013, the county's removal rate more than doubled, from 5.0 percent to 10.4 percent. In 2014, more than 18 percent of the county's voters were purged. In 2012, the provisional ballot rate was 0.15 percent, virtually identical to the national average of 0.16 percent. Following years in which the county purged an average of 10 percent of voters, the provisional ballot rate tripled to 0.45 percent.

**Montgomery County**, Alabama, also had to seek federal preclearance for purges in the past. From 2009 to 2012, when preclearance was required, the average two-year removal rate was 4.7 percent, well below the national average. But after

**APPENDIX C**

*Shelby County* effectively ended preclearance, the removal rates increased dramatically, nearly tripling to 12.0 percent. Montgomery County's numbers are similar to Shelby County's. In the two years ending in 2014, a period covering the cessation of preclearance, Montgomery County had a massive purge in which 21 percent of voters were removed. Subsequently, the provisional ballot rate shot up from 0.31 percent in the 2012 presidential election to more than 1 percent in the 2016 election.

## Florida, Georgia, North Carolina Still Purging Voters at High Rates

Voter purges increased significantly in the 2016 election cycle. New numbers from three states offer cause for alarm about 2018, too.

October 1, 2018

Kevin Morris      Myrna Pérez

Earlier this summer, when the Brennan Center released a report examining voter purge data through 2016, we found that four million more people were purged from the rolls between the federal elections of 2014 and 2016 than between 2006 and 2008. Much of that increase came from states that were previously required under the Voting Rights Act (VRA) to get election changes cleared in advance, before that part of the law was eviscerated by the Supreme Court in 2013.

Although comparable data for the two years ending in 2018 won't be available until early next year, we were able to use different data sources to figure out how many voters have been purged over the past two years in three states we had studied — Florida, Georgia, and North Carolina. A preliminary analysis supports our initial alarm over the purge processes in these three states, showing that they continued to have high purge rates.

Purges in and of themselves aren't bad. They're commonly used to clean up voter lists when someone has moved, passed away, and more. But too often, names identified for removal are determined by faulty criteria that wrongly

C228

5/25/2021

Florida, Georgia, North Carolina Still Purging Voters at High Rates | Brennan Center for Justice

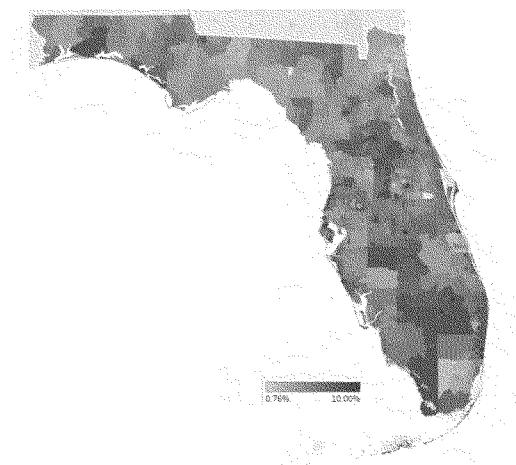

suggests a voter be deleted from the rolls. When flawed, the process threatens to silence eligible voters on Election Day — especially in states where purge rates are high.

**APPENDIX C****Florida**

From November 2008 to November 2010, the median purge rate in the Sunshine State was 0.2 percent. That number jumped to 3.6 percent from 2012 to 2014. And new data show it's jumped again: **Between December 2016 and September 2018, Florida has purged more than 7 percent of its voters.**

Not only can we tell that purges have increased — we also know where the biggest purges are happening. Hardee, Hendry, Palm Beach, and Okaloosa counties have each purged more than 10 percent of their voters in the last two years.

Dade and Broward counties also have a number of zip codes that purged at higher rates. Some of those zip codes, however, include military bases or college campuses, which one would expect to have higher purge rates because of the transient nature of the population and the established processes for removing voters who have moved.

**Purge Rates in Florida**

*\*Purge rates from December 2016 through September 2018. Source: Florida Board of Elections.*

**Georgia**

Between 2010 and 2014 — a period of time that covers before and after the Supreme Court's decision on the Voting Rights Act — Georgia's median purge rate increased from 6.7 percent to 10.7 percent. Our analysis of the

<https://www.brennancenter.org/our-work/analysis-opinion/florida-georgia-north-carolina-still-purging-voters-high-rates>

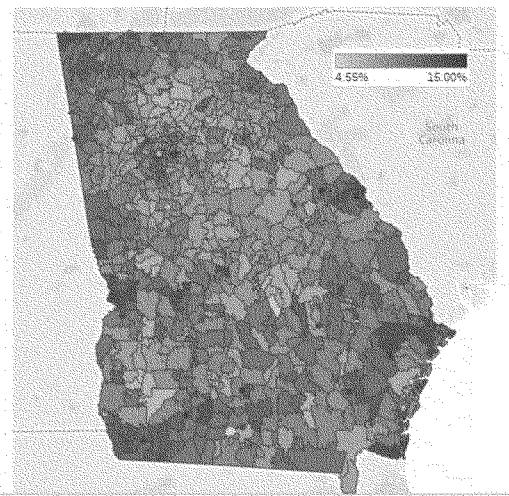

2/4

5/25/2021

Florida, Georgia, North Carolina Still Purging Voters at High Rates | Brennan Center for Justice

**APPENDIX C**data shows that the state continues to have a high purge rate: **Over the past two years, the state has purged****10.6 percent of voters.** Nonwhite voters were slightly overrepresented among those purged when compared to the total population breakdown.

Ninety-seven of the state's 159 counties purged more than 10 percent of their voters in the last two years. Four counties (Chattahoochee, Liberty, Dade, and Camden) are particular outliers, each purging at least 15 percent of their voters. At a more granular level, 430 of the 781 zip codes have purged more than 10 percent of their voters since 2016. This rebuts any speculation that the VRA's preclearance provision may have blocked reasonable list maintenance practices. "Catching up" might have seemed like an excusable reason for increased rates in the first purge cycle without pre-clearance (2014-2016), but Georgia's purge rates have not returned to pre-2013 levels in the five years since the decision was handed down.

**Purge Rates in Georgia**

\*Purge rates from September 7, 2016 through September 14, 2018. Source: Georgia Board of Elections.

**North Carolina**

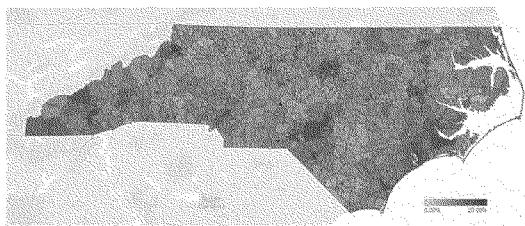

North Carolina's purge rates fall in between Florida and Georgia. Forty of its one hundred counties were covered under Section V of the Voting Rights Act at the time of the *Shelby County v. Holder* decision in 2013. The average purge rate in the state increased modestly between 2010 to 2014, from 8.0 to 8.8 percent. Like in Georgia and Florida, however, this didn't represent a temporary increase, but rather has been sustained over the past few

5/25/2021

Florida, Georgia, North Carolina Still Purging Voters at High Rates | Brennan Center for Justice

**APPENDIX C**

years. **Between September of 2016 and May of 2018 (the latest date data is available), the state purged 11 percent of its voter rolls.** Just 19 of its counties purged fewer than 10 percent of their voters, and no county purged fewer than 8 percent. These purges have been especially troubling for voters of color – in 90 out of 100 counties, voters of color were over-represented among the purged group.

**Purge Rates in North Carolina**

\*Purge rates from September 7, 2016 through September 14, 2018. Source: Georgia Board of Elections.

To voters living in these three states – and to voters around the country: Check your registration status to make sure that you're still on the rolls. If you are not registered, and think you should be, call your local election official and find out why. There is still time to register in many states if you have a problem.

**\*Correction:** This post originally said Harris County, Florida was one of the counties that had purged more than ten percent of its voters. In fact, it was Hardee County. There is no Harris County in Florida.

## What's the Matter with Georgia?

With early voting starting Monday, a range of efforts to restrict voting in the Peach State could cause big problems at the polls. We explain what's going on.

 **Rebecca Ayala**    **Jonathan Brater**

October 12, 2018

Reports that Georgia is keeping 53,000 voter registrations on hold because of minor discrepancies have received widespread attention since Monday. But in fact, the state has recently adopted a range of controversial voting practices. The combined effect is to put voters — especially racial minorities — at risk of disenfranchisement as the state's hotly contested governor's race approaches. Early voting begins Monday.

Below is a summary of the four major voting issues that have contributed to problems in the Peach State.

**"Exact Match" Policy:** In 2017, Georgia passed **legislation** requiring that information on voter registration forms match exactly with existing state records. Even a single digit or a misplaced hyphen could be enough to prevent registration and instead put the application on "pending" status. Georgia previously had a different version of this exact match process but **agreed in 2017** to discontinue the practice after civil rights groups brought suit — only to reinstate a different version of exact match later that year.

Reports **indicate** that approximately 53,000 people are now on pending status — and a vastly disproportionate number of them are African-American: seventy percent of the pending list, compared to 32 percent of the

5/25/2021

What's the Matter with Georgia? | Brennan Center for Justice

population. Civil rights groups filed a lawsuit against the policy Thursday.

**APPENDIX C**

What does being on pending status mean for voters? If they do not provide the additional information needed to resolve the discrepancies within 26 months, their pending registrations will be canceled. Importantly, voters who show up on Election Day *should be allowed to vote a regular ballot* by providing ID at the polls and thus should not give up on voting just because their status is pending; however, the requirement could cause confusion on Election Day if voters are wrongly given provisional ballots or given other misinformation. The ID requirement could also cause problems for voters trying to vote by absentee ballot. For those voters who do not cast ballots in 2018, they are at risk of removal prior to 2020 if they do not get off pending status within 26 months of registering.

**Aggressive Voter Purges:** A recent Brennan Center report on purges nationwide found Georgia to be one of the most aggressive purgers. Between the 2012 and 2016 elections, it purged 1.5 million voters — twice as many as in the 2008 and 2012 cycles. All but three of the state's 159 counties saw purge rates increase. And we recently released new data showing that the trend has continued over the past two years, during which the state has purged 10.6 percent of its voters.

Purge rates do not prove voters are being removed erroneously. But we also found that provisional ballots went up as the purge rate increased in Georgia, as well as in other jurisdictions that used to get extra scrutiny under the Voting Rights Act. This suggests more voters are showing up to the polls after having been purged because voters in those situations often get provisional ballots.

**Voter Registration Drives Restricted:** The governor's race — which pits Secretary of State Brian Kemp against former state legislator Stacey Abrams — also recalls a controversial episode involving the secretary of state's office and the New Georgia Project (NGP), a civic group founded by Abrams in 2013. Prior to the 2014 election, Kemp's office launched an investigation into voter registration forms submitted by NGP. After investigating approximately 87,000 forms, NGP was eventually cleared of wrongdoing — but not until after the group's voter registration drive was disrupted. The group filed a lawsuit against Kemp for failing to process approximately 40,000 voter registration forms submitted by the group. The lawsuit was dismissed in part because Kemp promised to ensure registration applications would be sent to counties.

Kemp, a Republican, was also criticized for political statements about voter registration drives. “[Y]ou know the Democrats are working hard, and all these stories about them, you know, registering all these minority voters that are out there and others that are sitting on the sidelines,” he said at the time. “If they can do that, they can win these elections in November.”

**Polling Place Closures:** Majority-black Randolph County, Georgia was sued for attempting to close seven of its nine polling sites. The county claimed a consultant had recommended the closures because of disability compliance issues. After a lawsuit, the county reversed course and kept the sites open.

The proposed polling place closures in a minority county were particularly concerning because in the past, similar tactics have been used to suppress minority votes. Prior to 2013, polling place changes in Georgia (and other areas with a history of discrimination) had to be precleared by the Department of Justice or a federal court to make sure they did not result in a rollback of minority voting rights. But after the Supreme Courts' 2013 *Sherby County* decision, that protection no longer exists.

### APPENDIX C

The competitive governor's race will strain Georgia's election system. Election officials should be transparent about what voters need to do to ensure their votes are counted – particularly those voters who are on pending status. If voters encounter problems, they can call 866-OUR-VOTE or go to 866OURVOTE.ORG to get help from Election Protection, a nonpartisan voter hotline.

## Voting Problems 2018

From purges to voter intimidation to machine snafus, voting issues have proliferated this cycle. A Brennan Center roundup.

Rebecca Ayala
November 5, 2018

As Election Day approaches, obstacles continue to make it difficult for eligible voters to cast a ballot. This year, voters in 24 states will have to navigate recently adopted laws that restrict voting access; in nine of those states, it will be harder to vote than it was in 2016. In addition to tracking these laws (and litigation and legislation affecting voting access), the Brennan Center has been tracking the full array of efforts nationwide to restrict access to voting. These efforts have been **more widespread and intense** than in any other election in recent memory. Below is a non-exhaustive list of recent efforts to restrict voting rights over the past three months, including actual and possible incidents of voter suppression. For a full summary of the new legal restrictions voters face this year, look [here](#).

**Voter Purges**

In the lead-up to this election, there has been a dramatic spike in voter purges, the often-flawed practice of cleaning up the voter rolls by deleting names of voters who may have moved or otherwise become ineligible. Done badly, purges can disenfranchise large numbers of eligible citizens. A Brennan Center report issued this summer found a 33 percent increase in purges nationwide over the past decade. In a number of states, purge practices were especially troubling:

**C235**

<https://www.brennancenter.org/our-work/analysis-opinion/voting-problems-2018>

1/9

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C****Increased purge rates in states previously covered by the pre-clearance provision of the Voting Rights Act:**

**Act:** Since 2012, states that had previously been subject to extra scrutiny under the federal Voting Rights Act because of a history of voting discrimination had much **higher purge rates** than other states; had they purged at the same rate as the rest of the country, 2 million fewer voters would have been purged between 2012 and 2016.

**Especially high purge rates in Southern States:** Between 2016 and 2018, the Brennan Center found Georgia, North Carolina, and Florida removed an unusually high number of names from their voter rolls. Both Georgia and North Carolina removed over 10 percent of registrations from their voter lists, and Florida removed more than 7 percent. Since 2015, Alabama election officials purged 658,000 voters, according to the state's chief election official; this number is dramatic given that the state had only 3.3 million registered voters in 2016.

**Indiana's problematic purge law:** After the 2016 election, Indiana passed a law that would require election officials to purge voters using the notoriously error-prone Crosscheck program developed by Kansas Secretary of State Kris Kobach, without offering voters the notice and waiting period required by federal law.

One study found Crosscheck would block 300 legal votes for every double vote prevented. The Brennan Center, on behalf of the NAACP and the League of Women Voters, challenged this practice in a lawsuit filed last year. Although not yet used, the law was in effect up through this summer, when the court blocked it. An appeal is currently pending.

**Other states have a history of problematic Crosscheck rules:** In the past, Maine and Alabama election officials had rules that allowed using Crosscheck to immediately purge voters without providing notice or a waiting period. The Brennan Center and partners sent letters to both states, and both said that they do not have plans to use the database at this time.

**Ohio law allows voter purges:** Ohio is enforcing a law that requires election officials to begin a purge process for voters who missed one election. The Supreme Court upheld the law against a legal challenge earlier this year. After plaintiffs filed an appeal on a narrower issue in the case, a court ordered Ohio election officials to count 2018 ballots from some of the voters who had been purged.

**New Yorkers continue to experience impact of 2016 purge:** During the September primary, some registered voters reported that they were not found on the voter rolls, had registrations wrongly transferred to new election districts, or were not given the right primary ballots for their party affiliation. This follows the notorious Brooklyn purge of the 2016 presidential election, during which 200,000 voters were improperly purged from the voter rolls.

**West Virginia voter list maintenance may have removed eligible voters:** Last month, Secretary of State Mac Warner reported election officials had removed more than 100,000 registrations from the voter rolls in the last two years. Some individuals reported issues confirming their registration status. After contacting counties throughout the state, we discovered election officials may have inconsistent methods of restoring the registrations of voters wrongly removed. It is unclear how this large removal will impact voters on Election Day.

**Georgia**

Voters in the state have continuously been subject to laws, policies, and legal action aimed at suppressing an individual's ability to cast a ballot. Secretary of State Brian Kemp has come under extensive criticism for his controversial actions contributing to voter suppression leading up to the 2018 election while running for governor. Here is a summary of recent suppressive actions in Georgia:

**"Exact match" problem:** Georgia is enforcing an unusual policy of holding up registrations of voters if their application information does not exactly match the information on other government records. Under this flawed policy, about 53,000 registrations are still "pending." Seventy percent of those applications being held are from African Americans. While those applicants can vote, they will experience additional obstacles. As a result of

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C**

a lawsuit filed by civil rights groups, those in "pending" status because the state was unable to verify their citizenship through this match process will be able to vote a regular ballot on Election Day by providing proof of citizenship at the polls.

**Threat to polling locations:** Earlier this year, a consultant recommended Randolph County, a majority black, rural county in South Georgia, close seven of the nine voting locations due to ADA compliance issues. In response, several organizations filed a lawsuit against the state and Secretary of State Brian Kemp. After significant public outcry, election officials rejected the proposal and fired the consultant.

**Absentee ballot rejections in Gwinnett County:** Election officials rejected an unusually high number of absentee ballots in Gwinnett County, 465 of which were for reasons including "mismatched" signatures, missing addresses, and incorrect birth years. In Georgia, the law requires county election officials to reject absentee ballots that have signatures that do not match the signature on file. As a result of a current lawsuit, county officials must now treat absentee ballots with mismatched signatures as provisional ballots and contact voters whose ballots have been flagged.

**Preventing access to the polls:** In Jefferson County, a senior center director, at the request of county clerks, ordered about 40 African American senior citizens off a bus that was transporting them to the polls during the early voting period. Despite being planned by a nonpartisan organization, county clerks claimed the event was "political activity," which is not allowed during a county-sponsored event (the senior center is operated by Jefferson County). Those voters were unable to vote that day.

**State election official exposes partisanship:** Secretary of State Brian Kemp stated at a public event that his gubernatorial opponent's voter registration effort "continues to concern us, especially if everybody uses and exercises their right to vote." This is an example of the impact Kemp believes widespread turnout will have on his campaign and provides evidence for how his perspective may influence his actions as secretary of state during the general election.

**Missing vote-by-mail applications:** Party officials reported 4,700 missing vote-by-mail applications in Dekalb County. Some officials involved stated that county officials would explain the situation to the thousands of voters, although this course of action has not been confirmed by the county elections board.

**Publicized security breach:** On November 3, reports of a failed cyberattack on the registration system in Georgia surfaced. Rather than try to fix the situation, Secretary Kemp announced he would launch an investigation into the Democratic Party of Georgia and contacted the FBI. The political party has strongly denied these allegations, and Kemp provided no evidence to substantiate his claim.

**North Carolina**

Voters in North Carolina continue to experience challenges this election season. Reports of misleading information, voter intimidation, controversial policies, and legal action have all made it more difficult to cast a ballot that counts.

**Restrictive and misleading constitutional amendments:** The state Legislature placed six constitutional amendments on the November ballot, including an amendment that would require voters to present photo ID at the polls and one that would give the state General Assembly the ability to appoint members of the election board. In writing these amendments, GOP lawmakers took over this responsibility from other state officials, some say with the intent to mislead voters.

**Decrease in early voting sites:** A North Carolina law created uniform early voting hours on weekdays. This new policy is expected to reduce the number of early voting sites by 20 percent when compared to the number open in 2014. For example, two of the five early voting sites in Gaston County have been closed, and Iredell County has cut half of its early voting sites.

C237

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C**

**Election officials attempted to remove voters:** Prior to this election season, county officials were able to process challenges made by voters in large batches that caused purge-like results. A judge permanently blocked this provision, and now election officials **must** give challenged voters a notice and waiting period, and must complete removals at least 90 days before federal elections.

**Release of misleading information:** Lt. Governor Dan Forest **released** a video funded by the NC Republic Council of State Committee titled *Voter Fraud 101* that gives instructions on how to commit voter fraud. This advertisement, originally released on Facebook, has since been determined to have targeted "North Carolinians interested in Donald Trump." Forest and others are clearly continuing to promote the myth of widespread voter fraud.

**Poll worker incident in Franklin County:** A poll worker was **removed** from an early voting site for allegedly intimidating black voters. This individual repeatedly asked several black voters to spell their names.

**Voter intimidation results in arrest:** In Mecklenburg County, three white individuals aggressively **confronted** a black polling place volunteer at a Steele Creek poll and made racial slurs toward him, as well as exposed a BB gun in a holster. The individual who exposed the BB gun is currently in custody and was charged with ethnic intimidation. In response, the local police department plans to devote more resources to monitoring polling places in Charlotte.

**Federal subpoenas burden election officials:** In August, counties in North Carolina were served with **subpoenas** issued by the U.S. Attorney's Office requesting voter records and ballots be turned over to U.S. Immigration and Customs Enforcement by September 25. The state officials determined that the response would be over 20 million pages and place a significant burden on county election officials in the months leading up to the election. On **September 6**, federal authorities decided to give counties until January to respond to this records request.

**Students**

Election officials in some states have made it difficult for a young voter to cast a ballot. Particularly, student voters in New Hampshire, Texas, Florida, and Michigan have been subject to suppressive policies leading up to the general election.

**Change to residency requirements impact voter registration:** New Hampshire enacted a law last year that makes it more onerous for voters to establish that they are "domiciled" in the state for purposes of registering to vote. A judge briefly **blocked** the state from implementing this law prior to the upcoming election. But the state Supreme Court ordered the law to stay in effect until after the November 6 election.

**Registration confusion and few early voting sites:** At Prairie View A&M University, a historically black university in Texas, students were instructed to use one of two university building addresses for their registration applications in the absence of individual mailboxes. In **October**, reports emerged that some students would have to fill out change-of-address forms on Election Day. After public opposition, state officials **announced** students would not need to fill out the form on Election Day. Despite this victory, state officials continue to make it difficult for Texas students to vote. County election officials failed to provide an early voting location on campus or in Prairie View City for part of the early voting period. As a result, civil rights organizations filed a **lawsuit** against Waller County and claim this lack of resources disenfranchises African American voters. County commissioners **decided** to extend early voting hours and dates shortly after the lawsuit was filed.

**Limited early voting site operation prevents students from voting:** In San Marcos, Texas State University's temporary early voting site was only open for three days, as opposed to the two weeks before Election Day that most polling places in the state are open. Long lines prevented some from casting a ballot, and with the only other polling site miles away, students decided to **call** county stakeholders and request the polling location

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C**

be reopened. On October 26, reports surfaced that a local GOP president sent an email to groups urging them to contact county commissioners and request they not extend voting times for students at this location because extensions would "favor the Democrats."

**Early voting sites not allowed on campus in Florida:** Prior to this year, Secretary of State Ken Detzner stated local election officials could not hold early voting on public college campuses. In July 2018, however, a federal judge in Florida **blocked** the state's "blanket ban" and ordered the state to allow local officials to site early voting locations on campuses.

**First-time voter election policies impact Michigan voters:** Students at the University of Michigan and Michigan State University **filed a lawsuit** claiming a 20-year-old state voting law that requires some first-time voters to cast a ballot in person and mandates a voter's registration address match the one on their driver's license, violates the First and 26<sup>th</sup>Amendment. The case is currently pending.

**Online Vote Suppression**

This election cycle has seen an increase in the use of online social media platforms to suppress the vote. In recent weeks, we have heard reports of both foreign and domestic entities involved in this form of voter suppression.

**Russian organization used social media to incite conflict:** In Virginia, Elena Khusaynova, has been charged with conspiracy to defraud the United States by interfering in the 2018 election through "Project Lakhta," which published misinformation online on political issues and created fake social media profiles on multiple social media platforms. The accounts incited conflict on several political issues, and at times promoted opposing viewpoints. These social media accounts reached over one million people. Yevgeniy Prigozhin, associate of President Vladimir Putin, funded Khusaynova. The U.S. attorney's office in the Eastern District of Virginia and the Justice Department are prosecuting the case.

**Fake Tweets spread false information about voting sites:** Twitter suspended 1,500 accounts associated with a right-wing internet trolling campaign. The accounts posed as liberal activists and spread false information about the midterms, such as tweeting the incorrect date of the upcoming election: "Get out and vote Nov 7<sup>th</sup>! #BlueTsunami2018..."

**Facebook political ads are spreading misinformation:** According to this news outlet, a partisan organization has placed political ads on Facebook with misleading information on candidates. The organization behind the ads has a purposefully nonpartisan sounding name.

**Misleading Information**

Another form of voter suppression includes the communication of false information to voters. Registered voters in Pennsylvania, Illinois, New Jersey, and Texas have been subjected to information that may prevent them from casting a ballot on Election Day.

**Incorrect polling address information sent to voters in Pennsylvania:** Following the change of 33 polling places in Allegheny County, the county election officials sent letters to voters with polling location address errors. The officials have since sent corrected letters.

**Mailer includes inaccurate information regarding voter ID in Illinois:** Kendall County Clerk Debbie Gillette sent out a mailer to voters that indicated they would have to "present identification to the election judge" at the polls. In response, the ACLU of Illinois sent a letter to the county clerk indicating the need to correct the misleading voter ID instructions, and county officials removed the misleading information from the county's website. Voters do not have to present ID to ~~cast~~ a ballot in November.

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C**

**In New Jersey, misleading mail-in ballot information sent to voters:** County clerks sent letters to voters with inaccurate information regarding mail-in ballot protocol. The governor later corrected the information and the Department of State sent a memo to officials to clarify the law.

**Voters sent false ballot information in Missouri:** Ten thousand voters received incorrect absentee ballot due date information from the Missouri Republican Party. The postcards claim absentee ballots were due one week before the true deadline. Voters who received these mailers have been directed to the Secretary of State's website and webpage by the RNC.

- In addition, a state court in Missouri ordered the state to stop disseminating misleading information suggesting that voters without photo ID would not be able to vote.
- Similarly, state courts in Iowa prohibited the state from advertising that voters would need certain ID to vote in this year's election.

**Montana voters received incorrect absentee ballot information:** A political party sent mailers to voters that contained incorrect absentee ballot return date information. Party members later admitted the mistake and are contacting voters by phone and mail to clarify.

**In New York, a candidate sent a mailer with inaccurate information:** According to this news source, the mailer contained the wrong absentee ballot deadline. The campaign later admitted the mistake and sent mailers with the correct information.

**Ohio voters received mailers with false information:** A political party sent voters mailers that incorrectly stated a voter's ability to return a completed absentee ballot at the polls on Election Day. A party representative stated they will encourage voters to return completed absentee ballots ahead of the election because voters will have to cast a provisional ballot if they bring a completed absentee ballot to the polls.

**Language Access**

Voters should have access to voting materials and translators in their preferred language to ensure they are able to cast a ballot. However, counties in Texas and Florida did make adequate materials accessible to, in this case, Spanish speakers in the months leading up to the 2018 election.

**Inadequate online Spanish translations in Texas:** After determining 36 county websites lacked sufficient Spanish language resources, the ACLU sent notice letters to county officials. Many counties responded positively and are working toward making their websites more accessible to Spanish speakers.

**Lack of Spanish language materials in Florida:** In the aftermath of Hurricane Maria, thousands of Puerto Ricans who moved to Florida may not have been able to exercise their right to vote without Spanish-language voting materials. To ensure these potential voters had all necessary resources, voting rights groups filed a lawsuit against state officials in order to compel the state to provide Spanish-language materials. A court ruled the counties must print and provide the Spanish-language voting materials in time for the November election. The case is ongoing on other claims.

**Registration and Identification Issues**

In several states, state and election officials have implemented restrictive registration and identification policies or did not approve applications. These policies and actions effectively disenfranchise voters and may prevent thousands from casting a ballot this November.

**C240**

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C**

**Voter ID law impacts Native Americans in North Dakota:** In 2017, North Dakota enacted a new voter ID law.

Among other things, the law requires voters to present an ID that includes a residential street address to vote. This law would disproportionately impact Native American communities within the state because many members of these communities do not have street addresses. The Native American Rights Fund filed a lawsuit seeking to block the law, and a federal district court blocked the residential street address requirement. A Court of Appeals panel halted the district court's order, and the U.S. Supreme Court upheld that ruling. In a final effort to relieve voters from this requirement, the Spirit Lake Tribe filed a lawsuit in district court, seeking to block the application of the residential street address requirement to Native Americans living on reservations, but a judge denied the request. It is estimated that 5,000 Native American voters will need to obtain qualifying ID before Election Day.

**Kris Kobach enforced law that disenfranchised thousands of voters:** Kansas Secretary of State Kris Kobach's enforcement of a proof-of-citizenship law denied more than 35,000 potential voters from registering and casting a ballot in the lead up to the 2016 election. The law was struck down this past June after a judge found the law violated the National Voter Registration Act and the U.S. Constitution.

**State officials reject online registrations in Texas:** Days before the registration deadline, officials rejected 2,400 online registrations submitted by Vote.org due to online signature issues, according to Vote.org. The organization quickly changed their online registration process. Although state officials have determined these registrations invalid, county officials in Travis decided to accept about 800 registration applications from the organization.

**State official in Arizona failed to contact voters to confirm address:** Civil rights organizations filed a lawsuit after learning Secretary of State Michele Reagan failed to update addresses of over 500,000 registrations. U.S. District Judge James Teilborg rejected a request to send address update mailers to voters.

**Voter ID law challenged in Missouri:** Priorities USA filed a lawsuit in June 2018 against the state that challenged a voter ID law. The judge struck down part of the law that required voters without ID to sign a confusing affidavit and prohibited state officials from disseminating misleading identification information about the ID law.

**In Arkansas, voter ID law in effect during the 2018 election:** In 2017, Arkansas passed a new voter ID law. A voter filed a lawsuit claiming the law violated the state constitution, but the state Supreme Court allowed the law to go into place. Voters will have to comply with the identification requirement during the general election.

**High voter registration form rejection rate in Tennessee:** This October, the Tennessee Black Voter Project filed a lawsuit after 55 percent of registration applications from the organization's voter drive were identified as invalid. The organization believed the Shelby County Election Commission identified applications as incomplete for a variety of fairly minor reasons. An initial court ruling required county election officials give voters the opportunity to update any deficiencies in their application on Election Day. Following an appeal, the Tennessee Court of Appeals ordered voters whose applications were rejected must vote a provisional ballot and will not get the opportunity to update any deficiencies in their application on Election Day.

**Computer glitch in Maryland impacted thousands of voters:** The Maryland Motor Vehicle Administration failed to send changes voters made in their address and party affiliation to the state elections board due to a computer error. As a result, an estimated 80,000 voters were impacted by the computer glitch and had to cast provisional ballots in the June primary election. In response, state officials sent emails to a majority of those affected to ensure their registration was up-to-date.

**Voter Challenges/Intimidation**

Another form of voter suppression are voter challenges, which occur when an individual challenges another's registration status. In addition to this suppressive tactic, voters are at times subject to outright intimidation that can prevent them from safely casting their vote. **C241**

5/25/2021

Voting Problems 2018 | Brennan Center for Justice

**APPENDIX C**

**Reports of intimidating flyers in Wisconsin:** Individuals in Milwaukee reported receiving flyers that stated Immigration and Customs Enforcement would be at polling locations. ICE proved these flyers contained false information: "ICE does not patrol or conduct enforcement at polling locations. Any flyers or advertisements claiming otherwise are false."

**Challenges to registrations in Texas result in suspensions:** County Tax Assessor-Collector Ann Harris Bennett prematurely placed 1,735 voters on a suspension list as a result of a challenge of 4,000 registrations in July. According to this statement, the Republican Party ballot security committee chairman "involved using Republicans he appoints to the Ballot Board to review provisional ballots resulting from suspended voting statuses." HarrisBennett claimed that the premature suspensions resulted from a computer glitch and that the problem has been fixed.

**Extreme levels of voter intimidation in Texas:** In Dallas County, voters have reported incidents of voter intimidation. At three polling sites, voters have been subjected to electioneering, harassment, and intimidation from individuals outside the polls. One election official stated this level of voter intimidation is rather extreme: "I've been here for 30 years, and this harassment that's going on, I haven't ever seen the likes of this."

**Voter challenges leave some 'fearful' in Colorado:** Earlier this year, voters subjected to challenges reported intense investigation efforts that left many in the community fearful. Although Secretary of State Suzanne Staiert has declared four individuals' registrations valid, she has asked the U.S. Attorney's office to investigate.

**Candidate accused of voter intimidation in Hawaii:** Voters in House District 30 filed a lawsuit in Hawaii Supreme Court against State Rep. Romy Cachola, who they claimed engaged in voter fraud, coercion, and intimidation during the primary election. On August 31, the Hawaii Supreme Court dismissed the case.

**Polling Places**

For in-person voting, it is essential that registered voters be able to access polling locations. However, poll closures and natural disasters at times make it difficult for voters to cast a ballot on Election Day.

**Single polling place moved for a city in Kansas:** In Dodge City, part of Ford County, Kansas, election officials have moved the one polling site in a city of 27,000 residents, a majority of whom are Hispanic, to outside the city limits and one mile away from the nearest bus stop. Civil rights organizations filed a lawsuit against the county in order to open another polling site in the city. This follows months of contact and letters between civil rights organizations and county officials. Ford County Clerk Debbie Cox forwarded one such message to Bryan Caskey, the Kansas Director of Elections, with a dismissive message, "This is what I got in the mail from ACLU. LOL." This lawsuit is currently pending. However, a monitor from the U.S. Attorney's office will observe the election. Recent reports from newly registered voters indicate county officials are sending official certificates that contain the incorrect polling address.

ANALYSIS

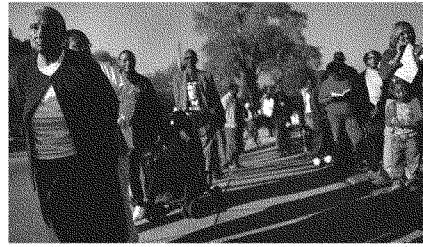

# When It Comes to Voter Suppression, Don't Forget About Alabama

A state with a long and troubling voting rights history deserves scrutiny.

Peter Dunphy

November 5, 2018

**Georgia and North Dakota** have gotten a lot of attention for vote suppression this season. But Alabama, a state with a long and troubling voting rights history, deserves scrutiny of its own.

C244

5/26/2021

When It Comes to Voter Suppression, Don't Forget About Alabama | Brennan Center for Justice

**APPENDIX C**

Alabama was where African American citizens marching across the Edmund Pettus Bridge were brutalized, providing the final spark for the Voting Rights Act. It's also the home of Shelby County, which in 2013 brought down the landmark civil rights law's core provision in a lawsuit that made it to the Supreme Court.

That provision required Alabama to seek federal approval before instituting any voting-related change to make sure it was not discriminatory. While the law was in effect, the U.S. Department of Justice **blocked** more than 80 proposed voting changes in the state of Alabama.

It should not be surprising then that Alabama continues to be a hotbed of voting restrictions. Here are six ways that the state has erected voting barriers:

**Strict voter ID law:** Alabama passed a strict voter ID requirement in 2011, but it did not go into effect until 2014. In 2011, the state was still required under the Voting Rights Act to get federal approval before implementing any changes to its voting rules. State officials did not even submit the new ID law for federal review at that time, likely because the Department of Justice had previously blocked similar requirements five separate times, finding them discriminatory. Alabama officials only put the law into effect in 2013, right after the Supreme Court gutted the Voting Rights Act provision that was holding it up.

Under Alabama's new law, voters need to show one of a limited number of state-issued photo IDs to vote either at the polls or absentee. (The only exception is if two election officials at the polls positively identify you.) More than 100,000 Alabamians do not have IDs acceptable under this law, according to a lawsuit filed by the NAACP Legal Defense Fund.

For low-income and rural voters, it is especially difficult to overcome this obstacle. A 2012 Brennan Center for Justice **report** found that close to a quarter of eligible voters *both* live 10 miles from an ID-issuing office and do not own a car. Making matters worse, Alabama invests no public money in transportation and ranks 48<sup>th</sup> nationwide in intercity transit for rural residents.

The problem intensified in October 2015 when officials announced a plan to close 31 ID-issuing offices to save costs. **Research** by the Brennan Center at the time found that the move would have a strong disparate impact on the black community: ID-issuing offices would be closed in all six counties in which African Americans compose over 70 percent of the population, while 40 offices would remain open in the 55 Alabama counties in which whites compose over half the population. Facing mountain

C245

5/26/2021

When It Comes to Voter Suppression, Don't Forget About Alabama | Brennan Center for Justice

**APPENDIX C**

public condemnation and an intervention by the U.S. Department of Transportation, Alabama scrapped the plan.

**Documentary proof of citizenship:** Alabama is one of only four states that has passed a law requiring individuals to produce documentary proof of citizenship when registering to vote. (In the rest of the country, a sworn statement suffices.) The law is currently not in effect because of an ongoing federal lawsuit that has partially blocked its implementation. But if the state is allowed to proceed with the requirement, it will burden tens of thousands of Alabama voters. In Kansas, which has implemented a similar requirement, tens of thousands of attempted registrants had their applications denied, totaling between 8 and 14 percent of all new registration applications, within the first year of its operation. (Almost all those applicants turned out to be eligible citizens.) Nationally, at least 7 percent of the citizen voting-age population, around 13 million people, does not have ready access to citizenship documents.

**Gerrymandering:** Just 3 years ago, Alabama was found by the U.S. Supreme Court to have engaged in unacceptable racial gerrymandering when drawing its state legislative maps. Those discriminatory maps will not be in effect for this election, but it took almost the whole decade to change them. The groups who had challenged the maps complained that the state had packed African American voters into a small number of districts so as to dilute their voting power. (One way Alabama managed to so effectively gerrymander was through its innovative use of computer software to map racial communities to a tee; indeed, the state made history by becoming the first state to use the online mapping software GIS to gerrymander with extreme precision.)

**Antiquated voter registration:** According to the U.S. Census Bureau, Alabama is in the bottom third of states in voter registration rates, with only 69 percent of voting-age citizens registered to vote. Secretary of State John Merrill has boasted on multiple occasions that Alabama has record-breaking registration rates — even at one point suggesting a 99 percent registration rate — but that is not supported by the facts.

One reason for these low rates is that Alabama has lagged in modernizing its voter registration system. Unlike many other states, the state lacks automatic voter registration or even electronic voter registration at DMV offices, Election Day registration, or preregistration for 16- and 17-year-olds. (Alabama is also one of the shrinking number of states that still does not offer early voting, which is extremely popular in neighboring states Georgia, Tennessee, and Florida.) At the same time, the state has aggressively purged voters from its rolls, removing as many as 658,000 voters from registration lists since 2015, according to the secretary of state.<sup>246</sup>

5/26/2021

When It Comes to Voter Suppression, Don't Forget About Alabama | Brennan Center for Justice

**APPENDIX C**

To be fair, the state has started moving into the digital age. In February 2016, Secretary of State John Merrill **made** Alabama the 32<sup>nd</sup> state to launch online voter registration. In the nine months between the launch and the November 2016 election, the state **received** 184,230 new voter registration applications through the online portal. Alabama also uses the Electronic Registration Information Center ("ERIC") to send mailings to eligible-but-unregistered voters, which the secretary of state's office credited with boosting registration.

**Polling place closures:** A 2016 report found that in a sampling of 18 Alabama counties, 12 had closed a combined 66 polling places since the *Shelby County* ruling. The alarming rate of poll closures often occur without notice or transparency.

Polling place closures are often clumped in communities of color. For example, In 2016, the city council of Daphne, a suburb of Mobile, **decided** to shrink the number of polling places in the town from five to two. The three polling places slated to be closed had historically been used by the African American residents of Daphne, while the sites predominantly used by the city's white residents remained unaffected.

**Voting rights for those with former felony convictions:** In 2017, Governor Kay Ivey signed a law that restored voting rights to many with previous felony convictions, affecting close to 60,000 Alabamians. Despite the gravity of the change, Secretary of State John Merrill reportedly **refused** to publicize the new policy or inform people who had been re-enfranchised, telling reporters, "I'm not going to spend state resources dedicated to notifying a small percentage of individuals." Merrill also said incorrectly that eligibility to register was dependent on paying off all outstanding fees and fines, though he later **clarified**. This combination of a lack of public education alongside misinformation contributed to the **faulty rollout** of the re-enfranchisement policy.

Despite these challenges, voters should not be deterred. Advocates, public officials, and campaigns have mobilized to protect the vote. If voters encounter problems, they can call 866-OUR-VOTE or go to 866OURVOTE.ORG to get help from Election Protection, a nonpartisan voter hotline. If you are an eligible citizen, you have the right to vote!

# Thwarting Amendment 4

New analysis shows that Florida legislation will disproportionately affect African Americans

By Kevin Morris PUBLISHED MAY 9 2019

## Summary

Just months after Floridians approved an amendment to their state's constitution to restore voting rights to 1.4 million people with felony convictions, the Legislature has passed a bill that weakens the impact of the ballot measure by limiting who is eligible to vote. Amendment Four was approved by 65 percent of voters in November and enjoyed broad bipartisan support. And it was working. The analysis below demonstrates that:

- Nearly 100 times more formerly incarcerated Floridians registered in the first three months of 2019 than in previous odd years.
- Of the formerly incarcerated Floridians who registered to vote between January and March of this year, more than 44 percent identified themselves in

their voter registration forms as Black, whereas Black voters comprise 13 percent of Florida's overall voter population.

- The average income of the formerly incarcerated Floridians who registered to vote between January and March is nearly \$15,000 below that of the average Florida voter.

There can be no mistaking the racial and class implications of this regressive new legislation.

## Background

---

**Florida's longstanding policy of permanent disenfranchisement** had enormous implications for racial and economic justice in one of the largest states in the country. More than four in ten individuals released from prison over the past few years were Black, and people who live in minority and low-income communities are vastly overrepresented among those caught up in the criminal justice system. Amendment 4 promised to address this.

But on May 3, lawmakers passed a bill requiring Floridians to pay back all fees, fines, and restitution imposed as part of a sentence for a felony conviction – even those that a judge has converted to civil obligations – before they can register to vote. For some, these outstanding balances run to tens of thousands of dollars, thus making it virtually impossible for these individuals to register.

## Analysis

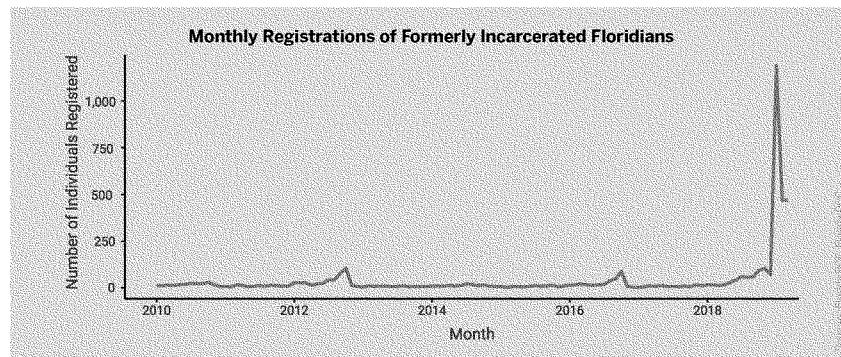

---

By looking at voter registration data since Amendment 4 went into effect, we can see that Black and low-income returning citizens are dramatically impacted by this new legislation. Using data from Florida's Department of Corrections and the Board of Elections, we are able to identify Floridians who have come home from prison and registered to vote. To be clear, this analysis includes only a slice of the population enfranchised by Amendment 4: those individuals released from prison since 1992. Our analysis does not include individuals who were sentenced to felony probation (because Florida does not maintain statewide data for this population), though many Floridians sentenced to probation likely also registered to vote during the first quarter of 2019. Nonetheless, this data provides an early indication as to the racial and income-level impact that Florida's new legislation will have.

Before this year, Floridians convicted of felonies had to receive individual pardons from the government in order to register to vote. Very few of these pardons were granted.

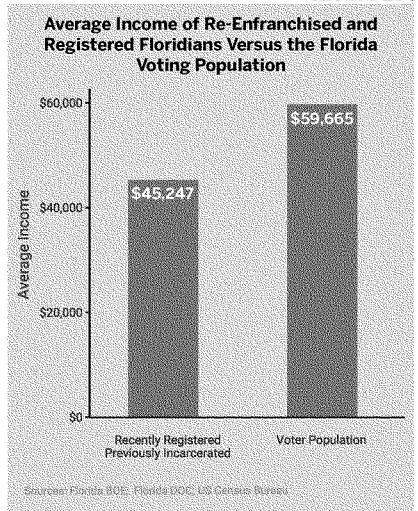

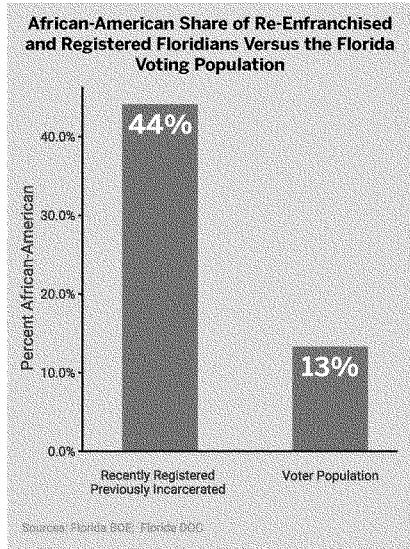

Between January 2011 and April 2018, just 3,000 individuals received them. Unsurprisingly, very few formerly incarcerated Floridians registered to vote between 2010 and 2018 — on average, fewer than 250 per year during that nine-year period.

Amendment 4 went into effect on January 8, 2019, re-enfranchising most Floridians who had completed all the terms of their sentence. Many re-entry groups in Florida took advantage of the policy change and immediately launched voter registration drives. As the chart below makes clear, these drives were tremendously successful: In January, February, and March – months in which voter registrations are usually very low – more than 2,000 formerly incarcerated Floridians registered to vote. That's roughly ten times the *annual* average number of registrations for returning citizens in the preceding nine years and 99 times the average for the first three months in 2017 and 2015 (recent years without a general election).

## APPENDIX C

Using information in the state voter file, we know not just how many individuals registered but also some of their demographics. Of the formerly incarcerated Floridians who registered to vote between January and March, more than 44 percent self-identified as Black. By contrast, just 13 percent of all Floridians registered to vote are Black.

The impacts of the criminal justice system fall heavily on lower-income and minority communities. Felony disenfranchisement policies, by extension, disproportionately strip these communities of their political power.

Using census data, we can also estimate the socioeconomic characteristics of the electorate.<sup>1</sup> We found that formerly incarcerated Floridians who registered to vote in the first quarter of 2019 tended to be much lower income, have less college education, and come from neighborhoods with higher unemployment than the rest of the state's voters. In fact, the average income for a formerly incarcerated, newly registered Floridian is nearly \$15,000 below the statewide average.

<sup>1</sup> We used census block group data as a proxy for individual-level data, a common method in the social sciences when individual-level data is unavailable. In this analysis, we assume that each registrant's income is equal to the median income of their census block group. It is important to note that this likely *understates* the income discrepancy between recently re-enfranchised individuals and the rest of the electorate. Individuals who have been to prison likely have lower incomes than those of their neighbors, which means that median block group numbers systematically overestimate income for returning citizens.

## Voter Purge Rates Remain High, Analysis Finds

New data reveal that counties with a history of voter discrimination have continued purging people from the rolls at elevated rates.

Kevin Morris
LAST UPDATED: August 21, 2019  
PUBLISHED: August 1, 2019

Using data released by the federal Election Assistance Commission (EAC) in June, a new Brennan Center analysis has found that between 2016 and 2018, counties with a history of voter discrimination have continued purging people from the rolls at much higher rates than other counties.

This phenomenon began after the Supreme Court's 2013 ruling in *Shelby County v. Holder*, a decision that severely weakened the protections of the Voting Rights Act of 1965. The Brennan Center first identified this troubling voter purge trend in a [major report](#) released in July 2018.

Before the *Shelby County* decision, Section 5 of the Voting Rights Act required jurisdictions with a history of discrimination to submit proposed changes in voting procedures to the Department of Justice or a federal court for approval, a process known as "preclearance."

After analyzing the 2019 EAC data, we found:

C253

<https://www.brennancenter.org/our-work/analysis-opinion/voter-purge-rates-remain-high-analysis-finds>

1/6

5/25/2021

Voter Purge Rates Remain High, Analysis Finds | Brennan Center for Justice

**APPENDIX C**

At least 17 million voters were purged nationwide between 2016 and 2018, similar to the number we saw between 2014 and 2016, but considerably higher than we saw between 2006 and 2008; The median purge rate over the 2016–2018 period in jurisdictions previously subject to preclearance was 40 percent higher than the purge rate in jurisdictions that were not covered by Section 5 of the Voting Rights Act; If purge rates in the counties that were covered by Section 5 were the same as the rates in non-Section 5 counties, as many as 1.1 million fewer individuals would have been removed from voter rolls between 2016 and 2018

To be clear, we report the total numbers of voters removed by a county for any reason. Election officials purge voters they believe are ineligible for a variety of reasons, including death and moving outside the jurisdiction. This analysis does not assess how many voters were improperly purged.

**Methodology**

Every two years, the EAC administers a survey to election officials around the country known as the Election Administration and Voting Survey (EAVS). The survey includes a host of questions about the state of voter registration in the jurisdiction and the experience of the most recent federal election. Jurisdictions are requested to report on information including how many new registrations occurred between the federal elections, the number of ballots cast on election day, and the number of polling sites that were open on election day. The jurisdictions are also asked to report how many voters were removed from the registration rolls — or “purged” — over the two-year period that preceded the most recent federal election. These data formed the backbone of our statistical analysis in last year’s report, and we use them again here.

All election jurisdictions in the country are asked to respond to the EAVS survey every two years, but in 2018, some in Alabama and Texas did not report their purge numbers. Although this makes the data less than ideal, the EAC survey remains the best source for nationwide information on voter purges.

We calculate purge rates as the number of voters removed between 2016 and 2018 divided by the sum of total voters registered as of the 2018 election and the number removed. In other words,

$$\text{Purge Rate} = \frac{\text{Number Purged}}{\text{Number Purged} + \text{Total Number Registered in 2018}}$$

As with our report last year, we report the median purge rate when discussing aggregate purge rates. We use the median because of the nature of the data: using the *mean* purge rate would leave our analysis more susceptible to outliers.

**Why Purges Can Be Problematic**

To be sure, there are many good reasons for a voter to be purged. For instance, if a voter moves from Georgia to New York, they are no longer eligible to cast a ballot in the Peach State. As such, they should be removed from Georgia’s voter rolls. Similarly, voters who have passed away should be removed from the rolls. Reasonable voter list maintenance ensures voter rolls remain up to date.<sup>C254</sup>

5/25/2021

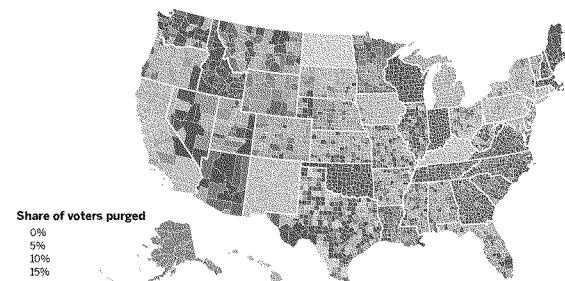

Voter Purge Rates Remain High, Analysis Finds | Brennan Center for Justice

**APPENDIX C**

Problems arise when states remove voters who are still eligible to vote. States rely on faulty data that purport to show that a voter has moved to another state. Oftentimes, these data get people mixed up. In big states like California and Texas, multiple individuals can have the same name and date of birth, making it hard to be sure that the right voter is being purged when perfect data are unavailable. Troublingly, minority voters are more likely to share names than white voters, potentially exposing them to a greater risk of being purged. Voters often do not realize they have been purged until they try to cast a ballot on Election Day — after it's already too late. If those voters live in a state without election day registration, they are often prevented from participating in that election.

**Approximately 17 Million Purged Between 2016 and 2018**

The map below shows the purge rates for the counties that reported their information to the EAC. Some counties did not report their information. Because North Dakota does not have voter registration, it does not have a voter purge rate. Therefore, the state is grayed out below to mirror the non-reporting jurisdictions in Texas and Alabama.

**Purge Rate, 2016–18**

**Notes:**  
Data in the following states are aggregated here  
to the county-level but are reported at the  
sub-county level: CT, MA, ME, NH, RI, VT, and WI.  
North Dakota does not have voter registration.

**Source:** EAVS

In our report last year, we noted that 16 million voters were purged between the federal elections of 2014 and 2016, and that this was almost 4 million more names purged from the rolls than between 2006 and 2008.

The latest data from the EAC shows that between the presidential election in 2016 and the 2018 midterms, more than 17 million voters were purged. While this number is higher than what we reported last year, it is likely due to the fact that more jurisdictions reported their data in 2018, pushing the reported total higher. As the figure below demonstrates, the median purge rate among counties that consistently report their data has remained largely the same.

**C255**

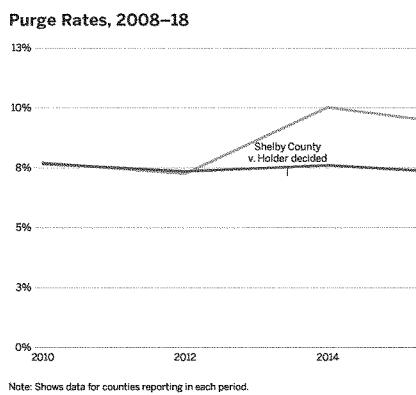

5/25/2021

Voter Purge Rates Remain High, Analysis Finds | Brennan Center for Justice

**Purge Rates in Section 5 Jurisdictions Continue to Be Higher****APPENDIX C**

Prior to *Shelby County*, jurisdictions covered under Section 5 of the Voting Rights Act collectively had purge rates right in line with the rest of the country. A major finding in last year's report was that jurisdictions that used to have federal oversight over their election practices began to purge more voters after they no longer had to preclear proposed election changes. The 2016–2018 EAC data shows a slightly wider gap in purge rates between the formerly covered jurisdictions and the rest of the country than existed between 2014 and 2016.

This is of particular interest because this continued — and even widening — gap debunks possible claims that certain states would experience a one-time jump when free of federal oversight, but then return to rates in line with the rest of the country. They haven't.

The median purge rate across the country in counties that were never covered by Section 5 of the Voting Rights Act decreased slightly between 2016 and 2018. In contrast, the purge rates ticked up in parts of the country that were covered at the time of the *Shelby County* decision. We found sustained higher purge rates in parts of the country that have a demonstrated history of discrimination in voting. If these formerly covered jurisdictions that reported their data each year had purged voters at rates consistent with the rest of the country — which they did before the *Shelby County* decision — they would have purged 1.1 million fewer voters between 2016 and 2018. In our report last year, we noted that *Shelby County* was likely responsible for the purge of 2 million voters over four years in these counties. The effect of the Supreme Court's 2013 decision has not abated.

**Next Steps****C256**

<https://www.brennancenter.org/our-work/analysis-opinion/voter-purge-rates-remain-high-analysis-finds>

4/6

5/25/2021

Voter Purge Rates Remain High, Analysis Finds | Brennan Center for Justice

**APPENDIX C**

As the country prepares for the 2020 election, election administrators should take steps to ensure that every eligible American can cast a ballot next November. Election administrators must be transparent about how they are deciding what names to remove from the rolls. They must be diligent in their efforts to avoid erroneously purging voters. And they should push for reforms like automatic voter registration and election day registration, which keep voters' registration records up to date.

Election day is often too late to discover that a person has been wrongfully purged.

**Editor's note:** An earlier version of this analysis reported aggregated statewide purge rates. We have since learned that at least one state self-reported the data in a way that complicates a statewide aggregation. As such, we are no longer reporting any statewide numbers. That does not change the number of people the counties self-reported as removing.

### **New Voting Restrictions in America**

After the 2010 election, state lawmakers nationwide started introducing hundreds of harsh measures making it harder to vote. The new laws range from strict photo ID requirements to early voting cutbacks to registration restrictions.

Overall, 25 states have put in place new restrictions since then — 15 states have more restrictive voter ID laws in place (including six states with strict photo ID requirements), 12 have laws making it harder for citizens to register (and stay registered), ten made it more difficult to vote early or absentee, and three took action to make it harder to restore voting rights for people with past criminal convictions.

In 2016, 14 states had new voting restrictions in place for the first time in a presidential election. Those 14 states were: Alabama, Arizona, Indiana, Kansas, Mississippi, Nebraska, New Hampshire, Ohio, Rhode Island, South Carolina, Tennessee, Texas, Virginia, and Wisconsin.

In 2017, legislatures in Arkansas and in North Dakota passed voter ID bills, which governors in each state signed, and Missouri implemented a restrictive law that was passed by ballot initiative in 2016. (Texas also passed a new voter ID law, though its earlier strict voter ID law was partially in effect in 2016.) Georgia, Iowa, Indiana, and New Hampshire also enacted restrictions last year, in addition to laws that were on the books for previous elections.

In 2018, Arkansas, Indiana, Montana, New Hampshire, North Carolina, and Wisconsin enacted new restrictions.

In 2019, Arizona, Florida, Indiana, Tennessee, and Texas have enacted new restrictions.

This page details the new restrictive voting requirements put in place over the last several years.

[Click here](#) for an interactive version of this page.

*Updated as of November 18, 2019.*

## Alabama

**New restriction(s) in place in the first time in 2016:** Photo ID required to vote.

*Click [here](#) to see the types of ID required under Alabama's law.*

**Background:** Passed in 2011 by a Republican-controlled legislature and signed by a GOP governor, the photo ID law initially required pre-clearance under Section 5 of the Voting Rights Act. But the measure was allowed to go into effect after the U.S. Supreme Court gutted that provision in 2013.

Alabama also passed a law in 2011 requiring voters to provide documentary proof of citizenship when registering to vote. That requirement had been on hold, but in January 2016, the Election Assistance Commission's Executive Director announced that documentary proof of citizenship would be added to the national voter registration form instructions for Alabama. A federal appeals court blocked the registration requirement on September 9, 2016. It is subject to ongoing litigation.

## Arizona

**New restrictions enacted in 2019:** Restrictions on access to emergency early and absentee voting and extension of voter ID requirements to early voting.

**New restriction(s) in place for the first time in 2016:** Limitations on mail-in ballot collection.

**Background:** In 2016, a Republican-controlled legislature passed a bill limiting collection of mail-in ballots and making it a felony to knowingly collect and turn in another voter's completed ballot, even with that voter's permission (the law has exceptions for direct family members, caregivers, and postal-service employees). Gov. Doug Ducey (R) signed the bill, which went into effect in the summer of 2016.

**Other restrictions in play:** In 2004, voters approved a referendum requiring documentary proof of citizenship to register to vote. In June 2013, the U.S. Supreme Court invalidated this measure as it applied to the federal voter registration form. And in 2018, as part of the [settlement](#) of a lawsuit, the state agreed to register applicants to vote in federal elections, without documentary proof of citizenship, regardless of whether the state or federal form was used.

## Arkansas

**New restriction enacted in 2018:** Arkansas voters enacted a constitutional amendment, via ballot initiative, that enshrined a photo ID requirement for voting in the state constitution.

**New restriction(s) in place in 2018:** Requires that voters show one of a limited set of IDs.

*Click [here](#) to see the types of ID required under Arkansas's law.*

**Background:** Passed in 2017 by a GOP-controlled state legislature.

## Florida

**New restrictions enacted in 2019:** Cut back on the expansive changes made by Amendment 4 – a constitutional amendment that restores voting rights to many Floridians with a felony conviction and that was passed overwhelmingly by Florida voters in November 2018. A federal

**BRENNAN CENTER FOR JUSTICE**

district court, however, has issued a partial preliminary injunction against the cutback, ruling that it is unconstitutional for Florida to condition the restoration of voting rights on legal financial obligations that a returning citizen cannot afford to pay. (For additional information, click [here](#).)

**Restriction(s) in place for the first time in 2012:** Cut early voting, curbed voter registration drives, and made it harder to restore voting rights to people with past criminal convictions.

**Original effective date:** 2011

**Background:** In 2011, Florida's Republican-controlled legislature passed a series of laws, signed by Gov. Rick Scott (R), making it harder to vote. First, lawmakers reduced the early voting period, which contributed to long lines in the 2012 election. The legislature responded in 2013 by restoring some of the early voting days, but there are still fewer early balloting opportunities today than before the 2011 cutbacks. Second, Florida passed new restrictions on voter registration drives. With the help of the Brennan Center, the most onerous aspects of this law were enjoined by a federal court in August 2012. Finally, Gov. Scott reversed a prior executive action that had made it easier to restore voting rights to people with past criminal convictions.

## Georgia

**New restriction(s) in place for the first time in 2018:** The state legislature passed and the governor signed a bill that would make voter registration more difficult. It imposes a requirement that voter registration forms match exactly with other state records — a burdensome process known as "no match, no vote." In 2019, however, Georgia enacted HB 316, which largely ended the "no match, no vote" policy.

**Restriction(s) in place for the first time in 2012:** Reduced early voting period from 45 to 21 days and cut early voting the weekend before Election Day.

**Background:** In 2009, a Republican-controlled legislature passed a law requiring voters to provide documentary proof of citizenship when registering to vote. That requirement had been on hold, but in January 2016, the Election Assistance Commission's Executive Director announced that that documentary proof of citizenship would be added to the national voter registration form instructions. A federal appeals court blocked the registration requirement on September 9, 2016. It is subject to ongoing litigation. In 2011, a Republican-controlled legislature also reduced early voting. Both laws were signed by a GOP governor.

## Illinois

**Restriction(s) in place for the first time in 2012:** Curbed voter registration drives.

**Original effective date:** 2011

**Background:** Passed in 2011 by a Democratic-controlled legislature and signed by a Democratic governor, the measure changed the allotted time for returning voter registration forms. The previous law allowed seven days to return the forms. The amended law requires completed registration materials to be returned by first-class mail within two business days, or by personal delivery within seven days. This rule is not nearly as harmful as others, like one in Texas, because the reduction does not apply to groups only using the national mail-in voter registration form.

## Indiana

**New restrictions enacted in 2019:** Cut deadline for submitting an absentee ballot application for most voters from eight days to 12 days prior to the election and restricted state court lawsuits to extend polling place hours.

**New restriction enacted in 2017 and 2018:** In 2017, the state enacted a law to implement a flawed voter purge process. The law provides for use of the error-prone Crosscheck Program to remove voters without the notice and waiting period required by the National Voter Registration Act. (The law was amended in 2018, but the state failed to fix the law's failure to require notice to voters prior to purging them as mandated by federal law.) Civil rights groups sued the Secretary of State over the law in August 2017, and a court entered a preliminary injunction against the state in June 2018, meaning the law is currently not in effect. In 2019, the Seventh Circuit affirmed the preliminary injunction.

**New restriction(s) in place for the first time in 2016:** Allows additional party-nominated election officers to demand voters provide proof of identification.\*

**Background:** Passed in 2013 by a Republican-controlled state legislature and signed by a GOP governor.

\* This law subjects voters to an additional and duplicative voter identification requirement that did not exist before the law was enacted. If, however, precinct election officials always enforce the voter ID requirement in a uniform manner, this law may not have a restrictive effect.

## Iowa

**New restrictions (partially) in place in 2018:** Iowa's governor signed a broad-based law that will require voter ID (starting after the 2018 election), restrict voter registration efforts, and impose new burdens on Election Day registration and early and absentee voting. Although not as restrictive as a North Carolina law that passed in 2013 (and was blocked by a federal court), Iowa's law similarly restricts voting in a number of different ways.

In 2019, following a trial, an Iowa state court largely upheld the law, but struck down its absentee ballot signature-matching provisions and modified other provisions related to voter ID and absentee voting. (For additional information, click [here](#).)

**Restriction(s) in place for the first time in 2012:** Made it harder to restore voting rights to people with past criminal convictions.

**Original effective date:** 2011

**Background:** In 2011, Gov. Terry Branstad (R) reversed a prior executive action that had made it easier to restore voting rights to people with past criminal convictions. In effect, the state now permanently disenfranchises most citizens with past felony convictions.

## Kansas

**Update since 2016:** In 2018, a federal district court struck down the state's documentary proof of citizenship law. That decision is on appeal.

**New restriction(s) in place for the first time in 2016:** Documentary proof of citizenship required to register using the state registration form. But, by court order, certain individuals who registered without showing documentary proof must be permitted to vote.

**Restriction(s) in place for the first time in 2012:** Photo ID required to vote.

*Click [here](#) to see the types of ID required under Kansas's law.*

**Background:** The documentary proof of citizenship requirement has been the subject of multiple lawsuits. A 2014 federal court ruling had found the requirement unenforceable on the federal mail-in voter registration form. But in January 2016, the Election Assistance Commission's Executive Director announced that documentary proof of citizenship would be added to the national voter registration form instructions for Kansas, as well as Alabama and Georgia. A federal appeals court blocked the registration requirement for the national from on September 9, 2016. That action is the subject of an [ongoing lawsuit](#).

A Republican-controlled legislature passed both the photo ID and documentary proof of citizenship requirements in 2011, and they were signed by a GOP governor.

## Mississippi

**New restriction(s) in place for the first time in 2016:** Photo ID required to vote.

*Click [here](#) to see the types of ID required under Mississippi's law.*

**Background:** Passed in 2011 by a voter referendum, the ID law initially required preclearance under Section 5 of the Voting Rights Act. But the measure was allowed to go into effect after the U.S. Supreme Court gutted that provision in 2013.

## Missouri

**New restriction (partially) in place in 2018:** Missouri passed a new law that requires photo ID in order to vote, but permits voters to vote a regular ballot by presenting non-photo ID and signing an affidavit indicating that they do not possess photo ID. The voter ID requirement was challenged in federal court and was altered in part in October 2018: the court prohibited the state from requiring otherwise-qualified voters that lacked photo ID to execute the affidavit required by statute in order to vote.

**Background:** Passed by ballot initiative in 2016

## Montana

**New restriction enacted in 2018:** Montana voters enacted a new law, via ballot initiative, that will prevent civic groups and individuals (with certain exceptions) from helping others vote absentee by collecting and delivering their voted ballots.

## Nebraska

**New restriction(s) in place for the first time in 2016:** Reduced early voting period.

**Background:** In 2013, state lawmakers reduced the early voting period from a minimum of 35 days to no more than 30 days. Nebraska's unicameral legislature is technically nonpartisan, but generally is controlled by Republicans. The measure was signed by a GOP governor.

## New Hampshire

**New restriction (partially) in place in 2018:** In 2017, the state enacted a law that would make it more difficult for students and others to register to vote, but that law was partially enjoined prior to the 2018 election. In 2018, the state enacted another law that would make it more difficult for students and others to vote, but it takes effect in 2019.

**New restriction(s) in place for the first time in 2016:** Photo ID requested to vote. The law requires voters without acceptable ID to get photographed at the polls, and the photograph will be affixed to an affidavit.

*Click [here](#) to see the types of ID requested under New Hampshire's law.*

**Background:** Passed in 2012, a Republican-controlled legislature overrode a veto from Gov. John Lynch (D) to enact the voter ID law. The state previously required no form of ID to vote. Prior to September 2015, the law included an affidavit alternative.

## North Carolina

**New restriction enacted in 2018:** North Carolina voters enacted a constitutional amendment, via ballot initiative, that enshrined a photo ID requirement for voting in the state constitution. The state legislature subsequently enacted implementing legislation, over the governor's veto.

**New restriction (partially) in place in 2018:** In 2018, the state enacted a law that requires uniform hours at early voting sites. The law has had the effect of reducing the number of early voting locations available to voters. (The law also cut the last Saturday of early voting before the election, but that provision was not in effect for the 2018 election and, in 2019, the state reinstated the last Saturday of early voting.)

## North Dakota

**New restriction (partially) in place in 2018:** The state's governor signed a bill on April 25, 2017 that would restore a strict voter ID requirement in the state. That law was challenged in federal court, and it will be altered in part for the 2018 election. Specifically, the federal district court required the state to accept certain tribal identification not included in the law as voting ID.

*Click [here](#) to see the types of ID required under North Dakota's law.*

**Background:** Passed in 2017 by a Republican-controlled state legislature and signed by a GOP governor.

In 2016, a federal court partially blocked a previous ID law that accepted a narrow range of identification documents and did not provide any meaningful voting opportunities for voters without the accepted ID. The new law slightly expands options to use for ID, but eliminates the process the court imposed, which allowed voters without IDs to cast a ballot that counts on Election Day, and instead included a more burdensome process.

## Ohio

**New restriction(s) in place for the first time in 2016:** Cut early voting and changed absentee and provisional ballot rules.

**Background:** In 2014, lawmakers cut six days of early voting — eliminating “Golden Week,” during which voters could register and cast a ballot all in one trip — and changed absentee and provisional ballot rules.

In 2014, Secretary of State Jon Husted (R) also issued a directive reducing early voting on weekday evenings and weekends. In 2015, state officials and voting rights advocates settled a separate ongoing lawsuit over the early voting hours, which restored one day of Sunday voting and added early voting hours on weekday evenings. The settlement is in place through 2018.

A Republican-controlled state legislature passed the series of voting restrictions, which were signed by a GOP governor.

## Rhode Island

**New restriction(s) in place for the first time in 2016:** Photo ID requested to vote. There is an affidavit alternative for voters without a photo ID.

*Click [here](#) to see the types of ID requested under Rhode Island’s law.*

**Background:** Passed through a Democratic-controlled legislature and signed by an independent governor in 2011, the measure is significantly less restrictive than other ID laws because it accepts a broad range of IDs with a voter’s name and photograph. A previous version of the law allowed non-photo IDs.

## South Carolina

**New restriction(s) in place for the first time in 2016:** Photo ID required if a voter has one, but an alternative is available for those who have a reasonable impediment to obtaining ID.

*Click [here](#) to see the types of ID required under South Carolina’s law.*

**Background:** The law was passed in 2011 by a Republican-controlled state legislature and signed by a GOP governor, but it was put on hold by a federal court until after the 2012 election. During the course of that litigation, the state interpreted the law in a way that makes it less restrictive than other ID requirements. A voter with a reasonable impediment or obstacle to obtaining one of the accepted photo IDs can sign an affidavit at the polls and then vote a provisional ballot.

## South Dakota

**Restriction(s) in place for the first time in 2012:** Made it harder to restore voting rights to people with past criminal convictions.

**Background:** Passed in 2012 by a Republican-controlled legislature and signed by a GOP governor.

## Tennessee

**New restrictions enacted in 2019:** Restrictions on third-party voter registration. A federal court, however, has temporarily halted those restrictions from going into place, pending a trial.

**New restriction(s) in place for the first time in 2016:** Photo ID required to vote.

*Click [here](#) to see the types of ID required under Tennessee's law.*

**Restriction(s) in place for the first time in 2012 :** Reduced early voting period and proof of citizenship required to register.

**Background:** In 2011, a Republican-controlled legislature passed the three voting restrictions, which were signed by a GOP governor. Tennessee's proof of citizenship requirement applies only to individuals flagged by state officials as potential non-citizens based on a database check. In 2013, lawmakers made the photo ID law, which was in place for the 2012 election, even more restrictive by limiting acceptable IDs to those issued by the state or federal government.

## Texas

**New restriction enacted in 2019:** Cut back use of mobile early voting sites.

**New restriction in place since 2016 election:** Photo ID required if a voter has one, but an alternative will be available for those who present a non-photo ID from a preset list and execute an affidavit claiming to have certain, enumerated reasonable impediments to obtaining photo ID. Reasonable impediment alternative is more restrictive than the alternative in place in 2016.

*Click [here](#) to see the types of ID required under Texas's law.*

**New restriction(s) in place for the first time in 2016:** Photo ID required if a voter has one, but an alternative will be available for those who have a reasonable impediment to obtaining ID.

**Restriction(s) in place for the first time in 2012:** Curbed voter registration drives.

**Background:** In 2012, a federal court blocked the 2011 photo ID law under Section 5 of the Voting Rights Act. The state then implemented the requirement after the U.S. Supreme Court gutted Section 5 in 2013, and a photo ID was required to vote for the first time in a federal election in 2014.

In July 2016, the full Fifth Circuit Court of Appeals ruled that the strict photo ID law discriminates against minority voters, and therefore cannot be enforced against those who lack ID. In August 2016, a federal court approved an agreement that will allow voters with an obstacle to obtaining photo ID to cast a regular ballot in November 2016 after showing one of a much larger number of IDs and signing a declaration. In June 2017, in response to the litigation, Texas enacted a new voter ID law that is currently in place.

A Republican-controlled legislature passed the restriction on voter registration drives and the strict photo ID law in 2011, and both were signed by a GOP governor.

## Virginia

**New restriction(s) in place for the first time in 2016:** Photo ID required to vote and limits on third-party voter registration.

*Click [here](#) to see the types of ID required under Virginia's law.*

**Background:** The restriction on third-party voter registration requires groups receiving 25 or more registration forms to register with the state and reduces the amount of time from 15 to 10 days to deliver the applications. The state Senate was evenly divided among Democrats and Republicans when the photo ID law was enacted, but the GOP lieutenant governor cast the tie-

breaking vote on the photo ID law. The state House was controlled by Republicans. Both measures were signed by a GOP governor in 2013.

In 2015, a Republican-controlled legislature passed a bill to amend the photo ID law to add student IDs issued by private schools to the list of acceptable IDs (the law currently allows public school IDs). The bill was signed by a Democratic governor and takes effect in 2016.

## West Virginia

**Restriction(s) in place for the first time in 2012:** Reduced early voting period from 17 to 10 days.

**Original effective date:** 2011

**Background:** Passed in 2011 by a Democratic-controlled state legislature and signed by a Democratic governor.

## Wisconsin

**New restrictions enacted in 2018:** In 2018, the state passed a law limiting the early voting period and codifying certain administrative practices related to voter IDs—despite a Court order halting the state's 2011 and 2014 attempts to limit early voting. A federal district court has blocked these new provisions, however.

**New restriction(s) in place for the first time in 2016:** Photo ID required to vote.

*Click [here](#) to see the types of ID required under Wisconsin's law.*

**Background:** In 2011, state lawmakers passed a restriction on individual voter registration and a law requiring photo ID to vote.

In 2014, the legislature also reduced early voting hours on weekdays and eliminated them entirely on weekends. These cuts were in effect for the first time in 2014. They are currently on hold after a July 2016 trial court decision finding the restrictions were intentionally racially discriminatory. That decision also ruled voters could obtain a free photo ID by showing up at a state DMV office.

Read more on the [ongoing litigation](#) over the photo ID and early voting restrictions, which were passed by a Republican-controlled legislature in 2011 and 2014, and signed by a GOP governor a restriction on individual voter registration and a law requiring photo ID to vote.

### **Other Notable Voting Law Changes**

- **Arkansas** – A Republican-controlled legislature passed a photo ID law in 2013, overriding a veto from Gov. Mike Beebe (D). On October 15, 2014, the Arkansas Supreme Court unanimously struck down the photo ID requirement, ruling it violated the state constitution by imposing an additional “qualification” to voting.
- **Montana** – A Republican-controlled legislature approved a referendum measure to repeal Election Day registration, which voters rejected in November 2014. Gov. Steve Bullock (D) had vetoed a previous effort to repeal Election Day registration.
- **North Carolina** – A Republican-controlled state legislature passed a series of voting restrictions in 2013, which were signed by a GOP governor. Lawmakers eliminated same-day registration, reduced the early voting period, ended pre-registration for 16- and 17-year-olds, and instituted a strict photo ID requirement, among a number of other restrictive changes. The measures were in effect for the first time in 2014 (except for the ID requirement, which was slated to go into effect in 2016). In June 2015, lawmakers softened the photo ID requirement, creating an option for voters to attest to a reasonable impediment to obtaining an ID, and vote a provisional ballot that will be counted unless there is a problem with the attestation. In July 2016, the Fourth Circuit Court of Appeals struck down the state’s voting restrictions, ruling that they were passed with racially discriminatory intent. It also ruled that the “reasonable impediment” exception was not a sufficient remedy for the ID law’s harm.

**EXPERT BRIEF**

## The New Voter Suppression

Over the last decade, states have enacted voter restrictions that disproportionately disenfranchise racial minorities and distort our democracy.

 **Theodore R. Johnson**      Max Feldman

PUBLISHED: January 16, 2020

 **Ensure Every American Can Vote**  
Vote Suppression

Emily Harsh

On Election Day in 1960, four unanswerable questions awaited Clarence Gaskins, a Black voter in Georgia looking to cast his ballot for president. Upon arrival at his designated polling place, he was ushered into a room that held a jar of corn, a cucumber, a watermelon, and a bar of soap. He was informed that in order to vote, he first had to answer the following correctly:

"How many kernels of corn are in the jar? How many bumps on the cucumber? How many seeds in the watermelon? And how many bubbles in the bar of soap?"

Clarence didn't bother guessing once the polling official admitted there were no right answers. His vote was neither cast nor counted.

1/5

5/25/2021

The New Voter Suppression | Brennan Center for Justice

**APPENDIX C**

The connection between race and voter suppression did not end in the 1960s. While the overtly racist voter suppression tactics of the Jim Crow past are no longer with us, voter suppression remains a mainstay of electoral politics in the United States today.

**Erecting New Barriers to the Ballot Box**

Over the past decade, half the states in the nation have placed new, direct burdens on people's right to vote, abetted by a 2013 Supreme Court decision that struck down a key provision of the Voting Rights Act. And the racial cause and effect of these seemingly race-neutral laws are hard to escape.

Take strict voter ID.

These laws require voters to present a government-issued photo ID in order to vote, and they offer no meaningful fallback options for people who do not possess one of these IDs. Like their Jim Crow predecessors, strict voter ID laws are often defended by reference to a racially neutral need to defend the "integrity" of elections. Specifically, defenders claim that voter ID laws are needed to combat voter impersonation fraud. But study after study has shown that voter impersonation fraud is vanishingly rare.

Many also claim that these laws impose little burden because everyone has the requisite ID — but the reality is that millions of Americans don't, and they are disproportionately people of color.

---

**Voting-Age Citizens in U.S. Without Current Government-Issued Photo ID**

Look at North Dakota: a federal district court found that, when the state enacted its current ID law in 2017, 19 percent of Native Americans lacked qualifying ID compared to less than 12 percent of other potential voters.

---

**North Dakota Voters Without a Qualifying Voter ID**

Source: Brakke v. Langer

5/25/2021

The New Voter Suppression | Brennan Center for Justice

**APPENDIX C**

Likewise, Texas permits voters to use a handgun license to vote, but not a student ID from a state university. More than 80 percent of handgun licenses issued to Texans in 2018 went to white Texans, while more than half of the students in the University of Texas system are racial or ethnic minorities.

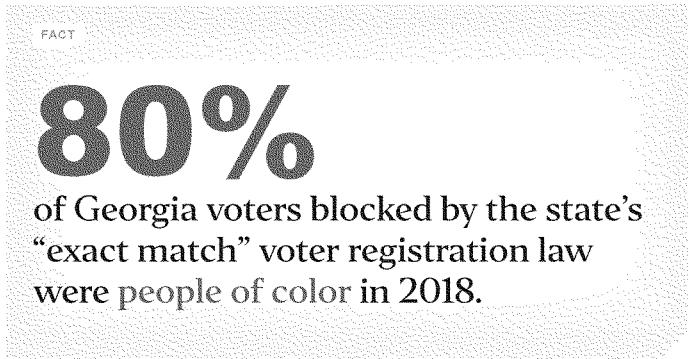

Strict voter ID is just one of a number of racially charged voting restrictions that states have adopted this decade. For example, following the election and reelection of President Obama — and the **concomitant surge in turnout** by Black voters — states like North Carolina imposed new restrictions on early voting, which was disproportionately used by people of color.

**Percentage of Early Voters in 2012 North Carolina Elections**

Source: N. Carolina State Conference of the NAACP v. McCrory

Other states imposed new restrictions on the voter registration process. In 2019, for example, Tennessee imposed new hurdles for third-party voter registration drives in response to a “**large-scale effort to register black voters**” ahead of the 2018 election.

In 2017, Georgia enacted an “exact match” law mandating that voters’ names on registration records must perfectly match their names on approved forms of identification. In the leadup to the 2018 election, approximately 80 percent of Georgia voters whose registrations were blocked by this law were people of color. (A lawsuit forced the state to largely end the policy in 2019.)

3/5

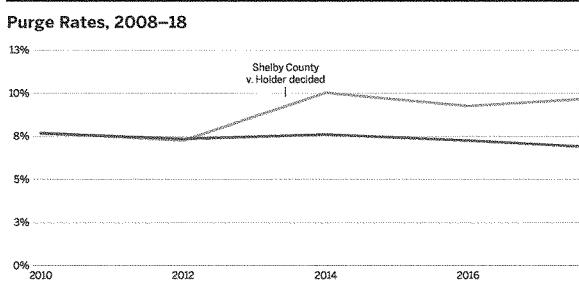

5/25/2021

The New Voter Suppression | Brennan Center for Justice

**APPENDIX C**

Furthermore, the Brennan Center has **documented** a surge in voter purges — the sometimes error-prone process by which election officials remove allegedly ineligible voters from the rolls — in jurisdictions with a history of racial discrimination in voting.

The Supreme Court's 2013 Voting Rights Act decision ended the requirement for those places to get permission (or "preclearance") from the federal government before changing their voting rules. Afterwards, the median purge rate in counties previously covered by the law was 40 percent higher than the purge rate in other jurisdictions.

Note: Shows data for counties reporting in each period.

Source: EAVS

Unsurprisingly, in the past decade, federal courts have repeatedly found that voting restrictions and other voting measures were passed with a racially discriminatory purpose.

#### **"Meet James Crow, Esquire"**

As these examples make clear, race continues to play a key role in the voting process. The racial components of new voting restrictions are still here, but they are more subtle. Commenting on this change, civil rights activist Rev. William Barber II has said, "Jim Crow did not retire; he went to law school and launched a second career. Meet James Crow, Esquire."

As voter suppression continues to evolve — with communities of color still bearing the brunt — protecting the right to vote remains as important today as it has ever been.

### ABOUT THE BRENNAN CENTER FOR JUSTICE

The Brennan Center for Justice at NYU School of Law is a nonpartisan law and policy institute that works to reform, revitalize — and when necessary defend — our country's systems of democracy and justice. The Brennan Center is dedicated to protecting the rule of law and the values of constitutional democracy. We focus on voting rights, campaign finance reform, ending mass incarceration, and preserving our liberties while also maintaining our national security. Part think tank, part advocacy group, part cutting-edge communications hub, we start with rigorous research. We craft innovative policies. And we fight for them — in Congress and the states, in the courts, and in the court of public opinion.

### ABOUT THE BRENNAN CENTER'S DEMOCRACY PROGRAM

The Brennan Center's Democracy Program encourages broad citizen participation by promoting voting and campaign finance reform. We work to secure fair courts and to advance a First Amendment jurisprudence that puts the rights of citizens — not special interests — at the center of our democracy. We collaborate with grassroots groups, advocacy organizations, and government officials to eliminate the obstacles to an effective democracy.

## Foreword

The pictures of Milwaukeeans waiting in line to vote on April 7 with homemade personal protective equipment were both beautiful and horrifying. It was beautiful — inspiring even — that with a deadly pandemic on their doorsteps, so many people still cared so much about their right to vote that they went to the polls. And it was horrifying that they had to risk their health in order to do so.

News reports indicated that Milwaukee, the most diverse city in a largely white state, had reduced its usual 180 polling sites to just five. Covid-19 has exposed serious problems in our election systems, and it has made the need for reform urgent. Voters of color and demographically changing communities all across the country already knew this, though. As this report details, Black and Latino Americans face longer wait times on Election Day than white voters. In the past, long wait times were disruptive and disenfranchising. In the middle of a pandemic, they could also be deadly.

Though completed before the eruption of the coronavirus, this report is even more critical now because it provides information regarding community needs as well as mistakes commonly made in planning for and staffing in-person voting. While the risk of Covid-19 will no doubt move more voters to cast their ballots by mail, some

communities — more typically communities of color — rely on polling places. We must make sure that there are in-person options, and that they have enough of the right kinds of resources.

The period leading up to the November general election will be marked by extreme disruption and hardship in all facets of American life. At the time of publication, the pandemic has killed more than 100,000 Americans. It has also caused schools to close, people to lose their jobs, and Americans to distance themselves from one another. Our fundamental right to vote and our democratic processes are more important than ever. The officials we elect will make high-stakes decisions that will impact our health, safety, and welfare.

In these dire times, our country will not benefit from the judgment and experiences of all its citizens unless all Americans can vote freely and safely.

## Introduction

---

**T**he 2018 general election saw the highest turnout in a midterm in decades.<sup>1</sup> While many voters were able to cast a ballot quickly and easily in that election, others faced hours-long lines, malfunctioning voting equipment, and unexpectedly closed polling places.<sup>2</sup> We estimate that some 3 million voters waited 30 minutes or more to cast their ballot.<sup>3</sup> Many of these voters were concentrated in the southeastern United States, home to large shares of nonwhite voters.

Long lines and wait times have plagued several elections over the past decade.<sup>4</sup> The consequences can be far reaching. For example, the Bipartisan Policy Center estimates that more than half a million eligible voters failed to vote in 2016 because of problems associated with the management of polling places, including long waits.<sup>5</sup>

For this report, we analyzed data from two nationwide election surveys regarding the 2018 election: the Cooperative Congressional Election Study, a 60,000-person survey on Election Day experiences, and the U.S. Election Assistance Commission's Election Administration and Voting Survey, which asks administrators detailed questions about how they conduct elections. We also interviewed nearly three dozen state and local election administrators.<sup>6</sup> Further, we examined the electoral statutes on the books in every state in the nation to understand the sources of disparate wait times in 2018 and develop policy recommendations for lawmakers and election officials ahead of 2020.<sup>7</sup> Some previous research has investigated the relationship between wait times and electoral resources — specifically polling places, voting machines, and poll workers.<sup>8</sup> But no prior study has examined the relationship on a nationwide scale. We find:

- **Latino and Black voters were more likely than white voters to report particularly long wait times, and they waited longer generally.**<sup>9</sup> Latino and Black voters were more likely than white voters to wait in the longest of lines on Election Day: some 6.6 percent of Latino voters and 7.0 percent of Black voters reported waiting 30 minutes or longer to vote, surpassing the acceptable threshold for wait times set by the Presidential Commission on Election Administration, compared with only 4.1 percent of white voters.<sup>10</sup> More generally, Latino voters waited on average 46 percent longer than white voters, and Black voters waited on average 45 percent longer than white voters.
- **Voters in counties with fewer electoral resources per voter, relative to other counties, reported longer wait times in 2018.** In this report, we offer the first national-level statistical evidence that counties with

fewer polling places, voting machines, and poll workers (referred to hereafter as “electoral resources”) per Election Day voter than other counties had longer wait times in 2018.<sup>11</sup> By “Election Day voters,” we mean voters who cast in-person ballots on Election Day (referred to hereafter as “voters”). Voters in counties with the fewest electoral resources per voter reported waiting two to three times as long to cast a ballot on Election Day as voters in the best-resourced counties.

Given those two statistical findings, some might conclude that voters of color wait longer because they tend to live in counties with fewer electoral resources. Our analyses do not support this hypothesis; on average, we find, counties with higher minority shares of the population did not have fewer resources per voter than whiter counties did in 2018. Our statistical models do, however, establish that with fewer resources, the racial wait gap would have been even larger.

- **Counties that became less white over the past decade had fewer electoral resources per voter in 2018 than counties that grew whiter.** The average county where the population became whiter had 63 voters per worker and about 390 voters per polling place. In comparison, the average county that became less white had 80 voters per worker and 550 voters per polling place.<sup>12</sup>
- **Similarly, counties where incomes shrank over the past decade had fewer electoral resources per voter in 2018 than counties where incomes grew over the same period.** The average county where real incomes grew had 74 voters per worker and 470 voters per polling place, while counties where real incomes declined averaged 82 voters per worker and 590 voters per polling place.

Our findings suggest that allocating equal resources among counties and precincts is not sufficient to produce equal wait times for voters, particularly those of color and of lower incomes. Instead, election administrators must

**APPENDIX C**

target those counties and precincts with a history of long wait times and allocate enough resources to these locations to equalize the wait times for all voters. The goal for election administrators should be to distribute resources in a manner that produces a similar Election Day experience for all voters.

Given these findings, we make the following recommendations to election administrators:

- **Provide resources sufficient to minimize voter wait times.** Election officials in counties that have experienced long waits in recent elections should increase the quantity and quality of resources allocated, and state lawmakers should ensure that resources are allocated sensibly between and within counties to prevent disparate wait times.
- **Plan for an above-trend spike in voter turnout.** Between the 2014 and 2018 midterm elections, voter turnout spiked from the lowest it had been in 72 years to the highest in decades.<sup>13</sup> This created problems where election administrators had relied too heavily on past turnout trends to allocate resources.<sup>14</sup> Voter turnout is poised to increase dramatically in 2020 over past presidential elections, and election administrators should not be misled by past trends when making resource allocation decisions.<sup>15</sup>
- **Account for policy changes that may impact turnout.** State election policies can change from election to election, and these changes may impact the number of individuals who vote on Election Day, early in person, absentee, or by mail. Administrators must take these new policies into account when estimating turnout levels and allocating resources.
- **Increase compliance with resource mandates.** State officials should review their standards for resource allocation to ensure that counties are in compliance and standards are appropriate given resource levels and wait times. Advocates should hold states to those standards in 2020.
- **Limit polling place closures.** Administrators should examine voter turnout data and early voting usage when making decisions about eliminating polling places, and they should not do so without a firm analytical justification.
- **Develop comprehensive vote center transition plans.** Administrators should act carefully when transitioning to vote centers. Vote centers should be piloted in lower-turnout elections, and administrators should not close or combine voting locations until they fully understand how vote centers will affect turnout.
- **Expand language assistance.** Jurisdictions that narrowly missed the legal mandate to provide non-English-language assistance under the Voting Rights Act should nonetheless offer language assistance in the 2020 election.

## Overview of Methodology

---

**T**his report draws on both quantitative and qualitative research methods, which we summarize below. To read more about our data sources and our econometric modeling, see the Quantitative Technical Appendix.

### Quantitative Methodology

The Brennan Center leveraged national survey data to interrogate the relationships among racial and economic demographics, county-level election resources, and wait times faced by voters. In particular, we incorporated data from three sources: the Cooperative Congressional Election Study (CCES), the Election Administration and Voting Survey (EAVS), and the U.S. Census Bureau's five-year American Community Survey (ACS) estimates.

The data on how long voters waited to cast a ballot comes from the CCES.<sup>16</sup> This 60,000-person survey is conducted after each federal election.<sup>17</sup> It is weighted to be nationally representative and asks voters a host of questions about their sociodemographic characteristics and their experience on Election Day that year. Much of the existing academic research on voters' wait times relies on this survey data.<sup>18</sup>

We also use data from the biennial EAVS, which is administered by the U.S. Election Assistance Commission after every federal election.<sup>19</sup> The EAVS asks local election administrators to report the number of registered voters in their jurisdiction, the number of ballots cast on Election Day, and other information pertaining to election administration. Election administrators are also asked to report the number of polling places they had open on Election Day and the number of Election Day poll workers and voting machines they had in place within a jurisdiction. We merged the data garnered from the EAVS and the CCES to explore the relationship between county-level resources and wait times.<sup>20</sup>

Looking for disparities between counties could mask disparities *within* counties. In other words, it is possible that certain towns or neighborhoods within counties get more resources per voter than other parts of the county — something we would miss by looking only at how many resources a county deployed in aggregate. To test the possibility of uneven resource distribution within counties, we analyzed precinct-level data from dozens of counties around the country. These included counties where reports of racial disparities in wait times were prevalent. Our within-county analyses pointed in the same direction as the between-county analyses; we found no evidence that racial and ethnic minorities systematically receive fewer resources than white voters.

Because this report focuses on how Election Day resources impacted voter experience in 2018, we have

excluded the estimated wait times of respondents who reported voting early (whether in person or by mail) and of those who live in counties that vote primarily by mail.<sup>21</sup>

### Qualitative Methodology

To identify specific factors that contribute to long voter wait times and electoral resource challenges, we interviewed state and local election officials. A variety of methodologies were used to select interviewees: We scoured news reports after the 2018 election to determine where the longest lines formed. We tracked parts of the country where Twitter and Facebook users posted about facing long lines on Election Day. We also used survey data to identify counties where there were reported racial disparities in wait times. On the basis of these findings, we spoke with state and local election administrators in 32 jurisdictions across the country, including some of the most populous counties in the nation, such as Harris County, Texas, and Maricopa County, Arizona.<sup>22</sup>

### Limitations

It is important to recognize the limitations of this study, as is the case with any empirical research of this nature. The first set of limitations regards the quantitative data available. There is not, for instance, perfect reporting to the EAVS about the number of resources in each county; we must assume, therefore, that trends identified using counties that do report to the EAVS hold even in the counties that do not. Moreover, the EAVS data can assess the quantity of resources but not their quality. The same number of voters per machine, for instance, in two counties might produce vastly different wait times if the machines in one county are much older than those in the other. The same holds true for poll workers: we can measure the number of workers but not the quality of available training, the extent to which they reflect their community, or whether their language skills match the needs of voters.

Our qualitative methodology represents our best effort to combat the limitations imposed by the quantitative approach. We developed our interview instrument with an eye toward identifying factors that could not be captured in the quantitative data. We asked election administrators how hard it was to find poll workers and whether they emphasized hiring poll workers who reflect their counties' demographics. We also asked them about their contingency plans for handling unexpected events,

**APPENDIX C**

like broken machines. Since we could not speak with administrators from every county in the country, we sought to speak with a diverse array of them.

These limitations, we hope, chart the path for future research on the relationship between resources and wait

times. There are certainly nuances that our research design fails to reveal, and there may be material ways, not captured by the models presented herein, in which nonwhite populations receive fewer resources than white ones.

## Latino and Black Voters Were More Likely to Report the Longest Wait Times in 2018

**M**ost voters waited far less than 30 minutes to cast a ballot in 2018: according to our analysis of the CCES, more than 47 percent of voters reported waiting in no line on Election Day, and the average wait time was just seven minutes.<sup>23</sup> Still, far too many voters were forced to wait a long time to vote. According to our analysis of the CCES, roughly 3 million people — or between 4 and 5 percent of all in-person Election Day voters — waited 30 minutes or longer to vote on Election Day in 2018.<sup>24</sup> A disproportionate number of them were Black or Latino.

### The Racial Wait Gap in 2018

A large body of recent scholarship has established that throughout the country Latino and Black voters wait longer to cast their ballots than white voters. Indeed, a quantifiable racial disparity in voting wait times has been identified consistently over the past decade.<sup>25</sup>

According to our analysis of the CCES, voters of color were also more likely than white voters to report waiting a very long time to vote in 2018. Specifically, 4.1 percent of white voters reported waiting in line 30 minutes or longer, while more than 6.6 percent of Latino voters and 7.0 percent of Black voters reported facing such delays. In addition, Latino and Black voters who cast a ballot in person on Election Day in 2018 reported, on average, substantially longer wait times than white voters. Latino voters waited almost 46 percent longer than white voters, and Black voters waited 45 percent longer, on average. According to our analysis, in 2018 on average, Latino voters waited 9.5 minutes to vote and Black voters waited 9.4 minutes, while white voters waited only 6.5 minutes to cast a ballot.

These findings are consistent with a study of the 2012 election conducted by the Brennan Center.<sup>26</sup> They are also consistent with other research in the field.<sup>27</sup> This racial wait gap has been established in the literature using multiple methods, including analyses of self-reported wait times and cell phone data.<sup>28</sup>

Long wait times are more than an inconvenience. They can disenfranchise people who are unable to stay in line to cast a ballot. Moreover, long waits reduce voter participation in subsequent elections.<sup>29</sup>

**Factors Contributing to the Racial Wait Gap**  
Over the past decade, studies have explored the factors contributing to this racial wait gap. Researchers have established that some of the gap is driven by demographic factors. For example, multiple studies have shown that voters of all races are more likely to wait longer in counties with higher population density, and Latino and Black voters disproportionately live in these areas.<sup>30</sup>

At least one study finds that county-level demographics cannot entirely explain the wait gap. Voters of color report waiting longer than white voters at the polls even after researchers control for the different types of counties in which they live.<sup>31</sup> Nor can partisan bias, restrictive voting laws, income inequality, or racial segregation fully account for the wait gap.<sup>32</sup>

The Brennan Center previously established a relationship between racial disparities in electoral resources and the wait gap in the 2012 election. In the report *Election Day Long Lines: Resource Allocation*, the Brennan Center studied resource allocation on Election Day in Florida, Maryland, and South Carolina.<sup>33</sup> We found that fewer electoral resources were a significant contributor to long waits and that voters in precincts with higher percentages of minority voters experienced long waits at the polls. We also found that voters in precincts with higher percentages of minority voters had fewer voting machines.<sup>34</sup>

In the 2018 election, we found that some of the racial wait gap can be explained by demographic factors, a finding consistent with prior research by others.<sup>35</sup> For example, the gap between white and Black voters can be attributed in part to the fact that Black voters are more concentrated in states — particularly in the Southeast — where all voters wait longer to cast a ballot. Similarly, both Latino and Black voters are more likely to live in dense, urban counties, where voters of all races face longer wait times. Latino and Black voters also tended to be younger than white voters in 2018, and young people reported long wait times regardless of race. These findings hold even after controlling for demographic factors such as income, education, and age.

Our statistical analyses show that the 2018 racial wait gap cannot be explained by the level of resources per voter in counties populated largely by racial and ethnic minorities. In fact, whiter counties tended to have fewer resources per voter than less-white counties. This is not, however, an argument for reducing the levels of resources in the less-white counties; had minority voters received fewer resources, the racial wait gap would have been even larger.

## APPENDIX C

**Electoral Resource Parity Is Not Enough**

>> **Racial gaps** in Election Day wait times demonstrate that certain communities may require additional resources to reach equitable outcomes — a finding that has roots in an array of fields.<sup>39</sup> These communities often face social, economic, or environmental disadvantages that adversely impact individuals; therefore they may need expanded or different supports to achieve desired outcomes. Research on education in low-income communities is illustrative of this phenomenon. For example, one report found that “students in poverty are likely to need additional supports in order to succeed academically. In other words, simply offering equal [education] funding isn’t enough” to equalize outcomes among students of diverse backgrounds.<sup>40</sup> Similar findings exist in the health-care field, where studies have shown that the U.S. health disparities gap cannot be solved simply by providing an equal number of resources to all patients. “In order to reduce the health disparities gap, the underlying issues and individual needs of underserved and vulnerable populations must be effectively addressed.”<sup>41</sup> This report suggests this phenomenon is also at play in the relationship between wait times and electoral resources.

Our interviews with election administrators indicate that resource gaps that do not appear in raw counts of polling places, voting machines, and poll workers may exacerbate the racial wait gap. Insufficient non-English-language assistance may be one contributing factor. Our interview set revealed that while some election officials are aware of a growing number of voters who need election materials in non-English languages, few counties that

are not mandated to provide such materials proactively do so.<sup>42</sup>

Commentators have long noted that voting can be daunting for individuals whose first language is not English. Inadequate assistance provided to these voters can result in confusion and delays at the polls.<sup>43</sup> Simply adding more poll workers in a Spanish-preferred neighborhood, for instance, is likely to have little effect on voter wait times if the bottlenecks in these polling places arise from language-based confusion and the additional poll workers do not speak Spanish.

Section 203 of the Voting Rights Act (VRA) requires certain jurisdictions to provide multilingual voting materials and language assistance at polling places.<sup>44</sup> Roughly one third of the counties whose officials were interviewed for this report fall into that category.<sup>45</sup> Many of the election administrators we spoke to are taking steps to comply with their legal obligations.<sup>46</sup> However, some county election officials told us they face challenges in providing adequate language assistance resources despite the mandate to do so.<sup>47</sup>

Furthermore, while Section 203 provides a critical safety net, it should not be the only measure of a jurisdiction’s language assistance needs. Many jurisdictions that are not yet required to meet the VRA’s language assistance mandates have significant and growing numbers of voters who do not speak English as their first language.<sup>48</sup> Nevertheless, we found that among the counties whose officials we interviewed, most offer few to no services to voters with limited English proficiency.<sup>49</sup> In Manassas City, Virginia, for example, Latinos make up nearly 40 percent of the overall population.<sup>50</sup> Although the county does recruit Spanish-speaking poll workers, it has had difficulty recruiting an adequate number for Election Day and does not provide ballots or other materials in Spanish.<sup>51</sup>

## Voters with Fewer Electoral Resources Wait Longer to Vote

**M**any factors influence how long voters wait in line on Election Day, and long waits can arise both from decisions made by election administrators and from voter behavior. For example, the time of day when a person shows up to vote, the physical layout of a polling place, and the type of voting machine used all influence the amount of time it takes to cast a ballot.<sup>49</sup>

Some research has attempted to understand the relationship between wait times and electoral resources.<sup>50</sup> However, no previous study has examined the relationship on a nationwide scale. We present here the first national-level statistical evidence that counties with fewer electoral resources relative to other counties had longer wait times in 2018.

Analyzing data from the EAVS and the CCES, we found that voters in counties with fewer electoral resources per voter than other counties reported longer wait times, on average, in 2018. This was true for each of the three primary ways of measuring electoral resources: votes cast per polling place, votes cast per poll worker, and votes cast per machine. The more voters per electoral resource allocated, the longer the delay. Voters in counties with the most voters per polling place, poll worker, and machine were also the most likely to wait in lines of 30 minutes or more.

- In 2018, voters in counties with the most voters per polling place waited more than twice as long as voters in counties with the fewest voters per polling place.
- Inadequate numbers of poll workers were an especially important contributor to long waits. In counties with the fewest voters per poll worker, voters waited less than 5 minutes; where poll workers were spread among the most voters, the average wait time was nearly 15 minutes.
- Counties with the most machines available for voters saw average waits of around 5 minutes, while the average wait time in counties with the fewest machines per voter was more than 13.5 minutes.

These findings hold true even after controlling for socio-demographic characteristics of individuals and their counties.

### Factors Contributing to Inadequate Resource Allocation

Resource allocation decisions are made largely at the local level, with some state guidance. In our interviews, we found that county election administrators look to four main factors

when determining how to allocate resources: funding, statutory requirements or guidelines, the quality of available resources, and unique community needs, as shown by such indicators as voting trends and demographic shifts.<sup>51</sup>

As a result of this decentralized approach to resource allocation, resourcing varied substantially — both between and within states — in the 2018 election. In places like North Carolina, there were tremendous disparities in the level of resources available to voters on Election Day from one county to the next. In several North Carolina counties, there were more than 500 voters per voting machine in 2018, while in others there were as few as 51.<sup>52</sup>

More broadly, the discrepancy between the best and the worst was significant: the 10 percent of counties with the fewest voters per polling place averaged fewer than 185 voters per site, while the 10 percent of counties with the most voters per polling place averaged over 1,060 voters per site.

### Counties That Became Less White and Counties with Declining Incomes Had Fewer Resources Per Voter in 2018 than Other Counties

We found an alarming correlation between demographic and economic change over the past decade and electoral resources in 2018.<sup>53</sup> Counties where the white share of the population shrank over the past 10 years had fewer resources per voter relative to other counties. Additionally, counties where real (that is, inflation-adjusted) incomes declined or grew slowly had fewer resources per voter — even after accounting for other factors — than those where real incomes grew quickly.<sup>54</sup>

- The average county where the population became whiter had 63 voters per poll worker and about 390 voters per polling place. In comparison, the average county that became less white had 80 voters per worker and 550 voters per polling place.<sup>55</sup>
- Similarly, counties where the median income grew quickly over this same period had greater numbers of polling places and poll workers per vote cast in 2018 than those counties where the median real income

**APPENDIX C**

declined or grew slowly. The average county where real incomes grew had 74 voters per worker and 470 voters per polling place, while the average county where real incomes declined had 82 voters per worker and 590 voters per polling place.<sup>56</sup>

An example is useful to understand these findings. If two counties were equally white in 2017, but one had seen its white share of the population decline over the preceding 10 years while the other had seen its white share remain constant, the county where the white population had declined would likely have had fewer electoral resources per voter in 2018, according to our models.

In the analysis above, we divided counties into discrete groups: places that became less white or more white over the past decade, and places where incomes went down or up over the same period. Regression analysis shows that what matters is not just *whether* these counties became less white or saw incomes decline, but also the *extent* to which these changes occurred. Not only did counties that became less white have fewer resources per voter than counties that became whiter; counties where the white share of the population declined dramatically had fewer resources per voter than counties where there was only a modest decline of the white share of the population. Likewise, counties where median incomes declined most dramatically had fewer resources per voter than those where the decline was less pronounced.

Our findings align closely with related social science research. Multiple studies have found that jurisdictions undergoing demographic change often struggle to fund and provide public goods.<sup>57</sup> As one paper examining demographic change and residents' willingness to increase taxes explains, it is "communities that have undergone sudden demographic changes, not communities that have long been diverse, where diversity's effects are pronounced."<sup>58</sup> Counties where incomes have decreased have a diminishing tax base and, consequently, are likely to cut back on public expenditures more quickly than counties with more stable tax receipts. While a county's demographic profile matters for resource allocation, so too do *changes* in these demographics — and counties that are getting whiter and where incomes are growing may be investing more in critical electoral resources.

#### **Noncompliance with Statewide Minimum Requirements**

One way to address the risk of significant resource disparities within states is to set and enforce robust statewide minimum requirements for electoral resources. At least 25 states have laws setting a floor for the number of polling places.<sup>59</sup> At least 15 states have laws pertaining to minimum numbers of voting machines or poll workers per voter.<sup>60</sup>

These statutes are of little value, however, if they are not enforced. We analyzed statutory compliance nationwide and found that noncompliance was common in the

2018 election in several states. For example:

- In Illinois, 42 percent of precincts had more than 800 voters, the maximum allowed by law, and roughly 20 percent of counties had countywide averages exceeding the state maximum of 400 voters per machine.<sup>61</sup>
- In Michigan, nearly a quarter of all precincts had more than the legally mandated 2,999 registered voters, and nearly 50 percent of counties had more than 600 registered voters per machine, the maximum allowed.<sup>62</sup>
- In South Carolina, 31 of 46 counties exceeded the maximum of 250 voters per machine allowed by the state, for a 67 percent noncompliance rate.<sup>63</sup> More than 2.5 million South Carolinians are active registered voters in counties that have statutorily inadequate numbers of machines.

Furthermore, countywide averages can cover up variations within counties where some precincts are well resourced and others struggle. Hall County, Georgia, provides an example of how this plays out on the ground. Although the *average* number of voters per machine in the county did not exceed state maximums, one-third of polling places in the county had more registered voters per machine than the state allowed.<sup>64</sup> Accordingly, depending on where they lived, voters in Hall County were assigned to polling places with different resources on Election Day, leading to divergent voting experiences.

#### **Inadequate Planning Practices**

Our interviews with election administrators suggest that some counties' election planning practices may be inadequate in the face of growing turnout and uncertainty over moves to early voting. Election administrators in several states across the country reported that they relied on turnout in comparable prior elections in their planning processes for the 2018 election.<sup>65</sup> (That is, while planning for the federal midterm election, administrators looked to turnout in previous federal midterms.) Overreliance on past turnout as a predictor of resource needs, however, can lead to significant problems when turnout surges, as it did in 2018. It is likely to do so again in 2020.<sup>66</sup>

Prince George's County, Maryland, for example, used a formula that relied on historical turnout to determine the number of ballots supplied on Election Day.<sup>67</sup> According to one election administrator, this formula had "always worked up until the 2018 general Election Day,"<sup>68</sup> when voters turned out at extraordinary rates.<sup>69</sup> Officials had overestimated the number of early voters and underestimated the number of Election Day voters.<sup>70</sup> Thirteen precincts ran out of ballots on Election Day.<sup>71</sup> Hundreds of voters reportedly waited hours to vote, some past 10 p.m.<sup>72</sup> Prince George's County has since decided it will no longer use this method of resource allocation.<sup>73</sup>

### New Laws Threaten Access to Early Voting

>> **Existing challenges** related to inadequate planning and resources during early voting could be exacerbated by new laws that reduce the number of early voting locations and disenfranchise voters in smaller communities. For example:

- North Carolina's Senate Bill 325 — passed in 2018 — mandates uniform hours of operation at all temporary early voting sites.<sup>74</sup> An administrator in North Carolina explained that some counties had difficulty funding early voting sites because of the uniform hours requirement and thus had to close locations. In Forsyth County,

election officials were forced to use a contingency fund to comply with the new law.<sup>75</sup>

- Prior to the 2019 election, Texas implemented House Bill 1888, which requires early voting sites to remain open for the entire early voting period, eliminating mobile early voting sites.<sup>76</sup> In Travis County, an official explained that the law placed significant financial burden on the county and most directly targeted both rural voters and young voters on college campuses, many of whom lived in areas whose populations do not justify a permanent early voting site.<sup>77</sup>

This approach to planning can cause special problems in connection with early voting. Opportunities to cast a ballot before Election Day are increasingly popular, and administrators are struggling to predict turnout levels at early voting locations.<sup>78</sup> This contributes to delays at the polls.<sup>79</sup> In fact, according to our analysis of CCES data, early in-person voters were slightly more likely to face long waits than in-person Election Day voters.

### Polling Place Closures

Another well-documented phenomenon is the steady increase in polling place closures.<sup>80</sup> These closures might not be a problem if they simply reflected voters shifting to early, mail, or absentee voting. The U.S. Election Assistance Commission claims that a decrease in Election Day polling places can likely be explained by rising rates of early and absentee voting in some states and a shift to Election Day vote centers in others.<sup>81</sup> We found, however, that several states with troubling voting rights records have seen the number of Election Day ballots cast per polling place swell in the past five years, suggesting that these closures are outpacing changes in voter behavior.<sup>82</sup>

Using the EAVS, we tested the early voting hypothesis in Georgia and Louisiana, which have robust early voting programs and have been closing polling places over the past several years. We found that the increasing use of early voting fails to fully account for the increase in polling place closures. According to our analysis of EAVS data, the average polling place in Georgia had 530 in-person Election Day ballots cast in 2014. In 2018, the average polling place saw 770 in-person Election Day voters, an increase of nearly 50 percent. In Georgia and Louisiana, polling places are being closed faster than voters are switching to early voting.

The shift to vote centers raises a related concern.<sup>83</sup> Vote centers replace the precinct-based system, instead allowing voters to cast a ballot at any location within their county.<sup>84</sup> This approach can be efficient and voter friendly by giving voters access to a greater number of polling locations. The transition to this system, however, can be fraught.

Officials report that it can be difficult to accurately determine turnout at newly implemented vote centers, which results in inadequate resources and long lines.<sup>85</sup> Are voters more likely to cast a ballot near their home before work? At their children's school? Or at a location near work on their lunch break? The difficulty of predicting the answers to these questions leads to some polling places being overresourced and others underresourced.

### Polling Place Statutes: A Potential Bulwark Against Closures

>> **Thirty-two states** have laws specifically pertaining to the closure of polling places.<sup>86</sup> These provisions set a procedural backstop that localities must follow when attempting to consolidate voting locations. Some states establish a time frame — ranging from several months to one week before an election — after which polling places cannot be moved, closed, or altered in any way.<sup>87</sup> Several polling place laws impose a "good cause" requirement, mandating that alterations to previously selected polling places may only occur when there is "an . . . unavoidable event," or in even more extreme circumstances, where there is "an emergency caused by an act of God."<sup>88</sup> Many statutes even describe steps officials must take to notify voters when closing polling places.<sup>89</sup>

>> **Although noncompliance** may currently be common, polling place laws can provide a statutory avenue for judicial intervention to regulate the closure of voting locations, particularly in vulnerable communities.<sup>90</sup> Additionally, in counties impacted by polling place closures, transparency and advance warnings regarding reductions — which in turn create opportunities for advocacy and activism — can effectively stave off closures.

**APPENDIX C**

For example, Clark County, Nevada, moved to vote centers for the 2018 election.<sup>91</sup> According to a county election official, this move made it harder to forecast critical elements of voter behavior.<sup>92</sup> The unpredictability of citizens' responses to the new vote center model, coupled with record turnout in Nevada, created long lines throughout the county.<sup>93</sup>

Looking ahead to the 2020 election, more than 60 counties in Texas, including several of the state's largest,

are expected to use vote centers.<sup>94</sup> Under Texas law, counties moving to vote centers are permitted to reduce the number of polling locations by 35 percent in the first election in which the model is used and by 50 percent in subsequent elections.<sup>95</sup> Some major counties have committed to maintaining past voting locations during the transition to vote centers.<sup>96</sup> Others already plan to shutter polling places.<sup>97</sup>

## Electoral Resource Challenges in 2020 and Beyond: Policy Recommendations

The 2020 election will challenge election administrators even more than the 2018 election did.<sup>98</sup> Some project even higher turnout, given the hotly contested presidential race.<sup>99</sup> And many voters will continue to have the option to cast a ballot at times other than Election Day, increasing uncertainty in election planning.<sup>100</sup>

Our analysis of the survey data, electoral resource statutes, and interviews with election administrators suggests several worrisome trends that could lead to long — and uneven — wait times. However, with careful and proactive planning, our election system can be prepared to handle an uncommonly busy Election Day.

We make the following specific recommendations to election administrators:

- **Provide resources sufficient to minimize voter wait times.** Election officials in counties that have encountered long waits in recent elections should increase the quantity and quality of allocated resources — namely, polling places, poll workers, and voting machines — and state lawmakers should ensure that resources are allocated sensibly among and within counties to prevent disparate wait times.
- **Plan for an above-trend spike in turnout.** Voter turnout is poised to increase dramatically in 2020,<sup>101</sup> and election administrators must avoid being misled by past turnout trends in presidential elections when making resource allocation decisions. As part of a conservative approach to resource allocation, counties should take into account their total number of registered voters. Consulting with community groups and experts in the field can help with allocation decision-making, as can exploring innovative technology. For example, the Rhode Island Board of Elections partnered with the University of Rhode Island to develop resource allocation algorithms.<sup>102</sup> According to the board, decisions derived from these algorithms have “helped eliminate most lines.”<sup>103</sup>
- **Account for policy changes that may impact turnout.** State election policies can change from election to election, and these changes can impact the number of individuals who vote on Election Day. Nevada, for example, will have automatic voter registration and same-day voter registration for the first time in 2020.<sup>104</sup> These pro-voter reforms expand access to the ballot box and improve election administration but can throw off election administrators’ turnout predictions. Election administrators must take new policies such as Nevada’s into account when estimating turnout levels and allocating resources.
- **Increase compliance with resource mandates.** State officials should review their standards for resource allocation and ensure counties’ compliance. Statutes mandating minimum levels of electoral resources also enable advocacy organizations, state attorneys general, and members of the public to monitor electoral resource allocation. Advocates should hold states to those standards in 2020.
- **Limit polling place closures.** In recent years, election officials have closed numerous polling locations.<sup>105</sup> As we have stated in this report, increased early voting does not fully account for these closures. Administrators should examine voter turnout data and early voting usage and avoid closing polling places without firm analytical evidence that doing so will not overburden remaining polling places. Further, election officials should consider opening additional polling places in areas where voter turnout levels are expected to be particularly high and long lines have developed in past elections.
- **Develop comprehensive vote center transition plans.** Administrators should act carefully when transitioning to vote centers. These should be piloted in lower-turnout elections so that administrators can better predict voter distribution trends. Administrators should also not close or combine voting locations until they fully understand how voters plan to use vote centers.<sup>106</sup> In addition, election officials should consider employing technological solutions to smooth the transition and maximize the effectiveness of the vote center model. In Williamson County, Texas, for example, voters can access a smartphone app that shows the nearest voting location in their county and the location with the shortest wait.<sup>107</sup>
- **Expand language assistance.** Jurisdictions that narrowly missed the numerical threshold that would require them to provide non-English-language voting assistance under the Voting Rights Act should nonetheless aim to provide such assistance in the 2020 election.<sup>108</sup> In addition, lawmakers should follow the lead of cities and states that have gone beyond the VRA’s requirements. For example, California has a lower

**APPENDIX C**

threshold for language assistance coverage than is federally mandated and has continued to expand access to non-English-language voting materials to communities throughout the state.<sup>109</sup> Proactive language assis-

tance policies will help ensure that all voters are able to cast a ballot and minimize confusion and delay at polling places.

## Quantitative Technical Appendix

---

**I**n this technical appendix, we present a fuller discussion of the quantitative data sources used in this report and the statistical models used to arrive at our results.

### Data Sources

**Much of the existing literature on long lines on Election Day** has drawn from two national survey instruments: the Survey of the Performance of American Elections (SPAEC) and the Cooperative Congressional Election Study (CCES).<sup>109</sup> Both survey instruments have historically asked voters about their experiences on Election Day, including how long they had to wait in line to cast a ballot. Unfortunately, the SPAEC was not fielded after the 2018 election. This report, therefore, contains only estimates from the CCES on how long individuals waited in line to cast a ballot in the 2018 election.

Respondents to the CCES are asked approximately how long they had to wait to vote. Voters can pick from different buckets, such as “less than 10 minutes” or “10–30 minutes.” Respondents’ wait times are assumed to be the middle of each bucket; therefore, if someone reports waiting between 10 and 30 minutes, we assume the wait time to be 20 minutes. Voters who report waiting longer than 60 minutes are asked to approximate the number of minutes they spent in line in a free-text box; these responses have been manually coded by the Brennan Center research team.

To estimate county-level electoral resources, we incorporate data from the U.S. Election Assistance Commission’s biennial Election Administration and Voting Survey (EAVS). The EAVS asks election administrators many questions about how elections are conducted in their jurisdictions. The Brennan Center previously used the EAVS to research voter purges.<sup>110</sup> Other academic researchers have used the survey to investigate different aspects of election administration.<sup>112</sup> Here we use the information regarding the resources each jurisdiction reported deploying on Election Day. We specifically examine the number of polling places, poll workers, and voting machines deployed in each county.<sup>113</sup>

Not all jurisdictions respond to the EAVS each year. Although a larger share of election administrators responded to the EAVS in 2018 than in prior years, we still do not know the resources in place on Election Day for every voter in the country. When we merge the CCES and EAVS data, however, we can calculate the number of voters per polling place, the number of voters per worker, and the number of voters per machine for at least four out of every five voters in the country.<sup>114</sup>

A further issue with the EAVS is that, even when election administrators do respond to the survey, the data is sometimes clearly incorrect. Iowa, for instance, reported

in 2018 that there were nearly 800,000 polling places. To avoid biasing our results, we have removed Iowa polling place data. To guard against the possibility of other erroneous data, we also exclude the 1 percent of counties reporting the most voters per polling place, voters per poll worker, and voters per machine. While it is not perfect, the EAVS data remains the best option available for researchers investigating national patterns in the distribution of Election Day resources.

### Regression Specifications

**The results discussed in the body of the report show** that voters of color waited longer to vote and that voters in counties with fewer electoral resources per voter waited longer. We also show that counties where the white share of the population and real incomes declined had fewer electoral resources per voter on Election Day in 2018. These results are based on regression analysis, a common technique used among political scientists to understand the relationships among different variables.

#### Racial Wait Gap

We begin by presenting the regression model that interrogates wait times on Election Day, by race. As table 1 makes clear, nonwhite voters wait significantly longer: Black voters waited 2.8 minutes longer than white voters, and Latino voters waited 3.0 minutes longer than white voters, on average. Even after we add state fixed effects in model 2 (that is, after we control for the fact that some states have higher wait times than others), we see that voters of color waited in longer lines. This means that in any given state, these voters were more likely to wait in long lines, and that they were not simply more likely to live in states with longer wait times for everyone.

In model 3, we introduce county-level characteristics. These data sets are all derived from the Census Bureau’s five-year American Community Survey estimates that end in 2017, and information about machine types comes from Verified Voting. After including these county-level factors, the Latino coefficient remains statistically significant. This means that, on average, Latino voters wait longer than white voters even after we account for important differences in the types of counties in which they live. Model 3 also makes clear that less-dense counties and those with older voters had shorter wait times on Election Day in 2018.

**APPENDIX C**

In model 3, the Black voter coefficient is no longer statistically significant. This means that much of the increased wait times faced by Black voters in 2018 could be explained by county-level factors. Black voters are more likely to live in denser counties with younger voters, where *all* voters faced longer waits.

Finally, model 4 adds individual characteristics to model 3. These include the respondent's family income, age, partisan affiliation, education, and marital status. We find that younger voters report waiting longer, but little else about an individual's characteristics explains wait time after we have accounted for the type of county in which the voter lives.

In model 4, the gaps between Black and white voters, and between Latino and white voters, are statistically nonsignificant at the 95 percent confidence level, but they are significant and negative for Asian and other voters. This means that racial minorities did not wait longer to vote in 2018 than white voters who lived in similar counties and had similar individual characteristics. Racial minorities, rather, are overrepresented among populations that wait longer across the board. In each model, robust standard errors are clustered by county.

**Electoral Resources and Wait Times**

To test the relationship between the number of voters per electoral resource in a county and voter wait times, we begin with the final model from the previous section; that is, we start with a statistical model that accounts for voters' individual, county, and state characteristics to explain wait times. We add to this model additional variables calculated using the EAVS data: the number of votes cast per polling place, per poll worker, and per voting machine. Table 2 presents the results of these models.

We find that voters who lived in counties with more votes cast per polling place on Election Day in 2018 waited longer to vote. This is true even after controlling for the other sociodemographic characteristics discussed in the previous section. Figure 1 presents the marginal effects plot demonstrating the relationship between votes per polling place and reported wait times. A marginal effects plot allows us to see the relationship between an independent variable of interest (the number of votes per polling place) and the dependent variable (reported wait times) after controlling for other variables. Figure 1 demonstrates that, after controlling for other characteristics, voters in counties with few voters per polling place waited in short lines. Counties with the fewest voters per polling place waited an average of only around 4 minutes, while voters in counties with the most voters per polling place had average waits of more than 10 minutes. In each of the charts below, the 95 percent confidence

band is included.

The theoretical relationship between the number of voters per poll worker and wait times is straightforward: workers must be available to check voters in, distribute ballots, and help address any confusion voters might have. Unsurprisingly, we find that as the number of voters per poll worker goes up, so too does the average wait time (again, after controlling for all other variables). Figure 2 shows that the average wait time in counties with the fewest voters per worker was less than 5 minutes; where poll workers were spread among the most voters, that average wait time exceeded 12 minutes.

The same pattern holds true when we examine the relationship between the average number of votes cast per machine at the county level. As figure 3 shows, holding all other factors constant, fewer machines per vote cast might cause bottlenecks that lead to longer lines. The most highly resourced counties saw average waits of around 5 minutes, while the average wait time in counties with the most voters per machine averaged more than 13.5 minutes.

Table 3 makes clear that, in addition to waiting longer overall, voters in the least-resourced counties were also more likely to wait in line for 30 minutes or more. These models use a logistic specification — the dependent variable takes the value "1" if a voter reported waiting 30 minutes or more, and a "0" otherwise. Once again, robust standard errors are clustered by state.

The marginal effects plots of these regressions, shown in figures 4, 5, and 6, make the relationship between electoral resources and long waits more apparent. These plots demonstrate that, after controlling for other sociodemographic county characteristics, fewer electoral resources per voter are associated with an increased likelihood of waiting more than 30 minutes. The 95 percent confidence interval is included.

**County Characteristics and Resourcing Levels**

Finally, we investigate which types of counties were the most likely to be inadequately resourced on Election Day in 2018. As discussed in the body of the report, counties that became whiter in the past decade had more resources in 2018 than counties that became less white. Similarly, counties where the median income grew (after accounting for inflation, estimated by the Bureau of Labor Statistics) had more resources than places where real incomes shrank. Table 4 demonstrates that these phenomena hold even after controlling for other relevant county and state characteristics.

Whiter and higher-income counties consistently had fewer resources on Election Day in 2018 than less white and less affluent counties. At the same time, counties in flux — those that saw their incomes decline or grow slowly, and those where the white share of the popula-

**APPENDIX C**

tion decreased the most quickly, over the past decade — had fewer resources than those that had remained more stable.

While the coefficients on change in percent non-His-

panic white and change in median income are quite large, this is driven in part by the relatively small range into which counties fall. Figures 7-II present the marginal effects plots for these models.

- 3** This statistic is calculated by multiplying the share of Election Day voters who waited longer than 30 minutes by the share of all voters who cast a ballot on Election Day, using data from the Cooperative Congressional Election Study (CCES), Brian Schaffner, Stephen Ansolabehere, and Sam Luks, *CCES Common Content*, 2018, Harvard Dataverse, 2019, <https://doi.org/10.7910/DVN/ZSBZ7K>. This determines the total share of the electorate that waited 30 minutes or longer on Election Day, according to the CCES. This share is multiplied by the total number of ballots cast, estimated by the United States Elections Project, "2018 November General Election Turnout Rates," last modified December 14, 2018, <http://www.electproject.org/2018a>.
- 4** Matthew Weil et al., *The 2018 Voting Experience: Polling Place Lines*, Bipartisan Policy Center, 2019, 6, <https://bipartisanpolicy.org/report/the-2018-voting-experience>.
- 5** Weil et al., *The 2018 Voting Experience*, 3–4.
- 6** Election administrators in the following counties and states were interviewed for this report: Shelby County, Alabama; Maricopa County, Arizona; Forsyth County, Georgia; Fulton County, Georgia; Gwinnett County, Georgia; Peoria County, Illinois; Prince George's County, Maryland; Detroit, Michigan; Macomb County, Michigan; Jackson County, Missouri; Clark County, Nevada; Washoe County, Nevada; State of New York; Durham County, North Carolina; Forsyth County, North Carolina; Guilford County, North Carolina; Butler County, Ohio; Franklin County, Ohio; Licking County, Ohio; Marion County, Ohio; State of Rhode Island; Charleston County, South Carolina; State of South Carolina; Davidson County, Tennessee; Denton County, Texas; Fort Bend County, Texas; Harris County, Texas; Hays County, Texas; Tarrant County, Texas; Travis County, Texas; Williamson County, Texas; and Manassas County, Virginia. All interview transcripts are on file with the Brennan Center.
- 7** This report incorporates data from three sources: the Cooperative Congressional Election Study, the Election Administration and Voting Survey, and the five-year American Community Survey. See Schaffner, Ansolabehere, and Luks, *CCES Common Content*; U.S. Election Assistance Commission, *Election Administration and Voting Survey: 2018 Comprehensive Report*, 2019, [https://www.eac.gov/sites/default/files/eaas/assets/1/6/2018\\_EAVS\\_Report.pdf](https://www.eac.gov/sites/default/files/eaas/assets/1/6/2018_EAVS_Report.pdf); and Census Bureau, "American Community Survey 5-Year Data (2009–2018)," December 19, 2019, <https://www.census.gov/data/developers/data-sets/acs-5year.html>.
- 8** For instance, Michael Herron and Daniel Smith, "Precinct Resources and Voter Wait Times," *Electoral Studies* 42 (June 2016): 249, [https://www.researchgate.net/publication/299503594\\_Precinct\\_resources\\_and\\_voter\\_wait\\_times](https://www.researchgate.net/publication/299503594_Precinct_resources_and_voter_wait_times).
- 9** Throughout this report, "white" corresponds to the census designation "non-Hispanic white." Following the CCES, we use it as a category exclusive of Latinos. "Voters of color" refers specifically to Black and Latino voters.
- 10** Brennan Center for Justice, "Bipartisan Presidential Commission Endorses Modernizing Voter Registration," December 1, 2014, <https://www.brennancenter.org/our-work/research-reports/bipartisan-presidential-commission-endorses-modernizing-voter-registration>.
- 11** We define "resources" throughout this report as the number of in-person Election Day votes per Election Day polling place, poll workers, and machines available.
- 12** These differences are significant at the 95 percent confidence level.
- 13** For turnout in 2014, see David Becker, "2014 Midterms Defined by Low Voter Turnout," Pew Research Center, 2014, <https://www.pewtrusts.org/en/research-and-analysis/articles/2014/11/13/2014-midterms-defined-by-low-voter-turnout>. For turnout in 2018, see Krogstand, Noe-Bustamante, and Flores, "Historic Highs in 2018 Voter Turnout."

- 16** Calculated from responses to Schaffner, Ansolabehere, and Luks, *CCES Common Content*.
- 17** The CCES also has a prelection wave in even years and a much smaller sample in odd years.
- 18** Charles Stewart III and Stephen Ansolabehere, *Waiting in Line to Vote*, U.S. Election Assistance Commission, July 18, 2013, <https://www.eac.gov/documents/2017/02/24/waiting-in-line-to-vote-white-paper-stewart-ansolabehere>; Charles Stewart III, *Managing Polling Place Resources*, Caltech/MIT Voting Technology Project, 2015, <http://web.mit.edu/vtp/Managing%20Polling%20Place%20Resources.pdf>; and Stephen Pettigrew, "The Racial Gap in Wait Times: Why Minority Precincts Are Underserved by Local Election Officials," *Political Science Quarterly* 132, 3 (2017): 528.
- 19** U.S. Election Assistance Commission, *Election Administration and Voting Survey: 2018*.
- 20** To test whether counties were inequitable in distributing resources within their jurisdictions, we analyzed precinct-level data from counties around the country. We focused in particular on

## APPENDIX C

- counties where reports of racial disparities were loudest. We found that counties did not allocate fewer resources to polling places in low-income or minority neighborhoods; in fact, in the counties where we found disparities, polling places in higher-income and whiter neighborhoods tended to have the fewest resources.
- 21** These include every county in Oregon, Washington, and Colorado, most counties in Utah and North Dakota, and a number of counties in California and Nebraska. Although some voters in states like Colorado vote in person on Election Day, the experience of an in-person voter in a primarily vote-by-mail state provides little insight into the relationship between wait times and resources.
- 22** The full set of interviews appears in note 6.
- 23** Throughout this report, we use the vote-verified postelection weights from the CCES.
- 24** This statistic is calculated by multiplying the share of Election Day voters who waited 30 minutes or longer by the share of all voters who cast a ballot on Election Day. This determines the total share of the electorate that waited 30 minutes or longer on Election Day, according to the CCES. This share is multiplied by the total number of ballots cast, estimated by the United States Elections Project. United States Elections Project. "2018 November General Election Turnout Rates."
- 25** For example, for the 2008 and 2012 elections, see Pettigrew, "The Racial Gap in Wait Times," 527–528. For the 2016 election, see M. Keith Chen et al., *Racial Disparities in Voting Wait Times: Evidence from Smartphone Data*, Cornell University, 2019, 1, <https://arxiv.org/pdf/1909.00024.pdf>.

- 41** Voting Rights Act of 1965, 52 U.S.C. § 10503 (1965); U.S. Census Bureau, "How the Law Prescribes the Determination of Covered Areas under the Language Minority Provisions of Section 203 of the Voting Rights Act," accessed January 21, 2020, [https://www2.census.gov/programs-surveys/decennial/rdo/about/voting-rights-determination/2\\_PrescribedFlowFor203Determinations.pdf](https://www2.census.gov/programs-surveys/decennial/rdo/about/voting-rights-determination/2_PrescribedFlowFor203Determinations.pdf).
- 42** The jurisdictions covered under VRA Section 203 whose election officials were interviewed for this report are Maricopa County, Arizona; Clark County, Nevada; Gwinnett County, Georgia; Williamson County, Texas; Hays County, Texas; Tarrant County, Texas; Fort Bend County, Texas; Harris County, Texas; Travis County, Texas; and Denton County, Texas. U.S. Census Bureau, "Section 203 of the Voting Rights Act: Covered Areas for Voting Rights Bilingual Election Materials," accessed March 2, 2020, [https://www.census.gov/content/dam/Census/newsroom/press-kits/2017/esri/esri uc2017\\_voting\\_rights\\_act.pdf](https://www.census.gov/content/dam/Census/newsroom/press-kits/2017/esri/esri uc2017_voting_rights_act.pdf).
- 43** In the months leading up to the 2018 election, the American Civil Liberties Union (ACLU) determined that 36 county websites in Texas lacked sufficient Spanish-language resources and sent notice letters to county officials. Many counties responded positively and took steps to ensure that their websites were accessible to Spanish speakers. ACLU of Texas, "ACLU of Texas Puts Counties on Notice for Possible Violations of Voting Rights Act," September 24, 2018, <https://www.aclutz.org/en/press-releases/aclu-texas-notices-counties-possible-violations-voting-rights-act>.
- 44** Election administrator, Clark County, Nevada, interview by Brennan Center for Justice, October 21, 2019; election administrator, Prince George's County, Maryland, interview by Brennan Center for Justice, October 24, 2019; election administrator, Tarrant County, Texas, interview by Brennan Center for Justice, November 13, 2019; election administrator, Travis County, Texas, interview by Brennan Center for Justice, November 22, 2019; and election administrator, Williamson County, Texas, interview by Brennan Center for Justice, October 16, 2019.
- 45** One study estimated that nearly 6 million voters with limited English proficiency would fail to receive federal language accommodations during the 2018 midterm election. Richard Salame, "Vote Aquí? Limited-English-Proficiency Voters Could Help Determine Congress," *The Nation*, November 5, 2018, <https://www.thenation.com/article/limited-english-voters-investigation-election>.
- 46** Election administrator, Butler County, Ohio, interview by Brennan Center for Justice, October 29, 2019; election administrators, Licking County, Ohio, interview by Brennan Center for Justice, November 12, 2019; election administrators, Marion County, Ohio,

## APPENDIX C

- interview by Brennan Center for Justice, November 15, 2019; election administrator, Charleston County, South Carolina, interview by Brennan Center for Justice, October 14, 2019; election administrator, Davidson County, Tennessee, interview by Brennan Center for Justice, November 4, 2019; election administrator, Fulton County, Georgia, interview by Brennan Center for Justice, October 24, 2019; election administrator, Durham County, North Carolina, interview by Brennan Center for Justice, November 18, 2019; election administrators, Jackson County, Missouri, interview by Brennan Center for Justice, October 16, 2019; election administrator, Peoria County, Illinois, interview by Brennan Center for Justice, October 29, 2019; election administrators, Shelby County, Alabama, interview by Brennan Center for Justice, November 15, 2019; and election administrator, Manassas County, Virginia, interview by Brennan Center for Justice, October 28, 2019.
- 47** U.S. Census Bureau, "QuickFacts: Manassas City, Virginia (County)," accessed January 21, 2020, <https://www.census.gov/quickfacts/fact/table/manassascityvirginiacounty/PST120218>.
- 48** Similarly, Peoria County, Illinois, has experienced demographic shifts since 2010. The county's white population has decreased and its Hispanic and Asian populations have both increased over the past decade. The county does not fall under the federal mandate, and election officials do not proactively recruit poll workers with translation skills or provide ballots in languages other than English. Election administrator, Peoria County, Illinois, interview by Brennan Center for Justice, October 29, 2019; and U.S. Census Bureau, "QuickFacts: Peoria County, Illinois," accessed January 21, 2020, <https://www.census.gov/quickfacts/peoriacountyillinois>.

- 50** See, for instance, Herron and Smith, *Precinct Resources*, 249–252.
- 51** Counties that look to funding when allocating resources: election administrators, Maricopa County, Arizona, interview by Brennan Center for Justice, November 22, 2019; election administrator, Forsyth County, Georgia, interview by Brennan Center for Justice, October 31, 2019; election administrator, Fulton County, Georgia, interview by Brennan Center for Justice, October 24, 2019; election administrator, Peoria County, Illinois, interview by Brennan Center for Justice, October 29, 2019; election administrator, Prince George's County, Maryland, interview by Brennan Center for Justice, October 24, 2019; election administrator, Detroit, Michigan, interview by Brennan Center for Justice, December 6, 2019; election administrator, Macomb County, Michigan, interview by Brennan Center for Justice, October 21, 2019; election administrator, Clark County, Nevada, interview by Brennan Center for Justice, October 21, 2019; election administrator, Washoe County, Nevada, interview by Brennan Center for Justice, October 15, 2019; election administrator, New York, interview by Brennan Center for Justice, November 13, 2019; election administrator, Durham County, North Carolina, interview by Brennan Center for Justice, November 18, 2019; election administrator, Forsyth County, North Carolina, interview by Brennan Center for Justice, October 22, 2019; election administrator, Guilford County, North Carolina, interview by Brennan Center for Justice, October 18, 2019; election administrator, Butler County, Ohio, interview by Brennan Center for Justice, October 29, 2019; election administrator, Franklin County, Ohio, interview by Brennan Center for Justice, November 13, 2019; election administrators, Marion County, Ohio, interview by Brennan Center for Justice, October 21, 2019; election administrator, Licking County, Ohio, interview by Brennan Center for Justice, November 12, 2019; election administrators, Marion County, Ohio, interview by Brennan Center for Justice, November 15, 2019; election administrators, Rhode Island, interview by Brennan Center for Justice, October 23, 2019; election administrator, Charleston County, South Carolina, interview by Brennan Center for Justice, October 14, 2019; election administrator, South Carolina, interview by Brennan Center for Justice, November 12, 2019; election administrator, Davidson County, Tennessee, interview by Brennan Center for Justice, November 4, 2019; election administrator, Denton County, Texas, interview by Brennan Center for Justice, November 19, 2019; election administrator, Hays County, Texas, interview by Brennan Center for Justice, October 29, 2019; election administrator, Williamson County, Texas, interview by Brennan Center for Justice, October 31, 2019; election administrator, Fulton County, Georgia, interview by Brennan Center for Justice, October 24, 2019; election administrator, Peoria County, Illinois, interview by Brennan Center for Justice, October 29, 2019; election administrator, Macomb County, Michigan, interview by Brennan Center for Justice, October 21, 2019; election administrator, Jackson County, Missouri, interview by Brennan Center for Justice, October 16, 2019; election administrator, Clark County, Nevada, interview by Brennan Center for

## APPENDIX C

- Justice, October 21, 2019; election administrator, Washoe County, Nevada, interview by Brennan Center for Justice, October 15, 2019; election administrator, New York, interview by Brennan Center for Justice, November 13, 2019; election administrator, Durham County, North Carolina, interview by Brennan Center for Justice, November 18, 2019; election administrator, Forsyth County, North Carolina, interview by Brennan Center for Justice, October 22, 2019; election administrator, Guilford County, North Carolina, interview by Brennan Center for Justice, October 18, 2019; election administrator, Butler County, Ohio, interview by Brennan Center for Justice, October 29, 2019; election administrator, Franklin County, Ohio, interview by Brennan Center for Justice, November 13, 2019; election administrators, Licking County, Ohio, interview by Brennan Center for Justice, November 12, 2019; election administrators, Rhode Island, interview by Brennan Center for Justice, October 23, 2019; election administrator, Charleston County, South Carolina, interview by Brennan Center for Justice, October 14, 2019; election administrator, South Carolina, interview by Brennan Center for Justice, November 12, 2019; election administrator, Davidson County, Tennessee, interview by Brennan Center for Justice, November 14, 2019; election administrator, Hays County, Texas, interview by Brennan Center for Justice, October 29, 2019; election administrator, Tarrant County, Texas, interview by Brennan Center for Justice, November 13, 2019; election administrator, Fort Bend County, Texas, interview by Brennan Center for Justice, November 12, 2019; election administrator, Williamson County, Texas, interview by Brennan Center for Justice, October 16, 2019; and election administrator, Manassas City, Virginia, interview by Brennan Center for Justice, October 28, 2019. Counties that look to unique community needs, such as voting trends and demographic shifts, when allocating resources: election administrators, Maricopa County, Arizona, interview by Brennan Center for Justice, November 22, 2019; election administrator, Forsyth County, Georgia, interview by Brennan Center for Justice, October 31, 2019; election administrator, Fulton County, Georgia, interview by Brennan Center for Justice, October 24, 2019; election administrator, Peoria County, Illinois, interview by Brennan Center for Justice, October 29, 2019; election administrator, Prince George's County, Maryland, interview by Brennan Center for Justice, October 24, 2019; election administrator, Macomb County, Michigan, interview by Brennan Center for Justice, October 21, 2019; election administrators, Jackson County, Missouri, interview by Brennan Center for Justice, October 16, 2019; election administrator, Clark County, Nevada, interview by Brennan Center for Justice, October 21, 2019; election administrator, Washoe County, Nevada, interview by Brennan Center for Justice, October 15, 2019; election administrator, New York, interview by Brennan Center for Justice, November 13, 2019; election administrator, Durham County, North Carolina, interview by Brennan Center for Justice, November 18, 2019; election administrator, Forsyth County, North Carolina, interview by Brennan Center for Justice, October 22, 2019; election administrator, Guilford County, North Carolina, interview by Brennan Center for Justice, October 18, 2019; election administrator, Butler County, Ohio, interview by Brennan Center for Justice, October 29, 2019; election administrator, Franklin County, Ohio, interview by Brennan Center for Justice, November 13, 2019; election administrators, Licking County, Ohio, interview by Brennan Center for Justice, November 12, 2019; election administrators, Rhode Island, interview by Brennan Center for Justice, October 23, 2019; election administrator, Charleston County, South Carolina, interview by Brennan Center for Justice, October 14, 2019; election administrator, South Carolina, interview by Brennan Center for Justice, November 12, 2019; election administrator, Davidson County, Tennessee, interview by Brennan Center for Justice, November 4, 2019; election administrator, Denton County, Texas, interview by Brennan Center for Justice, November 19, 2019; election administrator, Fort Bend County, Texas, interview by Brennan Center for Justice, November 12, 2019; election administrator, Harris County, Texas, interview by Brennan Center for Justice, November 14, 2019; election administrator, Hays County, Texas, interview by Brennan Center for Justice, October 29, 2019; election administrator, Tarrant County, Texas, interview by Brennan Center for Justice, November 13, 2019; election administrator, Travis County, Texas, interview by Brennan Center for Justice, November 22, 2019; election administrator, Williamson County, Texas, interview by Brennan Center for Justice, October 16, 2019; and election administrator, Manassas City, Virginia, interview by Brennan Center for Justice, October 28, 2019.
- 52** According to our analysis of the EAVS data.
- 53** The relationship between these demographic changes and the resource levels of counties are statistically significant in each case except for the change in white population relative to number of votes cast per machine. (The full regression tables can be found in the appendix.)
- 54** In an ideal world, we would be able to construct a panel data set that examined how resources and demographics change together. However, the EAVS prevents us from doing so: in years prior to 2018, too few jurisdictions consistently reported their resource levels to the EAVS. Given this, we interrogate the relationship between demographic change over a 10-year period and resource levels at the end of the period. We are therefore unable to say whether resources decline as populations change, but rather only that there were fewer resources at the end of the period in those places where incomes or white shares declined the most.
- 55** These differences are significant at the 95 percent confidence level.
- 56** These differences are significant at the 95 percent confidence level.

- 61** "The County Board in each county, except in counties having a population of 3,000,000 inhabitants or over, shall, at its regular meeting in June, divide its election precincts which contain more than 800 voters, into election districts so that each district shall

## APPENDIX C

contain, as near as may be practicable, 500 voters, and not more in any case than 800." 10 Ill. Comp. Stat. Ann. 5/11-2; 10. "A voting machine or machines sufficient in number to provide a machine for each 400 voters or fraction thereof shall be supplied for use at all elections." 10 Ill. Comp. Stat. Ann. 5/24-1.

**62** "When the voter registration in a precinct using voting machines exceeds 2,999, the precinct shall be divided or rearranged. When the voter registration in a precinct using voting machines is 1,000 or less, there shall be not less than 1 voting machine for each 500 active registered electors." And "when the voter registration in a precinct using voting machines is more than 1,000 and less than 3,000, there shall be at least 1 voting machine for each 600 active registered electors." Mich. Comp. Laws Ann. § 168.661 (West).

**63** "The governing body of any county or municipality providing voting machines at polling places for use at elections shall provide for each polling place at least one voting machine for each two hundred fifty registered voters or portion thereof or as near thereto as may be practicable. The machines shall be of the type approved as provided for in this title and shall be kept in complete and accurate working order and in proper repair. The machines may be used in such election districts or precincts in the county or municipality as the officials holding the election or conducting the primary may determine. The governing body of the county or municipality owning the machines shall have custody of such machines and other furniture or equipment of the polling places when not in use at an election." S.C. Code Ann. § 7-13-1680.

**64** "In each precinct in which voting machines are used, the municipal governing authority shall provide at least one voting machine for each 500 electors, or major fraction thereof, except that at least one voting machine shall be provided in each such precinct in any case." Ga. Code Ann. § 21-2-323 (West). Georgia plans to adopt new voting machines for the 2020 election, and Georgia law now requires that "[i]n each precinct in which optical scanning voting systems are used, the county or municipal governing authority, as appropriate, shall provide at least one voting booth or enclosure for each 250 electors therein, or fraction thereof." Ga. Code Ann. § 21-2-367(b) (West). In addition, Georgia has proposed a new rule that "when calculating the number of voting booths or enclosures required to be available to electors of a precinct pursuant to O.C.G.A. 21-2-367(b), the calculation shall take into account the number of voting booths or enclosures available for electors of a precinct on Election Day and on the last day of advance voting." Ga. Comp. R. & Regs. 183-1-14-01. "Brennan Center Submits Follow-Up Comment to Georgia State Board of Elections on Proposed Election Rules," Brennan Center for Justice, accessed March 2, 2020, <https://www.brennancenter.org/our-work/research-reports/brennan-center-submits-follow-up-comment-georgia-state-board-elections>.

**65** Election administrator, Durham County, North Carolina, interview by Brennan Center for Justice, November 18, 2019; election administrator, Prince George's County, Maryland, interview by Brennan Center for Justice, October 24, 2019; election administrator, Licking County, Ohio, interview by Brennan Center for Justice, November 12, 2019.

**66** For example, Durham County, North Carolina, experienced a major population boom over the past decade, growing by roughly 20 percent. However, election administrators in Durham told the Brennan Center that their resource allocation estimates are based heavily on turnout levels of past elections. Voter turnout in Durham in 2018 grew by more than 10 percent from the previous midterm election in 2014. Individuals in Durham also reported long wait times at some polling places in the county during early and Election Day voting. U.S. Census Bureau, "QuickFacts: Durham County, North Carolina," accessed January 21, 2020, <https://www.census.gov/quickfacts/fact/table/durhamcountync/PST045219>; election administrator, Durham County, North Carolina, interview by Brennan Center for Justice, November 18, 2019; Democracy North Carolina, Report: Democracy NC Analyzes 2018 Turnout, Reveals Youth Enthusiasm, Demographic Shifts, 2018, <https://democracync.org/news/2018-turnout-demonstrates-youth-enthusiasm-demographic-shifts>; Kirsten Rewritten, Twitter post, November 6, 2018, 9:40 a.m., <https://twitter.com/rewriteables/status/1059817800871694372>; and Battle for the Ballot, Twitter post, November 18, 2018, 12:14 p.m., <https://twitter.com/BallotBattle/status/1058754374439198720>.

**67** Election administrator, Prince George's County, Maryland, interview by Brennan Center for Justice, October 24, 2019.

**68** Election administrator, Prince George's County, Maryland, interview by Brennan Center for Justice, October 24, 2019.

**69** In the 2014 general midterm election, 230,599 ballots were cast in Prince George's County, a turnout rate of 42.34 percent. The turnout rate jumped to 55.57 percent in the 2018 general midterm election. Prince George's County Board of Elections, "Election Summary Report: Gubernatorial General Election," 2014, [http://electionresults.princegeorgescountymd.gov/ElectionResults/2014/general/Documents/1\\_DP\\_summary\\_1.htm](http://electionresults.princegeorgescountymd.gov/ElectionResults/2014/general/Documents/1_DP_summary_1.htm); and Prince George's County Board of Elections, "Summary by Canvass: Gubernatorial General Election," 2018, <https://www.princegeorgescountymd.gov/DocumentCenter/View/23819/Official-Summary-2018GG>.

**70** In 2014, roughly 46,236 voters in Prince George's County cast a ballot during the early voting period, compared with 158,912 votes cast during the same period in 2016. In the 2016 presidential election, 198,116 voters cast ballots on Election Day. In 2018, 102,863 votes were cast during the early voting period, and 196,338 were cast on Election Day. Maryland State Board of Elections, "Unofficial Early Voting Turnout: 2014 Gubernatorial General Election," 2014, [https://elections.maryland.gov/press\\_room/2014\\_stats/FG14\\_EarlyVoting\\_ByCounty.pdf](https://elections.maryland.gov/press_room/2014_stats/FG14_EarlyVoting_ByCounty.pdf); Maryland State Board of Elections, "2016 Presidential General Election: Total Voter Turnout," 2016, <https://elections.maryland.gov/elections/2016/turnout/general/Official%20Turnout.pdf>; and Maryland State Board of Elections, "2018 Gubernatorial General Election," 2018, <https://elections.maryland.gov/elections/2018/turnout/general/Official%20turnout.pdf>.

- 113** In most of the country, elections are administered at the county level. Congressional Research Service, *The State and Local Role in Election Administration: Duties and Structures*, 2019, 7, <https://fas.org/sgp/crs/misc/R45549.pdf>. Some states, like Wisconsin and New Hampshire, administer elections at lower levels. Congressional Research Service, *The State and Local Role*, 7–8. In these cases, the election districts are aggregated to the county level to maintain comparability with other parts of the country. For instance, if a Wisconsin county has three election jurisdictions, the county-wide number of polling places would be the sum of all polling places in each of these three jurisdictions. Alaska reports all election administration statistics to EAWS as a single jurisdiction. See Congressional Research Service, *The State and Local Role*, 7; U.S. Election Assistance Commission, *Election Administration and Voting Survey* 2018, 4.
- 114** The EAWS covers the number of polling places for 93 percent of voters, the number of machines for 87 percent of voters, and the number of poll workers for 80 percent of voters.

**APPENDIX C****ABOUT THE AUTHORS**

► **Hannah Klain** is an Equal Justice Works Fellow in the Brennan Center's Democracy Program, focusing on documenting and combating discriminatory electoral resource allocation in traditionally disenfranchised communities. Klain graduated from Harvard Law School, where she was president of the Harvard Law School chapter of the American Constitution Society and a research assistant to former Dean Martha Minow. While in law school, Klain interned with the Brennan Center's Democracy Program, the American Civil Liberties Union's Voting Rights Project, the NAACP Legal Defense Fund, and the Campaign Legal Center. Klain earned her bachelor's degree cum laude from Columbia University.

► **Kevin Morris** is a quantitative researcher in the Democracy Program, focusing on voting rights and elections. His research focuses on the impact of laws and policies on access to the polls, with a particular focus on rights restoration and voter list maintenance. Prior to joining the Brennan Center, Morris worked as an economic researcher focusing on housing at the Federal Reserve Bank of New York and an economist at the Port Authority of New York and New Jersey. He has a bachelor's degree in economics from Boston College and a master's degree in urban planning from New York University's Robert F. Wagner Graduate School of Public Service, with an emphasis on quantitative methods and evaluation.

► **Max Feldman** is counsel in the Voting Rights and Elections Program. He litigates voting rights cases, counsels lawmakers and administrators on voting legislation and policy, and researches voting law trends. Prior to joining the Brennan Center, Feldman was a lawyer in private practice at Munger, Tolles & Olson. He began his legal career as a law clerk to Hon. Bruce M. Selya of the U.S. Court of Appeals for the First Circuit. He has also served as a speechwriter for Gov. David Paterson of New York and Gov. Bill Richardson of New Mexico. Feldman received his JD magna cum laude from NYU School of Law, where he was elected to the Order of the Coif and served as an articles editor of the *NYU Law Review*. He received his undergraduate degree from Harvard College.

► **Rebecca Ayala** is a research and program associate in the Democracy Program, where she conducts research and advocacy on voting rights and elections. She graduated from Claremont McKenna College with a BA in history with honors and in government. Prior to joining the Brennan Center, Rebecca interned at the American Civil Liberties Union of Southern California and Hadsell, Stormer, Renick & Dai, LLP, as well as on political campaigns.

## Did Consolidating Polling Places in Milwaukee Depress Turnout?

Despite a surge of absentee voting, consolidating polling locations in the city of Milwaukee reduced turnout by nearly 9 percentage points, disproportionately affecting Black voters.

 **Kevin Morris** | **PUBLISHED:** June 24, 2020

 **Ensure Every American Can Vote**  
Voting Reform

The weeks leading up to the Wisconsin primary election on April 7 were tumultuous. On **March 27**, Democratic Gov. Tony Evers called for every voter in the state to be sent an absentee ballot, but the Republican-controlled legislature rejected the idea. **The weekend** before the election, Evers called an emergency session of the legislature, hoping to postpone the election; once again, his efforts were stymied. Evers was also blocked in the courts: the day before the election was to take place, he issued an executive order moving it to June 9, but the state supreme court struck it down.

These maneuvers occurred against the backdrop of shortages of electoral resources. On March 31, the *Milwaukee Journal Sentinel* described a **dire poll worker shortage**: Wisconsin was short some 7,000 poll workers, a situation that led to the consolidation of polling places around the state. The cuts were particularly drastic in Milwaukee.

City, where the number of polling places dropped from 182 in November 2016, to just five for this year's primary.  
In the rest of Wisconsin, the number of polling places dropped by 11 percent.<sup>41</sup>

**APPENDIX C**

As the nation prepares for the November general election, we wanted to test whether fewer polling places decreased turnout in Milwaukee, or if voters simply shifted to the vote-by-mail alternative. Our answer is no. To be clear, a surge in absentee voting may have offset at least a portion of any depressive turnout effects of consolidated polling places; while just 170,614 ballots were cast by mail in the 2016 presidential primary, 964,443 mail ballots were submitted this year. However, despite this surge in absentee voting, we find that

polling place consolidation reduced turnout by 8.6 percentage points, and  
Black turnout was especially depressed from these closures.

## Methodology

In order to estimate what turnout would have been in Milwaukee City if not for the polling place closures, we used a matching model to pair voters in the city with voters outside the city.<sup>42</sup> This ensured that the "treated" voters (individuals living in Milwaukee City) and "control" voters (those living outside the city) had similar socioeconomic characteristics and voting histories. Controlling for these characteristics is important, because they are highly correlated with whether someone casts a ballot. For instance, 50 percent of *all* suburban voters voted in the 2016 primary, while just 27 percent of Milwaukee voters did so. After our matching procedure, 27 percent of the suburban voters who were used as controls cast a ballot in that contest. Without controlling for these characteristics, we might only be picking up on a lower propensity to vote in Milwaukee City — *not* the effect of the polling place closures.

In addition to the matching methodology, we only kept pairs of treated and control voters who live within a half mile of one another. Although the paired individuals live in different cities, they live so close to one another that they likely shop at the same grocery stores and eat at the same restaurants. In other words, despite living in different cities, they are probably similarly exposed to Covid-19.<sup>43</sup>

We then ran an ordinary least squares regression to see if the voters who live just inside Milwaukee City voted at lower rates than their counterparts just outside the city. We also tested whether turnout was depressed by a different amount for Black voters than other voters in Milwaukee City.

For a fuller discussion of our data, methods, and results, please [see our working paper](#).

Note: \*p<0.1; \*\*p<0.05; \*\*\*p<0.01

Polling place closures *did* reduce turnout in the 2020 primary election. The table above indicates that turnout in Milwaukee City was depressed by roughly 8.6 percentage points. Considering that 26 percent of our control voters cast a ballot, this implies that polling place closures in the city reduced turnout by a third.

Of particular note, we found that this effect was larger for Black voters. Although polling place consolidation decreased turnout among non-Black voters by around 8.5 percentage points, it reduced turnout among Black voters by 10.2 percentage points.

## Looking Ahead

The serious depressive effects uncovered in Milwaukee — and the racial disparities within them — are cause for concern. Clearly, not all voters who prefer voting in person will seamlessly transition to vote by mail. We cannot know whether Milwaukee residents cast fewer ballots because they were unfamiliar with the mail voting process did not trust it, or were prevented from voting in person because of the long lines. It is also possible that Black voters cast mail ballots at similar rates as other voters but had them rejected at higher rates, thereby reducing

5/25/2021

Did Consolidating Polling Places in Milwaukee Depress Turnout? | Brennan Center for Justice

their effective turnout. However, given the magnitude of the effect, it is unlikely that this accounts for the full difference.

**APPENDIX C**

The case of Milwaukee is important for election administrators to keep in mind as they prepare for this fall's election. If it can be generalized to the rest of the country, polling place closures will come at the expense of voter turnout — and particularly the turnout of Black Americans. Moreover, a recently released [Brennan Center report](#) shows that fewer polling places lead to longer lines to vote, meaning that widespread closures might make casting a ballot harder for in-person voters. If we care about the representation of nonwhite voters and voters wary of casting mail ballots, we must ensure that there are safe in-person options this fall.

**Endnotes**

1. See <https://elections.wi.gov/elections-voting/2016/fall> and <https://elections.wi.gov/node/6524>.

2. Potential controls came from Milwaukee, Racine, Ozaukee, Washington, and Waukesha Counties. We matched each treated voter to two control voters based on whether they voted in the 2016 and 2018 primaries; their gender, race, partisan affiliation, and ethnicity; their latitude and longitude; and estimates of their household income and education level. The data all come from L2 Political.

3. Our methodology closely follows that of this published paper. Like this analysis, that paper combined a matching model with a geographic restriction around the city border to estimate the effect of ballot initiatives on turnout in Milwaukee City.

## DIGGING INTO THE GEORGIA PRIMARY

**RESOURCE**

# Digging into the Georgia Primary

Brennan Center analysis of Georgia's primary finds that nonwhite voters' mail ballots were rejected at much higher rates than white voters' mail ballots.

 **Kevin Morris** LATEST UPDATES: September 10, 2020  
PUBLISHED: August 24, 2020

On June 9, voters in Georgia cast their ballots in the presidential local primary contests as well as two seats for the state supreme court. In the lead-up to the contest, we analyzed discrepancies in who was requesting mail absentee ballots. Past research had indicated that racial minorities were less likely to request mail ballots than other voters in Georgia. We showed that, at least in Georgia, those trends held true even during a pandemic when all voters were sent absentee ballot request forms.

In this analysis, we examined data from the Georgia primary, covering 129 of 159 counties, to discover why — and whose — mail ballots are rejected as well as which voters took advantage of early in-person options. We found that:

1. A much smaller share of white voters had their mail ballots rejected than nonwhite voters.
2. For all racial groups, most rejected ballots were rejected because they were received after the deadline.
3. Black voters were more likely to vote early and in person than white voters.
4. More than 8 percent of voters who requested mail ballots voted in person. This was especially common among Black voters.

*During our analysis, we discovered that the state misreported some absentee ballot rejections. As such, the findings presented below exclude counties we have reason to believe had erroneous data. A discussion of these limitations and how we dealt with them can be found at this bottom of this piece.*

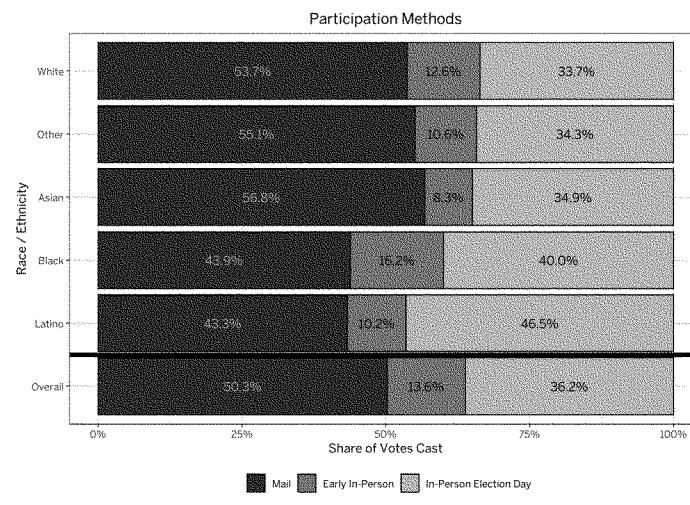

**C313**

<https://www.brennancenter.org/our-work/research-reports/digging-georgia-primary>

1/7

## How Did Voters Participate?

In the figure below, we break out how participants of different racial and ethnic groups cast their ballots in the 2020 presidential primary. More than half of all ballots were cast by mail — an enormous increase over the 2016 general election, when just 5.2 percent of voters voted by mail.

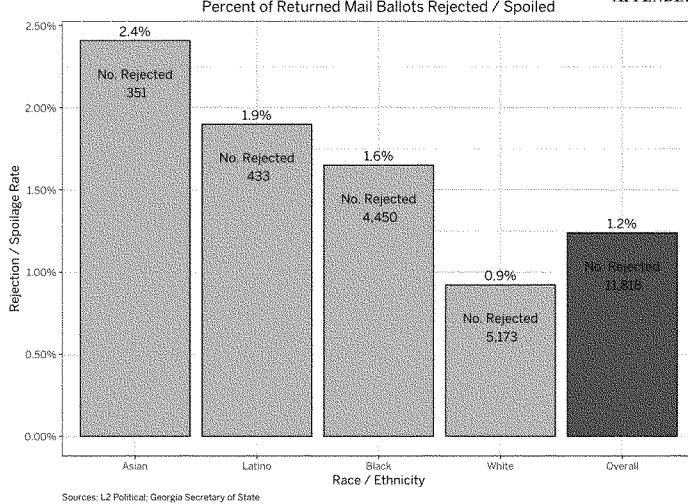

Although considerably fewer Black voters voted by mail than white voters, a larger share of them took advantage of early in-person voting. This increase, however, was not enough to offset the lower mail ballot usage: although just 33.7 percent of white voters cast their ballots in person on election day, 40 percent of Black voters did so.

## Mail Ballot Rejection Rates

The figure below shows the share of returned mail ballots that were either rejected or marked as spoiled.

5/26/2021

Digging into the Georgia Primary | Brennan Center for Justice

**APPENDIX C**

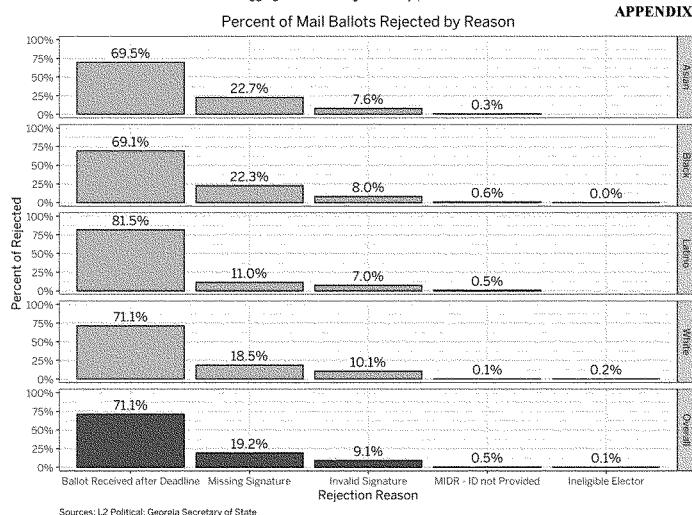

Although 1.2 percent of mail ballots overall were rejected, there are substantial differences by race. Just 0.9 percent of mail ballots cast by white voters were rejected, but mail ballots cast by Black, Latino, and Asian voters saw rejection rates of 1.6, 1.9, and 2.4 percent. These discrepancies are troubling, and election administrators should work to understand what is driving them.

As the figure below shows, mail ballots were rejected for different reasons for voters among different racial and ethnic groups. One thing, however, stands out clearly: more than 70 percent of all ballots rejected were rejected because they were returned late. After late returns, missing signatures were the most common rejection reason for each group.

This points to the need for better advocacy about when mail ballots need to be returned. There were also stories before the election about major backlogs in parts of the state like Fulton County, potentially delaying when voters received their ballots. Election administrators must make sure that ballots are sent out early enough that voters have a chance to fill them out, mail them, and have them received by administrators in time to be counted.

5/26/2021

Digging into the Georgia Primary | Brennan Center for Justice

**APPENDIX C****Who Voted in Person?**

The figure below demonstrates that more than 110,000 voters who requested mail ballots eventually voted in person. This was especially common among Black voters. It is unclear why so many people who requested mail ballots chose to vote in another way. They may have been nervous about receiving their mail ballot in time to cast it; they may have never received their ballot at all; or they may have simply chosen to vote a different way. Advocates should consider reaching out to some of these voters to understand why they made their decision. If there were racial disparities in who never received a mail ballot, this needs to be addressed.

**C316**

<https://www.brennancenter.org/our-work/research-reports/digging-georgia-primary>

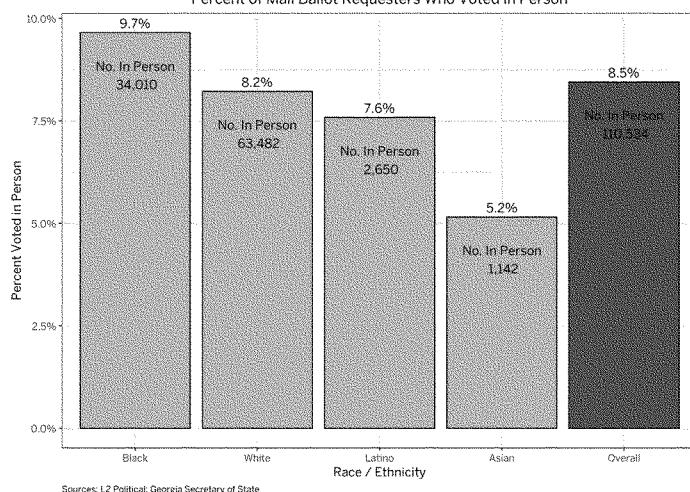

4/7

5/26/2021

Digging into the Georgia Primary | Brennan Center for Justice

## Percent of Mail Ballot Requesters Who Voted in Person

## APPENDIX C

## Conclusion

Past research indicates that voters of color are more likely to have their mail ballots rejected. It was unclear if those historical trends would continue in the context of a pandemic, when so many more voters cast mail ballots. Evidence from Georgia indicates that these disparities are in fact continuing. Black voters' mail ballot rejection rate was almost double those of white voters.

Across the board, nearly three-quarters of rejected ballots were rejected because they were returned late. As the United States Postal Service grapples with severe funding shortages, the threat of mail delays and late-returned ballots is only likely to grow this November. Election administrators must deliver ballots to voters early enough that they can be returned in time, and the federal government must adequately fund the USPS so that it can deliver ballots (both to and from voters) in a timely manner.

Finally, administrators cannot simply focus on vote by mail while ignoring the importance of in-person options. A smaller share of nonwhite voters used vote by mail in the primary, indicating that these voters would be disproportionately harmed by shifting resources away from in-person options. A larger share of racial minorities used early in-person options than white voters, indicating that there are safe alternatives to election-day voting for these voters. Election administrators should be sure to provide them in **safe and healthy options**.

## Data Issues

C317

<https://www.brennancenter.org/our-work/research-reports/digging-georgia-primary>

5/7

5/26/2021

Digging into the Georgia Primary | Brennan Center for Justice

**APPENDIX C**

This analysis was originally published using the data available from the Georgia secretary of state's website. Analyzing that data, we concluded that nonwhite voters had their mail ballots rejected at a higher rate than white voters; that most ballots were rejected because they were received after the deadline; that Black voters were more likely to vote early and in person than white voters; and that 9 percent of voters who requested mail ballots ended up voting in person, and this was more common among Black voters.

Our original analysis has been updated because there were **reports** that the data on the state website was not entirely reliable. Our revised findings, after adjusting for errors in the state's data, look essentially the same as the original.

There were 50 counties that reported rejecting no absentee ballots because they arrived late. Because Fulton County acknowledged that the ballots that were rejected because they arrived late are not noted in the data provided by the secretary of state, we decided to dig into this issue. We called each of the counties where the state's data indicates that no ballots were rejected because they arrived late.

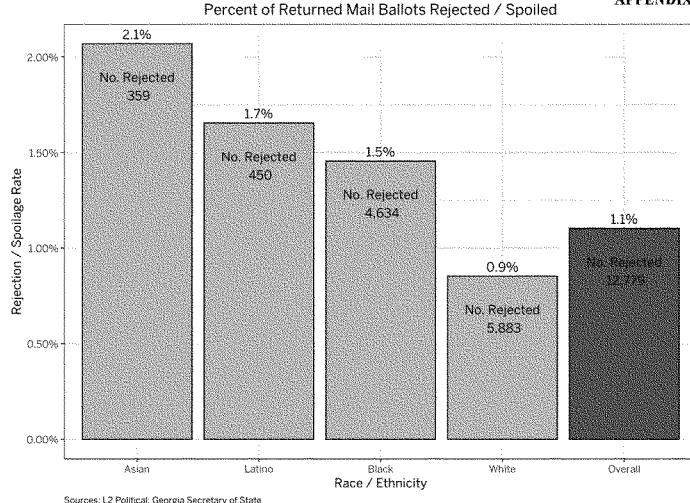

We were able to speak with representatives from 38 of the 50 counties. Of these 38 counties, 17 told us that some rejected ballots were not included in the state's data — indicating that the data from the state should not be accepted as is. Twenty-one of these counties, however, told us that the data was correct and that they had received no ballots after the deadline.

This modified analysis excludes the counties that confirmed their data was incorrect. To avoid accidentally including erroneous data, we also exclude the counties we were unable to contact. We also remove Polk County, which identified all absentee ballots that were not returned as "rejected." Overall, this analysis includes counties that are home to more than 80 percent of Georgia's voters.

Again, the exclusion of these counties does not appear to have a meaningful impact on the racial rejection gap. Below, we present the rejection rates when we accept the state's data "as-is," even though we know it has some errors. The racial rejection gap narrows very slightly. The rejection rate for white voters was 0.9 percent under both scenarios, but the rejection rate for Black voters increased from 1.5 percent to 1.6 percent when we excluded these counties. This is probably because we excluded Fulton County, which undercounted absentee rejections and is home to many Black voters.

5/26/2021

Digging into the Georgia Primary | Brennan Center for Justice

**APPENDIX C**

It is also unlikely that the exclusion of these counties is artificially creating a racial rejection gap. If we assume that the mail ballot rejection rate was 1.6 percent for Black voters in these counties (the same as the rest of the state), they would have needed to reject more than 4.8 percent of white voters' mail ballots — more than *five times* the rate at which the rest of the state rejected these ballots — in order for the rejection rate gap to disappear.

**Endnotes**

- As in our last analysis, we rely here on data from L2 Political and the Secretary of State's office. By linking these two data sources, we can identify the racial characteristics of voters who requested and cast mail absentee ballots.

## Voting Rights Restoration Efforts in Florida

A summary of current felony disenfranchisement policies and legislative advocacy in Florida.

LAST UPDATED: September 11, 2020  
PUBLISHED: May 31, 2019

 Ensure Every American Can Vote  
Voting Reform

**Disenfranchisement in Florida**

In 2018, nearly 65 percent of Florida voters approved **Amendment 4**, which automatically restored voting rights to as many as 1.4 million Floridians, except those convicted of murder or a felony sexual offense, who had completed the terms of their sentence, including parole or probation.

On June 28, 2019, Gov. Ron DeSantis signed **Senate Bill 7066**, prohibiting returning citizens from voting unless they pay off all legal financial obligations (LFOs) imposed by a court pursuant to a felony conviction, including LFOs converted to civil obligations, even if they cannot afford to pay.

The Brennan Center and other civil rights groups filed a lawsuit in federal court challenging the law, and our suit was consolidated with similar cases filed by others. An expert report submitted to the court showed that the law's requirements would prevent at least 770,000 people from voting — and it would hit Black Floridians the hardest. The court found that the overwhelming majority of those impacted are unable to afford to pay what they owe. Moreover, the State does not reliably or consistently track data on what people owe, so it is often impossible to make eligibility determinations.

1/3

5/25/2021

Voting Rights Restoration Efforts in Florida | Brennan Center for Justice

**APPENDIX C**

On May 24, 2020, the federal court issued a ruling finding Florida's "pay-to-vote" system unconstitutional in part. The State appealed, and the Eleventh Circuit agreed to hear the case and it stayed the district court's order until it rules. Arguments were heard in the appeal on August 18, 2020. On September 11, 2020, the en banc Eleventh Circuit issued an order reversing and vacating the district court's ruling. *More information about this ongoing litigation can be found here.*

**The History of Amendment 4**

Prior to Amendment 4, Florida's constitution permanently disenfranchised all citizens who had been convicted of any felony offense unless the Clemency Board restored their voting rights – a process that will now apply to those who have not had their rights restored by Amendment 4, including anyone convicted of murder or felony sexual offenses. Between 2010 and 2016, the number of disenfranchised Floridians grew by nearly 150,000 to an estimated total of 1,686,000. In 2016, **more than one in five** of Florida's Black voting-age population was disenfranchised.

After years of advocating for change with the courts and governors' offices, the Brennan Center joined with the Florida Rights Restoration Coalition and others to draft Amendment 4 and push for its inclusion on the 2018 ballot.

On January 23, 2018, **Floridians for a Fair Democracy** announced that their campaign, Florida Second Chances, had surpassed the 766,200 signature threshold to get **Amendment 4** on the 2018 ballot. For the next 10 months, the campaign worked to build a massive groundswell of bipartisan support that culminated in the Amendment's passage on November 6, 2018. Amendment 4 went into effect on January 8, 2019.

For more information about applying for clemency, the Clemency Board's website can be accessed [here](#).

**Rights Restoration Developments Before Amendment 4****Litigation**

In 2000, the Brennan Center and co-counsel, representing more than 600,000 citizens, filed a lawsuit – *Johnson v. Bush* – challenging Florida's permanent disenfranchisement constitutional provision under the Fourteenth and Fifteenth Amendments of the U.S. Constitution and the Voting Rights Act of 1965. In 2005, despite evidence that Florida's constitutional provision was rooted in 19<sup>th</sup>-century efforts to evade the mandate of the Fifteenth Amendment and deny Black men the right to vote, the Eleventh Circuit Court of Appeals allowed the law to stand.

**Executive Actions**

In April 2007, then-Gov. Charlie Crist took an incremental step towards reform when he issued **revised rules of executive clemency**. Notably, this change created automatic rights restoration for people completing sentences for certain felony convictions. A year later, in 2008, Gov. Crist's office announced that over 115,000 Floridians had regained voting rights since the new rules were implemented.

In March 2011, then-Gov. Rick Scott eliminated Gov. Crist's reforms and created additional barriers for people seeking to have their voting rights restored. The Brennan Center and other national civil rights organizations

strongly opposed the plan in a [joint letter](#) to the Clemency Board. The American Probation and Parole Association also submitted its [own letter](#) encouraging the Board to maintain Gov. Crist's clemency reforms. The Governor's regressive move set the stage for the effort to ultimately pass Amendment 4 years later.

APPENDIX C

BRENNAN  
CENTER  
FOR JUSTICE

# Gerrymandering Away Missouri's Future

Excluding children and noncitizens from redistricting calculations would exacerbate racial inequality.

By Yurij Rudensky and Gabriella Limón PUBLISHED SEPTEMBER 18, 2020

Brennan Center for Justice at New York University School of Law

## Introduction

In November 2018, Missouri voters passed a ballot initiative designed to bring independence and racial and partisan fairness to a redistricting process often waylaid by incumbent protection, political interests, and partisan deadlock. The success of these reforms at the ballot box demonstrated the broad desire in Missouri for fairer redistricting and was the product of years of advocacy and coalition-building.

However, just two years later, lawmakers are seeking to dismantle these reforms. Amendment 3, which will be on the ballot in November 2020, would roll back voter-approved protections, resurrecting some of the worst parts of the old, abuse-prone system. Troublingly, Amendment 3 would go even further, also opening the door to changing who will count when districts are drawn.

Every ten years, political districts around the country are redrawn, or redistricted, to make sure that they are roughly equal in population, as required by the U.S. Constitution. Currently, all 50 states use total population when doing this, which ensures that everyone is considered when drawing district boundaries. Amendment 3 would replace the Missouri Constitution's current total-population language with new language that, according to its proponents at least, would allow map drawers to consider only the number of U.S. citizens over the age of 18 (that is, adult citizens) when sizing districts, effectively cutting out children and noncitizens from representation.

Should Amendment 3 pass and its proponents convince map drawers to make Missouri the first state in the nation to exclude children and noncitizens from apportionment, the resulting districts would have starkly different populations.

Given Missouri's current population, each state senate and house district should have roughly 179,000 and 37,500 people, respectively, when lines are redrawn in 2021. But under a switch to adult citizen apportionment, each senate and house seat would need to have 135,000 and 28,000 *adult citizens*, with no regard for the number of children or noncitizens residing within each district.<sup>1</sup> Because children and noncitizens are not evenly distributed across the state, districts drawn on the basis of adult citizens would have wildly differing total populations. And this, in turn, means that Missourians who live in communities with many children or noncitizens would get less representation than others.

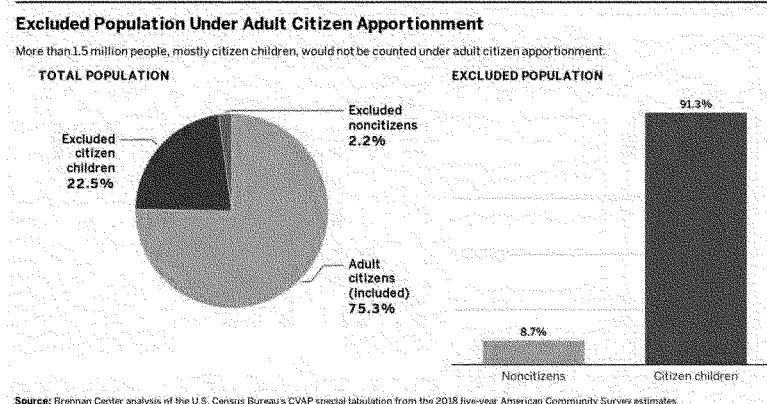

Such a change would be a radical departure from current practice and historical norms. Indeed, the text of the Missouri Constitution has required the use of total population as the relevant basis for districts since 1875.<sup>2</sup> Amendment 3 appears to be the vanguard of a broader conservative strategy to exclude children and noncitizens from being counted.<sup>3</sup> The politicians and lobbyists behind the measure have close ties to national conservative operatives including Thomas Hofeller,<sup>4</sup> whose posthumously released memos revealed a scheme among high-ranking Republican donors and operatives to encourage states to make a "radical departure" from total population to adult citizen apportionment, arguing that it would be "advantageous to Republicans and non-Hispanic whites."<sup>5</sup>

This analysis looks at what the distribution of representation would be under adult citizen-based districts. To be sure, Amendment 3 does not *require* Missouri to depart from its long-standing practice of total population-based apportionment. And any attempt to draw maps based on adult citizens would leave Missouri vulnerable to a host of lawsuits. But should those behind Amendment 3 succeed in transforming who counts when districts are drawn, the effects on the state, and on Black, Latino, and Asian communities in particular, would be profound:

- More than a quarter of all Missourians would be left uncounted. Among the uncounted, more than 90 percent would be citizen children.
- There are stark racial disparities in who would get excluded. Only 21 percent of Missouri's white population would go uncounted. By contrast, 28 percent of Missouri's Black population, 54 percent of its Asian population, and 54 percent of its Latino population would be erased when district lines are drawn.
- The two large metropolitan areas in Missouri — greater Kansas City and the St. Louis suburbs — would be hit especially hard, losing the most representation.
- Three of the four majority-Black senate districts in Missouri would need additional adult citizens, making it harder for communities of color to maintain their current level of political influence in these and surrounding districts.

## Who Would Be Excluded from the Count?

A shift to adult citizen apportionment would mean excluding a substantial portion of the population when drawing districts — specifically, children under 18 and noncitizens. Roughly 1.5 million people in Missouri — nearly a quarter of the population — would be erased from the count under such a shift. Households with children would bear the brunt of the change; more than 91 percent of the excluded population would be citizen children.

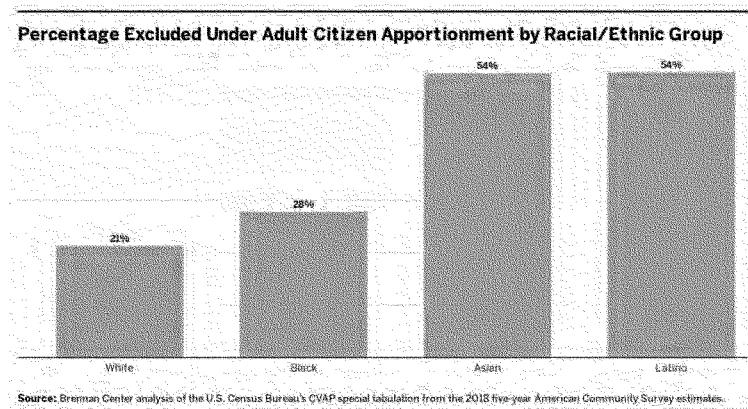

Notably, many of the excluded children will turn 18 and become eligible to vote at some point during the decade that the district maps are in effect.<sup>6</sup> Nonetheless, under adult citizen apportionment, even these future eligible voters would not be counted.

**APPENDIX C**

Worse yet, the shift to an adult citizen apportionment base would yield sharp racial disparities. Only 21 percent of Missouri's white population would be excluded under this shift, as compared to 28 percent of the state's Black population, 54 percent of its Asian population, and 54 percent of its Latino population.

The white population makes up roughly 79.5 percent of all Missourians but more than 83 percent of adult citizens. Thus, under adult citizen apportionment, the white population would account for a larger percentage of those counted for representation than it does under total population apportionment.

These disparities are largely driven by differences in the proportion of children among Missouri's racial and ethnic communities. This is because 26 percent of Black and 37 percent of Latino communities are minors, meaning that these groups would be especially hard-hit by a measure that principally functions to exclude children from the count.

## **Which Communities Would Lose Representation?**

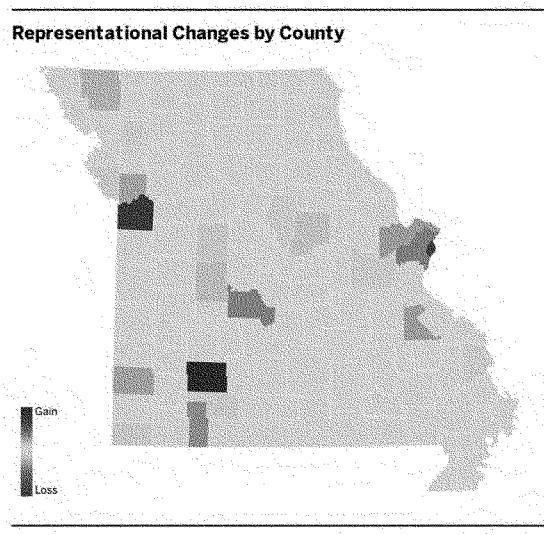

In order to fully understand the ultimate representational impact of a shift to adult citizen apportionment, it is also necessary to assess the geographic distribution of Missouri's population. If children and noncitizens were evenly distributed across Missouri, no communities would lose representation with a shift to adult citizen apportionment. In other words, all areas of the state and all of its communities would see the same proportional population reductions and therefore receive the same number of representatives as before.

But, if impacted households are instead clustered within a particular region or county, then certain communities will suffer representational loss — that is, receive fewer districts (or a smaller share of a district) than they would if their entire population was counted. Meanwhile, communities with a smaller share of children and noncitizens will receive a windfall, gaining that representation.

**APPENDIX C**

Based on the distribution of the excluded population, the two large metropolitan areas in Missouri — greater Kansas City and the St. Louis suburbs — stand to lose the most representation under adult citizen apportionment. The impact would be most felt by Jackson and Clay Counties in western Missouri, St. Louis and St. Charles Counties in eastern Missouri, and Joplin County in southwestern Missouri.

When this analysis is applied to the current state senate map, the discriminatory impacts become more concrete.

Under adult citizen apportionment, each senate district would need to have close to 134,882 adult citizens to be perfectly apportioned. In practice, states are allowed to deviate, so the acceptable range for each seat would be from approximately 128,138 to 141,626 adult citizens.<sup>7</sup> Districts below this range would need to be redrawn to raise their adult citizen population and those above the threshold redrawn to lower it. Communities that end up in underpopulated districts would suffer at least some harm, because additional constituents would be added without any additional representation.<sup>8</sup>

The table below lists the six senate districts that would need to bring in additional adult citizens, thus raising their overall population.

### Missouri Senate Districts Underpopulated Under Adult Citizen Apportionment

DISTRICT NUMBER	ADULT CITIZENS NEEDED	REPRESENTATIVE	REGION	BLACK-MAJORITY DISTRICT
9	10,008	Vacant, formerly S. Kiki Curls (D)	Kansas City	Yes
11	6,418	John Rizzo (D)	Kansas City	No
14	4,368	Brian Williams (D)	St. Louis County	Yes
13	4,308	Gina Walsh (D)	St. Louis County	Yes
25	3,213	Doug Libla (R)	Southeast	No
8	2,938	Mike Cierpion (R)	Kansas City	No

Source: Brennan Center analysis of the U.S. Census Bureau's CVAP special tabulation from the 2018 five-year American Community Survey estimates.

Senate districts 9, 13, and 14 would be three of the four most underpopulated districts under adult citizen apportionment. They are also three of the four majority-Black districts in Missouri, each of which has sent Black representatives to the state capital. Collectively, these districts currently represent 42 percent of the state's Black population.<sup>9</sup> Likewise, Districts 9 and 11 have the two highest Latino populations among the state's senate districts.<sup>10</sup>

All of these underpopulated districts would have to be redrawn to bring in thousands of extra adult citizens, which would significantly change the demographic makeup of either these or surrounding districts. The outcome would potentially dilute the political power of Black communities in the very districts designed to empower them, or it could reduce the number of Black constituents in neighboring districts. Either way, the political power of Black communities would likely be diminished under adult citizen apportionment.

Importantly, the senate districts most affected by a shift to adult citizen apportionment also contain neighborhoods that have been the target of state-sponsored segregation and racist disinvestment. For example, District 9, which would bear the most severe underpopulation, runs directly along the east side of Troost Avenue, a street infamous for its function as a de jure border of racial segregation in Kansas City during Jim Crow.<sup>11</sup> Today, Troost Avenue still operates as a "dividing line"<sup>12</sup> between majority-Black and historically disinvested neighborhoods to the east and mostly white and wealthier neighborhoods to the west.<sup>13</sup>

Likewise, underpopulated districts in the St. Louis area map onto geographic racial divides. Districts 13 and 14 cover much of the area north of the "Delmar Divide."<sup>14</sup> The street, synonymous with redlining and racially restrictive covenants, separates predominantly white neighborhoods to the south from predominantly Black ones to the north. Indeed, Districts 13 and 14 together cover Ferguson and Florissant, where in the context of a voting rights lawsuit a federal court recently identified that "once-formalized policies of racial segregation" are still "inscribed on the regional landscape" and a "racialized gap in wealth" "persists to the present day."<sup>15</sup>

That the districts most vulnerable to representational loss under adult citizen apportionment map neatly onto areas still struggling against the legacy of racism reveals that such a shift would, at least in effect, perpetuate an ugly history of discrimination against communities of color in Missouri.

## Conclusion

A shift to adult citizen apportionment in Missouri would cut nearly a quarter of the state's population — overwhelmingly children — out of being counted when districts are reconfigured. In a state whose constitution has contemplated all of its inhabitants as counting since 1875, such a change would not only be a stark departure from historical norms but also a serious obstacle to communities of color receiving fair representation. Missouri's Black communities have endured a long and unbroken legacy of discrimination and face disparities in income, education, housing, health, and other key equity indicators when compared to their white counterparts.<sup>16</sup> Limiting representation to adult citizens would likely compound and exacerbate these inequalities, deepening existing divisions.

*This analysis is adapted from a forthcoming report by the Brennan Center for Justice studying the impact of adult citizen apportionment in three states. Yurij Rudensky, Ethan Herenstein, Annie Lo, and Peter Miller are the authors of that report, and their work is reflected here as well.*

## Endnotes

---

<sup>1</sup> These numbers are derived from the American Community Survey (ACS) 5-Year Estimates and Citizen Voting Age Population Special Tabulation, which provide the most recent count of Missouri's total population and adult citizen population. By dividing those totals by the number of state house and senate districts, we can predict the size of Missouri legislative districts under each apportionment basis. U.S. Census Bureau, "2014–2018 5-Year American Community Survey," <https://www.census.gov/data/developers/data-sets/acs-5year.html>; U.S. Census Bureau, "Citizen Voting Age Population (CVAP) Special Tabulation from the 2014–2018 5-Year American Community Survey," <https://www.census.gov/programs-surveys/decennial-census/about/voting-rights/cvap/2014-2018-CVAP.html>.

<sup>2</sup> See Mo. Const. of 1875, art. IV, § 2, 5, 7, 9; and Mo. Const. art. III, § 3(c)(1) (amended 2018).

<sup>3</sup> Indeed, litigation around the addition a citizenship question to the 2020 Census revealed the interest on the part of prominent conservative strategists to exclude noncitizens and children from the apportionment count for political gain. See Letter Motion to Compel Defendants to Show Cause at Exhibit D, *New York v. U.S. Dep't of Commerce*, No. 18-cv-2921 (S.D.N.Y. 2018). Further, the *Guardian* reported connections between Amendment 3's backers and national conservative operatives that indicate this state effort is in coordination with and a precursor to a larger national Republican strategy: "Some activists believe national Republicans are involved. . . . Dale Oldham, a top Republican redistricting consultant and [Thomas] Hofeller's longtime business partner, and Adam Kincaid, who leads the National Republican Redistricting Trust, met with the Missouri senate president in April 2019, according a calendar invitation obtained by Clean Missouri and provided to the *Guardian*." Sam Levine, "Missouri Republicans on the Verge of Gutting Gerrymandering Reform," *Guardian*, May 11, 2020, <https://www.theguardian.com/us-news/2020/may/11/missouri-republicans-gutting-gerrymandering-reform>.

<sup>4</sup> The law firm that drafted Amendment 3 previously represented the National Republican Redistricting Trust in gerrymandering litigation. Graves Garrett LLC, "Supreme Court Adopts Position of Graves Garrett Client in Gerrymandering Case; Greim, Luetkemeyer Author Op-Ed on Rulings for USA Today," July 16, 2019, <https://www.gravesgarrett.com/supreme-court-adopts-position-of-graves-garrett-client-in-gerrymandering-case-greim-luetkemeyer-author-op-ed-on-rulings-for-usa-today>. Graves Garrett also directly represented Thomas Hofeller when he was the only defense witness in a 2012 challenge to Missouri's maps. Brief of Intervenor Respondents, February 13, 2012, *Pearson v. Koster*, No. SC92317 (Mo. 2012).

<sup>5</sup> See Letter Motion to Compel Defendants to Show Cause at Exhibit D, *New York v. U.S. Dep't of Commerce*.

<sup>6</sup> Because maps are drawn every ten years, any child over the age of eight when the census is taken will be eligible to vote in at least one election before the next redistricting cycle.

<sup>7</sup> States are permitted to have districts that deviate up to 10 percent. See *Gaffney v. Cummings*, 412 U.S. 735 (1973). Accordingly, we took the total adult citizen population in Missouri and divided it by the number of state senate districts to derive the "ideal" adult citizen population (134,882) for each seat. We then calculated the lower threshold (128,138), which is 5 percent below the ideal, and the upper threshold (141,626), which is 5 percent above.

<sup>8</sup> If an area has enough underpopulated districts, one of two things could happen during the redistricting process. The map drawer could collapse the existing underpopulated districts into one another, reducing the number of districts that the area would receive and ensuring that each resident of the area would end up in larger districts. Or, in less extreme cases, the map drawer could simply expand the borders of the underpopulated districts to bring in additional adult citizens from nearby overpopulated districts. This would mean that most residents in underpopulated districts would end up in larger districts while those in overpopulated districts would mostly end up in smaller ones. Even these seemingly small changes, repeated again and again across a state, could dramatically transform the makeup of a legislature, shifting power from areas of the state that lose representation and toward areas that gain it. In either case, areas that lose representation and communities that end up in underpopulated districts stand to receive less representation during the next redistricting cycle.

<sup>9</sup> ACS 2018 5-Year Estimates show these are the three senate districts with the highest percentage of Black people. There are 295,830 Black people currently residing in these districts, making up 42 percent of Missouri's entire Black population (701,990). U.S. Census Bureau, "2014–2018 5-Year American Community Survey."

<sup>10</sup> Districts 9 and 11 have 18,284 and 21,491 Latinos, respectively. Latinos make up 10.9 percent and 12.8 percent of their respective populations. U.S. Census Bureau, "2014–2018 5-Year American Community Survey."

<sup>11</sup> "Under Jim Crow laws, Troost Avenue was used to legally enforce segregation prior to the civil rights movements of the 1960s. It also was used by Kansas City Public Schools as a dividing line to keep schools segregated." ## Georgia's Proposed Voting Restrictions Will Harm Black Voters Most

State legislators are pushing regressive bills to end no-excuse mail voting for younger voters and to eliminate early in-person voting on Sundays.

ASSOCIATED PRESS

 **Kevin Morris**

PUBLISHED: March 6, 2021

In November 2020, President Joe Biden won the state of Georgia by a narrow margin, edging out Donald Trump by fewer than 13,000 votes. While the margin was small, it was the first time a Democratic presidential candidate had won the state since Bill Clinton did in 1992. Two months later, the two Democratic candidates for U.S. senator both won their elections in the Peach State, the first time a Democratic senator had been elected since 1996.<sup>¶3</sup>

We have seen a **rush of anti-voter bills** introduced in the wake of the 2020 presidential election all around the country. Georgia Republicans have introduced regressive legislation that would eliminate automatic voter registration in the state (**a policy that has boosted registrations enormously**) and are seeking to make voting by mail far more difficult. Given the dynamics of the 2020 election, the restrictions to voting by mail seem especially likely to hurt Black voters, who used mail ballots at far higher rates last year than ever before.

As we wrote last year, there was little evidence before 2020 that Democratic-leaning constituencies used vote-by-mail at higher rates than other voters. These patterns **continued through Georgia's June 2020 primary**, when 54 percent of white voters cast a ballot by mail, compared with just 44 percent of Black voters.<sup>¶2</sup>

5/25/2021

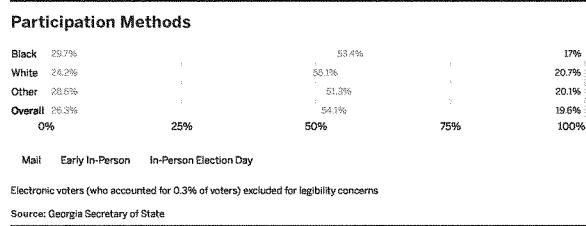

Georgia's Proposed Voting Restrictions Will Harm Black Voters Most | Brennan Center for Justice

This all changed in the 2020 general election.

**APPENDIX C**

## Racial Composition of Vote-by-Mail Electorate in Georgia<sup>43</sup>

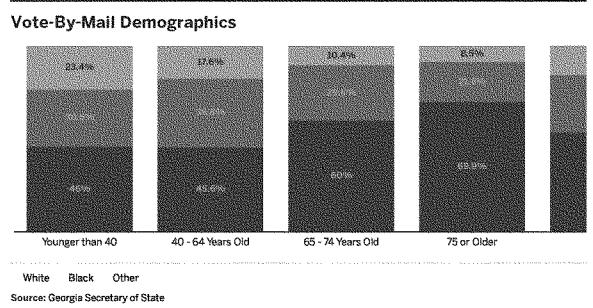

Following the intense politicization of mail voting by then-President Trump, the partisan composition of the vote-by-mail electorate shifted drastically. Although vote-by-mail usage exploded for all racial groups, it increased less for white voters than for others. Although white voters still made up a majority of mail voters, their share of the vote-by-mail electorate dropped from 67 percent in 2016 to 54 percent in 2020; the Black share, meanwhile, surged from 23 percent to 31 percent. As the figure below shows,<sup>44</sup> nearly 30 percent of Black voters cast their ballot by mail in 2020, but just 24 percent of white voters did so.

## The Racial Composition Is Different for Older Voters

There are currently multiple bills in the Georgia Legislature that would end no-excuse mail voting. These bills, however, include carve outs for older voters. Senate Bill 241 — which advanced out of the Senate Ethics Committee this week — includes being 65 or older as a valid excuse; Senate Bill 71, which has also seen movement in the Senate this week, would make being 75 or older a valid excuse.

In other words, under these proposals, older voters — who according to CNN exit polls supported Republicans at higher rates in 2020 — would continue to have unrestricted access to vote-by-mail. As the figure below shows, fewer than half of vote-by-mail participants under 65 years old were white, but 60 percent of the mail voters between 65 and 74, and 70 percent of the mail voters 75 and older were white. Because older Georgians are whiter than younger Georgians, the legislation restricting mail voting for younger voters disproportionately benefits white voters.

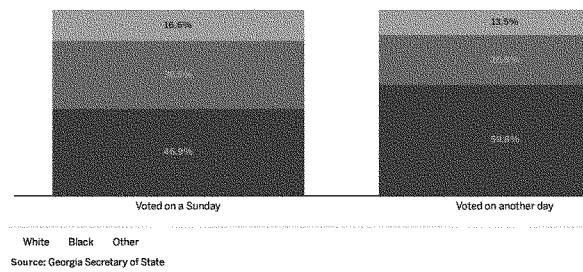

## Ending Sunday Voting Further Harms Black Voters

Curtailing mail voting isn't the only regressive change being considered by Georgia Republicans. House Bill 531 — which passed in the Georgia House on Monday — contains many restrictive provisions, such as shrinking the absentee ballot application window and limiting the hours during which mail ballot drop boxes can be open. It also eliminates early in-person voting on Sundays in the weeks leading up to an election.

Sundays have historically been important turnout days for Black Americans, as Black churches organize "Souls to the Polls" drives. To understand the racial implications of this proposed change, we looked at who voted early on what days in the 2020 general election.

Although Sunday was not a particularly popular day for voting in 2020 (just 2.7 percent of early in-person ballots were cast on a Sunday), there are clear racial divisions. Black voters (who make up 30 percent of the registered electorate) accounted for 36.5 percent of Sunday voters, but just 26.8 percent of early in-person voters on other days. On the other hand, 60 percent of the voters who voted early on other days were white, though that was true of just 47 percent of Sunday voters (53 percent of registered voters in Georgia are white). Barring counties from holding early in-person voting on Sundays would disproportionately impact Black Georgians.

### Demographics of Early In-Person Voters

## Conclusion

Around the country, we are seeing legislators **push to make voting harder**. In the case of Georgia, these changes will disproportionately hurt Black voters. The state is considering restricting mail voting in response to a shift in the racial demographics of the voters who use it, but *wants* to keep mail voting available for older, whiter mail voters. The same is true for early in-person voting: Republicans in the Peach State want to end Sunday voting, a day disproportionately popular among Black voters. Voter suppression is always unacceptable, and the razor thin political margins in Georgia may mean that suppression efforts like these will change political outcomes. Rather than imposing barriers, Georgia should be looking at ways to improve voter access.

### Endnotes

1. Zell Miller, a Democrat, was appointed to finish the late Paul Coverdale's term in 2000, but Miller was never elected to the Senate.
2. Younger and nonwhite voters – voters less likely to support Republican candidates, in other words – have also historically had higher mail ballot rejection rates.
3. All our figures are calculated by merging the voter history files made publicly available with a snapshot of the registered voter file from November 2, 2020.
4. Approximately 0.3 percent ballots were cast electronically by unregistered and overseas voters; we exclude them to make the figure easier to read. Their exclusion does not alter our conclusions.

## Georgia's Voter Suppression Law

Gov. Brian Kemp signed a wide-ranging bill that targets Black voters with uncanny accuracy.

Michael Waldman
March 31, 2021

Justin Sullivan/Getty

During the Jim Crow era, laws that looked neutral on their face were specifically designed to target Black voters. Today, legislators across the country are considering bills that will have the same effect. Nowhere is this more obvious than in Georgia, where last week, Gov. Brian Kemp signed into law an omnibus bill that targets Black voters with uncanny accuracy.

It's now a crime in Georgia to give a bottle of water or a snack to people waiting in line to vote. We know that in Georgia and across the country, hours-long lines to vote are more often in Black and brown communities. Mobile voting (polling sites on wheels that travel to different set locations) is also now illegal in Georgia — a practice that has only been used in Fulton County, which has the largest Black population in the state. Ballot drop boxes must now be located inside early voting sites instead of other convenient locations, and many voters who plan to vote by mail must provide a driver's license or state ID number.

These laws will disproportionately harm Black, brown, and Native American voters. Legislators tried to pass even more onerous laws — like canceling vote by mail but preserving it for the segment of the electorate that tilts white and more conservative — but faced a sustained and effective outcry.

"It's sick," said President Biden about the Georgia law and the over 253 bills proposed across the country that would make voting harder.

Georgia's Voter Suppression Law | Brennan Center for Justice

**APPENDIX C**

As I said on NPR's *All Things Considered* over the weekend, it's a great political clash: a wave of proposed voter suppression in the states, and, with the For the People Act, a wave of proposed voting rights expansion at the federal level. If it becomes law, the For the People Act will stop this new wave of voter suppression cold. Congress has the power to stop these modern-day Jim Crow bills before they start.

Kemp signed his voter suppression bill in front of a painting of a plantation where more than 100 Black people had been enslaved. The symbolism, unnerving and ghastly, is almost too fitting.

When I **testified** before the Senate Committee on Rules and Administration in support of the For the People Act last week, I asked this: Will we live up to our best ideals, or our worst? Will we build a multiracial democracy that really represents all people, or will we allow a drive to take place to turn the clock back to cut back on voting rights?

These are questions Congress must answer -- and soon.

It is difficult to overstate the importance of state courts. They are where 95 percent of all cases in the country are filed and their high courts usually have the final word on questions of state law. They have considerable power over matters as important as the death penalty, funding for public schools, the environment, voting rights, and reproductive justice. And over the coming year, many state courts will also play a major role as states redraw their maps for state legislative and congressional offices.

5/26/2021

Legislative Assaults on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

Courts play a unique role in our democracy — a role that requires them to be independent of the two political branches and to make politically unpopular decisions on occasion. In recent years, however, this critical role has been under threat. State legislatures and governors across the country have regularly targeted state courts, often in retaliation for decisions they disagree with, in an effort to weaken courts' power or gain more political influence over the judiciary. In 2020, for example, even with Covid-19 raging throughout the country, the Brennan Center documented at least 42 bills in 17 states that would have made state courts less independent or politicized judicial selection.

A Brennan Center review of bills already considered in state legislatures in 2021 shows that, as of **May 14**, legislators in at least 26 states introduced at least 93 bills that would politicize or undermine the independence of state courts.\* At least ten of these bills have already been signed into law. An additional 50 bills have advanced in a significant way, either passing favorably out of a committee or subcommittee, receiving a hearing, passing through one house of the legislature, or receiving approval by the legislature to go on the ballot.

While state legislatures have considered similar legislation in the past, several troubling new trends are emerging in 2021. First, state courts are being targeted for their role in protecting voting rights during the 2020 election. In at least eight states, lawmakers considered bills that would either weaken courts' power in election-related cases, create new tribunals to hear such cases, or target individual judges for their decisions in election cases. And in 21 states, legislation aimed broadly at the courts would impact election cases (and other types of litigation) by changing how judges get selected, which courts hear cases involving the state, or how judicial decisions get enforced.

In another trend, lawmakers in several states considered bills that would gerrymander existing courts or create new courts in the hopes of obtaining more favorable outcomes.

Take Texas, for example. Republican lawmakers there introduced six bills that would prohibit courts from modifying or suspending election-related deadlines or procedures, change the judges that hear election-related disputes, create a new "state elections tribunal" to hear certain election-related cases, consolidate appellate court districts in a way that would create a gerrymander, and establish a new statewide intermediate appellate court to hear certain cases involving the government so as to avoid jurisdiction in Democratic-leaning parts of the state.

And while the legislative sessions of 22 states have come to an end, many states are expected to have special sessions this fall for redistricting. In some states, this could open the door to further efforts to manipulate or retaliate against state courts.

**As of May 14, legislators in at least 26 states are considering at least 93 bills targeting state courts.**

- 31 bills in 14 states would put pressure or restrictions on judicial decision-making, target individual judges for unpopular rulings, or take away courts' authority to manage their own rules or resources.
- 6 bills in 5 states would either gerrymander existing courts or create new courts, in an effort to obtain more favorable outcomes.
- 3 bills in 2 states would change the judges or courts that hear high-profile cases against the government.
- 18 bills in 10 states would either enable the override of court decisions or prohibit state officials, including judges, from enforcing particular laws or court decisions.
- 23 bills in 12 states would inject more politics into how judges are selected.

5/26/2021

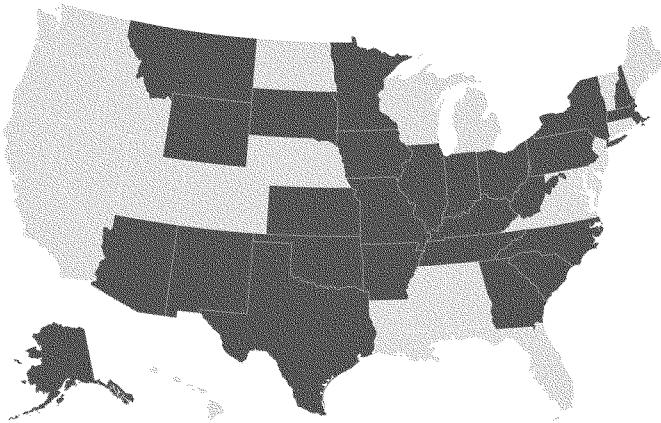

Legislative Assaults on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

- » 2 bills in 1 state would subject judges to more frequent political pressures by shortening term lengths.
- » 10 bills in 6 states would allow more guns in courthouses, even if courts themselves wanted to prohibit weapons.

**Legislative Assaults on State Courts — 2021**

States with bills targeting the courts

The following is an overview of bills recently introduced at the state level (as of May 14, 2021), broken down by how they might weaken the independence or power of the judiciary.

**Table of Contents**

- » Interfering with Judicial Decision-Making
- » Gerrymandering or Creating New Courts
- » Judge-Shopping for Partisan Advantage
- » Limits to the Enforcement of Court Rulings
- » Changes to Judicial Selection
- » Altering Judicial Term Lengths and Limits
- » Allowing Firearms in Court

*\*These bills were identified by the Brennan Center through CQ FiscalNote and CQ StateTrack (provided by the Piper Fund), as well as media reports. Unlike previous years, the Brennan Center did not use the National Center for State Courts' Gavel to Gavel database for identifying bills because it was unavailable.*

3/14

## Interfering with Judicial Decision-Making

Fourteen states are considering legislation that would limit judges' decision-making powers, make it easier to target judges for unpopular decisions, limit judges' control over procedural rules, or seek to remove individual judges for their rulings. In a new trend in 2021, many of these bills specifically target courts in connection with election-related cases. Legislators introduced these bills following the many election-related lawsuits filed last year, some of which resulted in changes to voting procedures or policies for the 2020 election because of the pandemic. Still more bills, which we did not include in our tally, prohibit alteration of state election laws and could arguably be interpreted to limit a court's authority to rule on those laws.

### Bills Limiting Judicial Review of State Election Laws or Targeting Judges in Election Cases

- A bill in **Arizona** (H.B. 2794) would prohibit any state governmental entity, including the courts, from modifying or agreeing to modify "any deadline, filing date, submittal date or other election-related date that is provided for in statute." H.B. 2794 passed the Arizona House with a narrowly passed amendment removing the limitation on judicial review and was approved by the Arizona Senate Rules Committee.
- In **Georgia**, a state where voters of color are more likely than white voters to wait in hours-long lines to vote, the Republican-controlled legislature passed an omnibus voter suppression bill (S.B. 202) limiting the ability of some courts to expand polling place hours. S.B. 202 was signed into law by the state's Republican governor.
- A bill in **Kansas** (H.B. 2332), which was passed by the state's Republican-controlled legislature and enacted over the Democratic governor's veto, explicitly provides that "neither the executive branch nor the judicial branch of state government shall have any authority to alter the state election laws." Another bill (H.B. 2319) would have prohibited courts from changing the deadline for returning advance voting ballots. H.B. 2319 received a hearing in the Kansas House Committee on Elections but otherwise failed to move before the end of the legislative session.
- In **Kentucky**, an omnibus elections bill (H.B. 574), which was passed by the state's Republican-controlled legislature with bipartisan support and signed into law by the Democratic governor, includes a provision that "no government official other than the General Assembly may suspend or revise any statute pertaining to elections." Another bill (H.B. 162) would have given the legislature "sole and absolute discretion" to "accept, modify, or disregard the findings" of a trial court regarding the results of a recount. H.B. 162 failed to move before the end of the legislative session.
- A bill in **Missouri** (H.B. 1301) would have provided that "[d]etailed rules and procedures for counting votes, election deadlines, and other election procedures shall not be modified, waived, or altered in any fashion by state constitutional law, executive order, administrative rules, or any other type of rule or order except if a statute is held unconstitutional under the Constitution of the United States by any court of competent jurisdiction." H.B. 1301 failed to move before the end of the legislative session.
- In **Texas**, a bill (H.B. 6, S.B. 7) would provide that a "public official may not knowingly issue an order altering or suspending an election standard, practice, or procedure mandated by law or rule unless the alteration or suspension is expressly authorized" under the state's election code. Another bill (S.B. 1215) would require the secretary of state to create a "state elections tribunal" to hear certain election administration disputes. A third

C343

5/26/2021

Legislative Assualts on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

- bill (**S.B. 1589**) would prohibit district or county court judges “with jurisdiction over any geographic area served by an election official who is a party in a proceeding for injunctive relief” from presiding over certain election-related proceedings “unless the election official serves statewide.” H.B. 6 was approved by the House Elections Committee. S.B. 7 passed the state Senate and was substituted with language from H.B. 6 in the state House. The substitute version of S.B. 7 passed the state House. S.B. 1589 passed the state Senate.
- In **Minnesota**, a resolution (**H.R. 3**) was introduced by Republican legislators calling for the impeachment of a county judge for “violating the plain language of the United States Constitution and Minnesota election law” in response to the judge’s approval of a consent decree that waived the postmark and witness requirements for absentee ballots during the 2020 election because of the pandemic.
  - A similar resolution in **Tennessee** (**H.R. 23/S.R. 21**), cosponsored by 64 out of 73 Republicans in the state House, would have formed a legislative committee to consider the removal of a county judge over a **decision** she issued last year expanding access to absentee voting because of the pandemic. H.R. 23 was voted down by a subcommittee of the Tennessee House Civil Justice Committee.

**Bills Targeting Judicial Powers**

- In **Arkansas**, a proposed constitutional amendment (**H.J.R. 1015/S.J.R. 7/S.J.R. 9**) would have allowed the legislature, by a three-fifths vote of each house, to prescribe rules of pleading, practice, procedure, and evidence for all courts. Arkansas’s legislature has introduced similar proposals since at least 2013 in response to state supreme court decisions striking down various provisions of a 2003 “civil justice reform” law as violating the state’s constitutional grant of procedural rulemaking power to the judiciary. H.J.R. 1015/S.J.R. 7/S.J.R. 9 failed to move before the end of the legislative session.
- A bill in **Iowa** (**H.F. 173**) would prohibit state courts from applying foreign law if its application would result in the violation of a right guaranteed by the state or federal constitution. Similar bills, which are part of a national trend of “anti-Sharia laws” meant to provoke fears about Islam and Islamic law, were introduced in **New Jersey**, **South Carolina**, and **West Virginia** last year.
- Another bill in **Iowa** (**H.F. 109**) would have required a supermajority of justices (five of seven) on the state’s supreme court in order to invalidate a state law or issue a decision with the “effect of creating a new law.” If such a decision were issued, the court’s ruling would have no effect for one year, during which time lawmakers could “compel the attendance of specified justices to a public hearing to discuss and debate the justification for the decision” with legislators. Iowa’s supreme court has faced regular attacks from conservative lawmakers over the years in response to decisions related to **marriage equality** and **reproductive rights**. H.F. 109 was recommended for indefinite postponement by a subcommittee of the Iowa House Judiciary Committee.
- In **Missouri**, a bill (**H.B. 850**) would have prohibited state courts from rewriting false or misleading ballot language written by the legislature. Another bill (**S.B. 399**) would have barred courts from hearing challenges to ballot language written by the legislature. These bills were introduced by Republican lawmakers after two courts **rewrote** the ball of language for a legislatively proposed constitutional amendment to undo voter-approved redistricting reforms. H.B. 850 passed the state House and was substituted in the state Senate to include provisions that would have prohibited donations to election officials among other election-related changes. The substitute version of H.B. 850 passed the state Senate but failed to pass the state House before the end of the legislative session. S.B. 399 was approved by the Missouri Senate Local Government and Elections Committee but otherwise failed to move before the end of the legislative session.
- A bill in **Montana** (**H.B. 141**) would have provided that state courts “may only review the constitutionality of a law, not change or alter the law.” S.B. 141 failed to move before the end of the legislative session.
- In **New York**, a proposed constitutional amendment (**A. 04446/S. 4541**) would divide the state into three separate autonomous regions, with significant repercussions for the courts. In addition to each region having a

**C344**

5/26/2021

Legislative Assaults on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

- separate court system, this amendment would require at least three-quarters of the judges on the state's highest court, which would expand from 7 to 11 judges to include new judges appointed by each regional governor, to agree to reverse a regional superior court ruling or a lower court ruling that a regional superior court let stand. It would also remove all sitting members of the state's judicial nominating commission, replacing them with commissioners chosen by each regional governor and leadership of each regional legislature. Currently, the 12-member commission is made up of 4 members chosen by the governor, 4 chosen by the state's chief justice, and 1 each chosen by the majority and minority leaders in the legislature.
- A bill in **Tennessee** (H.B. 1072/S.B. 915) would have allowed a contested state law to take effect, even if it was blocked by a lower court for being unconstitutional, unless the state's supreme court rules otherwise. Currently, judges have discretion as to whether a court's decision should be stayed pending an appeal. The bill is reportedly a response to a court decision expanding access to absentee voting last year because of the pandemic. H.B. 1072 passed the state's Republican-controlled legislature with an amendment removing the provision that provided for an automatic stay and awaits the Republican governor's signature.
  - In **West Virginia**, the legislature voted to put a proposed constitutional amendment (H.J.R. 2) on the ballot in 2022 that would prohibit state courts from intervening in impeachment proceedings and exempt from judicial review any judgment rendered by the state Senate after an impeachment trial. Another proposed amendment (S.J.R. 8) would have provided that state courts have no authority to interfere with any legislative proceedings. These measures were introduced in response to a 2018 decision by West Virginia's supreme court that halted the legislature's impeachment of three justices for their alleged abuse of state funds as being constitutionally and procedurally flawed. S.J.R. 8 failed to move before the end of the legislative session.

**Bills Politicizing Judicial Discipline**

- In **Alaska**, a bill (H.B. 207) would add "exercising legislative power" as a basis for impeaching a judge and exempt such a finding by the legislature from judicial review. A similar bill was introduced in Alaska in 2019 and 2018 and in Kansas in 2016 but failed to advance through the legislature.
- In **Arkansas**, a proposed constitutional amendment (H.J.R. 1006) would have created a procedure for the recall of state supreme court justices, court of appeals judges, circuit judges, or district judges. Judicial recall provisions are unusual and pose a substantial threat to judicial independence because they enable a judge to be targeted for an unpopular decision. Arkansas judges are already subject to regular judicial elections, and state supreme court races have attracted substantial money and attention over the years. In 2018, two conservative advocacy groups unsuccessfully spent **\$2.9 million** to defeat an incumbent state supreme court justice that one of them attacked as a "liberal judicial activist." A similar bill (H.B. 1925) would have created a procedure for the recall of county court judges. H.J.R. 1006 and H.B. 1925 both failed to move before the end of the legislative session.
- In **Montana**, a series of bills targeted the state's judicial standards commission, which is responsible for investigating complaints against judges and recommending disciplinary action to the state's supreme court. H.B. 380, which was passed by the state's Republican-controlled legislature and signed into law by the Republican governor, requires every member of the commission to be confirmed by the state Senate. A proposed constitutional amendment (H.B. 685) would have restructured the commission so that a majority of its members are nonlawyers appointed by the governor and transferred direct authority over judicial discipline from the state's supreme court to the commission. Another bill (S.B. 252, S.B. 318) would have allowed a judge to be impeached for not following the legislature's preferred method of statutory interpretation. Another bill (S.B. 366) would have allowed citizens of the state to initiate an investigation of a judge with the commission for "violating the oath of office by continuously issuing unlawful and unconstitutional orders or decisions." H.B. 685 was approved by the Montana House Judiciary Committee but otherwise failed to move before the end of the

C345

5/26/2021

Legislative Assaults on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

legislative session. S.B. 252 was approved by the Montana Senate Judiciary Committee but was indefinitely postponed on second reading. S.B. 318 passed the state Senate and was approved by the Montana House Judiciary Committee but was voted down on second reading. S.B. 366 received a hearing in the Montana Senate Judiciary Committee but was tabled in committee.

---

## Gerrymandering or Creating New Courts

Proposals in five states would either gerrymander existing courts or create new ones, in response to the perception that current courts are insufficiently supportive of outcomes favored by the legislature. These kinds of structural changes, driven not by reasons of judicial efficiency or access to justice but rather perceived partisan advantage, threaten the judiciary's independence from the political branches of government and risk its politicization.

- In **Montana**, the Republican-controlled legislature voted to put a legislatively referred state statute (H.B. 325) on the ballot in 2022 that would require state supreme court justices to be elected by district, rather than statewide. Districted elections aren't always bad policy, but they can open the door to judicial gerrymandering and other forms of partisan gamesmanship, especially in states like Montana where lawmakers have accused the state's courts of being "too liberal." H.B. 325 was introduced by a Republican legislator with ties to a conservative group that has spent substantial sums in recent state supreme court elections. The proposal is also similar to a referendum that was struck down as unconstitutional by the state's supreme court in 2012 due to a requirement that judicial candidates live in their district (H.B. 325 omits the residency requirement).
- In **New Mexico**, a proposed constitutional amendment (S.J.R. 21), introduced by a Republican lawmaker, would have likewise moved from statewide to districted elections for state supreme court justices. Currently, all five justices on New Mexico's supreme court are Democrats, and the amendment would have required, beginning in 2024, all newly elected or appointed justices to be a resident of the district from which they were appointed or elected. S.J.R. 21 failed to move before the end of the legislative session.
- A similar proposed amendment in **Pennsylvania** (H.B. 38) would require appellate court judges, who currently run in statewide elections, to run in districts drawn by the legislature. The amendment would require sitting judges to run for reelection in one of the seven new judicial districts created by the legislature, and it does not include any restrictions on the legislature's ability to draw (or redraw) these districts. The amendment would also give the legislature a say in the timing of the state's transition to district-based elections, meaning the legislature could game the state's move to districted elections to oust judges they dislike by drawing unfavorable district lines. H.B. 38 was first introduced by a Republican lawmaker in 2017 after Democrats gained a 5–2 majority on the state's supreme court and gained momentum after a slew of election-related lawsuits in 2020, including a decision by the state's supreme court that extended the deadline for returning mail ballots and allowed voters to use drop boxes, which was condemned by state Republicans as the product of an "activist

C346

<https://www.brennancenter.org/our-work/research-reports/legislative-assaults-state-courts-2021>

7/14

5/26/2021

Legislative Assualts on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

- court" that was "allowing one party to steal this election." H.B. 38 was approved by the Pennsylvania House Judiciary Committee. If passed by the legislature again this year, it will go on the ballot in November 2021.
- A bill in **Texas (S.B. 11)** would have consolidated the state's intermediate appellate courts by cutting the number of districts in half, amounting to a **judicial gerrymander** that would impact rural voters and voters of color. Democrats have won majorities on 7 of the state's 14 appellate courts since 2018, and the **redrawn districts** would result in 5 appellate courts with Republican majorities and 2 with Democratic majorities. Introduced by a Republican state senator, S.B. 11 is reportedly based on **recommendations** by Texans for Lawsuit Reform, a tort reform group that has **spent** well over \$4 million to support Republican judicial candidates over the years. The bill is opposed by appellate judges across the state, including one who **said** the new map would "make it such that, and virtually guarantee, that the number of justices of color that are on the bench right now would lose in the next election." S.B. 11 was approved by the Texas Senate Committee on Jurisprudence, though the vote was later reconsidered and the bill was left pending in committee.
  - Another bill in **Texas (S.B. 1529)**, which shares the same sponsor as S.B. 11, would create a statewide intermediate appellate court comprised of six justices elected statewide to hear high-profile lawsuits involving the state. Such lawsuits are usually filed in Travis County, where the Third Court of Appeals, comprised of a majority of Democratic judges, has jurisdiction. No Democrats have won a statewide race in Texas since 1994, and all sitting justices on the state's two high courts are Republican. S.B. 1529 has been **described** by a former Republican chief justice of the Fifth Court of Appeals as flying "in the face of a fair, impartial, and independent judiciary." S.B. 1529 passed the state Senate with an amendment reducing the number of justices from six to five and providing the new court would not have jurisdiction over cases in which a party is challenging the constitutionality of a state law.
  - A similar bill in **Tennessee (H.B. 1130/S.B. 868)** would have created a statewide elected trial court made up of three judges from each of the state's grand divisions to hear high-profile cases involving the state. But the bill was **amended** to create a "court of special appeals" composed of the judge before whom the case was first filed and two judges chosen by the state's chief justice from the two other grand divisions of the state. Currently, cases related to redistricting and the constitutionality of state actions are typically heard by judges in Davidson County. The bill's primary sponsor, a Republican state senator, **justified** his proposal by saying, "Why should judges who are elected by the most liberal constituency in the state . . . be the ones deciding cases that affect the state in general?" H.B. 1130 passed the state's Republican-controlled legislature and awaits the Republican governor's signature.

## Judge-Shopping for Partisan Advantage

In two states, bills would change courts' jurisdiction or alter methods for assigning cases, in an apparent effort to obtain a more favorable venue for challenges to state law or the redistricting process. This kind of gamesmanship undermines the separation of powers between the courts and the political branches of government.

C347

<https://www.brennancenter.org/our-work/research-reports/legislative-assualts-state-courts-2021>

8/14

5/26/2021

Legislative Assaulls on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

- Bills in **Kentucky** (H.B. 3) and **Tennessee** (H.B. 1196/S.B. 454) would require lawsuits challenging the constitutionality of state laws to be filed in the county where the plaintiff resides, as opposed to those states' capitals. Republicans in Kentucky have complained that the judges in Franklin County (home to Frankfort, the state's capital) are too liberal, and Republican legislators in Tennessee have said the same of the judges in Davidson County (home to Nashville, the state's capital). H.B. 3 was signed into law by Kentucky's Republican-controlled legislature over the state's Democratic governor's veto. H.B. 1196 passed the state House but otherwise failed to move before the end of the legislative session.
  - Another bill in **Tennessee** (H.B. 1436/S.B. 1363) would have required redistricting lawsuits to be heard by a three-judge panel made up of court of appeals judges chosen by the state's chief justice from each of the state's three grand divisions. H.B. 1436 passed the state House but otherwise failed to move before the end of the legislative session.
- 

## Limits to the Enforcement of Court Rulings

Proposals in ten states would either enable the override of court decisions or prohibit state officials, including judges, from enforcing particular laws or court decisions.

- Bills in **Arizona** (H.B. 2111) and **Texas** (S.B. 513) would prohibit state courts from enforcing federal acts, laws, treaties, orders, rules, or regulations that are inconsistent with the laws of those states regarding the regulation of firearms. H.B. 2111 was signed into law by Arizona's governor. S.B. 513 passed the Texas Senate.
- Similar bills in **Arkansas** (H.B. 1957, H.B. 1435/S.B. 298/S.B. 716) and **Missouri** (H.B. 85) would prohibit state courts from enforcing or assisting federal agencies or officers in enforcing any federal law, executive order, or agency directive that conflicts with the state constitution's right to bear arms. Arkansas's governor vetoed S.B. 298 but signed H.B. 1957, which was amended to provide exceptions for certain federal bans, into law. H.B. 85 passed both chambers of Missouri's legislature and awaits the governor's signature.
- Bills in **North Carolina** (H.B. 189) and **Wyoming** (H.B. 124/S.F. 81) would deem all federal acts, laws, executive orders, administrative orders, court orders, rules, and regulations whether past, present, or future that "infringe on the people's right to keep and bear arms" as "null, void, and of no effect" in the state. Similar bills were introduced in **Mississippi** and **Oklahoma** last year. S.F. 81 passed the Wyoming Senate but otherwise failed to move before the end of the legislative session.
- Bills in **Arizona** (H.B. 2650) and **Texas** (H.B. 3326) would criminalize abortion and provide that any federal law, regulation, executive order, or court decision that purports to supersede, stay, or overrule the law is unconstitutional under both the state and federal constitution and is therefore void.
- A similar bill in **Indiana** (H.B. 1539) would have also criminalized abortion and deemed any court decision enjoining the law as "nonauthoritative, void, and of no force." It would have also subjected federal officials attempting to enforce contrary court orders in the state to arrest by Indiana law enforcement. Similar bills were introduced in **Indiana** and **Missouri** last year. H.B. 1539 failed to move before the end of Indiana's legislative session.

C348

5/26/2021

Legislative Assaults on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

- In **Texas**, a similar bill (**H.B. 3641/S.B. 1671**) would declare and treat the U.S. Supreme Court's decision in *Roe v. Wade* as "void" and require all political divisions of the state, including courts, to enforce prohibitions and other restrictions on abortion without regard to *Roe*.
  - In **Indiana**, a bill (**S.B. 75**) would have deemed any "order, rule, or edict of any kind" from the executive judicial branch that "invades the constitutional or lawful authority of the legislative branch" as "null and void" until approved by the legislature. Another bill (**S.B. 379**) would have prohibited state courts from adopting administrative orders that suspend, toll, modify, amend, or prohibit the enforcement of a statute enacted by the legislature unless the court was specifically authorized by the legislature to issue such an order. S.B. 75 and S.B. 379 both failed to move before the end of the legislative session.
  - A similar bill in **Iowa** (**H.F. 752**) would provide that "no law, statute, edict, mandate, ruling, regulation, executive order, court opinion, directive, or other usurpation that is unconstitutional shall have any legal or binding force" in the state.
  - In **New Hampshire**, a proposed constitutional amendment (**C.A.C.R. 11**) would have allowed the legislature, with a simple majority vote, to present a ballot question to voters on whether a court decision interpreting the state's constitution should be overturned. C.A.C.R. 11 received a hearing in the New Hampshire House Legislative Administration Committee but later died in committee.
  - Bills in **South Dakota** (**S.B. 122**), **Texas** (**H.B. 1215/H.B. 2930**), and **Wyoming** (**H.B. 256**) would establish joint legislative committees to determine the constitutionality of federal actions, including court decisions. If the legislature declared such an action unconstitutional, state courts would be prohibited from enforcing that action. The three bills have near identical language, suggesting they may share an author. Similar bills have been introduced over the years in **Idaho** and **Oklahoma**. S.B. 122 received a hearing in the South Dakota Senate State Affairs Committee but was deferred. H.B. 256 died in the Wyoming House Corporations, Elections & Political Subdivisions Committee.
- 

## Changes to Judicial Selection

Twelve states are considering bills that would change how judges are selected, making the process more partisan or political. States use **several different methods** to select judges. Many utilize independent judicial nominating commissions to vet and recommend judicial candidates as a way to help insulate judges from political and partisan pressures during the selection process. But a majority of bills under consideration this session would either weaken states' judicial nominating commissions by giving the governor or other political actors more control over the commissions or eliminate them altogether. Others would give political actors more control over judicial selection in other ways or alter the selection process for a perceived partisan advantage.

- In **Alaska**, a bill (**S.B. 14**) would prohibit the state's judicial council from recommending a judicial candidate to the governor for appointment unless the council determined that the candidate would follow "strict constitutional interpretation of statutes and regulations and adhering to legislative intent" — in other words, the legislature's preferred methods of legal interpretation. The bill would also require a majority of the members of **C.349**

5/26/2021

Legislative Assaults on State Courts — 2021 | Brennan Center for Justice

**APPENDIX C**

the legislature in joint session to confirm the governor's nominees. S.B. 14 was approved by the Alaska Senate Judiciary Committee.

- In **Indiana**, the Republican-controlled legislature passed a bill (**H.B. 1453**) giving the state's Republican governor more control over the judicial nominating commissions used by Lake County and St. Joseph County for recommending trial court judges. The bill replaces the commissioners chosen by the local bar and local elected officials with three members chosen by the governor and three members chosen by county commissioners. Previously, both commissions were made up of an equal number of lawyers chosen by the local bar and nonlawyers chosen by local elected officials. H.B. 1453 also eliminates restrictions on the total number of commissioners from the same political party. Lake County and St. Joseph County are two of the four counties in Indiana with the largest populations of Democrats, and one of the H.B. 1453's coauthors, a Republican lawmaker, said the bill was introduced at the governor's request (a claim the governor's office later denied). H.B. 1453 was signed into law by the governor.
- A similar proposed constitutional amendment in **Indiana** (**S.J.R. 16**) would have given partisan legislators more influence over the seven-member nominating commission the state uses to nominate appellate court judges by replacing two of the three lawyers chosen by the state bar with nonlawyers chosen by the House speaker and Senate president. Currently, the commission is equally divided between lawyers chosen by the state bar and nonlawyers chosen by the governor, and it is chaired by the state's chief justice or their designee. S.J.R. 16 would have also subjected the governor's appellate court nominees to Senate confirmation. S.J.R. 16 failed to move before the end of the legislative session.
- A bill in **Iowa** (**S.F. 399**) would require Senate confirmation of the state bar-appointed lawyer members on the state's judicial nominating commission, giving legislators the power to reject the bar's appointees. Iowa's Republican-controlled legislature passed a bill in 2019 giving the state's Republican governor authority to appoint a majority of the commission.
- In **Missouri**, proposed constitutional amendments (**S.J.R. 24**, **S.J.R. 14**) would have eliminated the state's judicial nominating commission, giving the governor the power to directly appoint appellate courts judges, subject to approval by the state Senate. Republicans currently hold a two-thirds supermajority in the legislature and have accused the state's supreme court of being "rogue" and the state's nominating commission of being "too liberal." H.J.R. 24 was approved by two committees in the state House but otherwise failed to move before the end of the legislative session. S.J.R. 14 received a hearing in Missouri Senate Governmental Accountability and Fiscal Oversight Committee but otherwise failed to move before the end of the legislative session.
- In **Montana**, the Republican-controlled legislature passed a similar bill (**S.B. 140**) giving the state's Republican governor the power to directly fill interim vacancies on the state's supreme court and district courts without vetting by the state's judicial nominating commission. S.B. 140 was signed into law by the governor, prompting an immediate lawsuit by a bipartisan group of former state officials, as well as a **standoff** between Republicans in the state legislature and the state's supreme court over legislative subpoenas seeking internal court records.
- Another bill in **Montana** (**S.B. 402**), which was passed by the state's Republican-controlled legislature and would only go into effect if S.B. 140 is struck down by the state's supreme court, would increase the size of the state's judicial nominating commission from 7 members to 15, allowing the governor to appoint 12 nonlawyers, up from 4. The intent of this bill, according to its Republican sponsor, is to "give the governor a wider range of ability to make selections he would prefer to have appointed to these judicial positions," as opposed to "judges that a lot of us would have considered to be too liberal." S.B. 402 was signed into law by the state's Republican governor.
- Proposals in **Missouri** (**S.J.R. 1**), **Oklahoma** (**S.J.R. 2**), and **South Carolina** (**H. 3448/H. 4007**, **S. 192**) would limit the role of those states' nominating commissions by requiring them to submit to the governor, or the legislature in the case of South Carolina, a list of "all qualified nominees" to choose from for appointment, limiting the commission's ability to put forth a shortlist of only the most qualified candidates. S.J.R. 1 failed to

- move before the end of Missouri's legislative session. H. 3448/H. 4007 and S. 192 failed to move before the end of South Carolina's legislative session.
- In **North Carolina**, a proposed constitutional amendment (H.B. 759) would require the governor to fill vacancies on the state's appellate courts with one of three nominees recommended by the state executive committee of the same political party as the vacating judge or justice.
  - A bill in **Ohio** (H.B. 149/S.B. 80), sponsored only by Republicans, would require party labels during the general election for appellate court races but not lower court races. Currently, all judicial candidates are chosen in partisan primaries but appear on the general election ballot without party labels. There are advantages and disadvantages to listing party labels, but making such a change for a perceived partisan advantage threatens to further politicize the selection process. Republicans have lost three seats on Ohio's supreme court in the last two election cycles despite winning other statewide races on the ballot, and Democrats have a chance to flip the court majority next year. Both bills are opposed by the state judiciary, and the state's Republican chief justice has advocated for the removal of party labels from the ballot for judicial primaries. Similar measures to make select judicial elections partisan have been introduced in **Kentucky** (H.B. 437, H.B. 517, H.B. 536) and **Montana** (H.B. 342, H.B. 355). Proposals to make all judicial elections partisan have been introduced in **Arkansas** (H.J.R. 1019), **Kentucky** (H.B. 474), **Oklahoma** (H.J.R. 1009), and **West Virginia** (S.B. 639). S.B. 80 passed the Ohio Senate. H.B. 437, H.B. 517, H.B. 536, and H.B. 474 failed to move before the end of Kentucky's legislative session. H.B. 342 and H.B. 355 were both approved by the Montana House Judiciary Committee but were voted down on second reading. H.J.R. 1019 failed to move before the end of Arkansas's legislative session. S.B. 639 failed to move before the end of West Virginia's legislative session.

## Altering Judicial Term Lengths and Limits

Proposals in Massachusetts would alter judicial term lengths in ways that would make state supreme court justices and lower court judges more dependent on political actors for their job security. The shorter a judge's term, the greater the pressure that judge may feel to rule with electoral or political considerations in mind. In fact, studies have shown that **reselection pressures** can affect decision-making in troubling ways, including by leading judges to rule more harshly in criminal cases towards the end of their terms. Term limits can be desirable in many instances, but judges must be allowed sufficient time to serve, and judges' tenure should not be manipulated for partisan reasons.

- In **Massachusetts**, where judges are appointed by the governor with approval by the state's governor's council and serve until the state's mandatory retirement age of 70, a proposed constitutional amendment (H. 81/S. 1070) would instead provide for an initial term of seven years and require those wishing to serve for additional seven-year terms to be approved by a majority vote of the council after "due notice" and a public hearing. Another proposed amendment (S. 19) would provide for 10-year terms for appointed judges and require those wishing to serve for additional terms to be reappointed by the governor, subject to approval by the council. H. 81 was introduced by a Democratic lawmaker, and S. 1070 and S. 19 were introduced by Democratic lawmakers "by C3SI"

request" of their constituents, a practice common in Massachusetts. Currently, all of the justices of Massachusetts's supreme court were appointed by Republican governors. H. 81/S. 1070 and S. 19 received a hearing in the Massachusetts Joint Committee on the Judiciary but were voted down in committee.

## Allowing Firearms in Court

Courts continue to be pulled into broader efforts to empower gun owners to carry weapons in public spaces.

- Bills in **Georgia** (S.B. 277), **Illinois** (H.B. 784, H.B. 3353), **North Carolina** (H.B. 194), **South Carolina** (H. 3039/S. 32/S. 155 and H. 3287), **Texas** (H.B. 1587/H.B. 1911, H.B. 2900, S.B. 2224), and **West Virginia** (H.B. 3000) would require courts to allow judges, retired judges, court employees not tasked with security, attorneys general and assistant attorneys general, or others to carry a firearm into a courthouse even if that court had a rule prohibiting weapons. S.B. 277 failed to move before the end of Georgia's legislative session. H.B. 784 and H.B. 3353 both received hearings in the Illinois House Judiciary Committee but were voted down in committee. H.B. 194 passed the North Carolina House. H. 3039/S. 32/S. 155 and H. 3287 failed to move before the end of South Carolina's legislative session. H.B. 1911 was approved by the Texas House Committee on Homeland Security & Public Safety. H.B. 2900 received a hearing in the Texas House Committee on Homeland Security & Public Safety but was left pending in committee. H.B. 3000 failed to move before the end of West Virginia's legislative session.
